

Analysis and Projections of Consumption Pattern in Punjab and Gujarat - A Comparative Study

**A
THESIS SUBMITTED TO THE GURU NANAK DEV UNIVERSITY, AMRITSAR
FOR THE AWARD OF THE DEGREE OF**

Doctor of Philosophy

In the Faculty of Economics and Business

1982

Supervised by:

Dr. Rajinder S. Johar
Professor and Head

Submitted by:

Harminder Singh Sandhu

**DEPARTMENT OF
PUNJAB SCHOOL OF ECONOMICS AND BUSINESS
GURU NANAK DEV UNIVERSITY, AMRITSAR**

C E R T I F I C A T E
=====

This is to certify that the thesis entitled, 'ANALYSIS AND PROJECTIONS OF CONSUMPTION PATTERN IN PUNJAB AND GUJARAT — A COMPARATIVE STUDY', being submitted by Sh. Harminder Singh Sandhu to the Guru Nanak Dev University, Amritsar, for the Award of Degree of DOCTOR OF PHILOSOPHY, is a bonafide piece of research work carried out by him under my guidance and supervision. The quality of his thesis fulfils all requirements of the regulations relating to the said Degree.

The results contained in this thesis have not been submitted in part or full to any other University or Institution for the Award of any Degree or Diploma.

Amritsar

November 19, 1982.

R. S. Johar

(R.S. JOHAR)

Professor and Head,
Punjab School of Economics and Business,
Guru Nanak Dev University, AMRITSAR.

A C K N O W L E D G E M E N T S

The author feels extremely indebted to Dr. R.S.Johar, Professor and Head, Punjab School of Economics and Business, Guru Nanak Dev University, Amritsar, for his invaluable help and constant encouragement throughout the course of the present study. Mere words cannot express the deep sense of gratitude for providing the requisite facilities for successful completion of this work well in time.

Sincere thanks are also due to Professor S.D.Tendulkar, Delhi School of Economics, Delhi who taught the author applied econometrics with specialization in consumer behaviour analysis, and advanced theory of economic development at Indian Statistical Institute, New Delhi. The author is equally grateful to his teachers Dr. Kirit S.Parikh, leader of Food and Agriculture Programme, International Institute of Applied System Analysis, Austria, Dr. T.N .Srinivasan, Professor of Economics, Yale University, U.S.A., Dr. L.R.Jain, Professor of Economics, Indian Statistical Institute, New Delhi, for their kindly giving him grounding in quantitative economics and econometrics.

The author is indebted to Dr. D.B.Gupta, Professor of Economics, Institute of Economic Growth, Delhi, who very kindly gave him the benefit of his advice liberally by sparing his precious time inspite of his tight schedule.

The author acknowledges with gratitude the help and the cooperation extended by the staff of the Computer Centre, Indian Statistical Institute, Delhi. The author is equally thankful to Dr. Surjit Singh of Chemistry Department, Guru Nanak Dev University, Amritsar, for making computer programme relating to the chapter on Projections.

Thanks are also due to the staff of Rattan Tata Library, Delhi, Indian Statistical Institute Library, Delhi, Institute of Economic Growth Library, Delhi and Punjab School of Economics and Business Library, Amritsar, for providing necessary research facilities.

The author also extends his thanks to Shri Surinder Kumar Sharma for excellent typing and Shri Gurmukh Singh for rolling the stencils.

Finally, the author will be failing in his duty if he does not place on record his appreciation for patience and understanding with which the members of his family, in particular, his wife Dr. Madhu, have borne with him over the period elapsed in the course of present study.

(Harmander Singh Sandhu)

