CHAPTER I

Introduction

- 1.1 Location:- The district Thana is a part of the North Konkan Region. On the eastern side there is the Sahayadri Hills and on the West, the Arabian Sea. The costal line is about 113 Kilometers.
- 1.2 Boundaries:- The district Thana lies between $18^{\circ}42'$ and $20^{\circ}20'$ N. Latitude and $70^{\circ}45'$ and $73^{\circ}48'$ E. Longitude. It is surrounded by Surat District of Gujarat State and the centrally administered territory of Dadra and Nagar Haveli in the North Sahyadrian Range. On the eastern side, beyond Sahyadri lie Nasik, Ahmadnagar & Poona Districts. Kolaba District lie to the South, Greater Bombay to the South West and Arabian Sea towards the West.
- 1.3 Topography:- The drainage of the district gathers along the two valleys of the Vaitarna & Ullhas rivers which have their source in the Sahyadri Range. From Vahigaon village near Kasara where Vaitarna enters the District, the valley is deep and narrow for about 26 Kilometers. From Kalam-bhai village at the eastern border of Wada Taluka the valley opens out for about 32 Kilometers till it reaches the spurs of Takmak Range. Vaitarna flows for about 32 Kilometers through the fertile coastal Region and falls into the sea at Agashi. Ullhas river rises in Bhor pass in Poona District and enters the District near Vangani and flows towards Kalyan Town. Its two chief tributaries Barvi and Kalu rivers meet Ullhas river near Kalyan Town. Beyond Kalyan it broadens into estuary and passes through the marshy lands and hills. As it leaves the main land it widens into a salt water strait and finally meets the sea near Bassein.
- 1.4 Soil :- The Soil all along the coast and particularly in parts of Dahanu, Palghar and Bassein Talukas is Blackish and contains sand which is suitable for garden crops. Towards the east, the soil is red and brown. It is not very deep but unsuitable for paddy cultivation. Further east of the hill

2

along, the soil is poor and is used only for growing coarse grains viz. Nagli, Varai etc. In the valleys, there are patches of black soil, in Bhivandi, Kalyan, Mokhada and Shahapur talukas where rice is grown.

1.5 Rivers:- Two main rivers of the District are Vaitarna and Ullhas. Vaitarna rises in the Trimbak hills in Nasik District and enters in this District at Vahigaon near Kasara. Its chief tributaries are the Berjha, Pinjal, Daherja, Surya and Susari and Tansa.

Ullhas river rises in Bhor pass and after a North West course of about 129 Kilometers enters the sea at Bassein. Its tributaries are Chilhar, Poshri, Barvi, Bhalsa and Kalu.

1.6 Hills:- The main hills are the Sahyadri Range and its offshoots. The Sahayadri Range which runs from North to South from an unbroken boundary in the east. Besides this main range and its Western offshoots there are outlying ranges and spurs with isolated peaks over the whole district but none of them rises higher than Sahayadri.

There are numerous peaks in the main Sahyadrian Range. Prominent among them are Valvahir, Kalsubai over the shoulder of Tiger's terrace known as "Vaghacha Pathar" and Harishchandragad.

One of the offshoots of the Sahyadri, which runs west from the west end of the Anjaniri and Trimbak range, from the watershed between the Damanganga and Vaitarna Valleys.

1.7 Minerals:- District Thana is not rich in workable minerals. Bauxite deposits occur in Tungar Hill in Bassein Taluka. The Tungar deposits are reported to contain 0.6 million tons of good grade Bauxite. Also inferior reddish or yellowish lateric clay is available at Gokhivare near Bassein Road Station and the reserves are estimated at 65,000 tons. The material is

37

stated to be suitable for bricks drainage pipes, tiles and also red glazed ware.

There are springs of mineral waters in the district famous for having certain curative values. They are at Kokaner, Satiwali, Vajreshwari and other places. Traces of sulphur are found in the hot springs at Vajreshwari.

There are also salt producing centres in the District at Rai-Murdhe, Juthandra, Bhyandar, Belapur and Bassein.

