No. SCR/S-1265/1731  
DIRECTORATE OF AGRICULTURE,  
MAHARASHTRA STATE,  
Poona-1, dated the 13th March, 1969.

FROM

Dr. V. G. VAIDYA,  
Director of Agriculture,  
Maharashtra State,  
Poona 1.

To

THE SECRETARY TO GOVERNMENT,  
AGRICULTURE AND CO-OPERATION  
DEPARTMENT, SACHIVALAYA ANNEXE,  
BOMBAY-32, (BR.)

Sir,

I am to submit herewith the Annual Season and Crop Report of the Maharashtra State for the year ending the 31st July 1965.

I give below very briefly my remarks on the general agricultural conditions :

1. The season was marked by uneven distribution of rains and proved beneficial to the crops like kharif jowar, groundnut and wheat and rather unfavourable to cotton crop.

2. Incidence of crop pests and plant diseases was reported from all over the State. Prompt remedial and preventive measures were taken in the affected areas.

3. The mileage of Government canals was 2,444 while that of private canals was 5,160. The total irrigated area during the year under report was 33,70,300 acres showing an increase of 3.8 per cent over the corresponding figure of 32,46,500 acres during 1963-64.

4. The increase in the area under food crops at the divisional level was noticed in all the divisions of the state except Poona division, where it showed a decrease of 1.0 per cent or 1,08,100 acres. The area under non-food crops showed a decrease in Bombay and Poona divisions whereas it showed an increase in Aurangabad and Nagpur divisions over that of preceding (i.e.) last year.

The area under food crops at the state level was 3,33,08,600 acres in 1964-65 as against 3,32,25,300 acres in 1963-64 showing a slight increase by 0.3 per cent. The area under non-food crops was 1,41,76,900 acres during the year under report as against 1,41,55,800 acres in 1963-64 showing slight increase by 0.1 per cent.

5. The average yield per acre at the state level for the crops on which surveys were carried out was higher for kharif jowar, gram and groundnut, while for rabi jowar, rice, wheat, cotton and tobacco it was lower than the corresponding yield per acre in the preceding year.

6. The prices of all the agricultural commodities at the state level ruled higher than those in 1963-64. There was a slight increase in the wages of skilled and unskilled labourers.

7. As per the latest quinquennial census of livestock, conducted in 1961 there was an overall increase in the number of cattle and buffaloes to the extent of 8.6 per cent and 13.4 per cent respectively over the corresponding figures of 1956 census. The number of buffaloes used for breeding purposes and cattle in milk, however, decreased by 27.4 per cent and 7.6 per cent respectively over the corresponding figures of 1956 census. The number of sheep, goats and mules increased while the number of horses and ponies declined. The poultry population showed an increase of 19.1 per cent.

8. The number of sugarcane crushers, oil engines and electric pumps showed an increase of 11.4 per cent, 138.6 per cent and 209.3 per cent respectively. The number of tractors and ghanies declined by 38.5 per cent and 43.3 per cent respectively. (Compared with 1956 census figures).

Yours faithfully,

V. G. VAIDYA,

Director of Agriculture,  
Maharashtra State, Poona 1.

SEASON AND CROP REPORT OF STATE OF  
 MAHARASHTRA FOR THE YEAR 1964-65

CHAPTER I

SEASON

Although pre-monsoon showers were received over all the divisions of the State during April and May, facilitating preparatory tillage operations the agricultural season 1964-65 was peculiar for the uneven distribution of rainfall. The precipitation was excessive in some parts causing considerable damage to crops there while in other parts, it was inadequate limiting the performance of crops. The season on the whole was favourable to crops like kharif jowar, groundnut and wheat but not so to cotton crop.

The monsoon broke out at the usual time in the Konkan and Deccan regions of the State. In parts of Satara, Poona and Sholapur districts, the rains were either inadequate or absent. In parts of the Marathwada and Vidarbha regions, however the rains commenced later than usual and sowings of kharif crops were in progress in the second fortnight of June. The rains, however, proved inadequate for sowing of kharif crops in parts of Parbhani, Aurangabad, Bhir, and Osmanabad districts. In the month of *July* transplanting of paddy was completed except in parts of Bhandara and Chanda districts where it was held up due to insufficient rains. Sowing operations of other kharif crops were completed except in parts of Satara, Nagpur and Wardha districts and all the districts of Marathwada region where they continued during the month.

Rivers in Akola, Buldhana and Wardha districts were in spate and crops in low lying areas particularly in Balapur and Akola talukas of Akola district were damaged and crops had to be resown. In the month of *August* widespread and substantial rains were received in Konkan region and paddy crop fared well. In Thana district however, fruit gardens in Bassin, Palghar and Dahanu talukas were damaged considerably due to cyclone on the 7th August 1964. Sufficient rains were received in the Deccan Region except in parts of Ahmednagar and Sholapur districts and eastern part of Poona district. In Marathwada and Vidarbha regions, moderate and well

distributed rains were received but the rains proved to be excessive in the districts of Buldhana and Akola and the growth of kharif crops was stunted. In the month of *September*, sufficient rains were received in the Konkan region and paddy crop thrived well. Scanty and intermittent showers were received over large areas of the Deccan region in the first fortnight of the month. In the second fortnight, however, widespread and substantial rains were received in all districts except Bhandara and Chanda. These proved beneficial to the standing kharif crops except cotton and for sowing of rabi crops. Due to continuous rains in the month of September, cotton crop in Vidharbha, Marathwada and Khandesh tracts was damaged to some extent.

Intermittent rains were received during the month of *October* in the Konkan and the Deccan except in Sholapur where the rains were widespread. In the Marathwada and Vidarbha regions rains were moderate. Late varieties of paddy crop in Bhandara district were however, suffering due to inadequate rains. Harvesting of early paddy, bajri and groundnut and sowing of rabi crops were in progress. In the month of *November*, rains received were scanty in the Konkan region, intermittent and light in the Deccan and Marathwada and were practically absent in the Vidharbha region except in parts of Nagpur and Chanda districts where some showers were received. More rains were, however, required for healthy growth of rabi crops in Aurangabad district and parts of Nasik district. Harvesting of paddy, bajri and groundnut was nearing completion while that of jowar and cotton was in progress.

There were no rains in any parts of the state, during the month of *December* 1964, except in parts of Miraj and Tasgaon talukas of Sangli district and in Sholapur district. Condition of standing crops was satisfactory except in some parts of Nasik, Puna, Ahmednagar, Parbhani and Bhir districts. Cotton crop in Ahmednagar district was considerably affected by boll worms and in all the important cotton growing districts of Vidarbha, Marathwada and Khandesh regions, the crop condition was unsatisfactory.

During the month of *January* 1965, no rains were received except a few showers particularly in parts of Kolaba, Ratnagiri, Dhulia, Jalgaon, Nasik, Satara, Sangli, Aurangabad, Bhir, Osmanabad and

all the districts of Nagpur division. Condition of rabi crops was satisfactory except in parts of Dhulia, Nasik, Ahmednagar, Poona, Aurangabad and Parbhani districts due to insufficient soil moisture. Damage to the standing rabi crops due to cyclone and hailstorm was reported in the districts of Dhulia, Jalgaon, Nasik, Buldhana and Akola. No rains were received during the months of *February* and *March* 1965 except a few showers particularly in parts of Wardha, Bhandara and Aurangabad districts.

Incidence of jassids on kharif jowar, aphids and ticca on groundnut and dahiya on cotton were reported in parts of Marathwada and Vidarbha regions. In Akola, Nagpur, Wardha, Yeotmal, Buldana districts, arial and ground sprayings were carried out on cotton against pests. Prompt remedial measures were adopted in case of jowar and groundnut also in the affected areas.

2. *Distribution of rainfall* —Table I (pages 55 to 59) compares the rainfall during the year under report with the normal rainfall of each district headquarter station in the State. The figures of normal rainfall for each station are those supplied by Indian Meteorological Department. The following observations are made from a study of this table.

(i) *Pre-monsoon rains* :—The pre-monsoon rains were below the normal throughout the state excepting in Aurangabad district where it was above normal.

(ii) *Monsoon rains* :—The monsoon rains were above the normal, in Bombay and Poona divisions except in Ahmednagar district of the latter division. In Parbhani, Akola, Amraoti, Yeotmal and Nagpur districts, they were above the normal. At the remaining H. Q. stations of Aurangabad and Nagpur divisions; they were below the normal.

