MANTRALAYA ANNEXE,  
BOMBAY-400 032.

SUBJECT :—Annual Season and Crop Report of  
Maharashtra State for the year 1974-75.

Sir,

I am to submit herewith the Annual Season and Crop Report of Maharashtra State for the year 1974-75, ending the 31st July 1975.

During the year, the onset of monsoon was late by a month, and the kharif sowings were delayed correspondingly, and there was a reduction in the area under kharif cereals as compared with that of last year. The short-fall was particularly substantial in kharif jowar and bajri crops to the extent of 1.6 lakh ha. and 3.7 lakh ha. respectively. Due to inadequacy of rains during the period mid-August to September, the early paddy in Bhandara and Chandrapur districts was severely affected beyond recovery. However, adequate rains were received in September and October all over the State and this improved the condition of the kharif crops except early paddy in Vidarbha. Rains in September and October were adequate enabling timely sowings of rabi crops. These rains were beneficial for their proper growth and development.

2. The late commencement of kharif sowing resulted in the reduction of net cropped area of the State, from 183.2 lakh ha. in 1973-74 to 182.1 lakh ha. in 1974-75 i. e. by 1.1 lakh ha. The area cropped more than once, however, increased from 11.6 lakh ha. in 1973-74 to 13.0 lakh ha. or by 11.8 per cent in 1974-75. Thus the total gross cropped area was of the same order as that of last year.

The area under food crops was 141.7 lakh ha. during the year under report and same was lower than that of the preceding year by 2.0 per cent. On the other hand, the area under non-food crops increased from 50.3 lakh ha. in 1973-74 to 53.4 lakh ha. in 1974-75 or by 6.3 per cent. Among the food crops, the total area under food-grains decreased from 138.5 lakh ha. in 1973-74 to 135.0 lakh ha. in 1974-75 i. e. by 2.6 per cent.

3. During the year under report, the net and gross irrigated area was 16.1 lakh ha. and 19.3 lakh ha. respectively, showing an increase of 9.5 per cent and 9.6 per cent over the corresponding figures of the preceding year.

4. In spite of the reduction in area of 3.5 lakh ha., the total food-grain production in the State attained a level of 79.0 lakh tonnes, outstripping the previous record production of 77.4 lakh tonnes attained in 1960-61. This was mainly due to timely plant protection measures against midge-fly, resulting in higher yield rate of jowar in the kharif season. The wheat crop also responded to intensive cultivation measures including the high yielding varieties programme and increased availability of irrigation, as a result, a record production of 7.5 lakh tonnes was obtained.

The cotton crop sown in 25.0 lakh ha. area was free from incidence of pests and diseases and had put on good growth. Its production was also a record one, being 16.1 lakh bales of 180 kg. each. The sugarcane crop was grown on an area of 2.5 lakh ha. and its production (from the harvested area of 2.0 lakh ha.) was also a record one, being 20.3 lakh tonnes in terms of gur.

5. The prices of food-grain commodities were higher in 1974-75 than those in 1973-74. The prices of tobacco and chillies ruled high due to less arrival in the markets and increasing demand. Similarly wages of skilled and unskilled labour in the State, recorded an overall increase in all the districts of the State.

6. The quinquennial live stock census 1972 showed that in comparison with census figures of 1966, there was a slight decrease of 0.2 per cent in the number of cattle. The total number of buffaloes recorded an increase of 8.5 per cent. The number of buffaloes, used for breeding purposes alone, decreased by 6.5 per cent. The number of sheep decreased by 3.5 per cent and horses and ponies together by 42.3 per cent while the number of goats recorded an increase of 15.4 per cent. The poultry population increased by 23.4 per cent.

According to the above census, the number of ghanis decreased by 47 per cent and sugarcane crushers decreased by 50.6 per cent. The number of wooden ploughs, iron ploughs and bullock carts showed an increase of 0.8 per cent, 13.2 per cent and 4.0 per cent, respectively. On the other hand, the number of oil engines and tractors increased by 17.2 per cent and 71.2 per cent respectively. The number of electric pumps increased by three and half times over that in the preceding census.

Yours faithfully,

S. R. CHOPDE,  
Director of Agriculture,  
Maharashtra State,  
Pune-411 001.

# Season and Crop Report of the State of Maharashtra for the Year 1974-75

## CHAPTER I

### SEASON

#### 1. Distribution of Rainfall

Table-I (pages 34 to 49) gives the rainfall, received during the year vis-a-vis the normal rainfall at selected centres in the State.

(i) *Pre-monsoon rains* (April to May 1974).—The pre-monsoon showers were above the normal in almost all the parts of the Konkan and Deccan regions and Aurangabad districts of Marathwada region, while they were below the normal elsewhere in the State.

(ii) *Monsoon rains* (June to September 1974).—The monsoon rains were above the normal only in Ratnagiri district of Konkan and Ahmednagar district of Deccan region. They were normal or near normal in the districts of Dhule, Jalgaon, Pune, Satara, Solapur, Kolhapur and Parbhani and below the normal in rest of the State.

(iii) *Post-Monsoon rains* (October to November 1974).—The post-monsoon rains were above the normal in all the districts of the State except in Kolhapur district where the rains were near to the normal.

(iv) *Winter rains* (December 1974 to March 1975).—Winter rains were almost absent in the Konkan and Deccan regions and were below the normal in Marathwada and Vidarbha.

(v) *Total rainfall for the year*.—The total rainfall during the year under report was above the normal in Ratnagiri, Ahmednagar, Sangli and Solapur districts and in parts of Pune district, while it was above the normal or near to it in Thane, Kulaba, Dhule, Jalgaon-Satara, Kolhapur, Aurangabad, Parbhani and Osmanabad districts. It was below the normal in Bhir, Nanded and all districts of the Vidarbha region.

#### 2. Effect of rainfall on sowings and crop growth

During the year under report, pre-monsoon rains were quite substantial in the different parts of the State except in the Vidarbha region. The rains facilitated the preparatory tillage operations.

The monsoon entered the State late by about a week viz. on the 8th June, 1974, in the southern parts of Ratnagiri district. Its movement further towards the north, as also in the interior parts of the State was very slow and it covered the entire State as late as by the 4th of July. The monsoon was active from the 4th to 15th July. Then there was a break in the rains for a fortnight all over the State, barring the Konkan region and a few parts in the eastern Vidarbha region.

Due to the delay in the onset of the monsoon, large scale sowings of kharif crops (except paddy in nurseries)

could be taken up only after the 6th July. As these rains were for a short duration only, the sowings of cotton, tur and groundnut were hampered resulting in considerable reduction in the areas under these crops as compared to normal areas.

From the 29th July, however, widespread rains were received relieving the anxiety of the cultivators. The sowings of bajra and kharif jowar were resumed in the north Deccan, Marathwada and Vidarbha regions as also the transplanting of paddy and ragi crops in Konkan and Ghat regions. These operations were completed by the third week of August. The moderate to heavy rains received during mid August facilitated the transplanting of paddy in Bhandara and Chandrapur districts, however, due to the break in the rains from the 26th August to the 22nd September, some areas in Bhandara and Chandrapur districts remained un-transplanted in the season.

During the first three weeks of September, the Konkan region received the normal rainfall but in the last week, heavy rains were received in the southern parts of Ratnagiri district and caused lodging of the paddy crop. In the other parts of the State, practically no rains were received from the 1st to 9th September. Thereafter, light to moderate rainfall was recorded till the 23rd September. This was followed by heavy rains in the last week of that month causing lodging of bajra crop in Ahmednagar and Pune districts and also affecting the quality of the fully developed hybrid jowar grains. These rains were, however, beneficial to the other standing kharif crops and facilitated timely rabi sowings particularly of rabi jowar. The rains in the paddy tract of the Vidarbha region were inadequate and affected the early paddy varieties beyond recovery.

During the month of October, widespread light to rather heavy rains were received and benefited the standing kharif crops. The condition of paddy and ragi in the Konkan and Ghat regions and of kharif jowar, tur and cotton in the Marathwada and Vidarbha regions was generally good. The condition of bajra and groundnut in the State was fair. The medium and late varieties of paddy in Bhandara and Chandrapur districts revived to some extent. The bajra crop was affected by severe incidence of downy-mildew disease in parts of Nasik, Dhule, Jalgaon, Ahmednagar and Aurangabad districts.

The September and October rains facilitated timely sowing of rabi crops as also the proper growth of these crops subsequently. However, in lighter soils, the inadequate soil moisture affected the growth of unirrigated rabi jowar in the Deccan and Marathwada regions and its condition was fair.

During the third week of February (1975) rather heavy rains accompanied with by localised hail storms were received in Solapur district and in the eastern parts of the State, causing lodging of the wheat crop at its maturity stage and discolouring of the rabi jowar

grains to some extent. Otherwise the condition of the rabi crops in the State was quite satisfactory.

