--*-*-*-*-*-*-*-*

CHAPTER : I
PHYSICAL FEATURES

1.1 LOCATION

Kolhapur District lies in the Krishna, Panchaganga basin. The District lies between 15 and 17 North latitude and 73 and 74 East longitude. It is surrounded on the North by Satara District, on the South and East by Belgaum district of Mysore State. It has a fairly compact area and its major portion forms an irregular part of the South Deccan Plateau.

1.2 TOPOGRAPHY :

(1) SOIL:- The district can be divided into three broad soil zones (a) the western part covered with laterite soils (tambadi mati); (b) the fertile central part, with brownish well-drained soils; and (c) the dry eastern zone covered with medium to deep black soil of varying depth.

Laterite soils occur mainly in the western parts of Karveer, Bhudargad and Ajara tahsils and the whole of Shahuwadi, Radhanagari, Panhala and Bawada tahsils. They are red to brownish red in colour. They are not retentive of moisture and are fit for raising hill millets alone. Paddy is however grown on them in the valleys. Brown soils (Halki-Kali mati) are found in the tahsils of Hatkanangle, Karveer and Radhanagari and in parts ^{of} Bhudargad and Ajara tahsils. They are rich and fertile soils. Rice, Jowar and groundnuts are grown on them in the Kharif season. Sugarcane and Vegetables are grown where irrigation facilities are available. Medium to deep black soils (madyam or bharikali mati) are found in the tahsils of Shirol, Hatkanangle, Karveer, Kagal and Gadhi nglaj. The soils are deep in the river valleys. These lands are quite fertile and yield good crops of Kharif Jowar and groundnuts.

They are fairly rich in phosphorus contents and the crops respond well to the application of Nitrogen. The soils are amenable to irrigation and paddy sugarcane and vegetables are grown on them successfully.

(2) RIVERS- The main rivers of this district are Krishna, Varana, Panchaganga, Dudhaganga and Hiranyakeshi. The Varana has a south eastern trend in upper reaches. Its length is 130 Kms. It acts as a boundary between this district and Sangli district for its entire length. It merges with Krishna in Shirol taluk. The Panchaganga is formed by four streams, the Kasari, the Kumbhi, the Tulsi and the Bhogawati. The south western Region of the district is principally drained by Dudhaganga and her important tributary the Vedganga. The rivers Varana, Panchaganga, Dudhaganga and Vedganga merge into Krishna before it leaves the district. Hiranyakeshi which has a length of about 80 Kms in this district meets Krishna in Mysore State. All these rivers are important in that sugarcane is extensively grown on the banks of these rivers by lift irrigation.

(3) HILL RANGES- Main part of the district is traversed by the Sahyadree in the West. The Sahyadree has thrown several spurs in the east of the district and in this range some points are as high as 900 meters above the mean sea level. The major portion of the district is 390 to 550 metres above the mean sea level. The average height is about 560 metres above the mean sea level.

(4) MINERALS- Major portion of the district is covered with Deccan trap. In these tracts there are very large areas containing deposits of high grade bauxite in sufficient quantities. Bauxite forms the chief raw material in Aluminium industry. The mineral bauxite is known to occur at several places like Radhanagari, Gargoti, Waki, Dhana-garwadi, Rangewadi and Udegiri. The quality of bauxite is fairly good and is suitable for producing aluminium. The total reserve of bauxite in the district including Amboli Ghat is estimated at 40 million tonne. Apart from bauxite, Gypsum is found in small quantity in Bhudargad tahsil. Besides minerals of lesser economic importance like building stone are found in sufficient quantity all over the district.

1.3 CLIMATE AND TEMPERATURE-

The rainy season lasts from June to October and though the climate is wet during rains, the temperature does not fall below 17° C and normally ranges between 19° to 32° C due to which the climate is warm. The winter season which starts from November and ends in February is dry. January is the coldest month, the mean minimum temperature varying between 14° C to 18° C. The hot season starts in March and ends in June. Though the days from 10 A.M. to 5 P.M. during the summer season are hot, the nights are fairly cool. April and May are the hottest months of the year. The mean maximum temperature during these months varies from 35° C to 33° C, the mean maximum even rises as high as 41.5° in the month of May. During 1969, the climate was fairly normal. Maximum temperature of 37.8° C was recorded in April 1969, while minimum temperature, which was observed in January was 14.2° C.

1.4 RAINFALL AND NATURAL ZONE-

The district gets rain from the southwest as well as from north east monsoons. Throughout the district the rain falls from May to November. However, the main rainy season is from June to October. According to the rainfall the district can be divided into five tracts as given below :-

Heavy rainfall tract :- Consists of Gagan Bavada, Ajara, Chandgad, Radhanagari and Shahuwadi tahsils forming western part of the district and traversed by Sahyadri ranges and small valleys. The rainfall in this tract exceeds 2000 M.M. and at Gagan Bavada it exceeds 7000 M.M.

Large rainfall tract :- Consists of Bhudargad and Panhala and the rainfall is between 1200 to 2000 m.m.

Sufficient rainfall tract :- Consists of Gadbingla and Karvir tahsils where the rainfall is generally between 900 to 1200 m.m.

Rather insufficient rainfall tract -
Kagal tahsil is having rainfall between 650 to 950 M.M.

Poor rainfall tract - The tahsils of Shirol and Hatkanangle may be included under this category as the rainfall is below 650 m.m.

The heavy rainfall in the western part may be due to the fact that the moisture laden clouds in eastward journey strike the crest of Sahyadri and release much of the rain. The rainfall during the year 1967 was satisfactory all over the district.

1.5 Famine and Scarcity- There was no scarcity in Kolhapur District during the year 1968-69 and 1969-70.

1.6 TERRITORIAL CHANGES DURING THE LAST 15 YEARS SINCE 1951 :-

The Kolhapur district was formed in 1948 after the merger of former Kolhapur princely state with 8 tahsils and 3 Mahals. In 1956 the Chandgad tahsil of Belgaum district was transferred to Kolhapur district according to the recommendations of the States Reorganisation Commission. The Kolhapur district became a part of Maharashtra after the bifurcation of bilingual state of Bombay in May 1960. There has been no change in the area of Kolhapur district since 1961. Village Watangi from Gadhinglaj tahsil was transferred to Ajara tahsil subsequent to 1961 Census.

1.7 ADMINISTRATIVE SET-UP :

State Government Administration

(i) Revenue - Collector is in charge of general administration, law and order, land revenue and civil supplies. For administrative purposes, the district is divided into three sub-divisions known as "Prants". Each sub-division are at 1) Gadhinglaj covering Ajara, Bhudargad - Chandgad and Gadhinglaj tahsils 2) Karvir which covers Hatkanangle, Kagal, Karvir and Shirol tahsils and 3) - Shahuwadi covering Shahuwadi, Panhala, Bawada and Radhanagari tahsils.

