ACKNOWLEDGEMENTS

I gratefully thank Prof. K. Balasubramanian for his guidance and active help in the completion of this dissertation. His patient and encouraging manner considerably increased my confidence in my ability to complete this extensive project even after a gap of several years.

I thank Dr. K. Srinivasan, Director of International Institute of Population Sciences, Bombay for giving me permission to stay on the campus and make use of the well-stocked library there. I am thankful to the library staff of I.I.P.S. who were most helpful in seeking out reference books for me.

Thanks are especially due to my respected father-in-law, Shri K.T. Potdar, and my husband, who never gave up hope and faith in my ability to finish successfully what I had undertaken and spurred me on to the winning post. Thanks are also due to my mother whose love and all-round support are behind every page of this dissertation.

I gratefully acknowledge Ms. Anjali Radkar's assistance in compiling the data and use of the computer for the statistical formulations. I thank the Gokhale Institute Library Staff for their cooperation in this research endeavour. I specially thank Shri V.N. Inamdar who personally assumed responsibility for completing the typing and binding of the dissertation in time for the expiry period of my M.Phil. terms.