(iii) *Post-monsoon rains* :—The post monsoon rains exceeded the normal in Kolaba, Ratnagiri, Satara, Sangli and Akola districts. At other H. Q. stations, they were below the normal.

(iv) *Winter rains* :—The winter rains were below the normal at all district H. Q. except Buldhana and Yeotmal, where they were above the normal.

(v) *Total rainfall for the season 1964-65* :—The total rainfall for the season 1964-65 was above the normal at all the H. Q. stations except at Ahmednagar, Buldhana, Wardha and Bhandara and at district H. Q. stations in Aurangabad division.

*Bombay Division.*—Light premonsoon showers were received in April and May in the division facilitating preparatory tillage operations for the ensuing kharif season. Sowing of deviraj cotton commenced in parts of the division and the germination of the same was satisfactory. Monsoon set in a week later than the usual date of 7th *June* in the division. Heavy and widespread rains were received in the second fortnight of June in the Kokan, whereas moderate to heavy rains were received in the remaining districts of the division. Sowing of paddy in seed beds was completed in the Konkan while that of cotton, groundnut and kharif jowar was undertaken in the desh area. Widespread rains were received in the month of *July* facilitating completion of paddy transplanting in Ratnagiri district while that in Thana and Kolaba districts was in progress. These rains however, proved to be insufficient in Kolaba district and the growth of paddy seedlings was affected to some extent at places in the district. Sufficient rains were received in the desh area as a result of which kharif sowings were completed. In the month of *August*, the rainfall received was generally adequate facilitating completion of paddy and nagli transplanting in Thana, Kolaba and western part of Nasik-district in early August. There were heavy showers and cyclonic rains on the 7th August in Bassein, Dahanu and Palghar talukas of Thana district due to which horticultural crops in particular viz. banana and chikku were damaged to a considerable extent. The rains proved to be rather excessive in the second fortnight of the month in Dhulia and Jalgaon districts and parts of Nasik district as a result of which growth of groundnut crop was affected particularly in Jalgaon district. Break in rains was required for the healthy development of kharif crops in the area. In the eastern parts of Nasik district however, more rains were required for the proper development of the kharif crops. In the month of *September*, intermittent rains were received in the division. The condition of standing kharif crops was generally satisfactory except in Jalgaon district where the cotton crop was affected at places due to sporadic rains in the later part of the month. Harvesting of early paddy, mug, udid and bajri was in progress. Light showers were received in early *October* in most parts of the division. The rains received in the early part of October facilitated timely sowing of rabi crops in the desh area. In Nasik district however, sporadic rains were received in the second week of October but more

rains were required in Chandor taluka. Harvesting of kharif crops was in full swing in the division while the condition of standing kharif crops was generally satisfactory. Scanty showers were received in the month of *November*. There were practically no rains in the month of *December* and harvesting of kharif crops was completed. Sowing of rabi crops was completed in the division while that of hot weather paddy, which was undertaken in Ratnagiri and Kolaba districts, was continued. The sowing of hot weather crop was over in early *January* 1965. The condition of rabi crops was satisfactory in the month, except in 10 villages of Shahada taluka of Dhulia district where they were affected due to cyclone on the 8th January 1965. Due to hail-storm in the same month, standing rabi crops in three villages of Malegaon taluka of Nasik district and a few villages in Bhadgaon Peta of Jalgaon district were damaged to some extent. Wal and gram crops thrive well in Thana district while growth of rabi crops was rather stunted in the eastern parts of Sinnar, Niphad, Chandor and Yeola talukas of Nasik district due to inadequacy of soil moisture. During the period from *February* to *March*, harvesting of rabi crops was completed all over the division. The condition of summer and garden crops was satisfactory in the Konkan.

As regards crop pests and plant diseases, paddy was affected by incidence of army-worms in small pockets of Malwan and Kudal talukas of Ratnagiri district and a slight attack of blight and blue beetles in Kolaba district. Bajri was affected by ergot disease in a few villages of Nasik district, Kharif Jowar by stem borer in Dhulia district, groundnut by aphids and ticca in Jalgaon and Dhulia districts, chillies by leaf curl in Jalgaon and parts of Dhulia district; cotton by dahiya in Jalgaon district, and sugarcane by pyrilla in parts of Nasik district. Remedial measures were immediately adopted in the affected areas. Incidence of black-quarter in cattle was reported from parts of Nasik district. Control and preventive measures were taken in the affected areas.

*Poona Division.*—Heavy pre-monsoon showers accompanied by thunderstorm were received in *May* in parts of Satara district and stray showers in other parts of the division. Sowing of Deviraj cotton commenced in parts of the division, and germination of the same was satisfactory. The monsoon set in on time in the month

of *June* except in parts of Satara, Poona and Sholapur districts where the rains were either absent or inadequate. Elsewhere in the division, substantial rains were received facilitating time by completion of sowing operations of kharif crops in districts other than Ahmednagar and Sholapur where more rains were needed for the purpose. In the month of *July* insufficient rains were received in parts of the division. Consequently, sowing of bajri and groundnut was delayed in parts of Ahmednagar and Sholapur districts while transplanting of paddy and nagli was held up in Poona, Satara and Kolhapur districts; elsewhere, sowing of kharif crops was completed. Seedlings of paddy were affected in Mawal taluka of Poona district due to inadequate soil moisture. Heavy rains were received in the month of *August* in Satara district but they were unevenly distributed and proved excessive in western part of the district but inadequate in Man, Phaltan and Khandala talukas. Due to widespread rains in Kolhapur district in the first fortnight of August, the rivers were in spate and the crops in the low lying areas adjoining the river banks were submerged. However due to subsequent dry weather, no serious damage was caused. Transplanting of paddy and nagli wherever held up was completed. Kharif crops on the whole were thriving well excepting bajri crop which was affected to some extent in parts of Poona, Ahmednagar and Sholapur districts due to inadequate rains. Adequate rains were received in the month of *September* in the division except in Velhe, Mulshi, Haveli and Baramati talukas of Poona district and Khandala, Man and Phaltan talukas of Satara district where more rains were required for the proper growth of the standing kharif crops. Harvesting of bajri, mung and udid was in progress and in general, condition of kharif crops was satisfactory. Sowing of rabi jowar was undertaken and completed in most parts of the division. The intermittent rains during the month of *October* damaged standing crops of kharif jowar and groundnut in Sangli district to some extent. Harvesting of early paddy was in progress in Satara and Kolhapur districts. More rains were urgently needed in Ahmednagar district for the proper growth of rabi crops.

In the month of *November*, good showers were received in Ahmednagar district and in parts of Satara and Sangli districts. Harvesting of kharif crops was nearly completed in the division. At the

end of second week of *December*, 1964, rains received in Ahmednagar district proved beneficial to rabi crops. A few showers, were received in the month of *January* 1965 in parts of Poona, Satara and Sangli districts. The condition of standing rabi crops was reported to be satisfactory. Excepting for a few showers in parts of Ahmednagar district, the weather was dry during *February* and *March*. Harvesting of rabi jowar and gram was almost over and that of unirrigated wheat was nearing completion.

As regards crop pests and diseases, incidence of blast and army-worms on paddy in parts of Kolhapur district, aphids on groundnut and tobacco in parts of Kolhapur district, aphids on groundnut and mung in Ahmednagar district and Jassids, ballworms and black-arm on cotton in parts of Ahmednagar and Poona districts, were reported. Severe attack of anthracnose on chillies in parts of Sholapur district, and sugary disease on rabi jowar were also observed in Ahmednagar, Sholapur and parts of Satara districts. Necessary plant protection measures were resorted to in the affected areas.