(ii) Judicial Department - Since 1958, the Judiciary is completely separated from the Executive. The judicial department at the district level is headed by the District and Sessions Judge. He is assisted by Additional Session Judge and Assistant Judge. They have jurisdiction over the entire district and they attend the civil and criminal work both original and appellate.

iii) Police : The police force in the district works under district superintendent of Police who is assisted by two Dy. Superintendents and two circle police inspectors. There are 19 police stations in the District.

iv) Building and Communications Department :

The Executive Engineer looks after maintenance and development of roads under his charge as also maintenance and construction of Government buildings.

v) Soil conservation :- The Divisional Soil conservation officer under-takes soil conservation measures such as counterbundling as also terracing of land. He also looks after some of the schemes pertaining to Agricultural Department.

vi) Malaria Officer:- Malaria Officer looks after the eradication of Malaria in the District.

vii) Employment Exchange :- The District Employment Officer maintains list of job-seekers and provides suitable candidates to the various officers on being notified the vacancies.

viii) Agricultural Research Stations- There are four - Agricultural Research Centres functioning in Kolhapur - district. The Station at Shirol taluka Hatkanangle has facility regarding research of sugarcane, while stations at Radhaagari, Ajra and Gadhinglaj conduct research in respect of rice, horticulture and cereals and pulses respectively.

ix) Cooperation :- The District Dy. Registrar of Co-operative Societies is in charge of cooperative movement in the district. He is assisted by four Asstt. Registrars who have territorial jurisdictions and deal with all the aspects of the cooperative movements in the district. In addition an Asstt. Registrar who has since been designated as Cooperation and Industries Officer works under the Zilla Parishad.

x) Forest - The Divisional Forest Officer, with his Headquarters at Kolhapur is in charge of the Department and works under the Poona Circle. The forests are divided into eight ranges and each range is in charge of a range forest officer.

The Forests under the Revenue Department are looked after by collector of the district.

xi) Others - The Civil Surgeon is in charge of the Civil Hospital. The Executive Engineer, Irrigation Division, looks after the irrigation projects. The Sales tax office makes assessments of sales tax due to Government. There are six sales tax officers in the district.

Central Government Administration :-

There is Income-tax department located at Kolhapur. Six income tax officers are assigned different areas, the Commissioner of income tax being located at Poona. There is Assistant Collector Central Excise at Kolhapur and there are three circle offices two at Kolhapur and one at Jaysingpur.

LOCAL BODIES ADMINISTRATION :-

1) ZILLA PARISHAD - In accordance with the provisions contained in the Maharashtra Zilla Parishad and Panchayats Samities Act 1961, the Zilla Parishads and Panchayat Samities started functioning all over the State in May 1962. In Kolhapur district there are twelve panchayat samities within the Zilla Parishad. The jurisdiction of the Zilla Parishad corresponds to the revenue district boundary. Similarly the boundaries of the twelve panchayat samities co-terminate with the boundaries of the tahsils. The Municipal limits, however, are excluded from the area of Zilla Parishad. The Zilla Parishad covers 97.28 percent of the area of the District and 81.08 percent of the total population.

The Kolhapur Zilla Parishad has 53 directly elected members. In addition to this a woman member has been coopted by the elected members. Besides, there are also five associate councillors who are Chairmen of the five federal cooperative societies conducting business in the District.

The Panchayat Samiti consists of all the elected and coopted councillors from the Block area and Chairman of a cooperative conducting business of purchase and sale of agricultural produce in the Block as associate member. Sarpanchas of village panchayats are also elected members of the panchayat samiti, their number is at the rate of two for each electoral division in the Block area.

The Zilla Parishad has an elected president and vice-president from amongst its elected members. At Panchayat samitilevel, the samiti has an elected chairman while the Block Development Officer appointed by the State Government acts as the secretary of the Panchayat Samiti.

An I.A.S. Officer works as the Chief Executive Officer of the Zilla Parishad at District level. He is assisted by Officers of the cadre of Class-I or Class-II who are heads of various departments of Zilla Parishad. All executive authority for the purpose of carrying out the provisions of the Maharashtra Zilla Parishad and Panchayat Samities Act vests with the Chief Executive Officer at District level and with the Block Development Officer at Panchayat Samiti level.

ii) MUNICIPALITIES : There are ten municipalities in Kolhapur district. The municipalities are located at - Kolhapur, Ichalkaranji, Jaysingpur, Kurundwad, Gadhinglaj, Kagal, Vadgaon, Murgud, Malkapur and Panhala. All the municipalities except Kolhapur and Ichalkaranji have population below 11,000 as per 1961 Census.

Public Bodies Administration :- As regards statutory bodies there is a State Transport Division located at Kolhapur, whose jurisdiction does not correspond to district boundaries. There are two Divisions Urban and Rural of Maharashtra State Electricity Board, each - Division being under the charge of Executive Engineer.

1.8. DEMOGRAPHY :- (i) General :- The total population of Kolhapur district as recorded in 1961 is 15,96,493. The population of the district is 15.4 percent of Poona division and 2.9 percent of population of Maharashtra State. The rural population of Kolhapur district formed 80.72 percent of the total population. The corresponding percentages for Poona division and Maharashtra State are 16.0 and 4.5. The urban population of Kolhapur district formed 13.4 percent and 2.3 percent of urban population of Poona Division and Maharashtra State respectively.

ii) Growth of Population - The population of Kolhapur district has risen by 22.05 percent during the decade 1951-61. The corresponding growth rates for Poona division and Maharashtra State are 24.1 percent and 23.6 percent respectively. It will be seen that the growth rate has been lesser in the district than in Poona Division and State.

There are significant differences in the rates of growth of population in various talukas. Most densely populated tahsils in the east have shown higher rates of growth. The western tahsils of Chandgad, Radhanagari, Bawada and Ajara do not have urban areas and had comparatively smaller growth of population. The rates of variation in Hatkanangle (+33.50) are above district average while Bawada (+11.62) has the lowest rate of growth. This is mainly due to urban centres in Hatkanangle and Karvir tahsils and industrialization at these places. The growth rate for urban areas was 48.0 per thousand as against 18.9 per thousand for rural area in the decade 1951-61.

(iii) Density:- The Density of population per square kilometer in the District, Poona Division and Maharashtra State are 193, 139 and 129 persons per Sq. km. Thus it will be apparent that density per Sq. Km. is highest in Kolhapur District as compared to Poona Division and the State. Hatkanangle, Karvir and Shirol tahsils are situated in the very fertile Krishna, and Panchaganga basin are the most densely populated areas in the district. High density is also due to large urban centres like Kolhapur and Ichalkaranji. The western tahsils are mostly hilly areas without any large urban centres and inspite of paddy cultivation, their density is lower. Chandgad and Shahuwadi tahsils make one fourth of the district's area but only one eight of its population, while Gadhinglaj, Hatkanangle Kagal, Karvir and Shirol tahsils together make 34.7 percent of districts area but 61.5 percent of its population. The density of population decreases as we go from east to west.