CHAPTER-I	INTRODUCTION	1 - 12
CHAPTER-II	REVIEW OF MODELS ON CONSUMER DEMAND — ANALYSIS AND PROJECTIONS	13 - 116
2.1	The Static Theory of Consumer Behaviour	15 - 33
2.1.1	Separable Utility Functions (Utility Tree Approach)	23 - 32
2.1.1.1	Implications of Separable Utility Function	30 - 32
2.1.2	Aggregation	32 - 33
2.2	Methodologies of Demand Analysis	33 - 102
2.2.1	Time Series Studies	34 - 81
2.2.1.1	Single Demand Equation Studies	34 - 36
2.2.1.2	Complete(Static) Demand Systems	37 - 38
2.2.1.2.1	The Linear Expenditure System(LES)	38 - 42
2.2.1.2.1.1	Variants of the LES	42 - 44
2.2.1.2.2	The Addilog Systems	44 - 47
2.2.1.2.3	The Rotterdam Demand System	47 - 56
2.2.1.2.4	The Constant Elasticity System (or Double-Log System)	55 - 58
2.2.1.2.5	Other Models	58 - 64
2.2.1.3	Dynamic Demand Models	64 - 77
2.2.1.3.1	Single Dynamic Equation Models	66 - 74
2.2.1.3.2	Complete Dynamic Demand Systems	74 - 77
2.2.1.4	The Extended Linear Expenditure System(ELES) — An Inter-Temporal Approach	77 - 81

2.2.2	Cross-Section Analysis(or Engel Function Analysis)	82 - 102
2.2.2.1	The Choice of Variables in the Engel Function	87 - 93
2.2.2.1.1	The Dependent Variable	87 - 89
2.2.2.1.2	The Explanatory Variable	89 - 93
2.2.2.2	The Choice of Form of the Engel Function	93 - 96
2.2.2.3	Algebraic Forms of the Engel Function	96 - 102
2.2.2.3.1	Single Equation Functions	96 - 99
2.2.2.3.2	Complete System of Engel Functions	99 - 102
2.3	Methodologies of Demand Projections	102 - 116
2.3.1	Time Series Based Demand Projections	103 - 105
2.3.2	Cross-Section Based Demand Projections	105 - 116
2.3.2.1	Effect of Changes in Income Distribution	110 - 116
CHAPTER-III	THE DATA AND THE VARIABLES	117 - 137
3.1	National Sample Survey -- Salient Features	117 - 119
3.2	The Sample Design	119 - 121
3.3	The Data : Collected and Published	121 - 123
3.4	The Data and The Variables Used in the Study	123 - 124
3.5	Definitions of Major Commodity Groups	125 - 127
3.6	Concepts and Definitions	127 - 129
3.7	Evaluation of the NSS Data	130 - 137

CHAPTER-IV	METHODOLOGY	138 - 179
4.1	Engel Ratio and Engel Function Analysis	138 - 151
4.1.1	Selection of an Appropriate Engel Function	146 - 151
4.2	Covariance Analysis	151 - 155
4.3	Approximate Method for Demand Projections under Three-Parameter Log-Normality Hypothesis	156 - 179
4.3.1	Demand Projection Formulations under Approximate Method	160 - 166
4.3.2	Some Observations on the Projection Formulae	166 - 171
4.3.3	The Three-Parameter Log-Normal Distribution — Properties, Estimation and Goodness of Fit	171 - 179
4.3.3.1	Properties of the Three-Parameter Log-Normal Distribution	172 - 174
4.3.3.2	Method of Estimation	174 - 176
4.3.3.3	Goodness of Fit — The Double-Probit Graphical Test	177 - 179
CHAPTER-V	ANALYSIS OF CONSUMPTION PATTERN	202 - 258
5.1	Structure and Pattern of Consumer Expenditure	202 - 223
5.1.1	Statal Analysis : Category-wise	211 - 218
5.1.2	Regional Analysis : Category-wise	218 - 222
5.1.3	Temporal Analysis : Category-wise	222 - 223
5.2	Inter-state, Inter-Regional and Inter-Temporal Variations	223 - 258
5.2.1	Inter-State Variations	243 - 248

5.2.1.1	Rural Punjab Vs. Rural Gujarat	243 - 247
5.2.1.2	Urban Punjab Vs. Urban Gujarat	247 - 248
5.2.2	Inter-Regional Variations	249 - 253
5.2.2.1	Rural Punjab Vs. Urban Punjab	249 - 252
5.2.2.2	Rural Gujarat Vs. Urban Gujarat	252 - 253
5.2.3	Inter-Temporal Variations	254 - 258
5.2.3.1	1966-67 Vs. 1973-74 (Punjab)	254 - 257
5.2.3.2	1966-67 Vs. 1973-74 (Gujarat)	257 - 258
CHAPTER-VI	PROJECTIONS OF CONSUMER DEMAND	259 - 295
6.1	Estimated Three-Parameter Log-Normal Distribution	261 - 265
6.1.1	Goodness of Fit	263 - 265
6.2	Pattern of Income Distribution	265 - 283
6.2.1	First Case of Redistribution - 'L' Remains Constant	267 - 271
6.2.2	Second Case of Redistribution - 'L' Changes	272 - 276
6.2.3	Illustrative Exercise for Punjab and Gujarat	276 - 283
6.3	Demand Projections for 1990-91	283 - 295
CHAPTER-VII	SUMMARY AND CONCLUSIONS	296 - 307

