**A STUDY OF THE UTILISATION OF
IRRIGATION POTENTIAL OF THE PURNA
IRRIGATION PROJECT**

MAY 1979

L.W. AMBEGAONKAR

**A STUDY OF THE UTILISATION OF
IRRIGATION POTENTIAL OF THE
PURNA IRRIGATION PROJECT**

A THESIS
SUBMITTED TO THE
UNIVERSITY OF POONA

FOR THE DEGREE OF
DOCTOR OF PHILOSOPHY
(IN ECONOMICS)

BY
L. W. AMBEGAONKAR

GOKHALE INSTITUTE OF
POLITICS AND ECONOMICS
POONA 411 004
MAY 1979

ACKNOWLEDGEMENTS

In undertaking any work of the present kind, one has to incur a great deal of debt - intellectual and otherwise - which can never be repaid. The least one can do is to mention them only.

My greatest debt is to Prof. V.M. Dandekar, who, as the Director of Gokhale Institute of Politics and Economics, Pune, allowed me the privilege of working in the Institute. As the research guide, he directed the research in proper direction and pointed out many pitfalls I would have otherwise fallen into. I express my deep sense of gratitude to him for squeezing time out of his busy schedule for me.

Shri B.S. Apte has imparted some knowledge out of his vast pool of experience in the field of irrigation to me, which has helped me greatly in sorting out the problem from the initial chaos in my mind. For this I am grateful to him.

Project Authorities and the Statistician, Department of Irrigation, Government of Maharashtra must be thanked for their unstinting cooperation in the collection of the data relevant to my present study.

The authorities of the Marathwada Agricultural University have been kind enough to relieve me from my usual duty, which has allowed me to devote all my time to my present work.

Indian Council of Social Science Research, New Delhi, have made the study possible with their financial help in the form of grants for the purpose of preparing the questionnaire and undertaking the field work.

My friends and well-wishers—Shri S.D. Kulkarni, Shri K.G. Pathan, Shri T.K. Sen and many others—have helped me in fitting the various pieces of the jigsaw puzzle together. Their contribution is gratefully acknowledged.

The authorities of the Gokhale Institute of Politics and Economics and the staff of the Servants of India Society's Library have rendered my task easier by providing residential accommodation and giving full cooperation respectively.

Last but not the least by any means, Shri V.N. Inamdar deserves special thanks for his neat typing of this thesis.

Gokhale Institute of
Politics and Economics,
Pune-411 004.

ACKNOWLEDGEMENTS.....	(i)
LIST OF TABLES.....	(ix)
 <u>Chapter</u>	
I STATEMENT OF THE PROBLEM.....	1
1.1 Need for Irrigation.....	1
1.2 Water Resources of the Country....	3
1.3 Review of Irrigation Development..	4
1.4 Progress in the Creation and Utili- sation of the Irrigation Potential	7
1.5 Review of Literature on Causes of Underutilisation.....	9
1.6 Integrated Command Area Develop- ment Approach.....	25
1.7 Objects of the Study.....	28
1.8 Significance of the Study.....	29
II THE PURNA PROJECT.....	30
2.1 Marathwada.....	30
2.2 Growth of Irrigation in Marathwada	33
2.3 Genesis of the Purna Project.....	37
2.4 The River Purna.....	39
2.5 Salient Features of the Project...	39
2.6 Climate and Rainfall.....	41
2.7 The Soils.....	41
2.8 Topography.....	43
2.9 Surface Drainage.....	44
2.10 Approved Cropping Pattern of the Project.....	45
2.11 Attachment with Command Area Development Authority.....	46

<u>Chapter</u>		<u>Page</u>
III	MANAGEMENT AND ADMINISTRATION OF CANAL IRRIGATION WATER.....	47
	3.1 Irrigation Acts.....	47
	3.2 Provisions of the Act.....	48
	3.3 Field Organisation.....	51
	3.4 Sanction to Applications for Irrigation Water.....	52
	3.5 Distribution of Irrigation Water..	56
	3.6 Irrigation Year.....	58
	3.7 Crop Measurements.....	60
	3.8 Penalties.....	61
	3.9 Irrigation Revenue.....	62
	3.10 Water Rates.....	63
	3.11 Water Management.....	64
	3.12 Role of Institutions in Irrigation Management.....	68
IV	EXTENT OF UTILISATION OF THE PROJECT POTENTIAL.....	69
	4.1 Volume of Water.....	69
	4.2 Rate of Flow.....	70
	4.3 Duty and Delta.....	70
	4.4 Rotation.....	73
	4.5 Transit Losses.....	74
	4.6 The Concept of Irrigation Potential.....	75
	4.7 Irrigation Potential of the Project.....	81
	4.8 Utilisation Achieved in Different Cropping Seasons.....	86
V	FARM BUSINESS OF THE SAMPLE OF FARMERS.....	88
	5.1 The Need for a Survey.....	88
	5.2 Character of the Study.....	88
	5.3 Selection of Villages.....	89
	5.4 Selection of Cultivators.....	90