On the whole, the agricultural season in 1974-75 was favourable to the foodgrain crops.

## CHAPTER II

### CULTIVATED AND UNCULTIVATED AREA

( Table II, Pages 50-51)

( Summary Table—A Page 19 )

#### Number of Villages

3. The number of revenue villages in the State was 38,839 in 1974-75, as against 38,832 in the preceding year. The increase in the number by 7 villages was due to the formation of separate villages distributed in Pune, Buldhana and Amravati districts.

#### Total geographical Area

4. Based on the survey carried out by the Surveyor General of India, the total geographical area of the State was 307.8 lakh ha. The reporting area for Land Utilisation Statistics (*vide* Summary table-A) was 307.6 lakh ha. the same as in the preceding year.

The State had experienced drought conditions of varying severity during the three successive years 1970-71, 1971-72 and 1972-73 when the total cropped areas were 187.4 lakh ha. 181.2 lakh ha. and 169.8 lakh ha. respectively. The cultivated area in 1973-74 had regained its normal level and was 194.9 lakh ha.

5. It will be seen from the Summary Table-A (Page 19) that during the year under report, the total cropped area in the State was 195.1 lakh ha. thus

showing an increase by 0.1 per cent over that in 1973-74. The net cropped area showed a decrease of 0.6 per cent having decreased from 183.2 lakh ha. in 1973-74 to 182.1 lakh ha. in the year under report. On the other hand, area cropped more than once increased from 11.62 lakh ha. in 1973-74, to 13.0 lakh ha. in 1974-75 or by 11.8 per cent. The increase in the total cropped area during the year under report is attributed to the increase in the area under double cropping (or even multiple cropping in a few places) in the State.

At the State level, area under non-agricultural uses, permanent pastures and other grazing lands, current fallows, and other fallows, increased during the year under report by 1.8 per cent, 0.1 per cent, 21.3 per cent and 8.9 per cent respectively as compared to the areas in the preceding year while the area under 'Barren and unculturable land' and 'Culturable waste land' decreased in the year 1974-75 by 1.2 per cent and 7.7 per cent respectively as compared to those during 1973-74.

The areas under other items of land utilisation recorded marginal variations only.

## CHAPTER III

## IRRIGATED AREA

( Tables III-A and III-B Pages 52-63 )

( Summary Tables B and C Pages 20-21 )

**Sources of water supply**

6. The number of Government and private canals increased from 776 and 7466 in 1973-74 to 806 and 7480 or by 3.9 per cent and 0.2 per cent respectively during the year under report. The length of the government and private canals also increased by 3.9 per cent and 0.1 per cent respectively. The number of wells (other than tube wells) used for irrigation purposes also increased to 7,64,312 or by 1.5 per cent during 1974-75 from 7,53,293 in 1973-74. The number of wells (i) not in use, (ii) having independent ayacut and (iii) supplementing the recognised source of irrigation also recorded an increase by 0.7 per cent, 1.0 per cent and 19.2 per cent respectively during 1974-75 as compared to those in the preceding year. But the number of wells for domestic purposes decreased by 7.1 per cent.

The number of tanks both with ayacut 40 ha. or more and less than 40 ha. increased by 4.3 per cent and 2.1 per cent, respectively. During the year under report, the number of oil engines showed a decrease by 3.8 per cent as compared to that in the preceding year whereas the number of electric pumps increased from 1,61,232 in 1973-74 to 1,94,126 in 1974-75 or by 20.4 per cent. This is attributed to Government efforts to provide more irrigation facilities to cultivators under the rural Electrification Scheme.

**Gross and Net Irrigated Area**

7. The gross irrigated area in the State increased from 17.64 lakh ha. in 1973-74 to 19.33 lakh ha. during 1974-75 or by 9.6 per cent. The net area irrigated also recorded an increase by 9.5 per cent having gone up from 14.72 lakh ha. in 1973-74 to 16.12 lakh ha. during the year under report.

The percentage of net area irrigated to net area sown was 8.9 per cent while that of the gross area irrigated to the gross area sown was 9.9 per cent during the year 1974-75 as compared to the corresponding figures of 8.0 per cent and 9.1 per cent of the preceding year.

**Net area irrigated by different sources of irrigation**

8. The net area irrigated by government canals, private canals, tanks, and wells increased by 13.7 per cent, 9.6 per cent, 4.4 per cent, and 11.4 per cent, respectively as compared to those in the preceding year while that by other sources decreased by 4.8 per cent as compared to that in 1973-74.

**Sourcewise gross area irrigated**

9. The gross area under Government canals, private canals, tanks and wells also increased by 11.3 per cent, 1.2 per cent, 4.8 per cent, and 11.8 per cent respectively, while a decrease was noticed in gross irrigated area under other sources by 3.7 per cent.

**Irrigated area under food and non-food crops**

10. It is seen from the summary table C (page 21) that out of the total gross irrigated area of 19.33 lakh ha. during the year under report, an area of 17.77 lakh ha. (or 92.0 per cent) was under food crops and 1.56 lakh ha. (or 8.0 per cent) under non-food crops. Among the food crops, foodgrains occupied the major area of 12.54 lakh ha. (or 70.6 per cent) of the total area under food crops.

The irrigated area under different groups of crops has shown an increase over the last year. However, in case of individual crops a decrease was noticed in case of kharif jowar, bajri, maize, chillies, turmeric and fodder crops to the extent of 3.9 per cent, 9.8 per cent, 12.4 per cent, 2.4 per cent, 12.4 per cent and 3.0 per cent respectively.

## CHAPTER IV CROPPED AREA

(Tables IV-A, IV-B and IV-C, Pages 64-83)

(Summary Table D, Pages 22-25)

### Total area under crops

11. The divisionwise gross cropped area, area cropped more than once, net cropped area and area under food crops and non-food crops for the two years 1973-74 and 1974-75 are shown in the tables presented below :—

#### (i) Gross cropped area.—

(Area in '00' ha.)

Division	Gross cropped area		Percentage increase (+) or decrease (-) over 1973-74
	1973-74	1974-75	
1	2	3	4
Bombay ...	34,348	33,971	- 1.1
Pune ...	53,922	53,266	+ 1.2
Aurangabad ...	52,624	52,667	+ 0.1
Nagpur ...	53,966	55,152	+ 2.2
State total ...	1,94,860	1,95,056	+ 0.1

The gross cropped area at the State level recorded an increase of 0.1 per cent having gone up to 195.1 lakh ha. in 1974-75 from 194.9 lakh ha. in 1973-74. The increase was shared in two divisions of Aurangabad and Nagpur to the extent of 0.1 per cent and 2.2 per cent respectively, while in Bombay and Pune divisions, the area went down by 1.1 per cent and 1.2 per cent respectively.

#### (ii) Double cropped area.—

(Area in '00' ha.)

Division	Double cropped area		Percentage increase (+) or decrease (-) over 1973-74
	1973-74	1974-75	
1	2	3	4
Bombay ...	2,174	2,271	+ 4.5
Pune ...	3,464	3,919	+ 13.1
Aurangabad ...	3,235	3,253	+ 0.9
Nagpur ...	2,747	3,540	+ 28.9
State total ...	11,620	12,993	+ 11.8

#### (iv) Total area under food and non-food crops.—

(Area in '00' ha.)

Division	Area under crops						
	Food crops				Non-food crops*		
	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	
1	2	3	4	5	6	7	
Bombay ...	25,960	25,468	- 1.9	8,388	8,503	+ 1.4	
Pune ...	44,332	43,190	- 2.6	9,590	10,076	+ 5.1	
Aurangabad ...	40,316	38,757	- 3.9	12,308	13,910	+ 13.0	
Nagpur ...	33,997	34,236	+ 0.7	19,969	20,916	+ 4.7	
State total ...	1,44,605	1,41,651	- 2.0	50,255	53,405	+ 6.3	

At the State level, the area under food crops went down from 144.6 lakh ha. in the year 1973-74 to 141.7 lakh ha. in 1974-75 or by 2.0 per cent. However, it was more than the normal area of 137.7 lakh ha. The decrease was noticed in all the divisions except Nagpur division where the area under food crops increased by 0.7 per cent. On the other hand, the

During the year under report, the State level area cropped more than once increased by 1.37 lakh ha. or by 11.8 per cent having gone up from 11.62 lakh ha. in 1973-74 to 12.99 lakh ha. in 1974-75. The increase was noticed in all the four divisions of Bombay, Pune, Aurangabad and Nagpur to the extent of 4.5 per cent, 13.1 per cent, 0.9 per cent and 28.9 per cent respectively.

#### (iii) Net cropped area.—

(Area in '00' ha.)

