No. 3300 of 1907.

From

H. N. ALEXANDER, Esquire,
Inspector-General of Prisons,
Bombay Presidency;

To

THE SECRETARY TO GOVERNMENT,
Judicial Department,
Bombay.

*Inspector-General of Prisons' Office,
Poona, 12th April 1907.*

Sir,

I have the honour to submit the Annual Administration Report, together with the usual statistical tables, on the Prisons and Jails in the Bombay Presidency (including the Province of Sind and the Settlement of Aden) for the year 1906. The office of the Inspector-General of Prisons was held by Major J. Jackson up to 4th March 1906 on which date I assumed charge of the Department.

JUDICIAL.

2. The number of Central, District, Special and Extra-Mural Prisons has undergone no change during the year under report. The arrangement of grouping together the statistics of all 3rd Class Subsidiary Jails with those of Lock-ups has been continued in this report. The new District Prisons of Karáchi and Sukkur were occupied on the 6th September and 28th November 1906 respectively. The 2nd Class Subsidiary Jail at Broach was abolished on 15th April 1906 under the orders of Government contained in Judicial Department Resolution No. 1569, dated 20th March 1906.

3. From the General Summary preceding the statements in the appendices to this report it will be seen that the total population of all classes of prisoners confined in Prisons, Subsidiary Jails, Lock-ups and Civil Jails during the year 1906 has been 92,408 against 91,457, an increase of 951. The daily average population has been 9,357, showing an increase of 189 over the figures of the year previous:

4. The following table, which compares the figures of the past two years, refers to the admission of convicts into Prisons and 1st and 2nd Class Subsidiary Jails only:—

		1905.			1906.		
		Males.	Females.	Total.	Males.	Females.	Total.
Number remaining on last day of previous year.	{ Prisons	7,493	226	7,719	7,470	260	7,730
	{ Jails	278	10	288	265	20	285
Imprisoned during the year.	{ Prisons	13,704	1,129	14,833	13,490	1,152	14,642
	{ Jails	1,877	196	2,073	1,834	216	2,049
Total	{ Prisons	21,197	1,355	22,552	20,960	1,412	22,372
	{ Jails	2,155	206	2,361	2,099	235	2,334
Grand Total		23,352	1,561	<u>24,913</u>	23,059	1,647	<u>24,706</u>
Daily average number		7,662	276	7,928	7,723	274	7,997

5. There has been a small decrease in the number of convicts admitted. The only Prisons that show a marked increase are His Majesty's House of Correction and the District Prison at Dhárwár. In the first named Prison the increase is due to the admission for over a month of prisoners who would ordinarily have been sent to His Majesty's Common Prison. Owing to the outbreak of cholera the last named institution was closed to new admissions for a little over a month. The increase in the Dhárwár Prison is ascribed to scarcity. There is a decline in admissions, principally in the Common Prison and the Shikárpur District Prison. The reason given for the increase in the House of Correction explains the decrease in the Common Prison. In the Shikárpur Prison the decrease is partly due to the Baluchistán prisoners being now sent direct to the Hyderabad Central Prison and not to Shikárpur.

6. With regard to the disposal of prisoners there is an increase of 161 in the number of prisoners transferred to other Jails. This is due to rather heavy transfers having been effected from the Karáchi and Shikárpur Prisons prior to their move to the new Prisons in Karáchi and Sukkur respectively; also to the transfer to different Prisons, at the request of the Police Department, of members of gangs of professional criminals with a view to prevent schemes being hatched by these people while in Prison. On the 20th May 1906, 80 male and 5 female transports were deported to the Andamans against 185 males and 11 females in the previous year. The decrease is due to the suspension of the deportation of male term convicts. By the order of Government 24 prisoners were released—Yerávda released 2 and the House of Correction 1 on the ground of sickness, Hyderabad and Shikárpur one each by order of the District Magistrate under the authority vested by Government Resolution, Judicial Department, No. 6, dated 3rd January 1898. Six ex-military convicts were sent to England from the House of Correction. Eight unfit life transports were released—4 from the Yerávda Central Prison, 2 from the Ahmedabad Central Prison and 1 each from the Prisons of Bijápur and Kárwár. "On other grounds" the Central Prisons of Yerávda and Ahmedabad released 2 each and Aden 1. The heading "Transferred to Lunatic Asylums" shows an increase of 9 over the figures of the previous year. Twenty-five prisoners were executed as compared with 40 in 1905. The number of deaths shows an increase which will be commented on later. There were two State prisoners in confinement at the close of the year.

Statement No. II.—Religion, age, education and previous occupation of convicts.

7. With reference to the figures appearing in the marginally noted statement, it will be observed that there is an increase under "Native Christians," "Hindus and Sikhs," "Buddhists and Jains," while all the others show a decrease.

8. The number of juveniles received during the year under report shows a fall of 6. Sixteen juveniles were previously convicted. Out of the total 119 male and 24 female youthful offenders convicted, 79 males and 22 females were sentenced to one month and under, 28 males and 1 female to above one month and under six months, and 12 males and 1 female to over six months. Of the 119 male and 24 female juveniles no less than 50 males and 14 females were admitted into the Common Prison, Bombay, and of these sixty were sentenced to one month and under. These children were convicted for the most part of trivial offences, such as begging and road obstruction. Hyderabad shows 8 children and Wadhván 9 children sentenced to one month and under, while other districts only show one or two such convictions. All the other heads under "Age" with the exception of females under sub-heads 40 to 60 and above 60 show a decrease due to the fall in admissions. Under the head "Education of convicts" the sub-head "Able to read and write" shows an increase of 209, while the remaining heads show a decline. With the exception of the sub-heads "Professional persons," "Persons employed in mechanical arts, manufactures, etc.," and "Miscellaneous persons not classed otherwise," all the other sub-heads of "Previous occupation" show a fall. Under "Females" the sub-heads "Unmarried" and "Prostitutes" show a decrease, while the remaining sub-heads show an increase. This is due chiefly to larger admissions at the Common Prison, Bombay. The percentage of the total number admitted to free population according to the census of 1901 is 0.158 as compared with 0.163 during the year previous.