<u>Chapter</u>		<u>Page</u>
	5.5 Method of Enquiry and the Schedule.....	92
	5.6 Response to the Schedule.....	92
	5.7 Internal Consistence Checks in the Schedule.....	94
	5.8 Time Required for Canvassing the Schedule.....	95
	5.9 Reference Period.....	96
	5.10 Land Utilisation Pattern.....	98
	5.11 Cropping Pattern.....	101
	5.12 Expenditure on Various Items of Cultivation.....	105
	5.13 Value of Output and Net Returns...	109
VI	IRRIGATED AGRICULTURE.....	111
	6.1 Land Preparation.....	111
	6.2 Use of Improved Seed.....	115
	6.3 Use of Manures and Fertilizers....	116
	6.4 Use of Plant Protection Chemicals.	132
	6.5 Yield Performance of the Crops....	136
VII	WATER REQUIREMENTS AND SUPPLY.....	138
	7.1 Frequency and Depth of Watering...	139
	7.2 Irrigation in Relation to Critical Stages of Growth.....	140
	7.3 Irrigation in Relation to Agro-Climatic Zones.....	140
	7.4 Supply of Irrigation Water.....	145
	7.5 Application of Irrigation Water from Wells.....	149
	7.6 Deficiency in the Quantity of Water Required and Yields Obtained.....	151

<u>Chapter</u>		<u>Page</u>
VIII	EXTENT AND CAUSES OF UNDERUTILISATION OF CANAL WATER.....	154
	8.1 Extent of Underutilisation.....	154
	8.2 Causes of Underutilization of the Irrigation Facilities.....	161
	8.2.1 Competition from Wells in respect of Mixed Irrigable Area.....	161
	8.2.2 Causes Relating to the Distribu- tion System.....	163
	8.2.3 Maldistribution of the Available Water and Tail-End Difficulties..	174
	8.2.4 Lack of Credit and Inputs and Infrastructure.....	177
	8.2.5 Inadequate Preparation of Land, Inadequate Manpower and Inadequate Draught Power.....	179
	8.2.6 Traditional Outlook of the Farmers.....	180
	8.2.7 No Reason Given.....	182
	8.3 Remedial Measures.....	182
IX	ECONOMIC CONSEQUENCES OF UNDERUTILISATION..	188
	9.1 Financial Returns of the Purna Project.....	192
	9.2 Value of Agricultural Production Forgone due to Underutilisation..	202
	9.3 Loss of Revenue to Government due to Underutilisation.....	206
	9.4 Loss of Employment Opportunities.	207
	9.5 Improving the Returns from the Project.....	211
X	SUMMARY AND CONCLUSIONS.....	219

LIST OF TABLES

<u>Table No.</u>		<u>Page</u>
1.1	Development of Irrigation Potential.....	6
1.2	Major and Medium Schemes; Irrigation Benefits from Plan Schemes.....	7
2.1	Soil Classification of the Command Area of Purna Project.....	42
2.2	Topography of the Command Area of Purna Project.....	44
2.3	Cropping Pattern of Purna Project.....	45
4.1	Stages of Creation of Irrigation Potential.	81
4.2	Cropwise Break-up of the Area to be Irrigated.....	82
4.3	Utilisation of the Project Potential.....	83
5.1	Proportion and Number of Villages Selected from Each Taluka.....	90
5.2	List of Twenty Sample Villages.....	91
5.3	Data on Rainfall in Parbhani, Basmath and Nanded Talukas.....	97
5.4	Cropwise Distribution of Cultivators according to Their Operational Holding.....	98
5.5	Land Utilisation for the Year 1975-76.....	99
5.6	Percentage Area Under Irrigated and Unirrigated Crops.....	99
5.7	Physical Irrigable Area.....	100
5.8	Unirrigated Cropping Pattern.....	102