*Aurangabad Division.*—Light premonsoon showers were received in April and May in the division facilitating preparatory tillage operation for the ensuing kharif season. Sowing of Deviraj cotton commenced in parts of the division and the germination of the same was satisfactory. The monsoon commenced rather later than usual and the sowings of kharif crops were undertaken in the second fortnight of *June*. The rains, however, proved inadequate for kharif sowings in parts of Parbhani, Aurangabad, Bhir and Osmanabad districts. Moderate rains received in the month of *July* facilitated completion of the sowing operations in the division. In the month of *August*, moderate and well distributed rains were received due to which kharif crops thrived well except in parts of Osmanabad district where adequate rains were not received. Rains received in the month of *September* proved beneficial to the standing kharif crops. Harvesting of mung was nearing completion while sowing of rabi crops was in progress. There were rains in the first fortnight of *October*. Harvesting of bajri was completed, that of paddy was in progress and sowing of rabi crops was nearing completion. There were few showers in parts of the division in the month of *November*. More rains were required for healthy growth of rabi

crops in Aurangabad district. Harvesting of bajri and paddy was over while that of jowar and picking of cotton were in progress. There were no rains in the month of *December*, in the division. Picking of cotton was in progress, while harvesting of jowar was over. There were few showers during the month of *January* 1965. Condition of rabi crops was not encouraging due to shortage of soil moisture in parts of the division. Harvesting of gram and minor rabi crops had started. During the months of *February* and *March*, scattered showers were received in the division. Harvesting of rabi crops was over.

Dahiya on cotton was observed in Parbhani and Nanded districts. Incidences of jassids and thrips on cotton crop in Bhir, pyrilla on sugarcane in Nanded, sugary disease on rabi jowar in Parbhani and Bhir districts and aphids and ticca on groundnut in Nanded, Bhir and Osmanabad districts were reported. Prompt remedial measures against these pests and diseases were taken in the affected areas.

*Nagpur Division.*—Pre-monsoon rains, received in the month of *April* 1964 facilitated preparatory tillage operations for the ensuing kharif season. The monsoon set in, in the second fortnight of *June* with widespread and sufficient rains, facilitating sowing of kharif crops on a large scale in the division. Moderate rains were received in the first and the last week of *July* in all the districts except Wardha, Nagpur, Bhandara and Chanda where due to insufficient rains paddy transplanting was delayed. Elsewhere sowing of kharif crops was completed. Heavy and continuous rains were received in the month of *August* in Buldhana, Akola and Wardha districts due to which areas adjoining the river banks were hit hard by the floods of rivers and nallas causing damage to the standing kharif crops. Resowing of kharif jowar was carried out in the affected area of Balapur taluka of Akola district. The growth of the early sown crops was stunted and weeding and interculturing operations were suspended in the districts of Amraoti, Yeotmal, Wardha and Nagpur, however, substantial rains were received which proved beneficial for the proper growth of standing kharif crops. In Nagpur district, the growth of paddy seedlings was stunted due to inadequate rains in the first fortnight of the month. Due to heavy rains received subsequently paddy transplanting, wherever held up, was nearly completed. Widespread rains were received in the division in the month

of *September* due to which the condition of standing kharif crops, other than cotton, improved excepting in Bhandara and Chanda districts where more rains were required for the healthy growth of paddy crop. Harvesting of bajri, groundnut and pulse crops was started while sowing of rabi jowar and sesamum was undertaken in Chanda district. In the first week of *October*, moderate rains were received all over the division enabling large scale rabi sowing. The growth of late paddy crop in Bhandara district and kharif crops in Jalgaon, Malkapur and Khamgaon talukas of Buldhana district, Morshi of Amraoti district was affected due to inadequacy of rains. Picking of cotton and harvesting of other kharif crops including early paddy were in progress. In the month of *November*, some showers were received in parts of Nagpur and Chanda districts which proved untimely to cotton and kharif jowar in area. Harvesting of kharif crops was in full swing while sowing of rabi crops was nearing completion. There were no rains in the month of *December*. Harvesting of kharif jowar, tur and picking of cotton was in progress. The condition of standing rabi crops was satisfactory in the division. In the month of *January*, there was hailstorm in a few villages of Chikhali and Khamgaon talukas of Buldhana district and a few villages in Balapur taluka of Akola district due to which irrigated crops in the affected villages were damaged to a considerable extent. Elsewhere few showers were received in the division. There were light and scattered showers in the months of *February* and *March*. Harvesting of late kharif crops was over by February while that of rabi crops was completed by the end of March.

As regards crop pests and diseases, paddy was attacked by gall fly in July and case-worms in September in parts of Bhandara district. Incidence of aphids and jassids on Buri cotton, dahiya on deshi cotton and aphids on groundnut was reported from Buldhana, Akola, Wardha and Nagpur districts. Heavy attack of swarming caterpillars on paddy was reported from Chanda and Bhandara districts. Necessary plant protection measures were undertaken in the affected areas.

---

## CHAPTER II

## AREAS CULTIVATED AND UNCULTIVATED

(Table-II Pages 60-61)

(Summary Table-A Page 42)

4. *Number of Villages.*—During the year under report the number of villages in the State was 38,980 as against 38,989 during the previous year thus showing a decrease of 9 villages. The decrease was due to amalgamation of smaller villages into bigger ones in Kolaba, Ratnagiri and Jalgaon districts.

5. *Total area.*—The total area i.e. the geographical area of Maharashtra State was 760,31,900 acres during the year under report as against 760,41,800 acres during the year 1963-64. This variation in the area was mostly due to estimated area figures for forests under Forests Department particularly in Dhulia, Wardha Nagpur, Bhandara and Chanda districts of the State.

6. *Cropped areas.*—The gross cropped area in the State showed a slight increase of 0.2 per cent over that of the previous year it being 474,85,500 acres and 473,81,100 acres during 1964-65 and 1963-64 respectively. The net cropped area also showed an increase of 0.4 per cent having gone up from 449,20,200 in 1963-64 to 451,06,600 acres in 1964-65. During the year under report, the acreage under forests and current fallows recorded an increase of 0.4 per cent and 2.0 per cent respectively over the corresponding figures of the previous year, while the area under barren and unculturable land, land put to non-agricultural uses, culturable waste, permanent pastures and other grazing lands, land under miscellaneous tree crops and groves not included in the area sown and other fallows showed a decrease of 1.3 per cent, 1.3 per cent, 5.9 per cent, 1.6 per cent, 1.0 per cent and 1.1 per cent respectively. The area sown more than once also recorded a decrease of 3.5 per cent during the year. This decrease was mainly noticed in the districts of Nasik, Dhulia, Poona, Sangli and Kolhapur.

---

CHAPTER III  
IRRIGATED AREAS

(Table III-A and III-B, pages 62-74)

(Summary Tables B and C, pages 43-46)

7. *Sources of water supply.*—During the year 1964-65 the number of Government canals reported was 591 as against 580 in the previous year, thus recording a slight increase of 1.9 per cent. There was also increase in the mileage of these canals from 2,362 to 2,444 i. e. by 3.5 per cent. The number of private canals showed a decrease of 1.4 per cent, the corresponding figures being 7,707 and 7,600 in 1963-64 and 1964-65 respectively. The mileage of these canals also decreased by 0.9 per cent. The number of tube wells recorded an increase of 44.8 per cent, the same having gone up from 116 in 1963-64 to 168 in 1964-65. The increase was mostly on private account. Number of wells (other than tube wells) used for irrigation purposes increased from 5,84,122 in 1963-64 to 6,03,672 in 1964-65 i. e. by 3.3 per cent. Number of wells used for domestic purposes and number of wells not in use, showed a decrease of 3.1 per cent and 3.9 per cent respectively, while the number of wells having independent ayacuts and the number of wells supplementing recognised sources of irrigation recorded an increase of 19.3 and 46.6 per cent. respectively. The number of reservoirs did not change appreciably. The number of tanks with ayacut 100 acres or more showed an increase of 11.5 per cent while those with ayacut less than 100 acres declined by 0.8 per cent. The number of oil engines showed an increase of 8.5 per cent having gone up from 71,196 in 1963-64 to 77,232 in 1964-65.

8. *Irrigated Areas.*—The total irrigated area in the State was 33,70,300 acres during the year under report as against 32,46,500 acres during 1963-64, thus showing an increase of 3.8 per cent. The net irrigated area during the year under report was 29,42,100 acres and showed an increase of 3.5 per cent over that of 28,42,200 acres in the year 1963-64. During the year under report, the percentage of net area irrigated to the net area sown was 6.5 per cent

as against 6.3 per cent in the preceding year and that of the gross area irrigated to gross area sown was 7.1 per cent as against 6.8 per cent in 1963-64.

9. *Net area irrigated under different sources of irrigation.*—Net area irrigated by tanks, wells and other sources went up by 14,100, 79,200 and 12,500 acres or by 2.8 per cent, 4.9 per cent and 12.0 per cent respectively. On the other hand, area irrigated by Government canals slightly decreased by 9,800 acres or by 1.8 per cent while area irrigated by private canals increased by 3,900 acres or by 5.1 per cent.