(iv) Literacy:- Comparative picture of literacy in the district Poona Division and Maharashtra State is given below:-

PERCENTAGE OF LITERACY

	Kolhapur District	Poona Division	Maharashtra State
Males	40.1	42.0	42.0
Females	12.0	16.1	16.8
Total	26.3	29.3	29.8

The level of literacy among males as well as females is lower in Kolhapur district as compared to Poona Division and State. The reasons for this is higher rate of rural population in the district and relative backwardness of the western part of the district.

(v) Livelihood classification :-

The population in 1961 Census was divided in two parts viz. workers and non-workers. About 45.6 percent of population was returned as workers as against 45.5 percent in Poona division and 47.9 percent in the State. 54.3 percent males and 36.7 percent females were returned as workers in the district. Of the workers 64.2 percent were engaged in cultivation, while 14.5 percent were returned as agricultural labourers. This is about 79 percent of total workers were engaged in agriculture. Household industry and manufacturing other than household industry claimed little over 10 percent of workers.

CHAPTER-II
EXPLANATORY NOTE ON THE STATISTICS
PRESENTED IN STATISTICAL
ABSTRACT

2.1 PURPOSE :

This is the Eighth issue of District Statistical Abstract brought out by District Statistical Office. The data presented pertains to the years 68-69 and 69-70. One of the purposes of the issue is to present statistical material on as many topics as is possible so that the abstract may be useful not only as a reference book but also research, planning or further socio-economic studies. The data is generally given tahsilwise. For some items when tahsilwise data is not available figures for the District are incorporated in the statements.

2.2 DISTRICT AT A GLANCE:

In this table certain eloquent figures of the District pertaining to demography, agriculture, industry, cooperation, health education, transport, planning etc. are presented.

The District Statistical Abstract for the year - 1968-69 and 1969-70 consists of two parts. Part-I of the abstract consists of chapters of Introduction, scope and limitations of statistics given in part-II, selected indicators and review of District level plan schemes implemented in Kolhapur district during the Annual Plan 1968-69.

Part-II of the Abstract consists of statistical tables giving statistics of various subjects viz. Agriculture, Cooperation, Industry, Transport and Communications, Education and other matters. In most of the tables statistical information for the financial year - 68-69 and 69-70 is given,

while in certain cases information for the calendar year 1968 or 1969 is given, comparative statistics of previous year are also given whenever possible. Salient features of the data presented in Abstract are given below.

2.3 I. CLIMATE

Table No.1 gives statistics about rainfall for the years 1968 and 1969 for fourteen selected centres of which twelve are tahsil headquarters. Table No.2 gives data pertaining to mean, mean maximum and mean minimum temperature at Kolhapur Centre, the mean maximum and mean minimum are the averages of maximum and minimum temperatures observed daily. The mean temperature is the average of the mean maximum and mean minimum temperatures thus arrived at.

2.4 II. AREA AND POPULATION

The figures given in the tables of this section are based on the 1961 population census. Table No.3 gives tahsilwise rural and urban population, its variation over 1951 census and area and population per Sq. kilometer. Table no.4 depicts tahsilwise classification of villages according to population ranges. Table No.5 gives tahsil wise classification of towns according to population ranges. No. of workers according to different livelihood classes for rural and urban areas separately is given in table No.6 Moreover in this table non-working population is also shown. Table No.7 gives population according to age group, mother tongue and religion separately for rural and urban areas. In table No.8 scheduled caste and schedule tribes population is given.

The figures adopted in the various cables are as published by Government of India in "Census of India, 1961" Vol. X, Part-

II-A". The various concepts adopted at the time of census - such as village, Town, worker, non-worker are as defined in the above census.

2.5 III. AGRICULTURE- Important statistics presented in this section pertain to land utilization, area under different crops, irrigation, yield and outturn agricultural wages, agricultural implements and famine and scarcity data. The data is generally for 1967-68 and 1968-69. The statistics, regarding area, its mode of utilization and irrigation are first collected at village level by the talathi and it is subsequently consolidated at taluka and district levels. - Though talathis are collecting data according to uniform system of concepts, some variation from year to year may be due to errors in compilation at various stages. These limitations

are to borne in mind while studying agricultural statistics.

Table No.9 gives tahsilwise land utilization statistics for 1967-68 and 1968-69. Table No.10 contains data on area under different crops in each tahsil. Yield per hectare and outturn of principal crops are given in table No. 11. It may be stated that yield rates are estimated on the basis of crop-estimation surveys conducted on sample basis by agricultural departments. These rates are used alongwith area figures to arrive at outturn of various crops. Table No.12 gives data pertaining to area irrigated by different sources, while table No.13 depicts area irrigated under each crop. Number of irrigation wells in use and not in use are given in table No. 14. In table No.15 information on minor irrigation works excluding wells is given.

It may be stated that a work involving an expenditure of less than 20 lakhs is treated as minor irrigation work. Work covering irrigable area upto 250 acres entrusted to Zilla Parishad and work above 250 acres to the irrigation department. Table No. 16 gives data on Major and medium irrigation projects. There is only one medium project viz. Radhanagari Hydro-electric work in the District and the work of another medium project namely Tulsi river project is under way at present. The data on this table is as on 30-6-70 & 30-6-70 and is collected from Executive Engineer Irrigation Division, Kolhapur. Table No. 17 gives agricultural wage rates for three selected centres viz. Kapshi in Kagal Tahasil, Madilge BK in Bhudargad Tahasil and Shirol from Shirol Tahasil. Information on agricultural wage rates is collected fortnightly from selected cultivators employing agricultural labourers. The data presented is monthly average of rates for male and females separately. Table No. 18 gives agricultural implements, electric pumps oil engines etc. The data is based on 1966 livestock census.

2.6 ANIMAL HUSBANDRY AND FORESTS:-

Data on Livestock presented is for Census 1966. Data on Forests and Veterinary pertain to the year 1968-69 and 1969-70. Table No. 20 gives a summary of livestock census which was conducted in 1966. There are two tables on forests statistics. Table No. 24(a) gives details of area under different types of forests. Information regarding forests under the control of the state Revenue Department and Forests Department is shown separately in this table. It will be seen from this table, that there is no area under Revenue Department, whereas according to statistics released

the area under forests is less than that given by Forests Department. The entire area under the control of forest department is reported to have been classed as forests, whereas actually some area under Forest Department may have been put to cultivation of crops. That is why the area under forests in land utilization statistics are lower than figures shown in foresta statistics. Table No. 24(b) gives estimates of production of major and minor forest produce.

2.7 EMPLOYMENT, INDUSTRY AND ELECTRICITY:-

In table 25 to 28, factory statistics are presented. The data pertains to the year 1968 & 1969 and is obtained from Inspector of Factories. The data covers factories registered under Factory Act, 1948 viz (1) .

