APPENDIX H.

*Memorandum giving the history of the Revision of the Varkas Settlement
originally made by Captain Francis.*

1. In Government Resolution No. 4965, dated 3rd September 1873, para. 6, Colonel Francis was desired to report on the feasibility of organizing a party to proceed with the measurement and allotment of varkas lands in the villages which formerly comprised the Nasrápur Táluka.

2. In his report No. 1897, dated 9th October 1873, to Government, Colonel Francis describes the arrangements he proposes to adopt for making a field survey of the varkas lands of the Nasrápur Táluka.

In paragraph 3 Colonel Francis points out that the settlement then existing of a combined rate for rice and varkas lands having been guaranteed for a fixed period, Government will be precluded from levying the separate assessment on varkas lands to be fixed according to the new measurement and classification, but further states that the survey operations will be useful in defining the area and boundaries of each individual holding, and will enable the revenue officers to dispose of the disputes in regard to individual rights of property in these lands.

In paragraph 5 Colonel Francis points out the advisability of having the forests permanently demarcated when the survey establishments are defining the limits of other hill lands.

3. Instructions were then issued by Colonel Francis to Mr. Gibson, the Deputy Superintendent in charge of this survey, by letter No. 2193, dated 25th November 1873, relative to the manner in which the survey of the varkas lands of the Nasrápur Táluka should be carried out.

4. After completing the work as ordered, Mr. Gibson made a report on the new settlement of varkas lands, No. 651, dated 1st September 1876. Extracts from this report, paragraphs 4 and 6 to 8, inclusive, are given below, as showing what had been done :—

“4. The individual holdings were most carefully surveyed and classified according to the scale of classification adopted in the Ratnágiri Collectorate, viz., 6 and 5 annas for first and second class bhatlé land, and 4, 3, and 2 annas for first, second, and third class varkas land respectively.”

“6. With regard to the assessment of the varkas land lately surveyed, the following arrangements have been made, pending the sanction of Government for their adoption :—

“The land held by those cultivators who have hitherto paid a plough tax of Rs. 1-8-0 whenever they cultivated varkas land, has been assessed according to the classification valuation (6 annas being taken as the maximum rate), and the area and assessment of each holding have been recorded in the registers.

“This assessment should be levied *annually* in future in lieu of the ‘plough tax’. I may here mention that no objection was made, by any of the cultivators to the proposed alteration in the settlement.

“The land held by those cultivators who have hitherto paid the assessment on their rice and varkas land in a lump sum has also been surveyed, and each plot of ground entered in the register in the name of occupant; but no alteration has been made in the present method of levying his assessment, and I do not think that it would be at all advisable to make any, because a change would only cause confusion in the village accounts, without benefiting the cultivators.

“7. All newly made rice land found in the varkas numbers has also been measured and assessed at the lowest rate of assessment on rice land

of the village in which such land was found. This arrangement, however, is not a new one, but has been in force ever since the settlement was made.

" 8. By the arrangements now made for the management of the varkas lands, the difficulty experienced by the district officials in ascertaining which portions of the cultivated land were liable to pay the 'plough tax,' has been entirely removed, while the only change made in the existing settlement is the substitution of a light annual rate for the 'plough tax' on the land held by those persons who were bound to pay the latter form of assessment whenever they cultivated the smallest patch of ground."

5. Colonel Francis forwarded the above report to Government, with remarks, under No. 1470, dated 22nd September 1876, from which the following extracts are made :—

" In the foregoing letter the Deputy Superintendent reports the completion of the detailed survey of the varkas lands of the Karjat Táluka carried out under the orders in Resolution No. 5870 of the 24th of October 1873.

" 2. It will be perceived, from the explanation given in the report, that all individual holdings of varkas land have now been measured and recorded in the usual way, but without the assessment being shown against them, in the case of the lands included under the combined rice and varkas rate fixed at the original settlement. There would, as stated by Mr. Gibson, be no advantage in separating their rice and varkas assessment, as the amount of it cannot be altered during the lease. But a separate rate has been fixed for the other varkas land which was assessed at the plough-tax rate, or partly at a plough-tax one and partly with the rice. Small holdings under a payment of Rs. 3-12-0 being subject to the latter double form of payment."

" 5. As explained in the 7th paragraph, all new rice land found in the tracts of undivided varkas has been regularly measured off into survey numbers, and assessed at the lowest rate for rice land obtaining in the village. Heretofore cultivation of the kind has been annually measured and assessed at the same rate, as provided for in the conditions of the settlement; but as it seemed advisable to bring all such rice land into the survey papers, the necessary steps for measuring and recording it were accordingly taken during the progress of the varkas survey."

6. The settlement thus proposed was sanctioned by Government Resolution No. 2820, dated 2nd May 1877, and accordingly carried out.

C. W. GODFREY, Lieut.-Colonel,
Superintendent, Revenue Survey, Ratnágiri.

Do. 1885-86	28	36	28	

The principal food-grains grown in the district are rice, nágli, and vari. The average annual prices, at which these grains are sold, are estimated, as usual in the Konkan districts, at the rate per khandi, and are so shown. The local ser is a measure of capacity, which contains in weight 52½ tolás, or 1 pound 5 ounces of rice in husk, 60 tolás or 1 pound 8 ounces of vari, and 65 tolás or 1 pound 10 ounces of nágli. The information recorded in this appendix gives the prices of the grains named in the Karjat Táluka, and is obtained from the Mahálkari of the peta, and

has been checked with similar information supplied by the Karjat Mámíatdár, and may, therefore, be accepted with some confidence as approximately correct. From this information I deduce the following abstract of average prices, in sers of 80 tolás per rupee, for the three decades since the original settlement, and the actuals for the last two years :—

					SERS PER RUPEE OF		
					Rice.	Nágli.	Vari.
1. Average for first decade, from 1854-55 to 1863-64	...				32	32	36
2. " second " 1864-65 to 1873-74	...				23	23½	26½
3. " third " 1874-75 to 1883-84	...				22½	23½	25½
4. Actuals for 1884-85	24	24½	27½
5. " for 1885-86	22½	21½	25½

From the above it will be seen that the prices have steadily risen since the time of the former settlement. With regard to rice, the increase in the average price in the second decade, as compared with the first, is 28·12 per cent. In the third decade the prices are not much higher, although this decade comprised the famine years; but it will be seen, by the detailed information given in the statement above, that during the years 1876 to 1880 the prices rose very high, but this rise is counterbalanced by the prices falling low in the years prior to and following that period. The conclusion I draw, from the figures given, is that the prices of grains produced in this district have risen generally about 25 per cent. since the original settlement.

C. W. GODFREY, Lieut.-Colonel,
Superintendent, Revenue Survey, Ratnágiri.