10. *Irrigated areas under food and non-food crops.*—Out of the total irrigated area during the year under report, 30,32,000 acres was under food crops and 3,38,300 acres under non-food crops. Area irrigated under food crops showed an increase of 5.4 per cent over that of the previous year, the areas in 1963-64 and 1964-65 being 28,75,700 acres and 30,32,000 acres respectively.

The rise was appreciable in the case of wheat, bajri, sugarcane and miscellaneous food crops, mostly inclusive of area under fruits and vegetables, the irrigated acreages under these crops having gone up by 9.9 per cent, 13.4 per cent, 15.9 per cent and 14.6 per cent respectively. The area irrigated under non-food crops declined to 3,38,300 acres in the year 1964-65 from 3,70,800 acres during 1963-64 or by 8.8 per cent.

The decrease in the irrigated acreage was mainly shared by cotton, coconut, fodder crops and miscellaneous non-food crops, the irrigated acreage under these crops having gone down by 10.6, 11.2, 12.2 and 30.6 per cent respectively.

---

## CHAPTER IV

## CROPPED AREAS

(Tables IV-A, IV-B and IV-C, pages 76 to 101)

(Summary Table D, pages 47-49)

1 1. *Total area under crops.*—The accompanying table (at page 20-21) gives areas under food and non-food crops, the gross cropped area, area sown more than once, net cropped area and area under principal crops for each division and for the State during the years 1963-64 and 1964-65. The gross cropped area during the year under report was 4,74,85,500 acres. It was higher by 1,04,400 acres or by 0.2 per cent than the corresponding area 4,73,81,100 acres during the preceding year. The divisionwise gross cropped area was 87,27,900 acres in the Bombay division, 1,36,29,300 acres in Poona division, 1,23,30,900 acres in the Aurangabad division and 1,27,97,400 acres in the Nagpur division and was just higher than that of the previous year by 0.4 per cent 0.8 per cent and 1.2 per cent in Bombay, Aurangabad and Nagpur divisions respectively while it was lower by 1.2 per cent in Poona division.

The area sown more than once i. e. area (mainly under double cropping) showed a slight decrease of 3.3 per cent during the year under report having gone down from 24,60,900 acres in 1963-64 to 23,78,900 acres during 1964-65. This was due to the decrease to the extent of 13.6 and 21.6 per cent in the Bombay and Poona divisions respectively, the area increased in Aurangabad and Nagpur divisions by 16.6 per cent and 14.3 per cent respectively. The net cropped area during the year under report was 4,51,06,600 acres and was higher by 1,86,400 acres or by 0.4 per cent than the corresponding area of 4,49,20,200 acres during the preceding year. This increase was shared by all the divisions except Aurangabad where it slightly decreased viz., by 0.1 per cent over the corresponding figure in the preceding year.

For the State as a whole, foodcrops occupied an area of 3,33,08,600 acres or 70.1 per cent of the total gross cropped area while the remaining 1,41,76,900 acres (i. e. 29.1 per cent) were brought under non-food crops. The state area under food and non-food crops

showed an increase of 0.3 per cent and 0.1 per cent or by 83,300 acres and 21,100 acres respectively as compared with the corresponding figures of the preceding year.

The table below gives the area under food and non-food crops in all the divisions of the state during the years 1963-64 and 1964-65.

Area in ("00" acres) under :

Division	Food crops			Non-food crops		
	1963-64	1964-65	Percentage increase (+) or decrease (-)	1963-64	1964-65	Percentage increase (+) or decrease (-)
1	2	3	4	5	6	7
Bombay	59,866	59,806	+ 0.7	27,568	27,473	- 0.3
Poona	1,07,923	1,06,242	- 1.0	30,660	30,051	- 2.0
Aurangabad	86,609	86,898	+ 0.4	35,875	36,411	+ 1.5
Nagpur	79,055	80,140	+ 1.4	47,460	47,834	+ 0.8
State	8,32,253	8,33,086	+ 0.3	1,41,558	1,41,769	+ 0.1

It is seen that the area under food crops increased by 44,000; 38,900 and 1,08,500 acres or by 0.7, 0.4 and 1.4 per cent in Bombay, Aurangabad and Nagpur divisions respectively while in Poona division, it decreased by 1,08,100 acres or by 1.0 per cent as compared to the corresponding areas of the previous year. Under non-food crops, Aurangabad and Nagpur divisions recorded an increase of 53,600 acres and 37,400 acres or 1.5 per cent and 0.8 per cent respectively. In Bombay and Poona divisions, on the other hand, the area decreased by 9,000 acres and 60,900 acres or by 0.3 and 2.0 per cent respectively.

12. *Food crops*.—Among the main food crops the area under rice as compared with that of the last year increased by 1.4 per cent or by 47,500 acres. This increase was shared by all the divisions except Poona where it decreased by 2.4 per cent. At the state level the area under wheat showed a slight decrease of 0.3 per cent or by

5,500 acres. The decrease was mainly noticed in Nagpur division, where the area under wheat was lower by 35,400 acres or by 4.3 per cent. In the remaining three divisions of Bombay, Poona and Aurangabad it recorded an increase of 5.0 per cent, 2.4 per cent and 1.2 per cent respectively. The area under kharif jowar increased by 1.6 per cent having gone up to 63,01,600 acres in 1964-65 from 62,01,500 acres in 1963-64. This increase was shared by Aurangabad and Nagpur divisions where it recorded a rise of 99,000 acres and 33,000 acres or by 5.1 per cent and 1.1 per cent respectively. Area under rabi-jowar declined by 3.4 per cent having gone down from 90,03,500 acres during 1963-64 to 86,99,100 acres in 1964-65 due to less favourable season during the sowing period of the crops. This decrease was shared by all the divisions of the state to the extent of 11.0 per cent, 2.8 per cent, 3.7 per cent and 0.6 per cent in Bombay, Poona, Aurangabad and Nagpur divisions respectively. Area under bajari recorded an increase of 2.0 per cent having risen from 42,13,000 acres in 1963-64 to 42,98,700 acres in the year 1964-65. This increase was shared by all the divisions. Area under all cereal crops together during the year 1964-65 was 2,60,07,500 acres as against 2,60,85,700 acres during the previous year, thus showing a slight decrease by 0.3 per cent. Area under pulses increased by 1.0 per cent having gone up to 59,40,400 acres in 1964-65 from 58,82,600 acres in 1963-64. The increase was due to increase in the area mainly under tur, urid and other pulses by 3.3 per cent, 4.7 per cent and 3.5 per cent respectively. Summing up, it is seen that the total area under foodgrains slightly decreased by 20,400 acres or by 0.1 per cent. Area under sugarcane increased by 53,500 acres or by 15.8 per cent having gone up to 3,92,100 acres during 1964-65 from 3,38,600 acres in the year 1963-64.

13. *Non-food crops*.—Among the non-food crops the area under cotton showed an increase of 52,700 acres or by 0.8 per cent over the corresponding area of the previous year. This increase was shared by all the divisions except Poona where it decreased by 66,700 acres or by 28.3 per cent. The area under groundnut, however, decreased by 1.2 per cent it being 27,72,600 acres during 1964-65 as compared with that of 28,06,900 acres in the previous year. This decrease was mainly due to decrease in the area in Bombay and Nagpur divisions to the extent of 6.6 per cent and 2.0 per cent respectively. During the year under report the area under

tobacco decreased by 3,700 acres or by 8.4 per cent and this decrease was shared by Poona and Aurangabad divisions and was of the order of 8.8 and 7.4 per cent respectively.

14. On the whole, during the year under report, the gross cropped area showed a slight increase of 0.2 per cent as compared with the corresponding area of the preceding year.

The double cropped area declined slightly by 3.3 per cent while there was an increase of 0.4 per cent in the net cropped area in the State. The area under food and non-food crops showed an increase of 0.3 and 0.1 per cent respectively during the year under report.

## CHAPTER V

## OUTTURN OF CROPS AND THEIR AVERAGE YIELDS

( Tables V-A and V-B pages 102-144 )

( Summary table E page 50 )

15. *Outturn of crops.*—The table below gives the total outturn in tons of kharif and rabi crops in the four divisions of the State.