Division	Net cropped area		Percentage increase (+) or decrease (-) over 1973-74
	1973-74	1974-75	
1	2	3	4
Bombay ...	32,174	31,700	- 1.5
Pune ...	50,458	49,347	- 2.2
Aurangabad ...	49,389	49,404	+ 0.03
Nagpur ...	51,219	51,612	+ 0.8
State total ...	1,83,240	1,82,063	- 0.6

The net cropped area (182.1 lakh ha.) in the State was less by 1.18 lakh ha. or by 0.6 per cent only as compared to that in the preceding year. The decrease was noticed mainly in the bajari tracts of Bombay and Pune divisions to the extent of 1.5 per cent and 2.2 per cent respectively, while in Aurangabad and Nagpur divisions, an increase of 0.03 per cent and 0.8 per cent respectively was recorded.

State area under non-food crops, showed an increase of 6.3 per cent having gone up to 53.4 lakh ha. in the year 1974-75 from 50.3 lakh ha. in 1973-74. This increase in the area under non-food crops was shared by all the four divisions of Bombay, Pune, Aurangabad and Nagpur to the extent of 1.4 per cent, 5.1 per cent, 13.0 per cent and 4.7 per cent respectively.

## CHAPTER V

## AREA, AVERAGE YIELD AND OUTTURN OF CROPS

( Tables IV-A and IV-B Pages— 64-81 )

( Tables V-A and V-B Pages— 84-95 )

( Summary Tables D and E Pages— 22-26 )

12. In the following paragraphs, the area, average yield\* and production of different principal crops during the year under report are given, in comparison with those in the preceding year, crop by crop in the context of the seasonal conditions. It will be worthwhile to mention at the outset, that after three consecutive drought affected years ending 1972-73, both the seasons (kharif and rabi) of the preceding year 1973-74 were generally favourable for the sowing of foodgrain crops.

During the year under report, due to the delayed coverage of different regions by the monsoon, the early kharif season was not quite favourable to the crops like bajri and cotton. Summarising, it may be stated that in spite of reduction of 3.6 lakh ha. of area under foodgrain crops as compared with that in the year 1973-74 mostly under bajri, the foodgrain production has shown considerable increase over the preceding year. This is mainly because of satisfactory growth of hybrid/high yielding varieties of crops and favourable post sowing seasonal conditions particularly for kharif jowar in the kharif season and all rabi foodgrain crops in the rabi season.

## A. Kharif foodgrain crops

(i) *Rice*.—With the receipt of monsoon rains from the 8th June in Konkan region, the sowing of paddy

\* *Yield per hectare*.—During the year under report, Statewise crop estimation surveys were continued on the principal crops of paddy, ragi, kharif jowar, bajri, wheat, rabi jowar, gram, sugarcane, cotton and groundnut. The survey on tur was continued in all the districts of Nagpur division and in Solapur and Osmanabad, Aurangabad and Parbhani districts while that on tobacco crop was also continued in Satara, Sangli and Kolhapur districts.

The districtwise average yield based on the data of the crop estimation surveys, are given in table V-A for survey crops mentioned above. For remaining non-survey crops also the direct estimates of average yield are presented in table V-A.

nurseries was undertaken. By the 4th July, the monsoon was active all over the State enabling completion of sowing in Ghat region and eastern parts of Vidarbha region. From the 29th July, widespread rains were received facilitating completion of paddy transplanting in the Konkan and Ghat regions. With the receipt of the moderate to heavy rains during mid-August, transplanting of paddy in Bhandara and Chandrapur districts of Vidarbha region was hurried-up. However, due to break in rains from the 4th week of August to 22nd September, some areas in Bhandara and Chandrapur districts remained to be transplanted. This resulted in reduction in paddy area in these two districts to some extent. The dry spell that prevailed from the fourth week of August to the third week of September affected the growth of early paddy varieties in parts of Konkan districts while in Chandrapur and Bhandara districts the dry spell affected the yields of early paddy considerably.

Substantial rains received in the last week of September saved the late varieties of paddy crop in Bhandara and Chandrapur districts and also helped in improving the crop in other parts of the State. On the whole, the growth of the paddy crop was satisfactory except in Bhandara and Chandrapur districts of Vidarbha region.

The crop was affected in the endemic areas by pests viz., stemborers, rather severely in Thane and Kulaba districts and by gall-fly in parts of Morgaon-Arjuni block in Bhandara district and in parts of Sindewahi, and Anrori blocks of Chandrapur district.

The condition of summer paddy, grown over an area of 12,000 ha. mostly in Ratnagiri, Kulaba, Bhandara and Chandrapur districts was satisfactory.

The divisionwise area, average yield of rice per ha. and production of the crop inclusive of the summer crop for the two years viz. 1973-74 and 1974-75 are presented in the table below :—

Crop : RICE									
Division	Area in '00' ha.		Percentage increase (+) or decrease (-) over 1973-74	Average yield of rice per ha.		Percentage increase (+) or decrease (-) over 1973-74	Production of rice in '00' tonnes		Percentage increase (+) or decrease (-) over 1973-74
	1973-74	1974-75		1973-74	1974-75		1973-74	1974-75	
1	2	3	4	5	6	7	8	9	10
				kg.	kg.				
Bombay ...	4,895	4,897	...	1,501	1,450	- 3.4	7,347	7,103	- 3.3
Pune ...	1,791	1,851	+ 3.4	1,365	1,488	+ 9.0	2,444	2,754	+ 12.7
Aurangabad ...	793	881	+ 11.1	594	455	- 23.4	471	401	- 14.9
Nagpur ...	6,032	5,943	- 1.5	1,013	737	- 27.3	6,108	4,383	- 28.2
State ...	13,511	13,572	+ 0.5	1,212	1,079	- 11.0	16,370	14,641	- 10.6

The State level area slightly increased by 6,100 ha or by 0.5 per cent as compared to that in the preceding year. The increase was noticed in Pune and Aurangabad divisions of the State while it decreased by 1.5 per cent in Nagpur division. The area in Bombay division was nearly of the same order as in the preceding year.

The State average yield of rice decreased to 1,079 kg/ha. in the year 1974-75 from 1212 kg/ha in the year 1973-74. The decrease in the yield during 1974-75 was observed in the three divisions of Bombay, Aurangabad and Nagpur to the extent of 3.4 per cent, 23.4 per cent and 27.3 per cent respectively while it was higher by 9.0 per cent in Pune division. The State production of rice, inclusive of 15,800 tonnes of summer rice was 14.64 lakh tonnes and was less by 10.6 per cent as compared to that in the preceding year.

(ii) *Kharif jowar*.—Though the monsoon this year was delayed, the rains received from the 4th July to 15th July were adequate to undertake the sowing of the crop in most parts of the State. After a break of nearly a fortnight from the 16th July, widespread rains received were beneficial for completing the sowing of

this crop. Some area under cotton, which was not sown due to late monsoon rains, was diverted to kharif jowar and although the area under the crop increased by about 2.9 per cent over the normal area of 25.3 lakh ha. it was still less by 1.6 lakh ha. as compared with that in the preceding year. The condition of the crop till August was satisfactory. However, due to long dry spell till the third week of September, the crop on light soils was affected to some extent.

The heavy rains received during the last week of September had discoloured grains of hybrid jowar.

A mild incidence of midgefly on hybrid jowar reported from parts of Jalgaon, Satara, Kolhapur, Osmanabad, Buldhana, Akola, Amravati and Nagpur districts, was controlled due to timely spraying programme in the different parts of the State.

On the whole, the condition of the kharif jowar crop was good and the above situations did not cause any serious dent in the overall production of 21.2 lakh tonnes.

The table below gives the State and divisionwise area, average yield as per ha. and production of the crop for the two years viz. 1973-74 and 1974-75.

Crop : KHARIF JOWAR									
Division	Area in '00' ha.			Average yield per ha.			Production in '00' tonnes		
	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74
1	2	3	4	5	6	7	8	9	10
				kg	kg				
Bombay ...	2,155	2,020	- 6.3	507	980	+ 93.3	1,093	1,969	+ 80.1
Pune ...	3,114	2,785	- 10.6	867	1,264	+ 45.8	2,699	3,524	+ 30.6
Aurangabad ...	9,428	8,387	- 11.0	292	678	+ 132.2	2,752	5,686	+ 106.6
Nagpur ...	12,930	12,866	- 0.5	491	777	+ 58.3	6,349	9,997	+ 57.5
State ...	27,627	26,058	- 5.7	467	813	+ 74.1	12,893	21,176	+ 64.2

Though the total area under kharif jowar in the State decreased by 5.7 per cent as compared to the area in the preceding year, it increased by about 2.9 per cent over the normal area of 25.3 lakh ha. The decrease was noticed in all the four divisions of Bombay, Pune, Aurangabad and Nagpur to the extent of 6.3 per cent, 10.6 per cent, 11.0 per cent and 0.5 per cent respectively.