9. There has been an increase under the heads "Above 3 months and not exceeding 6 months" and "Sentenced to transportation for life," a slight increase under "Not exceeding one month" and "Above one year and not exceeding 2 years," "Above 5 years and not exceeding 10" and "Exceeding 10 years," while the other heads show a decline. The increase under those sentenced to transportation is most marked in the Prisons of Yeránda, Ahmedabad, Thána and Dhárwár. The number sentenced to death has fallen from 76 in the year 1905 to 46 in the year under report. There were 1,365 prisoners sentenced to simple imprisonment as compared with 1,627 in 1905—a fall of 262. Four hundred and fifty persons were sentenced to rigorous imprisonment with solitary confinement as compared with 436 in 1905, 365 in 1904, 46 in 1902 and 30 in 1901. Two hundred and twenty-seven persons were sentenced to rigorous imprisonment with whipping as compared with 177 in 1905. It will be observed that 6,277 persons were sentenced to "Not exceeding one month;" of these 3,296 or more than one half were in the Common Prison, Bombay. A sentence not exceeding one month is of little value. In Bombay many of those thus sentenced are beggars. They come into the Prison, are washed, which they probably do not appreciate, and fed and thus regain strength to continue the only manner of obtaining a living which appears open to them. It seems to me that this method of dealing with these people leads to no good result. There is, as everyone knows, a great demand for labour in Bombay, and therefore it is probable that many of the younger and less depraved beggars could be gradually rescued from the streets and put in the way of gaining an honest livelihood if a better system of reform could be devised. Some sort of colony might be established where these vagrants could be kept and taught a labourer's work, thus acquiring the habit of doing work. To the idle youth there must be something fascinating about begging, and once that method of gaining a livelihood is adopted it is, no doubt, very hard for the beggar to take to another. This subject has attracted attention in Bombay, but owing to the many difficulties that surround it no scheme to reform this class has been seriously considered. As regards persons thus sentenced outside Bombay I would ask that the provision of sections 562-564, Criminal Procedure Code, relating to first offenders, may be more generally applied. In Government Resolution, Judicial Department, No. 2575, dated 11th May 1906, the matter was brought to the notice of Magistrates. What success attended this reminder of the existence of these sections of the Code I do not know, but, as so little use has been made of these sections hitherto, it is probable that the attention of the Magistrates will have to be called frequently to the harm they do in sentencing all petty offenders to short terms of imprisonment. In paragraph 39 of their report, dated July 1905, to the Secretary of State for the Home Department the Commissioners of Prisons draw attention to discharges under the First Offenders Act. They allude to the manner in which the French deal with this subject and the benefits derived therefrom in that country. The laws in France and in this country are not the same, for in France a conviction takes place but the execution is held over. I am inclined to think the French law is superior to our own, but at any rate under our procedure Magistrates are enabled to deal lightly with first offenders.

10. The number of previously convicted prisoners identified by the Jail officials after arrival in Prison has risen to 645 from 565 in 1905. Out of a total number of 2,739 previously convicted prisoners admitted during the year under report the number classified as habituals was 1,552 or 229 more than the year previous. The increase is due partly to greater efficiency of the Fingerprint Impression Bureau and partly to increased vigilance exercised by the Police and Jail staff in tracing previous convictions.

Statement No. III.—Nature and length of sentences.

Statement No. IV.—Re-convictions.

1904 ...		14,221	1,914	448	46	2,408	1,181

11. From the information supplied by the Inspector-General of Police it appears that 918 persons were identified in the Bombay Presidency, exclusive of Sind, by means of finger-tip impressions as compared with 826 in the year previous. Of the 918 prisoners, 103 were identified at Yeránda, 140 in the Common Prison, 93 in Thána, 132 in Ahmedabad, 63 in Sholápur, 63 in Násik, 53 in Dhulia, 56 in Belgaum, 36 in Dhárwár and the rest in other parts of the Presidency.

12. Nine prisoners escaped during the year under report against the same number in 1905. Of the nine, 7 prisoners got away from inside and 2 from outside the Prisons. Of the former 2 escaped from the Sind Gang and one each from Yeránda, Dhulia, Ahmedabad, Rájkot and the Subsidiary Jail at Deesa. There were 2 escapes from the Sind Gang. Both prisoners were captured and prosecuted under section 224, Indian Penal Code, and each sentenced to 6 months' rigorous imprisonment. The Yeránda prisoner was a convict officer who escaped while guarding a breach made in the main wall. This prisoner was captured and sentenced to 4 months' rigorous imprisonment. One convict officer escaped from Rájkot through the connivance of the senior warder on duty. The warder was prosecuted and sentenced to 3 months' simple imprisonment under section 223, Indian Penal Code. One convict overseer escaped from the hospital in Ahmedabad and one from the backyard at Dhulia. The Dhulia prisoner was re-captured and when prosecuted was sentenced to 1 year's rigorous imprisonment. The Deesa prisoner escaped from the latrine and was captured the same day. Of the two escapes from outside, one got away

Statement No. V.—Escapes and re-captures.

from Hyderabad and one from Shikárpur. The warders and convict officers responsible for the escapes were either prosecuted or departmentally punished in all cases. Of the seven prisoners who escaped from within the walls of prisons four were convict officers and thus, to a certain extent, trusted men.

13. The statement noted in the margin relates to the offences committed by and the punishments awarded to convicts confined in the Prisons and 1st and 2nd Class Subsidiary Jails. The offences dealt with by Criminal Courts show a decrease of 8 over the figures of the year previous as will be seen from the details given in the margin. The

		Section 52, Prisons Act.		1905.	1906.	
Relating to work	13	2		decrease is mostly due to fewer
Do. all other breaches of Jail rules	3	...		prosecutions for offences relating
Do. Prohibited articles	7		to work. Out of the 13 prisoners
		Indian Penal Code.				prosecuted for short work in
Escape	7	5		1905, 10 were from the Dhárwár
Attempting to escape	1	...		Prison. The number prosecuted
Assault	2		this year is only 2 for persistently
		Total		24	16	refusing to work.

14. It will be noticed from the subjoined table that the number of offences has risen from 14,441 in 1905 to 16,199 during the year under report, or an increase of 1,758 over the figures of the previous year.

		1905.		1906.	
Offences dealt with—					
By Criminal Courts		24		16	
		Dealt with by minor punishments.	Dealt with by major punishments.	Dealt with by minor punishments.	Dealt with by major punishments.
By Superintendents—					
Relating to work		5,928	1,105	6,055	1,973
Do. prohibited articles		1,712	505	1,853	523

All other breaches of Prison rules		4,078	852	4,314	1,078
Total		11,801	2,640	12,374	3,825

15. The following table shows the nature of the punishments awarded during the past two years. It will be seen that the total number of minor and major punishments awarded by Superintendents during the year under report was 16,399 and the total number of offences was 16,199. This difference is due to 200 offences having been dealt with during the year 1906 by the award of combined punishments.

