CONTENTS.

PART I—(Report).

	PAGE
Introductory and explanatory paragraphs	1
Admission and disposal of prisoners	1 & 2
Religion, age, education and previous occupation of convicts	2 & 3
Numbers according to nature and length of sentences	3
Previous convictions	3 & 4
Escapes and recaptures	4 & 5
Offences and punishments	5 to 8
Imposition of fetters	8
Remission System	8
Convict Officers	8
Diet	9
Under-trial prisoners in Prisons, Subsidiary Jails and Lock-ups	9 & 10
Civil prisoners	10
Total expenditure incurred	10 to 12
Employment of convicts	12
Manufactures and earnings of prisoners	12 to 15
Net cost	15
Health of prisoners	15 to 19
Official and non-official visitors	19
Buildings	20 & 21
Miscellaneous remarks and inspections	21 to 23

PART II—(Statements).

General Summary showing the distribution of prisoners of all classes	26 to 29
--	----------

JUDICIAL.

Statement No.	I.—Admission and disposal of convicts	30 & 31

MINOR CLASSES OF STATEMENTS.

Statement No. XVII.—Particulars regarding under-trial prisoners	70 & 71
Appendix A.—Showing the nature and amount of accommodation for each class of prisoners	72 to 79
Do. B.—Showing condition of convicts discharged	80 & 81
Do. C.—Showing working of the Remission System	82 & 83
Do. D.—Showing the nature of the crimes for which convicts were imprisoned.	84 to 99

No. 4362 of 1915.

From

LIEUT.-COL. J. JACKSON, M.B., I. M. S.,
Inspector-General of Prisons,
Bombay Presidency ;

To

THE SECRETARY TO GOVERNMENT,
Judicial Department,
Bombay.

INSPECTOR-GENERAL OF PRISONS' OFFICE :

Poona, 19th April 1915.

Sir,

I have the honour to submit the Annual Administration Report, together with the usual Statistical Tables, on the Prisons and Jails in the Bombay Presidency, including the Province of Sind and the Settlement of Aden, for the year 1914. Major O. S. Lowson, I. M. S., acted as Inspector-General of Prisons to 19th June 1914, when I resumed charge on return from furlough.

JUDICIAL.

2. The number of Central, District, Special and Extra-mural Prisons has undergone no change during the year under report. Statistics of all the Third Class Subsidiary Jails have been grouped together with those of Lock-ups as done in previous years. The Second Class Subsidiary Jails at Surat and Godhra were abolished on 1st June 1914 (*vide* Government Resolution, Judicial Department, No. 397, dated the 16th January 1912).

3. From the general summary preceding the statements in the appendices to this report it will be seen that the total population of all classes of prisoners confined in the Prisons, Subsidiary Jails, Lock-ups and Civil Jails has been 1,01,616 as compared with 1,03,861 in the year 1913—a decrease of 2,245. The daily average population has been 11,361 : which shows a decrease of 76 when compared with the figures of the year previous.

4. The following table, which compares the figures of the past two years,

Statement No. I.—Number and disposal of convicts. refers to the admission of convicts into Prisons and Second Class Subsidiary Jails only :—

	1913.			1914.			
	Males.	Females.	Total.	Males.	Females.	Total.	
Number remaining on last day of previous year.	Prisons ...	8,592	322	9,314	9,218	355	9,573
	Jails ...	165	20	185	201	6	207
Imprisoned during the year .	Prisons ...	16,684	982	17,666	16,670	909	16,579
	Jails ...	1,062	84	1,146	777	61	838
Total ...	Prisons ...	25,676	1,304	26,980	24,888	1,264	26,152
	Jails ...	1,227	164	1,331	978	67	1,045
Grand Total ...	26,903	1,408	28,311	25,866	1,331	27,197	
Daily average strength ...	9,204	330	9,534	9,349	382	9,731	

5. There has been a decrease in the number of convicts admitted. The Prisons of Yerávdá, Deccan Gang, Karáchi and Hyderabad show an increase, while His Majesty's Common Prison and the Prisons of Bijápur, Dhárwár, Thána and Sukkur show a decline. The increase in the Prison of Yerávdá is

due to direct admissions from the Násik District being diverted from the Thána Special Prison; in the Deccan Gang to direct admissions from Satára, Belgaum and Ahmednagar Districts to relieve overcrowding in the Yerávda Central Prison (*vide* Government Resolution, Judicial Department, No. 6967, dated the 26th September 1914). Cases under Gambling (119) and Indian Merchants' Shipping (75) Acts are responsible for the increase in Karáchi Prison. The increase in the Central Prison at Hyderabad of 185 prisoners appears to be due to no particular reason. The decline in His Majesty's Common Prison, *viz.*, 821, corresponds almost exactly with the fall in sentences of one month and under, *viz.*, 844. The practice inculcated in Government Circular, Judicial Department, No. 4096, dated 1st June 1914, has apparently been acted on by the Presidency Magistrates. I comment further on this question in paragraph 8. The fall in admissions to the Dhárwár Prison is due to prisoners from the Belgaum and Dhárwár Districts proceeding direct to the Yerávda Central Prison and Deccan Convict Gang (*vide* Government Resolution, Judicial Department, No. 1542, dated the 28th February 1914). The decrease in the Bijápur Prison is attributed to a good harvest: for that in the Sukkur Prison no particular cause can be assigned.

6. With regard to the disposal of convicts there is a decrease under the heads "Transferred to other Jails" and "Released on expiry of sentences." The headings "Released on appeal," "Released under Remission Rule," "Escaped," "Executed" and "Died" show an increase. Of the 50 released by order of Government, 16 were released on medical grounds, 1 each from His Majesty's House of Correction, Yerávda and Dhárwár, 3 from Karáchi; 5 from Hyderabad, 3 from Sukkur and 2 from Sind Gang; 2 ex-military convicts were despatched to England from His Majesty's House of Correction. Five prisoners from His Majesty's House of Correction, 3 from Yerávda, 3 from Deccan Gang, 3 from Bijápur, 2 from Thána, 12 from Karáchi and 3 Chapparbands from Bijápur were released on other grounds; 2 life transports who had completed 14 years' imprisonment—with remissions earned—were released from Yerávda. Seventy-five life transports were deported to the Andamans *via* Madras and 21 term transports *via* Alipore against 100 lifers and 50 termers in 1913. The heading "Transferred to Lunatic Asylum" shows a decrease of 10, and there appears a marked increase of 17 and 39 under "Escaped" and "Died" respectively. Both these headings will be commented on later. There were seven State prisoners in confinement at the close of the year, received from the Mahi Kantha Agency.

7. There is a slight increase under "Europeans", while all other heads show a decrease. The number of Juveniles under 15 years of age admitted during the year under report was 25 against 23 in the year previous. Out of 18 males and 7 females convicted, 7 males and 3 females were sentenced to "One month and under" and 11 males and 4 females to "Above 1 month and not exceeding 6 months." Out of 25 admitted, 2 males and 1 female had previous convictions. Of the total number of Juveniles admitted, 3 were sent to the Reformatory School by the District Magistrates, one released on appeal, thus leaving 21 to undergo imprisonment in Jails. Of this number of 21, 7 were females, 2 were declared over 15 years of age by the District Magistrate and 2 were considered unfit for a Reformatory.

I subjoin a table showing some cases in which the sentences appear to me to be absurd and harmful:—

Name.	Sex.	Age.	Sentence.	Offence.	Jail.	
J., daughter of B.	Female	...	11	6 months' rigorous imprisonment.	Section 109, Criminal Procedure Code.	Yeravda.
V. Z.	Male	...	13	1½ month's rigorous imprisonment.	Sections 404 and 411, Indian Penal Code.	Ahmedabad.
A., daughter of A.	Female	...	10	Rs. 10 or 20 days' simple imprisonment.	Section 112, Railway Act ...	Rajkot.
A., daughter of M.	Female	...	8	Do.	Do.	Do.
C. B.	Male	...	8	1 month's rigorous imprisonment. Rs. 10 or 15 days' rigorous imprisonment.	Section 381, Indian Penal Code.	Dhulia.

The last case—that of child instigated to theft by the relative who stood in *loco parentis* to him—was specially brought to the notice of Government in this office No. 9920, dated 7th October 1914. I have sometimes wondered what conception of rigorous imprisonment a Magistrate has when he sentences girls and boys of tender years to periods of such imprisonment.

The sub-heads "15 to 40", "40 to 60" and "Above 60" show a decrease. Out of 15,465 prisoners shown "Under 15 to 40 years of age" 4,944 prisoners were under 25 years of age and of the latter number 4,050 were convicted for the first time. Under "Education" the sub-heads "Able to read and write" and "Able to read only" show an increase of 8 females and 40 males respectively. In other respects there is a decrease throughout. Under "Previous occupation," the sub-heads "Persons employed under Government", "Persons in service or performing personal offices" and "Persons not classed elsewhere" show an increase, while all the other sub-heads show a decrease. The percentage of the total number of males admitted to the male free population according to the Census of 1911 is 0.161 during the year under report and that of females admitted to the free female population .01.

8. There is an increase under the sub-heads "Above one and not exceeding three months" and "Above two years and not exceeding five years", while all other sub-heads show a decline. There were 953 prisoners sentenced to simple imprisonment, 16,240 sentenced to rigorous imprisonment and 9 sentenced to rigorous imprisonment with whipping as compared with 1,216, 17,323 and 12 in the year previous. The number of prisoners sentenced to rigorous imprisonment with solitary confinement was 215 as compared with 261 in 1913, 332 in 1912 and 317 in 1911. Many of the sentences of solitary confinement could not be carried out for lack of cells. 4,290 prisoners were sentenced to "Not exceeding one month" as compared with 5,414 in 1913. Of these 1,913 were admitted to the Common Prison, Bombay, against 2,757 in 1913. The main fall is in Bombay, *viz.*, 844, and the balance of the decrease—280—is spread over the rest of the Presidency. The number of prisoners sentenced in Bombay for 7 days and under in default of payment of fine has been reduced to 349 in 1914 from 625 in the year previous. This is a considerable improvement; but if some effort could be made to give these people time to pay the fine before imprisonment is inflicted in default it would be a great step forward. A small fine paid and no imprisonment is infinitely better than a larger fine nearly always purged by imprisonment; it is better for the offender and much cheaper to Government. In addition 368 prisoners were sent to prison under substantive sentences of 7 days or less. Of these 143 were 25 years of age and under. It is to be hoped that now the Juvenile Jail at Dhárwár is opened the method of converting the juvenile criminal into an habitual by repeated short sentences will cease.

9. The statement noted in the margin deals with the reconvicted prisoners. The number of habituais—*vide* subjoined statement—identified by Jail officials has been 38 against 92 in the year previous. 2,071 were classified as habituais out of a total of 2,831 previously convicted prisoners. The statement does not include 1,168 prisoners sentenced under Chapter VIII of the Criminal Procedure Code, but who, under the orders of Government, are always treated as habituais. There is a welcome fall under this heading in Sind:—

1910	1,201
1911	1,122
1912	839
1913	892
1914	765

Owing to the general overcrowding of the prisons the proper separation of habituais from prisoners undergoing their first imprisonment is exceedingly difficult and in many prisons impossible. The new Jails proposed to be built at Belgaum and Audheri are most urgently required.

1	2	3	4	5	6	7	8
Serial No.	Jails.	Number admitted during the year.	Number in Column 3 identified as "Habituals" before conviction and classified as such by the convicting Court.	Number in column 3 classified as "Habituals" by the District Magistrate or Magistrate specially empowered (not being the convicting Court).	Number in column 3 classified as "Habituals" by the Jail Superintendent.	Total Habituals admitted.	Ratio per cent. of column 7 to column 3.
1	Common Prison	3,449	633	4	642	18.6
2	House of Correction	393	217	217	65.3
3	Yeránda	1,610	158	19	3	180	11.2
4	Dhulia	1,143	106	1	4	113	9.9
5	Deccan Gang	459	63	8	91	19.8
6	Bijápur	533	48	5	5	58	10.9
7	Dhárwár	498	34	7	41	8.3
8	Kárwár	202	29	6	4	39	19.3
9	Ratnágiri	163	1	3	2	6	3.7
10	Thána	1,054	103	13	116	11.0
11	Ahmedabad	1,998	78	30	108	5.4
12	Rájkot	90	1	1	1.1
13	Karáchi	993	78	3	80	8.1
14	Hyderabad	2,144	223	4	233	10.8
15	Sukkur	1,081	129	129	11.9
16	Shikárpur	645	8	1	9	1.4
17	Sind Gang
18	Aden	185	4	5	9	4.9
		1914	1,945	88	38	2,071	12.5
	Total	1913	1,637	151	92	2,130	12.1
		1912	1,876	203	106	2,184	11.5

10. From the information supplied by the Inspector-General of Police, it appears that 1,720 persons were identified as old offenders in the Bombay Presidency, inclusive of Sind, as compared with 1,729 in the year previous. Out of 1,720 prisoners 136 were identified in Bombay, 305 at Yeránda, 256 at Ahmedabad, 242 at Thána, 235 at Dhulia, 119 at Sholápur, 108 at Dhárwár and the rest in other parts of the Presidency. The smallest number identified was at Sukkur and Hyderabad, viz., 1 at each place.

11. The number of escapes during the year under report has been 24 against 10 in the year previous. All the escapes except those from the Belgaum Subsidiary Jail were from extra-mural parties, 2 from Yeránda, 1 each from Dhulia, Ahmedabad, Hyderabad and 1 from the Sind Gang. Eighteen convicts escaped from the Belgaum Subsidiary Jail and a separate report on the subject has been submitted to Government under this office No. 13265, dated 30th December 1914, and No. 1353, dated 2nd February 1915. Fifteen have been recaptured. Two prisoners who have been shown against Yeránda, effected their escape from the quarantine shed, outside the Prison, where they were kept under segregation as they were suffering from mumps. They have since been recaptured and have

Statement No. V.—Escapes.

received additional sentences for the escape. All cases of extra-mural escapes were due to breaches of standing orders and gross carelessness or negligence on the part of the warders. Those responsible have been dealt with departmentally.

12. The statement noted in the margin relates to offences committed by, and the punishments awarded to, convicts confined in the Prisons and Second Class Subsidiary Jails. The offences dealt with by the Criminal Courts show a diminution of 13 on the figures for the previous year. The subjoined table gives the details but does not include the case in which a prisoner at the Sind Gang murdered one warder and injured another on December 26th, 1914. For this offence he has been committed to the Sessions for trial (*vide* this office letter No. 963, dated 24th January 1915). Nor does it show the Berads who escaped from Belgaum on 28th December 1914, whose cases had not been tried by the end of the year:—

				1913.	1914.
<i>Section 52, Prisons Act.</i>					
Relating to work	19	11
Assault	3
<i>Indian Penal Code.</i>					
Culpable homicide not amounting to murder	1
Hurt and grievous hurt, etc.	17	9
Attempt to escape, and escape	4	4
Attempt to commit suicide	1	2
Total				42	29

13. The following table shows that the number of offences has slightly diminished from 20,944 to 20,720, a decrease of 224, with an increased average population for the year of 9,731 against 9,534 in 1913. There is a marked fall in major punishments of 1,504 and a corresponding increase of 1,280 in minor punishments. The sub-heads "Relating to work" and "Prohibited articles" show a decrease, the sub-head "All other breaches of prison rules" a slight increase and "Assaults, mutiny and escapes" an increase of 128. The increase under this last head is unsatisfactory:—

				1913.		1914.	
Offences dealt with—							
By Criminal Courts				42		29	
				Dealt with by minor punishments.	Dealt with by major punishment.	Dealt with by minor punishments.	Dealt with by major punishments.
By Superintendents—							
Relating to work	6,579	3,340	7,193	2,307	
Do. prohibited articles	1,877	810	1,757	704	
Do. assaults, mutiny and escapes	42	162	119	213	
All other breaches of prison rules	5,414	2,720	6,123	2,304	
Total				13,912	7,032	15,192	5,528

14. The following table shows the nature of punishments awarded during the past two years. It will be seen that the total number of major and minor punishments awarded by Superintendents during the year under report was 21,371 and the total number of offences 20,720. The difference is due to 651 offences having been dealt with during the year under report by the award of combined punishments:—

	1913.	1911.
Punishments inflicted—		
By Criminal Courts	42	29
By Superintendents—		
Warnings	3,990	4,196
Penal diet	2,320	2,200
Separate cellular and solitary confinement	137	143
Hand-cuffing and link fetters	3,731	3,504
Other punishments	3,891	5,318
Total	14,069	15,361
Separate, cellular and solitary confinement	264	200
Penal diet with solitary confinement	98	168
Fetters or hand-cuffing behind or to a staple	3,721	2,598
Corporal punishments	67	46
Combination of minor punishments	54	100
Other punishments	3,157	2,869
Total	7,361	5,981
Grand Total	21,472	21,371

15. Of the 21,371 punishments awarded by the Superintendents of Prisons and Jails 15,361 or nearly 72 per cent. belong to the minor and 5,981 or 28 per cent. belong to the major class. Under minor punishments the sub-heads "Warnings" and "Other punishments" show an increase; all other sub-heads show a decline. All sub-heads under major punishments show a decline with the exception of the sub-heads "Penal diet with solitary confinement" and "Combination of minor punishments".