During the preceding year, the crop of kharif jowar was severely affected by incidence of midgefly and the State average yield was 467 kg/ha. only. During the year under report the State average yield was 813 kg/ha. The increase was noticed in all the four divisions of Bombay, Pune, Aurangabad and Nagpur and was quite substantial. The State level production of the crop was 21.18 lakh tonnes showing an increase of 64.2 per cent as compared to that in the year 1973-74, where the late sown crop of hybrid jowar and local jowar were severely affected by incidence of midgefly in different parts of the State. The production was

12.89 lakh tonnes. The increase in the production was observed in all the four divisions of the State.

(iii) *Bajri*.—Sowing of bajri crop started with the receipt of widespread rains from the 6th July. These rains were, however, not sufficient for sowing in eastern parts of Nasik, Dhule, Satara, Sangli and parts of Bhir and Aurangabad districts, resulting in reduction in sown area. Rains received towards the end of July and early September were beneficial for proper growth of the crop. The crop in parts of Nasik, Dhule, Jalgaon and Ahmednagar districts and parts of Aurangabad division was affected by a severe incidence of downy mildew. The crop suffered to some extent from ergot disease also in parts of Pune district and in parts of Aurangabad division. On the whole, the season was not favourable to this crop and as a result the area sown, the average yield per ha. and consequently the production of this crop fell considerably particularly in the main bajari growing area of Bombay, Pune and Aurangabad divisions.

The table below gives the area, average yield per ha. and production of the crop in each division; and at the State level during the years 1973-74 and 1974-75.

Crop : BAJRI									
Division	Area in '00' ha.			Average yield per ha.			Production in '00' tonnes		
	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74
1	2	3	4	5	6	7	8	9	10
				kg.	kg.				
Bombay ...	6,879	5,711	- 17.0	508	371	- 27.0	3,485	2,120	- 39.2
Pune ...	9,171	7,895	- 13.9	356	300	- 15.7	3,267	2,374	- 27.3
Aurangabad ...	5,572	4,306	- 22.7	288	280	- 2.8	1,606	1,205	- 25.0
Nagpur ...	523	526	+ 0.6	270	416	+ 54.1	141	220	+ 56.0
State ...	22,145	18,438	- 16.7	384	320	- 16.7	8,499	5,919	- 30.4

The total area under the crop at the State level decreased by 3.71 lakh ha. or by 16.7 per cent having gone down from 22.15 lakh ha. in 1973-74 to 18.44 lakh ha. in 1974-75. The decrease was noticed in all the divisions except in Nagpur where the area was nearly constant.

The State average yield per ha. of bajri crop decreased by 16.7 per cent having gone down to 320 kg/ha. in 1974-75 from 384 kg/ha. in 1973-74. The decrease in the yield rate was noticed in all the divisions except Nagpur where the yield rate showed an increase of 54.1 per cent over that in the preceding year.

As a result of the decrease in area and also the average yield rate, the State level total production decreased by 30.4 per cent, having gone down from 8.50 lakh tonnes during 1973-74 to 5.92 lakh tonnes during 1974-75. The decrease was observed in all the divisions

of the State except Nagpur where the production has shown an increase of 56.0 per cent over 1973-74.

(iv) *Ragi*.—The sowing of this crop in Konkan region started with the rains received from the 8th June in this region. From the 4th July, the monsoon became active facilitating large scale sowing in Konkan and Ghat regions. From the 29th July, widespread rains received facilitated the transplanting in both the regions. The break in rains for about three weeks from mid-August affected the growth of this crop adversely in both the regions. This resulted in lowering the yield rate of the crop and hence affected the production to some extent.

The division and State level area, average yield per ha. and production of the crop for the two years 1973-74 and 1974-75 are presented in the table below :

Crop : RAGI									
Division	Area in 00 ha.			Yield per ha.			Production in 00 tonnes		
	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74
1	2	3	4	5	6	7	8	9	10
				kg.	kg.				
Bombay ...	1,432	1,440	+ 0.6	957	843	- 11.9	1,370	1,214	- 11.4
Pune ...	609	614	+ 0.7	982	891	- 9.3	598	547	- 8.7
Aurangabad ...	7	6	- 14.3	680	845	+ 24.3	5	5	...
Nagpur ...	...	...	...	...	...	...	...	...	...
State ...	2,048	2,060	+ 0.5	963	857	- 11.0	1,973	1,766	- 10.5

The State area under the crop increased by 0.5 per cent during the year under report as compared to that in the preceding year. The increase was marginal only in both the major crop growing divisions of Bombay and Pune being 0.6 per cent and 0.7 per cent respectively.

The State average yield per ha. of ragi decreased to 857 kg/ha. in 1974-75 from 963 kg/ha. in 1973-74. The decrease was shared by both the divisions of Bombay and Pune and was of the order of 11.9 per cent and 9.3 per cent respectively. Consequently, the production also decreased by 10.5 per cent at the State level. The decrease was noticed in both the divisions of Bombay and Pune to the extent of 11.4 per cent and 8.7 per cent respectively.

The table below gives the State level and divisional level area, yield per ha. and production of the crop for the two years 1973-74 and 1974-75.

Division	Crop : TUR									
	Area in '00' ha.			Average yield kg./ha.			Production in '00' tonnes			
	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	
1	2	3	4	5	6	7	8	9	10	
				kg.	kg.					
Bombay ...	285	312	+ 9.5	554	839	+ 51.4	158	261	+ 65.2	
Pune ...	1,177	973	- 17.3	435	526	+ 20.9	512	512	...	
Aurangabad ...	2,438	2,460	+ 0.9	379	460	+ 21.4	924	1,131	+ 22.4	
Nagpur ...	2,339	2,394	+ 2.4	697	780	+ 11.9	1,629	1,868	+ 14.7	
State ...	6,239	6,139	- 1.6	517	614	+ 18.8	3,223	3,772	+ 17.0	

During the year under report, the State level area under this crop decreased to 6139 hundred ha. from 6239 hundred ha. in the preceding year or by 1.6 per cent. The decrease in area was confined mainly to Pune division and was 17.3 per cent as compared to that in the year 1973-74. In the remaining three divisions viz. Bombay, Aurangabad and Nagpur the area under tur crop has increased in 1974-75 and the increase was to the extent of 9.5 per cent, 0.9 per cent and 2.4 per cent respectively.

The State level average yield showed considerable increase by 18.8 per cent during 1974-75 as compared to the yield in 1973-74. The increase was shared by all the four divisions viz. Bombay, Pune, Aurangabad and Nagpur to the extent of 51.4 per cent, 20.9 per cent, 21.4 per cent and 11.9 per cent respectively.

The State production of the crop also increased by 17.0 per cent during 1974-75 as compared to that in

(v) *Tur*.—With the delay in monsoon and inadequate rains at the sowing time, large scale sowing of this crop could not be completed in normal areas of Pune Division under this crop. As a result, the area under this crop decreased as compared to normal area in the State as also the area in the preceding year. Due to widespread rains received till mid-August, the growth of the crop was satisfactory. Rains in September and October were also beneficial to this crop and the crop condition was generally satisfactory. No severe incidence of pests and diseases was reported on tur crop during the year under report.

the preceding year. The increase in production was noticed in all the divisions except Pune where it was of the same order as in the preceding year.

#### B. Rabi foodgrain crops

(vi) *Wheat*.—Widespread and substantial rains received in the last week of September and in the month of October facilitated timely sowing of unirrigated crop. Due to sufficient soil moisture, the germination of the crop was also satisfactory. Most of the sowing of the irrigated crop was also completed by December end. The growth of the unirrigated crop as also of the irrigated crop was satisfactory all over the State. No major pests and diseases were reported on the crop.

The divisional and State level area, average yield per hectare and production of the crop for the two years 1973-74 and 1974-75 are presented in the table below :

Division	Crop : WHEAT									
	Area in '00' ha.			Average yield in kg. per ha.			Production in '00' tonnes		Percentage increase (+) or decrease (-) over 1973-74	
	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	
1	2	3	4	5	6	7	8	9	10	
				kg.	kg.					
Bombay ...	1,801	1,847	+ 2.6	851	852	+ 0.1	1,533	1,572	+ 2.5	
Pune ...	1,598	1,631	+ 2.1	728	1,107	+ 52.1	1,163	1,811	+ 55.7	
Aurangabad ...	2,885	2,669	- 7.5	385	630	+ 63.6	1,111	1,681	+ 51.3	
Nagpur ...	3,368	3,330	- 1.1	494	744	+ 50.6	1,662	2,478	+ 49.1	
State ...	9,652	9,477	- 1.8	567	796	+ 41.4	5,469	7,542	+ 37.9	

The area under wheat went down by about 17 thousand ha. or by 1.8 per cent during 1974-75 as compared to that in 1973-74. The decrease was noticed mostly in Aurangabad division and was of the order of 7.5 per cent. Nagpur division also recorded a slight decrease in area to the extent of 1.1 per cent while the remaining divisions viz. Bombay and Pune recorded an increase during 1974-75 by 2.6 per cent and 2.1 per cent respectively.

