Season and Crop Report of the State of Maharashtra for the Year 1975-76

CHAPTER I

SEASON

1. Distribution of Rainfall

Table-I (pages 34-49) gives the rainfall, received during the year vis-a-vis the normal rainfall at selected centres in the State.

(i) *Pre-monsoon rains* (April and May 1975).—The pre-monsoon showers were below normal in all parts of the State except in parts of Thane, Kulaba, Nasik, Jalgaon, Ahmadnagar, Pune, Kolhapur, Aurangabad, Bhir, Yavatmal and Wardha districts.

(ii) *Monsoon rains* (June to September 1975).—The monsoon rains were above normal almost all parts of the State. They were below normal only in a few pockets of Nasik, Dhule, Pune, Satara, Nanded, Osmanabad, Amravati, Yavatmal and Wardha districts.

(iii) *Post-Monsoon rains* (October to November 1975).—The post-monsoon rains were above normal in most parts of the State whereas they were below normal in pockets of Kulaba, Nasik, Dhule, Ahmadnagar, Bhir, Buldhana, Amravati and Wardha districts.

(iv) *Winter rains* (December 1975 to March 1976).—Winter rains were below normal in all the divisions excepting in few pockets of Ahmadnagar, Satara and Kolhapur districts of the Deccan region.

(v) *Total rainfall for the year*.—The total rainfall during the year under report was above normal in all parts of the State excepting pockets of Nasik, Dhule, Ahmadnagar, Pune, Satara, Aurangabad, Nanded, Buldhana, Akola, Amravati, Yavatmal, Wardha and Nagpur districts where it was below normal.

2. Effect of rainfall on sowings and crop growth

During the year under report, pre-monsoon rains were received in May all over the State except in part of the Vidarbha region. The rainfall was below normal. It was adequate for undertaking tillage operations only in some parts of the Deccan region and in districts of Aurangabad and Yavatmal.

The monsoon entered the State on the 7th June, 1975 in the southern parts of Ratnagiri district. After a delay of ten days, it started moving north on the 17th June and covered the entire State by the 20th June. Widespread rainfall was received in the major areas of the State. The monsoon was active particularly in the

Konkan, South and West Deccan and Vidarbha regions.

During July, the monsoon was active and brought substantial rains in major areas of the State, facilitating large scale sowing of kharif crops (except groundnut and cotton) in time. In Marathwada and Vidarbha regions, initially the monsoon was weak and the rainfall was inadequate for sowing, resulting in delayed sowings. This was responsible for the reduction in the areas sown under cotton and groundnut crops.

The total precipitation during August was not only substantial, but short rainy periods were followed by sunny days facilitating timely completion of transplanting of paddy and nagli crops and enabling vigorous growth of the earlier sown crops.

During the month of September, widespread and excessive rains were received in the State. These rains delayed not only the harvesting of early sown kharif crops like mung, udid and bajri but they also delayed the sowing of rabi jowar. In Parbhani and Nanded districts of Marathwada regions, these rains caused floods damaging cotton in the former district and kharif jowar, cotton and other kharif crops in the latter district. The heavy rains in the South Deccan and Western Vidarbha regions affected the quality of matured jowar grains.

The month of October also witnessed excessive rains throughout the State. These rains though beneficial to the paddy crop, affected the quality of hybrid jowar ready for harvest. The local varieties of kharif jowar in flowering stage were also affected in Marathwada and Vidarbha regions because of washing away of pollens. The late and heavy rains affected the cotton crop and delayed the harvesting of kharif crops. They also delayed sowing of rabi jowar and other rabi crops while the growth of rabi crops already sown was retarded.

The weather during November was generally dry in all parts of the State except for light isolated showers received in the South Konkan and South Deccan regions. The sowing of unirrigated rabi crops which commenced at the close of October, was continued and completed in November in major areas of the State, whereas the sowing of irrigated crops of wheat and gram was also continued. The growth of rabi crops was satisfactory.

The cold spell in November and December however arrested the growth of the rabi crops. The crop also suffered from incidence of sugary disease at many places. Sowing of irrigated wheat and gram was completed.

In January 1976, the weather was generally cool and dry except for light sporadic rains at few places. The cold weather was beneficial to wheat and gram crops.

The weather in February and March was dry excepting for sporadic rains accompanied by thunder showers

and light hailstorms at a few places during the last week of March. These did not cause any serious damage to the standing crops.

On the whole, the agricultural season 1975-76 was very favourable to the foodgrain crops and with the record coverage under hybrid and high yielding varieties of these crops, the production level was the highest ever in the State.

CHAPTER II

AREA CULTIVATED AND UNCULTIVATED

(Table II, Pages 50-51)

(Summary Table A, page 19)

3. Number of villages

During the year under report, the number of revenue villages in the State was 38,870 as against 38,839 in the preceding year. The increase in the number by 31 villages was due to the formation of separate villages distributed mainly in Aurangabad, Parbhani, Osmanabad, Yavatmal and Nagpur districts.

4. Total Geographical Area

The total geographical area of the State, based on the survey carried out by the Surveyor General of India was 307.8 lakh ha. while the reporting area for Land Utilisation Statistics (*vide* Summary Table A) was 307.6 lakh ha. the same as in the last year.

It will be seen from the Summary Table-A (page 19) that the total cropped area in the State was 196.64 lakh ha. in 1975-76 and it was higher by 0.8 per cent as compared to total cropped area of 195.06 lakh ha. in 1974-75. The net cropped area

also showed an increase by 0.3 per cent having gone upto 182.62 lakh ha. in 1975-76 from 182.06 lakh ha. in 1974-75. The area cropped more than once increased to 14.02 lakh ha. in 1975-76 from 12.99 lakh ha. in 1974-75 or by 7.9 per cent. The increase in cropped area during 1975-76 is attributed to the favourable seasonal conditions and increase in the area under double or multiple cropping in the State.

5. The area under (i) forests, (ii) barren and unculturable land, (iii) permanent pastures and other grazing lands and (iv) current fallows decreased during the year under report by 0.3 per cent, 0.04 per cent, 0.6 per cent and 8.4 per cent respectively as compared to that in the preceding year, while the areas under non-agricultural uses, culturable waste land, land under miscellaneous tree crops etc. and other fallows showed an increase by 2.1 per cent, 1.1 per cent, 0.4 per cent and 2.1 per cent respectively during 1975-76 as compared to areas in 1974-75.

CHAPTER III

IRRIGATED AREA

(Tables III-A and III-B, Pages 52-63)

(Summary Tables B and C, Pages 20-21)

6. Sources of water supply

During the year under report, the number of wells (excluding tube wells), used for irrigation purposes increased from 7,64,312 in 1974-75 to 7,78,713 (or by 1.9 per cent) during 1975-76. The number of wells used for domestic purposes and number of wells

having independent ayacut recorded an increase by 10.0 per cent and 2.6 per cent respectively during 1975-76 as compared to that in 1974-75 while the number of wells not in use and number of wells supplementing recognised sources of irrigation decreased by 0.9 per cent, and 10.1 per cent respectively.

The number of oil engines decreased by 0.2 per cent during the year under report while that of electric pumps increased by 12.5 per cent as compared to that in the preceding year.

7. Gross and Net Irrigated Area

During the year under report, the gross irrigated area in the State increased from 19.33 lakh ha. in 1974-75 to 21.71 lakh ha. (or by 12.3 per cent.) The net irrigated area also showed an increase by 11.7 per cent having gone up from 16.12 lakh ha. in 1974-75 to 18.02 lakh ha. in 1975-76.

The percentage of net area irrigated to net area sown was 9.9 per cent while that of gross area irrigated to gross area sown was 11.0 per cent during 1975-76 as compared to the corresponding figures of 8.9 per cent and 9.9 per cent respectively in the year 1974-75.

8. Net area irrigated by different sources of irrigation

The net area irrigated by surface irrigation increased by 6.1 per cent having gone up to 7.17 lakh ha. in 1975-76 from 6.76 lakh hectares in 1974-75. The net area irrigated by wells also increased from 9.36 lakh hectares in 1974-75 to 10.84 lakh ha. in 1975-76 (or by 15.9 per cent).

