CHAPTER NO. 1

INTRODUCTION CHAPTER

1. Introduction and Location :

The age-long famous temple at Tuljapur town of this district enshrines the Goddess Bhavani, the popular deity of Maharashtra. The cult of Goddess is very ancient one and finds mention even in "Vedas" where she is called "Aditi". The earliest inscriptional evidence regarding its antiquity can not go beyond 1398 A.D. The Goddess was the principal deity of 'Chhatrapati Shivaji', the other 'Chhatrapatis', and 'Peshwas' who donated quite generously to the temple. The village 'Thair' in the district is also an ancient place and was known as Tagara. It also finds mention by Ptolemy in his work "Periplus of Eurathrean sea" (1st Century A.D.). Here an ancient Buddhist daitya has been converted in later period into a Brahmanical shrine by installing the image of "God Vishnu" and is at present known as "Trivikrama" temple. 'Thair' is also the native place of poor saint "Gora Kumbhar". The Reshtrakutas who succeeded Chalukyas of Badami in 753 A.D. has their epithet "LATTALURA PURA VARADHISA" suggesting that they were the inhabitants of Latur.

2) Boundaries.

To the extreme south of Marathwada, Osmanabad district lies between 17° 35' and 18° 40' north latitude and 75° 16' and 76° 40' east longitude. Osmanabad district is bounded by part of Sholapur district on the south, Bhir district on its north, Nanded district and Bidar district of Mysore State on its east and Ahmednagar and part of Sholapur districts on its west. Sholapur city is the nearest town and it has therefore close commercial and social ties with it. Barsi taluka in Sholapur district is almost

=====
contd....
=====

surrounded by Osmanabad district. Nanded and Bhir towns are about 136 miles (217.61 Km.) and 80 Miles (128.0 Km) respectively away from Osmanabad^{town} and are directly connected by State Transport bus service.

The Sholapur-Aurangabad road passes through the district. The Latur-Miraj railway line and the Parli-Hyderabad railway line (now included in the South Central Railway Zone) also pass through this district. Latur is the biggest railway station in this district.

3. Administrative set up :-

Osmanabad town is the headquarters of Osmanabad district which was named after Meer Osman Ali Khan, the Nizam of Ex-Hyderabad State on the occasion of his coronation in 1910.

The original name of Osmanabad town was 'Dharashiv'.

Naldurg was the head-quarters of this district before 1861. This district was included in the Ex-Hyderabad State in 1853 and formed its part and parcel upto 1956. After States' reorganization in 1956, this district was merged in bilingual Bombay State on 1st November, 1956 and was subsequently included in Maharashtra State on 1st May 1960. This district formerly consisted of 1) Osmanabad 2) Tuljapur 3) Parenda 4) Baul^{talukas} 5) Kalam 6) Latur 7) AUSA and 8) Umerga in the erstwhile Hyderabad State to which Nilanga, Udgr and Ahmedpur talukas of former Bidar district were added after reorganization.

Now consisting of 11 talukas the district is presently in Aurangabad Division called as Marathwada comprising five districts viz. 1) Aurangabad 2) Farbhani, 3) Nanded 4) Bhir and 5) Osmanabad. Almost all district offices of Osmanabad district are located at Osmanabad town which is situated on the bank.....

of the river ' Bhogawati'. Yeasi is the nearest railway station about 13 miles away from Osmanabad town. Amongst the districts of Marathwada, Osmanabad had the biggest area under the Nizam's own crown Estate called 'Sarf-e-Khas'. The 'Sarf-e-Khas' was merged with the Govt. area under the Sarf-e-Khas (merger) regulation act in 1949. All Jagir areas were also abolished and taken over under direct government administration in the same year.

In ^{the} 1951 census, there were 19 towns, but as the definition of town was changed in ^{the} 1961 census, only 13 of them were classified as towns. Amongst them included all taluka headquarters and Murum in Terga taluka and Naldurg in Tuljapur taluka. Latur, Osmanabad and Udgir towns have city municipalities and the rest have town municipalities.

There are in all 1,403 revenue villages in this district of which 12 villages are merged in urban areas and 83 villages are uninhabited.

The Collector is incharge of general administration, law and order, land revenue and civil supplies. He is assisted by a Resident Deputy Collector in his office and three Deputy Collectors who hold the charge of the three revenue divisions and have their headquarters at Osmanabad, Latur and Udgir respectively, Tahsildars are incharge of talukas.

4. Zilla Parishad Pattern.

The Zilla Parishad, Osmanabad came into existence on 1st May 1962. The Parishad consists of 53 members out of which 52 are elected, 4 are associated and 2 are lady co-opted members.

The four associated members of the Parishad are 1) Chairman, District Marketing Society Ltd., Latur,

2) Chairman, District Industrial Co-operative Association Ltd. Latur
3) Chairman, District Co-operative Board, Osmanabad
and 4) Chairman, District Central Co-operative Bank, Latur.
The President, Vice President and two chairmen incharge of different committees are amongst the elected members. The President is incharge of the Zilla Parishad meetings and standing committees. The vice-president is the Chairman of Education and Finance departments committees. There are two other chairmen one incharge of public health and works departments committees and the other incharge of Agriculture, Animal Husbandary, operation and industries Departments committees. For administrative purposes the Chief Executive Officer is the head of the Zilla Parishad. The Zilla Parishad consists of 11 branches. The Deputy Chief Executive Officer assists the Chief Executive Officer in the overall administration.

5. Area :

The area of Osmanabad district is 14,271.7 sq. km. according to the figures furnished by the Surveyor General of India which is 22.08% of the area of Marathwada and 4.69% of the area of Maharashtra State. The rural area of this district is 12,845 sq. km. and the urban area is about 426.7 sq. km. The area reported by the Director of Land Records, Maharashtra State for Osmanabad district is 14,256 sq. km. In Marathwada region, this district is next to the Aurangabad district in size. In terms of area, Osmanabad district ranks seventh among the 26 districts of Maharashtra State. The average area of a district of Marathwada works out to 13299.60 sq. km. and the average area per district in Maharashtra State is 11,799.99 sq. km.

6. Topography :

A major portion of this district is a laterite plateau with an average height of 2,000 feet above the sea level. This district is covered with small hills and offshoots of the Balaghat. Parts of Bhum, Ausa, Kalam, Osmanabad and Tuljapur talukas are situated on Balaghat ranges and the rest on table lands.

The district lies partly ⁱⁿ the upper Godavari basin and the partly in the Bhima basin. Ahmedpur, Udgir, Kalam, Ausa, Latur and Nilanga talukas are situated on the plateau of the Balaghat and lie in the valley of the Manjra which is an important tributary of the Godavari. Osmanabad and Umerga talukas are drained by the Terna, an important feeder of the Manjra. Parenda and parts of Bhum, Tuljapur and Umerga talukas are in the basin of the Sina river which is a tributary of the Bhima.

Of all the towns in the district, Bhum commands the highest elevation of 2,500 feet from the sea level whereas Parenda has the lowest height of 1,735 feet from the sea level. The average height of the plateau is 2,000 feet above the sea level. The low land portion to the south of the plateau lies in the Bhima basin.

7. Hills, River system & Soils :

The main system of hills is the Balaghat and its offshoots from the north-west/corner from Ahmednagar and stretches to the south-east. It divides the district into two portions, plateau to the north-east and low lands to the west, south-west and south. The general slope of the plateau is from south-west to north-east.

There are two broad natural zones in the district viz,

- 1) The Balaghat plateau drained by the Manjra and the Terna rivers and their tributaries and 2) The southern low land plain which is in the Bhima basin. The river Manjra flows on the

northern border and demarcates this district from Bhir district.

In addition to hill ranges the district abounds in a net work of rivulets running from all sides.

The Manjra which rises in Patoda taluka of Bhir district runs towards the east alongwith the northern boundary as far as the north-eastern corner of Latur taluka where it takes a southerly direction before entering Bidar district at Morgre ^State. Its length in the district is about 65 miles.

The Terna flows from west to east in Osmanabad, Ausa, Umerga and Nilanga talukas and meets the Manjra river near the eastern boundary of the district. The Manyad is also a tributary of the Manjra. It flows towards the northeast through Ahmedpur taluka and enters Nanded district to meet the Manjra on the eastern boundary of the district. The Tawarja which drains Latur taluka joins the Manjra at Siwani village. On the western border of Parenda taluka the Sina flows from the north to the south. The Bori flows through Tuljapur taluka and joins the Sina river lower down in Sholapur district. Even though there are a number of small rivers and rivulets streaming in the district like the Bori in Tuljapur taluka or the Manyad in Ahmedpur taluka or the Bennitura in Umerga taluka or the Banganga in Bhum taluka they are practically dry for most part of the year as the water from them drains out of this district from the high plateau resulting into considerable shortage of water in the district.