The State average yield of wheat increased to 796 kg./ha. in 1974-75 from 567 kg./ha. in 1973-74 thus recording an increase by 40.4 per cent. The increase was shared by all the three divisions of Pune, Aurangabad and Nagpur to the extent of 52.1 per cent, 63.6 per cent and 50.6 per cent respectively. The average yield per ha. in Bombay was of the same order i. e. 852 kg./ha. as in the preceding year. The increase in the yield rate of wheat was due to increased coverage under high yielding varieties and also due to increased areas under irrigation in the State during the year under report. Moreover the season was also favourable except for localised heavy rains and hailstorm during the period from the 19th February 1975 to 23rd February 1975 in few pockets of Solapur, Nanded and eastern parts of Nagpur division.

The production of wheat in the State also increased by 37.9 per cent as compared to that in the preceding

year. The increase was shared by all the four divisions of Bombay, Pune, Aurangabad and Nagpur to the extent of 2.5 per cent, 55.7 per cent, 51.3 per cent and 49.1 per cent respectively.

(vii) *Rabi jowar*.—The rains received during the first fortnight of August were beneficial for undertaking the sowing of rabi jowar in major rabi jowar districts of Solapur and Ahmadnagar. Substantial rains received in different parts of the State during the last week of September and during October were useful for undertaking large scale sowing of rabi jowar ensuring proper germination and growth.

The condition of unirrigated rabi jowar on light soils of Deccan and Marathwada regions was fair. In other parts, the condition of the crop was satisfactory. Localised heavy rains received from the 19th February to 23rd February 1975 in parts of Solapur, Nanded and eastern parts of Nagpur division and hailstorm in parts of Amravati and Buldhana districts affected the quality of the grains of rabi jowar to some extent. Barring the above, the condition of the rabi jowar in the State was generally satisfactory. There was no severe incidence of pest or disease on the crop.

The divisionwise area, average yield per ha. and outturn of the crop for the two years 1973-74 and 1974-75 are given in the table below :

Crop : RABI JOWAR									
Division	Area in '00' ha.		Percentage increase (+) or decrease (-) over 1973-74	Average yield per ha.		Percentage increase (+) or decrease (-) over 1973-74	Production '00' tonnes		Percentage increase (+) or decrease (-) over 1973-74
	1973-74	1974-75		1973-74	1974-75		1973-74	1974-75	
1	2	3	4	5	6	7	8	9	10
				kg.	kg.				
Bombay ..	1,132	1,325	+17.0	713	658	- 7.7	807	871	+ 7.9
Pune ...	19,714	19,846	+ 0.7	435	429	- 1.4	8,573	8,547	- 0.3
Aurangabad ...	9,873	10,307	+ 4.4	499	496	- 0.6	4,925	5,127	+ 4.1
Nagpur ...	2,530	2,693	+ 6.4	393	352	-10.4	995	948	- 4.7
State ...	33,249	34,171	+ 2.8	460	453	- 1.5	15,300	15,493	+ 1.3

The State total area showed an increase by 2.8 per cent having gone up from 33.25 lakh ha. in 1973-74 to 34.17 lakh ha. during 1974-75. The increase was shared by all the divisions. The average yield per ha. in the State during the year under report decreased by 1.5 per cent as compared to that in the preceding year and decreased as shared by all the four divisions of Bombay, Pune, Aurangabad and Nagpur to the extent

of 7.7 per cent, 1.4 per cent, 0.6 per cent and 10.4 per cent respectively.

The State total production of rabi jowar was slightly increased as compared as that in the preceding year by 1.3 per cent. Among the divisions, the production in Bombay and Aurangabad divisions increased during 1974-75 as compared to that in 1973-74 by 7.9 per cent and 4.1 per cent respectively. In the other two divi-

sions of Pune and Nagpur, the production during the year under report decreased by 0.3 per cent and 4.7 per cent respectively.

(viii) *Gram*.—Substantial and widespread rains received in the last week of September and in the month of October, facilitated timely sowing of gram crop. Due to sufficient soil moisture in the fields, the

area under this crop especially under double cropping increased as compared to area during 1973-74. The germination and growth of the crop was satisfactory. No severe incidence of pests and diseases was observed on this crop. On the whole, the condition of the crop was generally satisfactory, except in parts of Bombay and Aurangabad divisions.

The table below gives the area, average yield and outturn of the crop at the division and State levels.

Crop : GRAM									
Division	Area in '00' ha.		Percentage increase (+) or decrease (-) over 1973-74	Average Yield per ha.		Percentage increase (+) or decrease (-) over 1973-74	Outturn in '00' tonnes		Percentage increase (+) or decrease (-) over 1973-74
	1973-74	1974-75		1973-74	1974-75		1973-74	1974-75	
1	2	3	4	5	6	7	8	9	10
				kg.	kg.				
Bombay ..	382	450	+17.8	487	456	- 6.4	186	205	+10.2
Pune ..	733	952	+29.9	329	352	+ 7.0	241	341	+41.5
Aurangabad ..	1,630	1,860	+14.1	353	306	-13.3	575	567	- 1.4
Nagpur ..	761	818	+ 7.5	375	395	+ 5.3	285	323	+13.3
State ..	3,506	4,080	+16.4	367	350	- 4.6	1,287	1,436	+11.6

It is seen from the above that the area under the crop has increased, at the State level, by 16.4 per cent and the increase was shared by all the divisions in the State.

The State average yield per ha. went down by 4.6 per cent and the decrease was noticed in the two divisions of Bombay and Aurangabad by 6.4 per cent and 13.3 per cent respectively.

The State outturn of the crop showed an increase of 11.6 per cent and increased was observed in the three

divisions of Bombay, Pune and Nagpur to the extent of 10.2 per cent, 41.5 per cent and 13.3 per cent respectively, while it decreased in Aurangabad division by 1.4 per cent.

(ix) *Area under foodgrain crops*.—The table below presents at a glance the total area under cereals, pulses and foodgrains at State and divisional levels during the two years 1973-74 and 1974-75.

(Area in '00' ha.)

Division	Area under foodgrain crops								
	CEREALS			PULSES			TOTAL FOODGRAINS		
	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74
1	2	3	4	5	6	7	8	9	10
Bombay ..	19,577	18,490	- 5.6	4,960	5,369	- 8.3	24,537	23,859	- 2.8
Pune ..	36,679	35,237	- 3.9	5,177	5,228	+ 1.0	41,856	40,465	- 3.3
Aurangabad ..	29,041	27,078	- 6.8	10,183	10,458	+ 2.7	39,224	37,536	- 4.3
Nagpur ..	25,613	25,615	...	7,303	7,509	+ 2.8	32,916	33,124	+ 0.6
State ..	1,10,910	1,06,420	- 4.0	27,623	28,564	+ 3.4	1,38,533	1,34,984	- 2.6

It is seen from the above that the State area under foodgrain crops decreased by 2.6 per cent during 1974-75 as compared to that in the preceding year. During the year 1973-74, the unsown kharif area under cotton and groundnut crops was diverted to foodgrain crops and hence the area under foodgrain crops was higher in 1973-74. During the year under

report, though the areas under these non-food crops of cotton and groundnut decreased as compared to normal, they have increased as compared to the areas under these crops in 1973-74. The comparative decrease in area under foodgrain crops is mainly due to decrease in area under cereals to the extent of 4.0 per cent in 1974-75 as compared to that in 1973-74.

(x) *Production of foodgrain crops.*—The State and divisional level production of cereals, pulses and foodgrains during 1973-74 and 1974-75 is presented in the table below :

(Production in '00' tonnes)

Division	Production of foodgrain crops									
	CEREALS			PULSES			FOODGRAINS			
	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	
1	2	3	4	5	6	7	8	9	10	
Bombay ...	16,184	15,460	— 4.5	1,614	2,335	+ 44.7	17,798	17,795		
Pune ...	19,262	20,034	+ 4.0	1,608	1,945	+ 21.0	20,870	21,979	+ 5.3	
Aurangabad ...	11,002	14,294	+ 29.9	2,801	3,495	+ 24.8	13,803	17,789	+ 28.9	
Nagpur ...	15,321	18,113	+ 18.2	2,659	3,323	+ 25.0	17,980	21,436	+ 19.2	
State ...	61,769	67,901	+ 9.9	8,682	11,098	+ 27.8	70,451	78,999	+ 12.1	

During the year under report, the foodgrain production in the State increased by 12.1 per cent as compared to that in the year 1973-74. The increase was shared by both cereals and pulses to the extent of 9.9 per cent and 27.8 per cent respectively. Among the cereals, the crops of kharif jowar, rabi jowar and wheat fared well during the year under report.

The increase in foodgrain production as stated above was shared by the three divisions of Pune, Aurangabad and Nagpur to the extent of 5.3 per cent, 29.6 per cent and 19.2 per cent respectively.