The following Prisons show an increase in punishments: Ratnágiri (114), Ahmedabad (185), Rájkot (31), Karáchi (100), Sukkur (235), Shikárpur (50) and Sind Gang (1,563).

The increase at Ratnágiri is attributed to punishments for breach of Jail Rules; at Ahmedabad the increase is a small one in a large Jail; there was, however, a complete change of staff in the year; at Rájkot the extra number of punishments were due to exaction of task; in Karáchi to increase in population of Jail; in Sukkur the increase is attributed to the number of prisoners segregated for mumps in 1913 and partly to better discipline; in Shikárpur to larger population and stricter supervision; in the Sind Gang, where there is the only

notable increase, the Superintendent reports that when he took over charge in April he found the discipline very lax and hardly any prisoners were giving full task; the tightening up of discipline necessitated extra punishments.

The only notable decrease in punishments took place at the Central Prison, Hyderabad (679); the Superintendent attributes the decrease to neglect of reporting breaches of discipline by the staff. This is probably true, but I think that the prevalence of mumps and the consequent constant segregation of bodies of prisoners throughout the year was also a considerable factor.

Out of 20,720 offences 2,759 habituals were responsible for 8,048 and 4,699 non-habituals for the balance of 12,672 offences. The percentage of habituals is 18·6 calculated on admission rates. Compared with previous years the ordinary prisoners, or rather a certain number of them, would appear to have been behaving more badly than usual.

Altogether only 7,458 prisoners were punished and the number who actually passed through the Prisons and Jails was 27,197. Very many of these prisoners were only punished once; warnings formed 4,196 or about 19·6 per cent. of the total number of punishments. It must also be remembered that 1,702 of the total number of punishments were inflicted on convict officers for neglect of their duties.

16. The sub-joined table contains details as to the number of stripes given to convicts in the various Prisons during the year under report.

The total number of corporal punishments has fallen from 67 in 1913 to 46 in the present year. The decrease is entirely due to Ahmedabad where the Superintendents who had charge of the Prison during the year kept excellent discipline and inflicted only three floggings against 27 in 1913.

In the Common Prison one prisoner was flogged for putting fæces in another prisoner's mouth.

In the Yeravda Central Prison four for assault, two for rubbing fæces on a convict officer's face, three absolutely refusing to work, one for purposely breaking a *chaki*, one indecent behaviour, one creating a disturbance and mutinous conduct.

In the Deccan Gang one for refusing to work, one for giving filthy abuse to the Jailer.

In Dhárwár two for assaults, one refusing to work, one wilfully inflicting self-injury.

In Ratnágiri Prison two for throwing fæces about the verandah and insolence to the Superintendent, one for attempting to assault the head warder, one for leaving the ranks without permission, one for refusing persistently to grind grain.

In two cases at Ratnágiri only six stripes were awarded which is in contravention of orders and a plain indication the offences could have been dealt with otherwise. As regards the flogging (six stripes) for leaving ranks without permission the Superintendent of the Ratnágiri Prison explains that the prisoner had been repeatedly punished for assaults and for theft and had been warned that his next offence would entail a flogging; he then left ranks in defiance of a direct order.

In Thána Special Prison one for wilfully and pertinaciously refusing to do his task.

In Ahmedabad Central Prison one persistent short work, one indecent behaviour, one assault on a convict officer.

In Karáchi Prison one persistent short work, two assaults.

In Sukkur Prison one for assaulting the Chief Head Warder.

In the Sind Gang two for assault of Prison officers, one for attempting to escape.

In Hyderabad Central Prison six for persistently refusing to work and four for assault.

	1	2	3					4	5	6			
			Total number of prisoners punished by whipping.							Percent- age of column 3 to column 1.	Percent- age of column 5 to column 2.	Number of prisoners in whose cases (a) death, (b) illness was directly or in- directly the effect of corporal punishment.	
			5 to 10 stripes.	Above 10 to 15 stripes.	Above 15 to 20 stripes.	Above 20 to 25 stripes.	Above 25 to 30 stripes.					Grand Total.	(a) Death.

Total, 1913	25,780	16,631	24	7	13	8	15	67	03	04	

17. During the year 8,649 prisoners were fettered as compared with 9,691 in 1913. The great bulk of these are men fettered with light chain fetters on extra-mural work. The Deccan Gang shows 3,391 and the Sind Gang 1,819.

REMISSION SYSTEM.

18. It will be seen from the figures appearing in statement C appended to this report that 3,326 prisoners were released during the year under the remission system as compared with 3,203 in the year previous. The percentage during the year 1914 of those released under remission system to the total number who might have been released under that system, if of average good conduct up to the date of release, was 97.3 as against 98.1 in the year 1913. The practice of mustering prisoners and reading and explaining to them the benefits of the remission rules has been continued. Special awards under Rules 514 and 519, remission for committing no offence during the previous 12 months and for doing special work, were granted to 1,696 and 1,944 prisoners respectively against 1,295 and 2,209 in the year previous.

As noted in previous reports, the dearth of long term prisoners suitable for promotion has been made good by appointing prisoners under sentence of less than a year as convict officers and granting them some special remission. This system is less dangerous than promoting long term prisoners prematurely.

19. The average number employed as Prison officers during the year under report in Prisons and Second Class Subsidiary Jails was 1,017 males and 12 females against 953 males and 12 females in the year previous. There is a distinct difficulty in many Prisons in finding prisoners in every way fit and suitable for these posts; to relieve the situation short termers are promoted. Further on I comment on the system in general.

Statement No. VII—Convict Officers.

20. The statement noted in the margin shows the different diet scales in the Prisons and Second Class Subsidiary Jails. These scales have been found to work satisfactorily. Such changes as have been made during the year are noted in the fifth column of the statement.

21. The statistics of under-trial prisoners confined in Prisons, Jails and Lock-ups are embodied in the marginally noted statement. The number admitted during the year under report shows a decrease of 521 over the figures for the year previous. The daily average strength has also fallen from 1,857 in 1913 to 1,582 in the year under report.

22. The subjoined table shows a few of the cases of adolescents or juveniles who appear to have been detained as under-trials for lengthy periods; delay in law, I know, cannot be avoided sometimes; but prolonged detention as an under-trial is always a blunder and an evil and a greater blunder and a greater evil in the case of the young:—

Name.	Age.	Offence.	Date of admission.	Date of disposal of the case.	Result of trial.	By whom tried.	Length of detention.
M. S.	14	Sections 380, 457 and 411, Indian Penal Code.	6th August 1914.	4th September 1914.	Acquitted.	Additional City Magistrate, Karachi.	M. d. 0 20
D. F.	20	Section 379, Indian Penal Code.	16th October 1914.	16th December 1914.	Extradited to Pal Taluka.	First Class Magistrate, Halar Prant.	2 1
J. w/o G.	18	Section 420, Indian Penal Code.	9th December 1913.	12th February 1914.	Convicted.	City Magistrate, Shikarpur.	2 3

K. G.	20	Do.	Do.	Do.	Do.	Do.	5 13

The names in italic are of female juveniles.

23. The number of escapes was 31 against 13 in the year previous. Of the 31 escapes five were from the Belgaum Second Class Subsidiary Jail, four of these in the escape alluded to in paragraph 11—of these four Berads only one is still at large; six each from Upper Sind Frontier and Sátára Districts, two each from Násik, Thar and Párkar, Panoh Maháls, Lárkána and Poona Districts and one each from Ahmedabad, Hyderabad, Broach and Dhárwár Districts.

24. The number of deaths shows a decrease of 10 on the figure for the year previous. Out of 23 deaths five occurred in Prisons, one in Second Class Subsidiary Jail at Belgaum—gunshot wound—and 17 in Third Class Subsidiary Jails and Lock-ups. Of the 17 deaths three from bronchitis, three from wounds (one suicidal and two gunshot wounds while attempting to escape), three from pneumonia, and one each from dysentery, apoplexy, pyæmia, syncope, heart failure, overdose of intoxicant, pharyngitis and asthma.

25. The number remaining on 31st December 1914 was 479 males and 13 females in Prisons, 56 males and six females in Second Class Subsidiary Jails and 1,049 males and 52 females in the Third Class Subsidiary Jails and Lock-ups, thus making a total of 1,584 males and 71 females.

26. In the beginning of 1914 there were 35 males and one female in the Civil Prisons. Civil Jails. The number admitted during the year was 903 males and two females; 873 males and two females were released and one absconded from Hyderabad Civil Jail, thus leaving a balance of 65 males at the close of the year under report. The daily average number has been 48 against 46 in the year previous. The total cost and cost per head have respectively been Rs. 5,539-0-1 and Rs. 115-6-4 during the year under report as against Rs. 5,018-0-3 and Rs. 109-1-5 in the year 1913.

FINANCIAL.

27. The statements noted in the margin deal with the gross expenditure on account of convicted and under-trial prisoners confined in the Central, District and Extra-mural Prisons, Sub-Jails and Lock-ups. The cost of police guards has been omitted as usual except in the case of the Central Prisons of Yeránda and Ahmedabad and the Special Prison, Thána, where the guarding is undertaken by the reserved armed warder guard. As the system of accounts of the Yeránda Prison Press has been changed and based on "Unit Cost" system since 1st January 1913 under orders of Government conveyed in their Resolution No. 1545, dated 27th February 1913, in the Judicial Department, the expenditure on account of that institution has been omitted from these statistics. The realization from the sale-proceeds of garden produce has been deducted from the total charges. The gross expenditure during the year 1914 has been Rs. 10,90,231 and the cost per head Rs. 96-5-11 against Rs. 10,67,076 and Rs. 93-10-10 in the year previous.

28. The total cost and cost per head under this head has increased from Rs. 3,12,101 and Rs. 27-6-5 in the year 1913 to Rs. 3,22,925 and Rs. 28-8-9 in the year under report. The increase is mainly due to the revision of the pay of Jailors, Deputy Jailors and Superintendents of Prisons at Karáchi and Thána (*vide* Government Resolution, Financial Department, No. 1554, dated 3rd April 1914).

29. The total cost under this heading has risen from Rs. 5,08,822 in the year 1913 to Rs. 5,19,874 in the year under report and also the cost per head from Rs. 44-10-3 to Rs. 45-15-3. The increase is chiefly due to higher rates of provisions in Sind Prisons and at the Central Prison of Ahmedabad.

30. The value of vegetables and other supplies from the gardens attached to Prisons and Jails shows an increase of Rs. 1,004 over the figures for the year 1913, the figures being Rs. 34,256 against Rs. 33,252 in the year previous. The Prisons of Ratnágiri, Karáchi, Hyderabad and the Deccan and Sind Gangs show an increase while the Prisons at Yeránda, Dhulia, Bijápur, Dhárwár, Thána, Ahmedabad and Shikárpur show a decrease. Decreases in garden profits are generally attributed to untimely falls of rain, premature hot weather, etc. While quite admitting the validity of the excuse in many instances, it cannot be concealed that ignorance of the art of gardening is occasionally an even more potent cause.

The fall in the price of cotton, indifferent gardening and the failure of the mango crop account for the decrease in Dhulia. At Dhárwár there was no sale of sandalwood and the rains were too heavy for the young seedlings. At Kárwár the cocconut plantation is going on satisfactorily and the land acquired last year will be planted out this year. The decrease at Yeránda is due to less firewood supplied from the Prison jungle; the garden actually did better. The receipts at Shikárpur fell owing to failure of vegetables in the hot weather. The difference at Ahmedabad is small, Rs. 353; the weather in September and October was unfavourable for English seedlings. As the contract rate is taken in calculating the value of the produce, the result is that less value is proportionately got in a garden of good repute, as in these cases the contractor, knowing he will not be called on in all likelihood to supply vegetables, gives a very generous rate.

31. The total cost and cost per head have fallen from Rs. 48,795 and Rs. 4-4-6 in the year 1913 to Rs. 48,161 and Rs. 4-4-1 in the year under report. The sub-head "Sick diet and extras for patients" shows an increase of Rs. 3,032, which is due to excess number of admissions into hospitals especially at the Sind Convict Gang where the general health of the prisoners was not satisfactory and extras were allowed liberally to patients in hospital. There was also a greater prevalence of malaria and epidemic mumps in many Prisons leading to issue of milk diet for a few days. The sub-head for medicines shows a decline due to non-adjustment of the cost of European medicines, supplied in 1914 to some of the Prisons.

32. The total cost and the cost per head have risen from Rs. 54,366 and Rs. 4-12-4 in the year 1913 to Rs. 61,643 and Rs. 5-7-2 in the year under report. The increase is mainly due to the purchase of blankets (Rs. 3,126-8-0) for prisoners under detention and the high rate of wool throughout the whole year, a rate greatly increased by the war.

33. The expenditure under this head shows an increase of Rs. 1,382 over the figures for the year 1913, the figures being Rs. 27,057 against Rs. 25,675 in the year previous. The increase in the cost per head is only annas 2 pies 2. The cause of increase is due to the halálkor and water bills of the House of Correction, Bombay, for 1913 paid in 1914; at Thána free water was allowed only for two months instead of for four months during the year under report, and to iron pans for conservancy use shown under this head for the first time by the Ahmedabad Central Prison instead of under conservancy dead stock as was done in previous years.

34. This head shows a decrease of Rs. 1,274 as compared with the expenditure of the year previous. The figure for the year 1914 is Rs. 42,952 against Rs. 44,226 in the year 1913. The fall is chiefly due to the smaller number of prisoners deported to the Andamans during the year under report.

35. The total cost and cost per head have declined from Rs. 46,391 and Rs. 4-1-2 in the year 1913 to Rs. 40,765 and Rs. 3-9-8 in the year under report. The decrease under the sub-head of uniforms is due to the fact that many of the Prisons were not entitled to new uniforms for warders during the year 1914. The decrease under the sub-head "Other Miscellaneous Services and Supplies" is due to smaller expenditure under petty construction and repairs and smaller purchases in other Prisons, notably Dhárwár and Ahmedabad. The fall under the sub-head "Lighting" is due to the large amount of cocconut oil supplied to the Yeránda Central Prison from the Kárwár Prison factory in 1913, the stock of 1913 having been utilised for a greater part of 1914. His Majesty's Common Prison shows an increase under this head by Rs. 994 which is due to the repairs to gas plant effected during the year under report. The increase under the sub-head "Money payments as rewards for recapture and service" of Rs. 1,008 is due to a large number of convict officers with long sentences having been released from some of the

Prisons and also to the purchase of tools supplied to boys released from the Borstal Institute for Juvenile Adults at Dhárwár.

36. The total cost and cost per head have increased from Rs. 5,901 and Re. 0-8-4 in 1913 to Rs. 6,021 and Re. 0-8-6 in the year under report. The increase is mainly due to transfers of Jailors on account of the revision of their establishment as referred to in paragraph 28 of this report and to the changes necessitated by the recall of Indian Medical Officers to military service. The decrease under this head against a few Prisons has been cancelled by the amount spent on account of travelling expenses of a clerk from my office to Aden to inspect accounts, etc., of the Special Prison there in the year under report.