9. Sourcewise gross area irrigated

The gross area irrigated in the State by surface irrigation increased from 7.43 lakh hectares in 1974-75 to 8.49 lakh ha. during 1975-76. (or by 14.2 per cent) while the gross area irrigated by wells increased by 11.1 per cent having gone up from 11.90 lakh ha. in 1974-75 to 13.22 lakh ha. during 1975-76.

10. Irrigated area under food and non-food crops

During the year under report, out of the gross area irrigated of 21.71 lakh ha. in the State, an area of 20.17 lakh ha. or nearly 93 per cent was under food crops and the remaining area of 1.54 lakh ha. or 7 per cent was under non-food crops. Further out of 20.17 lakh ha. area under food crops, the food grain crops, shared the major area of 14.72 lakh ha. (or 3.0 per cent of total food crops) while the remaining irrigated area of 5.44 lakh ha. was shared by sugarcane, banana, fruits and vegetables, etc. Though the overall irrigated area increased during the year 1975-76 as compared to that in the preceding year, the irrigated area under some of the crops viz. bajri, chillies, onion and cotton decreased by 6.8 per cent, 1.8 per cent 3.6 per cent, and 12.0 per cent respectively.

CHAPTER IV

CROPPED AREA

(Tables IV-A, IV-B and IV-C, Pages 64 to 83)

(Summary Table D, Pages 22-25)

11. Total area under crops

The gross cropped area, area cropped more than once, net cropped area and area under food and non-food crops in each division and in the State, for the two years 1974-75 and 1975-76 are presented in the tables given under the respective headings :-

(i) Gross cropped area.

(Area in '00' ha.)

Division	Gross cropped area		Percentage increase (+) or decrease (-) over 1974-75
	1974-75	1975-76	
1	2	3	4
Bombay	33,971	34,426	+ 1.3
Pune	53,266	54,105	+ 1.6
Aurangabad	52,667	52,763	+ 0.2
Nagpur	55,152	55,345	+ 0.3
State Total	1,95,056	1,96,639	+ 0.8

It is seen from the above table that the gross cropped area in the State recorded a slight increase from 195.06 lakh ha. in 1974-75 to 196.64 lakh ha. in 1975-76 or by 0.8 per cent. This was mainly due to the increase in the cropped area in Bombay and Pune divisions by 1.3 per cent and 1.6 per cent respectively.

(ii) Double cropped area.

(Area in '00' ha.)

Division	Double cropped area		Percentage increase (+) or decrease (-) over 1974-75
	1974-75	1975-76	
1	2	3	4
Bombay	2,271	2,543	+ 12.0
Pune	3,919	4,434	+ 13.1
Aurangabad	3,263	3,399	+ 4.2
Nagpur	3,540	3,547	+ 0.2
State Total	12,993	14,023	+ 7.9

The area cropped more than once in the State increased by 1.03 lakh ha. having gone up to 14.02 lakh ha. during 1975-76 from 12.99 lakh ha. in 1974-75.

(iii) *Net Cropped area.*

The increase was shared by all the divisions varying from 3.0 per cent to 13.1 per cent.

(Area in '00' ha.)

Division	Net cropped area		Percentage increase (+) or decrease (-) over 1974-75
	1974-75	1975-76	
1	2	3	4
Bombay ...	31,700	31,883	+ 0.6
Pune ...	49,347	49,671	+ 0.7
Aurangabad ...	49,404	49,364	- 0.1
Nagpur ...	51,612	51,598	+ 0.2
State Total ...	1,82,063	1,82,619	+ 0.3

There was a slight increase in the net cropped area in the State by 0.3 per cent which was mostly due to

similar increase in Bombay and Pune divisions.

(iv) *Total area under food and non-food crops.*

(Area in '00' ha.)

Division	Area under crops					
	Food crops			Non-food crops		
	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75
1	2	3	4	5	6	7
Bombay ...	25,468	26,423	+ 3.7	8,503	8,003	- 5.9
Pune ...	43,190	44,033	+ 1.9	10,076	10,072	- 0.04
Aurangabad ...	38,757	39,433	+ 1.7	13,910	13,330	- 4.1
Nagpur ...	34,236	35,451	+ 3.5	30,916	19,894	- 4.9
State Total ...	1,41,651	1,45,341	+ 2.6	53,405	51,299	- 3.9

The area under food crops in the State increased by 2.6 per cent having gone up from 141.65 lakh ha. in 1974-75 to 145.34 lakh ha. in 1975-76. The increase was observed in all the four divisions to the extent of 1.7 per cent to 3.7 per cent. On the other hand, the area under non-food crops in the State showed a decrease of

3.9 per cent having gone down from 53.40 lakh ha. in 1974-75 to 51.30 lakh ha. in 1975-76. This was mainly due to the decrease in the area under non-food crops in Bombay, Aurangabad and Nagpur divisions by 4.1 to 5.9 per cent.

CHAPTER V

AREA, AVERAGE YIELD AND OUTTURN OF CROPS

(Tables IV-A and IV-B, Pages—64 to 81)

(Tables V-A and V-B, Pages—84 to 95)

(Summary Tables D and E, Pages—22 to 26)

12. Comments on the area, average yield and production of principal crops, taking into consideration the seasonal conditions prevailing during the year under report, are given in brief crop by crop in the following paragraphs.

It can be stated that the agricultural season 1975-76 was on the whole extremely favourable to the Kharif crops both in terms of the total precipitation and its distribution. During the kharif season, short rainy

periods were followed by sunny periods enabling the crops to put on very satisfactory growth. During the rabi season also, all crops except rabi jowar fared well. The hybrid and high yielding varieties programme contributed substantially to the foodgrain production. Due to all these favourable factors, the foodgrain production in the State touched a new high of 90.36 lakh tonnes for the second time, since the formation of Maharashtra in 1960.

A. Kharif foodgrain crops

(1) *Rice* :—Though the monsoon was delayed by 10 days, the sowing of paddy in the nurseries was undertaken since the 15th June in the Konkan and Ghat areas. With the receipt of widespread rains in the last week of June, sowing of this crop was completed in the Konkan and Ghat areas by the first week of July, while it was in progress in the eastern part of the Vidarbha region. With the receipt of moderate to heavy rains till the 15th August, the transplanting of paddy was completed in the Konkan and Ghat regions. It was in progress in Chandrapur and Bhandara districts of the Vidarbha region and was completed by the end of August. The sowing of this crop in the non-traditional areas was also completed by the mid July and the germination of the crop was quite satisfactory. The condition of the transplanted paddy was also good in different parts of the State. The rains in September were rather heavy. The month of October, which is usually dry, was also rainy throughout the State. These late rains were beneficial to the paddy crop. The

High Yielding Varieties were in good condition and the coverage under these varieties was also substantial. In general, the growth of the paddy crop was excellent throughout the State.

The crop was affected in the endemic areas by stem-borer. In some parts of Thane district, the intensity of stem-borer incidence was severe. The crop in the endemic areas of Morgaon-Arjune block of Bhandara district was affected by attack of gall-fly to some extent.

The condition of summer paddy, grown over an area of about 38,400 ha. was satisfactory. During the year under report Pilot Project Blocks covering 3,252 ha. under this crop were organised to demonstrate to the cultivators how the yield rates could be considerably increased to 21.0 q./ha. of rice due to planned adoption of the package of practices. The actual average yield obtained under Pilot Project was 34.3 q/ha of rice.

The area, average yield and production of rice including summer rice are presented here below for the two years 1974-75 and 1975-76.