The soil can be divided into 3 zones viz, 1) The eastern part consisting of Ahmedpur, Udgir and parts of Latur and Ausa talukas. 2) Osmanabad, Kalam talukas and parts of Latur, Ausa and Umerga talukas 3) Tuljapur, Parenda and Bhum talukas.

The first zone consists in general of light and light of medium soils. They are inferior type, not retentive of moisture and are, therefore, suitable only for the cultivation of kharif crops. The soils in some parts of Nilanga are of laterite type.

The second zone consists of heavy soils which are more retentive of moisture. Hence rabi crops are the major crops in this area. The mountainous ranges in this zone have formed typical strips suitable for paddy cultivation. This is a peculiarity of this zone. Even though the types of soil are classified above on a broad basis, varieties in soils, however, are found within the talukas and more within the zones categorised above.

The forests dotted all over the district are some what dense in Tuljapur, Kalam and Udgir talukas. They occupy too little a portion of the total land in this district which has definitely resulted in soil erosion to a large extent.

8. Climate, Temperature and rainfall.

As the district forms part of the Deccan Plateau, its climate is dry and is subject to extremes. The year can be divided into rainy season from middle of June to the end of September, a sultry period from about the end of September to the middle of November, winter from the middle of November to the end of January, a dry period during February and March and summer during April, May and the middle of June. Summer is in general full of gales and gusty winds. Even though the variations in temperature are large in general and the weather is subject to extremes of heat and cold, the summer season in the district is more cooler than in any other districts of Marathwada region being at a higher altitude. In general the climate

of Osmanabad district is considered to be bracing and salubrious.

Osmanabad district gets rains from the south-west monsoon like other districts of Deccan plateau and the rains start in the middle of June, become intense in July and cease by the end of September. The normal rainfall of Osmanabad district is about 31" (787 m.m.) Tuljapur and Osmanabad talukas on the west usually get about 1,123 mm. or 45" of rainfall. Ausa, Umerga and Nilanga talukas usually get 1,016 mm. to 1,346 mm or 40" to 53% of rainfall, while Parenda and Bhum talukas get near about 762 mm to 888 mm. or 30" to 35" of rainfall. This part comes in the shadow of western Ghat and is therefore, called "rain shadow" area. Because of the low rainfall in Parenda and Bhum talukas, there is always a fear of scarcity and shortage of water. It may be noted that these are adjacent to Ahmednagar district, which is frequently hit by scarcity. These talukas are backward as compared to the other talukas in Osmanabad district. The northern part of Ahmepur taluka is also some times affected by scarcity of water. But in general, Osmanabad district is not considered as scarcity area.

The fact Finding Committee appointed by the former Government of Bombay in 1960 has reported that rain fall is not dependable in the following areas and they are likely to be affected by scarcity conditions as shown below.

Area	Code	Estimated frequency
Parenda and Anala circles of Parenda taluka	C	Once in 10 year
Whole of Bhum	C	Once in 10 years

CHAPTER NO. II

=====

EXPLANATORY NOTES ON SCOPE AND LIMITATION OF STATISTICS

PRESENTED IN DISTRICT STATISTICAL.

ABSTRACT

=====

PURPOSE :- This is the 8th issue of the District Statistical Abstract to be published since the year 1958-59. In this publication every attempt is made to include exhaustive statistics about important socio-economic indicators of the economy. The talukawise data is furnished wherever possible so as to enable the reader to have a clear picture of the achievements in different fields in different talukas of the district. This is the combined issue for the years 1968-69 and 1969-70. The data presented in most of the tables pertains to the years 1968-69 and 1969-70. In case of a few tables where the data for the publication year is not available the data for the latest available year has been furnished.

The statistical material presented here is mainly collected from various departments of State Government as well as Central Government Offices, local bodies and other agencies. The foot notes given at the end of each table indicate the source from where the data is collected.

: DISTRICT AT A GLANCE :

In this statement some broad and important particulars about the district in comparison with the divisional level figures are presented under various heads like population, agriculture, co-operation, medical and public health,

=====

education etc., which bring forth salient features of the district. The reference periods for the figures concerning this district and Aurangabad division are mentioned against each item, as in many cases this period is not identical. The scope and limitations of the information in this Abstract is discussed in the following paragraphs.

I) CLIMATE AND RAINFALL

The table No. 1 gives monthwise information regarding rainy days and actual rainfall recorded at various tahsil headquarters in this district. Normal rainfall recorded at each tahsil place is the average rainfall relating to that place over a long period.

II) AREA AND POPULATION :

In this section 6 tables (Table Nos. from 3 to 8) are included. The various concepts and definitions adopted at the time of last census concerning village, town, worker, household etc. have been clarified in detail in the publication of the Census Hand Book, 1961.

The table No.3 gives talukawise figures of area, rural and urban population, density of population and variations in it in comparison to the 1951 census. The classification of villages according to population ranges as per the 1961 census in Osmanabad district is indicated in table Nos. 4 and 5. In these two tables the figures of rural and urban are shown separately. The table No. 6 presents the talukawise figures of number of workers according to livelihood classes. The table No. 7 gives population of the district as per the 1961 census and according to agegroups,

mother tongue and religion. The table No. 8 indicates taluka-wise scheduled caste and scheduled tribes population according to the 1961 census.

III. AGRICULTURE :

The table Nos. from 9 to 19 are on agriculture and give information about land utilization, area under different crops, area irrigated under different crops and by different sources, production and yield rates of principal crops, minor irrigation works, major and medium irrigation projects and agricultural wage rates etc. The data regarding famine, scarcity and agricultural implements is also given.

The table No. 9 gives utilization of land according to standard heads of utilization. for the years 1967-68 and 1968-69. The table No. 10 presents area under different crops while table No. 11 indicates the figures of out-turn and average yield rate per hectare of principal crops for the district. The table no. 12 shows the distribution of net irrigated area by sources of irrigation. The figures of area irrigated under principal crops of each taluka have been shown in the table No. 13. The table No. 14 gives the number of irrigation wells in use and not in use for each taluka. The table number 15 deals with the data relating to minor irrigation works while table No. 16 gives the data of major and medium irrigation works. The table No. 17 gives the information regarding agricultural wage rates for skilled and unskilled labourers in the selected centres. The table number 18 provides the data regarding agricultural implements in each taluka as per the 1966 Livestock Census. The famine and scarcity data is shown in the table no. 19 .

IV. ANIMAL HUSBANDRY :

The table no. 20 presents talukawise data relating to livestock population as enumerated at the time of quinquennial Livestock Census, 1966. The table no. 21 deals with the veterinary facilities available in each taluka of the district such as number of veterinary hospitals, dispensaries, aid centres etc. while the table no. 22 shows the disease-wise livestock mortality in Osmanabad district. The table no. 23 details the information of the recognised slaughter houses and number of animals slaughtered in them during the period under reference.

V. FOREST :

The tables nos 24(A) and 24(B) included in this section gives details of area ^{under} forest and estimates of different forest produce.

VI. INDUSTRIES AND EMPLOYMENT :

The factory statistics is presented in table nos. 25, 26 and 27 which cover the following types of factories registered under Factory Act, 1948;

- 1) Those factories using power and employing 10 or more workers,
- 2) those factories not using power but employing 20 or more workers,
- 3) those factories not covered by (1) and (2) above but notified by the Govt. covered by Factories Act, 1948.

The table number ~~of~~ 25 presents industry-wise, total number of working factories, the number of mandays for which they worked during the year and the average daily employment classified by adults, adolescents and children. The data presented in cols. 6 to 7 of this table relates only to factories submitting returns.

The table no. 26 presents industrywise distribution of working factories according to working strength while table no. 27 gives distribution of factories according to number of days worked. It may be noted here that the number of workers shown in these tables are the average number of workers working daily throughout the year and not the total number of workers on the register of factories. The table no. 28 indicates the registration of the candidates, vacancies notified and number of candidates placed in employment etc. Whereas in table no. 29 occupational distribution of total registration and placement of employment exchange is detailed out. The table no. 30 indicates the volume of employment in different industries. The table nos 31 and 32 gives the data of government servants as per the Census conducted in the year 1966.

VII. ELECTRICITY :

The table nos. 33 and 34 present the data regarding electricity, The generation and consumption of electricity as well as number of towns and villages covered under electrification programme and indicated in the above two tables.