### C. Other principal crops

(xi) *Sugarcane.*—The table below gives the area, yield rate per ha. and production of the crop in each division and the State for the two years 1973-74, 1974-75.

Division	Crop : SUGARCANE									
	Area in '00' ha.			Yield of Gur/ha. in kg.			Production in gur '00' tonnes			
	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	
1	2	3	4	5	6	7	8	9	10	
Bombay ...	285 (270)	334 (312)	+ 17.2	8922	10244	+ 14.8	2409	3196	+ 32.7	
Pune ...	1578 (1193)	1795 (1354)	+ 13.8	9459	10775	+ 13.9	11297	14590	+ 29.2	
Aurangabad...	243 (243)	300 (300)	+ 23.5	6012	7357	+ 22.4	1461	2207	+ 51.1	
Nagpur ...	39 (39)	46 (46)	+ 17.9	6872	7261	+ 5.7	268	334	+ 24.6	
State ...	2,145 (1745)	2,475 (2012)	+ 15.4	8845	10103	+ 14.2	15435	20327	+ 31.7	

Note.—Fig. in the bracket indicate that area harvested during the year 1974-75.

During the year under report, the area under sugarcane, average yield per ha. of gur and its production showed an increase of 15.4 per cent, 14.2 per cent and 31.7 per cent respectively as compared to those in the preceding year.

(xii) *Cotton*.—In the past, when monsoon provided normal sowing conditions in June, the sown area under cotton had touched a level of 27.2 lakh ha. This year, the monsoon covered the State late by more than a month delaying the sowing of the crop and restricting the sown area to 24.97 lakh ha. However, the sowing conditions were not as bad as in the preceding year when the sown area had fallen to 23.5 lakh ha. Hence, the increase in the area by 6.3 per cent during the current year over that in the preceding year 1973-74 is apparent only.

The germination of crop was satisfactory and its growth was also good. Rains received in the first fortnight of August were beneficial for the proper growth of the crop. Then there was a break in rains for about a fortnight and the soil moisture had depleted considerably. However, substantial and widespread rains received in the 1st and the last week of September and in October were useful for proper development of the crop.

No severe incidence of pest or disease on the crop was observed during the year under report. On the whole, the condition of the crop was quite satisfactory in the State.

A table showing the area, average yield and production of the crop at divisional and state levels during the two years 1973-74 and 1974-75 are presented below :

Crop: COTTON										
Division	Area in '00' ha.		Average yield of lint per ha. in kg.				Production in '00' bales of 180 kg. each			
	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	
1	2	3	4	5	6	7	8	9	10	
Bombay	...	2333	2,486	+ 6.6	101	174	+72.3	1304	2402	+ 84.2
Pune	...	158	323	+104.4	214	213	...	188	383	+103.7
Aurangabad	...	5,466	6,031	+ 10.3	88	128	+ 45.5	2661	4295	+ 61.4
Nagpur	...	15,525	16,128	+ 3.9	75	101	+34.7	6421	9013	+ 40.4
State	..	23,482	24,968	+ 6.3	81	116	+43.2	10,574	16,093	+ 52.2

The State area under cotton showed an increase of 6.3 per cent during the year 1974-75 as compared to that in 1973-74. This increase in area was shared by all the four divisions of Bombay, Pune, Aurangabad and Nagpur in the State to the extent of 6.6 per cent, 104.4 per cent, 10.3 per cent and 3.9 per cent respectively.

The State average yield of lint per ha. increased in 1974-75 by 43.2 per cent and was shared substantially by all the divisions except Pune division where the yield rates seem to have stabilised due to irrigation facilities.

The State production of cotton was 16.1 lakh bales, having increased over that in the preceding year by 52.2 per cent. The increase of more than 100 per cent in production in Pune division was due to increase in area alone while the increase in the other divisions in the State was due to the increase in the area as well as in the yield rate. The increase was of the

order of 84.2 per cent in Bombay, 61.4 per cent in Aurangabad and 40.4 per cent in Nagpur division.

(xiii) *Groundnut*.—Due to late arrival of rains and their inadequacy at sowing time, the area under groundnut decreased in parts of Aurangabad and Nagpur divisions. Though the State area under this crop increased during the year under report as compared to that in the preceding year, it was less than its normal area. The sown crop germinated well. Widespread rains received from the 29th July and early August were useful for the proper growth of the crop. Due to break in rains for nearly a fortnight, the crop on light soils in parts of Deccan and Marathwada regions suffered to some extent. The condition of the crop improved to some extent due to light to moderate rains received till the 23rd September and due to adequate rains in last week of September and October. The crop was generally satisfactory except in few pockets of Deccan and Marathwada regions.

The divisional and State level area, average yield and production of groundnut for the two years 1973-74 and 1974-75 are presented in the table below :—

Division	Crop : GROUNDNUT								
	Area in '00' ha.			Average yield of pods per ha.			Production in '00' tonnes		
	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74
1	2	3	4	5	6	7	8	9	10
				kg.	kg.				
Bombay ..	2,038	2,445	+20.3	822	673	-18.1	1,675	1,646	+ 1.7
Pune ...	2,098	2,228	+ 6.2	888	906	+ 2.0	1,864	2,019	+ 8.3
Aurangabad...	1,959	1,923	- 1.8	638	608	- 4.7	1,249	1,169	- 6.4
Nagpur ...	1,489	1,407	- 5.5	583	754	+ 29.3	869	1,061	+ 22.1
State ...	7,584	8,003	+ 5.5	746	737	- 1.2	5,657	5,895	+ 4.2

The State total area under the crop showed an increase of 5.5 per cent in 1974-75 as compared to that in the preceding year. This increase was noticed in two divisions of Bombay and Pune to the extent of 20.3 per cent and 6.2 per cent respectively while in the remaining two divisions of Aurangabad and Nagpur the area decreased to the extent of 1.8 per cent and 5.5 per cent respectively.

The average yield of dried pods at the State level was 737 kg./ha. in 1974-75 as compared to that 746 kg./ha. in 1973-74 thus showing a decrease by 1.2 per cent.

The production of the crop at the State level increased by 4.2 per cent having gone up to 5.90 lakh tonnes during 1974-75 from 5.66 lakh tonnes in 1973-74. The increase in production was shared by all the divisions except Marathwada where the production was lower by 6.4 per cent in 1974-75 as compared to that in 1973-74.

(xiv) *Sesamum (Total)*.—The area, average yield and production of sesamum at State and divisional level are presented here below for the two years 1973-74 and 1974-75.

Division	Crop : SESAMUM								
	Area in '00' ha.			Average yield per ha.			Production in '00' tonnes		
	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74	1973-74	1974-75	Percentage increase (+) or decrease (-) over 1973-74
1	2	3	4	5	6	7	8	9	10
				kg.	kg.				
Bombay ...	154	195	+26.6	325	297	- 8.6	50	58	+16.0
Pune ...	91	91	...	297	275	- 7.4	27	25	- 7.4
Aurangabad ...	250	315	+26.0	176	203	+15.3	44	64	+45.5
Nagpur ...	999	1,138	+13.9	157	214	+36.3	157	244	+55.4
State ...	1,494	1,739	+16.4	186	225	+21.0	278	391	+40.6

The State total area under the crop increased by 16.4 per cent and the increase was observed in Bombay, Aurangabad and Nagpur divisions to the extent of

26.6 per cent, 26.0 per cent and 13.9 per cent respectively. The area in Pune division was of the same order as in the last year.

The State average yield per hectare increased by 21.0 per cent in 1974-75 as compared to that in the preceding year. The increase in average yield was observed in two divisions viz., Aurangabad and Nagpur to the extent of 15.3 per cent and 36.3 per cent respectively. In the remaining two divisions of Bombay and Pune the yield rate decreased by 8.6 per cent and 7.4 per cent respectively as compared to that in the year 1973-74.

The production of the crop at the State level increased by 40.6 per cent and the increase in production was shared by all the divisions except Pune where it decreased by 7.4 per cent as compared to that in the preceding year.

(xv) *Linseed*.—The table below gives area, yield rate per hectare and production of the crop at the State and divisional levels for the two years 1973-74 and 1974-75.

Crop : LINSEED.										
Division	Area in '00' ha.			Average yield per ha.			Production in '00' tonnes			
	1973-74	1974-75	Percentage Increase (+) or Decrease (-) over 1973-74	1973-74	1974-75	Percentage Increase (+) or Decrease (-) over 1973-74	1973-74	1974-75	Percentage Increase (+) or Decrease (-) over 1973-74	
1	2	3	4	5	6	7	8	9	10	
				kg.	kg.					
Bombay	...	2	5	+150.0	500	280	-44.0	1	2	+100.0
Pune	...	56	101	+80.4	179	282	+57.5	10	29	+190.0
Aurangabad	...	1026	1461	+42.4	189	256	+35.4	194	374	+92.8
Nagpur	...	1285	1441	+12.1	180	225	+25.0	231	324	+40.3
State	...	2370	3008	+26.9	184	242	+31.5	436	729	+67.2

It is seen from the above table that the State area increased by 26.9 per cent in 1974-75 as compared to the area in 1973-74. The increase in area was shared by all the divisions in the State viz., Bombay, Pune, Aurangabad and Nagpur to the extent of 150.0 per cent, 80.4 per cent, 42.4 per cent and 12.1 per cent respectively.