( Figures in hundreds )

Division	Kharif crops			Rabi crops			Total		
	Cereals	Pulses	Total	Cereals	Pulses	Total	Cereals	Pulses	Total
1	2	3	4	5	6	7	8	9	10
	Tons	Tons	Tons	Tons	Tons	Tons	Tons	Tons	Tons
Bombay ...	12,419	1,217	13,636	1,939	204	2,142	14,357	1,421	15,778
Poona ...	8,289	1,155	9,444	8,002	359	8,361	16,291	1,514	17,805
Aurangabad..	5,017	2,131	7,228	7,104	327	7,431	12,201	2,458	14,659
Nagpur ...	12,202	2,455	14,657	2,390	597	2,987	15,092	3,052	18,144
State ...	38,007	6,958	44,965	19,934	1,487	21,421	57,941	8,445	66,386

From the above table, it is seen that at the State level, the production of cereals and pulses was 66,38,600 tons of which 44,96,500 tons was of kharif crops while the remaining 21,42,100 tons was contributed by rabi crops. The production of cereals alone was 57,94,100 tons while that of pulse was 8,44,500 tons. Amongst the divisions, the highest production of foodgrains was of the order of 18 lakh tons in each of the divisions, Nagpur and Poona followed by Bombay and Aurangabad where it was of the order of 16 lakh and 15 lakh tons respectively.

The remarks in respect of the production of major crops are given below :—

*Rice.*—The rains received in the months of July, August and September were well distributed in the Konkan region excepting Kolaba district where rains proved to be rather inadequate. The rains

in the Poona and Nagpur divisions were rather inadequate in the month of July due to which transplanting operations were held up. In Aurangabad division, however, due to moderate and well distributed rains, paddy throw well. Due to cyclone on the 7th August, paddy crop was affected in Thana district. There was a slight attack of blight and blue beetle in Kolaba district, blast and army-worms in parts of Poona division while that of paddy gall fly and case-worms was reported from Bhandara district.

Timely remedial and preventive measures were resorted to in the affected areas. The area increased from 33,37,900 acres in 1963-64 to 33,85,400 acres or by 1.4 per cent in 1964-65. However, the outturn went down from 14,89,100 tons to 14,31,600 tons or by 3.9 per cent.

*Wheat.*—The condition of the crop was quite fair in all the divisions. The crop suffered due to hailstorm in the month of January to some extent in parts of Dhulia and Jalgaon districts. Although the area decreased from 21,95,800 acres to 21,90,300 acres or by 0.3 per cent in 1964-65 due to inadequacy of soil moisture at the sowing period the production increased from 3,36,500 tons to 4,01,300 tons or by 19.3 per cent due to comparatively better season this year.

*Kharif jowar.*—During the year under report the crop fared well in all the divisions except Poona division where the average yield was lower than that of the previous year. Incidence of stemborer on jowar was reported from Dhulia district. The area under the crop increased from 62,01,500 acres to 63,01,600 acres or by 1.6 per cent and the production increased from 14,72,600 tons to 16,61,800 tons or by 12.8 per cent.

*Rabi jowar.*—The crop suffered to a varying extent due to scanty rains in some of the districts. Sugary disease affected the crop in Ahmednagar, Sholapur, and parts of Satara districts. Control measures were resorted to in the affected areas. The condition of the crop on the whole was satisfactory. The area under the crop showed a decrease from 90,03,500 acres in 1963-64 to 86,99,100 acres in 1964-65 or by 3.4 per cent. The outturn also marked a decrease from 16,78,800 tons in 1963-64 to 15,45,600 tons in 1964-65 or by 7.9 per cent.

*Bajri*.—Incidents of ergot disease, was reported from parts of Nasik district. There were practically no major pests and diseases reported on the crop. The crop fared well in all the divisions of the State. Though the sowings were delayed in Ahmednagar and Sholapur districts, the area under the crop increased from 42,13,100 acres to 42,98,700 acres in the year 1964-65 or 2.0 per cent. The increase was distributed in all the divisions. The outturn also showed an increase of 1.4 per cent, the increase being from 4,64,100 tons in the year 1963-64 to 4,70,700 tons during the year under report.

*Ragi*.—The crop thrived well during the season. The area under ragi increased from 5,57,200 acres in the year 1963-64 to 5,69,800 acres in 1964-65 or by 2.3 per cent while the production increased from 1,61,800 tons to 1,85,300 tons in the year under review or by 14.9 per cent. The outturn for the districts of Ratnagiri, Nasik, Thana, Kolaba, Poona and Kolhapur have been estimated on the basis of sample survey data while for the remaining districts, the estimates are based on the anna valuations reported by the Collectors.

*Gram*.—The condition of the crop during the year under report in all parts of the State was satisfactory. The area under the crop showed a decrease from 9,28,100 acres in 1963-64 to 8,87,300 acres in 1964-65 or by 4.4 per cent. However the production increased from 1,13,100 tons to 1,19,400 tons or by 5.6 per cent resulting due to substantial increase in the average yield.

*Cotton*.—The crop was affected by Dahiya practically all over the State. Blackarm on cotton was reported from parts of Ahmednagar and Poona districts while aphids and jassids were reported from parts of Deccan and Vidarbha districts. Prompt control measures were resorted to. Floods in Dhulia district also damaged the crop to some extent. Untimely rains in the months of November and December damaged the crop considerably. The area under the crop went up from 69,24,500 acres to 69,77,200 acres or by 0.8 per cent. The production, however, decreased from 14,50,500 in 1963-64 to 12,66,000 bales of 392 lb. each in 1964-65 or by 12.7 per cent during the year under review.

16. *Yield per acre*.—During the year under report, the yield-rates were obtained on the basis of the data of Statewise crop estimation surveys covering the nine principle crops viz. paddy, kharif jowar,

bajri, wheat, rabi jowar, gram, cotton, tobacco and groundnut while the survey on ragi covered Ratnagiri, Thana, Nasik and Kolhapur districts and that on tur covered the Nagpur division.

17. *Kharif crops*.—The State as well as the divisionwise average yield estimates per acre of kharif crops based on the survey data are given below :

Division	Yield per acre								
	Rice			Kharif Jowar			Bajri		
	1963-64	1964-65	Percentage increase (+) or decrease (-)	1963-64	1964-65	Percentage increase (+) or decrease (-)	1963-64	1964-65	Percentage increase (+) or decrease (-)
1	2	3	4	5	6	7	8	9	10
	lb.	lb.		lb.	lb.		lb.	lb.	
Bombay	1,229	1,189	-3.2	770	977	+26.9	319	335	+5.0
Poona	1,017	847	-16.7	955	880	-7.8	209	179	-14.3
Aurangabad	603	613	+1.7	480	494	+2.9	219	272	+24.2
Nagpur	853	834	-2.2	419	521	+24.3	218	215	-1.4
State	999	947	-5.2	532	591	+11.1	247	245	-0.8

From the above table, it can be seen that the State average yield per acre of rice decreased from 999 lb. to 947 lb. or by 5.2 per cent. This decrease was shared by all the divisions except Aurangabad division where it showed a nominal increase of 1.7 per cent. In the case of kharif jowar, the State average yield showed an increase of 59 lb. or by 11.1 per cent.

This increase was observed mostly in Bombay and Nagpur divisions and was of the order of 26.9 per cent and 24.1 per cent respectively and to a small extent in Aurangabad division, where the increase was 2.9 per cent only. In Poona division however there was a decrease of 7.8 per cent. The State average yield per acre of bajri decreased very slightly by 0.8 per cent. This was mainly due to the lower yield in the Poona division by 30 lb. or by 14.3 per cent. On the other hand an increase of 21.2 per cent and 5.0 per cent was noticed in the Aurangabad and Bombay divisions respectively.