						1905.	1906.
Punishments inflicted—							
By Criminal Courts						24	16
By Superintendents—							
Minor.	{	Warnings	1,911	2,031

		Fetters or handcuffing behind or to a staple	1,657	2,368
		Corporal punishments	79	100
		Combination of minor punishments	279	177
		Other punishments	280	553
Total						2,657	3,874
Grand Total						14,648	16,415

16. Of the 16,399 punishments awarded by the Superintendents of Prisons and Jails, 12,525 or 76 per cent. belong to the minor class and 3,874 or 24 per cent. belong to the major class. All the heads under minor punishments show an increase with the exception of the heading "Other punishments" which shows a very slight decline. Under major punishments the increase is most marked under the heads "Separate, cellular and solitary confinement," "Fetters or handcuffing behind or to a staple" and "Other punishments." The Central Prisons of Yerávida and Ahmedabad and the Thána Special Prison are mainly responsible for the rise. Major Jackson, Superintendent, Yerávida Central Prison, had considerable trouble with his prisoners, especially the habituals, during the year. Out of 5,968 punishments awarded to male convicts, 2,009 or 33 per cent. fell to habituals, and the average number of habituals was 325 out of a population of 1,465. He writes:—"It is, however, on comparing punishments awarded for malingering, assaults and illicit articles that the habitual comes out worse: malingering—habituals 134, non-habituals 113; assaults—habituals 41, non-habituals 22; illicit articles, habituals 304, non-habituals 237 All the best conducted habituals are in the Press or on other light work. The following shows how the punishments were distributed on all the habituals who passed through the prison last year (533). Not punished 186, punished once 100, twice 62, three times 40, four times 31, the remaining 114 punished more frequently, one prisoner receiving as many as 42 punishments. When we come to deal with work the habitual, however, as a rule compares better with the first conviction man, but this is mainly because he has ground grain before and knows the knack, and so on. The great increase in punishments is almost entirely due to an epidemic of short work in June, July, August and September: in grinding grain. This form of work during these four months accounted for 977 punishments amongst non-habituals and 134 amongst habituals. Indeed, it may be said that there was a determined combination not to give full task, and on several occasions the ration was not completed and the men had to be kept

grinding until late in order to have the flour ready for the next day. In October a change came and the men worked well thenceforward." Even the female convicts at Yeránda gave more trouble than usual this year. Bijápur, Kárwár and Ratnágiri attribute a rise in punishments to local and Bombay habituals. The Bombay habituals always give trouble in District Prisons. Ahmedabad reports that more than one-fourth of the punishments were inflicted on habituals. The Superintendent of the Karáchi Prison writes:—"The habituals are a constant source of trouble in this Jail and they account for 288 punishments. The punishments among habituals have decreased since the occupation of the new Prison and will probably decrease still further during the current year Prison discipline had no marked effect on the class in the old Jail. In the new Jail it has, as they are all confined in cells separately at night." The Superintendent at Thána also complains of bad behaviour of habituals in his Prison. There was an increase of assaults dealt with by major punishments at Yeránda, Ratnágiri, Thána, Ahmedabad and Karáchi, for which the habitual is mainly responsible. The cells alluded to in paragraph 4 of Government Resolution, Judicial Department, No. 2837, dated 24th May 1906, are in course of construction and will be in use this year and should prove of great assistance to the Superintendent. The separation of habituals and casuals is, in my opinion, the means to be adopted to reduce Prison crime. In only two Prisons—Dhulia and Hyderabad—are these two classes entirely separated. At all Prisons these classes are separated at night, but this is by no means sufficient, for it is in the daytime while at work when they should not meet. Captain Twigg solved this problem very satisfactorily at Hyderabad, and I shall be surprised if there is not a marked improvement in the discipline at that Prison. The Superintendent of the Ahmedabad Central Prison is trying to separate the two classes, but there are certain difficulties in his way at present. However, I have hopes that he will, in time, succeed. At the new Prison, Karáchi, there are special wards for habituals, but they can still meet the casuals in the daytime. Here, again, we are trying to arrange to keep the two classes apart. At the new Prison, Sukkur, habituals live and work in a yard by themselves, but the accommodation is very limited. However, as this Prison is certain to be continually overcrowded habituals will be transferred frequently to Hyderabad and thus we shall probably be able to keep these two classes apart. At Yeránda we must wait till the Press is moved out of the barracks and into its own building before anything can be done to separate the prisoners during the day. I am afraid, however, that the Press itself will prevent our carrying out this very desirable arrangement. Whatever happens, the Press must be supplied with convicts, and therefore habituals will probably have to be sent there. In the new Bombay Prison, when built, there will be perfect separation between habituals and casuals. In the new Prisons at Karáchi and Sukkur cubicles have been introduced. They do not altogether take the place of cells but they are extremely useful and meet with approval. Naturally the prisoners dislike them as they cannot wander about the barrack at night and talk to their friends.

17. The subjoined table shows the particulars as to the number of stripes inflicted on prisoners during the year 1906 in our Prisons. The corporal punishments have risen from 79 in 1905 to 100 during the year under report, or an increase of 21 over the figures of the year previous. The House of Correction, Bombay, the Yeránda Central Prison and the Ratnágiri Prison have mainly contributed towards the rise. In the House of Correction, six floggings were inflicted for assaults on warders and convict officers and persistent short work. In the Yeránda Central Prison 20 corporal punishments were inflicted on habituals out of 31. The increase in the Ratnágiri Prison is due to bad behaviour of habitual convicts transferred to that Prison from Bombay. This increase is naturally disappointing, but I have the satisfaction of knowing that all the Superintendents are averse to flogging and never award this punishment without the very fullest consideration and only when they are satisfied that no other punishment will meet the case.

Names of Prisons.	1 Total number of male prisoners for the year.	2 Total number of prison offences.	3 Total number of prisoners punished by whipping.					4 Percentage of column 3 to column 1.	5 Percentage of column 3 to column 2.	6 Number of prisoners in whose case (a) death or (b) illness was directly or indirectly the effect of corporal punishment.

* The figures in this column exclude the number of prisoners moved from prison to prison within the Department.

18. During the year under report 5,653 prisoners were fettered compared with 5,910 during the year previous. The small decrease calls for no comment.

MARK SYSTEM.

19. It will be seen from the figures appearing in Statement C appended to this report that 2,581 prisoners were released during the year under the remission system as compared with 2,342 in the previous year. The percentage during the year 1906 of those released under the mark system to the total number who might have been released under that system if of average good conduct up to the date of release was 99.2 against 98.5 in 1905. The practice of mustering prisoners and reading and explaining to them the benefits of the Mark Rules has been continued. Special reward under Rule 515 (c) — Remission for committing no offence during the previous 12 months — was granted to 1,240 prisoners. In my report for 1903 I mentioned that many prisoners understood that they could earn 15 days' remission if they committed no offence in one year but did not know that they could also earn about 25 days' remission under the ordinary rules. Much more trouble has been taken since then to instruct convicts in the mark system. At all inspections which I have made since my return from furlough I have questioned prisoners regarding the remission they could hope to obtain, and I should say that prisoners as a whole understand that good conduct is recognized and that they do benefit thereby. Educated prisoners, convict officers, habituals and intelligent uneducated convicts have a very fair knowledge of the system, whereas the less intelligent uneducated convict knows that he can obtain about one month's remission every year if he works properly and possibly also fifteen days besides. With the exception of educated convicts who can study their history tickets it is improbable, however, that ordinary convicts know what number of marks they have to their credit.

