FROM

DR. M. B. GHATGE,  
Director of Agriculture,  
Maharashtra State.

To

THE SECRETARY TO GOVERNMENT,  
AGRICULTURE AND FORESTS DEPARTMENT,  
Sachivalaya Annexe, Bombay-32.

SIR,

I am to submit herewith the Annual Season and Crop Report of the Bombay State for the year ending 31st July, 1958.

I give below very briefly my remarks on the general agricultural conditions.

1. The season was characterised by uneven distribution of rainfall. Substantial and widespread rains were received during the months of July and August. Prolonged drought that prevailed during the subsequent months of September and October, however, arrested the growth of the standing crops and caused reduction in the crop yields.

2. Crop pests and plant diseases were reported from all over the State; prompt remedial and preventive measures were taken in the affected areas.

3. The mileage of Government canals was 3,124 and that of private canals was 4,360. The total irrigated area during the year under report was 42,04,600 acres showing an increase of 2.8 per cent over the corresponding figure of 40,89,500 acres during 1956-57.

4. The decrease in the area under food crops was noticed in all parts of the State except Maharashtra division where it remained practically the same as during 1956-57; while there was a slight increase in the area under non-food crops at the State level and in the divisions of Konkan and Vidarbha only.

The area under food crops was 44,510,600 acres as against 45,908,700 acres in 1956-57 showing a decrease of 3.0 per cent. The area under non-food crops was 2,48,41,800 acres as against 24,452,800 acres in 1956-57 showing an increase of 1.6 per cent.

b

5. The average yield per acre of crops, at the State level, for which surveys were carried out was lower than what it was in the preceding year except in the case of rabi jowar, bajri and maize for which the yields were higher.

6. The prices of agricultural produce except those of millets ruled higher during the year under report in comparison with those of the preceding year. There was a slight increase in the agricultural wages of carpenters, black-smiths and field labour while those of herdsmen showed a slight decline. The wages of cobblers and other agricultural labours remained almost stationary.

7. As per quinquennial census of livestock conducted in April, 1956, there was an increase in the number of cattle and buffaloes. The number of breeding bulls, however, went down by 37 per cent. The number of sheep and goats has increased. The number of horses, ponies and mules went down. The poultry showed an increase of 47.1 per cent.

8. The number of tractors, oil engines, electric pumps and ghanies showed an increase of 175.2; 55.0; 73.8 and 15.3 per cent respectively. The number of sugarcane crushers declined by 12.9 per cent (compared with 1951 Census figures).

Yours faithfully,

M. B. GHATGE,

Director of Agriculture,  
Maharashtra State.

# SEASON AND CROP REPORT OF THE STATE OF BOMBAY FOR THE YEAR 1957-58

## CHAPTER I—SEASON

The agricultural season of 1957-58 was characterised by uneven distribution of rains which were generally substantial in the early stage and inadequate at the late stage over large areas of the State. Hence, both the Kharif and the rabi seasons were, on the whole, unfavourable to most of the crops in many parts of the State. The pre-monsoon rains received in the State facilitated the tillage operations of kharif crops. In June, substantial rainfall was received in the Konkan and in parts of the Gujarat and the Deccan, while it was light to fair elsewhere in the State. Scarcity of drinking water was experienced in the northern part of Kolaba district in the Konkan and of water and fodder supply in Dangs district and in Sakri taluka of West Khandesh district in the Deccan.

The rainfall in July was generally widespread, it being somewhat excessive in parts of Bhavnagar district in Saurashtra where standing crops were damaged to some extent. On the other hand, standing crops were withering in Sholapur district towards the end of July for want of adequate rains.

The rains during August were heavy and continuous in parts of Junagadh district in the Saurashtra, in the Konkan, in the Marathwada and in Yeotmal and Akola districts in the Vidarbha. They were adequate in other parts of the State. Due to excessive and continuous rains, the growth of standing crops was arrested in the Saurashtra, in parts of Kolaba district, in the Konkan, in parts of Bhir and Parbhani districts in the Marathwada and in parts of Akola district in the Vidarbha. Interculturing and weeding of Kharif crops were in progress in parts of the State.

In September, there was light rainfall and general deficiency of rains was noticed practically all over the State. Consequently, groundnut, bajri and Kharif jowar in the Saurashtra and Kutch; groundnut, castor, paddy and Kharif jowar in the Gujarat; paddy in Konkan; groundnut, Kharif jowar, paddy and Kharif pulses in the Deccan, in the Marathwada and the Vidarbha were withering due to lack of soil moisture. Widespread rains were urgently needed to save the situation. Interculturing and weeding operations were generally in progress. In October, there was practically no rainfall in the Saurashtra and Kutch and the Gujarat, it being light to fair in the Deccan and light in the Konkan, the Marathwada and the Vidarbha. Consequently, the standing crops continued to wither

in parts of the Saurashtra and Kutch, the Gujarat, the Konkan, the Marathwada and the Vidarbha due to the prolonged drought. Preparatory tillage operations for sowing of Rabi crops were generally in progress. The rains received in November in some parts of the State proved to be untimely and caused damage to paddy crop to some extent in Kolaba district and to Kharif crops in the Deccan.