Crop : RICE										
Division	Area in '00' ha.		Percentage increase (+) or decrease (-) over 1974-75	Average yield of rice per ha.		Percentage increase (+) or decrease (-) over 1974-75	Production in '00' tonnes		Percentage increase (+) or decrease (-) over 1974-75	
	1974-75	1975-76		1974-75	1975-76		1974-75	1975-76		
1	2	3	4	5	6	7	8	9	10	
				kg.	kg.					
Bombay ...	4,897	5,012	+ 2.3	1,450	1,683	+ 16.1	7,103	8,437	+ 18.8	
Pune ...	1,851	1,934	+ 4.5	1,488	1,896	+ 27.4	2,754	3,666	+ 33.1	
Aurangabad ...	881	951	+ 7.9	455	1,228	+ 169.9	401	1,168	+ 191.3	
Nagpur ...	5,943	6,260	+ 5.3	737	1,531	+ 107.7	4,383	9,587	+ 118.8	
State ...	13,572	14,157	+ 4.3	1,079	1,615	+ 49.7	14,641	22,858	+ 56.6	

The state level area under rice increased by about 0.58 lakh ha or by 4.3 per cent during 1975-76 as compared to that in the preceding year. The increase was noticed in all divisions. The main reason for increase in the area under the crop was the all-out efforts made by the department to extend paddy cultivation to the non-traditional areas.

The over-all State average yield of rice increased from 1,079 kg/ha. in 1974-75 to 1615 kg/ha. in 1975-76 or by 49.7 per cent. The increase was noticed in all the four divisions to the extent of 16 per cent and 27 per cent in Bombay and Pune divisions. While it was nearly two-fold in Nagpur division, three-fold in Aurangabad division. The production of rice this year was the highest ever recorded in the State. The contribution of high yielding varieties was substantial due to the increase in the H. Y. V. area.

वि. (कृ) ११४०-२

(ii) *Kharif jowar*.—The sowing of this crop was started by the third week of June by which time the monsoon covered the entire State. The sowing was completed mostly by July end. During the months of July and August, the rainfall in the State was substantial and widespread. The germination and growth of the crop were quite satisfactory. The area under the crop was higher as compared to that in the preceding year because some unsown area under cotton and some area from uprooted hybrid bajri crop were diverted to kharif jowar.

During the season short rainy periods were followed by sunny weather enabling the satisfactory growth of the crop. However, due to the fairly heavy rains in September in most parts of the State and heavy rains in the third week of October in the south Deccan, the

quality of hybrid jowar grains was adversely affected having been soaked in these rains. In Nanded and Parbhani districts, kharif jowar crop in low lying areas of Parbhani and Nanded districts was either submerged or washed away over an area of 20,000 ha. due to the floods in Godavari river from the 1st to 4th September 1975. The local varieties of kharif jowar in the Marathwada and Vidarbha regions were also adversely affected resulting in lower yields being in flowering stage and the heavy rains washing away the pollens.

During the year under report the crop was not affected by any severe attack of pests or diseases. However where the hybrid jowar crop was exposed to midge-fly attack of the flowering stage, the cultivators with the help of Zilla Parishad undertook prophylactic dusting

with 10 per cent B. H. C. The incidence of the pest was reported to be of low intensity in nearly 1.80 lakh ha. distributed in different parts of the State. Timely steps enabled the successful control of the pest attack.

On the whole, the condition of the kharif jowar especially that of hybrid jowar was excellent and the coverage under the hybrid varieties was also quite substantial. This resulted in a very good harvest of the crop and the total production of kharif jowar was estimated at 22.45 lakh tonnes.

The table below gives the State and divisional level area, average yield and production of the crop for the two years viz. 1974-75 and 1975-76.

Crop : KHARIF JOWAR										
Division	Area in '00' ha.			Average yield per ha.			Production in '00' tonnes			
	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	
1	2	3	4	5	6	7	8	9	10	
				kg	kg					
Bombay ...	2,020	2,549	+ 26.2	980	1,338	+ 36.5	1,969	3,410	+ 73.2	
Pune ...	2,785	3,321	+ 19.2	1,264	1,530	+ 21.0	3,524	5,082	+ 44.2	
Aurangabad ...	8,387	539	+ 1.8	678	630	- 6.0	5,686	5,380	- 5.4	
Nagpur ...	12,866	13,080	+ 1.7	777	656	- 15.6	9,997	8,574	- 14.2	
State ...	26,058	27,489	+ 5.5	813	817	+ 0.5	21,176	22,446	+ 6.0	

The total area under kharif jowar increased from 26,05,800 ha. in 1974-75 to 27,48,900 ha. in 1975-76 or by 5.5 per cent. The increase was noticed to the extent of about 0.5 lakh ha. in Bombay and Pune Divisions and 0.2 lakh ha. in Aurangabad division.

Though the State average yield of the crop was 817 kg./ha. in 1975-76 as against 813 kg./ha. in 1974-75 the State total production of the crop increased from 21.18 lakh tonnes in 1974-75 to 22.45 lakh tonnes in 1975-76 i. e. by 6.0 per cent. This is attributed to the substantial increase in the coverage under hybrid jowar in 1975-76. The increase was contributed by the two divisions viz. Bombay and Pune since there was a decline in the production in the remaining two divisions of Aurangabad and Nagpur.

(iii) *Bajri*.—The sowing of bajri crop started in the third week of June and was completed by first week of August. The germination of the crop was quite satis-

factory. The crop of hybrid bajri which was popular with farmers (because of its relatively very high yield rates) was heavily affected by Downy Mildew disease. A team of plant protection experts from the Government of India, New Delhi, visited the affected areas and advised the farmers to remove the hybrid bajri crop wherever it was heavily damaged. The hybrid bajri in the north Deccan was affected over an area of 2.22 lakh ha. by downy mildew at its early stage, necessary and timely measures being undertaken by way of removing the affected crop and resowing the area with local bajri, hybrid jowar and hybrid maize. As such resowing was not done in some parts or the area affected was diverted to other crops, the area under bajri (particularly of the hybrid varieties) was lower this year. On the whole, the agricultural season 1975-76 was not favourable to this crop.

The area, average yield and production of the crop in the State as well as in each division are presented in the table below for the two years 1974-75 and 1975-76.—

Division	Crop : BAJRI									
	Area in '00' ha.			Average yield per ha.			Production in '00' tonnes			
	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	
1	2	3	4	5	6	7	8	9	10	
				kg.	kg.					
Bombay ...	5,711	5,928	+ 3.8	371	463	+ 24.8	2,120	2,740	+ 29.2	
Pune ...	7,895	7,807	- 1.1	300	224	- 25.3	2,374	1,750	- 26.3	
Aurangabad ...	4,306	3,854	- 10.5	280	250	- 10.7	1,205	963	- 20.1	
Nagpur ...	526	488	- 7.2	416	300	- 27.9	220	147	- 33.2	
State ...	18,438	18,077	- 2.0	320	310	- 3.1	5,919	5,600	- 5.4	

The State total area under the crop was 18.08 lakh ha. during 1975-76 which was lower by 2 per cent as compared to that in 1974-75. The decrease was observed in all the divisions except Bombay division where the area had increased by 3.8 per cent.

The State average yield per ha. of the crop in 1975-76 was estimated at 310 kg. as compared with that of 320 kg./ha. in 1974-75. The lower yield was noticed in all the divisions except Bombay division where the yield rate was higher by 24.8 per cent as compared to that in the preceding year.

The divisional and State level area, average yield and production of the crop for the years 1974-75 and 1975-76 are presented in the following table.—

Division	Crop : RAGI									
	Area in 00 ha.			Average Yield per ha.			Production in '00' tonnes			
	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	
1	2	3	4	5	6	7	8	9	10	
				kg.	kg.					
Bombay ...	1,440	1,455	+ 1.0	843	878	+ 4.2	1,214	1,278	+ 5.3	
Pune ...	614	643	+ 4.7	891	932	+ 4.6	547	599	+ 9.5

Nagpur	
State ...	2,060	2,103	+ 2.1	857	895	+ 4.3	1,766	1,881	+ 6.5	

The area under the crop in the State increased slightly from 2.06 lakh ha. in 1974-75 to 2.10 lakh ha. in 1975-76 i. e. by 2 per cent. The increase was shared by the two major crop growing divisions of Bombay and Pune.

The State average yield per ha. of Ragi in 1975-76 was also higher by 4.3 per cent in 1975-76. Consequently the production of the crop also increased from 1.77 lakh tonnes in 1974-75 to 1.88 lakh tonnes in 1975-76, or by 6.5 per cent. Similar increase was noticed in both the divisions of Bombay and Pune to the extent of 5.3 and 9.5 per cent respectively.