20. The average number employed as Prison officers during the year 1906 in Prisons and 1st and 2nd Class Subsidiary Jails was 1,012 males and 10 females against 1,052 males and 10 females, or a decrease of 40. This decrease calls for no remarks.

21. The statement noted in the margin shows the different diet scales in use in Prisons and 1st and 2nd Class Subsidiary Jails. These scales have been found to work satis-

factorily. Such changes as have been made during the year have been noted in the fifth column of the statement.

22. This statement deals with under-trial prisoners confined in Prisons, Subsidiary Jails and Lock-ups. The number of prisoners admitted during the year under report shows an increase of 1,202 over the figures for the year previous. The daily average strength has also risen from 1,174 in 1905 to 1,317 in 1906, due to increased admissions.

23. The number of escapes shows an increase of 16 over the figures of the year 1905. Of the 28 escapes, 15 under-trials escaped from the 3rd Class Subsidiary Jails in the Bijápur District, 2 each from the Subsidiary Jails in the districts of Lárkhána and Thar and Párkar and 1 each from the districts of Hyderabad, Kaira, Surat, Kolába, Ratnágiri, Dhárwár, Kánara, Násik and Khándesh. Of the 15 escapes from the Bijápur District, 12 prisoners escaped from the Badámi 3rd Class Subsidiary Jail. Thirteen under-trials were confined in one of the barracks of the Jail, and as there was a quarrel in that barrack the Constable in charge opened the door with a view of shifting some of the prisoners to another barrack and thus stop the quarrel. As he opened the door the prisoners overpowered him and 12 of them escaped. The two Constables on duty were, it is reported, prosecuted under section 223, Indian Penal Code, and the other sentries on duty were departmentally dealt with.

24. The deaths have risen from 19 in 1905 to 45 in the year under report. Of the 45 deaths, 10 occurred in Prisons. Seven deaths took place in His Majesty's Common Prison, Bombay, which were due to cholera, two in the Hyderabad Central Prison, due to pneumonia and epilepsy, while one prisoner died of dysentery in the Bijápur Prison. Thirty-three male and two female prisoners died in 3rd Class Subsidiary Jails and Lock-ups. Of this number 5 males died in the 3rd Class Subsidiary Jails in the Surat District, 3 males died in the 3rd Class Subsidiary Jails in the district of Upper Sind Frontier, 2 males and 1 female died in the 3rd Class Subsidiary Jails in the Thána district, 2 males each died in the Subsidiary Jails in the districts of Hyderabad and Khándesh, and 1 male each died in the Subsidiary Jails in the districts of Karáchi, Thar and Párkar, Ahmedabad, Bijápur, Sátára and Sholápur. Five males each died in the Lock-ups in the Surat District and the Bombay City, while 3 males and 1 female died in the Lock-ups in the Poona District.

25. The number remaining on 31st December 1906 was 171 males and 8 females in Prisons, 118 males and 7 females in the 1st and 2nd Class Subsidiary Jails, and 680 males and 28 females in 3rd Class Subsidiary Jails and Lock-ups, thus making a total of 969 males and 43 females.

26. The year 1906 opened with 52 male and 2 female prisoners in Civil Jails. Eight hundred and nineteen males and three females were received during the year and 822 males and 5 females were released, thus leaving a balance of 49 male prisoners at the close of 1906. The daily average has fallen from 66 in 1905 to 43 during the year under report. The total cost has slightly risen, the figures being Rs. 5,833-2-3 in 1906 against Rs. 5,732-10-6 in 1905. The cost per head has, however, risen from Rs. 86-13-9 in 1905 to Rs. 135-10-6 in 1906, due entirely to a small daily average number of civil prisoners.

FINANCIAL.

27. The statements noted in the margin deal with the gross expenditure on account of convicted and under-trial prisoners confined in the Central, District and Extra-Mural Prisons and the Subsidiary Jails and Lock-ups. The cost of Police Guards has been omitted as usual, except in the case of the Central Prisons of Yeránda and Ahmedabad and the Special Prison of Thána where the guarding has been undertaken by the Reserved Armed Warder Guard. The Ahmedabad Guard was installed in April 1906. The realization from the sale-proceeds of garden produce has been deducted from the total charges. The total expenditure during the year 1906 has been Rs. 7,71,659 and the cost per

head Rs. 82-13-7 against Rs. 6,99,829 and Rs. 76-14-2 in the year previous. This increase is mainly due to the average number of prisoners being larger and increased rate for food-grains.

28. The total cost under this head has risen from Rs. 2,59,700 in 1905 to Rs. 2,78,449 during the year under report, or an increase of Rs. 18,749. This increase is due to the pay of Armed Warder Guard of the Thána Special Prison and the Yeránda Central Prison having been drawn for the whole year and in the case of the Ahmedabad Central Prison for nine months; also to the grant of grain compensation, to increments drawn by Jailors and to the salary of the Carpenter Instructor at Dhárwár. There is an increase under "Inspection and General Superintendence" which is due to my drawing the full pay of my appointment.

29. Both the total cost and cost per head under "Dietary charges" have risen from Rs. 2,90,088 and Rs. 31-13-11 in 1905 to Rs. 3,41,725 and Rs. 36-11-0 respectively during the year under report. This increase is entirely due to unfavourable contract rates for staple food-grains.

30. The value of vegetables and other supplies from the gardens attached to our Prisons and Jails shows an increase of Rs. 2,027 over the figure for the year 1905, the figures being Rs. 19,533 in 1906 against Rs. 17,506 in the year previous. The gardens attached to the Prisons at Yeránda, Dhulia, Dhárwár, Karwár, Thána, Ahmedabad and the Sind Gang show better results.

31. The total cost and cost per head under "Hospital charges" has been Rs. 33,899 and Rs. 3-10-3 in 1906 against Rs. 28,959 and Rs. 3-2-11 respectively during the year previous. The increase is due in a measure to increased rates for food-grains and more sickness which necessitated the liberal issue of extras. The increase is most marked in the two Bombay Prisons and the Central Prisons of Yeránda and Hyderabad. In the Central Prison, Yeránda, it is due to the value of medicines supplied in 1905 having been adjusted in the year under report; also to an epidemic of diarrhoea and dysentery during the rains necessitating a large issue of milk and other extras, also to the admission of many old broken down prisoners who had to receive extras. In the Common Prison there was a more liberal issue of extras and an unusually heavy expenditure in medicine.

