**PROCESS ANALYSIS OF STEEL FORGINGS INDUSTRY
IN INDIA WITH SPECIAL REFERENCE TO THE PROBLEMS
OF CONTINUITY AND MULTIDIMENSIONALITY FOR SECTOR
SPECIFICATION IN THE INTER INDUSTRY FRAME-WORK**

**A THESIS SUBMITTED TO
THE UNIVERSITY OF POONA
FOR THE DEGREE OF**

DOCTOR OF PHILOSOPHY IN ECONOMICS

**BY
V. V. N. SOMAYAJULU**

**GOKHALE INSTITUTE OF POLITICS AND ECONOMICS,
POONA-4**

APRIL 1970

ACKNOWLEDGEMENTS

This study is carried out, during June 1967-April 1970, at the Gokhale Institute of Politics and Economics, Poona-4. It is preceded by predoctoral training on Social Sciences Research Methodology during 1964-65, full time Research Assistantship during 1965-67 and part-time teaching fellow-cum-research assistantship during 1967-70. I have the benefit of attending all courses conducted by the Institute during 1964-70 and of coaching the trainees of the Institute during 1968-70. For all these, I am grateful to the authorities of the Institute.

My words are inadequate to record my feelings of indebtedness to Prof. P.N.Mathur, my research guide, whose association is a source of inspiration to my research cum-teaching activities. His close guidance, keen interest and continuous encouragement to improve my research works, have imparted timely thoughts at various stages of this study. Weekly workshops of the input output group in a congenial atmosphere of the Institute are a special opportunity of presenting and discussing my research problems. For all these, I am highly grateful to Prof. P.N.Mathur and other members of the group.

I have the benefit of frank, free and open comments and suggestions of Shri P. Venkatramaiah, Dr. R.Radhakrishna, Sarvashri R.S.Rao, R.K.Koti, S.K.Basu and W.V.Rao in a good number of fruitful discussions with them. I do not believe that I can do any justice by merely wording my sincere thanks to each of them. I wish to express my gratitude to all my friends, in and outside the Institute, for discussions with me on topics of this study. My thanks are due to Shri D.B.Sardesai, Shri V.J.Puntambekar and his staff members, more particularly to Shri D.B.Unde and Shri S.N.Baldota for computer programming. I thank Shri G.k.Misra and Miss S. Barve for cartography. The strenuous efforts of the

(11)

typist, Shri N.G.Phadke cannot be acknowledged with mere thanks.

A study of this nature could not have been completed without the liberal library facilities of the Servants of India Society, Poona, and willing cooperation of the officials of the firms in the Industry and of the Association of Drop forgings and Stampings Industries, Bombay. I wish to express my thanks to all staff members of these Organisations.

Gokhale Institute of
Politics and Economics,
Poona-4.

April, 1970.

Chapter	
I INTRODUCTION	
1.1 Theme of the study	1
1.2 Need for this study of product specification and discrete ^{duct} groups' input structures for sector specification	3
1.3 Use of engineering data in the industry studies for sector specification and their production functions - A brief review	5
1.4 Use of engineering data in the 'Process analysis of the steel forgings industry study'	10
1.5 Brief review of the earlier attempts of industry studies with similar problems...	11
1.6 Importance of this industry study in relation to previous attempts	22
1.7 Brief summary of the following chapters..	26
II STRUCTURE, SUPPLY, DEMAND PATTERN AND DEVELOPMENT PROBLEMS OF STEEL FORGINGS INDUSTRY IN INDIA	
2.0 Introduction	28
2.1 Historical development of forging process	29
2.2 Levels of operation and their nature Modal type size as an approximation to optimum size and the structure of the industry in private sector during 1963-66 and over States in India	30 31

Chapter		Page
2.3	Development of the industry since the inception of Five Year Plans.....	37
2.4	Imports and Exports of Iron and Steel Forgings	41
2.5	Demand pattern of steel forgings according to their using industries	44
2.6	Development problems of steel forgings industry in India	46
2.7	Summary	51
	Appendix to Chapter II. Development problems of protection and of production cost reduction in steel forgings industry	53
III	TECHNICAL PROCESSES, MATERIALS AND PRODUCTS IN STEEL FORGINGS INDUSTRY	
	Flow Chart of operations in a full-fledged forgings production unit	69
3.0	Introduction	70
3.1	General technical features of the industry in India	71
3.2	Salient features of forge production units under investigation	91
3.3	Summary	114
	Appendix to Chapter III. Detailed technical features of steel forgings industry in India and in advanced countries	116
IV	INPUT AND CAPITAL STRUCTURES AS PARAMETERS OF INSTANTANEOUS PRODUCTION FUNCTIONS OF FIRMS AND TECHNOLOGICAL PROCESSES IN STEEL FORGINGS INDUSTRY	
4.0	Introduction	133
4.1	Production theories - discussion on development of the analytical approaches.	134
4.2	Input output analysis - its nature and uses to a firm or industry	138