VIII) CO-OPERATION :

In all 8 tables are included in this section under which statistics relating to various activities of co-operative movement in the district is shown. The table no. 35 deals

with different types of co-operative societies functioning in Osmanabad district. The table No. 36 shows the figures of co-operative bank while table no. 37 gives the information in respect of talukawise primary agricultural credit societies. The table no. 38 presents the data regarding other co-operative societies of different types. The table no. 39 indicates the operation of primary co-operative marketing societies while table no. 40 gives the operation of different societies.

The table no. 41 indicates the operation of regulated markets. The table no. 42 shows the number of registered moneylenders in different talukas of this district and the loans advanced by them to traders and non-traders.

IX) MEDICAL AND PUBLIC HEALTH :

In this section 4 tables are included. The table no. 43 indicates medical facilities available through public and public aided bodies in each taluka. The table no. 44 and 45 give information about vital statistics. The table no. 46 indicates the vaccination statistics and cholera inoculation.

X) EDUCATION :

There are 8 tables in this section. The table no. 47 indicates literacy in each taluka according to the 1961 Census. The percentage of literacy has been shown separately sexwise as well as for rural and urban areas. As the literate is defined as a person who can read and write simple letter, persons having higher education are also included in this category. The table nos. 48 and 49 indicate the education in rural and urban areas in the district as per the 1961 Census. The number of institutions according to the types,

enrolment and the teachers employed in them is given in table no. 50 . The table no. 51 gives details of benefits granted to backward class students of different categories in Osmanabad district. The table no. 52 indicates the strength of students getting benefits of the concession under the scheme of economically backward class concession of free education. The table no. 53 indicates the expenditure incurred on primary education by way of grants.

The table no. 54 gives the classification of villages having no primary schools in different talukas of Osmanabad district.

XI) TRANSPORT AND COMMUNICATIONS :

In this section the statistics relating to various modes of transport is given. The table no. 55 gives the total length of railway route in the district according to different types of rail gauges. The surfacewise and categorywise road length is presented in table no. 56. This table also includes the roads constructed by different agencies such as Municipal Councils, Zilla Parishad and Buildings & Communications Department. The table no. 57 gives the statistics regarding number of motor vehicles in operation.

The table no. 58 gives operational statistics of the nationalised road transport according to S.T. divisions, i.e. Aurangabad and Nanded divisions. The table no. 59 gives the traffic census on important roads in Osmanabad district as on May 1968 while table no. 60 presents the postal, telegraphs and telephone statistics since 1961-62 to 1969-70. The table no. 61 presents the statistics regarding rural broadcasting in Osmanabad district.

XII) LOCAL BODIES
Statistics

The/ about local bodies such as village panchayats, municipalities and zilla parishad is presented in this section. As many as 4 tables are included in this section. The table no. 62 deals with the income and expenditure of local bodies viz. village panchayats, zilla parishad and municipalities while table no. 63 shows panchayat samitiwise income & expenditure.

Similarly, the headwise receipts and expenditure of Zilla Parishad is indicated in the table nos. 64(A) and 64(B) respectively. The table no. 65 gives figures of income and expenditure for each municipal council according to different classification and sub-heads.

XIII) PLAN AND COMMUNITY DEVELOPMENT :

In this section 5 tables are included. The table nos 66 and 67 give plan expenditure under different heads of development and important physical achievements during 1968-69 and 1969-70. The table no. 58 gives particulars of community development programme implemented in the district. In the table no. 69 expenditure incurred in each block as shown during different stages of development whereas physical achievements of some selected items that are achieved in each and every development block in the district are detailed out in table no. 70.

XIV. PRICES :

The table no. 71 deals with the monthly average retail prices of important commodities at the district headquarters for the years 1968 and 1969. In the table no. 72 price index for working classes is shown for Aurangabad and Nanded centres. The consumer price index number for working classes

is based on the price level of 1961.

XV) JUDICIAL AND ADMINISTRATIVE :

The statistics relating to police department and judicial courts is included in this section. The table No. 73 gives the statistical data about ~~strength of police force~~, whereas table no. 74 gives the crime statistics of this district for the calander years under review. The table no. 75 gives the details of works disposed of ~~in civil and criminal courts~~.

XVI) MISCELLANEOUS :

This section includes 9 tables. In these tables statistical material on various topics like ~~cinema, banking offices, joint-stock banks, insurance, small savings, land revenue, printing presses and general elections etc.~~, is included.

The table no. 76 deals with the cinema statistics, while table nos. 77 and 78 gives ~~the data regarding banking offices and joint-stock banks~~ respectively. The table no. 79 gives the data about insurance statistics. The table no. 80 deals with the collection of small saving while table no. 81 deals with the land revenue statistics. The table no. ~~82~~ presents the data on number of printing presses and news papers and periodicals printed in each taluka of this district. The table no. 83 gives the statistics relating to general elections held in the year 1967. The table no. 84 is a summary of all the information contained in the District Statistical Abstract 1968-69.

C H A P T E R N O . I I I

:- ANALYTICAL REVIEW OF IMPORTANT INDICATORS :-

Indicator: 1) Percentage of gross cropped area to net area sown :-
No. 1

This indicator spotlights the extent of double cropped area in relation to the net cropped area in the district. It will be clear from the table given below that the proportion of gross cropped area in relation to net cropped area in the district is rather insignificant. Lack of adequate irrigational facilities might have been the reason for such a low proportion of double cropped area in the district. Even as compared to the rest of the districts in Maharashtra State, the district in this respect has a low percentage which could be seen from the rank it occupied in the state and in the Aurangabad division. It was 19th in the State and 4th in Aurangabad division.

Taking the base as 100%, the percentage of double cropped area in the district during the years 1960-61, 1967-68 & 1968-69 was 103.28, 103.80 and 103.13 respectively as can be seen from the table placed below. This indicates a slight increase in the proportion of double cropped area in the year 1968-69 as compared to the year 1960-61. Within the district, it is observed that only Umarga taluka had rather both more irrigational facilities and comparatively significant proportion of gross cropped area to net cropped area (105.73) in 1968-69. In the rest of the talukas, viz., Bhum, Tuljapur and Udgir, the proportion was even below the par for the district as a whole.

TABLE No. 1
Gross cropped area in Osmanabad District (in ⁰⁰⁰ hectares)

Sr. No.	Item	During the year		
		1960-61	1967-68	1968-69
1)	Gross cropped area	1,071	1,119	1,118
2)	Net cropped area	1,037	1,078	1,088
3)	Percentage of gross cropped area to net area sown.	103.28	103.80	103.13

Indicator:- Productivity of Important Crops :-

1) In the table placed below, statistics regarding the production and yield per hectare of important crops for the year 1960-61, 1967-68 and 1968-69 is given. This will enable to judge the productivity of different crops in comparison with one another.

TABLE No. 2

Table showing the production of principal crops and their yield rates for the years 1960-61, 1967-68 and 1968-69

Sr. No.	Name of crop	1960-61		1967-68		1968-69	
		Yield per hectare	Out-turn in '00 metric tonnes	Yield per hectare	Out-turn in '00 metric tonnes	Yield per hectare	Out-turn in '00 metric tonnes
1	2	3	4	5	6	7	8
1)	Rice	556	162	342	124	394	134
2)	Wheat	569	302	270	147	422	215
3)	Jowar	809	3,491	559	2,333	664	2,707
4)	Bajra	213	45	265	63	342	91
5)	Gram	331	616	188	99	301	163
6)	Tur	326	213	429	350	386	306
7)	Ground-nut	793	952	622	853	722	936
8)	Sesamum	225	10	262	2	306	2
9)	Sugarcane (in term of gur)	3,220	136	6,976	464	8,189	690
10)	Tobacco	339	1	372	1	687	2

2. It could be seen from the table above that the productivity of rice, wheat, jowar, gram and groundnut went down. Whereas a simultaneous increase was noticed in the productivity of bajra, tur, sesamum and sugarcane over the corresponding figures of 1960-61.

Indicator:- Gross value of agricultural production :-

No. 3

1) The gross value of all the important crops recorded an increase in the years 1967-68 and 1968-69 as compared to the year 1961-62.

TABLE No.3

Gross value of Agricultural production				
Sr. No.	Name of the important crops	Gross value (in Rs. in Lakhs)		
		1961-62	1967-68	1968-69
1	2	3	4	5
1.	Wheat	109	200	258
2.	Rice	112	207	247
3.	Jowar	1,011	1,863	1,949
4.	Bajra	15	58	74
5.	Tur	78	641	447
6.	Groundnut	539	876	954
7.	Gur	86	91	67
8.	Sesamum	18	2	2

3. With the exception of sesamum the increase could be observed in almost all the crops given in the table during the year 1967-68. In the year 1968-69 all the commodities except tur and gur showed an increase in the gross value, as compared to that in 1967-68.