32. The expenditure under this head has fallen from Rs. 33,869 in 1905 to Rs. 32,761 in 1906. This is due to a smaller quantity of woollen clothing having been indented for during the year. The cost per head has also fallen from Rs. 3-11-6 in 1905 to Rs. 3-8-3 during the year under report.

33. The total cost and cost per head under this head has fallen from Rs. 23,352 and Rs. 2-9-1 in 1905 to Rs. 17,797 and Re. 1-14-7 during the year under report. The sub-heads "Charges for conservancy, cleansing and purifying" and "Charges for water-supply" show an increase, while the sub-head "Extraordinary charges" shows a decline, due entirely to the fact that during the year under report no amount whatever had to be paid to the Bombay Municipality for the treatment of prisoners in Municipal Hospitals as was the case during the year 1905.

34. This head shows a decline in the total cost and cost per head, the figures being Rs. 24,576 and Rs. 2-11-2 in 1905 against Rs. 24,033 and Rs. 2-9-3 respectively during the year under report.

35. The total cost and cost per head under the marginally noted head has risen from Rs. 23,639 and Rs. 2-9-7 in 1905 to Rs. 25,396 and Rs. 2-11-8 respectively in 1906. The increase is due to larger payments made on account of gratuities to released convict officers, to new uniforms for the Armed Warder Guard at Ahmedabad and the newly enlisted warders at Karáchi,

heavier lighting charges at the new Prison, Karáchi, and at the Sind Gang, and to the increased expenditure under 3rd Class Subsidiary Jails and Look-ups.

36. The total cost under this head shows an increase of Rs. 20 over the figure for the year previous, while the cost per head shows a trifling decline over the figure for the year 1905.

Travelling allowances.

37. The expenditure under this head has risen from Rs. 8,596 in 1905 to Rs. 9,640 during the year under report. The Central Prison of Yeránda and the Sind Convict Gang are mainly responsible for this rise. The increase is due in the case of the Yeránda Central Prison to the supply of quinine having been despatched on a larger scale to indenting officers, necessitating the purchase of a larger number of service postage stamps, and to binding charges for 1905 having also been included in this year's report. The payment of rent for land occupied at Pad Idan and Bhiria Road accounts for the increase in Sind Convict Gang.

Contingencies.

38. The total cost and cost per head under this head has increased from Rs. 4,009 and Re. 0-7-1 in 1905 to Rs. 4,893 and Re. 0-8-5 respectively during the year under report. This increase is mainly due to purchase of an alarm bell for the Rájkot Prison and the purchase of dead-stock articles for the new Sukkur Prison, the old unserviceable dead-stock articles having been sold prior to the transfer of the Prison from Shikárpur.

Extraordinary charges for live-stock, tools and plant.

39. The statement noted in the margin deals with the employment of convicts in our Prisons and 1st and 2nd Class Subsidiary Jails. It will be seen that the average number of prisoners sentenced to labour has increased in our Prisons from 7,501 in 1905 to 7,555 in 1906, while there is an increase of 6 in 1st and 2nd Class Subsidiary Jails over the figures of the year previous. All the heads, with the exception of "Prison officers," "Prison servants," "Grinding grain, etc.," and "Extra-mural labour," show an increase in Prisons, while the figure under "Gardening" has remained the same. The small increase under other heads is due to increased average strength and calls for no comment.

Statement No. XI.—Employment of convicts.

40. The marginally noted statement deals with the net cash earnings of convicts sentenced to labour. The cash earnings have increased from Rs. 1,18,268 in 1905 to Rs. 1,19,164 during the year under report. The House of Correction, Bombay, the Central Prison, Yeránda, and the Prisons of Dhárwár, Kárwár, Thána and Karáchi and the Dekhan Convict Gang show a marked decline, while all the other Prisons show an increase. In the House of Correction the decline is due to demand for coir matting from Jails having fallen and to Rs. 1,368, the value of matting supplied in December 1906 to the Marine Store-keeper, Bombay, not having been adjusted during that year. The decline in the Yeránda Central Prison is chiefly due to the enhanced rate of paper during the year under report. The total cost of paper supplied in 1905 was Rs. 71,915-15-0 at an average rate of Rs. 6-10-0 per ream, while in 1906 the same was Rs. 85,196-7-11 at an average rate of Rs. 8-1-0 per ream. The fall in the Dhárwár and Kárwár Prisons is due to a large stock of raw material having remained on hand and to larger outstandings at the close of the year under report. In the case of the Dhárwár Prison the purchase of teakwood of the value of Rs. 4,000 for the carpentry work which is carried out in that Prison has increased the value of raw materials on hand. The large falling off in the cash earnings of the Thána Special Prison is due partly to a smaller average number of prisoners employed in the factory and partly to paucity of orders. The decline in the cash earnings of the Karáchi Prison is due to the move of the Prison into the new premises, which necessitated the closing of the factory for a period of two months. It is also due to decline in orders for regimental carpets and to the demand for wire netting having ceased during the year under report. Out of the sum of Rs. 1,19,164 mentioned at the commencement of this paragraph a sum of Rs. 92,250 represents the profits of our Prison factories, Rs. 24,999 of extra-mural labour and Rs. 1,914 of our 1st and 2nd Class Sub-

Statement No. XII.—Net cash earnings.

subsidiary Jail factories. The extra-mural labour shows a large increase which will be commented upon later on. The average cash earnings of those sentenced to labour in our Prisons and 1st and 2nd Class Subsidiary Jails have remained the same, *viz.*, Rs. 15-3-0 in both the years 1905 and 1906, while those employed on Jail manufactures show a falling off from Rs. 42-11-0 in 1905 to Rs. 42 during the year under report.

41. The value of Jail-made articles sold to other Government departments during the year under report has been Rs. 19,305 as against Rs. 18,221 in the year 1905, or an increase of Rs. 1,084. The Commissariat, Marine and Military Departments show a decline, while Public Works, Telegraph and other Civil Departments show an increase. The figures for 1906 are:—Public Works Department Rs. 3,454, Telegraph Department Rs. 617, other Civil Departments Rs. 13,571, Marine Department Rs. 730 and Military Department Rs. 933.

42. This Gang was located at Ganja Takar near Hyderabad throughout the year. The earnings of the Gang have risen from Rs. 3,719 with a daily average of 380 prisoners in 1905 to Rs. 19,071 with an average of 444 prisoners during the year under report. Throughout the year the prisoners were employed on ballast work on North-Western Railway. A detachment of this Gang was located at Kathar for laying down and spreading the ballast on the line. It will be seen that this Gang shows good results, due to uninterrupted work secured for the prisoners.