37. The total cost and cost per head have risen from Rs. 12,559 and Rs. 1-1-8 in the year 1913 to Rs. 14,545 and Rs. 1-4-7 in the year under report. The sub-head "Rents, rates and taxes" shows a large decrease which is due to the removal of the head office in February 1914 from a hired bungalow in Civil Lines to the new Secretariat Buildings. The increase under the sub-head "Service Postage" is due to increased correspondence in the head and Prison offices; more telegrams sent, especially from August on, dealing with urgent matters; and that under the sub-head "Charges for Registers and Stationery" principally to a sum of Rs. 4,711 against Rs. 2,092 in 1913 communicated by the Manager of the Yeránda Prison Press on account of the cost of printing and binding work done for the Jail Department during the year under report. History tickets, weight charts and quinine labels, requiring special binding materials and paper, were supplied in 1914 against *nil* in 1913.

38. This head shows a decrease of Rs. 1,952, the figures being Rs. 6,288 and Re. 0-8-11 in 1914 against Rs. 8,240 and Re. 0-11-7 in 1913. The expenditure under this head is always of a fluctuating nature and the decrease in the year under report is mainly attributable to stricter economy observed by the Superintendents of Prisons and Jails in making purchases of articles of dead stock. Only articles which were absolutely necessary have been purchased.

39. The statement noted in the margin deals with the employment of convicts in Prisons and Second Class Subsidiary Jails. It will be seen that the total number of prisoners sentenced to labour has risen from 9,355 in 1913 to 9,565 in the year under report. With the exception of the sub-heads "Prison servants", "Jail repairs", "Additions and alterations under Superintendents" and "Manufactures" all the other sub-heads show an increase over the figures for the year previous. The number of prisoners employed on extra-mural work shows an increase of 188 over the figures of the past year.

40. The marginally noted statement deals with the net cash earnings of convicts sentenced to labour. The cash earnings have fallen from Rs. 1,37,914 in the year 1913 to Rs. 1,17,825 in the year under report. The Prisons of Dhulia, Sukkur, Hyderabad, Thána and the Deccan Gang show an increase, while all the other Prisons show a decline.

The increase in the Dhulia Prison is due to a large supply of carpets to Government officers and the Police Department and to a large sale of stone metal to the Dhulia Municipality and the Public Works Department.

The increase in the profits of the Thána Special Prison by nearly Rs. 3,453 is partly due to the transfer of the whole cane industry with all the appertaining raw material to Yeránda. But it is creditable to this Prison to have done so well considering all its factories were practically stopped in August owing to the transfer of most of the prisoners to Yeránda Central Prison and Deccan Convict Gang.

I deal with those Prisons that show a decrease in profit separately in detail.

Yeravda Central Prison.—Decrease Rs. 2,155, due to less demand for extra-mural labour.

His Majesty's Common Prison.—Decrease Rs. 318, due to the purchase of a considerable quantity of wool at a cheap rate. This increased the amount of raw material on hand at the close of the year.

Kárwár Prison.—Decrease Rs. 1,464—(1) Decrease in sale of Coconut oil and Coir yarn (2), consequently more manufactured articles on hand, (3) more raw material on hand.

His Majesty's House of Correction.—Decrease Rs. 4,202. This Prison was evacuated for administrative reasons and the working of the factory completely upset.

Ratnágiri Prison.—Decrease Rs. 788—(1) Decrease in orders received from Government Departments (2), outstanding debts due to Prison greater this year by Rs. 177 and debts due by the Prison less by Rs. 129.

Dhárwár Prison.—Decrease Rs. 5,904. The carpentry class was reduced to 20 boys, all other manufactures stopped and every one employed on building the wall which is to enclose the new Borstal Prison.

Rájkot Prison.—Decrease Rs. 207. Less demand for carpets by Government Departments.

Ahmedabad Central Prison.—Shows a balance to the bad of Rs. 2,245 against a profit last year of Rs. 17,093. This very large decrease, it is explained, is due to the following reasons:—

(1) A large number of uniforms, to the value of Rs. 3,000, was supplied to the Police during the months of November and December and adjustments had not been made by the close of the year.

(2) Rs. 2,792 more manufactured articles on hand at the end of the year 1914.

(3) Raw material in greater quantity at the end of the year 1914 as compared with 1913 by Rs. 6,495. This is due to a large consignment of raw materials from Europe late in November and December.

(4) A smaller demand on the part of the Police Department for articles of uniform.

(5) Outstandings due to the Prison Rs. 902 more at close of 1914. This is an addition to the police uniforms noted above.

(6) The debt due by the Prison at the close of 1913 was Rs. 5,516 and this year it is only Rs. 2,561.

Karachi Prison.—Decrease Rs. 1,995. The falling off in profits is principally due to a greater number of prisoners being employed in the manufacture of clothing both for the Karáchi Prison and other Jails and Lock-ups.

41. Of the sum of Rs. 1,17,825 mentioned at the commencement of last paragraph, the sum of Rs. 46,927 represents the profits of Prison Factories, Rs. 1,133 of Second Class Subsidiary Jails and Rs. 69,765 of Extra-mural labour. The average cash earnings per head of those sentenced to labour and of those employed on manufactures in the case of Prisons and Second Class Subsidiary Jails have been Rs. 12-5-0 and Rs. 32-9-0 as against Rs. 14-12-0 and Rs. 37-8-0 in the year previous.

42. During the year under report Jail-made articles of the value of Rs. 72,243 were sold to Government Departments as detailed below against Rs. 68,307 in the year previous. Articles of the value of Rs. 34,833 by the

Ahmedabad Central Prison, of Rs. 6,310 by the Dhulia Prison and of Rs. 257 by the Dhárwár Prison were supplied to the Police Department:—

				Rs.
Public Works Department	2,609
Telegraph Department	2,035
Other Civil Departments	65,422
Marine Department	1,818
Military Department	359

The increase is mainly due to the supply of woollen rugs to the Government House, Ganeshkhind, during the year under report.

43. This Gang was located at Visapur in the Ahmednagar District throughout the year. With an average of 1,494 prisoners the Deccan Convict Gang. Gang has earned Rs. 33,772 as against Rs. 14,984 in 1913; the number of prisoners in the latter year was 1,221. The increase is attributed to the greater average number of prisoners at work. The great increase in output is however also due to another cause—the energy and ability of the Superintendent of the Gang, Mr. C. N. Hall, for whom no difficulty is too great and no detail too small.

44. This Gang still remains at Gunja Takar near Hyderabad (Sind). With an average population of 776 prisoners the Sind Convict Gang. Gang has earned Rs. 33,275 against Rs. 41,995 with an average of 744 prisoners in the year previous. The earnings of the year 1913 included the sale of metal which had been lying in stock for the two previous years, while the earnings of the year under report represent the actual outturn for the year 1914 alone. This explains the cause of the apparent decrease in the profits of the Gang. The prisoners were employed in breaking metal in the quarry and in loading and unloading the same for the N.-W. Railway.

The river Indus reached an unprecedented height in the month of August, and at the urgent request of the Collector of Karáchi over 500 prisoners were sent to Kotri to save the town from the inundation. As the Collector of Karáchi says: "Had not Mr. Petigara brought a large number of his Gang to Kotri so promptly and had he not got such good work from them, the town of Kotri would undoubtedly have been severely flooded, entailing much loss and damage to property and great distress amongst the people." From the time he took over charge in April, Assistant Surgeon Petigara has worked with zeal and efficiency as Superintendent and as Medical Officer of the Gang.

45. The net profit of the quinine industry in the Central Prisons of Yeránda and Hyderabad amounted to Rs. 3,589-10-7 Sale of Quinine Packets. during the year under report against Rs. 3,253-6-6 in the year previous. The Yeránda Central Prison shows a profit of Rs. 2,861-4-7 while a sum of Rs. 728-6-0 represents the profits of the Hyderabad Central Prison. The value of quinine purchased, packing materials, service stamps and establishment charges amounted to Rs. 18,339-0-6 during the year as against Rs. 21,394-4-0 in 1913, and the amount paid into the Treasury during the year under report was Rs. 22,419-12-9 as against Rs. 22,964-1-8 in the year previous.

During the year under report the Central Prison, Yeránda, took over the packing and distribution of quinine treatments (*vide* Government Resolution, General Department, No. 3501, dated 4th May 1914). The work was carried out satisfactorily, all the stock having been distributed. The purchase cost of the treatments was Rs. 25,000; packing and postage charges Rs. 150. Each parcel of ten tubes (each tube containing 20 tablets) was sold at a rate of Rs. 1-7-0; the actual purchase cost was Rs. 3-12-0. The total loss on the transaction is Rs. 15,566-3-6.

46. The subjoined statement contrasts the outturn of the Yeránda Prison Press in the year 1914 with that in 1913. The Prison Press. number of prisoners employed in 1914 was 237 against

325 in the year 1913, and the cost of their maintenance was Rs. 24,635-10-7, calculated on the average cost of Rs. 85-13-5 per prisoner.

As previously mentioned there is no profit charged for the press work. The matter has been gone into thoroughly and Government are satisfied that the Prison Press is doing better and cheaper work than could be got from outside agencies. When however the free Press begins work at Yeránda it will then be necessary to charge a certain rate for the prison labour, as the Prison Press will become merely an adjunct to the free Press and the Yeránda Press will no longer be under the complete control of this Department, which will thereafter merely furnish labour and see that proper discipline is enforced in the subsidiary prison press.

Comparative Abstract of Outturn during 1913 and 1914.

Main Sections.	Units.	Outturn.	
		1913.	1914.
1. Composing	Pages (Foolscap Folio, Solid Pica).	8,802	7,765
2. Stereo Foundry	lb. (Finished Plate)	5,084	4,349
3. Machines	Impressions (Foolscap)	7,40,99,258	5,93,17,137
4. Hand Presses	Do. do.	30,40,273	9,51,249
5. Hand Sewing	Books, H. B. Foolscap Folio, 100 leaves. }	74,965	68,535
6. Machine Sewing	Do. do.		41,610
7. Casing in	Do. do.	68,693	1,02,590
8. Ruling	Impressions	1,54,58,118	1,34,15,748
9. Paging	Do.	1,32,70,646	1,42,26,996
10. Perforating	Cuts	8,67,918	8,84,048
11. Folding	Foolscap Folio, single folds .	1,42,68,307	1,38,52,611
12. Wire-stitching	Stitches	17,56,906	24,78,911
13. Insetting	Insets	20,38,113	16,00,193
14. Eyeletting	Eyelets	3,66,003	4,89,056
15. Envelope-making	1,40,23,073	1,36,58,827

47. The statement noted in the margin shows the total cost of maintenance for all Prisons, Subsidiary Jails and Lock-ups. Statement No. XIII.—Net Cost. The total expenditure excluding charges for inspection and general superintendence has amounted to Rs. 10,47,774 during 1914 against Rs. 10,27,169 in 1913. The total cash earnings have been Rs. 1,17,825-3-0 in 1914 against Rs. 1,37,914-11-0 in the year previous, thus making a net cost to Government of Rs. 9,29,943-13-0 during the year under report against Rs. 8,89,254-5-0 in the year 1913. The average net cost to Government per prisoner has been Rs. 82-3-0 against Rs. 78-1-0 in the year previous.

VITAL.

48. The statement noted in the margin deals with the sickness and mortality of all classes during the year under report. Statement No. XIV.—Sickness and Mortality. The following table compares the figures for 1913-1914 of prisoners confined in the Central, District, Special and Extra-mural Prisons, Subsidiary Jails, Civil Jails and Lock-ups :—

Year.	Daily average strength.	Admissions into Hospital.	Daily average sick.	Total number of deaths.	Ratio of deaths per mille.
1913	11,437	5,879	234.8	178	15.6
1914	11,361	7,851	272.8	207	18.2

49. The death rate for the year is 18.2 against 15.6 last year. But if we deduct the deaths from gunshot wounds in the Belgaum Jail the death rate would be 16.4. Admissions into hospital increased by 1,972 and the daily sick rate by 38.

For the increase in admissions the following Prisons were mainly responsible :—

Prison.	Increase.	Actual increase under heads of disease.
H. M.'s Common Prison	169	Malaria 80, Diarrhoea 21, Soft Chancres 21, Dermatitis 10, and Abscesses 11.
Deccan Extra-mural Gang	104	Mumps 159 against none in 1913.
Bijápur Prison	59	Pyrexia of uncertain origin 51.
Ahmedabad Central Prison	860	Malaria 475, Dysentery 58, Diarrhoea 144, Conjunctivitis 19, Boil and Whitlow 53.
Karachi Prison	121	Scurvy 53 and Bronchitis 60.
Sind Extra-mural Gang	192	Malaria 123 and Pneumonia 52.

Of the 168 prisoners who died in Central and District Prisons and Extra-mural Gangs, 43 were admitted in bad health, of whom 21 were suffering from the disease that ultimately proved fatal, 30 were in fair health and 94 in good health.

50. Mumps was prevalent throughout the year, the Hyderabad Central Prison showing 187 cases, the Deccan Gang 159, the Yeránda Central Prison 76 and the Sind Gang 31. Sporadic cases occurred at Shikárpur, Sukkur, Thána, Ratnágiri, Dhárwár and the House of Correction. The Extra-mural Gangs had apparently no difficulty in stamping out the infection which still lingers in the Central Prisons of Yeránda and Hyderabad. The disease may be spread by a carrier: it was mild in type. I believe myself that the regular use of an antiseptic mouth wash by all the inmates of the Prison is of considerable use in getting rid of the disease, though some Medical Officers do not concur.

There were 4 cases of Plague at the Common Prison. All contracted the disease before admission; one was admitted to hospital and recovered; two were sent to the Maratha Plague Hospital on arrival; the fourth, a debtor, was released immediately by the sentencing Court. Wherever it was considered necessary inoculation was resorted to with complete success. Now indeed plague is a disease that, thanks to inoculation, gives us no bother; mumps is infinitely more a source of worry.

51. The overcrowding in the Prisons was this year accentuated by the drafting of large number of prisoners from the Thána Prison and House of Correction for administrative reasons.

The three Central Prisons, Sukkur, the Common Prison and the Sind Gang were constantly overcrowded. In the District Prison, Karáchi, there was overcrowding in April, May, June, August, October and November; in the District Prison, Dhárwár, for 86 days; in the male District Prison, Dhulia, for 53 days; in the female prison throughout the year; in the Special Prison, Thána, slightly in May and June; in the House of Correction for 3 days.

Prisoners were as far as possible transferred from the congested Prisons to the Extra-mural Gangs.

In the Sind Gang the extra prisoners were accommodated in tents and mandaps; in Sukkur the overcrowding only applies to the cold weather and the excess slept in verandahs; at Yeránda, Ahmedabad, Hyderabad and Karáchi the surplus prisoners slept in verandahs or work sheds which were not in use.

52. I comment in detail on the following Prisons in which the death rate exceeded 15 per mille.

Sind Gang.—Death rate 28·3 per mille; of the 22 deaths 12 were due to that disease equally fatal to the free and prison population in Sind—Pneumonia, 2 to Diarrhœa, 1 to Dysentery, 1 to Secondary Syphilis, 3 to Malaria, 2 to Scurvy and 1 to Gangrene of lung. Fourteen of the 22 deaths occurred in the first four months of the year. A great deal of the ill-health in this Gang both during 1913 and 1914 was due to the neglect of their duties by the Superintendent, Medical Officer and Jailor. The present Superintendent and Medical Officer, Assistant Surgeon Petigara, took over charge in April, and at my inspection in January the prisoners looked healthy and the sick were well cared for and incidentally the prisoners were doing twice as much work.

Aden.—Death rate 19·6. The health of the Prison was excellent, there were only 7 admissions to hospital in the year. It is a case of one death—Dysentery—in a small population.

Shikarpur.—Death rate 30·1. General health of the Prison was excellent. Here we have a small population (166) and five deaths. Two from Pneumonia; 1 from acute delirious mania (the patient was sent to the Jail for care and died the same day); 1 Arsenical poisoning (an under-trial who died on the day of his admission from a dose administered outside the Prison); the last death was that of a prisoner admitted with Chronic Bright's Disease and advanced heart disease (the case was hopeless from the first).