Those employing ten or more workers and working with aid of power and those employing twenty or more workers and working without aid of power. Table 26 gives No. of working factories, days worked and average daily employment. Table 27 gives distribution of working factories according to products and their working strength. It may be noted that the No. of workers shown in the above two statements are the average No. of workers working daily throughout the year and not the total number on the register of factories. Table No. 28 shows distribution of factories according to number of days worked.

Statement 29, 30 and 31 give employment exchange statistics for the year 1968-69 and 1969-70. Table No. 32(A) gives number of employees according to different classes and according to pay and employment ranges as on 1-7-66. The data pertains to Government Employees only. Table 32(b) gives total employees on the various departments of the State Govt. The data on these two tables is

based on the Census of Government Employees conducted by the Bureau of Economics and Statistics.

In Table 34 and 35 data on electricity is given for the years 68-69 and 69-70. The data has been obtained from Maharashtra State Electricity Board and private companies in the district. Table No. 34 gives data on generation and consumption of electricity according to different uses, while table 35 gives number of towns and villages electrified and population covered at the beginning and at the end of Third Five Year Plan as also at the end of the year 68-69 and 69-70.

2.8 CO-OPERATION:-

In this category co-operative statistics generally for the co-operative years 68-69 and 69-70 are given. The co-operative year is from July to June. The data has been collected from District Deputy Registrar, Co-operative Societies. Table No. 36 gives in a summary form important information pertaining to different types of co-operative institutions according to four fold classification of societies into (1) Agricultural Credit (2) Non-agricultural credit (3) Agricultural non-credit and (4) Non-agricultural non-credit. In table 37 to 42 societies are grouped into (a) Co-operative Banks (b) Primary agricultural societies (c) Primary Co-operative marketing societies and (d) Other societies.

The main function of co-operative societies is to supply credit and give similar financial and other assistance to the people. Hence important particulars concerning this function such as fresh advances, outstanding overdues etc. are given. Table 43 gives registered money lenders and loan advanced by them.

2.9 MEDICAL AND PUBLIC HEALTH:-

In this section data on Medical and Public Health generally for the years 1968 and 1969 is given. The data pertains to public and public aided bodies and has been collected from Civil Surgeon, Municipalities and Zilla Parishad. Table 44 gives medical facilities available through public aided bodies in each Tahasil. Information of hospitals and dispensaries, number of beds, medical personnel and cases treated is given. In table No. 45 statistics on birth and deaths and infant deaths registered are given. In this table Tahasilwise break up of males and females is not given as the same was not available with Director of Public Health.

2.10 EDUCATION:-

Tables 48 to 50 relate to literacy and illiteracy and the data is based on 1961 population census. Table 51 gives number of institutions, pupils and teachers in the district for the years 1967-68 and 1968-69. The information is given separately for pre-primary, primary, secondary, higher and special schools. Tables 52 and 53 give information regarding concessions to backward classes and free education to economically backward class respectively. Grant in aid given to different types of institutions is shown in table No.54.

Table No. 55 gives Tahasilwise data on number of villages without schools according to different population ranges. This data has been collected from Block Development Officer and is as on 31-3-1969 and 31-3-1970.

2.11 TRANSPORT AND COMMUNICATIONS:

In this section road kilometerage, railway kilometerage in the district, statistics on motor vehicles in operation in Kolhapur subregion consisting of Kolhapur and Sangli districts, operational statistics of nationalised road transport and postal statistics etc. are given. Table No.56 gives railway, kilometerage as on 31-3-69 and 31-3-70. The length within the district is calculated between the railway stations in the district as exact kilometerage in the district are not available. There is only meteraguage in Kolhapur district at present. Table No. 57 gives road length according to types of road such as National Highways, State Highways etc. and according to types of surface. Data indicates position as on 31st March 1969 and 70 and covers roads under the jurisdiction of Zilla Parishad, Buildings and Communications Department and Municipalities. Tables 58 and 69 give Motor Vehicles in operation in Kolhapur sub-region and nationalised road transport in Kolhapur Division as on 31st March 1969 and 1970. The area of the Divisions is not co-terminus with that of District boundry. Results of traffic census on important roads conducted in Kolhapur district by B & C Department are presented in table No. 60.

2.12 LOCAL BODIES:-

Information mainly on items like income and expenditure of local bodies such as Village Panchayats, Municipal Council and Zilla Parishad is presented for 68-69 and 69-70.

Information both on Income and Expenditure is classified under broad heads depending on the functions. It is likely that data is misclassified by village Panchayats or Municipal Councils in spite of generally known principals. This limitation may have to be borne in mind in analysing the data. Table No. 63 gives in a summary form income and expenditure of all the three types of local bodies. Table No. 64 deals with coverage of village Panchayats and their income and expenditure panchayat samitiwise. Table No. 65(a) (b) gives headwise receipts and expenditure of Zilla Parishad respectively. Table 66 shows income and expenditure of Municipal Councils.

2.13 PLAN AND COMMUNITY DEVELOPMENT PROGRAMME.

Table No. 67 gives expenditure on district level schemes under different sub-heads of development during the years 1968-69 and 1969-70 in state and local sectors. It may be noted that the schemes which benefit mainly district are classified as District level. The classification of schemes into district level was adopted as per Govt. instructions from time to time. Table 68 gives physical achievements in respect of important items under different sectors of development. Table 69 to 71 gives coverage of C.D. Blocks as on 31-3-68 and physical achievements on selected items of importance. The data is compiled from the Quarterly and Annual Progress Reports submitted by C.D. Blocks.

2.14 PRICES.

Table No. 72 gives average prices of essential commodities collected in the district Headquarter for the calendar years 1966 and 1967.

However it may be borne in mind that prices quoted in the table are collected for one shop in the district headquarter and the monthly average is the average of weekly prices collected on each Friday during that month. The prices may therefore be treated as broad indicator of trend in changes in retail prices for each month in calendar years 1968- and 1969 presented in this publication. Table No.73 gives average consumer index number of working class for the Sholapur centre and Poona centre ^{for} the year 1967-68 and for each month during the year 1968-69. The Index Numbers are based on revised series with 1960 prices equal to 100 and for Poona with 1961 prices equal to 100. Groups of items considered are Food, Pan, Supari, Tobacco, intoxicants, fuel and light, housing, clothing and miscellaneous. The data is obtained from Commissioner of Labour.

2.15 MISCELLANEOUS:-

This section covers statistics of various miscellaneous subjects like Police-force, Crime, Cinema statistics, insurance, general election, Small Savings, Joint stock companies, newspapers and periodicals etc. The data presented is generally for the years 1968-69 and 1969-70 or for calendar years 1968 and 1969 or indicating position as on 31-3-69 or 31-3-70. As regards table No.82, land : revenue demand, collection and arrears are given. The demand minus collection tally with arrears. The amount of remission is taken as reduction in Demand and suspension is taken as addition to arrears as the amount is to be collected in subsequent years. The figures are inclusive of Land revenue cess. Table No. 85 gives Trends on selected items of importance.