Chapter		Page
4.3	Assumptions and limitations of input output analysis	146
4.4	Conceptual and practical problems in the empirical evaluation of capital and input structures of firms, processes and industry	150
4.5	Analysis of the input and capital structures of firms and processes	172
V		
	ROLE OF STEEL FORGINGS AS A SEPARATE SECTOR IN THE INTER INDUSTRY STRUCTURE - AN APPLICATION OF THE INPUT OUTPUT TABLE OF INDIA FOR 1963 WITH THE DERIVED RESULTS AND INTERPRETATION	
5.0	Introduction	180
5.1	The role of steel forgings industry as a separate sector in the input output analysis and in the available input output tables of Indian economy	180
5.2	Aggregation for sector specification and price adjustments attempted to incorporate steel forgings sector in the input output table at purchasers' prices of 1963	193
5.3	Role of indirect requirements of 'Steel forgings' and of 'Iron and Steel excluding basic iron and steel and steel forgings' - Application of technology matrices, results and interpretation	200
5.4	Summary and limitations of this study ...	207
	Appendix to Chapter V. Description of 66 Sectors classification of economic activity	

Chapter		Page
VI	PRODUCT SPECIFICATION IN STEEL FORGINGS INDUSTRY FOR SECTOR SPECIFICATION IN THE PROCESS ANALYSIS STUDIES	
6.0	Introduction	214
6.1	Problem of product specification in forging industry	218
6.2	Use of principal components and scatter diagram method for product specification.	220
6.3	Selection of product dimensions and number of forgings for product speci- fication	223
6.4	Product groups specification - Results and interpretation of two methods	230
6.5	Summary	242
VII	AVERAGE PRICES AND INPUT STRUCTURES OF THE AGGREGATED PRODUCT GROUPS AND THEIR RELEVANCE IN THE INTER INDUSTRY FRAME WORK AND IN THE PROJECT COST ESTIMATES OF ENTREPRENEURS	
7.0	Introduction	246
7.1	Need for commoditywise input output tables vis-a-vis industrywise input output tables	246
7.2	Problem of finding average prices for product groups - two methods and their limitations	248
7.3	Average prices for the aggregated product groups of die forgings and of open forgings	253
7.4	A method for deriving input structures of the product groups	258
7.5	Input structures of product groups - results and interpretation	265

Chapter		Page
7.6	Summary and concluding remarks	290
	Appendices to Chapter VII. Input structures of more aggregative product groups of die forgings	295
VIII	SUMMARY AND FINDINGS OF THE STUDY	300
	BIBLIOGRAPHY	314
	Appendix A. Appendix Tables to Chapter IV	321
	Appendix B. Appendix Tables to Chapter VII	337
	Appendix C. Appendix Tables and Charts to Chapter VI	357

LIST OF TABLES AND CHARTS

Table No.		Page
<u>Chapter II</u>		
1	Structure of the firms licensed upto 1963-64, during 1964-1965 (average of two years) and 1966 (Calendar year) in private sector, according to their licensed capacity ranges	33
2	Model sizes and Mean sizes of plant capacity (licensed) in private sector upto 1963-64, 1964-65 and upto 1966	34
3	Statewise structure of licensed and utilized licensed capacities of firms in private sector	35
4	Estimates of imports and exports of iron and steel forgings	42
5	Using industrywise demand pattern of steel forgings over 1960-1964	45
<u>Chapter III</u>		
1	Details of forging units under investigation	93
2	The piece weights of wheel sets at different stages of operation	97
3	Production compositions in 1965 and 1966 of Firm G	100
4	Production compositions in 1967 of Firm H	101
5	Sales distribution of die forgings of Firm D	102
6	Estimated load of Forge shop in different quality steels of Firm J	102
7	Light forge shop production in tonnage per year according to piece weight ranges and forging capacities of Firm K	105
8	Annual production according to piece weight ranges and forging capacities of Firm N ..	106
9	Distribution of the value of production of repairs and maintenance type forge shops over the different shops of steel plants over years	108

Table No.		Page
10	Forging production prediction in U.S.S.R.	130
11	Percentage share of average dollar sales by the commercial forging industry to major end use markets over the period 1960-65 in United States of America	131
 <u>Chapter IV</u>		
1	Input structures of firms in steel forgings industry during 1965-67 at producers' prices	177
2	Fixed capital coefficients of firms in steel forgings industry during 1965-67 ..	178
3	Working capital coefficients of firms in steel forgings industry during 1966-67 ..	179
 <u>Chapter V</u>		
1	Growth of using industries and their unit output requirements of steel forgings over the years 1960-1964	187
2	Motor vehicles in production in India during 1951-1966	188
3	Row Vectors of 341-3 (ASIC) Iron and steel forgings sector distinguished from those of steel forgings sector for 1963 and 1964 at purchasers prices	190- 191
4	Column Vectors of (i) 66-Steel forgings sector in A(66 x 66), (ii) 45-residual iron and steel sector in A (66 x 66) and (iii) 111-Iron and steel castings and forgings sector in A (241 x 241) all at purchasers prices of 1963	194
5	Direct and indirect requirements of 66-Steel forgings, 45 - residual iron and steel and 45 - Iron and steel in the respective matrices for 1963	202