LIST OF TABLES

<u>Table Number</u>	<u>Description</u>	<u>Page</u>
1	2	3
4.1	Important Characteristics of Alternative Forms of Engel Function Investigated	141
4.2	Analysis of Covariance Table	155
4.3	Demand Projection Formulae Based on Alternative Forms of Engel Function Investigated	167
5.1	Weighted Least Squares Estimates and Related Statistics of Best-Fitting Engel Function by Commodity Groups for Rural and Urban Punjab, 1966-67	204
5.2	Weighted Least Squares Estimates and Related Statistics of Best-Fitting Engel Function by Commodity Groups for Rural and Urban Punjab, 1973-74	205
5.3	Weighted Least Squares Estimates and Related Statistics of the Best-Fitting Engel Function by Commodity Groups for Rural and Urban Gujarat, 1966-67	206
5.4	Weighted Least Squares Estimates and Related Statistics of the Best-Fitting Engel Function by Commodity Groups for Rural and Urban Gujarat, 1973-74	207
5.5	Commodity Group -wise Engel Ratios(R_h , in per cent) and Engel Elasticity Estimates ($\hat{\eta}_h$) for Rural and Urban Regions of Punjab and Gujarat, 1966-67 and 1973-74	209
5.6	Region-wise Plausible Form(s) of the Engel Function for Foodgrains, 1966-67 and 1973-74	225
5.7	Region-wise Plausible Form(s) of the Engel Function for Milk and Milk Products, 1966-67 and 1973-74	226
5.8	Region-wise Plausible Form(s) of the Engel Function for Edible Oils, 1966-67 and 1973-74	227

1	2	3
5.9	Region-wise Plausible Form(s) of the Engel Function for Sugar, 1966-67 and 1973-74	228
5.10	Region-wise Plausible Form(s) of the Engel Function for Beverages and Refreshments, 1966-67 and 1973-74	229
5.11	Region-wise Plausible Form(s) of the Engel Function for Other Food, 1966-67 and 1973-74	230
5.12	Region-wise Plausible Form(s) of the Engel Function for Clothing, 1966-67 and 1973-74	231
5.13	Region-wise Plausible Form(s) of the Engel Function for Fuel and Light, 1966-67 and 1973-74	232
5.14	Region-wise Plausible Form(s) of the Engel Function for Pan, Tobacco and Intoxicants, 1966-67 and 1973-74	233
5.15	Region-wise Plausible Form(s) of the Engel Function for Rent and Taxes, 1966-67 and 1973-74	234
5.16	Region-wise Plausible Form(s) of the Engel Function for Durable Goods, 1966-67 and 1973-74	235
5.17	Region-wise Plausible Form(s) of the Engel Function for Other Non-Food, 1966-67 and 1973-74	236
5.18	Regression Coefficients, Expenditure Elasticities and Percentage Expenditures on Various Commodity Groups for Rural Regions of Punjab and Gujarat, 1966-67 and 1973-74	237
5.19	Regression Coefficients, Expenditure Elasticities and Percentage Expenditures on Various Commodity Groups for Urban Regions of Punjab and Gujarat, 1966-67 and 1973-74	238
5.20	Regression Coefficients, Expenditure Elasticities and Percentage Expenditures on Various Commodity Groups for Rural and Urban Regions of Punjab, 1966-67 and 1973-74	239

