## CHAPTER - I

### INTRODUCTION.

#### 1.1 - Location

Jalgaon District lies between 20° and 21° north latitude and 74°-55' and 76°-23' east longitude.

#### 1.2 - Boundaries

This district is bounded on east by Buldhana district of Vidarbha and on north by Madhya Pradesh State on the west by Dhulia district and on the south by Aurangabad district of Marathwada.

#### 1.3 - Topography

The Tapi river passes through the centre of the district from east to west. Tapi and its tributaries drain the Jalgaon district to the west towards the Arabian sea. Jalgaon district is separated from the Madhya Pradesh state by the Satpudas and from Deccan by the Satamala hills.

#### 1.4 - Hills and Rivers

There are three main systems of hills in the district. The Satapudas in the north, Satamala in the south and the west and Hatti hills in the south-east. The Satpuda with runs from east to west covers the northern tahsils viz Raver, Yawal, Chopda. It is a broad belt of mountain land along the north bank of Tapi river. The Hatti hills run north west and south-east and are mainly in Edalabad tahsil. The Satamala hills are covering about 120 km. of the southern parts of the district and are mainly spread in Chalisgaon and Jamner tahsils.

##### 1.4.1 - Rivers

The major river of the district is Tapi and its course in Jalgaon district is of 120 km. The whole Tapi river valley from this distri

is flat and well tilled. During its course in the district the Tapi receives Bhokar, Suki, Mora, Harki, Amer, and Guli from the north and Bori from the south. Rivers from the north are small and of little use for irrigation. Rivers joining from the south to the Tapi drain much wider tracks. The second major river in this district is Girana which enters the district from south-east. It flows in this district in north-east direction till near Jalgaon town and then turns north and later in north-west direction to join Tapi at Wanded village in Amalner tahsil. Waters of Girana and Bori are much used for irrigation. The proposed major project of irrigation at Hatnur in Jalgaon district on Tapi river has got irrigation capacity to the tune of 37000 hectares of area which shows that the Tapi has very high potential for irrigation. No river is navigable in this district.

### 1.5 - Soils

The soils of this district are wholly derived from the trap or basalt. They can be broadly classified into five categories, - i) Deep-Black, ii) Medium-black, iii) Forest, iv) Loam and v) Sandy.

#### 1.5.1

Deep black soils are restricted to deeper valleys and low lying area. This type of soils are observed in northern part of Amalner, Erandol part of Amalner, Erandol, Jalgaon, Bhusawal and Edlabad tahsils.

#### 1.5.2

Medium black soils cover a large proportion of the district. This type of soil is found in southern parts of Yawal, Raver and Chopda tahsils, northern portion of Pachora and Jamner tahsils. Soils of Erandol, Chalisgaon, Amalner, Bhusawal, Jalgaon and Bhadgaon tahsils also belong to a large extent to this type.

1.5.3

Forest soils cover almost more than half of the northern portion of Naver, Yawal, and Chopda tahsils.

1.5.4

Loam soils are observed in the southern most part of Amalner, Erandol, Jalgaon, Bhusawal and Edlabad tahsils.

1.5.5

Sandy soils are observed on the slopes of the Satpuda ranges and near the southern hillocks in Chalisgaon, Pachora, Jamner, Bhusawal, Parola, Erandol and Bhaadgaon tahsils.

1.6 - Climate

The climate of the Jalgaon district is generally dry except in the monsoon. The year can be divided into four seasons, -

- 1) June to September is the monsoon season.
- 2) October to November is the Post monsoon season.
- 3) December to February is the cold season.
- 4) March to May is the Hot season.

As the district is far away from the coastal tracks, there are large variations in the day and night temperatures. Within the district the seasons show local variations. The Tapi valley is the hottest part of the district. In the Satpuda the heat is some-what tempered by the forest. Southern part is a little cooler as compared to Tapi valley. The monthly temperature record is available only for one station i.e. Jalgaon. The maximum temperature in 1974 was 42.2 centigrade, while minimum temperature was 30.0 centigrade recorded at Jalgaon centre. The temperature begins to rise steadily from beginning of March. The hottest month of the year is May.

1.7 - Rainfall

The average annual rainfall in the district is 826.8 mm., about 77% of the annual rainfall is received during monsoon. Rainfall is not

uniform in all parts of the district. The central part of the district covering Jalgaon, Bhusawal, Pechora, and Amalner tahsils receive comparatively more rainfall than the rest of the district. The rains start about the middle of June and lasts till the end of September. Pre-monsoon showers are generally received in May. The average annual rainfall for all the tahsils in this district for 1974 is below the normal except in case of Amalner tahsil. In case of Amalner tahsil it is above the normal rainfall by 3%

1.8 - Minerals

No minerals of importance are found in this district. Trap is found every where in the district and it is used for building purposes.

1.9 - Forests

The total area under forests in this district is 1,90,600 hectares, which accounts for 16.37% of the total area. Forests are mainly on the slopes of Satpuda in Chopda, Yawal, and Edlabad tahsils. There are also forest areas in Jalgaon, Bhusawal, Jamner, Pechora, Chalisgaon, Amalner and Brandol tahsils which are on the plains. The important forest produce is timber.

1.10 - Area

The total geographical area of the district is 11,771.0 sq.km. Urban area accounts for 274.9 sq.km. and rural area accounts for 11496.1 sq.km. The area of this district is only 3.8 percent of Maharashtra State. Jalgaon district has 1451 villages (1423 inhabited and 23 uninhabited) and 15 urban centres as per 1971 census. Since independence there are no territorial changes in the composition of this district except one in the year 1950. Thirteen enclave villages which formed part of Chalisgaon tahsil were transferred to Aurangabad district.

### 1.11 - Population

The population of the Jalgaon district as per 1961 census was 17,65,047 and as per 1971 census it is 21,23,121; out of which 10,89,840 are males and 10,33,281 are females. The urban population forms 23.65% of the total population. The percentage of schedule castes and scheduled tribes to the total population of the district is 4.13 and 5.89 respectively. It accounts for 4.7% of the population of Maharashtra State. As far as population is concerned, it stands 6th among 25 districts in Maharashtra State. Table No.1.11 will give comparative position of some important feature such as occupied houses, number of households, population etc. based on 1971 and 1961 census.

CHAPTER-III  
ANALYTICAL REVIEW OF SELECTED TRENDS

3.1 In this chapter, some important socio economic indicators are prepared, showing comparison between tahsils and over a period of time.

Indicator No.1:- Percentage of Gross cropped area to Net sown area.

3.2 Table No. 3.2 shows the extent of double cropping in district as whole and in various tahsils. For district as a whole this percentage was 106.66% in 1961-62 and 107.42% in 1973-74 which shows that practically there is no change in double cropping pattern over last twelve years. Within the tahsils, comparison shows that percentage of gross cropped area to net cropped area is quite high in Chopda, Bhadgaon, Erandol, Jalgaon and Amalner tahsils. In all other tahsils this percentage is lesser than that of the district.

Indicator No.2 - Productivity of important crops

3.3 Estimates of production of important crops are available for district as a whole. The yield rates for 1961-62, 1971-72, 1972-73 and 1973-74 are given in table No.3.3. Yield rates are higher in 1973-74 in respect of Rice, Wheat, Jowar, Bajara, Gram, Tur, Groundnut and Chillies than in previous year in 1972-73. The untimely and inadequate rainfall during 1972-73 had affected the productivity of crops in Jalgaon district. Comparison of yield rates over a period of 12 year shows that there is increase in yield rates of wheat, Jowar, Bajara, Gram, Tur, Sugarcane and Chillies.