1.8 Administrative set-up :- The district consists of twelve Talukas. There are 20 Towns and 1599 Inhabited villages in the district. In the year 1962, Zilla Parishad and 12 Panchayat Samities were established. Areas under Municipal Towns are not covered by Zilla Parishad or Panchayat Samities otherwise the areas under jurisdiction of Zilla Parishad and Panchayat Samities correspond with the District and Taluka boundries. The population covered by Zilla Parishad includes total rural population and 17.84 percent of urban population of the district.

District Superintendent is the head of the Police Force in the District. He is assisted by 4 Deputy Superintendent and 12 Circle Police Inspectors. Altogether there are 30 Police Stations in the District.

The District and Session Judge is the head of the Judicial Department in the District. He is assisted by two Asstt. Judges and additional sessions Judges. The Judiciary is entirely seperated from the executive. The Collector is the District Magistrate and the Deputy Collectors and Tahsildars are vested with Magisterial powers.

1.9 Territorial changes during the year 1967-68:- There were no territorial changes during the year 1967-68.

1.10 Climate and Temperature:- There are great variations in the temperatures during the different seasons of the year, the air being sometimes cooled by sea winds and sometimes heated by hot land breezes. In Thana District, rain sets in early in June and continues till the

end of September, which is pleasant up to the month of October, Cold weather starts in December, nights are cool, but the days are almost hot. 4

Within the district, the seasons show local variations also. The warmth increases as one proceeds from west to east. The nights, however, are not quite unpleasant even in the eastern talukas.

1.11 Rain fall:- The rainfall is not uniform through out the district. It is more inland than on the coast. Also it is less towards North than towards the South.

In Thana District, rainfall is due to the South-West monsoon. The intensity of rainfall is highest in July.

As the district receives heavy and assured rainfall, famine due to scarcity of rain is practically unknown to this District.

CHAPTER III

An Analytical Review giving Sectoral Trends

In this chapter talukawise variation under various sectors are discussed.

The district as a whole has advantage of quite a good rainfall and there is no scarcity or draught. As the yield is dependent on nature, it varies according to the timeliness of rainfall.

(1) Percentage of Gross cropped area

In 1965-66 gross cropped area was 3,05,153 hectares that is 33 % of total geographical area. In 1966-67 gross cropped area was 3,24,330 hectares which was 34.74 % of total geographical area.

Rice is the main agricultural crop of the district. The area under rice in 1965-66 was 1,48,714 hectares and it increased to 1,62,313 hectares in 1966-67. Rice is largely grown in Palghar, Dahanu and Bassein Talukas of Thana District.

Ragi (Nagli) is the second crop which is largely grown in Mokhada and Jawhar Taluka. The figures of area under Nagli in Mokhada & Jawhar Talukas for the year 1966-67 was 6,313 hectares and 7,406 hectares respectively.

(2) Productivity of important crops

The yield and outturn of some important crops in Thana District for last 3 years is given below.

| Sr.No. | Crops | Year | Yield per hectare (in Kgs.) | Outturn(in Metric Tons.) |
|--------|-------|---------|--------------------------------|-----------------------------|
| 1 | 2 | 3 | 4 | 5 |
| 1 | Rice | 1964-65 | 1,661 | 2,50,700 |
| | | 1965-66 | 1,156 | 1,71,983 |
| | | 1966-67 | 1,252 | 2,03,300 |

| 1 | 2 | 3 | 4 | 5 |
|---|--------------|---------|-------|--------|
| 2 | Ragi (Nagli) | 1964-65 | 1,120 | 29,000 |
| | | 1965-66 | 866 | 20,013 |
| | | 1966-67 | 886 | 21,340 |
| 3 | Tur | 1964-65 | 353 | 1,500 |
| | | 1965-66 | 276 | 1,217 |
| | | 1966-67 | 294 | 1,106 |

It will be seen that there is increase in yield per hectare^e in 1966-67^{as} compared to 1965-66^{as} well as out turn in respect of each crop this is due to fair and good rainfall.

