P R E F A C E

This Statistical profile of north east India contains statistical data on certain important aspects of the States and Territories of this region. This compilation is undertaken to meet the demand of such data from the teachers, students and research workers. Data have been collected from publications of the Government of India, Reserve Bank of India and the Governments of the States and Territories of this region. Sources of data are given in appropriate places. As far as practicable information in a particular table is given from one source to avoid discrepancies.

It could not be made more comprehensive due to paucity of data on certain aspects, specially on the States and Territories which have been formed only recently. Nevertheless, we have attempted to incorporate available data and will try to make the compilation up-to-date in the near future.

This compilation has been done by Shri G.C. Borthakur under the supervision of Dr. N. Saha. Shri S. Baruah has also occasionally helped in the compilation work. Shri N. Bora has typed the stencils and Shri N. Deka mimeographed it. I am thankful to all of them.

I hope this compilation will be useful to those for whom this is intended.

March, 1975.

P.D. Saikia,
Director.