Table No.		Page
<u>Chapter VI</u>		
1	The correlation matrix of six variables ...	224
2	Principal Factor pattern for the first three factors of six variables	225
3	Frequency distribution of die forgings by their net weights and tensile strengths of material	234
4	The correlation matrix of two variables .	236
5	The Principal Factor Pattern for two factors of two variables	236
6	Product groups specification of die forgings in different firms and their characteristics	244
7	Correlation of matrix of three variables.	240
8	Principal Factor pattern for two factor of two variables	241
9	Product groups specification of open or free forgings in different firms and their characteristics	245
<u>Chapter VII</u>		
1	Value of production matrix of die forgings - V (4×4)	256
2	Value of production matrix of die forgings - V (2×2)	256
3	Value of production matrix of open forgings' firms and product groups - V (3×3)	258
4	Matrix C (4×4) of die forgings	268
5	Matrix C inverse (4×4) of die forgings..	268
6	Matrix D (4×4) of die forgings	269
7	C (3×3) matrix of open forgings	270
8	C^{-1} (3×3) matrix of open forgings	270
9	D (3×3) matrix of open forgings	270
10	Matrix B (16×4) of die forging firms' input structures	271

Table No.		Page
11	Matrix B (14 x 3) of open forging firms' input structures	272
12	Matrix A (14 x 3) = BC^{-1} of open forgings	273
13	Matrix E (14 x 3) = BD of open forgings	274
14	Matrix A = BC^{-1} of die forgings	275
15	Matrix E (16,4) = BD	276
16	Adjustment (1)	284
17	Adjustment (2)	285
18	Adjustment (3)	286
19	Adjustment (4)	287

Appendix Tables

A.4	Input structures of die forgings at producers prices of years 1960-61 to 1967 after making all requisite refinements	321
A.5	Fixed capital coefficients of die forging firms other than those given in Table 2.	324
A.6	Inventories of working capital coefficients of steel forging firms during 1965-1967.	325
A.6a	Inventories of working capital coefficients of Firm E	326
A.7	Personnel coefficients per rupee worth output of a steel die forging unit	327
A.8a	Input structures of the intermediate technological processes of Firm E (wheel sets units) during 1963-64	328
A.8b	- do - 1964-65	329
A.8c	- do - 1965-66	330
A.8d	- do - 1966-67	331
A.9	Fixed capital coefficients of plant and machinery per rupee worth capacity of die forging firms - shopwise	332
A.10	Incremental Fixed capital coefficients of a new plant per rupee worth capacity	333

Table No.		Page
A.11	Ratios Producers' to Purchasers' prices of inputs/outputs	336
(Set II) B.20	$C_{(2 \times 2)}$ matrix of die forgings	337
B.21	$C_{(2 \times 2)}^{-1}$ matrix of die forgings	337
B.22	$D_{(2 \times 2)}$ matrix of die forgings	337
B.23	Matrix $B_{(16 \times 2)}$ Input structures of die forgings firms	338
B.24	Matrix $BC^{-1} = A(16,2)$. Input structures of die forgings	339
B.25	Matrix $BD = E(18,2)$. Input structures of product groups of die forgings	340
B.26	Adjustment (1). Input structures of product groups of die forgings based on commodity technology assumption, replacing the negative coefficients by zero values in the respective cells of $A=BC^{-1}$ Matrix	341
B.27	Adjustment (3). Input structures with commodity technology applicable to steel, fuels and electricity and firm technology to the rest of the input coefficients of all product groups of die forgings	342
B.28	Adjustment (4)	343
(Set III) B.29	$C_{(3 \times 3)}$ Matrix of die forgings	344
B.30	$C_{(3 \times 3)}^{-1}$ Matrix of die forgings	344
B.31	$D_{(3 \times 3)}$ Matrix of die forgings	344
B.32	Matrix $B_{(16,3)}$ Input structures of die forgings firms	345
B.33	Matrix $BC^{-1} = A(16,3)$ Input structures of product groups of die forgings	346

Table No.		Page
B.34	Matrix $BD = E(16,3)$. Input structures of product groups of die forgings	347
B.35	Adjustment (1)	348
B.36	Adjustment (2)	349
B.37	Adjustment (3)	350
B.38	Adjustment (4)	351
(Set IV) B.39 C	(3,3) Matrix of die forgings	352
B.40	Matrix C^{-1} of die forgings	352
B.41	D (3,3) Matrix of die forgings	352
B.42	Matrix B (16,3). Input structure of die forging firms	353
B.43	Matrix $BC^{-1}=A(16,3)$ - do -	354
B.44	Matrix $BD = E(16,3)$ - do -	355