Hyderabad Central Prison.—Death rate 27·4. Thirty-four deaths; of these 14 died from Pneumonia, 3 from Heart Disease, 2 from Tubercle of lung, 3 from Malaria and 1 each from Hæmorrhagic Pleurisy, Cerebral apoplexy, Scurvy, Ileo-cæcal abscess, Syncope, Chronic enteritis, Anæmia, Aneurism of Aorta, Gastritis, Chronic pericarditis and Oedema of lung. The Prison was constantly overcrowded and an increase in accommodation is urgently required. A disbelief in the efficacy of fresh air and a fear of night winds probably intensified the epidemic of Pneumonia. This has been remedied. In this Prison three prisoners in order to avoid hard labour inoculated themselves with a paste which produced gangrenous cellulitis resulting in loss of the limb. The paste was a mixture of crushed jequirity seeds, flies and blood kept for some time: a mixture calculated to produce astonishing results when subcutaneously inoculated.

Karachi Prison.—Death rate 24·6. Of the deaths 4 were due to Pneumonia, 2 to Debility, 1 Epilepsy, 1 Sprue, 1 Caseation Mediastinal glands, and 1 Pleurisy. A good deal of the ill-health of this Prison throughout the year was due to Scurvy: the medical charge of the Prison was held by several officers, but it was not until Major Tuke took over in October that the faulty conditions causing the outbreak were remedied.

His Majesty's House of Correction.—Death rate 34·1. Of the deaths 2 were due to Dysentery, 1 to Dyspepsia, 1 to Gastric Ulcer, 1 to Valvular disease of the heart and 1 to Phthisis: the two latter prisoners were admitted to Prison suffering from the disease from which they died. The general health of the prisoners was good.

Deccan Gang.—Death rate 17·3. Of the 26 deaths 10 were due to Pneumonia, 3 Pleurisy, 1 Angina Pectoris, 1 Sloughing of penis and scrotum, 4 Myelitis, 1 Syncope, 1 Chronic Dysentery, 1 Secondary Syphilis, 1 Tubercle of Intestines, 1 Tubercle of Lungs and Peritoneum, 1 Pernicious Anæmia, 1 Valvular disease (Aortic), 1 Acute Oedema of glottis, 1 Cellulitis, 1 Diarrhœa. The prisoners dying from Tubercle of lungs and peritoneum, Secondary Syphilis, Valvular disease of the heart and Pernicious Anæmia were, when admitted to the Gang, suffering from these diseases. During the year the Gang was the receiving Prison for the Ahmednagar, Belgaum and Sátara Districts; this and the necessity of relieving the Common Prison, Bombay, led to many prisoners being sent to the Gang who were not up to the standard of health usually required for extra mural work. Such prisoners are looked after carefully for some months and put on the lighter forms of outdoor labour. Up to the end of July medical matters at this Gang were unsatisfactory. To give an instance, the routine medical inspection of extra-mural gangs (on which so

much depends) was utterly neglected. The Medical Officer's chief occupation seemed to be to make trouble and to back up unruly subordinates. A distinct improvement in the management of the hospital and medical arrangements generally has taken place since Assistant Surgeon Mazumdár took over charge.

Kárwár Prison.—Death rate 41·7. Five deaths in a small population, 1 from Ague, Diarrhœa, Dysentery, and Pneumonia respectively: one prisoner sent to Sirsi to give evidence died there of Pneumonia.

Thána Special Prison.—Death rate 18·1. Three Tubercle of lung, 2 Diarrhœa, 1 Dysentery, 1 Chronic Bronchitis, 1 Pyorrhœa Alveolaris, 1 Pneumonia. Of these only the prisoner dying from Pneumonia was admitted in good health. Two of the cases of tubercle, one case of diarrhœa and the case of chronic bronchitis were admitted suffering from the disease; the case of Pyorrhœa Alveolaris was admitted suffering from advanced septic poisoning.

His Majesty's Common Prison.—Death rate 17·2. One Chronic Dysentery (admitted dying from the disease); 1 Aneurysm of heart, 1 Dysentery, 1 Phthisis (all three admitted suffering from the disease); Obstruction of bowels 1, died on the 4th day after his admission; Pneumonia 1, Cerebral hæmorrhage 1. All the stronger and healthier prisoners are transferred to the Deccan Gang, so a residue of the weak, debilitated and disease infected remain.

53. The health of Rájkot *nil*, Yerávda Central Prison 7·3, Dhulia 7·4, Bijápur 10, Dhárwár 11·2, Sukkur 11·6, Ratnágiri 11·9 and Ahmedabad Central Prison 12·6 has been satisfactory.

54. The following methods were adopted during the year under report with a view to improve the health of the prisoners confined in our Prisons and Jails and are inserted here in accordance with the orders contained in paragraph 1 of Government Rescution, Judicial Department, No. 9115, dated 29th December 1896:—

- (1) Issue of wheat and rice in lieu of bájri and jowári.
- (2) Issue of 2 ounces extra flour and one ounce of molasses to working prisoners in the Deccan Gang.
- (3) Issue of wheat in lieu of bájri and jowári at the Sind Gang.
- (4) Issue of extra rations to weakly prisoners and convalescents.
- (5) Issue of quinine as a prophylactic.
- (6) Issue of potatoes and onions in lieu of green vegetables.
- (7) Issue of extra warm clothing when considered necessary.
- (8) Inoculation by Professor Haffkine's prophylactic serum.

55. Reviewing the health statistics of Subsidiary Jails and Lock-ups, it will be observed that the population has fallen from 67,033 in 1913 to 65,840 in the year under report.

The daily average strength, number of admissions into hospital and daily average sick have been respectively 1,486, 1,410 and 15·4 against 1,705, 1,062 and 22·3 in the year previous. The number of deaths was 39 against 28 in 1913 and the death rate per mille of average strength has been 26·2 as against 16·4 in the year previous. Out of the 39 deaths Belgaum Subsidiary Jail is responsible for 21 (all shot while attempting to escape on the 28th December 1914); otherwise 18 deaths were due to ordinary causes and the death rate per mille was 12·1.

Statement No. XV. 56. The marginally noted statement shows diseases chiefly responsible for sick admissions and deaths.

There was one admission from Cholera against 1 admission and one death in 1913. The case occurred at Shikárpur: the origin could not be traced.

Dysentery.—An increase of 49 admissions and 4 deaths. The Jails of Ahmedabad and Thána are responsible for the increase in admissions and Yerávda and Ahmedabad for increase in deaths.

Malaria.—1,503 admissions and 10 deaths against 690 admissions and 4 deaths. The increase is due to admissions at Ahmedabad, Sind Gáng, Yerávdá, Deccan Gang and Common Prison. Yerávdá showed 116 cases of Pyrexia of uncertain origin and 1 case of Malaria in 1913 and in 1914 28 cases of Pyrexia of uncertain origin and 103 cases of Malaria. I am inclined to think the variation here is due to different views as to diagnosis held by different Medical Officers.

Quinine was given as a prophylactic in all Prisons where Malaria was prevalent, with, in general, good results.

Tubercle shows 37 admissions and 13 deaths against 39 admissions and 14 deaths in 1913. Of the admissions, 18 in all probability contracted the disease outside the Prison. During the coming year a Tubercle Ward is to be built at the Yerávdá Central Prison.

Anæmia and Debility account for 78 admissions and 5 deaths against 65 admissions and 4 deaths in 1913. Of the deaths 1 was at Yerávdá (no positive signs of disease could be discovered during life or on *post mortem* examination); one at the Deccan Gang really a death from Chronic Dysentery; two at Karáchi (one I believe to have been due to Scurvy and Malarial Cachexia, the other was a man of 60 who actually died of Chronic Bronchitis and Emphy, sema); one at Hyderabad, a man of 60 (examination during life and the *post mortem* examination revealed no tangible disease).

Other general diseases show 1,405 admissions and 12 deaths against 1,066 admissions and 21 deaths in 1913. The deaths were due to Secondary Syphilis 3, Scurvy 3, Enteric fever 2, Guinea worm 2, Pyrexia of uncertain origin 1, Tuberculosis of glands of neck and of intestines 1.

Pyrexia of uncertain origin shows 284 cases this year against 271 last year. These obscure fevers appear to be limited to the Central Prison, Yerávdá, 116 last year and 28 this year; the Deccan Gang 117 last year and 146 this year; Bijápur 28 last year and 80 this year.

Pneumonia 169 cases and 48 deaths against 83 admissions and 20 deaths in 1913. The principal centres of this disease were :—The Sind Gang, 64 cases and 12 deaths; Hyderabad Central Prison, 20 cases and 14 deaths; Deccan Gang, 47 cases and 10 deaths. Karáchi shows 5 cases and 4 deaths; Yeravdá 3 cases and 2 deaths; Shikárpur 6 cases and 2 deaths.

Other respiratory diseases show 383 admissions and 12 deaths against 262 admissions and 9 deaths in 1913. Karáchi has 88 cases and 1 death against 31 cases and 1 death in the previous year; Dhárwár 45 cases and 1 death against 21 cases and no death; Bijápur 16 cases and no death against 8 cases and no death; Hyderabad 27 cases and 3 deaths against 10 cases and 1 death.

Diarrhœa.—477 admissions and 8 deaths against 345 admissions and 18 deaths. The increase is due to the admission for this disease of 161 prisoners (none of whom died) at Ahmedabad against 21 in 1913.

Abscesses, Ulcers and Boils show 570 admissions and 1 death against 508 admissions and no death in 1913. The death was due to an Ileo-Cæcal Abscess. The increase in admission is due to Ahmedabad 191 against 99.

57. Out of the total of 20,427 prisoners who were discharged during the year 11,386 or in other words 55·7 per cent. gained weight against 54·6 in the year previous; 4,799 or 23·5 per cent. lost weight against 19·8 in 1913 and 4,242 or 20·8 per cent. remained stationary as compared with 25·6 in 1913.

Official and non-official Visitors.

58. There were two hundred and forty Official Visitors during the year for Prisons and Second Class Subsidiary Jails. Sixty quarterly meetings were held during the year and all were well attended. Five hundred and two visits were paid by Official Visitors, while one hundred and thirty-one were paid by Non-Official Visitors.

BUILDINGS.

59. The following allotments were sanctioned during the year for original major works:—

	Rs.
(1) Certain works at His Majesty's House of Correction, Bombay	20,000
(2) For completing a barrack to hold 64 prisoners at Ahmedabad Central Prison	2,500
(3) Acquisition of site for the Jail at Andheri (Thána District) ...	1,00,000
(4) Acquisition of site for the Jail at Hindalgi in the Belgaum District	20,000
(5) Compound wall round the District Prison at Dhárwár ...	13,900
(6) For completing the quarters for the Jailer at the Aden Special Prison	5,900
	1,62,300

Rs. 20,000 Presidency—House of Correction.—The question of building a new Civil Jail at the House of Correction having been abandoned, as per Judicial Department letter No. 1589, dated 12th March 1914, Government reappropriated a sum of Rs. 19,600 towards other works (*vide* Government Resolution, Public Works Department, No.—A.-2133, dated 19th February 1915).

Jail at Andheri.—The provision of Rs. 1,00,000 for the acquisition of land for the Andheri Jail was withdrawn and credited to the reserve with Government for other Provincial Original Major Works, Civil Buildings (*vide* Government Resolution, Public Works Department, No.—A.-12996, dated 25th November 1914). This Jail is an urgent necessity.

Belgaum (Hindalgi).—Out of the sum of Rs. 20,000 provided for towards the New Jail at Hindalgi (Belgaum) Rs. 19,700, have been re-appropriated by Government towards other work (*vide* Government Resolution, Public Works Department, No. A.—1289, dated 3rd February 1915). This Prison is also urgently required.

In addition to the above, a sum of Rs. 20,000 was allotted for the discretionary grant, all of which was utilized during the year under report as detailed below:—

His Majesty's House of Correction.—Rs. 4,858 for carrying out the following five works:—

	Rs.
(a) Lighting with electricity the Jail and the quarters attached to it	2,563
(b) Providing expanded metal trellis work round the work sheds .	1,632
(c) Reconstructing the existing sullage drainage for Assistant Surgeon's quarters	315
(d) Paving with Shahabad Stone the floor of the cook room ...	123
(e) Reconstructing outhouses of the Deputy Superintendent's quarters	225

Thána Special Prison.—Rs. 1,252 for completing the work of constructing quarters for the 4th clerk.

Yeránda Central Prison.—Rs. 4,852 for the following four works:—

	Rs.
(a) Providing installation of Electric Lights in the European Warders' Quarters	856
(b) Repairing bathing platforms and providing new staircase to Central Tower	1,296
(c) Meter to measure quantity of water supplied to the Yeránda Central Prison Press	520
(d) Providing malthoid covering to the terraced roof of the quarters for armed warder guard	2,150

His Majesty's Common Prison.—Rs. 656 for hermetically covering well in Civil Jail and Rs. 412 for protecting with iron bars the openings in weaving work shed.

Karachi District Prison.—Rs. 1,023 for constructing a blacksmith's shop and Rs. 492 for enclosing the Pump shed with expanded metal.

Dhulia District Prison.—Rs. 1,131 making certain additions and alteration to the Office and providing for the greater security of the Jail, Rs. 1,423 for providing iron barred passages to the latrines of the Hospital to permit of their use at night, and Rs. 209 for providing $\frac{3}{4}$ " pipe connection to the warders' quarters.

Ratnágiri District Prison.—Rs. 710 for making certain improvements to the kitchen.

Károór District Prison.—Rs. 504 providing Mangalore tiled roof for the main passage inside the main gate where there was no protection from the monsoon.

Dhárwár District Prison.—Rs. 1,132 rebuilding the parapets of the main wall which collapsed in the monsoon.

The balance was expended on several petty works.

MISCELLANEOUS REMARKS.

60. During the year 1914, the following Prisons, Gangs and Subsidiary Jails were inspected either by Major C. S. Lawson, I.M.S., or myself :—

Central Prisons.	District Prisons.	Subsidiary Jails.	Gangs.
Yeránda ...	Rájkot (Twice) ...	Wadhwan (twice) .	Deccan Gang (twice).
A h m e d a b a d (twice) .	His Majesty's Common Prison. His Majesty's House of Correction. Aden Dhulia Thána Dhárwár... .. Bijápur	Belgaum	

In addition numerous visits were paid to the Central Prison, Yeránda, His Majesty's Common Prison and House of Correction, and flying visits to Thána, Deccan Gang and Belgaum. My touring was much interfered with in August, September and October owing to urgent work at head-quarters and in Bombay.

61. The class of Juveniles consisted of 75 at the close of the year—an increase of 20 on the previous year. On the 1st February 1914 a schoolmaster and four special warders were entertained. The warders were selected from the staff of the Central Prison, Yeránda; they have all been failures and reverted to their original posts. It probably will be as difficult to get suitable warders as to reform the Juvenile; in fact if I could get the former I could almost guarantee the reformation.

The general conduct of the class has been good. The bulk of the boys were employed on building the new wall, only 20 of the best carpenters remaining in the carpentry class. Lt.-Col. Hudson, I.M.S., reports that the work on the wall building "has as a whole been satisfactory. At first the progress was very slow and the juveniles showed reluctance to take up the work. They have gradually taken to it and the dressing of the stones and wall laying is now satisfactory. There has been no special instructor in this work, but Public Works Department's Maistri has had supervision. This was the best arrangement to be made under the circumstances, though not entirely satisfactory as the maistri was not a trained instructor and also was changed from time to time."

An attempt was made to get a special instructor in masonry for the boys but failed; during the present year I have of course no funds, but should there

be any anticipated saving I will endeavour to get a mason maistri with the sanction of Government. There is no provision in this year's budget for the Superintendent and Staff of the Borstal Institute, nor for their quarters. It is to be hoped that provision can be made in the coming financial year. Without an adequate staff good results can hardly be expected.

There were 26 releases, one on medical grounds, three on appeal, four removed from the class (one for misconduct and three sent to the class through error), eighteen released in the ordinary way; of these latter 7 declined to pursue carpentry as a means of livelihood. The prison authorities obtained employment for 10. Of these 10, 3 remain in employ, the rest have disappeared. Lt.-Col. Hudson, I.M.S., says:—"The fault lies in the fact that there is no sort of supervision over the juvenile when once he has got employment. He feels "strange and uncomfortable in his new surrounding, and has no one to take an "interest in him and stimulate him to keep to his work." The pith of the matter is here: "No one to take an interest in him." He is only a fellow man drifting to wreck, only a youngster with no one to look to for a word of kindness and advice or a helping hand.