2.16 SELECTED INDICATORS:-

Some tables giving selected indicators of development for each tahsil of district are appended at the end. The items covered are from topics like population, agriculture, electricity and factory workers, road kilometrage, education, and medical facilities etc. An effort is made to show the position of each tahsil in relation to its development under each item by way of ranking on the basis of the latest available data for the years 1968-69 and 1969-70.

CHAPTER NO. III
AN ANALYTIC REVIEW OF SECTORAL TRENDS

One of the main objectives of the planning is to promote development of different sectors of the economy and to remove imbalances in different parts. In this chapter an attempt has been made to review sectorial trends in respects of agriculture, livestock and poultry, employment, electric consumption, civic amenities, education, communication etc. This study is based on the basis of data as at the beginning of the Third Five Year Plan and during Annual Plan 1967-68 and 1968-69. The intention is to show broadly the development accrued during the beginning of Third Five Year Plan, and Annual Plan for 1967-68 and 1968-69.

3.1 Agricultural Development :- Agriculture contributes about one third of the State Income of Maharashtra. This is mainly due to agricultural backwardness of its henterland. The productivity per acre is low due to inferior quality of soil, meagre irrigational facilities, uncertain rainfall, low rate of consumption of fertilizers and financial backwardness. The indicators below will show the position of the district and the comparative position of different tahsils in respect of some of the important aspects.

3.2 Gross Sown Area :-

The percentage of net sown area to the geographical area in Kolhapur district for the year 1968-69 was 50.4. This indicates that about half of the geographical area is not available for cultivation due to hilly tracts and forest land etc.

The table below gives percentage of gross cropped area in net sown area to indicate extent of double cropping.

TABLE NO. 1

Percentage of grosscropped area to net area sown in Kolhapur district for the years 1960-61, 1967-68, and 1968-69.

Sr. No.	Taluka	Percentage of gross cropped area to net area sown.		
		1960-61	1967-68	1968-69
1.	Shahuwadi	109	104	103
2.	Panhala	106	102	101
3.	Hatkanangle	101	101	102
4.	Chirol	101	101	101
5.	Karveer	103	101	101
6.	Bawada	100	100	100
7.	Radhanagari	105	102	101
8.	Kagal	101	101	100
9.	Bhudargad	102	100	100
10.	Ajara	101	101	100
11.	Gadhinglaj	101	102	102
12.	Chandgad	101	102	102
District:		103	101	101
Poona Division:		106	105	105

The percentage of area sown more than once to net area sown for district as a whole had decreased by two percent over the period of seven years. Though the gross and net area sown have both increased, the percentage of extent of double cropping in relation to net area sown has decreased. The reason is due to shift of production to cash crop like sugarcane having longer duration. The area under sugarcane increased from 32125 hectare in 1961-62 to 40670 hectare in 1968-69. Panhala, Shahuwadi, Karveer and Radhanagari, Hatkanangle are the taluqs where double cropping is resorted to in greater degree due to sugarcane cultivation.

3.3 Productivity of important crops:-

The productivity of important crops of Kolhapur District is given below with comparative figures for Poona Division.

TABLE NO.2.
(Figures in kg. per Hectar)

Crop	Kolhapur District			Poona Division	
	1960-61	1967-68	1968-69	1960-61	1968-69
1	2	3	4	5	6
Rice	1365	920	944	1166	915
K. Jowar	1424	1221	914	1242	403
R. Jowar		471	507		
Wheat	751	826	640	549	636
Sugarcane (in terms of Gur)	7768	8680	8842	8559	7260
Groundnut (pods)	1050	1002	1038	798	825

From the above figures it is seen that the yield rates of almost all crops is good in 1960-61 as it was regarded as a year of bumper crop in the country. Rice is an important crop of Kolhapur district and the yield rate is also favourable as compared to Poona Division. The yield has, however decreased in 1967-68 and 1968-69 in the district as also in the Division, yield of Kharif Jowar is favourable as compared to that in Poona Division but unfavourable in respect of Rabi Jowar. The yield of wheat is also greater than that in Poona Division. Though Kolhapur district has been hailed as producer of sugarcane, the yield in the year 1960-61 was lower than that in Poona Division. However, the yield has very much improved in 1967-68 and 1968-69. This is due to better irrigation and use of fertilizers. Yield of groundnut (pods) in the district decreased from 1050 kg in 1960-61 to 1038 kg in 1968-69.

3.4 Gross Value of Agricultural Production:- The prosperity in rural areas depends on the extent of agricultural production and the income accrued to the cultivators. The per capita (Rural population) value of agricultural output in Kolhapur district in 1960-61 was Rs. 226/- which decreased to 219 in 1961-62. The table gives per capita income in different districts of Poona Division.

TABLE NO.3.
Per Capita (Rural population) gross value of Agril. output (in Rs.)

Sr.No.	District	1960-61	1961-62
1.	Ahmednagar	240	240
2.	Poona	184	132
3.	Satara	142	133
4.	Sangli	170	174
5.	Sholapur	197	197
6.	Kolhapur	226	219

In 1961-62 per capita value increased in only one district i.e. Sangli. It was constant in Ahmednagar and Sholapur and decreased in rest of the district. Kolhapur district stands second in the Poona Division as regards per capita value of production, the first being Ahmednagar district.

3.5 Irrigation:- The percentage of net area irrigated to net area sown is given below:-

TABLE NO.4-A

percentage of net irrigated area to net area sown				
Sr. No.	Taluka	Year:-		
		1960-61	1967-68	1968-69
1.	Shahuwadi	10	6	7
2.	Panhala	14	12	14
3.	Hatkanangle	14	16	19
4.	Shirol	9	13	18
5.	Karveer	17	19	21
6.	Bawada	5	5	5
7.	Radhanagari	10	13	16
8.	Kagal	7	6	7
9.	Bhudargad	8	7	9
10.	Ajara	2	2	3
11.	Gadhinglaj	4	5	7
12.	Chandgad	3	4	6
	District	9	10	12
	Poona Division	10	10	11

There has been increase in percentage of area irrigated in 1967-68 & 1969-70 as compared to 1960-61. There has been increase in the area irrigated in 1967-68 as compared to 1960-61 in all talukhs except Shahuwadi and Panhala. The percentage of area irrigated decreased in Shahuwadi and Panhala. The decrease has been due to the fact that the area sown has increased considerably in 1967-68 as compared to 1960-61, while there has been decrease in the net area irrigated. The decrease in percentage for district and Talukhs except Chandgad in 1967-68 has been due to decrease in net area irrigated due to water scarcity.

The percentage of area irrigated more than once to net irrigated area was 2.25 percent in 1960-61 which has gone up to 8.02 percent in 1967-68 and stood at 6.03 in 1968-69. The talukwise position is given in table below:

TABLE NO.4-B
Talukwise percentage of gross irrigated area to net irrigated area.
Percentage of gross irrigated area to net irrigated area.