1	2	3
5.21	Regression Coefficients, Expenditure Elasticities and Percentage Expenditures on Various Commodity Groups for Rural and Urban Regions of Gujarat, 1966-67 and 1973-74	240
5.22	Regression Coefficients, Expenditure Elasticities and Percentage Expenditures on Various Commodity Groups during 1966-67 and 1973-74, Rural and Urban, Punjab	241
5.23	Regression Coefficients, Expenditure Elasticities and Percentage Expenditures on Various Commodity Groups during 1966-67 and 1973-74, Rural and Urban, Gujarat	242
5.24	Covariance Tests for Inter-State Variations in the Consumption Pattern of Rural Regions of Punjab and Gujarat, 1966-67 and 1973-74	244
5.25	Covariance Tests for Inter-State Variations in the Consumption Pattern of Urban Regions of Punjab and Gujarat, 1966-67 and 1973-74	245
5.26	Covariance Tests for Inter-Regional Variations in the Consumption Pattern of Rural and Urban Regions of Punjab, 1966-67 and 1973-74	250
5.27	Covariance Tests for Inter-Regional Variations in the Consumption Pattern of Rural and Urban Regions of Gujarat, 1966-67 and 1973-74	251
5.28	Covariance Tests for Inter-Temporal Variations in the Consumption Pattern, Rural and Urban Punjab	255
5.29	Covariance Tests for Inter-Temporal Variations in the Consumption Pattern, Rural and Urban Gujarat	256

1	2	3
6.1	Parameter Estimates of Three-Parameter Log-Normal Distribution — $\wedge(x_0, \mu, \sigma^2)$ Fitted to Base Year (1973-74)'s Observed Distribution of Persons by Monthly Total Expenditure Per Capita Classes, Rural and Urban Regions of Punjab and Gujarat	262
6.2	Values of $R(L)$ in Case of (ia) : $r_0 = r/2$, $\sigma^* = \sigma$; and of $D(\sigma)$ in case of (ib) : $r_0 = r/2$, $L^* = L$, Over the period of Projection 1973-74 to 1990-92, Corresponding to Different Assumed Values of r_a , Rural and Urban Regions of Punjab and Gujarat	270
6.3	Estimates of Minimum Level of Living (x_{\min}) and Poverty Population [$P(x_{\min})$] in the Rural and Urban Regions of Punjab and Gujarat	280
6.4	Percentage Values of $r_{.05}$, $D(\sigma)$ and L^* Corresponding to Different Values of r_a and P_2^* Related to VCM's and CCM's x_{\min} , Rural and Urban Regions of Punjab and Gujarat	282
6.5	Parameter Estimates of Three-Parameter Log-Normal Distribution — $\wedge(x_0, \mu, \sigma^2)$ of Average Monthly Total Expenditure Per Capita Distributions in the Base Year 1973-74 and the Target Year 1990-91 Corresponding to Three Alternative Values of r_a and Two Cases of Redistribution, Rural and Urban Regions of Punjab and Gujarat	287
6.6	Fractile Group-wise Estimated Average Monthly Total Expenditure Per Capita in the Base Year 1973-74 and the Target Year 1990-91 Corresponding to Three Assumptions of r_a and Two Cases of Redistribution, Rural and Urban Regions of Punjab and Gujarat	289

1	2	3
6.7	Projection Indices of Average Monthly Total Expenditure Per Capita on Various Commodity Groups Based on Best-Fitting Form of the Engel Function Chosen Corresponding to Three Alternative Values of r_a and Two Cases of Redistribution for 1990-91 at Constant Prices of the Base Year 1973-74, Rural and Urban Regions of Punjab and Gujarat	291
6.8	Projections of Average Monthly Expenditure on Various Commodity Groups Corresponding to Three Alternative Values of r_a and Two Cases of Redistribution for 1990-91 at Constant Prices of the Base Year 1973-74, Rural and Urban Regions of Punjab and Gujarat	292
6.9	Percentage Increase in Average Expenditure Per Capita on Various Commodity Groups, at Constant Prices of the Base year 1973-74, Over the Projection Period from 1973-74 to 1990-91 Corresponding to Three Alternative Values of Redistribution, Rural and Urban Regions of Punjab and Gujarat	294

TECHNICAL APPENDICES

<u>Number</u>	<u>Description</u>	<u>Page(s)</u>
I	Derivation of Formulae for the Residual Sum of Squares(RSS) Corresponding to Unrestricted and Restricted Models	180 - 190
II	Derivation of Demand Projection Formulae Corresponding to Alternative Forms of Engel Function	191 - 201