The area, average yield and production of the crop in the State and different divisions are given in the table below for the two years viz. 1974-75 and 1975-76.—

Division	Crop: TUR									
	Area in '00' ha.			Average yield kg./ha.			Production in '00' tonnes			
	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	
1	2	3	4	5	6	7	8	9	10	
				kg.	kg.					
Bombay ...	312	320	+ 2.6	839	759	- 9.5	261	243	- 6.9	
Pune ...	973	1,336	+ 37.3	526	380	- 27.8	512	508	- 0.8	
Aurangabad ...	2,460	2,732	+ 11.1	460	402	- 12.6	1,131	1,099	- 2.8	
Nagpur ...	2,394	2,367	- 1.1	780	941	+	1,868	2,288	+ 19.3	
State ...	6,139	6,755	+ 10.1	614	604	- 1.6	3,772	4,078	- 8.1	

The area under the crop in the State was higher by 0.62 lakh ha. in 1975-76 or by 10 per cent. The increase was shared by the three divisions of Bombay, Pune and Aurangabad to the extent of 2.6 per cent, 37.3 per cent, 11.1 per cent respectively. While it was lower by 1.1 per cent in Nagpur Division.

The decrease in State level average yield was shared by the divisions of Bombay, Pune, Aurangabad and ranged from 9.5 per cent to 27.8 per cent. In Nagpur division, the average yield recorded an increase of 20.6 per cent. The production of the crop at the State level increased in 1975-76 by 0.31 lakh tonnes or 8.1 per cent as compared to 3.77 lakh tonnes in 1974-75.

B. Rabi foodgrain crops

(vi) *Wheat*.—Widespread and substantial rains in September and October enabled the timely sowing of the crop. Due to the prolonged monsoon this year, plenty of water was available in wells and reservoirs for irrigation which resulted in the increase in the irrigated area under the crop. The crop was further benefited by the cold weather during November and December, 1975. Hence seasonal conditions were very favourable for its proper growth. The condition of both the dry and the irrigated crop was excellent. Besides the total

(v) *Tur*.—The sowing rains were late this year. But with the receipt of widespread and substantial rains in the month of July, large scale sowing was completed soon after, covering a slightly more area than that of the preceding year. The germination and growth of the crop were also satisfactory all over the State. The rains received in August and September were beneficial to continue and satisfactory growth of the crop. The late rains received in October were also helpful for the further growth of the crop which was free from pests and diseases.

area under the crop and the area under high yielding varieties were the highest ever recorded. No major pests or diseases were reported.

A unique and interesting project was undertaken in the State during the year under report for boosting wheat production and demonstrating the higher yield potential through the adoption of packages of improved agricultural practices ensuing timely supply of inputs, granting crop loans and supervised farming. These steps were taken under Pilot Projects Blocks Scheme under which small blocks of 400 to 2000 ha. were formed with assured irrigation facilities and a Gram-sevak (V. L. W.) was appointed to organise the project and supervise the farming. One Agricultural Officer was assigned the whole time work of arranging the timely supply of inputs giving guidance to Gram-sevak. A special sample survey was carried out to assess the yield rates of the crop in the project area. The survey data showed that the crop in the project area gave as high yield as 31 q/ha. on an average while a few cutting get very high yields like 40 q/ha. or more. The area, average yield and production of the crop for the two years 1974-75 and 1975-76 at State and divisional level as given below :—

Crop : WHEAT									
Division	Area in '00' ha.		Percentage increase (+)	Average yield in kg. per ha.		Percentage increase (+)	Production in '00' tonnes		Percentage increase (+)
	1974-75	1975-76	or decrease (-)	1974-75	1975-76	or decrease (-)	1974-75	1975-76	or decrease (-)
1	2	3	4	5	6	7	8	9	10
				kg.	kg.				
Bombay ...	1,847	2,167	+ 17.3	852	1,046	22.8	1,572	2,266	+ 44.1
Pune ...	1,631	2,292	+ 40.5	1,107	1,105	- 0.1	1,811	2,533	+ 39.9
Aurangabad ...	2,669	3,326	+ 24.6	630	1,033	+ 64.0	1,682	3,434	+ 104.3
Nagpur ...	3,330	3,906	+ 17.3	744	947	+ 27.3	2,478	3,758	+ 51.7
State ...	9,477	11,691	+ 23.4	796	1,089	+ 36.8	7,542	11,991	+ 59.0

During 1975-76 the State total area under the crop was higher by 23.4 per cent as compared with that in the preceding year. The increase was shared by all the divisions and ranged from 17.3 per cent to 40.5 per cent.

Due to the favourable conditions described earlier, the average yield per ha. of wheat increased from 796 kg/ha in 1974-75 to as high as 1,089 kg/ha. during 1975-76 or by 36.8 per cent. This phenomenal increase was noticed in all the divisions except Pune. It ranged from 22.8 per cent in Bombay division to 64.0 per cent in Aurangabad division. In Pune division, the yield rate was about the same as in 1974-75.

Due to the increase in area as well as yield rate of the crop, the total production of the crop was estimated at 11.99 lakh tonnes in 1975-76 as against 7.54 lakh tonnes in 1974-75; thus showing an increase by 59.0 per cent. The increase was shared by divisions of Bombay, Aurangabad and Nagpur to the extent of 44.1 per cent, 104.3 per cent and 51.7 per cent respectively. Due to increased cropping of nearly 40 per cent of the production in Pune division also, recorded an increase of nearly 40 per cent.

(vii) *Rabi jowar*.—Widespread rain received during August and September facilitated the sowing of the

crop in time in most areas of the State, except in some parts of the south Deccan region where it was delayed due to heavy rains till the middle of October. Consequently, the sowings could not be done in these parts. This resulted in the reduction of the area under rabi jowar to some extent. These late rains were also responsible for retarding the growth of the early sown crop. The cold spell during November and December was further responsible for affecting its growth. Particularly in Solapur district, a main rabi jowar growing district, the condition of the crop was unsatisfactory. The crop suffered to various degrees in different parts due to (i) heavy rains at the time of sowing and thereafter, (ii) late sowing due to continuous rains, (iii) cold spell during November and December, and (iv) heavy incidence of chikta/sugary disease. In Osmanabad district also, the late sown rabi jowar was caught in severe cold and its growth was stunted.

On the whole, the seasonal conditions were not favourable to this crop and hence the production went down considerably.

The area, average yield and production of the crop at divisional and State level, for the two years 1974-75 and 1975-76 are presented below—

Crop : RABI JOWAR									
Division	Area in '00' ha.		Percentage increase (+)	Average yield per ha.		Percentage increase (+)	Production in '00' tonnes		Percentage increase (+)
	1974-75	1975-76	or decrease (-)	1974-75	1975-76	or decrease (-)	1974-75	1975-76	or decrease (-)
1	2	3	4	5	6	7	8	9	10
				kg.	kg.				
Bombay ...	1,325	1,431	+ 8.0	658	544	- 17.3	871	793	- 9.0
Pune ...	19,846	18,481	- 6.9	429	332	- 22.6	8,547	6,143	- 28.1
Aurangabad ...	10,307	10,298	- 0.1	496	425	- 14.3	5,127	4,376	- 14.6
Nagpur ...	2,693	2,887	+ 7.2	352	294	- 16.5	948	848	- 10.5
State ...	34,171	33,097	- 3.1	453	367	- 19.0	15,493	12,160	- 21.5

The area under the crop in the State was lower by about 3 per cent in 1975-76. The decrease was noticed mainly in Pune division while the area in the other two divisions viz. Bombay and Nagpur was increased by 8.0 per cent and 7.2 per cent respectively.

Due to unfavourable seasonal conditions during the year under report, the average yield per ha. of the crop decreased by 19.0 per cent having gone down 453 kg. to 367 kg. in 1975-76. The decrease was shared by all the four divisions viz. Bombay, Pune, Aurangabad and Nagpur to the extent of 17.3 per cent, 22.6 per cent, 14.3 per cent and 16.5 per cent respectively.

