## C H A P T E R - I INTRODUCTION

### Location and Boundaries

I. Jalgaon District lies between  $20^{\circ}$  and  $21^{\circ}$  North latitude and  $74^{\circ}55'$  and  $76^{\circ}28'$  East longitude. Stretching nearly 130 Km. along the Tapi river and varying in breadth from 115 Km. to 145 Km.; Jalgaon forms an upland basin, one of the most northerly section of the Deccan table land. Along the whole northern frontier, the district is bounded by Satpuda ranges, a mountain tract from 50 to 65 km. wide. It is bounded by Madhya Pradesh on the North, Madhya Pradesh and Buldhana district on the East, Aurangabad district on the South and Dhulia and Nasik districts on the West. Quite a major portion of the northern boundary is marked by the tributary Aner, which in the west continues to separate Jalgaon district from Dhulia till its junction with Tapi. On the East and South-east, a range of low and detached hills and some major streams without any marked natural boundary, separate Jalgaon district from Buldhana district. To the south, Ajanta, Satmala and Chandor ranges may roughly be said to mark the line between Jalgaon and Aurangabad districts. On the west Jalgaon shares its boundary with Nasik district over a stretch of about 40 km., and then with the Dhulia district for about 80 km.

### II. - Area and Population

The total geographical area of the district is 11,375.3 sq.km. (4392.0 sq.miles) and its total population according to 1961 census is 17,65,047. Thus in terms of area and population this district makes 3.7 percent and 4.4 percent respectively of Maharashtra State.

The mid-year population is estimated for 1966 at 19.96 lakhs. According to area, Jalgaon district ranks fourth in Maharashtra State and according to population, it ranks Third in Bombay division(excluding of course, Greater Bombay) and fifth in Maharashtra State. The population of the scheduled castes and scheduled tribes is 1,60,029 as per 1961 Census.

### III - Administrative Set-up

This district is divided in 13 Talukas. The area, number of inhabited villages, number of Towns, 1961 Population, and the position in the district by percentage of area and population of each taluka are given in the table below.-

The Jalgaon Zilla Parishad has been established in May-1962, with 13 Panchayat Samities at Taluka level. The area under the jurisdiction of the Zilla Parishad and Panchayat Samities corresponds to District and Taluka boundaries except in the case of Municipal Towns, Cantonment Board, which are not covered by them. The Zilla Parishad of Jalgaon District covers the 96.6% area and the 77.4% of the rural population of the district and 1.2% urban population.

### V. - Topography

Although Jalgaon District belongs to the Deccan up-lands of Maharashtra State, it is distinguished from the rest of the up-land districts by their westward aspect. While the rest of the upland region is drained by the major rivers to the east, the Tapi and its tributaries drain Jalgaon region to the west towards Arabian Sea. The landscape is typically that of the Deccan lavas with residual hill ranges and broad valleys, with trap dykes introducing a sharp local contrast as small chains of hills. This district includes varied topographical features and landscapes consisting of wild hills and forests, rich gardens and groves, stretches of barren plains, low rolling rocky hills and densely gullied (badland) topography near major river banks. Regionally from east to west, parallel with the Tapi, are three well marked belts of country, in the centre the rich Tapi Valley, in the north the high and wild Satpudas, and in the south and south-west bare ridges and rich well watered valleys, flanked by the Ajantha range.

### VI. - River System

Tapi flows from east to west and meets Arabian Sea at Khambayat nearly 19-kms. from Surat. Out of the total length of about 724 kms. of this river, nearly 121 kms. is in Jalgaon district. Almost all other rivers in Jalgaon district are its feeders. River Purna enters the district from south-east and meets Tapi at Changdeo in Edlabad taluka. Another important river Girana, takes its course, in the Sahyadri in Nasik district, flows from west to east in the southern part, then south to north, separating Erandol and Jalgaon talukas and meets the Tapi after taking a right angle turn near about

Jalgaon. Other feeders include Bhogavati, Waghur and Bori, feeding from South Bhokar, Suki, Mori, Ratnawati, Madhi, Mahi, Gati and Aner from north. The feeders from north except Aner are all small rivers.