Sr. No.	Taluka	Year-1960-61	1967-68	1968-69
1.	Shahuwadi	110	137	123
2.	Panhala	100	104	106
3.	Hatkanangale	104	107	106
4.	Shirol	100	107	106
5.	Karveer	104	102	102
6.	Bawada	100	110	106
7.	Radhanagari	100	108	104
8.	Kagal	100	106	104
9.	Bhudargad	100	102	103
10.	Ajara	100	127	113
11.	Gadhinglaj	101	111	106
12.	Chandgad	100	124	
District:-		102	108	106
Poona Division:-		117	NA	107

3.6 Changes in the cropping pattern:-The table below gives percentage area under important crops to gross cropped area in 1960-61, 1967-68 and 1968-69.

TABLE NO. 5

Percentage of area under important crops to gross cropped Area

Sr. No.	Crop	Kolhapur District		
		1960-61	19678-68	1968-69
1	2	3	4	5
1.	Rice	22.9	23.9	22.6
2.	Jowar	12.7	10.1	11.6
3.	Total cereals	50.5	48.0	48.3
4.	Total pulses	4.3	3.9	3.5
5.	Total foodgrains	55.3	51.9	51.8
6.	Sugarcane	7.5	7.9	5.2
7.	Total foodcrops	65.2	62.3	64.0
8.	Groundnut	12.1	14.9	13.2
9.	Tobacco	3.0	1.6	1.3
10.	Total non food crops	34.8	37.7	36.0
	Total cropped area	100.0	100.0	100.0

The area under rice, groundnut and sugarcane increased over the period of seven years while the area under Jowar and tobacco decreased. The area under cereals and pulses also decreased. The total area under food crops decreased from 65.2 percent to 64.6 percent as compared to gross cropped area during the respective years. Consequently the area under non-food crops increased. Under this category the increase was notable in respect of Groundnut.

As regards irrigation, the area irrigated increased from 39069 hectar in 1960-61 to 51466 hect. In 1968-69 the increase being 31.73 percent. The area irrigated under sugarcane increased from 31374 hect. to 40670, the increase being 27.60 percent.

3.7 AGRICULTURAL CREDIT AND OUTSTANDING DUES:-

The following table gives the progress of agricultural credit in Kolhapur District.

TABLE NO.6

Agril. credit facilities given during 1960-61, 1968-69 and 1969-70 in Kolhapur District.

Particulars	1960-61	1968-69	1969-70
1. Agricultural Credit Societies.	791	863	868
2. Membership	1,40,929	2,21,159	2,27,396
3. Loans advanced(in Rs. lakhs)	364.91	920.71	1085.91
4. Loans outstanding(in lakh)	377.46	893.64	1129.00
<u>Land Development Bank</u>			
1. Number	1	10	13
2. Membership	429	17,738	20,874
3. Loans Advanced(Rs.in lakhs)	0.84	205.68	248.21

It will be seen from the above table that there has been increase in the agricultural co-operative credit . The loans advanced by agricultural co-operative societies increased by 66 percent as at the end of Third Five Year Plan, while the amount outstanding increased by 62 percent as compared to the position at the beginning of the Plan. Loan advanced per member was Rs. 258 in 1960-61 which increased to Rs. 410 in 1968-69 and Rs. 477 in 1969-70. The loan advanced by land development bank was Rs. 84,000 in 1960-61 but increased to Rs. 205.68 lakhs in 1968-69 and to Rs.248.21 lakhs in 1969-70.

3.8 Agricultural Wages rates:- Data on agricultural wage rates from 3 selected centres in each district of Maharashtra are being collected since 1963-64. The 3 centres selected from Kolhapur district are Shirol Madilge Bk. and Kapashi.

The wage rates have been found to vary with Urban and Rural Characteristics of the selected centres The wage rate at Shirol are found to be higher than Kapashi and Madilge Bk. Centres both in respect of field labour and other agricu

ltural labour due to proximity of Shirol and Jaysingpur town.

A male field labour^{er} is found to get on an average wage of Rs. 2.12 during 1969 and female labourer Rs. 1.80 other agricultural labour^{er} gets a wage of Rs. 1.70 (Male) and Rs. 1.13 (Female). Hardsman is getting wage of Rs. 1.29, skilled workers such as carpenters, Blacksmiths, Cobblers whose services are requisited occasionally for agricultural pursuits are still found to be paid on Baluta system, a system in which wages are paid mostly in kind only annually usually after harvests.

3.9 Live Stock:-The 10th quinquennial livestock census was carried out in year 1960 all over the state. Animal husbandry makes a substantial contribution to the economy by providing income and draught power to farmers, subsidiary food to human population and resource.

Number of livestock, particularly Bovine and Ovine population in relation to percentage cultivable land is one of the indicator of development.

The No. of livestock per 100 hectare in Poona division as a whole is 116 and as such the ratio of 150 for Kolhapur district compares favourably with that of the Division. Between the talukas Karveer is having largest number of livestock per hectare of cultivable land. The talukas of Hatkanangle, Panhala, Gadhinglaj, Shirol, Shahuwadi and Kagal follow in the order given. They are having livestock per hectare of cultivable land more than or equal to that of the district ratio. The talukas of Bhudargad, Ajara, Chandgad, Radhanagari and Bawada are having live-

stock lesser than the district ratio. Notably these talukas fall in the heavy rain fall tract.

The number of livestock per 100 hectare has decreased in 1966 as compared to that in 1961.

3.10 Poultry:- The total poultry increased from 423372 in 1961 to 538814 in 1966 in Kolhapur district. The number of poultry per 1,000 population has therefore increased from 265 in 1961 to 337 in 1966 .

The comparative ratios for Poona Division as a whole are 344 and 394 in the corresponding years. The rate of increase in poultry per 1,000 human population in Kolhapur district is 72 percent as against 14 percent for Poona Division as a whole. This comparison however is based on constant human population factor of 1961 for both the years 1961 and 1966.

3.11 Consumption of electricity:- The per capita electricity consumption in Kolhapur district is 37.36 KWH as against 43.04 KWH for Poona division in 1965-66. The consumption increased to 48.6 in the district as against 53.6 in Poona division. While calculating the per capita consumption population of 1961 census is taken. The per capita consumption in 1969-70 is 117.6 KWH in the district.

3.12 Enrolment employment exchange and vacancies notified:-

One of the objectives of the plan is to offer employment opportunities and reduce unemployment. Additional employment opportunities must be substantially in excess of additional labour force.

TABLE NO. 7.

No. of candidates enrolled in Employment Exchange, Kolhapur and vacancies notified in the years 1961-62, 1968-69 and 1969-70.

TABLE NO.7 contd.