The State and divisional level area, average yield and production of the crop for the two years 1974-75 and 1975-76 are presented below:—

Crop : GRAM									
Division	Area in '00' ha.		Percentage increase (+) or decrease (-) over 1974-75	Average Yield per ha.		Percentage increase (+) or decrease (-) over 1974-75	Production '00' tonnes		Percentage increase (+) or decrease (-) over 1974-75
	1974-75	1975-76		1974-75	1975-76		1974-75	1975-76	
1	2	3	4	5	6	7	8	9	10
Bombay	450	411	- 8.7	456	426	- 6.5	205	175	-14.6
Pune	952	1,230	+29.2	352	424	+20.5	341	522	+53.1
Aurangabad	1,860	1,928	+ 3.7	306	382	+24.8	567	736	+29.8
Nagpur	818	894	+ 9.3	395	416	+ 5.3	323	372	+15.2
State	4,080	4,463	+ 9.4	350	404	+15.4	1,436	1,805	+25.7

The area under the crop increased, at the State level by 9.4 per cent in the year 1975-76 and the increase was shared by all the divisions in the State except Bombay division where the area decreased by 8.7 per cent as compared with that in the preceding year.

The average yield of the crop also increased by 15.4 per cent having gone up from 350 kg./ha. in 1974-75 to 404 kg./ha. in 1975-76. The yield rate increased in all the divisions except Bombay where it decreased by 6.5 per cent during 1975-76 as compared with

that in 1974-75.

With the increase in both area and average yield per ha. the production of the crop was higher by 25.7 per cent during the year under report as compared with that in the preceding year. The increase was shared by the three divisions to the 53.1 per cent, 29.8 per cent and 15.2 per cent Pune, Aurangabad and Nagpur divisions. In Bombay division, however, the production was lower by 14.6 per cent.

(ix) *Area under foodgrain crops.*—The total area under cereals, pulses and foodgrains in the State and in different divisions for the two years 1974-75 and 1975-76 is presented in the following table.

(Area in '00' ha.)

Area under foodgrain crops									
Division	GEREALS			PULSES			TOTAL FOODGRAINS		
	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75
1	2	3	4	5	6	7	8	9	10
Bombay	18,490	19,743	+ 6.8	5,369	5,077	- 5.4	23,859	24,820	+ 4.0
Pune	35,237	35,162	- 0.2	5,228	5,963	+14.1	40,465	41,125	+ 1.6
Aurangabad	27,078	27,543	+ 1.7	10,458	10,612	+ 1.5	37,536	38,155	+ 1.6
Nagpur	25,615	26,858	+ 4.9	7,487	7,509	- 0.3	33,124	34,345	+ 3.7
State	1,06,420	1,09,306	+ 2.7	28,564	29,139	+ 2.0	1,38,445	1,34,984	+ 2.6

The total area under foodgrain crops in the State was increased by 2.6 per cent during 1975-76 as compared with that in the preceding year. Amongst the foodgrains, the increase in area in 1975-76 was slightly more in case of cereals than that under pulses being 2.7 per cent and 2 per cent respectively. The

main reasons for increase in area under foodgrain were (i) diversion of unsown cotton area to kharif jowar crop and, (ii) Increase in the area under double cropping due to favourable seasonal conditions and more irrigation facilities during the year under report.

(x) *Production of foodgrain crops.*—The State and divisional level estimates of production of cereals, pulses and foodgrains during 1974-75 and 1975-76 are presented in the table below :

(Production in '00' tonnes)

Division	Production of foodgrain crops									
	CEREALS			PULSES			FOODGRAINS			
	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	
1	2	3	4	5	6	7	8	9	10	
Bombay ...	15,460	19,524	+ 26.3	2,335	2,289	- 2.0	17,795	21,813	+ 22.6	
Pune ...	20,034	20,532	+ 2.5	1,94	2,127	+ 9.3	21,979	22,659	+ 3.1	
Aurangabad ...	14,294	15,603	+ 9.2	3,495	3,621	+ 3.6	17,789	19,224	+ 8.1	
Nagpur ...	18,113	23,028	+ 27.1	3,323	3,638	+ 9.5	21,436	26,666	+ 24.4	
State ...	67,901	78,687	+ 15.9	11,098	11,675	+ 5.2	78,999	90,362	+ 14.4	

The foodgrain production in the State was higher by 14.4 per cent during 1975-76 as compared with that in the preceding year. The increase was observed in case of both cereals and pulses to the extent of 15.9 per cent and 5.2 per cent respectively. Among the cereals the crops of Kharif jowar, rice and wheat

faired very well during the year under report. The increase in foodgrain production was observed in all the four divisions of Bombay, Pune, Aurangabad and Nagpur to the extent of 22.6 per cent, 3.1 per cent, 8.1 per cent and 24.4 per cent respectively.

C. Other principal crops

(xi) *Sugarcane.*—The State and divisional level area, average yield per ha. and production of the crop for the two years 1974-75, 1975-76 are present below :

Division	Crop : SUGARCANE									
	Area in '00' ha.			Average Yield per ha. Gur			Production in gur '00' tonnes			
	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	
1	2	3	4	5	6	7	8	9	10	
Bombay ...	334 (312)	287 (266)	- 14.1	102	98	- 3.9	3196	2597	- 18.7	
Pune ...	1795 (1354)	1976 (1602)	+ 10.1	108	103	- 4.6	14590	16501	+ 13.1	
Aurangabad...	300 (300)	368 (368)	+ 26.7	74	74	...	2207	2738	+ 24.1	
Nagpur ...	46 (46)	47 (47)	+ 2.2	73	74	+ 1.4	334	350	+ 4.8	
State ...	2,475 (2012)	2,678 (2283)	+ 8.2	101	97	- 4.0	20327	22186	+ 9.1	

Note.—Fig. in the bracket indicate that area harvested during the year 1975-76.

(Production is based on the harvested area given in columns 2 and 3.)

The State area and production of sugarcane increased by 8.2 per cent, and 9.1 per cent respectively during 1975-76 as compared to that in the preceding year. While the average yield per ha. has decreased by 4.0 per cent.

(xii) *Cotton*.—Though the monsoon covered the entire State by the 20th June, yet the rains were inadequate for sowing purposes. This resulted in the reduction of cotton area in the State. During July and August the condition of the crop was quite satisfactory. The monsoon continued to be active in September and the first fortnight of October. The rains proved to be heavy to very heavy during the first four days of September in most parts of the State and particularly so in Nanded and Parbhani districts of Marathwada region. The crop in the low lying areas in these districts was submerged in the embankment areas of Godavari

river due to floods and was even washed away in some parts. These rains which continued till the middle of October, affected the progress of interculturing operations and picking of irrigated cotton. Due to these excessive rains in September and part of October 1975 heavy shedding of cotton bolls was reported from the main cotton growing areas of the State. The growth of the crop was unsatisfactory and the crop turned yellow in parts of Deccan, Marathwada and Vidarbha regions. This resulted in the crop yield per ha. getting lowered considerably.

Incidence of aphids, jassids and bollworms was reported on cotton. The necessary control measures against the same were taken in the affected areas.

The State and divisional level area average yield and production of cotton for the two years 1974-75 and 1975-76 are presented in the table below :—

Crop : COTTON

Division	Area in '00' ha.		Average yield of lint per ha. in kg.				Production in '00' bales of 170 kg. each			
	1974-75	1975-76	Percentage increase (+) or decrease (—) 1974-75		1975-76	Percentage increase (+) or decrease (—) 1974-75		1974-75	1975-76	Percentage increase (+) or decrease (—) 1974-75
			4	5		7	8			
	2	3			6					
Bombay	2,486	1,957	— 21.3	174	108	— 37.9	2,543	1,245	— 51.0	
Pune	323	266	— 17.6	213	265	+ 24.4	406	414	+ 2.0	
Aurangabad	6,031	5,598	— 7.3	128	36	— 71.9	4,548	1,187	— 73.9	
Nagpur	16,128	15,248	— 5.5	101	55	— 45.6	9,543	4,955	— 48.1	
State	24,968	23,069	— 7.6	116	58	— 50.0	17,040	7,801	— 54.2	

The State area under cotton decreased by 7.6 per cent having gone down from 24.97 lakh ha. in 1974-75 to 23.7 lakh ha. in 1975-76 and the decrease was shared by all the divisions. The decrease was the lowest viz 5.5 per cent in Nagpur division and the highest viz 21.3 per cent in Bombay division.