The average yields per acre of tur and sesamum (based on annual valuation figures of the revenue department, except for tur in respect of the Nagpur division for which crop survey data were used) for the different divisions of the State are as shown below :—

Division	Yield per acre					
	Tur			Sesamum		
	1963-64	1964-65	Percentage increase (+) or decrease (-)	1963-64	1964-65	Percentage increase (+) or decrease (-)
1	2	3	4	5	6	7
	lb.	lb.		lb.	lb.	
Bombay ...	527	490	-7.0	244	238	-2.5
Poona ...	529	541	+2.3	203	201	-1.0
Aurangabad ...	319	307	-3.8	173	186	+7.5
Nagpur ...	810	751	-7.3	180	192	+6.7
State ...	568	537	-5.5	192	200	+4.2

The average yield of tur at the State level decreased from 568 lb. in 1963-64 to 537 lb. in 1964-65 or by 5.5 per cent. The decrease in the yield was shared by all the divisions except Poona division where there was a slight increase in yield by 2.3 per cent. The decrease in the yield was mainly noticed in the Nagpur and Bombay divisions where it was of the order of 7.3 per cent and 7.0 per cent respectively. In Aurangabad division, the yield declined by 3.8 per cent. In case of sesamum, the State average yield registered an increase from 192 lb. per acre in 1963-64 to 200 lb. per acre in 1964-65 or by 4.2 per cent. This was due to an increase in yield in Aurangabad and Nagpur divisions by 7.5 per cent and 6.7 per cent respectively. The decrease in yield in Bombay and Poona divisions was of the order of 2.5 per cent and 1.0 per cent respectively.

18. *Rabi crops*.—The State and the divisionwise average yields per acre of the rabi crops based on crop estimation survey data are as under:—

Division	Yield per acre					
	Wheat			Rabi jowar		
	1963-64	1964-65	Percentage increase (+) or decrease (-)	1963-64	1964-65	Percentage increase (+) or decrease (-)
1	2	3	4	5	6	7
	lb.	lb.		lb.	lb.	
Bombay	435	452	+ 3.9	511	410	-19.8
Poona	429	452	+ 5.4	376	373	- 0.8
Aurangabad	343	376	+ 9.6	489	436	-10.8
Nagpur	279	405	+45.2	379	435	+14.8
State	343	410	+19.5	418	398	- 4.8

The average yield of wheat at the State level increased from 343 lb. in 1963-64 to 410 lb. in 1964-65 or by 19.5 per cent. The increase was mainly in Nagpur division from 279 lb. in 1963-64 to 405 lb. in 1964-65 or by 45.2 per cent. In case of rabi jowar, the State average yield showed a decrease of 4.8 per cent, from 418 lb. in 1963-64 to 398 lb. in 1964-65. This decrease was shared by all the divisions except Nagpur division where it showed an increase of 14.8 per cent i. e. from 379 lb. in 1963-64 to 435 lb. in 1964-65. The yield declined in Bombay and Aurangabad divisions by 19.8 per cent and 10.8 per cent respectively. The average yield per acre of other rabi crops viz. gram (based on crop estimation surveys), linseed and rape

and mustard (based on the anna-valuation figures of the revenue department) for the different divisions in the State are given below:—

Division	Yield per acre (in lbs.)								
	Gram			Linseed			Rape and Mustard		
	1963-64	1964-65	Percentage increase (+) or decrease (-)	1963-64	1964-65	Percentage increase (+) or decrease (-)	1963-64	1964-65	Percentage increase (+) or decrease (-)
	2	3	4	5	6	7	8	9	10
Bombay ...	311	329	+ 5.8	292	354	+21.2	172	172	...
Poona ...	286	324	+13.3	179	211	+17.9	...	...	...
Aurangabad ...	265	282	+ 6.4	184	186	+ 1.1	134	129	- 3.7
Nagpur ...	257	307	+19.4	189	183	- 3.2	172	204	+13.6
State ...	273	301	+10.3	188	185	- 1.6	151	146	- 3.3

For gram, the State average yield showed an increase of 10.3 per cent having gone up from 273 lb. in 1963-64 to 301 lb. in 1964-65. This increase was shared by all the divisions particularly by Nagpur and Poona divisions and was of the order of 19.4 per cent and 13.3 per cent respectively. The State average yield of linseed and rape and mustard declined by 1.6 per cent and 3.3 per cent respectively, the estimates for linseed being 188 lb. and 185 lb. and for rape and mustard 151 lb. and 146 lb. in 1963-64 and 1964-65 respectively.

19. *Cotton, Sugarcane and Tobacco.*—The table below gives the average yield per acre of cotton (lint) (based on crop estimation surveys), sugarcane (gur) (based on anna-valuation figures of the revenue department) and tobacco (based partly on crop estimation surveys in the major crop growing districts and partly on anna-valuation figures of the revenue department).

Division	Yield per acre (in lb.)								
	Cotton (lint)			Sugarcane (Gur)			Tobacco		
	1963-64	1964-65	Percentage increase (+) or decrease (-)	1963-64	1964-65	Percentage increase (+) or decrease (-)	1963-64	1964-65	Percentage increase (+) or decrease (-)
	2	3	4	5	6	7	8	9	10
Bombay ...	114	84	-26.3	6,005	4,940	-17.7	...	...	...
Poona ...	160	124	-22.5	8,066	7,674	- 4.9	442	423	- 4.3
Aurangabad ...	80	54	-10.0	8,918	8,776	- 3.6	322	443	+34.9
Nagpur ...	79	74	- 6.3	2,593	2,627	+ 1.1	407	204	-49.9
State ...	82	71	-13.4	7,170	6,767	- 5.3	432	416	- 3.7

The State average yield of cotton (lint) declined from 82 lb. in 1963-64 to 71 lb. in 1964-65 or by 13.4 per cent. This decrease was noticed in all the divisions and was of the order of 26.3 per cent, 22.5 per cent, 10.0 per cent and 6.3 per cent in the divisions of Bombay, Poona, Aurangabad and Nagpur respectively. The average yield varied from 54 lb. in the Aurangabad division to 124 lb. in the Poona division. The comparatively high yield in the Poona division was on account of the fact that irrigated area formed 57.0 per cent of the total area in the division, the yield of irrigated crop being much higher than that of the dry crop. The irrigated area in the remaining divisions was negligible and did not exceed 1.0 per cent.

In the case of sugarcane, the State average yield of gur recorded decrease of 5.3 per cent having fallen from 7,170 lb. in 1963-64 to 6,787 lb. in 1964-65 and this decrease was mainly in Bombay division. A slight increase of 1.1 per cent was recorded in Nagpur division only.

The State average yield of tobacco (dry leaf) recorded a decrease of 3.7 per cent, the same being 432 lb. and 416 lb. in 1963-64 and 1964-65 respectively. The decrease was shared by Nagpur and the Poona divisions and was of the order of 49.9 per cent and 4.3 per cent. In the Aurangabad division, the yield per acre increased by 34.9 per cent.

20. *Cotton*.—During the year under report, the total area and outturn of cotton were 6,977,200 acres and 12,06,000 bales (of 392 lb. each) as against 6,925,000 acres and 1,450,500 bales respectively during the preceding year. Thus there was a nominal increase of 0.7 per cent in the area and a considerable decrease of 12.7 per cent in the outturn of the crop. The table below gives the total area and outturn of cotton according to different divisions in the State during 1963-64 and 1964-65.

Division	Cotton						
	Area in '000' acres			Outturn in '000' bales of 392 lb.			
	1963-64	1964-65	Percentage increase (+) or decrease (-)	1963-64	1964-65	Percentage increase (+) or decrease (-)	
1	2	3	4	5	6	7	
Bombay	...	1,018	1,029	+ 1.1	297	220	- 25.9
Poona	...	286	169	- 28.4	97	54	- 44.3
Aurangabad	...	1,842	1,879	+ 2.0	284	260	- 8.4
Nagpur	...	8,820	8,899	+ 1.8	788	782	- 0.1
State	...	6,925	6,977	+ 0.7	1,451	1,266	- 12.7

## CHAPTER VI

## PRICES

(Table VI pages 145-150)

(Summary Table F page 51)

21. Table VI of the report gives the average prices, during the peak marketing period immediately after harvest of the principal crops in different districts of the State. The prices of agricultural produce except sugar (raw) ruled higher during the year under report in comparison with those of the preceding year.