Indicator :- Percentage of gross irrigated area to net irrigated area:-

No. 4 :-

1. The percentage of gross irrigated area to net irrigated area denotes the extent of the area irrigated more than once, As per the available statistics for Aurangabad division for the year 1964-65, Osmanabad district ranked second in Aurangabad division in this respect.

TABLE No. 4

Table showing the percentage of gross irrigated area to net irrigated area in Osmanabad District during 1960-61, 1967-68 and 1968-69 .

Sr. No.	Item	Area in 000 hectares during		
		1960-61	1967-68	1968-69
1	2	3	4	5
1.	Net irrigated area	47	69	78
2.	Gross irrigated area	53	77	87
3.	Percentage of gross irrigated area to net irrigated area.	112.77	111.59	111.54

2. It could be seen from the aforementioned table that the percentage for the district as a whole was found to have been slightly decreased over the years from 112.77 in 1960-61 to 111.54 in 1968-69. Switch over to perennial crops may be one of the reasons for the decrease. Parendra, AUSA, Ahmedpur, Tuljapur and Udgir talukas showed an increase in the percentage of gross irrigated area.

Indicator N- Changes in the cropping pattern :-

0.5

1. Since more than half of the national income is contributed by agriculture, the fluctuations in the cropping pattern play a vital role in determining dimensions of growth in different aspects of economy.
2. The food crops even now occupy dominant position, for approximately 70% of the sown area is devoted to their cultivation as was the case in the past. The area under food crops was 73.56% in 1960-61 which decreased to 72.92% in 1968-69. While non-food crops occupied 26.42% of the area under cultivation, in 1960-61, the percentage went upto 27.68% during 1968-69 recording an increase of about 0.66% . The

constant fluctuations in the respective percentages of food and non-food crops over the years go to show a definite change in cropping pattern. This assumption held good with reference to the context of an increase in the area of cash crops such as groundnut, safflower, tur, sugarcane etc. during the year under reference.

3. Whereas area under crops like jowar, wheat etc. recorded a decrease. This fact would be more clear by referring to the table placed below

TABLE No. 5
Table showing crop pattern in Osmanabad district during 1960-61 and 1968-69

Item	Area in hectares	
	1960-61	1968-69
1. Total food crops	7,88,288	8,15,931
2. Total Non-food crops	2,33,060	3,03,027
3. Percentage of total food crops to gross cropped area	73.58	72.92
4. Percentage of total non-food crops to gross cropped area.	26.42	27.08

From the above table it can be observed that the percentage of non-food crops increased slightly, during the year 1968-69 as compared to the corresponding figure of 1960-61.

4. Regarding irrigated crops in the district, it was found that the irrigated area under cereals and pulses showed an increase in the year 1968-69 as compared to the same with the year 1960-61. The percentage of total irrigated food crops to the crops irrigated reduced from 96.74 in 1960-61 to 95.74 in 1968-69. Whereas the irrigated non-food crops showed an increase from 3.26 in 1960-61 to 4.26 in 1968-69.

Factor

6 :- Increase in agricultural credit, outstanding dues and gross value of agricultural produce marketed.

1. Agricultural credit societies and co-operative marketing societies play an important role in financing different operations of agriculture such as purchase of seeds, chemical fertilizers, implements, marketing of agricultural produce etc. Agricultural credit has been continuously increasing in the district due to active efforts of co-operative societies in financing rural credit needs and the response given by cultivators by investing more funds in agriculture.

2. The main agencies engaged in advancing loans were the District Central Co-operative Bank, the Land Development Bank and quite a good number of primary agricultural credit societies located at villages. The details of agric. credit, outstanding dues and gross value of agricultural production in the district during 1961-62, 1968-69 and 1969-70 are shown in the following tables.

TABLE No. 5

Table showing agricultural credit, outstanding dues during 1961-62, 1968-69 and 1969-70.

S. No.	I t e m	Amount in thousand rupees during		
		1961-62	1968-69	1969-70
1)	Agricultural credit	11,583	50,444	57,620
2)	Outstanding dues	11,040	76,200	86,451

3. During the year 1968-69, the agricultural credit increased by more than four times and outstanding dues by about seven times over the corresponding figures of 1961-62. In the year 1969-70 too, the agricultural credit increased by more than five times and outstanding dues by more than seven times over the corresponding figures of 1961-62.

The average prices of all important crops in the district went up in 1968-69 and 1969-70 as compared with the average prices of 1961-62. This had naturally increased the gross

value of agricultural production despite the production of few crops decreased over the corresponding figures for the year 1961-62.

Indicator - Agricultural wage rates. :-
No. 7 :-

1. In the district, agricultural wage rates are collected from three selected centres located in three different talukas. The district being industrially backward, agricultural labourer has no alternative to supplement his income by going work in factories during the slack season. Many of the agricultural operations as ploughing, sowing, weeding, threshing and the like, are still done by men and women and the wages they receive, constitute the main source of their livelihood.
2. The centrewise description of wage rates is given in paras to follow:-

Kingaon Centre :- The average wage rates for carpenters, blacksmiths and cobblers were Rs. 4.00, Rs. 4.00 and Rs. 2.08 respectively in 1967. Their wage rates however, increased to Rs. 4.33, Rs. 4.33 and Rs. 2.75 respectively during 1969. The wages of unskilled labourers also showed an increase during the year 1969.

Killari Centre :- The average wage rates of carpenters, blacksmiths and cobblers were Rs. 2.13 each during 1967, which, during the year 1969, increased to Rs. 4.17 each. The wage rates of unskilled labourers also showed an increase during the year 1969.

Murud Centre :- This centre was selected for wage rates collection during the year 1968. The wage rates for carpenters, blacksmiths and cobblers were Rs. 7.00, Rs. 5.00 and Rs. 7.00 respectively during the years 1968 and 1969.

The wage rates of unskilled labourers showed an increase during the year 1969 when compared with the year 1968.

Indicator Livestock per hectare of cultivable area :-

1. Livestock plays a very important role in Indian agriculture in the absence of mechanization. The bullock is the motive power conducting various agricultural operations.
2. Osmanabad district has already established its name in the field of livestock. Udgir and Ahmedpur talukas of the district are famous for "Deoni" breed of bullocks which have own number of prizes in the "All India Cattle Shows". Besides, "Red Khandari" and "Khillari" are the other well known breeds of cattle in this district.

The following table indicates the talukawise position of livestock per hectare of the cultivable area in Osmanabad district during the years 1960-61 and 1965-66.

TABLE No. 7

Table showing the livestock (bovine and ovine) per hectare of the cultivable area in Osmanabad district during the years 1960-61 and 1965-66.

Sr. No.	Taluka	Livestock per hectare of the cultivable area during the years	
		1960-61	1965-66
1.	Ahmedpur	0.96	0.95
2.	Parenda	0.75	0.86
3.	Bhum	0.95	0.84
4.	Osmanabad	0.96	0.98
5.	Latur	1.10	0.85
6.	Tuljapur	0.83	0.62
7.	Kalam	0.90	0.81
8.	Udgir	1.17	1.03
9.	Ausa	0.96	0.76
10.	Umerga	1.00	0.74
11.	Nilanga	0.97	0.85
	District Average	0.97	0.85

3. During the year 1960-61, Udgir, Latur, Nilanga and Umerga talukas accounted for comparatively higher livestock per hectare of cultivable land, i.e., 1.17, 1.10, 1.07 and 1.00 respectively.

4. During 1965-66, the position in different talukas changed slightly. Udgir, Ahmedpur and Osmanabad talukas came in prominence. Their respective percentage were 1.03, 0.95 and 0.98. The district average came down from 0.97 in 1961 to 0.85 in 1966.

Indicator :- Poultry as compared to population :-

1. The agriculture is a seasonal industry which keeps the farmers idle after the season of harvesting is over. Poultry gives them employment throughout the year and serves as subsidiary source of income.

2. According to the 1961 Livestock Census, for a population of every one thousand persons, there were 186 poultry birds as against 102 during 1966, which showed remarkable decrease to the extent of about 45.32%. The 1966 Livestock Census placed Osmanabad district at the third rank in respect of poultry population in Aurangabad division. The talukawise position is summarised in the table below with comparative data for 1961 and 1966.