It is difficult to understand the attitude of the charitable public. They probably argue that if the youth does become a confirmed criminal that the prison workshops are there as the home of his adult years and the prison infirm gang and hospital as the refuge for his old age; like the worn out cattle he can go to his pinjrapole. This appears to be the only reasonable explanation of their indifference or else—

"That labour to this one result
Must seem unduly difficult."

The negative source of satisfaction is that no boy released from the Dhárwár Class has been reconvicted so far as this Department can ascertain.

Lt.-Col. Hudson, I.M.S., reports that "during the first 9 months of the year "the juveniles were divided into 3 batches, each batch receiving 2 hours' tuition "daily in rotation doing school, wall work and carpentry. All received one "hour's drill together in the morning.

"As the number of juveniles increased, and as it was found that the wall "work did not progress sufficiently fast, a rearrangement was made from October "and under this the juveniles were divided into six batches according to their "proficiency.

"The more advanced juveniles obtain one hour's tuition daily and the more backward 2 hours."

Owing to the urgent necessity of pressing on with the work of the wall adult prisoners had to be kept at Dhárwár during the year. By the end of the present year I trust that their number will be very largely reduced.

62. The Prisoners' Aid Society had just issued its appeal to the public when the war broke out and nothing came of it. We will hope that with peace the society may really make a start.

63. The recall of Indian Medical Officers to military duty resulted in many of the prisons being left in charge of Officers who had no previous experience of prison work. It has been found difficult to find suitable men for the Jailor—grade to fill vacancies caused by promotion or sick casualties. In future no Jailor will be confirmed in his appointment until he has passed an examination in the Prison Manual and Acts and Regulations bearing on his work.

During the past year Government was pleased to sanction a much-needed increase in the pay of the Jailor establishment and to the Superintendents of the Special Prisons, Thána and Karáchi.

A proposal to increase the allowances of Assistant Surgeons and Sub-Assistant Surgeons deputed for duty in Prisons was submitted to Government under this Office No. 8333, dated 21st August 1914.

64. I regret greatly that the quality of men presenting themselves for employment as prison warders has not shown the improvement that was hoped for from the increase in pay sanctioned by Government in Government Resolution, Financial Department, No. 2077, dated 23rd May 1913. Had the pay not been increased however I doubt if we would have got any recruits at all. During the year out of a total strength of 859 warders 98 resigned and 57 were dismissed or discharged the service. The latter number would be much larger but offences are condoned as recruiting is so weak. Nearly all prisons report their warders as unsatisfactory, and I fear that it is putting it at a low figure when I say that 60 per cent. of the staff of warders are unfit for the work they are expected to perform. The inferiority of the warder staff reacts on another weak spot in our Prison administration.

The system of convict officers, on which we rely so largely for discipline and the safe-guarding of our Prisons, is an admirable one within limits. But it is beyond limits when we have to rely almost entirely on these men for the supervision of and instruction in industries and largely on them for the exaction of discipline and for watch and ward. Even so all might go well under a good Superintendent, a strict and zealous Jailor and with good honest warders. But the whole becomes a vicious circle when an untrustworthy warder staff or a weak Jailor or a slack Superintendent is present. So closely connected with this subject is the special class at Thána Prison, now defunct, that I cannot help pointing out that this class, which was a complete success and fruitful in good result, ceased merely because the prisoners that were qualified for the class had to be retained in the Prisons to act as convict officers. The well-behaved prisoners were retained to lighten the paid warders. The Commissioners of English Prisons speak highly of the success of their "Long Sentence Division" which was started in 1905. This "Division" is to all intents and purposes based on exactly the same idea and on the same lines as the Special Class, Thána. To do away with the system of convict officers altogether would be a mistake and would be a most expensive move but the present position is very unsatisfactory.

65. The Aged Convict Class instituted in 1910 in the English Prisons is practically the "Old and infirm Gang" which has been in Indian prisons for decades. This class of aged convicts in England enjoy a certain mitigation of ordinary penal discipline, a special diet, association in a large room, with adjacent garden, light and suitable work, with quiet conversation. The late G. M. Stevens writing in 1899 of a visit to a Bombay Prison describes the yard where "the old, old men too frail to serve out a sentence in the Andamans are dozing out the afternoon over a pretence of twisting yarn."

66. During the year under report the Superintendents of His Majesty's House of Correction and the Special Prison, Thána, were called upon to perform duties which demanded considerable exercise of firmness, discretion and fact; Mr. Reed and Mr. Brierly discharged these duties to my complete satisfaction.

67. The result of the year may be briefly summarised as follows:—The gross cost per head is Rs. 96-5-11 against Rs. 93-10-10 in 1913; the net cost per head Rs. 82-3-0 against Rs. 78-1-0 in 1913; the cash earnings Rs. 1,17,825 against Rs. 1,37,915. The death rate 18.2 against 15.6 in 1913.

68. During the latter part of the year my office establishment was under strength and did their work very well. The acting Head Accountant, Mr. S. S. Barve and the 3rd Clerk, Mr. S. R. Mukhedkar, have given me able and zealous assistance in the preparation of this report.

I have the honour to be,

Sir,

Your most obedient servant,

J. JACKSON, M.B., Lt.-Col., I.M.S.,
Inspector-General of Prisons, Bombay Presidency.

STATEMENTS.

No. 4189 of 1916.

From

LIEUT.-COL. J. JACKSON, M.B., I. M. S.,
Inspector-General of Prisons,
Bombay Presidency;

To

THE SECRETARY TO GOVERNMENT,
Judicial Department,
Bombay.

INSPECTOR-GENERAL OF PRISONS' OFFICE:

Poona, 19th April 1916.

Sir,

I have the honour to submit the Annual Administration Report together with the usual Statistical Tables, on the Prisons and Jails in the Bombay Presidency including the Province of Sind and the Settlement of Aden, for the year 1915. The office of the Inspector-General of Prisons was held by me during the year under report.

JUDICIAL.

2. The number of Central, District, Special and Extramural Prisons has undergone no change during the year under report. Statistics of the Third Class Subsidiary Jails have been grouped together with those of Lock-ups as done in previous years. The Second Class Subsidiary Jail at Sholapur was reduced to the status of a Third Class Subsidiary Jail on the 15th September 1915 (*vide* Government Resolution, Judicial Department, No. 5518, dated 3rd August 1915). The accommodation which, owing to this arrangement, Government were able to give Mr. Starte for his work of criminal reform has been of considerable assistance to him.

3. From the general summary preceding the statements in the appendices to this report, it will be seen that the total population of all classes of prisoners confined in the Prisons, Subsidiary Jails, Lock-ups and Civil Jails has been 105,393 as compared with 101,616 in the year 1914—an increase of 3,777. The daily average population has been 11,701, which shows an increase of 340 when compared with the figures of the year previous.

4. The following table, which compares the figures of the past two years, refers to the admission of convicts into Prisons and Second Class Subsidiary Jails only:—

Statement No. I.—Number and disposal of convicts.

		1914.			1915.		
		Males.	Females.	Total.	Males.	Females.	Total.
Number remaining on last day of previous year.	Prisons	9,218	855	9,573	9,084	838	9,422
	Jail	201	6	207	154	7	161
Imprisoned during the year.	Prisons	15,670	909	16,579	16,114	752	16,866
	Jails	777	61	838	540	57	597
Total	Prisons	24,888	1,264	26,152	25,198	1,090	26,288
	Jails	978	67	1,045	694	64	758
Grand Total		25,866	1,331	27,197	25,892	1,154	27,046
Daily average strength		9,349	382	9,731	9,560	319	9,879

5. There has been a slight increase in the number of convicts admitted. The Prisons of Dhulia, Deccan Gang, Hyderabad and Aden show an increase, while H. M.'s Common Prison and the Prisons of Yeránda, Dhárwár, Thána, Sukkur and Shikárpur show a decline. The increase in the Prison of Dhulia is due to a greater number of admissions under the A'bkári Act and petty thefts than in the last year; in the Deccan Gang to direct admissions from Sátára, Belgaum and Ahmednagar Districts throughout the whole year to relieve overcrowding in the Yeránda Central Prison (*vide* Government Resolution, Judicial Department, No. 6967, dated the 26th September 1914). The increase in the Hyderabad Central Prison was due to a low inundation. The decline in H. M.'s Common Prison was due to less admissions of prisoners sentenced to one month and under; at Yeránda to discontinuance of direct admissions of prisoners from Belgaum, Sátára and Ahmednagar Districts throughout the year; at Thána to the prisoners of the Násik District proceeding to Yeránda direct. No particular cause can be assigned to the fall in admissions in the Sukkur and Shikárpur Prisons.

6. With regard to the disposal of convicts there is a decrease under the heads "Released on appeal," "Released on expiry of sentence," "Released under remission rules," "Escaped," "Executed" and "Died." The headings "Transferred to other Jails" and "Transported beyond seas" show an increase. Forty-nine prisoners were released by order of Government as detailed below:—16 released on medical grounds—1 each from H. M.'s House of Correction, Dhárwár and Rájkot, 2 each from Ahmedabad, Hyderabad and Sukkur, 3 from Sind Gang and 4 from the Yeránda Central Prison. Six life transports who had completed 14 years' imprisonment—with remissions earned—were released—5 from Yeránda and 1 from Ahmedabad. Ten juveniles were released from the Juvenile Jail, Dhárwár, on the recommendation of the Committee. Fourteen Chapparbands and Ghantichors were released on other grounds—13 from Bijápur and 1 from the Deccan Gang. The remaining 3 were released on other grounds—1 each from the Prisons of Hyderabad, Dhulia and Karáchi. Seventy-five life transports were deported to the Andamans *via* Madras and 49 term transports *via* Alipore against 75 lifers and 21 termers in 1914. The headings "Escaped" and "Died" will be dealt with later. There were 24 state prisoners in confinement in this Presidency at the close of the year.

7. There is a marked decrease—35—under "Europeans" and no other head shows any appreciable increase or decrease. The diminution in admission of Europeans is due to the fact that only 3 military European prisoners were admitted during the year. The number of juveniles under 15 years of age admitted during the year 1915 was 19 against 25 in the previous year. Out of 17 males and 2 females convicted, 11 males were sentenced to "One month and under," 5 males and 2 females to "Above one month and not exceeding 6 months" and 1 male to 15 months' imprisonment. Out of the 19 admitted, 2 males had been previously convicted. Of the total number of juveniles admitted, 3 were sent to the Reformatory School by the order of District Magistrates, 1 was released on appeal and 1 was sent to the Dhárwár Juvenile Jail. This left 14 juveniles who underwent imprisonment—2 females and 12 males. Of the males, one was released on furnishing security, in 4 instances the District Magistrates did not consider the cases suitable for the Reformatory, 4 were admitted into the Rájkot Jail and the Reformatory School Act does not apply to Káthiáwár, the remaining 3 were released on expiry of sentence.

In the subjoined table are shown some cases in which the sentence of imprisonment was carried out without, I am quite sure, any advantage to either the public or the individual. If there was no other substitute available a few strokes of a light cane would have been preferable for the boys.

Name.	Sex.	Age.	Sentence.	Offence.	Jail.
H. daughter of B.	Female	14	6 months' rigorous imprisonment.	Sections 109—110 and 123, Criminal Procedure Code.	Ratnágiri.
G. B.	Male	14	20 days' rigorous imprisonment.	Section 379, Indian Penal Code.	Thána.
G. N.	Male	12	Do.	Do.	Do.
A. alias B. wife of D.	Female	18	8 months' simple imprisonment.	Section 454, Indian Penal Code.	Do.
K. V.	Male	14	20 days' simple imprisonment.	Sections 457 and 380, Indian Penal Code.	Ahmedabad.
P. S.	Male	11	Rs. 5 or 7 days' simple imprisonment.	Section 112 (a), Indian Railway Act.	Rájkot.
P. G.	Male	11	Do.	Do.	Do.
M. K.	Male	14	Rs. 1-9-0 or 2 days' simple imprisonment.	Do.	Do.
I. J.	Male	12	Do.	Do.	Do.
M. A.	Male	14	15 days' rigorous imprisonment.	Section 379, Indian Penal Code.	Wadhván.
B. N.	Male	14	15 days' rigorous imprisonment.	Do.	Dhárwár.

Female prisoners under "15 to 40" show a decrease while males under "40 to 60" show a similar increase. The variations under other sub-heads of age are trifling. Out of 15,384 prisoners shown "Under 15 to 40 years of age," 4,815 prisoners were under 25 years of age and of the latter number 3,907 were convicted for the first time. Under education the sub-head "Able to read and write" shows a decrease while the remaining two sub-heads show an increase. Under previous occupation the sub-heads "Persons employed under Government, etc.," "Persons engaged in agriculture" and "Persons not classed otherwise" show an increase and the rest show a decrease. The percentage of the total number of males and females admitted to the free population according to the Census of 1911 was 0.163 and 0.009 respectively.

8. There was an increase under the sub-heads "Above 6 months and not exceeding 1 year," "Above 1 year and not exceeding 2 years," "Above 2 years and not exceeding 5 years," "Exceeding 10 years," "Life" and "Term Transports." The other sub-heads show a decrease. There were 877 prisoners sentenced to simple imprisonment, 16,338 sentenced to rigorous imprisonment and 12 sentenced to rigorous imprisonment with whipping as compared with 953, 16,240 and 9 in the year previous. The number of prisoners sentenced to rigorous imprisonment with solitary confinement was 236 as compared with 215 in 1914, 261 in 1913 and 332 in 1912. The remark made last year in respect of non-execution of many of the sentences of solitary confinement owing to insufficient number of cells, holds good this year also. Three thousand seven hundred and twenty-three prisoners were sentenced to "Not exceeding one month" as compared with 4,290 in 1914. Of these, 1,521 were admitted to the Common Prison, Bombay, against 1913 in 1914. Bombay admissions under this head fell by 392, and the balance of the decrease—175—is spread over the rest of the Jails. The steady fall under this head is thoroughly satisfactory. The number of prisoners sentenced in Bombay for 7 days and under in default of payment of fine has slightly increased from 349 in 1914 to 360 in 1915. I reiterate my remark of last year that, if possible, some time should be given for payment of the fine before imprisonment is resorted to. In addition 212 prisoners were sent to prison under substantive sentences of a week or less in the year under report against 368 in the year previous. This is certainly an improvement which I hope will continue. Of the above 212 short termers, 81 were 25 years of age and under.

9. The statement noted in the margin deals with the re-convicted prisoners. The number of habituals (*vide* subjoined statement) identified by Jail officials has been 139 against 38 in the year previous. The increase occurred at the Jails of Yeránda, Dhulia, Hyderabad and Sukkur. Two thousand four hundred and ninety-nine were classified as habituals out of a total of 2,906 previously convicted prisoners. The statement does not include 602 prisoners sentenced under Chapter VIII of the Criminal Procedure Code, but who, under the orders of Government, are always treated as habituals. The diminution under this heading in Sind is progressive :—

1911	1,122
1912	839
1913	892
1914	765
1915	456

With general overcrowding the proper separation of habituals from first conviction prisoners is impossible. More accommodation is urgently needed.

1	2	3	4	5	6	7	8

10. From the information supplied by the Inspector-General of Police, it appears that 1,743 persons were identified as old offenders in the Bombay Presidency, inclusive of Sind, as compared with 1,720 in the year previous. Out of 1,743 prisoners, 121 were identified in Bombay, 110 at Dhárwár, 272 at Dhulia, 272 at Thána, 301 at Ahmedabad, 265 at Yeránda, 108 at Belgaum and the rest in other parts of the Presidency. The smallest number identified was at Sukkur and at Hyderabad, viz., 1 at Sukkur and 2 at Hyderabad, almost the same figures as last year.

11. The number of escapes during the year under report has been 6 against 24 in the year previous, 3 of which were from inside the Jails and 3 from outside; from inside 1 at Kárwár, Rájkot, Karáchi; extramurally 1 from Dhárwár, Ratnágiri and Thána. The Kárwár prisoner was caught before he got over the main wall of the Jail. The total number of re-captures during the year was 24; 20 of these escaped in previous years and 4 escaped in the year under report. The escape at Rájkot was not due to neglect on the part of any Jail subordinate but was a bold rush; the prisoner was almost immediately re-captured. The rest of the escapes were due to breaches of standing orders and gross negligence on the part of the warders or convict officers; in most cases those culpable have been dealt with departmentally. At Thána the warder at fault was prosecuted before a Magistrate under section 54 of the Prisons Act and sentenced to 1 month's rigorous imprisonment; at Kárwár the night watchman on duty, who was either criminally negligent or betrayed his trust, was sentenced to 3 months' simple imprisonment.