22. The major variations, in the average farm harvest prices of principal commodities at the State level and in different divisions as compared with the prices during the corresponding period of the previous year are summarised below :

At the State level, the price of paddy viz. Rs. 24·61 per maund of 82·2/7 lb was higher by 27·6 per cent than that of the previous year. The price showed an increase of 54·1 per cent, 12·1 per cent and 13·8 per cent in Bombay, Poona and Aurangabad divisions respectively while it remained practically stationary in Nagpur division. The price of wheat, viz. Rs. 36·08 per maund was higher by 37·8 per cent than that of the preceding year at the State level. The increase was noticed in all the divisions and was of the order of 34·7 per cent, 28·5 per cent, 22·6 per cent, and 57·8 per cent, in Bombay, Poona, Aurangabad and Nagpur divisions respectively. The price of Jowar, at the State level viz. Rs. 18·15 was higher by 9·4 per cent than that of the preceding year, it being higher by 2·8 per cent, 2·7 per cent and 40·9 per cent than that of the preceding year in Poona, Aurangabad and Nagpur divisions respectively while it declined by 1·1 per cent in Bombay division. The price of Rs. 27·61 per maund of bajri at the State level was higher by 53·4 per cent as compared with that of the previous year. Higher price prevailed in all the division to the extent of 55·6 per cent, 52·0 per cent, 53·5 per cent, 73·2 per cent in Bombay, Poona, Aurangabad and Nagpur divisions respectively. The average price of Rs. 22·57 per maund of ragi (nachani) at the State level was practically of the same order as that of the preceding year. The price of maize viz. Rs. 22·15 per maund was higher by

47.6 per cent than that of the preceding year. Among the pulses the average price of Rs. 35.68 per maund of tur dal was higher by 17.5 per cent than that of the preceding year. The increase was noticed mainly in Poona and Nagpur divisions and was of the order of 27.0 per cent and 16.9 per cent respectively. In Aurangabad division the price namely Rs. 30.81 per maund was practically the same as that of the previous year. The price of gram viz. Rs. 37.91 per maund was higher by 89.6 per cent than that of the preceding year at the State level. The increase was shared by all the divisions being of the order of 93.4 per cent, 90.6 per cent, 92.7 per cent and 85.8 per cent in Bombay, Poona, Aurangabad and Nagpur divisions respectively. The average price of Rs. 33.11 per maund of gur declined by 3.02 per cent as compared with that of the previous year. The decrease was noticed in all the divisions and was to the extent of 8.3 per cent, 1.7 per cent 13.3 per cent and 8.2 per cent in Bombay, Poona, Aurangabad and Nagpur divisions respectively. The average price of groundnut at the State level viz. Rs. 32.68 increased by 33.4 per cent as compared with that of the previous year. The price was higher by 27.4, 32.8, 43.8 and 36.0 per cent in Bombay, Poona, Aurangabad and Nagpur divisions respectively. At the State level, the price of tobacco viz. Rs. 105.82 was higher by 8.2 per cent than that of the preceding year. The average price of cotton unginned (Kapas) viz Rs. 48.90 was higher by 8.02 per cent than that of the previous year at the State level. The increase was shared by all the divisions and was of the order of 11.3 per cent, 3.7 per cent, 12.4 per cent and 9.3 per cent respectively in Bombay, Poona, Aurangabad and Nagpur divisions.

23. The table below compares the prices of Vijay and Jarila/Virnar cotton ruling at Bombay during the year under review with those of the preceding year and the average of 5 years ending 1962-63.

Variety of cotton	Prices per 8 quintals			Compared with the	
	Average of the five years ending 1962-63	1963 -64	1964 -65	Average price	Price of 1962-64
	2	3	4	5	6
	Rs.	Rs.	Rs.		
Vijay	791	978	1,003	+ 26.80	+ 2.6
Jarila/Virnar	704	890	897	+ 21.52	+ 0.8

It is seen from the above table that as compared to average spot market price, the yearly average price of Virnar during the year under report increased nearly by 22 per cent where as the corresponding increase in case of Vijay was more and was of the order of 27 per cent. The rise in price over that of the last year was also more in the case of Vijay viz. about 3 per cent while in the case of Virnar it was nearly 1 per cent only.

The trend of the forward market cotton prices as reported in the Bombay Cotton Annual (1964-65) is summarised below for the period from September, 1964 in which the Indian Cotton Contract March 1965 delivery opened to March 1965 by which time practically the whole of the crop was picked and moved in the upcountry terminal markets.

During *September*, 1964 the prices of cotton declined to Rs. 726.50 on the 5th from Rs. 733 on the 1st due to selling pressure from upcountry centres and fair weather reports from Punjab, but recovered to Rs. 732.75 on the 7th due to reports of damage to crops in parts of Vidarbha. Easy spot prices caused some decline thereafter but reports of excessive rains pushed the prices upto Rs. 734.25 on the 23th. Thereafter, under the influence of the increase in Bank rate, the prices drifted lower to Rs. 726.50 on the 30th September and closed for the month at Rs. 726.75.

During *October*, the prices of cotton declined to Rs. 721.50 on 6th October, 1964 from Rs. 726 on the 1st October due to favourable crop reports. After moving narrowly from 7th to 16th, the prices gradually firmed up and touched Rs. 744.75 on the 27th on account of fresh buying by mills on rumours of limited availability of P. L. 480 cotton. Thereafter, the prices receded to Rs. 737 on the 28th and closed at higher rate of Rs. 743 for the month.

During *November*, the prices of cotton gradually advanced to Rs. 767.75 on the 17th due to the reports of damage to the crop of 197/3 and slow arrivals. Thereafter the prices declined to Rs. 759.75 and then gradually advanced to Rs. 775. On the 23rd, the prices remained at Rs. 766 due to the decision of the market commission to withdraw the free limit of 1,000 bales allowed for payment of deposits during delivery period, but again firmed up to Rs. 772.50 on the 31st and closed for the month at Rs. 771.50.

During *December*, the opening price of cotton was Rs. 771.25 and delivery dropped to Rs. 765.75 on the same day owing to heavy selling induced by reports of sizeable import quota and possibility of restrictive measures by Government to curb rising prices. However, it firmed up and touched Rs. 775 on the 4th and moved between Rs. 770.50 and Rs. 775 till 9th. Subsequently, there was practically no trading during the rest of the month.

During the month of *January*, there was practically not much trading but the increasing possibility of imports of American cotton and fears of requisitioning of cotton by Textile Commissioner caused a decline and prices ruled at Rs. 764.35 on the 22nd. However, due to short covering induced by closure of upcountry cotton markets in Vidarbha and central zone because of buyers' withdrawals from markets, the prices finished upto Rs. 773.50 on the 30th.

The prices of cotton were Rs. 774.75 at the beginning of February and ruled around this level till 10th. Thereafter, there was no trading till the 19th but subsequently prices came down to Rs. 772.75 on the 25th on selling pressure but closed at Rs. 775 on the 27th of the month due to short covering.

During the first week of *March* 1965 the prices of cotton were Rs. 780.25 and touched Rs. 781.50 at the close of the same day. The prices further advanced to Rs. 785 on the 3rd due to short covering induced by absence of tenders on the first tender day. After receding to Rs. 775.50 on the 8th due to some liquidation and weakness in other commodity markets, prices again spurted upto Rs. 796.50 on the 23rd and closed for the month at Rs. 773.50.

The month end forward market prices thus increased from Rs. 721.50 to Rs. 796.50 or by Rs. 75 till March 1965 whereas the spot market prices in relation to Virnar and Vijay remained constant at Rs. 897 for the former and varied narrowly from Rs. 984 to 1,008 or by Rs. 24 for the latter during the corresponding period as will be evident from the trend of the prices recorded monthwise in the sub-

joined table. The prices thereafter also remained firm till the close of the season.

(Prices per 3 quintals)

Year	Month	Jarilha/Virnar Fine (Average price)	Vijay fine (Average price)

## CHAPTER VII

## AGRICULTURAL WAGES

( Table VII, pages 152-163 )

( Summary Table G, page 52 )

24. In this State, according to the Manual of Revenue Accounts, agricultural labour is classified under three categories viz. (i) skilled, (ii) ordinary and (iii) field labour. Skilled labour comprises of carpenters, blacksmiths and cobblers. Ordinary labour consists of load carrying coolies, well diggers, mason's or carpenters' assistants, earth workers, etc. while field labour comprises of ploughmen, sowers, reapers, harvesters, weeders and transplanters, etc. In the report (reference table VII of Agricultural Wages) in addition to the above three categories, one more category is added, viz. herdsmen, whose main work is to collect livestock from different owners, take them to the jungle for grazing during the day and bring them back in the evening to the respective owners.