The State average yield per hectare increased from

184 kg./ha. in 1973-74 to 242 kg./ha. in 1974-75 or by 31.5 per cent.

The State level total production of the crop also increased from 0.44 lakh tonnes in 1973-74 to 0.73 lakh tonnes in 1974-75 or by 67.2 per cent. The increase in production was shared by all the four divisions of Bombay, Pune, Aurangabad and Nagpur.

## CHAPTER VI

### PRICES

(Table VI, pages 96-100)

(Summary Table 'F', page 27)

13. The districtwise farm harvest prices of the principal crops during the peak marketing period 1974-75 are given in the main table VI of the report. The average farm harvest prices at the State level for the principal commodities during the 5 years from 1970-71 to 1974-75 are given in the Summary Table 'F'. During the year under report prices obtained by farmers in respect of almost all the food commodities increased appreciably as compared with those in the preceding year due to inflationary trends.

14. The major variations in the average farm harvest prices of principal commodities at the State and divisional levels are commented in the following paragraphs. The increase or decrease in prices is commented with reference to those in the preceding year.

The price of wheat at the State level was Rs. 203.37 per quintal and was of the same order as that of the previous year, the increase in Aurangabad and Nagpur divisions by 1.4 per cent and 3.2 per cent respectively was compensated by a decrease of 1.0 per cent and 4.2 per cent in Bombay and Pune Divisions respectively.

The average price of jowar at the State level was Rs. 169.94 per quintal and was higher by 9.3 per cent. The increase ranged from 1.8 per cent to 17.00 per cent in different divisions except Aurangabad division where the price was lower by 1.6 per cent. The State average price of bajri was Rs. 146.02 per quintal and was higher by 8.2 per cent. The increase was noticed in all the divisions except Aurangabad where it decreased by 4.9 per cent.

The price of ragi at the State level was Rs. 142.82 per quintal and was higher by 27.4 per cent. The increase was noticed in Bombay and Aurangabad divisions to the extent of 41.3 per cent and 11.4 per cent.

The price of maize at the State level was Rs. 143.14 per quintal having recorded a rise by 1.1 per cent. Whereas the prices fell by 1.4 per cent. in Bombay division it increased by 15.6 per cent in Nagpur division.

The State average price of tur dal was Rs. 234.83 per quintal during the year under report showing an increase of 12.6 per cent due to higher prices in Bombay, Pune, Aurangabad and Nagpur divisions by 8.2 per cent, 18.0 per cent, 17.4 per cent and 8.6 per cent respectively.

The price of gram was Rs. 211.02 per quintal showing a small decrease of 0.9 per cent where as the price decreased in Pune, Aurangabad by 1.3 per cent to 3.2 per cent respectively, it increased in Bombay and Nagpur divisions by 0.5 per cent and 3.7 per cent respectively.

15. The table below gives the average prices of the agricultural commodities prevailing at selected centres during peak marketing periods for the years 1970-71 to 1974-75.

Commodity 1	Centre 2	Price per quintal				
		1970-71 3	1971-72 4	1972-73 5	1973-74 6	1974-75 7
		Rs.	Rs.	Rs.	Rs.	Rs.
Jowar	1. Mangalwedha (Solapur)	A 56.00	58.00	58.00	90.00	74.00
	2. Karanja (Akola)	B 54.00	56.00	56.00	88.00	72.00
	3. Latur (Osmanabad)	C 49.00	50.00	50.00	82.00	66.00
Bajri	1. Nasik	69.17	83.83	151.53	130.67	202.50
	2. Phulmari (Aurangabad)	69.00	91.04	152.67	121.80	182.00
Rice	1. Thane	AA 100.50	106.00	109.00	120.00	89.00
	2. Goregaon	A 93.50	98.50	101.50	113.00	84.00
		B 86.50	91.50	94.50	105.00	79.00
		C 78.50	83.00	86.00	98.00	74.00
Wheat	1. Gade (Nagpur)	94.40	99.00	76.00	185.92	203.44
	2. Jalna (Aurangabad)	106.80	103.90	76.00	184.30	206.80
Groundnut	1. Karad (Satara)	146.86	133.69	266.00	255.20	269.69
	2. Osmanabad	145.97	133.80	256.00	275.60	242.97
Cotton (Jarilla)	1. Bombay	696.00	537.00	551.00	842.30	837.10

Note.—AA—Superfine, A—Superior, B—Medium and C—Coarse.

The centres mentioned in the table show typical representative markets and accordingly depict the general trend in prices of the essential commodities in the State. The prices for jowar, rice and wheat are

The State level average price of cotton (unginned) was Rs. 283.82 per quintal and was lower than that of the preceding year by 18.0 per cent. During the year under report, the prices for different grades were fixed by Government in Monopoly Procurement Scheme.

The price of Raw sugar (gul) at the State level was Rs. 212.70 per quintal, having decreased by 3.8 per cent. The decrease was noticed in the main sugarcane producing divisions of Pune and Aurangabad by 0.3 and 37.8 per cent respectively. The prices, however increased in non producing divisions of Bombay and Nagpur by 8.0 per cent to 59.7 per cent the increase being due to more demand coupled with high sugar prices.

The average price of groundnut (pods) was Rs. 257.93 per quintal and was lower by 6.0 per cent. The increase was mainly due to increased arrival of groundnut (pods) from Uttar Pradesh and Punjab. The decrease was noticed to the extent of 9.8 per cent, 10.0 per cent and 4.2 per cent in Bombay, Pune and Nagpur divisions respectively. Only in Aurangabad division, a small increase of 3.7 per cent was reported.

At the State level, the price of tobacco was Rs. 748.37 per quintal and was higher by 62.2 per cent as compared to that in the preceding year.

The State level prices of the remaining commodities of castorseed, linseed and potatoes decreased by 10.9 per cent, 9.4 per cent and 0.9 per cent respectively while those of sesamum and chillies increased by 0.9 per cent. and 90.4 per cent respectively during the year under report as compared to those in the preceding year.

controlled prices. The prices of bajri rose, appreciably while those of groundnut and cotton (lint) decreased due to timely measures taken by the Government.

## CHAPTER VII

### AGRICULTURAL WAGES

(Table VII, pages 102 to 113 )  
(Summary Table "G", pages 28-29)

16. According to the Revenue Accounts Manual, Agricultural labour is classified under three categories viz., (i) skilled labour, (ii) ordinary labour and (iii) field labour. Skilled labour is comprised of carpenters, blacksmiths and cobblers. Ordinary labour includes load carrying coolies, well diggers, assistants of masons and carpenters, earth workers etc., while field labour includes ploughmen, sowers, transplanters, weeders, reapers, harvesters etc. As shown in Table VII of Agricultural wages, one more category of labour is included viz., herdsmen whose main daily work is to

take the livestock owned by different owners to the jungle for grazing.

17. Table VII of the report gives districtwise and monthwise figures of daily wages of different classes of agricultural labour, State level information on wages is given in the summary table 'G' along with the information for the previous year.

Average agricultural wages of different categories of agricultural labour, during the years 1973-74 and 1974-75 are presented in the following table.

*Agricultural wages (daily)*

Year	Skilled labour			Field labour			Other Agril. labour		Herdsman.
	Carpenter	Black-smith	Cobbler	Male	Female	Child.	Male	Female	
1	2	3	4	5	6	7	8	9	10
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1973-74 ...	7.71	7.13	5.79	3.58	2.52	1.77	3.36	2.44	2.94
1974-75 ...	8.48	7.62	6.08	3.81	2.71	1.95	3.55	2.55	3.09

It is seen from the above table that during the year under report, the State level average wages in respect

of all classes of agricultural labour showed an increase over those in the preceding year.

## CHAPTER VIII

### AGRICULTURAL STOCK

(Table VIII, pages 114 to 129)  
(Summary Table 'H', pages 30 to 33)

18. Table VIII of this report gives the details of livestock, poultry, agricultural machinery and implements as per quinquennial census of livestock and agricultural machinery conducted in 1972 by the Director, Directorate of Economics and Statistics, Maharashtra State, Bombay. Summary Table 'H' gives provisional total number of livestock, poultry, agricultural machinery and implements according to different categories and comments on the same are briefly given below.