12. The statement noted in the margin relates to offences committed by, and the punishments awarded to, convicts confined in the Prisons and Second Class Subsidiary Jails. The offences dealt with by the Criminal Courts show an increase of 15 as compared with those of the year previous, as detailed in the subjoined statement. The convict who murdered a warder and injured another at the Sind Convict Gang on December 26th, 1914, and referred to in the last year's report, was sentenced to death and executed on the 29th May 1915 at the Hyderabad Central Prison. Fifty prisoners selected from the Sind Gang and fifty from the Hyderabad Central Prison were paraded to witness the execution. Fifteen of the Berads who effected escape from the Belgaum Subsidiary Jail on 28th December 1914 were re-captured, tried and sentenced to terms of imprisonment from 1 to 2 years. These 15 Berads as well as the murderer referred to above are not included in the statement. The increase is due to more prisoners being sentenced for offences relating to work and for escape. No prisoner was prosecuted for hurt or grievous hurt against 9 so dealt with in 1914.

Attempt to commit suicide	2
Total	29	44

13. The following table shows that the number of offences has decreased from 20,720 to 19,550, a decrease of 1,170, with an increased average population for the year of 9,879 against 9,731 in 1914. The number of minor punishments has fallen from 15,192 in 1914 to 13,067 in 1915, the decrease being 2,125, while the punishments under the major head have risen from 5,528 in 1914 to 6,483 in the year under report, the increase being 955 :—

Offences dealt with—	1914.		1915.

All other breaches of prison rules ...	6,123	2,304	4,874	2,772
Total ...	15,192	5,528	13,067	6,483

14. The following table shows the nature of punishments awarded during the past two years. It will be seen that the total number of major and minor punishments awarded by Superintendents during the year under report was 20,055 and the total number of offences 19,550. The difference is due to 505 offences having been dealt with during the year under report by the award of combined punishments.

Punishments inflicted—	1914.	1915.
	By Criminal Courts	29
By Superintendents—		
Warnings	4,196	3,881

Combination of minor punishments	100	59
Other punishments	2,869	3,520
Total ...	5,981	6,818
Grand Total ...	21,371	20,099

15. Of the 20,055 punishments awarded by the Superintendents of Prisons and Jails 13,237 or nearly 63 per cent. belong to the minor and 6,818 or 34 per cent. belong to the major class. Under minor punishments the sub-head "Hand-cuffing and link fetters" shows an increase of 117 while the other sub-heads show a decrease. Under major punishments the appreciable increase is against "Fetters and hand-cuffing behind or to a staple" and "Other punishments," the latter mostly consist of forfeiture of remission and reductions of convict officers.

For many reasons there was a difficulty about cell accommodation during 1915. Turbulent, hot tempered and irritable prisoners, generally confined separately, had to be confined in association and this led in many Jails to increase of punishments.

The following Prisons show an increase of punishments:—Bijápur (286), Kárwár (170), Karáchi (204), Hyderabad (1,293) and Aden (125).

The increase at all the Prisons referred to above, except Hyderabad, is attributable to increased average population during the year. The Superintendent of the Hyderabad Central Prison explains the increase in punishments as mainly due to short work, especially in wool spinning and cloth weaving; 746 offences relating to work were recorded in 1914 while the year 1915 accounts for 2,203 offences under the same head, the increase being 1,457. The number of punishments 3,452 with the average population of 1,150 in 1915 against 2,167 punishments with the average population of 1,167 in 1914 shows a marked increase. The Superintendent explains that most of the punishments are for short task in wool spinning for blankets. The task was 6 oz.—which is the proper task for spinning fine Cashmere wool for carpets—and it was raised to 1 lb., the usual task exacted of blanket yarn in other Jails.

Out of 19,550 offences, 2,404 habituais were responsible for 6,674 and 4,552 non-habituais for the balance of 12,876 offences. The percentage of habituais is 17·8 calculated on admission rates. I regret to say, however, that in many Jails the punishment register has not shown the habituais punished and therefore this return is vitiated. A circular is being issued drawing the attention of Superintendents to the necessity of closer supervision over this point.

Altogether 6,956 prisoners were punished and the number who actually passed through the Prisons and Jails was 27,046. Many of these prisoners were only punished once; warnings formed 3,881 or about 14·3 per cent. of the total number of punishments. No less than 2,395 punishments were inflicted on convict officers for neglect of their duties. These punishments are almost invariably a warning, forfeiture of remission, or of grade privileges for a time, or reduction.

16. The subjoined table furnishes details as to the number of stripes inflicted on convicts in the various Prisons during the year under report.

The total number of corporal punishments has increased from 46 in 1914 to 62 in 1915. The increase is due to Yeránda, Karáchi and Aden Prisons.

The total number of 62 floggings is accounted for as follows:—

Twenty-seven were inflicted at Yeránda: 3 for assault, 11 for mutinous conduct, 9 for absolutely refusing to work, 1 for attempted escape and 3 for persistent destruction of clothing. Of these 27 floggings, 23 were awarded to habituais; 1 habitual was flogged thrice and 4 habituais twice.

Karáchi shows 12 floggings: 8 for refusing to grind and breaking their *cháki*s, 4 for unprovoked assault; of the 12 floggings, 10 were inflicted on habituais.

In the Special Prison, Aden, five whippings were given: 3 for assault, 1 for persistent short work and 1 for illicit articles.

At Dhulia 1 prisoner was flogged for refusing to work.

At the Deccan Gang 1 for injuring himself to avoid work.

At Dharwar 3: 1 for refusing to work, 1 for assault and 1 for smearing another prisoner's face with faeces.

At Sabarmati 1 for refusing to work.

At Rajkot 1 for refusing to work.

At Hyderabad 3 for refusing to work and 3 for mutinous conduct.

At Sukkur 3 for assault.

At H. M.'s Common Prison, Bombay, 1 for assault.

At the Sind Gang 1 for assault.

It is an absolute necessity that the Superintendent should have the power to flog, but it is a power that should be reserved for cases of assault, mutinous conduct and indecent conduct of the grosser type. For absolute refusal to do work and contumaciously persisting in short work flogging should only be resorted to after all other punishments are exhausted. Most Superintendents, and especially the abler and more experienced Superintendents, now recognise this.

Total 1914	24,963	18,166	7	9	19	8	17	66	0.2	0.3	--	--	

17. During the year 8,873 prisoners were fettered as compared with 8,619 in 1914. This number mostly consists of prisoners employed extramurally with light fetters on them—in many cases a single fetter and ankle ring. The Deccan Gang shows 3,991 and the Sind Gang 1,219. Hyderabad shows a considerable increase, viz., 763 in 1915 against 128 in 1914. But in 1914 through error prisoners fettered for security were omitted; as a punishment fetters have apparently been resorted to in Hyderabad in lieu of penal diet—this latter punishment being given in only 86 cases in 1915 against 259 in 1914.

REMISSION SYSTEM.

18. It will be seen from the figures appearing in Statement C appended to this report that 3,260 prisoners were released during the year under the remission system as compared with 3,326 in the year previous. The percentage

during the year 1915 of those released under remission system to the total number who might have been released under that system, if of average good conduct up to the date of release, was the same as was in 1914, *i. e.*, 97.3. The practice of mustering prisoners and reading and explaining to them the benefits of the remission rules has been continued. Special award under Rules 514 and 519, remission for committing no offence during the previous 12 months and for doing special work, were granted to 1,558 and 1,368 prisoners respectively against 1,696 and 1,944 in the year previous.

The diminution in the number of prisoners getting remission for committing no offence during the year is due to the fact that some Superintendents misinterpreted the rule and were in the habit of giving remission under this heading to prisoners who were not entitled to it. A circular laying down the correct procedure was issued from the Head Office on the 22nd October 1915.

The practice of promoting prisoners under sentence of one year, in the absence of suitable long-term prisoners, was adopted in some of the Prisons and found to work satisfactorily.

19. The average number employed as prison officers during the year under report in Prisons and Second Class Subsidiary Jails was 1,002 males and 14 females against 1,017 males and 12 females in the year previous. The difficulty of finding suitable prisoners for promotion was experienced in several Prisons.

20. The statement noted in the margin shows the different diet scales in Prisons and Second Class Subsidiary Jails. These scales have been found to work satisfactorily. The last column of the statement shows the extra ration and alterations in the diet scale which were adopted as necessary in some of the Jails.

21. The statistics of under-trial prisoners confined in Prisons, Jails and Lock-ups are embodied in the marginally noted statement. The number admitted during the year under report shows an increase of 3,301 over the figure for the year previous. The daily average strength has also risen from 1,582 in 1914 to 1,761 in the year under report.

22. The following table shows some cases of juveniles who appear to have been detained as under-trials for lengthy periods:—

Name.	Age.	Offence.	Date of admission.	Date of disposal of the case.	Result of trial.	By whom tried.	Length of detention.

23. The number of escapes was 17 against 31 in the year previous. All the above 17 escapes were from Third Class Subsidiary Jails and Lock-ups; 1 each from Ahmedabad, Sátára, Lárkána, West Khándesh, Násik, Hyderabad and Sholápur Districts, 2 each from Karáchi, Belgaum and Poona Districts and 4 from Bombay Lock-ups.

24. The number of deaths shows an increase of 6 on the figure for the year previous. Out of 29 deaths 8 occurred in Prisons and 21 in Third Class Subsidiary Jails and Lock-ups. Of the 21 deaths, 1 each was due to dysentery, consumption, asphyxia, acute mania, diarrhœa, hæmorrhage, high fever, bronchitis, sun-stroke and syphilitic abscess, 2 each to suicide and gunshot wound, 3 to pneumonia and 4 to plague.

25. The number remaining on 31st December 1915 was 377 males and 7 females in prisons, 45 males and 6 females in Second Class Subsidiary Jails and 1,244 males and 70 females in Third Class Subsidiary Jails and Lock-ups, thus making a total of 1,666 males and 83 females.

26. In the beginning of 1915 there were 65 males in the Civil Jails. The number admitted during the year was 1,311 males and 3 females; 1,320 males and 3 females were released and the balance at the close of the year under report was 56 males. The daily average number has been 61 against 48 in 1914. The total cost and cost per head have respectively been Rs. 5,058-9-4 and Rs. 82-14-10 during the year under report as against Rs. 5,539-0-1 and Rs. 115-6-4 in the year 1914.

FINANCIAL.

27. The statements noted in the margin deal with the gross expenditure on account of convicted and under-trial prisoners confined in the Central, District and Extramural Prisons, Subsidiary Jails and Lock-ups. The cost of police guards has been omitted as usual, except in the case of the Central Prisons of Yeránda and Ahmedabad and the Special Prison, Thána, where the guarding is undertaken by the reserved armed warder guard. As the account system of the Yeránda Prison Press has been changed and based on "Unit Cost" system since January 1st, 1913, under orders of Government conveyed in their Resolution, Judicial Department, No. 1545, dated the 27th February 1913, the expenditure on account of that institution has been omitted from these statistics.

The realization from the sale-proceeds of garden produce has been deducted from the total charges. The gross expenditure during the year 1915 has been Rs. 11,25,826 and the cost per head Rs. 96-11-6 against Rs. 10,90,231 and Rs. 96-5-11 in the year previous.

28. The total cost and cost per head under this head have increased from Rs. 3,22,925 and Rs. 28-8-9 in the year 1914 to Rs. 3,32,486 and Rs. 28-9-0 in the year under report. The increase is due to (1) my return from furlough in June 1914 holding charge for the complete year, (2) the usual increment to the pay of the Superintendent, Yeránda Central Prison, at 15 years' service, (3) personal allowance to the Superintendent, Deccan Convict Gang, (4) arrears of pay of the Superintendent, Ahmedabad Central Prison, for 1914 drawn in 1915, (5) increment to Jailors, (6) grain compensation to warders in Sind and (7) entertainment of a second Sub-Assistant Surgeon at the Sind Gang.

29. The total cost under this heading has risen from Rs. 5,19,874 in the year 1914 to Rs. 5,54,046 in the year under report and also the cost per head from Rs. 45-15-3 to Rs. 47-9-7. The increase is due to higher population and unfavourable rates at Bombay, Dhárwár, Kárwár, Rájkot, in Sind Prisons—except at Hyderabad—and at Aden.

30. The value of vegetables and other supplies from the gardens attached to Prisons and Jails shows a decrease of Rs. 2,299 as compared with the figures for the year previous, the amounts being Rs. 31,957 in 1915 against Rs. 34,256 in 1914. The Prisons of Yeránda, Deccan Gang, Thána and Karáchi show a considerable decrease while the Prisons of Dhulia, Bijápur, Kárwár, Hyderabad, Shikárpur and Sind Gang show an increase. The decrease at Yeránda and Thána is attributable to loss of seedlings by heavy and unexpected rain in October while at the Deccan Gang and Karáchi the decrease is only nominal. The difference in value of vegetables supplied by the Prison gardens is due to the cheaper contract rate of 60 lbs. per rupee in 1915 against 35 lbs. in 1914 at the Deccan Gang and 53 lbs. in 1915 against 36 lbs. in 1914 at Karáchi. The coconut plantation at Kárwár is progressing satisfactorily.

31. The total cost and cost per head have fallen from Rs. 48,161 and Rs. 4-4-1 in the year 1914 to Rs. 45,778 and Rs. 3-14-11 in the year under report. The decrease is due to the smaller admission rate of sick prisoners.

32. The total cost and cost per head have decreased from Rs. 61,643 and Rs. 5-7-2 in 1914 to Rs. 46,453 and Rs. 3-15-10 in the year under report. The decrease is due to non-purchase of blankets at the House of Correction in 1915 against 1,000 (Rs. 3,126) in the year previous and also to less supply of carpets and cotton woollen blankets in the Prisons of Dhulia, Ahmedabad, Hyderabad and Shikárpur where the stock of these articles at the beginning of the year was sufficient for the year 1915. The rate of yarn was also cheaper at Hyderabad. His Majesty's Common Prison, Bombay, supplied 300 blankets of the value of Rs. 1,022 to the Sukkur District Prison in November 1915 but the adjustment of the amount was effected in February 1916.

33. The expenditure under this head shows a decrease of Rs. 963 when compared with the figure of the last year, the figure for the year 1915 being Rs. 26,091 as against Rs. 27,057 in the year previous. The decrease is due to incurring only absolutely necessary expenditure. Hyderabad alone shows a decrease of Rs. 1,019 owing to non-purchase of urinals this year.

34. The total cost has been Rs. 50,857 in the year under report against Rs. 42,952 in 1914. The increase of Rs. 7,905 is due to the deportation of 124 prisoners to the Andamans in the year 1915 against 96 in the year previous and also to the

much larger number of prisoners transferred between Jails in the Presidency and to Prisons in other Provinces. In the case of the Prisons of Ahmedabad and Sukkur, adjustments on account of the cost of Railway Credit Notes issued in 1914 were effected in the year 1915.

35. The total cost and cost per head have risen from Rs. 40,765 and Rs. 3-9-8 in the year 1914 to Rs. 48,057 and Rs. 4-2-1 in the year under report. The increase of Rs. 7,292 is mainly due to the biennial expenditure under "Uniforms and equipment to warders" (Rs. 6,220 in 1915 against Rs. 4,096 in 1914). The sub-head "Other Miscellaneous Services and Supplies" shows also an increase of Rs. 5,688 which is due (1) to Rs. 3,152 spent in 1915 under "Petty construction and repairs" against Rs. 1,116 in 1914, (2) to Railway freight and cartage that had to be paid on Government clothing sent with prisoners transferred from Jail to Jail—a number greatly in excess of those so transferred in 1914 and (3) to the expenditure of Rs. 14,907 in 1915 against Third Class Subsidiary Jails under the control of District Magistrates against Rs. 11,436 in 1914.

36. The total cost and cost per head have risen from Rs. 6,021 and Re. 0-8-6 to Rs. 6,331 and Re. 0-8-9. The increase of Rs. 310 is due to transfer of large batches of prisoners from Prison to Prison, with whom warders were sent.