Item	Year- 1961-62	1968-69	1969-70
Candidates enrolled	8,463	9,175	9,602
Vacancies notified	733	1,309	1,891
Percentage of vacancies notified, to registration.	8.7	14.3	19.7

The vacancies notified are only about 8.7 percent of the total registration in 1961-62. However in 1968-69 this percentage had gone up to 14.3 and to 19.7 percent in 1969-70. Employment provided in the private sector without recourse to employment exchange is substantial and even in public sector, some recruitment is done through public service commission and also by advertising the post. The employment exchange statistics provides only a rough yard stick to indicate the trend of the extent of unemployment and employment opportunities.

TABLE NO.8

3.13 Increase in Indoor and Outdoor patients treated.

Item	1961	1968	1969
No. of Indoor patients	30,382	57,544	48,696
No. of Outdoor Patients	6,11,083	8,56,729	6,90,241
Total patients treated -	6,41,465	9,14,273	7,38,937

The outdoor patients treated has increased over seven years. However, the total number of indoor patients increased in 1968 but comparatively decreased in 1969. The percentage increase in patients treated over seven years comes to 42.5.

3.14 Increase in No. of students of different categories:-

It will be clear from the following table that there has been phenomenal increase in education of all types.

TABLE NO.9

Percentage increase in 1967-68 over 1968-69.

Type	Boys	Girls
1. Primary	2.02	3.93
2. Secondary	5.49	6.46
3. Higher	11.74	1.40

There has been increase in the number of school going children boys and girls in all categories. The increase is marked in respect of boys in higher categories.

3.15 Increase in road length per 100 Sq. Km.:-

The road facilities available in the district could better be judged by working out road length per 100 Sq. Km. The road length in Kolhapur district including municipal roads was 25.18 km. per 100 Sq.Km. as at the beginning of Third Plan which increased to 30.62 at the end of Third Plan and stood at 30.95 as on 31-3-1970.

.km. is

37. km.

3.16 Increase in Banking facilities in proportion to population:-

The No. of offices of all types of banks in Kolhapur district was 51 in 1961. This No. rose to 93 in 1968 and 112 in 1969. There were 5.8 banking offices per lakh of population in 1968 and 7.0 in 1969 as against 3.2 in 1961.

3.17 Prices:-The work of collection of prices at district Headquarters was entrusted to the District Statistical Office since November 1962. An attempt is made below to give changes in the prices during 1963 to 1969.

However it may be mentioned the prices of commodities are restricted to only one quotation and that too from only one one shop in the district headquarter. As such the brief note below only indicates very broadly the trend of change in the average retail prices in 1963 and 1969.

Food:- There has been a great rise in the food prices. This is attributed to the shortage of food brought out partly due to inadequate and or untimely rainfall and growing demand due to population increase and increase in the consumption level of certain categories of people. The rise has been double or more than double in respect of some commodities. The changes in respect of some important commodities of daily consumption are given below per Kg. Incase of wheat the price rise from 58 paise per kg. to Rs. 1.19. In respect of Gram Dal the rise in price has been nearly four times viz. it rise from 57p. to Rs. 1.31. The Dal also indicated rise from 75p. to 1.42. The price of Gur fluctuated between 62p. to Rs.1.01. Groundnut oil rose from Rs. 1.85 to 4.40 per kg. The consumer price index of Sholapur and registered a rise of about 90 percent in the food group in 1969-70 as compared to 1960 average index.

Fuel etc:- The price rise of this category has not been as sharp as that of the food group. The price of charcoal rose from 8.50 to 10.53 per 40 kg. while the price of firewood rose from Rs. 2.50 to 5.04. The price of Kerosene has however registered increase i.e. from 35 p. to 59 p. per litre. The consumer price index of Sholapur for this category registered percentage increase of 53 percent in 69-70 as compared to 1960 index.

Clothing:- It is difficult to locate changes in prices of this category due to change in varieties. However an effort was made to find out substitute which closely compares with the previous variety going out of production or market.

Prices of some varieties as at the end of 1962 and during 1967 are given below for broad comparison.

	<u>1963</u>	<u>1968</u>
Saree	10.58	27.88
Shirting	1.26	2.68
Blouse piece	1.25	2.50
Dhoties	13.06	16.91

The consumer price index for Sholapur for this group rose by 37 percent in 67-68 as compared to 1960 base.

Miscellaneous articles:- The prices of some of the miscellaneous items of daily consumption are given below:-

	<u>1963</u>	<u>1969</u>
Washing soap	1.43	2.00
Gupari	6.79	10.15
Cigarettes (Berkeley)	.0.34	0.54

The consumer price index of Sholapur for this group rose by about 56 percent in 69-70 as compared to 1960 base. The general rise in index number in 1969-70 was of the order of 76 percent over 1960 base.

I

CHAPTER-IV

Annual Plan 1968-69 & 1969-70.

General:-

4.1 From 1966-67 Annual Plans are being executed pending finalisation of Fourth Five Year Plan. During 1968-69 an amount of Rs.3.29 crores was spent on District level schemes. In this Annual Plan 37.2 percent amount was spent on Agricultural Programme and 29.1 percent on Power Projects.

Progress of Expenditure In Annual Plan For 1968-69:-

4.2 Expenditure under different heads of development during 1968-69 is given below :-

TABLE NO.1(Rs.in thousands)

Sr. No.	Head of Development	State Sector	Local Sector	Total	% of Total Expenditure
1.	Agricultural Programme.	10,287	1,950	12,237	37.2
2.	Co-operation and C.D.	560	1,318	1,878	5.8
3.	Power projects	9,579	-	9,579	29.1
4.	Industries and Mining	545	19	564	1.7
5.	Transport and Communication	489	1,516	2,005	6.1
6.	Social Services	2,099	4,522	6,621	20.1
Total :-		23,559	9,325	32,884	100.0

Progress of Expenditure in Annual Plan for 1969-70:-

4.3 During 1969-70 an amount of Rs. 2.16 crores was spent on District level schemes. In this Annual Plan 58.6 percent amount was spent on Agricultural Programme. This was due to the intensive programme under Minor Irrigation and Soil Conservation during 1969-70.

Expenditure under different heads of development during 1969-70 is given below :-

TABLE NO.2(Rs. in Thousands)

Sr.	Head of Development	State Sector	Local Sector	Total	% of Total expenditure.
1.	Agricultural programme	10,573	2,079	12,652	58.6
2.	Co-operation and C.D.	254	769	1,023	4.7
3.	Power project	1,654	-	1,654	7.8
4.	Industries & Mining	36	224	260	1.2
5.	Transport & Communication	539	1,135	1,694	7.8
6.	Social Services	2,375	1,926	4,301	19.9
Total :-		15,431	6,153	21,584	100.0

The Outlays in the Annual Plan were Rs.328.84 and 215.84 lakhs as compared to the average annual expenditure of Rs.128.72 lakhs in the Third Five Year Plan excluding programme of electrification.

During 1969-70 emphasis was on Agricultural Programme in as much as 58 percent outlay was incurred for agricultural development as against 37 percent during 1968-69. The outlay under social services was remained constant for both the years 1968-69 and 1969-70.