TABLE No. 8

Table showing poultry per 1000 persons according to the 1961 and the 1966 poultry census

Sr. No.	Taluka	Poultry per 1000 persons according to		Percentage increase/decrease
		1961	1966	
1.	Ahmedpur	125	50	60.00
2.	Parenda	239	200	16.32
3.	Bhum	243	190	21.81
4.	Osmanabad	135	154	76.76
5.	Latur	170	90	47.06
6.	Tuljapur	216	150	30.56
7.	Kalam	254	100	60.63
8.	Udgir	119	40	66.39
9.	Ausa	210	90	57.14
10.	Umerga	220	110	50.00
11.	Nilanga	165	60	63.64
	Dist. Average	186	102	45.16

3. From the aforementioned table, it can be observed that in almost all the talukas, the poultry population showed a declining trend. Kalam, ranked first in 1961, had been replaced by Parenda, the proportion of which was 200 birds to per 1000 human population. Udgir taluka kept its lowest rank in both the years in this respect. The abnormal decrease occurred in the poultry population in 1966 might be attributed to the fact that "Ranikhed" disease took a heavy toll of them.

Indicator
10

Per capita consumption of electricity :-

1. Use of electricity on a large scale is one of the pre-requisites for rapid economic development. It also points out the pace of development in a particular region. It assumes, therefore, overwhelming importance.
2. The per capita consumption of electricity in 1961-62 worked out to only 0.65 KWH., when only 8 of the towns were electrified. By 1969-70, all the towns in the district and as many as 374 villages were electrified consequent upon which the per capita consumption went upto 17.87 KWH. The above increase was due to the implementation of urban and rural electrification programme in the district during the Third Five Year Plan period and Annual plans thereafter.

TABLE No. 9

Table showing the purposewise consumption of electricity during the period from 1961-62 to 1969-70.

Year	Kilowatt hours sold to public (in 000 K.W.H.)					
	Domestic consumption	Commercial and small power	Industrial light power	Public light	Others	Total
1961-62	202	320	308	108	29	964
1965-66	826	396	1,306	443	1,483	4,754
1968-69	1,753	1,305	3,622	732	9,503	16,915
1969-70	3,837	1,427	4,381	828	15,932	26,405

3. The data displayed in the aforementioned table reveals the progressive increase in the use of electricity in almost all fields over a period between 1961-62 and 1969-70. The consumption of electricity in Industrial sphere overwhelmingly increased by as many as fifteen times than what it was in 1961-62. The domestic consumption also recorded considerable increase by as many as nineteen times than what it was in 1961-62.

Indicator No. 11 Increase in the candidates enrolled and vacancies notified.

1. The provision of employment opportunities is one of the important objectives of the Five Year Plans. Employment Exchanges seek the most economic utilization of manpower available in the country by providing suitable jobs to suitable persons.

2. It was only in January 1961 that the Employment Exchange office was opened at Osmaniaabad, the district headquarters. Since then, it made remarkable progress in the enrolment of candidates. The number of candidates enrolled, which had shown constant increase before 1965-66, showed decrease till 1967-68. In 1968-69, it again increased by 10.57% over the corresponding figure of 1967-68. During the year 1969-70 also it increased by 32.82% over the corresponding figure of 1968-69. The number of vacancies notified, however, witnessed wide variations showing alternatively decrease and increase up to 1967-68. During the years 1968-69 and 1969-70, it decreased slightly.

Indicator No. 12 Increase in the indoor and outdoor patients treated in hospitals/ dispensaries/ primary health centres etc.

1. Public health provides one of the basic amenities i.e. medical help to the general public. The indicator in question serves as a pointer towards the efforts made by the Government in the development of public health services.

2. There are three hospitals in the district located one at Osmanabad and two at Latur. The civil hospital at Latur, has a pathological laboratory and radiology unit. Besides, rest of the taluka places have civil dispensaries. There are 15 primary health centres of which 14 were located at villages and one at town.

3. During the year 1961, about five lakhs and in the year 1968 and 1969 about 12 lakhs and 11 lakhs outdoor patients respectively received treatment in hospitals and dispensaries existing in the district. Similarly, the number of indoor patients also rose considerably. The increase seems to have been more remarkable at Osmanabad centre.

4. The number of beds available per lakh of population increased from 21 beds in 1961 to 24 beds in 1969. The ratio is more in Osmanabad taluka which is followed by Latur taluka.

Indicator :- Increase in the number of students in different categories
o. 13 (boys and girls separately)

1. Education plays vital role in the socialization of individuals by raising their intellectual standards and ultimately makes them responsible citizens. Hence, it is essential that every person irrespective of his social and economic status should be educated. As a step towards the achievement of this goal, the programme of education was chalked out and was successively implemented during Five Year Plans and continued thereafter in the Annual Plans. Consequently, the number of students and educational institutions increased remarkably in the district during the period between 1961-62 and 1968-69. This is visible in the following table.

TABLE No. 10

The table showing increase, decrease in the categorywise educational institutions and pupils during 1961-62, 1965-66 and 1968-69 with the percentage increase or decrease in the year 1968-69 over 1961-62.

Sr. No.	Educational Institutions	Position in the district during			Percent- age inc- rease/de- crease over 1961-62
		1961-62	1965-66	1968-69	
1	2	3	4	5	6
I. PRIMARY SCHOOLS					
i)	Institutions	1,259	1,533	1,635	+ 29.86
ii)	Boys	88,277	1,17,253	1,27,793	+ 44.76
iii)	Girls	29,947	58,677	59,999	+ 100.35
II. SECONDARY SCHOOLS					
i)	Institutions	76	172	196	+ 157.89
ii)	Boys	18,990	46,135	58,827	+ 209.78
iii)	Girls	4,136	13,322	17,166	+ 315.04
III. HIGHER INSTITUTIONS					
i)	Institutions	4	5	7	+ 75.00
ii)	Boys	696	1,987	3,530	+ 407.18
iii)	Girls	64	163	271	+ 323.44

2. From the aforementioned table, the following facts are noticed. Educational institutions in all categories viz., primary, secondary, and higher as well, showed an increase in 1968-69, over the corresponding figures of 1961-62. Along with the increase in institutions, the number of students, boys as well as girls, rose to a new height in 1968-69.

3. The highest percentage increase in the number of boys was observed in the higher education i.e. 407.18 during 1968-69. In primary and secondary education, the percentage increase in the number of girls was 100.35 and 315.04 respectively during the year 1968-69 which was considerably higher than the percentage increase in the number of boys in the respective categories during 1968-69.

Indicator :- Increase in road length per 100 square kilometre :-

14 :-

1. This indicator is important as it helps to chalkout the programme of road development in the areas where the transport facilities are inadequate.
2. The latest data (1965-66) available for the five districts of Marathwada region reveals that Osmanabad district has comparatively lower road mileage.
3. In recent years, however, systematic efforts were made to remove the inadequacy of roads. Accordingly, Works Department of Zilla Parishad and Building & Communications Department took up the construction of new roads and repairs to old ones on a large scale. Consequently, the road mileage in the district increased from 528.99 km. in 1960-61 to 1607.37 km. in 1969-70. The percentage of roads to the total mileage (both road ways and railways) was 81.73% during 1960-61 and increased to 93.16 in 1969-70. Road mileage per 100 sq. km. was 3.71 km. during 1960-61. It increased to 6.51 km. during 1965-66 and 11.26 km. during 1969-70.

Indicator -
o. 15 :-

Increase in banking facilities in proportion to population :-

1. Banks play a vital role in the country's economic affairs. The role of banks in meeting the credit requirements of different sectors of economy can hardly be exaggerated.
2. The district is ill served as far as the banking facilities are concerned. This could be revealed by the comparative study of the population served by banks in different districts of Aurangabad division. The average population served by a bank in Osmanabad district is 59,106 the figure being higher than Bhir (58,910), Parbhani (50,259), Aurangabad (46,435) and Nanded (44,986). (Reference year 1964-65).

3. In the district, there exists scheduled as also co-operative banks. The former covers mostly urban areas while the latter caters to the rural needs. There were 17 banks in the district during 1961-62 and the average population covered by each bank was 86,920. The condition was really unsatisfactory and the facilities provided by them were too inadequate in spite of the fact that their number increased to 34 and the population covered by each bank reduced to 43,460 during 1965-66.
4. The number of banks increased to 62 in 1969-70 with the result that the population covered by each bank came down to 23,833 and the number of banks per lakh of population rose to 4.20 as against the corresponding figures of 86,920 and 1.15 respectively in 1961,62.