(3) Percentage of irrigated area

The gross cropped area of Thana District during 1965-66 was 3,05,153 hectare^s and area irrigated during the same period was 2,360 hectare^s. The respective figures for 66-67 was 2,93,673 hectare^s and 2,750 hectare^s.

(4) Changes in the crop pattern (Total and irrigated)

Net area sown in Thana district during 1965-66 was 2,99,411 Hectare^s, which stands reduced to 2,93,228 hectare^s in 1966-67.

The following table will give the data for the year 1965-66 and 1966-67.

| Sr. No. | Crop | Area 1965-66 | % to total gross cropped area | Area 1966-67 | % to total gross cropped area |

The Annual Plan 1967-68

The Third Five Year Plan ended in March 1966. The year 1967-68 would normally be the second year of the Fourth Five Year Plan. But as the fourth five year plan has yet to be finalise/by the Govt. of India, an Annual Plan 67-68 was envisaged just like that in 1966-67.

Before discussing the Annual Plan 67-68, it would be useful to note the outlays and achievements of the third five year plan and the Annual Plan 66-67. The third five year plan of the state involved an outlay of Rs. 390.20 crores. As against this, the actual expenditure incurred during the same period was Rs. 434.7 crores in spite of economic measures and curtailment of outlays on schemes of lower priorities as per the midterm appraisal. The increase in expenditure was mainly due to the greater emphasis on policies and programmes requiring special attention in the context of the national emergency. The impact of plan outlays can be seen from the growth in the State. Income and per capita income of Maharashtra State Viz.

Revised Series

| Item | Year | | | |
|---|---------|---------|---------|---------|
| | 1960-61 | 1965-66 | 1966-67 | 1967-68 |
| | 2 | 3 | 4 | 5 |
| 1. (A) Total State Income (Rs. in crores) At constant prices 60-61 (Rs.) | 1,597 | 1,692 | 1,793 | 1,933 |
| (B) Per capita income at constant prices | 409 | 381 | 394 | 414 |
| 2. (A) Total State Income (current prices)Rs. in crores | 1,597 | 2,309 | 2,760 | 3,053 |
| (B) Per capita income in Rs. | 409 | 521 | 607 | 654 |

From the old series, it may be evident that the State income at constant prices increased by 36 % during the second five year plan, it further increased by 11.0 percent in the four year's period of 61-65 but in the last year it showed a decline of 3.3 percent. As a result, the increase over five year plan period was only 7.3 percent. Similarly per capita income increased from Rs. 350 in 1960-61 to Rs. 357 in 64-65 but decline to 338/- in 1965-66.

From the revised series (constant prices) we find that the State income increased by 6 percent during 61 to 65. It showed monotonic increase by 12 percent and 21 percent during Annual Plan period 66-67 and 67-68. Similarly, the per capita income also shows net rise from 409 to 414 during 60-61 to 67-68. However, if we consider the revised series with current prices, the per capita income shows continuous rise from 60-61 to 67-68.

During the third five year plan, the expenditure incurred on district level schemes implemented amounted to Rs. 696.09 lakhs. In the year 66-67 it was 270.68 lakh, while it was 166.45 lakh Rs. in 1967-68.

The following summary table shows the comparative figures under different heads of development.

| | | Rs. in lakhs | | | | | |

| | Total:- | 696.09 | 100.00 | 270.68 | 100.00 | 166.45 | 100.00 |

From the figures in the statement given above, it may be seen that more emphasis was given on Agricultural programme and Transport in third five year plan and Annual Plan 66-67 while in Annual Plans 67-68 more emphasis was laid on Agriculture Programme and Social Services.

The annual average plan expenditure during third five year plan works out to Rs. 139 lakh, while in 1966-67 the corresponding figure is 270 lakh Rs. However in 1967-68, it was reduced to Rs. 166 lakh. This might be due to economic measures.

A brief description of some important points regarding the expenditure on different sub heads incurred during 67-68 is given below.

I Agricultural Programme:- The details of expenditure on different sectors of Agricultural Programme is as follows.

| Sub head | Expr. incurred during 67-68 | percentage to the total Expr. 67-68 |