The State average yield of cotton per ha. also decreased by 50.0 per cent during the year under report as compared to that in the preceding year due to the adverse seasonal condition stated earlier.

On account of the reduction both in the area and average yield the State cotton production was considerably lower by 9.24 lakh bales in 1975-76 as compared to that in the year 1974-75. The decrease was observed in all the divisions except Pune where the production slightly increased by 2.0 per cent.

(xiii) *Groundnut*.—Due to the late onset of the monsoon and its feeble nature at the early stages the area sown under the crop (i. e. 8.5 lakh ha.) was less than that then normal area of 9.3 lakh ha. even though higher than that in the preceding year. The germination and growth of the sown crop were quite satisfactory till August. Due to heavy rains in the months of September and October the vegetative growth of the crop was goop, but the pod formation in different parts of the State was very poor resulting in lower yield rate of the crop.

No major pests and diseases were reported to have affected the crop. However, prophylactic treatment was given to the crop against the common pests such as aphids, thrips.

The table below gives the area, average yield and production of the crop at the divisional and State levels during the years 1974-75 and 1975-76.

Crop : GROUNDNUT									
Division	Area in '00' ha.			Average yield of per ha.			Production in '00' tonnes		
	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75
1	2	3	4	5	6	7	8	9	10
				kg.	kg.				
Bombay ..	2,445	2,727	+11.5	673	905	+34.5	1,646	2,469	+ 50.0
Pune ...	2,228	2,383	+ 6.9	906	914	+ 0.9	2,019	2,177	+ 87.8
Aurangabad...	1,923	1,993	+ 3.6	608	478	-21.4	1,169	952	- 18.6
Nagpur ..	1,407	1,441	+ 2.4	754	921	+ 22.1	1,061	1,327	+ 25.1
State Total ...	8,003	85,44	+ 6.7	737	811	+ 11.0	5,895	6,925	+ 17.5

The State total area under the crop showed an increase of 6.7 per cent in 1975-76 as compared to that in the year 1974-75. The increase in area was observed in all the four divisions to the extent of 2 per cent to 12 per cent.

The average yield per ha. of the crop increased from 737 kg. in 1974-75 to 811 kg. in 1975-76 thus showing an increase by 11.0 per cent.

The State production of groundnut also showed increase of 17.5 per cent in 1975-76 on that in the preceding year. The increase in production was shared by three divisions of Bombay, Pune and Nagpur to the extent of 50.5 per cent, 7.8 per cent, 25.1 per cent respectively while it is decreased in Aurangabad division by 18.6 per cent.

(xiv) *Sesamum*.—The State and divisional level area average yield and production of the crop for the two years 1974-75 and 1975-76 are presented below.—

Crop : SESAMUM									
Division	Area in '00' ha.			Average yield per ha.			Production in '00' tonnes		
	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75	1974-75	1975-76	Percentage increase (+) or decrease (-) over 1974-75
1	2	3	4	5	6	7	8	9	10
				kg.	kg.				
Bombay ...	195	214	+ 9.7	297	318	+ 7.1	58	68	+17.2
Pune ...	91	99	+ 8.8	275	283	+ 2.9	25	28	+12.0
Aurangabad ...	315	349	+10.8	203	203	...	64	71	+10.9
Nagpur ...	1,138	854	-25.0	214	172	- 19.6	244	147	-39.7
State ...	1,739	1,516	-12.8	225	207	- 8.0	391	314	-19.7

The State total area under the crop decreased by 12.8 per cent during the year under report as compared to that in the preceding year. This decrease was mainly due to the decrease in area in Nagpur division alone to the extent of 25.0 per cent. In the other three divisions the area under crop increased by 9 to 11 per cent.

The State level average yield and production of the crop decreased by 8.0 per cent and 19.7 per cent respectively during the year under report as compared to those in the preceding year. The decrease was mainly due to the decrease in Nagpur division alone to the extent of 19.6 per cent in case of average yield and 39.7 per cent in case of production.

(xv) *Linseed*.—The area average yield and production of linseed at the State and divisional level are

presented in the following table for the two years 1974-75 and 1975-76.

Crop : LINSEED.										
Division	Area in '00' ha.			Average yield per ha.			Production in '00' tonnes			
	1974-75	1975-76	Percentage Increase (+) or Decrease (-) over 1974-75	1974-75	1975-76	Percentage Increase (+) or Decrease (-) over 1974-75	1974-75	1975-76	Percentage Increase (+) or Decrease (-) over 1974-75	
1	2	3	4	5	6	7	8	9	10	
				kg.	kg.					
Bombay	...	5	5	..	280	200	-28.6	2	1	- 50.0
Pune	...	101	73	- 27.7	282	205	-27.3	29	15	- 48.3
Aurangabad	...	1,461	1,289	- 11.7	256	225	-12.1	374	290	- 25.5
Nagpur	...	1,441	1,625	+ 12.8	225	175	-22.2	324	284	- 12.3
State Total	...	3008	2992	- 0.5	242	197	-18.6	729	590	- 19.1

The State area slightly decreased by 0.5 per cent, in 1975-76 as compared to that in the year 1974-75. The area under the crop was lower in the two divisions of Pune and Aurangabad to the extent of 27.7 per cent and 11.7 per cent while in Nagpur division it was higher by 12.8 per cent during 1975-76 as compared to that in the preceding year.

The State average yield per hectare also decreased from 242 kg. ha. in 1974-75 to 197 kg./ha. in 1975-76 or by 18.6 per cent. The lower yield was observed in all the four divisions of the State.

The production of linseed in the State had gone down from 729 hundred tonnes in 1974-75 to 590 hundred tonnes in 1975-76 i.e. by 19.1 per cent. The decrease was shared by all the divisions of the State.

CHAPTER VI

PRICES

(Table VI, pages 96 to 100)

(Summary Table 'F', page 27)

13. The districtwise farm harvest prices of the principal crops during the peak marketing period in the year 1975-76 are given in the main table VI of the report. The average farm harvest prices at the State level for the principal crops during the five years from 1971-72 to 1975-76, are given in the Summary Table 'F'. The prices obtained by farmers in respect of all the important commodities (except paddy, tobacco and chillies) decreased appreciably during 1975-76 as compared with these of the preceding year mainly due to the increasing trend in the agricultural production.

14. The major variations in the average farm harvest prices at the State and divisional levels are briefly commented in the following paragraphs with reference to the prices in the preceding year.

The price of paddy at the State level was Rs. 136.99 per quintal and was higher by 5.9 per cent than in that of the preceding year. The increase was noticed in all the divisions of Bombay, Pune, Aurangabad and Nagpur divisions to the extent of 4.3 per cent, 4.5 per cent, 10.2 per cent and 6.1 per cent respectively.

The price of wheat at the State level was Rs. 155.38 per quintal during the year under report and was considerably less i.e. by 23.6 per cent. The decrease was noticed in all the divisions of Bombay, Pune, Aurangabad and Nagpur and was 14.6 per cent, 18.6 per cent, 27.1 per cent and 26.3 per cent respectively.

The State level average price of jowar was Rs. 140.85 per quintal and was lower by 17.1 per cent. The decrease ranged from 13.8 per cent in Bombay division to 22.4 per cent in Nagpur division.

The State average price of bajri was Rs. 127.28 per quintal and was lower by 12.8 per cent. The decrease was noticed in all the four divisions to the extent of 7.1 per cent to 21 per cent.

The average price of ragi at the State level was Rs. 127.15 per quintal showing a decrease of 11.0 per cent. The decrease was noticed in the two major growing divisions of Bombay and Pune being of the order of 10.9 per cent and 13.6 per cent respectively.

The State level average price of maize was Rs. 199.65 per quintal during the year under report and was lower by 23.4 per cent than that of the preceding year. The decrease ranged from 12.7 per cent in Bombay division to 29.1 per cent in Aurangabad division.