Indicator
No. 16 :

" Prices "

1. In a developing country like ours prices assume overwhelming importance since it is on them the success or failure of plan rests greatly. Too low a price causes depression while spiral rise in it will bring an era of inflation resulting in to disturbances in the smooth working of the economy.
2. The period from 1960-61 to 1969-70 was the period of strains and stresses on our economy due to food shortages, war with China and Pakistan in 1962 and 1965 respectively. Countrywide strikes and lockouts in different industrial units and the other like disturbances affected the production of different commodities. This also helped in a large measure to create scarcity of articles of daily consumption. All these facts together made deep impact on the prices and consequently the prices of almost all commodities rose spirally.

TABLE No. 11

Table showing the average prices of important commodities during 1962- and 1969

Sr. No.	Commodity	Year		Percentage increase / decrease in 1969 over 1962.
		1962	1969	
1	2	3	4	5
1.	Wheat (Medium)	0.56	1.20	+ 114.29
2.	Gram (Whole)	0.44	1.08	+ 145.45
3.	Gram (Dal)	0.61	1.32	+ 116.39
4.	Arhar (Dal)	0.90	1.46	+ 62.22
5.	Moong (Dal)	0.80	1.59	+ 98.75
6.	Urid (Dal)	1.08	1.64	+ 51.85
7.	Masur (Dal)	0.80	1.50	+ 87.50
8.	Groundnut oil	1.84	4.38	+ 138.04
9.	Dalda (Vanaspati)	3.08	5.80	+ 88.31
10.	Dry Chillies	2.99	4.46	+ 49.16
11.	Tea leaf	8.37	9.09	+ 8.60
12.	Supari (Chaliya)	7.00	10.97	+ 56.71

It is evident from the above table that prices of pulses, vanaspati, chillies, groundnut oil etc. were increased.

C H A P T E R N O. I V.

P L A N N I N G

The Fourth Five Year Plan was still not out during the year 1968-69 and the implementation of Annual Plans was therefore further continued as was done in previous years. However the Annual Plan 1969-70 was the first Annual Plan of the State's Fourth Five Year Plan which is expected to be finalised in due course. Thus the process of economic development was kept on in Osmanabad district by successive implementation of the Annual Plans during the years 1968-69 and 1969-70 of which the Annual Plan 1969-70 was the integral Annual Plan of the Fourth Five Year Plan of the State.

Almost all the schemes implemented during earlier Annual Plans were also included in the Annual Plans for 1968-69 and 1969-70 for implementation. Certain additional schemes were also included in the aforementioned Annual Plans especially under the sub-head "General Education".

Amounts of Rs. 277.922 lakhs and Rs. 231.781 lakhs were set aside by way of budget provision for the Annual Plans of 1968-69 and 1969-70 respectively to be spent on implementation of different plan schemes in Osmanabad District.

Out of the aforementioned budget provisions Rs. 241.853 lakhs were spent during 1968-69 and the expenditure incurred during 1969-70 was of the order of Rs. 235.259 lakhs. The percentage of expenditure to the total budget provision was 87.03 during the Annual Plan 1968-69 and during 1969-70, the expenditure exceeded the budget provision.

Table showing expenditure and its percentage to total budget provision for the years 1968-69 & 1969-70

TABLE No. 1

Table showing actual expenditure and percentage to total expenditure.

Sr No.	Heads of development	Expenditure incurred during (Rs. in lakhs)						Percentage to the total expenditure	
		19 68-69			1969-70			1968-69	1969-70
		State sector	Local Sector	Total	State sector	Local sector	Total		
1	2	3	4	5	6	7	8	9	10
1)	Agricultural programme	130.26	5.07	135.33	131.90	19.85	151.75	55.95	64.51
2)	Co-operation and community Development	3.39	7.88	11.27	2.08	7.50	9.58	4.66	4.07
3)	Industry & Mining	0.19	1.43	1.62	-	1.02	1.02	0.67	0.43
4)	Transport and communications.	-	16.60	16.60	-	21.51	21.51	6.86	9.14
5)	Social services	33.97	42.28	76.25	17.47	33.76	51.23	31.52	21.72
6)	Miscellaneous.	0.81	-	0.81	0.16	-	0.16	0.34	0.07
	Grand Total	168.62	73.26	241.88	151.61	83.64	235.25	100.00	100.00

Amongst different heads of development, "agricultural programme" received the highest priority in both the Annual Plans viz. 1968-69 & 1969-70 as was the practice in the past. The budget allotments under this head were Rs. 168.785 lakhs and Rs. 148.799 lakhs respectively for the years 1968-69 and 1969-70 and formed 60.73 % and 64.20 % respectively to the total budget provisions of the respective Annual Plans. The percentages of expenditure under this head to the total expenditure incurred during the Annual Plans 1968-69 and 1969-70 were 55.95 and 64.51 respectively.

Next in order was the expenditure on the major head 'Social services' which was 31.52 % during 1968-69 and 21.78 % during 1969-70 to the total expenditure for the period under report. Amongst the rest, "transport and communications" accounted for at least some expenditure.

In the paragraphs to follow, the description of expenditure on each sub-head of different major heads so also important physical achievements under them is given.

-: AGRICULTURAL PROGRAMME :-

The economy of the district being primarily agricultural, it was but natural that the agriculture received the highest consideration while formulating the annual development plans for the district for the years 1968-69 and 1969-70 as was done in the earlier annual plans. The priority that agriculture was given was even more appropriate in view of food shortages that had proved stumbling blocks in the smooth run of the economy and the overwhelming necessity of wiping them out so as to pave the way for smooth and unburdened economic development of the district.

The expenditure incurred and the progress made under different development sub-heads under the major head "agricultural programme" during the Annual Plans 1968-69 and 1969-70 is discussed below.

- AGRICULTURAL PRODUCTION :-

Under this sub-head, an amount of Rs. 6,454 lakhs was spent during the Annual plan 1968-69 and Rs. 3,127 lakhs during the Annual Plan 1969-70. The percentages of expenditure incurred under this sub-head to the budget provision for the major head "agricultural programme" were 3.83 during 1968-69 and 2.10 during 1969-70.

The important physical achievements under the sub-head 'agricultural production' were as follows. Dusting and spraying operations were carried out in as many as 50,539 acres and 40,301 acres during 1968-69 and 1969-70 respectively. In addition, during the year 1969-70, under the 'plant protection campaign scheme', dusting & spraying was done in 4,480 acres of area under cotton and 8,240 acres of area under groundnut. So also, rat control measures were effected in as many as 20,000 acres & 25,000 acres of area during 1968-69 and 1969-70 respectively. An area of about 2,23,493 acres and 233,723 acres under different food crops during the years 1968-69 and 1969-70 respectively was brought under intensive cultivation. In addition, sann seed for practising green manuring was distributed amongst the farmers to the tune of 135 quintals and approximately 63 quintals during the year 1968-69 and 1969-70 respectively. Under "the development of local manurial resources scheme", town compost to the extent of 22,730 tons during 1968-69 and 18,225 tons during 1969-70 was prepared.

" SOIL CONSERVATION "

For preventing the soil erosion and increasing the retentivity of moisture in the soil, the programme of soil conservation, initially taken up in the Third Five Year Plan and was continued in the Annual Plans for 1968-69 and 1969-70 as was done in the earlier annual plans.

This was the sub-head under which the highest expenditure was incurred. Amounts of Rs. 68.090 lakhs and Rs. 90.418 lakhs were spent during 1968-69 and 1969-70 respectively under this sub-head forming percentage of 50.31 during 1968-69 and 59.58 during 1969-70 to the total expenditure incurred during respective annual plans.

The area bunded during the year 1968-69 was 1,49,000 acres and was 1,18,000 acres during 1969-70.

" MINOR IRRIGATION "

For increasing agricultural production, an assured water supply is a necessity. With this object in view, the programme of minor irrigation was included in the Annual plans of the district.

The budget provisions for this sub-head were of the order of Rs. 69.746 lakhs and Rs. 56.916 lakhs for 1968-69 and 1969-70 respectively of which amounts of Rs. 68.090 lakhs during 1968-69 and Rs. 51.900 lakhs during 1969-70 were spent.

The major physical gains that were achieved under minor irrigation are noted below. As many as 6,974 and 3,297 shot holes were dug during 1968-69 and 1969-70 respectively. Subsidy to the construction of as many as 800 wells during 1968-69 and

874 wells during 1969-70 was given. For the installation of 343 and 816 pumping sets during the years 1968-69 and 1969-70, respectively, subsidy was granted. By the end of 1969-70 there were 26 works of construction of tanks and bandharas on hand in the state sector of which 17 were completed in all respects. The headworks of three works were completed and the canal work was in progress. In respect of the rest, the headworks as well as canal works were in progress. This created an irrigation potential of 21,355 acres. In the local sector, as many as 40 works were on hand out of which 20 were nearing completion and creating an irrigation potential of about 2,750 acres.