43. This Gang was located at Visápur in the Ahmednagar District throughout the year. The earnings of the prisoners have fallen from Rs. 4,225 with an average of 876 prisoners in 1905 to Rs. 3,453 with an average of 693 prisoners during the year under report. The decline is due partly to the average number employed on the work being less than the previous year and partly to the payment of grain compensation to the temporary warders employed for guarding the prisoners on work.

44. The result of this industry in the Central Prisons of Yeránda and Hyderabad show a loss of Rs. 479 during the year as compared with a profit of Rs. 2,192 in the year 1905. The value of quinine and packing materials purchased has been Rs. 22,631 during the year under report against Rs. 19,791 in the year 1905, and the amount paid into the Treasury has been Rs. 24,283 against Rs. 15,867 in the year 1905. A sum of Rs. 371-8-6 was written off during the year under report, being the difference between the value of old permanent advance supplied to the Post Offices and the actual amount recovered. This was alluded to in paragraph 45 of last year's report. The three packages of quinine containing 5-grain packets valued at Rs. 3 came back to us for conversion into 7-grain packets. On arrival those three packages were only worth Rs. 2-10-0, the actual value of the quinine, 2 annas cost of packing and money order commission per package being now lost. A sum of Rs. 704-5-10 shown in excess in last year's accounts had also to be written off. Careless preparation of ledgers was the cause of this error. The actual stock of quinine was found to be quite correct. Commencing from April 1907 we are to be supplied with quinine in bulk, and I hope to show better results next year.

45. In addition to supplying the requirements of this Department the Yeránda Printing Press has, during the year under report, printed 12,393,189 Magisterial and Police and Judicial forms, 4,087,700 stock envelopes, 360,438 special envelopes, 1,270,890 Deccan Agriculturists' Relief Act forms, 56,100 forms for the Registration Department and 183,749 miscellaneous forms. A total of 59,217 books were printed and bound for the several Government departments during the year.

46. The Press has, during the year under report, printed more Magisterial and Police and Judicial forms in four languages, Deccan Agriculturists' Relief Act forms and miscellaneous forms than in the year previous as will be soon

from a perusal of paragraph 46 of last year's report. The decline in cash profits has already been commented upon in paragraph 40 of this report.

47. The new Press buildings were to have been ready in October, but owing to the severe outbreak of plague the work could not be completed. I understand that we shall be in occupation on the 1st May.

48. It will be seen from the statement noted in the margin that the total cost of maintenance, excluding charges for Inspection and General Superintendence, has amounted to Rs. 7,33,537 during the year under report against Rs. 6,65,041 in 1905, or a rise of Rs. 68,496. The total cash earnings have been Rs. 1,19,164 against Rs. 1,18,268 in the year 1905, thus making a total net cost to Government of Rs. 6,14,373 during the year under report as against Rs. 5,64,773 in the preceding year. The average net cost to Government per prisoner has been Rs. 65-15-0 in 1906 as against Rs. 60-1-0 in the year previous. The increased net cost to Government is chiefly due to higher cost of maintenance of the prisoners as explained in the earlier portion of this report.

VITAL.

49. The marginally noted statement deals with the sickness and mortality amongst prisoners of all classes during the year. The following table compares the figures for 1905 and 1906 of prisoners confined in Central, District, Special and Extra-Mural Prisons, Subsidiary and Civil Jails and Lock-ups:—

Year.	Daily average strength.	Admissions into hospital.	Daily average sick.	Total number of deaths.	Ratio of deaths per mille.
1905	9,168	5,560	233.2	157	17.1
1906	9,357	6,290	261.4	204	21.8

50. Looking to the daily average number of prisoners I find that His Majesty's Common Prison (84.2), the District Prisons of Dhárwár (5.2), Rájkot (10.4) and Shikárpur (45.2) were overcrowded during the year. Of these only His Majesty's Common Prison and Shikárpur exhibit a ratio of mortality in excess of 33.3 *per mille* of average strength.

51. The overcrowding at Rájkot was so slight as to need no comment. From Dhárwár a fair amount of transfers were made, but during the latter part of the year the overcrowding was due to the presence of rather a large number of simple imprisonment prisoners. As the factories were not overcrowded and as the health was good I did not consider it necessary to make transfers. The uncertainty as regards the dates of moving prisoners from Shikárpur and Karáchi to the new Prisons at Sukkur and Karáchi respectively had much to do with the overcrowding at Shikárpur. Once the dates were fixed the necessary transfers were made, but in the delay many more prisoners were kept at Shikárpur during the summer than would otherwise have been the case. Overcrowding at the Common Prison, Bombay, cannot be prevented as is well known. For one month no fresh admissions were received on account of cholera (*vide* paragraph 5), and 487 prisoners were transferred, and yet notwithstanding the Prison was always overcrowded. Every endeavour has been made to send as many prisoners as possible to the Ratnágiri and Kárwár Prisons. It must not be imagined that transfers to these Prisons are overlooked. On the contrary I require prisoners very much at Kárwár to work my coir industry. The difficulty about making transfers to Kárwár and Ratnágiri is due to the fact that during the months of June, July, August and September no means of communication exists between these stations and Bombay except by road. It has, therefore, been the practice, and a good one too in my opinion, not to send prisoners to these two coast Prisons, whose dates of release fall in these four months, and hence the difficulty in keeping these two coast Prisons full and relieving the Common Prison.

52. It will be seen from the figures in connection with sickness and mortality amongst convicts and under-trials confined in Prisons that, with the rise in the daily average strength during the year 1906, the number of admissions into hospital, the daily average number of sick have respectively gone up from 4,724 and 215·6 in 1905 to 5,460 and 243·2 in the year under report. The number of deaths has also risen from 137 in 1905 to 164 during the year under report. At the end of October there were the same number of deaths as were recorded at the same period in the year 1905, a record year. There were great hopes therefore that we should have another good year when early in November cholera suddenly appeared in the Common Prison and in a few days 15 deaths were added to the figures. The Yeránda Central Prison is mainly responsible for the increase in admissions into hospital and the daily average number of sick, due to many cases of dysentery, diarrhoea, malarial fevers and other general diseases having been admitted into the hospital. The Common Prison, Bombay, the Central Prison of Yeránda and the Sind Convict Gang and the Prisons of Dhulia, Karáchi and Sukkur show an increase in the number of deaths as compared with the year previous.