37. The total cost and cost per head have declined from Rs. 14,545 and Re. 1-4-7 in the year 1914 to Rs. 10,963 and Re. 0-15-1 in the year under report. The decrease is mainly due under two sub-heads—"Rents rates and taxes" and "Charges for Registers and Stationery." The decrease under the former sub-head is due to non-receipt of a bill by the Superintendent, Special Prison, Thána, for Municipal taxes, and the amount of Rs. 334-8-0 paid direct by the Assistant Commanding Royal Engineers, Aden Brigade, to the Aden Settlement on account of house and property tax on Jail buildings, not included in the Jail statistics. The decrease under "Charges for Registers and Stationery" is due to less number of history tickets and weight charts printed this year than in the year 1914 and no quinine labels were manufactured at all during the year under report.

38. This head shows a decrease of Rs. 1,524, the figures being Rs. 4,764 and Re. 0-6-6 in 1915 against Rs. 6,288 and Re. 0-8-11 in 1914. The decrease is mainly due to strict economy observed in all the Prisons.

39. The statement noted in the margin deals with the employment of convicts in Prisons and Second Class Subsidiary Jails. It will be seen that the total number of prisoners sentenced to labour has risen from 9,565 in 1914 to 9,755 in the year under report. The sub-head "Employed in preparing articles for prison use, etc.," shows an increase of 327 over the figure of the last year. The Hyderabad Central Prison alone shows 391 prisoners under this head against 172 in the year previous, and the Superintendent explains that this large number of prisoners was employed on wool spinning, while in previous years spun wool was obtained from Cawnpore and Bangalore Woollen Mills. The increase or decrease under other heads is too small to need comment.

40. The marginally noted statement deals with the net cash earnings of convicts sentenced to labour. The cash earnings have risen from Rs. 1,17,825 in the year 1914 to Rs. 1,73,142 in the year under report. The Prisons of Dhulia, Dhárwár, Thána, Rájkot, Hyderabad and Sukkur show a decline while the rest of the Prisons show an increase. The increase in profits are specially marked in the Sind Gang (Rs. 15,033), the Deccan Gang (Rs. 11,591) and Sabarmati Central Prison (Rs. 28,021).

The Deccan Gang and Sind Gang are commented on subsequently.

In Sabarmati Central Prison the loss of Rs. 2,245 in 1914 is converted into a profit of Rs. 25,776 in 1915. This is due to the following reasons:—

- (a) Less debts due to Prison at end of 1915.
- (b) Fewer manufactured articles unsold at end of 1915.
- (c) Less raw material purchased—Rs. 47,190 against Rs. 64,206 in 1914.
- (d) Total sales in 1914—Rs. 66,054 and in 1915 Rs. 70,582.
- (e) Owing to the approaching cessation of the manufacture of police cloth due to the adoption of kháki uniforms by the police force the factory turned out more cot tape, sheets, tape, towels, etc., which sell at a higher profit than the cloth, woven, dyed and manufactured into suits for the police.
- (f) In 1914 Rs. 54,652 worth of raw material manufactured gave Rs. 12,038 in convict labour. In 1915 raw material of the value of Rs. 45,348 when manufactured produced Rs. 20,297 in convict labour.

Owing to the adoption of kháki uniforms by the Police Department the industry of weaving cloth for police clothing at Sabarmati has ceased. I think it can be said that for wearing qualities this Sabarmati cloth could not be surpassed and it is a pity so successful a weaving industry should cease. The Prison owing to lack of tools and plant could not undertake the making of all the kháki suits for the police and a portion of the amount was assigned by the Inspector-General of Police to the Prison. As is always the case in a Prison a change in industry means trouble, but I have little doubt that Khán Sáheb N. R. Wachha will be capable of satisfying police requirements in the near future.

This Department undertook the contract for police clothing in 1910 and have to date, I believe, given satisfaction. We undertook the contract when yarn was at Re. 0-5-3 per lb. and have never varied our price in spite of the enhanced rate of cotton in certain years.

The Common Prison profits increased by Rs. 2,593; this is largely due to a great demand for picked oakum by Government Departments.

The House of Correction shows an increase of Rs. 2,499 due to a larger sale of cocconut matting.

Yeránda Central Prison Rs. 1,636—increased sale of cane articles during 1915.

Kárwár Prison Rs. 2,439. In 1914 there was a loss of Rs. 358 while the year 1915 shows a profit of Rs. 2,080. The latter is due to (1) greater outturn of coir and cane articles and cocconut oil, (2) larger sale of manufactured articles in 1915 than in 1914 and (3) less manufactured articles and raw material on hand at the close of the year under report than at the end of the year previous.

Karáchi Prison Rs. 2,040. This is principally due to a larger manufacture and sale of cotton carpets to the Police Department in 1915 than in 1914, the cost of the carpets sold to that Department being Rs. 2,671 against Rs. 540 in the year previous.

Aden Special Prison Rs. 827—greater demand of printing work by Government and a larger population, some of whom were employed on extramural work.

The explanation for the fall in profits is commented on in detail under each Jail.

Dhulia Prison. Decrease Rs. 2,335, due to less orders from Government officers, to excess of raw material and manufactured articles on hand, and also to excess outstanding debts due to the Prison at the end of the year.

Dhárwár Prison. Decrease of Rs. 1,632, chiefly due to several boys having been released during the year who were skilled workers and the employment of many prisoners on Jail construction.

Thána Special Prison. Decrease Rs. 4,657, due to the partial evacuation of the Prison on account of administrative reasons and the complete upset of all industries.

Bájkot Prison. Decrease of Rs. 290, owing to larger quantity of manufactured articles and raw material on hand at the close of the year.

Hyderabad Central Prison. Decrease of Rs. 1,661. This was due to no earnings under extramural labour in 1915 against Rs. 2,314 in 1914 and also to less sale of quinine owing to decrease in malaria due to low inundation.

Sukkur Prison. Decrease of Rs. 1,062, due to sums having been drawn from Treasury on account of the purchase of grey spun wool, red yarn and wool at advantageous rates.

Taking into consideration that the past year has not been a good year for sales and that the price of wool and vegetable dyes has gone up enormously and that the price of almost all raw materials has increased, the general result of the factory work during the year must be considered as satisfactory.

41. Of the sum of Rs. 1,73,142 mentioned at the commencement of last paragraph, the sum of Rs. 76,620 represents the profits of Prison Factories, Rs. 361 of Second Class Subsidiary Jails and Rs. 96,161 of extramural labour. The average cash earnings per head of those sentenced to labour and of those employed on manufactures in the case of Prisons and Second Class Subsidiary Jails have been Rs. 17-12-0 and Rs. 47-11-0 as against Rs. 12-5-0 and Rs. 32-9-0 in the year previous.

42. During the year under report Jail-made articles of the value of Rs. 67,544 were sold to Government Departments as detailed below against Rs. 72,243 in the year previous:—

	Rs.
Public Works Department	712
Police Department	48,379
Telegraph Department	1,611
Other Civil Departments	11,718
Marine Department	4,799
Military Department	325

43. This Gang was located at Visápur in the Ahmednagar District throughout the year. With an average of 1,627 prisoners the Gang has earned Rs. 45,364 as against Rs. 33,772 in 1914. The average number of prisoners in the latter year was 1,494. The increase is due to more prisoners and increased outturn of work. Mr. C. N. Hall, as usual, has done most excellent work and under his care the Gang is a model extramural institution. The Medical Officer—Assistant Surgeon Muzumdar—and his staff are to be congratulated on the excellent health of the Gang during the year.

44. This Gang was at Gunja Takar near Hyderabad (Sind) during the whole year. It earned Rs. 48,359 with an average population of 800 prisoners against Rs. 33,275, with 776 prisoners in the year 1914. The increase of Rs. 15,084 was due to profitable work for the N.-W. Railway and to the exaction of a full task from the prisoners. The earnings would have been even greater had not the construction of the double line beyond Shahadadpur been abruptly stopped on account of financial stringency. Assistant Surgeon Petigara continues to discharge his duties as Superintendent and Medical Officer with undiminished zeal and efficiency.

45. The cash profit of the quinine industry in the Central Prisons of Yeránda and Hyderabad amounts to Rs. 6,651 during the year under report against Rs. 3,589 in the year previous. The Yeránda Central Prison shows a profit of Rs. 6,258 and the Hyderabad Central Prison shows Rs. 393. The value of quinine purchased,

packing materials, service stamps and establishment charges amounted to Rs. 15,192 during the year under report against Rs. 18,339 in 1914, and the amount paid into the Treasury was Rs. 22,946 in 1915 against Rs. 22,419 in the year previous.

Quinine treatments of the value of Rs. 25,000 were this year also received and all were distributed. The cost of packing and postage charges amounted to Rs. 269. As the purchase price of each parcel of ten tubes (each tube contains 20 tablets) was Rs. 3-0-0 and the selling rate Re. 1-7-0 the transaction resulted in a loss of Rs. 13,288 against a similar loss of Rs. 15,566 last year.

46. The subjoined statement compares the outturn of the Yerávida Prison Press in the years of 1914 and 1915. The number of prisoners employed in 1915 was 273 in the year under report against 287 in the year previous and the cost of their maintenance was Rs. 24,660 at the average cost of Rs. 90-5-3 per prisoner.

All further progress in the construction of a free press and the consequent alteration in the method of adjusting for prison labour is postponed for the present owing to the financial stringency.

Comparative Abstract of Outturn during 1914 and 1915.

Main Sections.	Units.	Outturn.	
		1914.	1915.
1. Composing	Pages (Foolscap Folio, Solid Pica).	7,765	18,833
2. Stereo Foundry	lb. (Finished Plates)	4,349	3,970
3. Machines	Impressions (Foolscap)	5,93,17,137	5,67,85,000
4. Hand Presses	Do. do.	9,51,249	8,17,000
5. Hand Sewing	Sections, Foolscap Folio	-1,10,145	1,10,291
6. Machine Sewing	Do. do.		
7. Casing in	Books, Half Bound Foolscap Folio, 100 leaves.	1,02,590	1,02,561
8. Ruling	Impressions	1,34,15,748	2,06,65,000
9. Paging	Do.	1,42,26,996	89,34,000
10. Perforating	Cuts	8,84,048	16,12,000
11. Folding	Foolscap Folio, single folds.	1,38,52,611	1,54,78,000
12. Collating	Do. do.	97,14,000
13. Wire-stitching	Stitches	24,78,911	20,30,000
14. Insetting	Insets	16,00,193	36,60,000
15. Eyeletting	Eyelets	4,89,056	8,98,000
16. Envelope-making... ..	Foolscap Thin Envelopes	1,36,58,827	1,05,98,000
17. Miscellaneous Productive	Hours	400

47. The statement noted in the margin shows the total cost of maintenance for all Prisons, Subsidiary Jails and Lock-ups. The total expenditure excluding charges for inspection and general superintendence has amounted to Rs. 10,82,788 during 1915 against Rs. 10,47,774 in 1914. The total cash earnings have been Rs. 1,73,141-9-0 in 1915 against Rs. 1,17,825-3-0 in the year previous, thus making a net cost to Government of Rs. 9,09,646-7-0 during the year under report against Rs. 9,29,948-13-0 in the year 1914. The average net cost to Government per prisoner has been Rs. 78-2-0 against Rs. 82-3-0 in the year previous.

VITAL.

48. The statement noted in the margin deals with the sickness and mortality of all classes during the year under report. The following table compares the figures for 1914-1915 of prisoners confined in the Central,

Statement No. XIII.—Net Cost.
Statement No. XIV.—Sickness and Mortality.

District, Special and Extramural Prisons, Subsidiary Jails, Civil Jails and Lock-ups :—

Year.	Daily average strength.	Admission into Hospital.	Daily average sick.	Total number of deaths.	Ratio of deaths per mille.
1914	11,861	7,851	272.8	207	18.2
1915	11,701	6,374	212.9	164	14.0

49. The death-rate for the year is 14.0 against 18.2 last year. This is the lowest death-rate recorded for the Bombay Presidency. The daily average sick has also fallen considerably from 272.8 in 1914 to 212.9 in the year under report.

The decrease is mainly due to less admissions under dysentery, pyrexia of uncertain origin, mumps and diarrhoea. Last year there were 159 cases of mumps in the Deccan Gang against *nil* this year, at Hyderabad 184 against 82 and at Yeránda 76 against 27. In 1914 the Deccan Gang and Bijápur Prison showed admissions of 146 and 80 against pyrexia of uncertain origin while this year the figures are 3 and 14 respectively. The large fall against dysentery is due to the following Prisons :—

H. M.'s Common Prison	18 against 44 in 1914.
Yeránda Central Prison	28 against 92 do.
Kárwár District Prison	0 against 23 do.
Hyderabad Central Prison	1 against 24 do.

Of the 141 prisoners who died in Central and District Prisons and Extramural Gangs, 43 were admitted in bad health, of whom 30 were suffering from the disease from which they ultimately died, 27 were in fair health and 71 in good health.

50. There was one case of plague in the Sukkur District Prison: the patient, who had been inoculated a fortnight before, speedily recovered. He was a convict officer and had been over fourteen months in the Jail.

As a precautionary measure, on account of plague in the vicinity or the surrounding districts, inoculation of prisoners was carried out at the House of Correction, the Common Prison, the Deccan Gang, Bijápur, Dhárwár, Thána and Hyderabad.

In Ratnágiri 7 prisoners who had been exposed to infection were inoculated.

In Belgaum the Jailor's wife and family and a member of Head Warder's family contracted plague. The Superintendent wished to evacuate the Prison, but all the prisoners were inoculated and no case occurred in the Prison. In no instance has any bad result followed inoculation and it is far the simplest and most effective method for preventing plague and takes away all terrors from this disease.

51. The following Prisons were overcrowded throughout the year :— H. M.'s Common Prison, Central Prison Yeránda, Central Prison Sabarmati, Central Prison Hyderabad, Sukkur District Prison and Aden Special Prison. District Prison Karáchi from March to December; District Prison Dhárwár 180 days; District Prison Dhulia female jail all the year, male prison August 6th to October 23rd.

For administrative reasons the Special Prison, Thána, was kept some 200 below its normal population. Prisoners were freely drafted from the overcrowded Prisons to the Extramural Gangs and to Jails with more accommodation. Tents, *mantops*, verandahs and unused workshops were utilized for the accommodation of the surplus population as far as possible.

52. I comment in detail on the following Prisons in which the death-rate exceeded 15 *per mille* :—

Kárnóár District Prison.—Death-rate 20·7. Three deaths in a small population. One from cholera, the source of disease could not be traced, one from hypertrophy of the prostate in an old man of 63, one from pneumonia.

Ratnágiri Prison.—Death-rate 25·3. Two deaths in a small population. One from colitis, one from pneumonia—both admitted in bad health.

Aden Special Prison.—29·1. Three deaths in a small population. One from fatty tumour of heart, one from pneumonia and one from diarrhoea.

Shikárpur Special Prison.—Death-rate 40·9. Seven deaths in a population of 170·7. Five from pneumonia, of which four occurred in January and February, one from heat stroke in the hot weather and one from asthma.

Rájkot District Prison.—Death-rate 33·3. Two deaths in a population of 60. One from inflammation middle ear and one from pneumonia, a man of 65 admitted suffering from the disease.

Sukkur District Prison.—Death-rate 26·5. Pneumonia 3, dysentery 2, diarrhoea 1, scurvy 1, heart disease 1, gastric ulcer 1, jaundice 1 (admitted with disease), tubercle of lung 1 (admitted with disease), compound fracture of leg 1. This last case was that of a man suffering from acute mania and brought to the Prison for detention. He had a fracture of the left leg and the wound was septic. His case was hopeless from the first.

Sind Gang.—Death-rate 18·7. Fifteen deaths, of which 9 were from pneumonia, 1 from dysentery, 3 from malaria, 1 from multiple fracture of the ribs—due to an accident in the quarry—and 1 from acute sloughing pancreatitis. The diminution in the death-rate of this Gang is largely due to the care of the Superintendent and Medical Officer Assistant Surgeon Petigara.

Hyderabad Central Prison.—Death-rate 20·0. Twenty-five deaths: of these, 14 died from pneumonia, 3 from malaria contracted outside the prison, 3 from heart disease, all admitted in bad health, 2 from intestinal obstruction, 1 from chronic bronchitis, an old man 75 years of age, 1 from scurvy and 1 from cerebral hæmorrhage.

