PREFACE

On the eve of Reorganisation of the States, the Bureau of Economics and Statistics, Government of Bombay, published a booklet entitled "Handbook of Statistics of Reorganised Bombay State". The main object of this publication was to make available a broad picture of the socio-economic conditions of the new State. It was, however, felt that it will be necessary to have at one place a comprehensive series of statistics showing the development of the State since the beginning of the First Five-Year Plan. The present publication is an attempt to meet this need.

This is the first Statistical Abstract of the Reorganised Bombay State. It would serve as a convenient reference volume for quantitative summary statistics. The publication includes districtwise statistics for the last two years and summary statistics by Administrative Divisions for the three preceding years. Further detailed information can be obtained from the primary sources listed under each statement included in this publication.

The concepts and methods employed for collecting statistics differed to a certain extent in the constituent States. In some cases the relevant statistics had not been published and therefore statistics had to be collected from the original sources. In a few cases estimates for some of the years had to be prepared to fill up the gaps in the information. To that extent the figures published may be treated as provisional. It is however believed that the figures now presented are the best that could be built up under the present circumstances.

M. A. TELANG,

Director,

Bureau of Economics and Statistics,
Government of Bombay, Bombay.

Bombay, 1st March 1959.