53. The Prisons which show a ratio of mortality in excess of 33·3 are noted below:—

Common Prison.—Out of the 34 deaths which occurred during the year 15 were due to cholera, 3 each were due to dysentery, remittent fever and pleurisy, 2 each were due to tubercle, chronic bronchitis and diarrhoea, 1 each to plague, bronchitis, intestinal obstruction and valvular disease of the heart. The outbreak of cholera was reported to Government (*vide* Government Resolution, Judicial Department, No. 1905, dated the 27th March last). Deducting the 15 deaths from cholera the remaining 19 deaths give a ratio of mortality of 47·0 *per mille* of average strength.

Sukkur Prison.—There were 21 deaths during the year. Out of this number 5 were due to pneumonia, 4 to tubercle of the lungs, 2 each to acute bronchitis, debility and heatstroke and 1 each to dyspepsia, anæmia, paraplegia, enteritis, cellulitis and pyæmia. At Shikárpur great heat was experienced during the summer and two prisoners died from sunstroke. The Medical Officer states that the climate throughout the Sukkur District was unusually unhealthy in December 1906 and in this month there were 5 deaths. Of the 21 convicts who died 5 were admitted in a bad state of health and 5 in a fair state while 11 only were in a good state of health.

Sind Gang.—Of the 21 deaths which took place 10 were due to pneumonia, 3 to remittent fever, 2 to sunstroke, 1 each to rheumatism, bronchitis, dysentery, dilatation of heart, intestinal hæmorrhage and inflammation of the connective tissue. The Medical Officer reports that pneumonia has been kept under control for the last three years by increasing the cubic capacity and superficial area per head, abundant and free ventilation, prompt isolation of patients, unlocking of Jail at a late hour in the morning in the cold season, burning all clothing and bedding of pneumonia patients and administration of hot conjee in the morning before sending the prisoners to work. In spite of these precautions 42 cases with 10 deaths have occurred. Deducting the 10 deaths from pneumonia the rate of death *per mille* of average strength falls to 24·8.

54. *Cholera.*—Cases of cholera occurred in the Yeránda Central Prison, the Bombay Common Prison, 1st Class Subsidiary Jail of Násik and the 3rd Class Subsidiary Jail of Sholápur. Of the 48 cases which occurred in our Prisons and 1st and 3rd Class Subsidiary Jails 21 proved fatal. In the Yeránda Central Prison 8 convicts were attacked, of whom 3 died. In the Common Prison 24 convicts and 12 under-trials were attacked, of whom 8 convicts and 7 under-trials died. There were 3 convicts attacked in the 1st Class Subsidiary Jail of Násik, 2 of whom died. One under-trial was attacked in the 3rd Class Subsidiary Jail of Sholápur and died. In addition to the above, six deaths from cholera occurred in the Lock-ups in the districts of Surat (1) and Poona (2) and the City of Bombay (3).

55. *Plague.*—During the year under report there were 8 cases of Plague and 6 deaths. Two convicts were attacked in His Majesty's Common Prison, Bombay, of whom one died. The convict who died was admitted into the Prison

on 24th April, was inoculated at once and died on 30th idem. The one convict who was admitted in the Yerávda Central Prison suffering from Plague recovered. Two under-trial prisoners who were attacked in the Bárdoli and three under-trial prisoners who were attacked in the Walod 3rd Class Subsidiary Jails in the Surat District succumbed. There were also three deaths from this disease which occurred in Lock-ups in the Surat District.

56. The following measures which were adopted during the year under report with a view to improve the health of prisoners confined in some of our Prisons and Jails are inserted in accordance with the orders contained in paragraph 1 of Government Resolution, Judicial Department, No. 9115, dated the 29th December 1905:—

- (1) Issue of wheat and rice in lieu of *bájrí* and *jowári*.
- (2) Issue of extra rations to weakly prisoners and convalescents.
- (3) Issue of 2 ounces extra flour to working prisoners in the Deccan Gang.
- (4) Issue of quinine as a prophylactic.
- (5) Issue of potatoes and onions in lieu of green vegetables.
- (6) Inoculation by Professor Haffkine's prophylactic serum.
- (7) Issue of extra warm clothing when considered necessary.

57. The health statistics of our Subsidiary Jails and Lock-ups show that the daily average strength, the daily average number of sick and the number of deaths have risen respectively from 1,303, 17.5 and 20 in 1905 to 1,426, 18.2 and 40 respectively during the year under report. The number admitted into hospital is the same as it was last year. The total population has risen from 61,310 in 1905 to 62,400 during the year under report. The ratio of deaths *per mille* of average strength has also risen from 15.3 in 1905 to 28.1 during the year under report. The cause of increase in the number of deaths can only be ascribed to the 8 deaths from plague and 9 from cholera in our 1st and 3rd Class Subsidiary Jails and Lock-ups.

58. It will be seen from the figures appearing in the statement noted in the margin that there were 32 admissions and 11 deaths from cholera in our Prisons. With the exception of "Tubercle of the lungs, etc.," and "Abscesses, boils and ulcers of all kinds" the admissions under all other diseases show an increase. The Yerávda Central Prison is mainly responsible for the increased number of admissions under "Dysentery" and "Diarrhoea." Very many cases occurred during the rainy season. The weather was very wet with great variations in the temperature and few days of sunshine. A rise in both these diseases occurred in the Deccan Gang, Bijápúr, Dhárwár and Ratnágiri. At Thána there were more dysentery cases and fewer diarrhoea cases than in 1905. In Dhulia there were many fewer cases of both diseases than in 1905. In course of conversation the Medical Officer of the last named Prison informed me that dysentery cases commenced to stop directly the drinking water was boiled. In Hyderabad there were 18 cases of dysentery against 42 in 1905, but the diarrhoea cases rose from 36 in 1905 to 62 in the year under report. Notwithstanding the rise in diarrhoea cases which may, as the season was unhealthy, have been due to other reasons, I am inclined to think that Major Jackson was right when he attributed the many cases of dysentery to the manner in which the bread was prepared. Much more trouble has been taken on the kitchen during the year 1906 and the bread is now far better made than it was. The Central Prisons of Yerávda and Hyderabad are responsible for the rise under "Malarial fevers," while the increase under "Other general diseases" is most noticeable in the Yerávda Central Prison and the Special Prison of Thána. The Medical Officer, Yerávda Central Prison, reports that a good many broken down prisoners were admitted suffering from malaria, chronic dysentery, diarrhoea, etc., and that some of them never left the hospital for the whole time of their imprisonment. Malaria was prevalent towards the close of the year in Hyderabad and its surroundings and this increased the admissions in the Central Prison of Hyderabad. The Medical Officer reports:— "But if as this year a phenomenally high irrigation season (with floods such as have not occurred for years) is associated with a very late and doubtful advent

Statement No. XV.—Chief diseases.

of cold, sickness always increases. The sickness in the city and the vicinity for the last quarter of 1906 has been very severe." The death-rate at Hyderabad was 23.4 against 27.6 in 1905. In Dhulia there was a great fall in malarial fevers, the figures being 45 in 1906 and 148 in 1905; so also at Ahmedabad who shows 101 cases in 1906 against 146 in 1905. The increase under "Other general diseases" is due to many admissions for "Mumps" and "Guinea worm" in the Thána Special Prison and to several cases of secondary syphilis, "Guinea worm" and "Ring worm" having been admitted in the Yeránda Central Prison. The increase in the deaths is noticeable under "Dysentery," "Malaria" and "Tubercle of the lungs." A decrease is noticeable under "Other general diseases."