#### VII - Hills

Within the district there are three Chief hill ranges, the Satpuda in the north, the Hatti in the south-east and the Ajantha or Satmala in the South. In Satpuda the Chief peaks are Pancha Pandav and Mondhiamal looking down on Yawal. The Hatti hills bounding the Purna valley on the east, run north-west and south east and for about 32-km. pass through the south-east corner of Jalgaon. The Satmala also known as the Chandor or Ajanta range breaking off sharply from the Sahyadris in the north-west of Nasik, runs eastwards for about 80-kms. Near Manmad, after a gentle depression, it again rises about 185-M. above the plain and forms a somewhat monotonous wall-like boundary between Jalgaon and the Deccan.

#### VIII - Soil

The soil of this district can be, broadly classified into three major tracts. The northern tract mostly consisting of rich black Cotton soil, except for a small strip of 5 to 6 km. along the foot of Satpuda and 2-km. near the bank of Tapi river. In the central tract there are three types of Soil, viz, - Deep black, Red and Brown. The deep black soil is most fertile and yields rich crops. The lighter red soil, though not so fertile is sufficiently good for raising cash crops such as Cotton and Groundnut. The general quality of the soil in the southern part is however, inferior to that of

the central or northern tracts. The reddish brown soil in Pachora tahsil and Bhadgaon taluka is best suited for Jowar, Cotton and Groundnut, while the soil in Chalisgaon taluka is capable of raising heavy crops with the help of adequate water supply. On either side of the Tapi, runs an unbroken plain of the deep black Cotton soil, forming a strip of alluvium covered lands.

#### IX : - Climate, Temperature and Rain-fall

i) The climate of this district is generally dry except in the monsoon. The year may be divided into four seasons. The cold season from December to February is followed by the hot season from March to May. June to September is the monsoon season and from October to November the post-monsoon season.

ii) The average annual rainfall in the district is 740.7 m.m.(29.16). About 87 percent of the annual rain fall is received during the monsoon i.e. from June to September, July being the month with the highest rainfall. The central parts of the district comprising the talukas of Jalgaon, Bhusawal, Jamner and Pachora get a little more rain than the rest of the talukas in the district.

iii) The only meteorological observatory in the district is at Jalgaon. December is the coldest month with the mean daily minimum temperature at  $11.9^{\circ}\text{C}$ . and the mean daily maximum temperature at  $29.8^{\circ}\text{C}$ . Temperature begins to rise steadily from about the beginning of March and by May, the hottest month of the year, the mean daily maximum temperature reaches  $42.5^{\circ}\text{C}$ . The highest maximum temperature recorded at

Jalgaon was 47.8°C.

X - Special Features

The following specialities of Jalgaon District are also notable.

- 1) Banana: - With an area of about 19367 hectares and production of about 6 lakh M.tonnes.  
Banana is exported to Delhi and Bombay. It is also exported to some foreign countries.
- 2) Pulses: - Pulses, viz, - Udid, Moong, with an area of about 4,96,258 acres and production of about 6000 M.Tonnes.
- 3) Industrial estate at Jalgaon and Bhusawal.
- 4) The tourist-centre, for Ajantha Caves.
- 5) The important business centre, supply of pulses, Banana to Delhi and Greater Bombay.
- 6) Three Spinning mills in District One at Jalgaon and other at Amalner and Third at Chalisgaon.
- 7) Defence project factory at Varangaon in Bhusawal Taluka in District.
- 8) Important Railway junction of Central and Western Railways.

### EXPLANATORY NOTES .

The Statistical Abstract of Jalgaon District for the years 1968-69 and 1969-70 (combined) which is presented in second half of this publication presents information on selected features of the economic, geographical and social conditions prevailing in the district. Every effort has been made to give talukawise break-up wherever possible.

There are in all 13 broad groups under which statistical data is prepared. Also at the end, a table showing the trends in selected indicators has been given.

#### I - Climate: -

There are two tables under this group. Table No.1 shows monthwise rainfall (in M.Ms.) and number of rainy days for 13 selected centres for the years 1968 and 1969. It also indicates the normal rainfall for these centres. Table No.2 gives monthwise details of temperature for Jalgaon Centre, in terms of Mean, Mean-Maximum and Mean-Minimum for two years viz, 1968 and 1969. The maximum temperature reached was 42.8<sup>o</sup>C. and 43.7<sup>o</sup>C. in May and the minimum was 11.5<sup>o</sup>C. and 12.7<sup>o</sup>C. in January during the year 1968 and 1969 respectively.