25. Table VII of the report gives districtwise figures of wages of different classes of agricultural labour. Perusal of summary table ' G ' shows that during the year 1964-65, the wages of carpenters showed a rise from Rs. 3.88 during the preceding year to Rs. 4.30 during the year under report, those of blacksmith from Rs. 3.52 to Rs. 3.95 of cobblers from Rs. 3.00 to Rs. 3.25; of field labourers from Rs. 1.75 to Rs. 1.92 and of other agricultural labourers from Rs. 1.61 to Rs. 1.71. The wages of herdsman also slightly increased from Rs. 1.43 of the previous year to Rs. 1.54 during the year under report.

---

## CHAPTER VIII

## AGRICULTURAL STOCK

( Table VIII-pages 164 to 172 )

( Summary Table H-pages 53-54 )

26. Table VIII of this report gives the details of livestock, poultry, agricultural machinery and implements as per quinquennial census of livestock conducted in 1961 by the Director, Bureau of Economics and Statistics, Bombay. The comments on the variation in the livestock numbers during the two quinquennials are based on the note sent by the Director, Bureau of Economics and Statistics. Summary Table H gives total number of livestock, poultry, agricultural machinery and implements under each main head. In the previous census, the information in respect of male (cattle and buffaloes) was collected under the three categories viz. (i) used for breeding, (ii) used for work and (iii) not in use for breeding or work. Those male cattle or buffaloes which were used for breeding only and both for breeding and work were not separately classified as was done in 1961. As comparative figures during the two census periods under the above categories are not available, it is not possible to obtain a realistic comparison between 1956 and 1961.

*Cattle.*—There is a slight increase in the number of cattle from 1,41,09,544 in 1956 to 1,53,27,575 in 1961 or by 8.6 per cent. The number of bulls used for work only showed an increase of 8.9 per cent while the number of other males over three years recorded a decrease of 25.9 per cent. The total number of males over three years increased by 11.4 per cent.

Among the females over three years, the number of breeding cows recorded an increase of 6.9 per cent while those in milk declined by 7.6 per cent. The number of young stock recorded a moderate increase of 6.1 per cent over that of 1956.

*Buffaloes.*—Amongst the buffaloes, the total number of buffaloes recorded in 1961 was 30,87,014 as against 27,21,562 in 1956 showing an increase of 13.4 per cent. Among different categories of buffaloes, the number of males over three years was 3,53,285 showing an increase of 19.6 per cent over that in 1956. Amongst the females, the number in milk was 8,26,611 in 1961 showing a negligible decrease

of 0.2 per cent. The total number of breeding buffaloes indicated an increase of 11.8 per cent. The number of young stock also recorded a sizeable increase of 15.2 per cent.

*Sheep and Goats.*—The number of sheep increased by 6.2 per cent and that of goats by 12.5 per cent as compared with the corresponding numbers of the year 1956.

*Horses and Ponies.*—The total number of horses and ponies declined considerably by 25.9 per cent in comparison with that of 1956 mainly on account of the fact that a large number of horses had been wiped out because of the South Africa Sickness which struck parts of the State in full fury in 1960-61.

The number of mules and camels showed an increase of 75.5 and 50.1 per cent or by 397 and 487 respectively. The increase in the number of donkeys and pigs was comparatively moderate being of the order of 10.6 and 16.7 per cent.

The total number of livestock recorded an increase of 9.6 per cent over that of the year 1956.

*Poultry.*—The total number of poultry showed an increase 19.1 per cent the figures in the two census periods being 88,82,658 and 1,05,77,855 respectively.

*Agricultural Machinery and implements.*—The number of tractors and ghanies declined by 38.5 and 41.0 per cent while that of wooden ploughs, iron ploughs, carts, sugarcane crushers, oil engines and electric pumps for irrigation purposes showed an increase of 7.0, 19.4, 8.4, 11.4, 138.6 and 236.8 per cent respectively in comparison with the corresponding figures of the 1956 census.

---

## CHAPTER IX

## AGRICULTURAL OUTLOOK

27. As mentioned in Chapter I of the report the agricultural season of 1964-65 was on the whole favourable throughout the State with poorer prospects for the cotton crop as compared with that in 1963-64.

28. The table below compares the actual areas sown and the outturn of food grain crops during 1964-65 with those in the preceding year in the different divisions and the state.

Figures in '000'

Division	Area in acres		Outturn in tons	
	1963-64	1964-65	1963-64	1964-65
	1	2	3	4
Bombay	5,677	5,687	1,543	1,578
Poona	10,253	10,107	1,905	1,781
Aurangabad	8,971	8,996	1,469	1,466
Nagpur	7,667	7,758	1,617	1,814
State	31,968	31,948	6,534	6,639

29. It will be seen from the above table that the area under food grain crops declined from 31,968 thousand acres in 1963-64 to 31,948 thousand acres in 1964-65. Decline in the area to the extent of 1.4 per cent was noticed in Poona division only. The other three divisions recorded a slight increase. On the whole the outturn of food grain crops, at the State level recorded an increase of 1.6 per cent over the preceding year having gone up by 105 thousand tons from 6,534 thousand tons in 1963-64 to 6,639 thousand tons in 1964-65. Nagpur division recorded an increase of 197 thousand tons while in Bombay division the increase was 35 thousand tons. Aurangabad division was practically stationary while Poona division recorded a decline of about 124 thousand tons.

30. The condition of cattle was generally satisfactory. Cattle wealth was destroyed or affected to some extent due to outbreak of cattle diseases such as Farya in parts of Nasik and Poona districts, Foot and Mouth and haemorrhagic Septicaemic in parts of Bhandara district and other minor diseases in few places in the rest of the State. These were, however, brought under control by taking prompt and effective measures. There were also outbreaks of attack of malaria, flu etc., in parts of the State, but these too were brought under control by resorting to prompt remedial and preventive measures in the affected regions.

31. The table below gives the average prices of agricultural commodities at the harvest time for the years 1960-61 to 1964-65 (prices in Rs. per maund of 3,200 tolas except cotton the prices of which are recorded in Rs. per khandi of 784 tolas.

\*Government Procurement rate.

*Note.*—Dashes indicate that the prices are not available.

The centres mentioned in the table are the representative markets and accordingly the prices of agricultural produce in these markets indicate the general trend in the fluctuations of prices of the commodities in the State.

## CHAPTER X

## CONDITIONS OF AGRICULTURAL POPULATION

32. As described in chapter-I, the agricultural season was characterised by uneven distribution of rainfall. The season, however, on the whole was favourable to crops like kharif jowar, groundnut and wheat. The agriculturist earned good returns from the sale proceeds of chillis, groundnut and foodgrains particularly kharif jowar, paddy and wheat for which remunerative prices were fixed by the Government.

The cotton crop was adversely affected due to untimely rains and incidence of Dahiya and the crop yield were reduced to some degree. To that extent the monetary returns to the cultivators are reduced. With the financial position improved to some extent the agriculturists were able to repay some debts and Government dues. On the other hand, as a result of the higher prices of the essential commodities, the benefits were offset to some extent by the increasing cost of cultivation. The condition of agricultural labour improved in the other rural areas partly due to employment of labour in large scale bunding schemes and other construction works undertaken by the Government and Zilla Parishads and partly due to supply of foodgrains at cheaper rates by Government. Dirth of labour, however, continued in the neighbourhood of industrial and factory areas. Loans were advanced to needy agriculturists by Government, Zilla Parishad, Land Mortgage Banks and various societies running in the districts as also under various Government schemes. The Rabi crops campaign initiated in the year under report was popular with the agriculturists. As usual the Bombay Tenancy Act, the Agricultural Land Improvement Act, prevention of Fragments and Consolidation of Holding Act have resulted in an overall improvement of agriculture and welfare of the agriculturists.

Castor	113	5	102	5	
Tobacco	432	85	416	75	

\* These outturn estimates are entirely based on the results of crop estimation surveys conducted in the year 1964-65.

Outturn estimates are obtained by using the results of crop estimation surveys for districts mentioned below against each crop while these for the crops in the remaining dists. are based on the anna valuation reported by the Collectors.

Ragi.—Thana, Kolaba, Ratnagiri, Nasik, Poona and Kolhapur.

Tur.—All the districts in the Nagpur division.

Tobacco.—Sangli, Kolhapur and Satara districts.

For the crops other than those mentioned above outturn estimates are obtained by