The price of tur dal was Rs. 188.74 per quintal at the State level and was lower by 19.6 per cent. The decrease was shared by all the divisions ranging from 14 per cent to 21 per cent.

The State level average price of gram was Rs. 162.31 per quintal and was lower by 23.1 per cent as compared with that in the preceding year. The decrease ranged from 19.6 per cent in Bombay division to 25.4 per cent in Aurangabad division.

The average price of raw-sugar (gur) at the State level was Rs. 178.17 per quintal which was lower by 16.2 per cent than that of the preceding year. The decrease was noticed in all the three divisions of Bombay, Pune and Aurangabad to the extent of 15.8 per cent, 18.1 per cent and 3.3 per cent respectively.

The State level average price of groundnut was Rs. 201.40 per quintal and was lower by 21.9 per cent. The decrease was observed in all the four division and was of the order of 16.6 per cent, 18.9 per cent, 31.6 per cent and 27.1 per cent of Bombay, Pune, Aurangabad and Nagpur divisions respectively.

At the State level, the price of tobacco was Rs. 880.12 per quintal and was higher by 17.6 per cent as compared what that in the preceding year.

The State level prices of the remaining commodities of castor seed, linseed, sesamum and potatoes decreased by 24.0 per cent, 26.7 per cent, 7.1 per cent and 5.7 per cent respectively, while that of chillies showed a slight increase of 2.7 per cent in 1975-76.

15. The table below gives the average prices of the agricultural commodities prevailing at selected centres during peak marketing periods for the years 1971-72 to 1975-76.

Commodity	Centre	Price per quintal				
		1971-72	1972-73	1973-74	1974-75	1975-76
1	2	3	4	5	6	7
		Rs.	Rs.	Rs.	Rs.	Rs.
Jowar	1. Mangalwedha (Solapur)	A 58.00	58.00	90.00	74.00	74.00
	2. Karanja (Akola)	B 56.00	56.00	88.00	72.00	72.00
	3. Latur (Osmanaba)	C 50.00	50.00	82.00	66.00	66.00
Bajri	1. Nasik	83.83	151.53	130.67	202.50	121.17
	2. Phulmary (Aurangabad)	91.04	152.67	121.80	182.00	119.00
Rice	1. Thane	AA 106.00	109.00	120.00	89.00	127.00
	2. Goregaon	A 88.50	101.50	113.00	84.00	115.00
		B 91.50	94.50	105.00	79.00	112.00
Wheat	1. Gada (Nagpur)	C 83.00	86.00	98.00	74.00	105.00
		99.00	76.00	185.92	203.44	155.24
	2. Jalna (Aurangabad)	103.90	76.00	184.30	206.80	146.87
Groundnut	1. Karad (Satara)	133.69	266.00	255.20	269.69	164.50
	2. Osmanabad	133.80	256.00	275.60	242.97	163.50
Cotton (Jarilla)	1. Bombay	537.00	551.00	842.30	837.16	N. R.

Note.—AA—Superfine, A—Superior, B—Medium and C—Coarse.

The centres mentioned in the table show typical representative markets and accordingly depict the general trend in prices of the essential commodities in

the State. prices of jowar and rice are controlled prices. Prices of bajri, wheat and groundnut decreased mainly due to increase in the production.

CHAPTER VII

AGRICULTURAL WAGES

(Table VII, pages 102 to 113)
(Summary Table "G", pages 28-29)

16. According to the Revenue Accounts Manual, Agricultural labour is classified under three categories viz., (i) skilled labour, (ii) ordinary labour and (iii) field labour. Skilled labour is comprised of carpenters, blacksmiths and cobblers. Ordinary labour includes load carrying coolies, well diggers, assistants of masons and carpenters, earth workers etc., while field labour includes ploughmen, sowers, transplanters, weeders, reapers, harvesters etc. As shown in Table VII of Agricultural wages, one more category of labour is included viz., herdsmen whose main daily work is to

take the livestock owned by different owners to the jungle for grazing.

17. Districtwise and monthwise figures of daily wages of different classes of agricultural labour, are given in table VII of the report, while the State level information is given in the 'summary table G' along with the information for the preceding year.

Average agricultural wages of different categories of agricultural labour, during the two years viz. 1974-75 and 1975-76 are presented here below.—

Agricultural wages (daily)

Year	Skilled labour			Field labour			Other Agril. labour		Herdsmen
	Carpenter	Black-smith	Cobbler	Male	Female	Child.	Male	Female	
1	2	3	4	5	6	7	8	9	10
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1974-75 ...	8.48	7.62	6.08	3.80	2.71	1.95	3.55	2.55	3.09
1975-76 ...	8.96	8.19	6.55	3.93	2.90	2.03	3.70	2.72	3.14

It is seen from the above that the State level average daily wages of all the categories were higher during

1975-76 as compared to the wages in 1974-75.

CHAPTER VIII

AGRICULTURAL STOCK

(Table VIII, pages 114 to 129)
(Summary Table 'H', pages 30 to 33)

18. Table VIII of this report gives the details of livestock, poultry, agricultural machinery and implements as per quinquennial census of livestock and agricultural machinery conducted in 1972 by the Director, Directorate of Economics and Statistics, Maharashtra State, Bombay. Summary Table 'H' gives provisional total number of livestock, poultry, agricultural machinery and implements according to different categories and comments on the same are briefly given below.

(i) *Cattle*.—There was a slight decrease in the number of cattle from 1,47,29,446 in 1966 to 1,47,05,147, in 1972 or by 0.2 per cent. The total number of males of

age over three years decreased by 5.2 per cent. Out of these, the number of males used for work only recorded a decrease of 3.4 per cent. The number of 'other males' over three years showed an increase of 9.1 per cent.

Among the females over three years, the number of breeding cows recorded an increase of 1.0 per cent while those in milk increased by 4.2 per cent. The number of young stock recorded an increase of 7.3 per cent over that in 1966.

(ii) *Buffaloes*.—The total number of buffaloes recorded in 1972 was 33,00,746 as against 30,41,919 in 1966

showing an increase of 8.5 per cent. Among the different categories of buffaloes, the number of males over three years was 3,08,353 showing a decrease of 9.2 per cent over that in 1966. Among the females, the number in milk was 9,54,884 in 1972 showing an increase of 11.7 per cent. The total number of breeding buffaloes showed an increase of 7.8 per cent. The number of young stock recorded an increase of 16.0 per cent.

(iii) *Sheep and Goats*.—The number of sheep decreased by 3.5 per cent whereas that of goats increased by 15.4 per cent as compared with the corresponding number of the year 1966.

(iv) *Horses and Ponies etc.*—The total number of horses and ponies declined considerably i. e. by 42.3 per cent in comparison with that of 1966.

The number of mules and camels declined by 64.4 per cent and 63.7 per cent or by 847 and 1232 respectively.

The decrease in the number of donkeys was by 18.2 per cent while the number of pigs increased by 12.0 per cent over that of the year 1966.

(v) *Poultry*.—The total number of poultry showed an increase by 23.4 per cent.

Contagious Diseases

During the year 1975-76, the cattle and other live stock were affected by incidences of contagious diseases as follows :—

In equines, there was no incidence of Surra. In bovines, 62 outbreaks were reported from the State (mostly in Chandrapur, Bhandara and Thane districts and some in Kulaba, Nasik, Dhule, Jalgaon, Pune, Parbhani, Yavatmal and Nagpur districts) affected 1105 animals (cattle), out of which 24 animals died due to Surra, the percentage of mortality being 2 per cent.

Similarly 143 outbreaks of R. P. (Rinder Pest) like diseases were reported in cattle mostly from Kulaba Ratnagiri, Jalgaon and Pune districts infection of 4051 animals out of these 53 animals died, the percentage of mortality being 1.3 per cent.

The outbreaks of Foot Mouth disease in cattle was reported from 700 villages practically spread all over the State (except Ratnagiri district) affecting 24,629 animals of which 118 animals died.