#### II.- Area and Population: -

There are six tables under this group, the reference period for all these tables is 1961 Census. Table No.3 shows the figures of Rural and Urban population of each taluka in 1951 and 1961. The population of Jalgaon District increased from 14.71 lakhs in 1951 to 17.65 lakhs in 1961 i.e. by 20%.

The next two tables (No.4 and 5) show the classification of villages and towns respectively according to population ranges. There are 14 towns and 1435 inhabited villages in the district. Table No.6 presents the classification of workers and non-workers into important categories based on 1961 Census. There were 8.13 lakh workers and 9.51 lakh non-workers in the district. Table No.7 shows the distribution according to (A) Age-group, (B) Mother tongue and (C) Religion based on 1961-Census. Table No.8 shows the data of scheduled castes and scheduled tribes according to 1961-Census. The scheduled-castes population was 51,319 and that of scheduled tribes was 98,710. All these tables are much useful for the study of general conditions in various talukas of the district.

### III - Agriculture:-

There are ten tables in this group. The data of land utilization and cropping pattern is given in hectares for each taluka for 1967-68 and 1968-69.

The double cropped area is 7% of gross cropped area. Table No.11 shows the yield and out-turn figures for the year 1967-68 and 1968-69. Five tables viz, - No.12,13,14,15 and 16 present the area irrigated by different sources and under different crops for the year 1967-68 and 1968-69. The rainfall in this district is uncertain and generally falls short of the requirement. The area irrigated by Government Canal has reduced during the year 1968-69 as compared to the year 1967-68 in Amalner and Chalisgaon talukas and that for the talukas viz, - Erandol, Parola and Bhadgaon has increased during 1968-69. The total area irrigated has increased during the year 1968-69 as

compared to 1967-68. The gross irrigated area is 8.3% and 8.9% of gross cropped area for the year 1967-68 and 1968-69 respectively. The following table shows the area irrigated by different sources in hectares during the year 1967-68 and 68-69.

Sr. No.	Item.	Area under Irrigation (in hectares).		Percentage to total area under irrigation.	
		1967-68	1968-69	67-68	68-69.
1	Govt. Canal.	4,052	11,774	1.00	16.4
2	Private Canal.	Nil	Nil	-	=
3	Tanks	Nil	Nil	-	-
4	Wells	43,449	60,184	99.00	83.6
5	Other sources.	104	9	-	-
T O T A L : -		47,605	71,967	100	100

From the above table, it will be seen that the irrigated area is higher under Wells than that of Govt. Canal for ~~the~~ <sup>the</sup> both years. It is evident that wells are the major source of irrigation in the district. There were 45,390 and 44,243 irrigation wells in the district during the year 1967-68 and 1968-69 respectively.

The number of oil-engines and motor pumps in the district as per 1966 Live-stock census, was 10,829 and 2,577 respectively.

The up-to-date list of no. of minor irrigation works in the district (talukawise) has been shown in table No.15. There were 10 and 22 minor irrigation works in use in the district for the year 1967-68 and 1968-69 respectively. The net area irrigated by these works was 926 and 1767 hectares for the year 1967-68 and 1968-69 respectively.

Table No.16 shows major irrigation projects viz,- Girna

project. (i) Girna Canal- Dahigaon weir. ii) Girna Canal lower-Jamda weir). The latest estimated cost of this project is Rs. 1499.24 lakhs. Only seasonal irrigation has been introduced on this canal system. 48,600 hectares area was irrigated by this project.

IV - Animal Husbandry, Forest and Fisheries:-

a) Animal Husbandry:- There are five tables under this group. The first four tables presents viz, - Final figure of Live-stock and poultry in each taluka as per 1966 Live-stock Census in table No.20. The availability of veterinary facilities in each taluka during 1968-69 and 1969-70 has <sup>been</sup> shown in table No.21. There were three hospitals and ten dispensaries during the year 1969-70 in the district. AN ANALYTICAL REVIEW

This chapter deals with important selected indicators furnishing comparative study of the achievements in important selected sectors of economy.

I - AGRICULTURE:-

The percentage of gross cropped area over net cropped area indicates the extent of double cropped area. The double cropped area is mainly due to availability of irrigation facilities. It is observed in table No.10 of the Abstract that the percentage of gross cropped area to the net cropped area slightly increased from 103.34 in the year 1967-68 to 107.83 in 1968-69.