59. Out of a total number of 17,964 prisoners who were discharged during the year 11,065 or in other words 61.6 per cent. gained weight against 65.1 in the year 1,905, 3,181 or 17.7 per cent. lost weight against 16.8, and 3,718 or 20.7 per cent. remained stationary as compared with 28.1 per cent. in the year 1905.

Statement B.

OFFICIAL AND NON-OFFICIAL VISITORS.

60. There were 300 official visitors during the year for our Prisons and 1st and 2nd Class Subsidiary Jails. Seventy-two quarterly meetings were held during the year and all were well attended. Seven hundred and ninety-two visits were paid by official visitors, while 184 were paid by non-official visitors.

BUILDINGS.

61. The following allotments were sanctioned during the year for original major works :—

	Ra.
Printing Press buildings (including Press Manager's quarters) at the Yeránda Central Prison	78,000
Removing the iron-barred gate facing the provision yard, filling in the space with stone, and constructing a pavement at the Yeránda Central Prison	1,000
Latrines at the Yeránda Central Prison	3,500
Bath and sullage drainage at the Yeránda Central Prison	7,500
Quarters for 2 clerks and 15 warders at the Ratnágiri Prison	2,500
Quarters for 2 clerks and 15 warders at the Kárwár Prison	5,000
Increasing accommodation in the Sub-Jail at Ghar Canals in the Lárkhána District	800
Adding an upper storey to the Superintendent's bungalow at the Ahmedabad Central Prison	3,200
Quarters for the Junior Hospital Assistant at the Central Prison, Ahmedabad	3,800
Additions and alterations to the store room at the Central Prison, Ahmedabad	3,200
New quarters for the Jailor at the Dhárwár Prison	3,000
Eight solitary cells in the Dhárwár Prison	4,900
Twenty solitary cells in the Yeránda Central Prison	6,000

62. In addition to the above a sum of Rs. 11,000 was allotted for the discretionary grant, out of which Rs. 10,494 has been expended, leaving only a balance of Rs. 6.

MISCELLANEOUS REMARKS.

63. During the year 1906 the following Prisons, Gangs and Subsidiary Jails were inspected either by myself or Major Jackson :—

Central Prisons.	District Prisons.	Sub-Jail.	Gangs.
Yeránda. Hyderabad.	Shikárpur. Thána. Common Prison. House of Correction. Bijápur. Dhulia. Kárwár. Dhárwár. Karáchi.	Belgaum.	Sind Gang. Deccan Gang.

64. The prisoners who joined the class at Thána, mentioned in paragraph 63 of my report for 1905, worked exceedingly well throughout the year. They gave absolutely no trouble and not one of them attempted to escape although no warders were employed to watch them while at work. As mentioned last year the number of prisoners was limited to 40. I had some trouble in filling up vacancies when prisoners were released and the average attendance during the year amounted to 32 only. However, these men, working more like free men than convicts, have greatly improved the garden, and the profits on the year were larger than when an average of 52 ordinary convicts was employed. In Thána itself, where of course the ordinary convicts understand the privileges enjoyed by men in the Special Class, there is naturally a great desire to be promoted into it. In other Prisons not much is understood yet about the class. There is a difficulty in obtaining convicts for this Special Class. The convicts who should be sent to it are those best qualified for the post of prison officers, and therefore Superintendents have to part with their best convicts and have to put up with men not so well qualified for the posts, which is neither fair on the Superintendents nor on the Prison. This is a very serious difficulty, and I shall be better able to tell at the end of the year whether it is desirable to continue the class.

65. The Special Class for juveniles at Dhárwár, mentioned in paragraph 64 of my report for 1905, has worked satisfactorily. The boys are kept entirely separate from the other prisoners both by night and day in so far as they have a sleeping barrack to themselves and have workshops to which ordinary convicts are not admitted. The sleeping barrack is, however, in the Prison and near all the other barracks and the work-shed is close to the Prison office. This is the best that can be done at present, and suitable accommodation must always be a weak spot when the reform of juveniles is being attempted in a Prison where ordinary convicts are detained. As this class must rise in importance it will be necessary, some day, to build a Prison for juveniles. Of the 27 boys admitted during the year, 6 were removed—two for bad conduct and four because it was found impossible to teach them carpentry in any of its branches. It was right, in my opinion, to remove the boys of bad character from the class, as with the limited accommodation it would not have been possible to deal with them properly. As regards the others the matter is different, and for the future I shall try and keep such boys in the class, providing other employment for them. An endeavour is being made to reform the character of these boys, and therefore it does not appear to be consistent to throw rather stupid boys out of the class and among criminals because they cannot learn a certain industry. There are, no doubt, certain difficulties, such as want of space, no instructor, etc., to contend against, but I trust, in time, to overcome these. The services of a Carpenter Instructor were engaged, and satisfactory progress has been made. The Superintendent, Dhárwár Prison, writing on the subject of articles of furniture manufactured by these boys, remarks:—"The work is finding favour in the district as would appear from the constant demands for these articles."

I have the honour to be,

Sir,

Your most obedient servant,

H. N. ALEXANDER,

Inspector-General of Prisons,
Bombay Presidency.

For Subsidiary Jails (a)	...	1 4	4	6	8	4	4	6	2			

Shikarpur.—Four ozs. curds were issued to each prisoner twice a week in lieu of dal during the whole year.

Karwar.—Rice is issued to all ordinary prisoners on Mondays, Wednesdays and Fridays, and jowari on the remaining days of the week.

Deccan Gang.—Two ozs. extra jowari flour was issued to all working prisoners during the whole year.

Yerdada.—Convict overseers were given meat on Wednesdays along with convict warders.

Hyderabad.—Gram dal was substituted for dal moong during the whole year.

(a) This scale was in force in all the Subsidiary Jails except Wadhwan in which prisoners up to 2 years' sentence are confined and who are allowed the scales appearing in this statement for Native prisoners in District Prisons.