(x)

<u>Table No.</u>		<u>Page</u>
5.9	Irrigated Cropping Pattern.....	103
5.10	Cropping Pattern Under Canal and Under Wells.....	104
5.11	Per Cropped Hectare Expenditure on Various Items in respect of Unirrigated Crops.....	106
5.12	Per Cropped Hectare Expenditure on Various Items in respect of Irrigated Crops.....	107
5.13	Per Cropped Hectare Value of Output and Net Returns.....	110
6.1	Expenditure on Land Preparation.....	112
6.2	Frequency Distribution of Farmers according to the Reasons for Not Levelling.....	113
6.3	Size of Farm and the Area Remained to be Levelled.....	115
6.4	Doses of Fertilizers Applied to Paddy.....	122
6.5	Doses of Fertilizers Applied to Wheat.....	123
6.6	Doses of Fertilizers Applied to Hybrid Jowar.....	124
6.7	Doses of Fertilizers Applied to Groundnut..	125
6.8	Doses of Fertilizers Applied to Cotton.....	126
6.9	Doses of Fertilizers Applied to Turmeric...	127
6.10	Doses of Fertilizers Applied to Sugarcane..	128
6.11	Doses of Fertilizers Applied to Banana.....	129
6.12	Cropwise Deficiency of Fertilizers and F.Y.M.	132
6.13	Estimation of Total N, P and K Deficiency..	133
6.14	Reasons for Non-Adoption of Plant Protection Measures.....	135
6.15	Per Hectare Yields of Irrigated Crops.....	136

<u>Table No.</u>		<u>Page</u>
7.1	Critical Stages of Growth of Crops.....	141
7.2	Recommended Number of Waterings To Be Applied to Crops Under Purna Command.....	142
7.3	Response of Wheat (Sonora-64) to Four Irrigation Timings.....	144
7.4	Number of Waterings Applied to Different Crops by Reporting Farmers Using Only Canal Water.....	146
7.5	Interval Between Two Waterings Applied to Different Crops.....	148
7.6	Application of Irrigation Water from Wells.	150
7.7	Per Hectare Yield Obtained by the Farmers of Two Categories.....	151
7.8	Number of Irrigations Applied and Yield Obtained in Case of Sugarcane.....	152
7.9	Number of Irrigations Applied and Yield Obtained in Case of Sugarcane Grown on Well Irrigation.....	152
7.10	Number of Irrigations Applied and Yield Obtained in Case of Banana.....	152
8.1	Area Applied, Area for which a Pass Was Issued and the Area Actually Irrigated.....	156
8.2	Extent of Underutilisation of Irrigation by the Sample Farmers.....	158
8.3	Size of Physical Irrigable Area and Extent of Underutilisation.....	159
8.4	Length of Period of Using Canal Water and Extent of Underutilisation.....	160
8.5	Number of Farmers Reporting Various Reasons for Underutilisation of Irrigation Water...	162
9.1	Financial Return of Public Irrigation Works	190

<u>Table No.</u>		<u>Page</u>
9.2	Investment and Financial Returns of Purna Irrigation Project.....	194
9.3	Percentage of Working Expenses to Revenue Receipts.....	197
9.4	Working Expenses Per Hectare of Area Irrigated.....	198
9.5	Extent of Investment Unutilised.....	200
9.6	Amount Spent Per Hectare of Irrigation Potential Created and Utilised.....	201
9.7	Estimation of the Value of Agricultural Production Obtained by Putting the Irrigable Land to the Cultivation of Unirrigated Crops.....	204
9.8	Estimation of the Value of Agricultural Production Obtainable by Putting the Irrigable Land to the Cultivation of Irrigated Crops.....	205
9.9	Estimation of Loss of Revenue to Government due to Underutilisation.....	207
9.10	Estimation of Labour Required by the Unirrigated Crops.....	209
9.11	Estimation of Labour That Would Be Required by the Irrigated Crops.....	210
9.12	Statewise Water Rates and Gross Value Per Hectare of Rice and Wheat.....	214
9.13	Water Rates as Percentage of Gross Value of Produce Under the Purna Command.....	215