The following table showing talukawise percentage of gross cropped area to net cropped area for the years 1967-68 and 1968-69.

Sr.No.:	Name of the Taluka:	% of gross cropped area to net cropped area.

It would be interesting to study the areas under important crops, the percentage with gross cropped area for the two years viz,- 1967-68 and 1968-69.

The following table gives percentage of the various crops to the gross cropped area.

Sr. No.:	Crops	Y e a r s		Increase(+) or decrease(-)		
		1967-68.	1968-69.			
		Area in Hectares	% age to gross-cropped area	Area in Hectares	% age to gross-cropped area

### III - Agricultural-

Out of the total expenditure of Rs.3.58 crores, on the district level schemes in 1968-69 the expenditure on the schemes relating to Agricultural Programme was Rs.1.02 crores, i.e. 28% of the total. During 1969-70, out of Rs.2.43 crores,

Rs.1.21 crores were earmarked for Agricultural Programme. This expenditure was 49% of the total. The major expenditure under agricultural programme was for soil conservation schemes and minor irrigation schemes. During 1968-69, 34347 hectares were bunded in the district. During 1969-70 the area bunded was little less i.e. 27300 hectares, under aycut bunding area covered was 6981 hectares and 7944 hectares. Under minor irrigation, construction of percolation tanks and installation of pumps were taken-up. 21 percolation tanks were constructed during these two years. 4067 new wells were dug during these two years. 14013 pumping sets were installed under the above period.

IV - As far as agricultural production is concerned, emphasis was laid on high yielding varieties of the crops. The area covered under plan protection schemes was to the order of 1.27 lakhs hectares. Though the area under cotton has been on the decline, the production has shown up-ward trend. The area under ground-nut has increased but the production was not proportionate to the increased area.

V - The provision under dairy development increased substantially during 69-70 to Rs.3.65 lakhs when compared to 68-69(0.40 lakhs). Recently stress has been laid on the schemes under the this head. Loans were given for purchasing mil ch cattle. Dairy societies were also assisted during these years.

#### VI - Co-operation and Community Development

Under the head of Co-operation and Community Development, the expenditure during 1968-69 was Rs.32.08 lakhs, the corresponding expenditure during 1969-70 was Rs.3.12 lakhs under Co-operation, the main activities were, increase in memberships of the societies, assisting the existing co-operative farming societies. During these two years the membership increased by Rs.4379. The no.of co-operative farming societies assisted is 31. Mention may also be made here that special attention was paid to the reviving of dairy societies, as dairy development was the only industry in the district to help the improvement of economic condition of the rural agriculturists.

VII - 13 blocks were functioning in the district. The expenditure incurred by these blocks during 1968-69 was Rs.18.89 lakhs, and Rs.16.74 lakhs during 1969-70. 3 blocks were covered under applied nutrition programme. The blocks covered were Chalisgaon, Bhusawal and Raver.

#### VIII - Irrigation and Power

The main activities under this head were energising pumps for irrigation purposes and rural electrification programme. During these two years the programme was taken on a large scale. The total no.of electric pumps was 1472 at the end of 1969-70. The number of villages electrified during these two years was 139.

#### IX - Industry and Mining

Two co-operative spinning mills have been established in this district. One is at Bhusawal and other at Nagardeola.

These mills have been assisted by way of share capital. The major expenditure given below is for this purpose. During 1968-69, Rs.7.28 lakhs and during 1969-70, Rs.15.96 lakhs were spent under this head. The other activities under this head was granting rebate to societies and sanctioning loans to small-scale industries.

X - Transport and Communications

Under this head most of the schemes were implemented by the Zilla Parishad. During 1968-69 and 1969-70, 55-kms. new roads were constructed, 57-kms old roads were improved and One bridge was constructed. During 1968-69 the expenditure w incurred was Rs.11.62 lakhs, and Rs.18.38 lakhs in 69.70.

XI - Social Services

Under sub-head of general education the expenditure during 1968-69 was Rs.36.64 lakhs, and Rs.15.47 lakhs in 69-70. The activities covered were training of primary teachers, development of non-Govt. secondary schools and granting concession to the E.B.C. students.

XII - Under the head water supply and drainage, the activities were rural water supply schemes and municipal water supply schemes. 10 rural water supply schemes were completed in 10 towns were in progress.