AGRICULTURAL PROGRAMME:-

4.4 During the year 1969-70 an amount of Rs.126.52 was spent on agricultural programme. Expenditure during 1968-69 and 1969-70 under each of the su-heads is given below:-

TABLE NO.3 (Rs. in thousands)

Sub-head of development	1968-69		1969-70	
	Expenditure	Percentage	Expenditure	Percentage
1. Agricultural Production	807	6.7	202	1.6
2. Minor Irrigation.	7,089	57.9	7,875	62.2
3. Soil conservation	3,762	30.7	4,189	33.1
4. Animal Husbandry	56	0.5	9	0.1
5. Dairy development	89	0.7	42	0.3
6. Forest	59	2.9	266	2.1
7. Fisheries	23	0.2	19	0.2
8. Ware housing and Marketing	52	0.4	50	0.4
Total:-	12,237	100.0	12,652	100.0

It will be seen that greater emphasis in annual plans ~~was on Minor Irrigation and Soil Conservation.~~ This is mainly due to accelerated rate of growth under minor irrigation and soil conservation. Under minor irrigation greater outlay was on lift irrigation as under soil conservation terracing was given greater priority in order to bring more land under cultivation.

4.5 ACHIEVEMENTS:

Since agriculture is a private enterprise the activities of Govt. consist mainly of distribution of improved seeds, chemical fertilisers and compost and green manures, plant protection services, agricultural training and horticultural development. Under the programme of agricultural production 1987 quintals of improved foodgrains, were distributed during the annual plan 1968-69. Chemical fertilizers of the order of 20054 tons were distributed during the same year. Under Soil Conservation, emphasis was on the scheme of terracing of land due to hilly tracts in this district. About 3100 acres were terraced while counterbundling was carried out in 9213 acres during 1968-69. In the annual plan 1969-70 terracing was done in 3137 acres and counterbundling in 7425 acres. Under Minor Irrigation additional irrigation potential created was of the order of 7,312 and 7,383 acres respectively during the years 1968-69 and 1969-70. Under the Fisheries 6.17 lakh fingerlings were stocked in 1969-70 as against 3.13 lakh during 1968-69.

4.6 CO-OPERATION AND COMMUNITY DEVELOPMENT:-

Under sub-head co-operation loans worth Rs.1,036 lakh were advanced by the agricultural societies during the .

annual plan 1969-70 as against Rs.920.71 lakh in the year 1968-69. Under co-operation greater outlay was on development of co-operative marketing strengthening of co-operative credit and formation of lift irrigation Societies, while under C.D. programme most of the amount was spent on C.D. project.

4.7 POWER PROJECTS:-

An outlay of Rs.95.79 lakhs i.e. 29.1 percent of total outlay was incurred under this head during 1968-69. 285 villages were electrified as at the end of Third Five Year Plan. As on 31-3-70, 483 villages were electrified. The percentage of villages electrified to total villages in the district works out to 44.

4.8 INDUSTRIES AND MINING:-

Under this sub-head 1.7 percent and 1.2 percent of the total outlay was incurred during the annual plans 1968-69 and 1969-70 respectively. The expenditure was mainly on development of handloom industry and industrial co-operative of handicraft workers.

4.9 TRANSPORT AND COMMUNICATION:

6.1 percent of the total outlay was incurred under this sub-head during 1968-69 while 7.8 percent was incurred during the annual plan 1969-70. The expenditure was earmarked for development of district roads, rural roads and construction of new roads. Greater emphasis was on district roads and roads in hilly areas.

The works of Tambraparni and Chikotra Bridges were in progress and were nearing completion by the end of 1969-70. Bhui bawada and Karul Ghat road works were nearly completed during the above two annual plans.

4.10 SOCIAL SERVICES EXPENDITURE:-

Under this head about 20 percent of the total outlay was incurred during both the years of the annual plan 68-69 and 1969-70. The sub-headwise expenditure is given below:-

TABLE NO.4

Sub-head	Expenditure		Percentage to Total	
	1968-69	1969-70	1968-69	1969-70
1. General Education	2,264	696	34.3	16.2
2. Technical Education	169	605	2.6	14.2
3. Health and Family Planning (including Medical & Nursing)	1,041	845	15.8	19.6
4. Water supply and drainage.	1,415	1,406	21.4	32.3
5. Housing	662	298	9.9	6.9
6. Urban development	24	57	0.4	1.3
7. Backward class welfare	331	40	4.9	0.9
8. Social welfare	12	41	0.2	0.9
9. Craftsman training and labour welfare	660	307	9.9	7.1
10. Information and publicity	43	6	0.6	0.1
Total :-	6,621	4,301	100.0	100.0

Under the scheme of general education greater outlay was on expansion of primary education and development of non-Govt. secondary schools. Under technical education greater emphasis was on development of existing polytechnics. Under public health greater priority was given to Family Planning. Under water supply scheme, Kolhapur and Ichalkaranji water supply schemes were envisaged. Kolhapur drainage scheme has also been taken up. Gadhinglaj, Malkapur and Vadgaon water supply schemes were in progress. Under labour and labour welfare, the expansion of industrial training institute was envisaged.

Under Education eleven primary schools and ten secondary schools were started during 1969-70. 75 villages were benefitted under the scheme of rural water supply. The scheme of improvement of water supply of Kolhapur and Ichalkaranji was undertaken during the period of both the annual plans under report.

PART-III

DISTRICT STATISTICAL ABSTRACT

OF

KOLHAPUR DISTRICT

C o n t e n t s .

Statistical Abstract for the year 1968-69 and 1969-70.
TOLNAPUR DISTRICT.

Sr.No. of Table	Subject.	Page Nos.
	<u>1. Climate.</u>	
1.	No. of Rainy days and Total Rainfall at selected Centres.	1
2.	Mean, Mean Maximum, Mean minimum Temperature at selected Centres.	7
	<u>2. Area and Population.</u>	
3.	Talukawise Rural and Urban Population according to 1961 Census and Variation with 1951 Census.	8
4.	Talukawise classification of villages according to population ranges in 1961 Census.	12
5.	Talukawise classification of Towns according to population ranges in 1961.	14
6.	Number of Workers and non-workers in each Taluka, according to 1961 Census.	16
7.	Distribution of Population according to (A) Age group, (B) Mother Tongue and (C) Religion.	18
8.	Scheduled Caste and Scheduled Tribes, according to 1961 Census.	19

		1968-69	-	368.8	627.0	390.5	56.6	-	-	-	-	1074.1	98.0	1540.9

Note:-*1) Figure is actual and not Rs. in 1000.

2) NA = Not Available.

3) As per new Formula of Grant-in-aid to the Secondary School, tuition fees are not directly reimbursed to the Economically Backward classes pupils in the year 1967-68 and 1968-69. These fees are, however, reflected in grant-in-aid to the school. Hence it appears that the concessions are reduced in the year 1967-68 and 1968-69.