There were reports of Haemorrhagic Septicaemia disease in cattle from all over the State except from Bombay and Ahmednagar districts. In all 1241 outbreaks affected 4569 animals, out of these 3557 animals died i. e. the mortality in affected animals was 78 per cent. Similarly 1795 outbreaks of Block Quarter disease were reported from all the State except from Bombay affecting 5659 animals of which 4574 animals died, the mortality percentage being 81 per cent.

There were sporadic incidence of Anthrax disease in cattle from Bhandara, Dhule and Yavatmal districts in 26 villages and 86 animals or 91 per cent of the affected animals succumbed to the disease.

Besides, there were 65 reports of some animal disease (un-diagnosed), due to which 248 animals (or 22 per cent) died out of 1105 animals affected.

The sheep and goats were mainly affected by Enterotoxaemia, sheep-pox, disease and also by other un-diagnosed diseases.

Due to Enterotoxaemia, 621 sheep and goats were affected out of which 530 died (i. e. 85 per cent mortality). In respect of sheep-goat pox 2194 animals were affected, out of which 588 died (mortality being 27 per cent). Due to other un-diagnosed diseases 342 sheep-goats died out of the affected 870 animals (mortality being 39 per cent).

The poultry were mainly affected by Ranikhet disease 445 birds were reported to have died out of 521 in only 10 outbreaks. Similarly there were a few reports of Fowl-pox infections. Birds reported to be affected were 132, out of which 59 birds died. Un-diagnosed diseases claimed 22 birds.

Prompt preventive measures were adopted in controlling the outbreaks of contagious diseases in live-stock and poultry.

On the whole, the condition of cattle and other live-stock was fairly satisfactory in the State.

CHAPTER IX AGRICULTURAL OUTLOOK

19. The production of foodgrains was a record one in 1974-75 and this was broken in 1975-76, establishing a yet new record. The agricultural year was favourable to most crops except cotton and bajri in the kharif season and jowar in the rabi season.

On the whole, the kharif season was quite favourable. The sowings were completed within the sowing period.

except that of cotton and groundnut crop, the sowing of which was delayed and hence the area under these crops was affected as compared to the area of 27.2 lakh ha. and 9.4 lakh ha. respectively sown in 1968-69. The crops were also affected due to late and heavy rains in September and October.

Although hybrid bajri crop was affected by Downy Mildew disease at its early growth stage in North Deccan, necessary and timely steps were taken by way of removing the affected crop and resowing the area with local bajri, hybrid jowar and hybrid maize, so as to prevent reduction in to area under foodgrain crops. The hybrid bajri was affected due to late rains in September/October at harvest stage also.

During the rabi season, rabi jowar is the first crop sown. In 1975-76, rabi jowar could be sown in time in most of the areas, but the late and heavy rains in October were responsible for delaying its sowing in some parts of South Deccan Region, retarding the growth of the early sown crop. The Cold spell during November and December was further responsible for affecting its growth.

Barring the above few instances, favourable weather conditions in the kharif and rabi seasons and a record coverage under hybrid/high yielding varieties of food-grain crops enabled the achievement of a record foodgrain production.

The Supply of fooder during the year under report was generally satisfactory and its prices ruled at a reasonable level in different markets of the State.

The availability of water for drinking and irrigation purposes was adequate in the State.

Due to intensive efforts on the part of Government and semi Government bodies and also due to advanced planning and its proper execution, more facilities were provided to the agriculturists.

Due to the programme of construction of new wells, storage due to good rains and utilisation through large scale installation of electric pumps and avacut development work in different major and medium irrigation projects, the area under irrigation registered a considerable increase.

On the whole, the agricultural out-look in the State was very encouraging.

CHAPTER X

CONDITION OF AGRICULTURAL POPULATION

20. The agricultural season 1975-76 in the State was exceptionally good and the production of food-grain crops touched a new high. This agricultural situation, coupled with the advance planning and systematic efforts on the part of Government and semi Government bodies during the year under report agricultural labour could engage itself during the major part of the year in the agricultural work. Their wages were also higher than in the preceding year. The price level, though registered more or less a continuous rise upto June 1975, steadily declined thereafter. As usual the fair-price shops continued to function and met the needs of agricultural population to the extent possible.

The Employment Guarantee Scheme showed an impressive progress during the year under report. Work was provided for about 700 lakh man days in the first nine months of the year under report as against 480 lakh man days during the year 1974-75.

Land reforms have assumed a new significance in the developing economy as they hold the key to social and economic structure, beneficial to agricultural development. The objective of these measures is to establish a new agrarian structure based on social justice by reducing inequalities regarding land holdings. They also aim at maximising agricultural production by removing other obstacles that hamper production because of the agrarian structure and to prepare ground for agro-economic development. Important steps which Government had taken in this behalf are (1) conferment of ownership rights on the tenant cultivators, (ii) minimisation of inequalities in respect of land holdings by imposing ceiling or upper limit on

land holding and (iii) consolidations of landholdings and preventing their fragmentation.

Loans were advanced to the needy agriculturists by Government Different financial institutions such as Co-operative Agricultural Societies, Commercial Banks and Agricultural Refinance and Development Corporation were actively associated with the agricultural finance in the State.

For the first time, Government planned a new approach for stepping up foodgrain production setting up Pilot Project Blocks in the rabi season 1975-76 on wheat and paddy crops.

They were successfully implemented. The project blocks served as model demonstrations to the cultivators to induce them to take up the cultivation of hybrid/high yielding varieties of crops. Rural electrification scheme continued to help the agriculturist in irrigating the crops wherever possible, depending on the availability of water in wells, tanks etc. through the use of electric pumps.

A 20 point economics programme was introduced from 1st July 1975. Under the programme the liquidation of normal indebtedness was initiated. The policy of cracking down on smugglers, hoarders for recovering misused foreign exchange and their like was more vigorously pursued since June 1975 with the declaration of emergency when a sense of economic discipline was introduced in the country. Determined efforts were made by the Government of India to bring out hidden income and action was taken against those income tax dodgers.

SUMMARY TABLE 'A'
Land Utilization Statistics [1975-76]

(Area in '00' ha.)

Head of classification	1974-75		1975-76		Percentage in crease (+) or decrease (-) over 1974-75
	Area	Percentage to total	Area	Percentage to total	
1	2	3	4	5	6
Geographical area*	3,07,762	...	3,07,762	...	
Reporting area for the Land Utilisation Statistics [Total of (1) to (9)].	3,07,583		3,07,583
(1) Forests	53,485	17.4	53,337	17.3	- 0.3
(2) Barren and Unculturable land	17,388	5.6	17,381	5.6	- 0.0
(3) Area under non-agricultural uses	9,290	3.0	9,482	3.2.1	+ 2.1
(4) Culturable waste land	10,087	3.3	10,201	3.3	+ 1.1
(5) Permanent pastures and other grazing lands.	16,255	5.3	16,151	5.3	- 0.6
(6) Land under miscellaneous tree crops and groves not included in net area sown.	1,926	0.6	1,933	0.6	+ 0.4
(7) Current fallows	9,223	3.0	8,450	2.8	- 8.4
(8) Other fallows	7,866	2.6	8,032	2.6	+ 2.1
(9) Net area sown	1,82,063	59.2	1,82,616	59.4	+ 0.3
(10) Area sown more than once	12,993	4.2	14,023	4.6	+ 7.9
Total cropped area [Total of (9) & (10)]	1,95,056	63.4	1,96,639	63.9	+ 0.8

*This is based on the figures supplied by Central Statistical Organisation, Government of India.

SUMMARY TABLE ' B '

Sources of Water Supply and the Area Irrigated therefrom in the
Maharashtra State, during 1975-76

(Area in " 00" ha.)

Item		1974-75	1975-76	Percentage increase (+) or decrease (-)
1		2	3	4
(i) Classification of Sources :—				
Tube Wells	... } Government	133	185	+ 39.1

NOTE : (i) *Data from Observatory centres-

(ii) N. A. = Data not available.

(iii) @ Station out of order.

(iv) A Rainy day on which 2.5 mm. or more of rain is recorded.

(v) The normals of observatory centres i. e. Bhir, Nanded, Pusad and Brahmapuri are now available and hence the same