Sabarmati Central Prison.—Death-rate 15·9. 18 deaths. Of these, 4 died from disease of the heart or blood-vessels, of whom 3 came into Prison with the disease, 2 from dysentery, 4 from pneumonia, of whom 1 was in bad health and 3 in fair health on admission, 1 from broncho pneumonia, 2 from diarrhoea, 1 admitted in a fair state of health, the other in bad health, 1 from cirrhosis of the liver, 1 from cerebral hæmorrhage, 1 from heat stroke, 1 from acute nephritis, an opium eater, and 1 from chronic bronchitis admitted into the Jail in bad health. Over 50 per cent. of the casualties were over 45 years of age.

53. The health of the House of Correction 6·1, Common Prison 13·2, Yeránda 8·6, Dhulia 6·5, Deccan Gang 11·6, Bijápur 2·9, Dhárwár 5·5, Thána 7·5 and Karáchi 8·8 has been satisfactory.

Considering the overcrowding of most of the Prisons the diminished death-rate and fall in admissions into hospital is the best testimony to the care and devotion to duty shown as a rule by Superintendents, Medical Officers and the Subordinate Medical Staff.

54. The following methods were adopted during the year under report with a view to improve the health of the prisoners confined in our Prisons and Jails and are inserted here in accordance with the orders contained in paragraph 1 of Government Resolution, Judicial Department, No. 9115, dated 29th December 1896 :—

(1) Issue of wheat and rice in lieu of *bájrí* and *jowári*.

(2) Issue of 2 ounces extra flour and one ounce of molasses to working prisoners in the Deccan Gang.

(3) Issue of wheat in lieu of *bājri* and *jowāri* at the Sind Gang and antiscorbutic *chatni* in the hot weather.

(4) Issue of extra rations to weakly prisoners and convalescents.

(5) Issue of quinine as a prophylactic.

(6) Issue of potatoes and onions in lieu of green vegetables.

(7) Issue of extra warm clothing when considered necessary.

(8) Inoculation by Professor Haffkine's prophylactic serum.

55. Reviewing the health statistics of Subsidiary Jails and Lock-ups, it will be observed that the population has risen from 65,840 in 1914 to 68,694 in the year under report.

The daily average strength, number of admissions into hospital, and daily average sick have been respectively 1,486, 1,049 and 17.0 against 1,486, 1,410 and 15.4 in the year previous. The number of deaths was 23 against 39 in 1914 and the death-rate *per mille* of average strength has been 15.5 as against 26.2 in the year previous.

Statement No. XV. 56. The marginally noted statement shows the diseases chiefly responsible for sick admissions and deaths.

There was one admission and one death from cholera. The case occurred at Kárwár; most careful investigation did not reveal the origin, nor could any connection with another case be traced.

Dysentery. A decrease of 132 admissions and 7 deaths. The decrease is chiefly marked in Yeránda 64 admissions less, Common Prison 26 less, and Kárwár 23 less, the latter Prison having indeed a clean sheet as to this disease.

Malaria shows 1,616 admissions and 7 deaths against 1,503 admissions and 10 deaths.

Pyrexia of uncertain origin has fallen from 284 admissions in 1914 to 27 in 1915. The decrease is due to Yeránda 28 admissions in 1914 none in 1915, Bijápur 80 in 1914 and 14 in 1915, the Deccan Gang 146 in 1914 and 3 in 1915.

Quinine was given as a prophylactic at the Deccan Gang, Bijápur, Dhárwár, Kárwár, Thána, Rájkot, Karáchi, Hyderabad, Sukkur, Shikárpur, Sind Gang and Sabarmati with, I consider, good results.

Tubercle shows 32 admissions and 8 deaths against 37 admissions and 13 deaths in 1914. Of these admissions, 10 probably contracted the disease outside the Prison. The tubercle ward at the Central Prison, Yeránda, will be completed this month.

Anæmia and debility account for 38 admissions and 2 deaths against 78 admissions and 5 deaths. Only 7 cases of debility were admitted. Of the deaths, one was at the Common Prison from anæmia secondary to scurvy and dysentery, the prisoner was in hospital from the date of his admission to the Prison; and one at Yeránda from debility the result of senile decay.

Other general diseases show 704 cases and 9 deaths against 1,405 admissions and 12 deaths. The deaths were due 3 to leprosy, all admitted with the disease, and 1 each to tuberculosis of intestine, enteric fever, pyrexia of uncertain origin and secondary syphilis and 2 to scurvy.

Pneumonia. One hundred and sixty-one admissions and 48 deaths against 169 admissions and 48 deaths in 1914. The principal centres of this disease were Deccan Gang 42 cases and 9 deaths, Hyderabad 31 cases and 13 deaths, Sind Gang 26 cases and 9 deaths, Sabarmati 19 cases and 4 deaths, Shikárpur 15 cases and 5 deaths. The Common Prison shows 3 admissions and 1 death, Kárwár 4 cases and 1 death, Ratnágiri 1 case and 1 death, Thána 1 case and 1 death, Sukkur 6 cases and 3 deaths, Aden 1 case and 1 death.

Other respiratory diseases show 345 admissions and 4 deaths against 383 admissions and 12 deaths. Karáchi shows a fall of 36 admissions and no deaths, Dhárwár 26 admissions less and no death, Sabarmati has 53 admissions and 2 deaths against 37 admissions and 2 deaths in 1914.

Diarrhoea. Two hundred and sixty-three admissions and 7 deaths against 477 admissions and 8 deaths. The fall in admissions is marked at Yeránda 29 against 148 in 1914 and in Sabarmati 96 against 161.

Abscesses, ulcers and boils show 502 admissions and deaths *nil* against 570 and 1 death in 1914.

57. Out of the total of 19,907 prisoners who were discharged during the year, 10,782 or in other words 54.2 per cent. gained weight against 55.7 in the year previous, 4,564 or 22.9 per cent. lost weight against 4,799 or 23.5 in 1914 and 4,561 or 22.9 remained stationary as compared with 20.8 in 1914.

OFFICIAL AND NON-OFFICIAL VISITORS.

58. There were two hundred and forty-one Official Visitors during the year for Prisons and Second Class Subsidiary Jails. Fifty-eight quarterly meetings were held during the year and all were well attended. Five hundred and twenty-two visits were paid by Official Visitors, while ninety-nine were paid by Non-official Visitors.

BUILDINGS.

59. The following allotments were sanctioned during the year for original major works :—

	Rs.
(1) Belgaum (Hindalgi)	50,000
This amount is being spent on foundation work of the Jail proper.	
(2) Tubercle ward at the Yeránda Central Prison	8,900
Out of the total estimate for Rs. 10,592— <i>vide</i> Government Resolution, Public Works Department, No. C. W.-6327, dated 1st June 1915.	
(3) Servants' quarters at the Jailer and Deputy Jailer's bungalows at the Yeránda Central Prison	4,834
The original estimate was for Rs. 5,390 which was reduced to Rs. 4,834 by Government and that sum was re-appropriated from other work— <i>vide</i> Government Resolution, Public Works Department, No. C. W.-11470, dated 18th October) 1915.	

The Jail at Andheri is an urgent necessity. But no funds could be allotted for this purpose on account of financial stringency during this year.

In addition to the above, a sum of Rs. 8,000 was allotted for the discretionary grant, all of which was utilized during the year under report as detailed below :—

Ahmedabad Central Prison.—Rs. 293 for the following two works :—

(a) Providing water storage tank for dye-shed Rs. 244.

(b) Providing a ladder to the elevated tank of the Central Jail water supply well at Sabarmati Rs. 49.

Yeránda Central Prison.—Rs. 1,789 for completing the work of providing malthoid covering to the terraced roofs of the quarters for Armed Warder Guards.

Sukkur District Prison.—Rs. 3,526 for making certain additions and alterations and raising the east main wall of the Jail by 8'.

Aden Special Prison.—Rs. 334 for the following two works:—

(a) Providing bathing platform in the female prisoners' yard, Rs. 39.

(b) Constructing a latrine of 8 seats for the use of prisoners, Rs. 295.

Shikárpur Special Prison.—Rs. 153 for shifting *pukka* masonry staircase.

Hyderabad Central Prison.—Rs. 1,523 for making certain additions and alterations in the condemned cells.

Dhulia District Prison.—Rs. 82 for providing double lock aldop bolts to the doors of the work-sheds.

Several most urgent works could not be financed on account of want of funds.

MISCELLANEOUS REMARKS.

60. During the year 1915 the following Prisons, Gangs and Subsidiary Jails were inspected by me:—

Central Prisons.	District Prisons.	Subsidiary Jails.	Gangs.
Yeránda. Hyderabad.	Dhulia. His Majesty's House of Correction. His Majesty's Common Prison. Thána. Bijápur. Dhárwár. Ratnágiri. Kárwár. Karáchi. Shikárpur. Sukkur.	Sholápur. Alibág. Belgaum.	Deccan Gang. Sind Gang.

In addition numerous visits were paid to the Central Prison, Yeránda, His Majesty's Common Prison, His Majesty's House of Correction and the Special Prison, Thána, and flying visits to the Deccan Gang. My touring during October was hampered by having to visit the Special Prison, Thána, on several occasions.

61. The class of juveniles consisted of 99 at the close of the year—an increase of 23 on the preceding year. During the year a retired Havildár of the 110th Bombay Light Infantry was appointed as Chief Head Warder for the juveniles. Under his instruction the prisoners have rapidly improved in drill and physical exercises which they now carry out quite well. Parallel and horizontal bars have been put up and Indian club exercises introduced. The physique of these adolescents improves in an extraordinary degree in the Prison; the same result, due to the same cause, is seen in the Borstal Jail in England. During the coming year an important increase in the Prison staff will be introduced, as Government has provided for a Superintendent, Gujaráti teacher, Máli, a Blacksmith and a Mason Instructor. The general conduct of the class has been good. As in the previous year most of the boys were employed on building the new Prison wall, 20 boys were in the carpentry class, but much less carpentry was done during the year as 9 juveniles, including some of the best workmen, were released during the year on the recommendation of the Committee.

The Superintendent reports that the progress on the new wall is not as speedy as might be expected, but this is entirely due to the great difficulty in quarrying the stone and bringing it in; the stone is also a difficult stone to deal with, requiring a very expert hand to trim it without causing the stone to split up. Nine juveniles were released on the recommendation of the Committee as per Government Resolution, Judicial Department, No. 5507,

dated 2nd August 1915; one was released on account of sickness (*vide* Government Resolution, Judicial Department, No. 4432, dated 24th June 1915), and one on the recommendation of Mr. Starte, I. C. S., Settlement Officer, Criminal Tribes (*vide* Government Resolution, Judicial Department, No. 3620, dated 19th May 1915).

Six of the above juveniles were given tools on release.

There were 26 ordinary releases; of these, two were given carpentry tools and are working satisfactorily—one in Bombay and one in a mill at Sholapur.

Three were sent to the Salvation Army Loom Factory, being provided with maintenance for the first fortnight and two—carpenters—were provided with tools. Of these three boys, one remains who is working satisfactorily and his wages have been raised to 14 annas per day. One juvenile was transferred to the main Jail as a mason and one to Bijapur Jail as a carpenter; both these had been recommended by the Committee for reversion to an ordinary Prison on account of age. Two juveniles were transferred to Yeravda—one for misconduct and one because his sentence was simple imprisonment.

Sixteen juveniles were released and sent to their native villages.

Adult prisoners are still working at Dhárwár for the quarrying and preparing of stone for the new wall.

One adolescent who had been in the Dhárwár Juvenile Class was admitted on re-conviction to the Rájkot Prison. This is the first case of any youth who had been through the Dhárwár Class being re-convicted. He was originally sent to Dhárwár with a sentence of one year, his conduct there was very bad and he was removed from the class as incorrigible. His re-conviction therefore is not a matter for surprise.

62. During the past year the Bombay Prisoners' Aid Society was quiescent but it has now appointed visitors for the Bombay Prisons and I trust it will soon be doing beneficent work.

The Prisoners' Aid Society of Bijapur with a branch at Sholapur, initiated by Mr. Kabraji, the Collector of Bijapur, has been at work throughout the year.

The Salvation Army Boys' Home and Home for released prisoners will be ready during 1916. The procedure for dealing with prisoners on their release and the best methods for enabling the various Aid Societies to satisfactorily cope with their difficult task are under the consideration of Government.

63. The Department throughout the year has been short-handed but almost all officers have worked with a will and done their best under difficult circumstances. From the 1st January 1915 a personal allowance was granted to Mr. C. N. Hall—an officer with 36 years' service—who holds the important and onerous post of Superintendent of the Deccan Gang. No man has ever deserved such an allowance more.

64. During the present time there is little use in dilating on the needs of the Prison Department: they are many and of very old standing. A satisfactory class of man does not as a rule come forward as a warder. The sanctioned strength of the warder establishment is 859. At the close of the year 849 warders were on the muster rolls. During the year 114 resigned and 90 were dismissed or discharged. That is about 24 per cent. of the establishment disappears during the year. The difficulties that arise are obvious. That much is not expected of warders is shown by the sentences inflicted by Magistrates for serious offences committed by warders. A warder caught red-handed introducing tobacco, *bidies* and matches into the habitual circle of a Jail, is convicted and fined Rs. 5 or in default 5 days' simple imprisonment. He probably made more than his fine in a month by his nefarious methods, but the Magistrate probably argued that it was natural for a warder to do this; at least, I can see no other explanation for so inadequate a punishment.

65. The result of the year may be briefly summarised as follows:—The gross cost per head is Rs. 96-11-6 against Rs. 96-5-11 in 1914; the net cost

per head Rs. 78-2-0 against Rs. 62-3-0 in 1914; the cash earnings Rs. 1,73,142 against Rs. 1,17,825. The death-rate 14·0 against 18·2 in 1914.

66. During the year my Office Establishment was depleted to fill vacancies in other Prisons, so much so that at the end of the year I had not a clerk to spare for inspection duty; the men left worked satisfactorily. The acting Head Accountant Mr. S. S. Barve and the 5th Clerk Mr. S. M. Gokhale have worked zealously and ably to enable this report to be submitted in time.

I have the honour to be,

Sir,

Your most obedient servant,

J. JACKSON, M.B., Lt.-Col., I. M. S.,
Inspector-General of Prisons, Bombay Presidency.

APPENDIX B.

General Summary showing the Distribution of the Prisoners of all Classes

Yerdada Central Prison.—The quantity of condiments was reduced to half in the case of European prisoners from the year 1909 on medical grounds. The quantity of condiments was reduced to 3 drs. on medical grounds for all other prisoners. Convict Overseers were given meat on Wednesdays along with convict Warders.

Ratnágiri Prison.—The issue of Rice 1 lb. on Monday, Thursday and Saturday in lieu of báji was continued throughout the year.

Common Prison.—Dál, Toor, was issued 4 times a week while Dál, gram, was issued thrice a week.

Deccan Gang.—One oz. of molasses were issued to every prisoner with the morning canjee excepting those sick prisoners who were on (d) diet.

Karachi Prison.—Potatoes and onion were issued thrice a week in lieu of vegetables; also chutney was issued to prisoners.

Sind Gang.—
Sunday } Wheat 12 ozs. Báji 14 ozs.
Monday }
Thursday }

Tuesday " 12 ozs. Jowari 14 ozs.

Wednesday " 2 ozs. Báji 1 lb. 12 ozs.

Friday " 2 ozs. Jowari 1 lb. 12 ozs.

Saturday " 12 ozs. Jowari 4 ozs. and Rice 12 ozs.

Molasses one oz. on Monday and Thursday and 8 ozs. on Saturday.

From 1st April 1915 to 17th August 1915 chutney consisting of 1 oz. onions, 6 drs. molasses and 6 drs. tamarind was issued on every alternate day. The molasses for this chutney was utilised from the quantity sanctioned for Monday and Thursday and one ounce was deducted from 8 ozs. sanctioned for Saturday.

(a) This scale was in force in all the Subsidiary Jails except Wadhwan in which prisoners up to 2 years' sentence are confined and who are allowed the scales appearing in this statement for Native prisoners in District Prisons.

1 lb.
báji
or jo-
wári
flour,
6 drs.
salt
and