" ANIMAL HUSBANDRY "

In the absence of mechanised cultivation of land, the livestock assumes overwhelming importance. This is especially true in a country like ours where the cultivation of land is carried on on a very small scale. This has nonetheless stressed the need to have healthy livestock to carry on the day to day operations in the field. Realising the dominant role that the livestock plays in agriculture, the government have implemented different schemes in the district for an overall improvement in the quality of livestock.

The expenditure incurred under this sub-head was of the order of Rs. 39,000 during 1968-69 and Rs. 6,100 during 1969-70. The major achievements under this are given below. At the end of 1969-70, the construction work of five veterinary dispensaries was completed and two veterinary aid centres were also opened.

" AYACUT DEVELOPMENT "

Under this scheme, the expenditure to the extent of Rs. 10.331 lakhs was incurred till the end of March 1970. The scheme covered an area of 6,491 acres upto the end of March 1970.

10

" DAIRY DEVELOPMENT "

An expenditure of Rs. 86,000 was incurred under this sub-head during the period from 1968-69 to 1969-70. As many as 25 dairy societies during 1968-69 and 16 dairy societies during 1969-70 were assisted by giving subsidy to them.

" FOREST "

To retain the fertility of the land, prevention of the soil erosion is a must. Afforestation is one of the methods by which soil erosion could be stopped. Moreover, forest is also a source of raw material for a number of industries such as bidi making, saw mills, honey making etc. Keeping this in view, government has been attempting to achieve systematic development of forests.

In a period of two years from 1968-69 and 1969-70 an amount of Rs. 70,000 was spent for the development of forest in the district. During the period under report, an area of 97 acres was afforested for soil conservation, 70 acres were brought under plantation for pasture development and under 'the rural extension forestry scheme', an area of 40 acres was planted.

" FISHERIES "

Under this sub-head, the total expenditure during the years 1968-69 and 1969-70 was of the order of Rs. 34,700. During the period mentioned above about 8,40,500 fingerlings were stocked in different tanks in the district. Nylon twine to the extent of 432 kg, was distributed amongst the fishermen by way of assistance. The co-operative Department also gave assistance to four fishery co-operative societies by way of subsidy for the purchase of fishery requisites.

" WAREHOUSING AND MARKETING "

The development of warehousing and marketing has not only increased the profits of the agriculturists but also proved an indirect stimulus to the agricultural production. The linkage of credit with marketing and warehousing facilities has reduced the role of middlemen to a considerable extent and ensured steady supply of money to agriculturists throughout the year which they are badly in need of.

The total expenditure under this sub-head was Rs. 49,000 during 1968-69 and Rs. 7,700 during 1969-70. The major achievements under this are noted below. As many as four agricultural produce market committees were given assistance in the form of loan which was meant to be spent for initial expenses both in the years 1968-69 and 1969-70.

" COOPERATION AND COMMUNITY DEVELOPMENT "

Since more than 80 percent of the total population of Indian union dwells in rural areas, their development along with the development of other aspects of economy is indispensable. With the help of cooperation and community development programme, the rural reconstruction has to be brought about. Cooperation provides an organisational set-up through which economic lot of the rural folk would be improved while community development programme helps to bring about a change in the outlook of and social development in rural folk as also take the message of planning to the door of villagers.

1) COOPERATION

This is another major head of development under which an expenditure of Rs. 3,89,400 during 1968-69 and 2,08,200 during 1969-70 respectively was incurred. For strengthening the

credit structure at the district level, as many as ten and three new branches of central financing agency were opened during 1968-69 and 1969-70 respectively. So also, short term operation and medium term operation loans to the tune of Rs. 523 lakhs to the service co-operatives and central financing agencies were advanced during 1969-70. Loans of long duration to the tune of Rs. 140 lakhs were also advanced, Membership of co-operatives was increased by 3,522 during 1968-69 and by 3,000 during 1969-70. In addition, three consumers' stores were given managerial subsidy during 1969-70 and one each in the year 1968-69 and 1969-70 was given contribution to its share capital. Subsidy of Rs. 10,000 was also granted to four large size godowns during 1969-70. Contribution to the price fluctuation was also made which amounted to Rs. 2,600 during 1969-70. Some labour contract societies were also helped by way of contribution to their share capital, subsidy for management and for the purchase of tools and equipment etc. Loans to the tune of Rs. 35,000 were also granted to seven labour contract societies under public co-operative scheme during 1969-70 only.

" COMMUNITY DEVELOPMENT "

The total expenditure incurred under this head was of the order of Rs. 11.269 lakhs during 1968-69 and Rs. 9.583 lakhs during 1969-70. This expenditure was mainly incurred on the maintenance of the blocks which were already opened.

" INDUSTRY AND MINING "

With few exceptions like sugar factory at Dhoki and the co-operative oil industry at Latur, Osmanabad district

hardly has any big industries. The economy of the district, being predominantly agricultural, favours the development of agro-industries and the beginning in this direction has already been made with the establishment of the aforementioned two industries. Small industries, however, with the active assistance from State government are coming up in the district. The programme of their development is described below.

The expenditure incurred under this head was Rs. 1.620 lakhs during 1968-69 and Rs. 1.017 lakhs during 1969-70. Most of the expenditure under this head was incurred only in co-operative sector. The achievements are given below.

Financial assistance of Rs. 19,400 during 1968-69 and of Rs. 11,700 during 1969-70 was granted to 11 and four industrial co-operative societies of handicrafts respectively. Six industrial societies of backward class were also given financial assistance which amounted to Rs. 2,600. In addition, as many as 158 artisans were given financial assistance amounting to Rs. 90,000 during 1969-70. Three industrial co-operatives were also assisted financially for purchase of shares during 1968-69.

" TRANSPORT AND COMMUNICATIONS "

Being the prima-facie requirement for speeding up the process of economic development, the means of communications, particularly roads, have an important role to play accordingly the priority it received in the earlier plans was also continued in the Annual plans 1968-69 and 1969-70.

This is the fourth major head of development. Under this head amounts of Rs. 16.603 lakhs during 1968-69 and Rs. 21.512 lakhs during 1969-70 were spent. The percentages of expenditure incurred during 1968-69 and 1969-70 were 6.86 and 9.14 respectively to the total expenditure incurred during those respective years.

The major items of achievements are listed below. The length of the district roads constructed was 70.50 miles during 1968-69 and 17.25 miles during 1969-70. The village roads of the length of 9.5 miles during 1968-69 and of 8.18 miles during 1969-70 were also constructed. So also, the work of six and ten culverts was completed during 1968-69 and 1969-70 respectively. Roads in hilly and inaccessible areas were also constructed during 1968-69 the length of which was 11.89 miles.

" SOCIAL SERVICES "

In a welfare state like ours, government has to make efforts for the upliftment of the common mass by making provision for such aspects of their ordinary life as education, public health, housing, water supply and the like which will go a long way in improving their general living standards. Though a sort of overhead expenditure, it is a must since it boosts up the morale of general public which is indispensable especially where a planned economic development is contemplated on.

This is the major head on which government has been spending maximum amounts next only to the agricultural. The expenditure incurred under this head amounted to Rs. 56.247 lakhs during 1968-69 and Rs. 51.234 lakhs during 1969-70. The percentage of expenditure under this head to the budget provision for the Annual plans 1968-69 and 1969-70 was 27.43 and 22.10 and to the total expenditure for 1968-69 and 1969-70 was 31.52 and 21.78 respectively. The sub-headwise expenditure and achievement made under them are described below.

" GENERAL EDUCATION "

An expenditure of Rs. 33.219 lakhs during 1968-69 and 10.198 lakhs during 1969-70 was incurred under this sub-head.

As many as 60 new appointments of primary teachers were made during 1968-69 and 245 posts were continued further during 1969-70. Loan scholarship was given to 483 and 145 teachers' trainees during 1968-69 and 1969-70 respectively. So also, the work of construction of 108 class rooms was completed during 1969-70 and of 50 class rooms was in progress during the same period. Educational concessions were given to as many as 825 economically backward class students.

5 EDUCATION (TECHNICAL)

On the schemes which come under the sub-head "Education (Technical)" an expenditure of Rs. 6.73 lakhs during 1968-69 and of Rs. 4.51 lakhs during 1969-70 was incurred. Most of the building work of Industrial Training Institute at Latur, was complete by 1969-70.