(i) *Cattle*.—There was a slight decrease in the number of cattle from 1,47,29,446 in 1966 to 1,47,05,147, in 1972 or by 0.2 per cent. The total number of males of

age over three years decreased by 5.2 per cent. Out of these, the number of males used for work only recorded a decrease of 3.4 per cent. The number of 'other males' over three years showed an increase of 9.1 per cent.

Among the females over three years, the number of breeding cows recorded an increase of 1.0 per cent while those in milk increased by 4.2 per cent. The number of young stock recorded an increase of 7.3 per cent over that in 1966.

(ii) *Buffaloes*.—The total number of buffaloes recorded in 1972 was 33,00,746 as against 30,41,919 in 1966.

showing an increase of 8.5 per cent. Among the different categories of buffaloes, the number of males over three years was 3,08,353 showing a decrease of 9.2 per cent over that in 1966. Among the females, the number in milk was 9,54,884 in 1972 showing an increase of 11.7 per cent. The total number of breeding buffaloes showed an increase of 7.8 per cent. The number of young stock recorded an increase of 16.0 per cent.

(iii) *Sheep and Goats*.—The number of sheep decreased by 3.5 per cent whereas that of goats increased by 15.4 per cent as compared with the corresponding number of the year 1966.

(iv) *Horses and Ponies etc.*—The total number of horses and ponies declined considerably i. e. by 42.3 per cent in comparison with that of 1966.

The number of mules and camels declined by 64.4 per cent and 63.7 per cent or by 847 and 1232 respectively.

The decrease in the number of donkeys was by 18.2 per cent while the number of pigs increased by 12.0 per cent over that of the year 1966.

(v) *Poultry*.—The total number of poultry showed an increase by 23.4 per cent.

#### Contagious Diseases

During the year 1974-75, the cattle and other livestock were affected by incidences of contagious diseases as follows :—

In equines, two outbreaks of Surra were reported from Kulaba district attacking 70 horses in two villages out of which 45 horses died due to this disease.

The incidence of H. S.\* in bovines was reported from all over the State. 431 outbreaks were reported, affecting 1968, animals (cattle and buffaloes) out of which 1181 animals died, the percentage of mortality being 60 per cent.

The Black Quarter disease was also prevailing in practically all the 26 districts of the State which affected 2143 animals in 621 villages and 1686 animals died due to this disease, the mortality percentage being 79 per cent.

Similarly there were reports of R. P. like diseases majority from Bombay region only i. e. Thane, Ratnagiri, Nasik and Jalgaon districts taking a toll of 187 animals out of 575 animals affected in 34 villages. The mortality was 32 per cent of the affected animals. In Pune region, there was only one outbreak report from Solapur district and 13 animals were reported to

have died out of 42 affected animals. Thus the overall mortality percentage comes to 32 per cent.

The outbreaks of disease of Foot and Mouth in cattle were reported practically from all the districts of the State affecting 11,970 animals in about 493 villages. Only 6 animals were reported to have died due to this disease.

There were also some spodic incidences of Surra Botulism and Anthrax diseases affecting 311 animals in about 59 villages and out of these affected animals 234 animals were reported to have died i. e. 75 per cent mortality occurred in the affected animals.

The sheep and goats were mainly affected by Enterotoxaemia, Anthrax and sheep Goat pox, which occurred in the districts of Bombay and Vidarbha region.

A total of 204 sheep/goats were affected by Enterotoxaemia, out of which 142 died (i. e. 70 per cent mortality). In respect of sheep and goat pox, 760 animals were affected, out of which 90 (i. e. 12 per cent died) and in respect of Anthrax and other diseases like †F. and M. D., H. S., etc., affecting these small animals, 281 were attacked, out of which 186 (i. e. 66 per cent) died.

The poultry were mainly affected by Ranikhet disease in a few of the districts of Aurangabad, Bhir, Yavatmal and Wardha. In all, 397 birds were affected by this disease, out of which 275 died. Incidence of other disease in poultry was negligible.

Prompt preventive measures were adopted for controlling the outbreaks and spread of diseases.

On the whole, the condition of cattle and other livestock was fairly satisfactory

(vi) *Agricultural Machinery and Implements*.—For the first time during 1972, the scope of the census was made comprehensive to cover data on up-to-date list of agricultural machinery and implements in the State. The variations in respect of the major items of agricultural machinery and implements based on 1972 census as compared with the previous one are summarised below :—

The number of tractors increased by 71.2 per cent while ghanis decreased by 47.0 per cent. The number of wooden ploughs, iron ploughs and carts showed an increase of 0.8 per cent, 13.2 per cent and 4.0 per cent respectively. Sugarcane crushers decreased by 50.6 per cent. Oil engines for irrigation purposes increased by 17.2 per cent while the number of electric pumps used for irrigation shot up from 37,979 to 1,69,778 or by nearly three and half times.

\* H. S.—Haemorrhagic Septicaemia disease.

† F. and M. D.—Foot and Mouth disease.

## CHAPTER IX

## AGRICULTURAL OUTLOOK

19. The agricultural season 1974-75 was on the whole favourable for all foodgrain crops except bajri and early paddy. Due to the initial delay in the onset of monsoon, large scale sowing of kharif crops was hampered, resulting in substantial shortfall in sown area, particularly under bajri crop. Besides the crop was affected by severe incidence of downy Mildew disease in parts of North Deccan and Aurangabad divisions, reducing its prospects appreciably. Similarly, the early varieties of paddy were severely affected in Bhandara and Chandrapur districts of Nagpur division.

The supply of fodder during the year under report was generally satisfactory. The prices of fodder ruled at a reasonable level in different markets of the State.

The availability of water for drinking and irrigation purposes was generally adequate in the State.

Due to efforts on the part of Government and Semi-Government bodies, more facilities were provided to the agriculturists. Construction of new wells was undertaken under the agricultural production programmes and a large scale installation of electric pumps was also undertaken. Further, the ayacut development work in different major and medium irrigation projects in the State made a large proportion of irrigable land suitable for actual irrigation. As a result of these measures the area under irrigation registered a considerable increase. This factor ultimately contributed in part to the agriculture production.

On the whole, the agricultural out-look in the State was a buoyant one.

## CHAPTER X

## CONDITION OF AGRICULTURAL POPULATION

20. The seasonal conditions during the sowing periods considerably affected the extent of cropping over major parts of the State. However, as a result of subsequent favourable seasonal conditions during the growth period, good harvest was reaped for all crops in the State except bajari and early paddy in the kharif season. This agricultural situation, coupled with the various development programmes (mentioned below) launched during the year under report agricultural labour could engage itself during the major part of the year in the agricultural work and their wages were also higher than in 1973-74. However, in certain quarters, the wage rise was offset on account of steep rise of open market prices of essential commodities with the result that the landless labourer suffered most. Due to increase in the prices of agricultural produce the agriculturists received good returns by selling their produce in the markets. However, they too were affected due to critical economical situation facing the country, and the State during the year under report. As usual, the fair-price shops continued to function and met the needs of agricultural population to some extent.

The Government faced the situation with tenacity. The cultivators were provided with various incentives to step up agricultural production, mainly food production under Hybrid and High yielding varieties programme undertaken on a larger scale. Loans were advanced to the needy agriculturists by Government, Zilla Parishad, Land Development Banks and various other banks and societies in the districts enabling them to improve their economic conditions. Launching of intensive cultivation programme, an arranging of demonstration plots had also helped to some extent, in the replacement of the traditional method of cultivation and induced them to take to cultivation of

hybrid/high yielding varieties of crops. Rural electrification scheme continued to help the agriculturists in irrigating the crops wherever possible, depending on the availability of water in wells, tanks, etc. through the use of electric pums in different parts of the State. Under the Integrated Area Development Programme, the small holders and agricultural labourers continued to receive the benefits from the process of economic development. Facilities were provided such as (i) making available loans on easy terms to the cultivators, (ii) granting them additional facilities to lessen the financial burden, (iii) helping them to take up subsidiary industries like maintaince of milch animal, poultry, sheep and goat breeding and (iv) providing them irrigation by constructing small bundharas and lift irrigation units. During the year under report due importance was given for completion of community wells already undertaken in the past years. Ayacut development works for increasing the suitability of lands for receiving irrigation water of the Irrigation Projects thereby increasing the agricultural production were also continued in different divisions of the State. The Employment Gurantee scheme initiated throughout the State in May 1972 continued to operate with a view to mitigating unemployment and underemployment in rural areas, and for improving productivity in agriculture. In fact, the year 1974-75 was the first effective year for full operation of the scheme.

As a long range policy of improvement in agricultural sector, the Bombay Tenancy Act, Agricultural Land Improvement Act and Prevention of Fragmentation and Consolidation of Holdings Act, continued to result in an overall improvement of agriculture and welfare of the agriculturists in the State.

## SUMMARY TABLE 'A'

## Land Utilization Statistics

(Area in '00' ha.)
