UNIVERSITY OF POONA
FOR THE DEGREE OF
DOCTOR OF PHILOSOPHY
IN ECONOMICS

BY
SATISH D. KULKARNI

GOKHALE INSTITUTE OF POLITICS AND ECONOMICS
PUNE 411 004
MAY 1983

ACKNOWLEDGEMENTS

In undertaking any work of the present kind, one has to incur a great deal of debt - intellectual and otherwise - which can never be repaid. The least one can do is to mention them.

This work was carried out at the Gokhale Institute of Politics and Economics, Pune, under the guidance of Prof. Milkantha Rath. Prof. Rath not only introduced me to the domain of this subject but has also been a constant source of encouragement at every stage of my work. His incisive comments have benefited me enormously in tackling many a complex problems. Mere words would not be sufficient to express my sincere gratitude to him.

I would like to thank Prof. V.M. Dandekar, Ex-Director, and Shri D.P. Apte, Registrar, Gokhale Institute, for the patronage and help extended to me at every stage of the work. This study would not have been possible without the U.G.C. Fellowship, the Research Assistantship and also a numerous other facilities provided by the Gokhale Institute. For all this, I am grateful to the Institute.

Dr. A.K. Mitra, Shri M.P. Khare, and Shri M.V. Joglekar helped me in various ways including concrete advice in conducting quantitative exercises. They have not only been an affectionate colleague but also a source

(iii)

of encouragement and advice. I am immensely indebted to them.

Dr. M.K. Datar and Miss Vidya Kathapurkar read through various drafts of the manuscript and helped me to improve the stylistic presentation. Their friendly advice is also gratefully acknowledged.

I am also grateful to my parents and my Grandmother, for their affectionate encouragement which sustained my enthusiasm through all the hazards of my academic career.

Last but not the least by any means, Shri K.P. Limbore deserves special thanks for his neat typing of this thesis.