" PUBLIC HEALTH "

The total expenditure incurred under this sub-head amounted to Rs. 14.145 lakhs during 1968-69 and Rs. 4.350 lakhs during 1969-70. The main physical achievements are noted below.

Under the national programme of family planning, as many as 5,004 and 4,658 sterilization cases were made during 1968-69 and 1969-70 respectively and Intra Uterin Contraceptive Device cases to the extent of 1,139 during 1968-69 and 932 during 1969-70 were also done.

" WATER SUPPLY AND DRAINAGE "

The expenditure incurred under this sub-head accounted for Rs. 15.639 lakhs during 1968-69 and Rs. 30,002 during 1969-70. The department had undertaken 12 works of urban water supply, 67 works of rural water supply of which two from the former were completed and almost all from the latter were in progress by

1969-70. In addition, construction work of as many as 150 and 123 wells of drinking water was complete during 1968-69 and 1969-70 respectively.

" H O U S I N G "

Under this sub-head, an amount of Rs. 1,23,000 was spent during 1968-69 only. The gaathan was extended in ten villages and the area covered due to this extension was 20 acres. So also the construction work of 35 houses was complete during the same period.

" W E L F A R E O F B A C K W A R D C L A S S E S . "

The total expenditure that was incurred on the welfare of backward classes was Rs. 77,600 during 1968-69 and Rs. 72,000 during 1969-70 respectively.

Scholarships, tuition fees etc. was granted to 231 and 507 backward class students during 1968-69 and 1969-70 respectively. Grants to nine and two backward class hostels were given during 1968-69 and 1969-70 respectively. Three more backward class hostels were opened during 1969-70. So also, 47 students from Vimukta Jatis were paid tuition fees and also awarded scholarships.

" S O C I A L W E L F A R E "

Under this sub-head, an expenditure of Rs. 86,000 during 1968-69 and of Rs. 16,000 during 1969-70 was incurred. Five balwadis, five literacy classes, seven arts and crafts classes were started during 1968-69. During 1969-70, six griha kalyan kendra, one balvikas kendra were also started and five training camps were organised.

" CRAFTSMAN TRAINING AND LABOUR WELFARE "

The total expenditure incurred on this scheme was Rs. 3,83,700 during 1968-69 and Rs. 6,400 during 1969-70.

" INFORMATION AND PUBLICITY "

On this sub-head, amounts of Rs. 31,400 during 1968-69 and of Rs. 16,200 during 1969-70 were spent. As many as, 196 and 234 radio sets were installed in the villages during 1968-69 and 1969-70 respectively.

| 6. Number of workers & non-workers in each Taluka, according to 1961 Census. | 15 to 16 |
| 7. Distribution of population according to (A) age group, (B) Mother Tongue & (C) Religion. | 17 |
| 8. Scheduled Castes and Scheduled Tribes, according to 1961 Census | 18 to 19 |

3. AGRICULTURE.

- | | |
|---|----------|
| 9. Land Utilisation. | 20 to 24 |
| 10. Area under different crops in each Taluka | 25 to 30 |
| 11. Yield per hectare and out-turn of principal crops | 31 |
| 12. Area Irrigated by different sources in each Taluka | 32 |
| 13. Area Irrigated under different Crops in each Taluka | 33 to 38 |
| 14. No. of Irrigation wells in each Taluka | 39 |
| 15. Minor Irrigation works | 40 |
| 16. Major & Medium irrigation projects. | 41 to 43 |
| 17. Agricultural wage rates. | 49 to 53 |
| 18. Agricultural Implements in each Taluka. | 54 |
| 19. Famine, Scarcity and akin to Scarcity data | 55 |

No. of tables	Subject	page Nos.
<u>4. ANIMAL HUSBANDRY, FOREST AND FISHERIES</u>		
20.	Livestock in each Taluka	56 to 58
21.	Veterinary Statistics in each Taluka	59 to 60
22.	Disease wise Livestock Mortality	61
23.	No. of Recognised Slaughter houses and Animal Slaughtered in each slaughter house.	62 to 63
24(a)	Forest Area in District	64
24(b)	Major and Minor Forest products in District	64
<u>5. EMPLOYMENT, INDUSTRY, MINING & ELECTRICITY</u>		
25.	No. of Factories & average daily employment of workers	65 to 66
26.	Industrywise distribution of working Factories according to working strength.	67 to 70
27.	Distribution of Factories according to Nos. of days worked.	71
28.	Employment Exchange Statistics	72 to 73
29.	Occupational distribution of total Registration and placement in Employment exchange.	74
30.	Volume of Employment in different Industries.	75
31.	Census of Government Employees. (No. of persons employed.)	76
32.	Census of Government Employees. (No. of persons in each Deptt.)	77
33.	Generation and consumption of Electricity.	78 to 79
34.	No. of Towns and villages Electrified and population covered.	80
<u>6. CO-OPERATION :</u>		
35.	Number of different types of societies	81
36.	Statistics relating to Co-operative Banks	82
37.	Primary Agricultural Credit societies	83 to 86
38.	Other Co-operative Societies of different types	87 to 88

Sr. No.	S u b j e c t .	Page Nos.
39	Operation of Primary Co-operative marketing societies.	89 to 92
40.	Operation of other co-operative societies of different types.	93 to 94
41.	Operation of regulated marketing.	95 to 102
42.	Number of Registered Money Lenders and loans advanced by them.	103
<u>7. MEDICAL AND PUBLIC HEALTH</u>		
43.	Medical facilities available through public and public aided bodies in each taluka.	104 to 106
44.	No. of births and deaths registered.	107 to 108
45.	No. of deaths due to important causes.	109
46.	Vaccination statistics and Cholera Inoculation	110
<u>8) EDUCATION</u>		
47.	Literacy in each Taluka according to 1961 Census.	111 to 112
48.	Education in Rural Areas in each Taluka, according to 1961 Census	113 to 114
49.	Education in Urban areas of the District according to 1961 Census.	115
50.	No. of Institutions, pupils and Teachers.	116 to 117
51.	No. of backward class Beneficiaries.	118 to 119
52.	Economically Backward class Concessions of Free Education	120.
53.	Expenditure on primary Education by way of grants in aids to local bodies	121 to 122
54.	Classification of Villages without primary schools or schooling facilities according to population Ranges.	123 to 124
<u>9) TRANSPORT AND COMMUNICATIONS :</u>		
55.	Length of Railway Route.	125
56.	Road Length according to category & surface classification.	126

Sr.No. of tables:	Subject	page of Nos.
57.	Motor Vehicles in Operation.	127
58.	Operational Statistics of Nationalised Road Transport.	128
59.	Traffic Census on Important Roads	129 to 132
60.	Information of postal, Telegraph and Telephone Statistics.	133
61.	Rural Broad-Casting Statistics.	134
<u>10) LOCAL BODIES.</u>		
62.	Income and Expenditure of Local Bodies	135
63.	Income & Expenditure of villages panchayats.	136 to 139
64(A)	Headwise Receipts of the Zilla Parishad	140 to 141
64(B)	Headwise expenditure of the Zilla Parishad	142(A) & 142(B)
65.	Income & expenditure of Municipal Councils, Corporations etc.	143 to 146
<u>11) PLAN AND COMMUNITY DEVELOPMENT</u>		
66.	Plan expenditure under different development heads/ sub-heads.	147 to 149
67.	/Physical Achievements under plan.	150 to 153
68.	Statement showing C.D. Programme.	154
69.	Expenditure incurred in different stages of Blocks.	155
70.	Physical Achievements on selected items in all Blocks.	156 to 165
<u>12) PRICES</u>		
71.	Average Retail prices of important commodities at District Head quarter.	166 to 173
72.	Consumer price Index numbers (revised series) for working class.	174 to 175
<u>13) MISCELLANEOUS.</u>		
73.	Strength of Police-Force Statistics	176
74.	Crime Statistics.	177 to 178

Sr. Nos. of Tables.	Subject	Pages of Nos.
75.	Work Disposed in Civil and Criminal Courts.	179
76.	Cinema Statistics.	180 to 181
77.	No. of Banking Offices.	182
78.	Joint Stock Companies	183
79.	No. of Insurance policies issued & Amount insured.	184
80.	Collection of Small Savings.	185
81.	Land Revenue collection in each taluka	186
82.	No. of presses, Newspapers & periodicals published.	187
83.	Statistics relating to General Election.	188 to 191
84.	Trends in selected Indicators.	192 to 201