In December, there was practically no rainfall in the State except for a few scattered showers in the Gujarat. There was complete failure of crops in Okhamandal taluka of Amreli district. Harvesting of late paddy and of other Kharif crops was nearing completion and threshing and winnowing operations and picking of cotton were in full swing. In January, there was no rainfall in the state except for a few showers accompanied by thunderstorms in parts of Amreli district in the Saurashtra, Sangamner and Rahni talukas of Ahmednagar district and in parts of Poona district in the Deccan and in parts of the Vidarbha. Damage to some extent was caused to rabi crops by hailstorms in parts of Gondia tahsil of Bhandara district in the Vidarbha. Harvesting of tobacco was in progress in parts of the Gujarat and the Deccan. Harvesting of gram and crushing of sugarcane were in progress in parts of the Deccan and the Marathwada. In February, except for a few showers in parts of Bhandara and Chandā districts in the Vidarbha, there was practically no rainfall. Harvesting of rabi crops was in progress. Picking of cotton was generally in progress. In March, there was practically no rainfall in the State except for a few showers accompanied by thunderstorms in Bhavnagar district in the Saurashtra; in Poona, Sholapur South Satara and Kolhapur districts in the Deccan and in parts of the Marathwada and in the Vidarbha. Harvesting and threshing of rabi crops, planting and crushing of sugarcane were continued, while preparatory tillage for the ensuing kharif cultivation commenced at places. The climatic conditions experienced during the year were conducive to the development of insects, pests and plant diseases which caused damage to the crops to a varying extent.

2. *Distribution of rainfall.*—Table I (Pages 50 to 59) compares the rainfall during the year under report, with the normal rainfall at each district headquarter station in the State. The figures of normal rainfall for each station are those supplied by the Indian Meteorological Department. The following observations are made from a study of this table:—

*Pre-monsoon rains.*—The pre-monsoon rains were above the normal at Amreli, Godhra (Panch Mahals), Alibag (Kolaba), Ratnagiri, Dhulia, Ahmednagar, Poona, Sholapur, Satara, Sangli and

Kolhapur, the hilly Maharashtra tract, and at all the headquarter stations in the Marathwada and the Vidarbha, they being below the normal at Rajkot, Surendranagar, Bhuj, Ahmedabad, Kaira, Broach, Jalgaon, Ahwa and Nasik. At the other headquarter stations in the State, these rains were absent.

*Monsoon rains.*—The monsoon rains were generally below the normal except at Bhavnagar, Junagadh, Amreli, Thana, Ratnagiri, Ahmednagar, Parbhani, Nanded and Buldana, where they were above the normal, the same being just about the normal at Sholapur.

*Post-monsoon rains.*—The post-monsoon rains exceeded the normal at Jamnagar, Rajkot, Amreli, Mehsana, Kaira, Godhra (Panch Mahals), Alibag (Kolaba), Ratnagiri, Ahmednagar, Sholapur, Satara, Kolhapur, hilly Maharashtra tract, Aurangabad, Bhir and Osmanabad, the same being below the normal at the remaining headquarter stations in the State.

*Winter rains.*—Winter rains were above the normal at Surendranagar, Sangli, Kolhapur and at Osmanabad, the same being below the normal at Rajkot, Junagadh, Bhuj, Amreli, Mehsana, Himmatnagar, Alibag (Kolaba), Jalgaon, Ahwa, Nasik, Ahmednagar, Poona, Sholapur, Satara, hilly Maharashtra tract, Aurangabad, Parbhani and all district headquarter stations in the Vidarbha except Akola. At the remaining headquarter stations, these rains were absent.

*Total rainfall for the season 1957-58.*—The total rainfall for the season was above the normal at Bhavnagar, Junagadh, Amreli in the Saurashtra, Surat in the Gujarat, Thana, Ratnagiri in the Konkan, Ahmednagar, Sholapur, Satara, Sangli, Kolhapur in the Maharashtra and at all the headquarter stations in the Marathwada except for Bhir. At the remaining headquarter stations in the State and in the hilly Maharashtra tract, it was below the normal.

3. *Saurashtra and Kutch.*—In June, adequate rainfall was received in all the districts except Kutch and the total precipitation was generally above the normal. The excessive rains in the third week of July affected the standing crops in Bhavnagar district. The rainfall received in August fell short of the requirements in parts of Rajkot, Bhavnagar and Kutch districts, while it proved to be excessive in parts of Junagadh and Amreli districts. In the month of September, there were only light stray showers all over the division. Bajri and Kharif jowar crops started withering due to lack of soil moisture in parts of the division, while scarcity of water supply and fodder prevailed in parts of Rajkot and Kutch districts. There was practically no rainfall in the month of October in the division. The standing crops continued to suffer due to

the prolonged drought. In November, the rainfall in most of the districts was above the normal except for Bhavnagar district where there were no rains. These rains facilitated sowing of rabi crops and benefited the rabi crops already sown; but proved to be untimely for kharif crops and caused damage to some extent to the harvested groundnut crop and slacked fodder. There was complete failure of kharif crops in Okhamandal taluka and Damnagar Mahal of Amreli district due to deficient rains. There were light and sporadic showers at places from December to March. These rains were accompanied by thunder storms and harvesting of rabi crops was hampered in parts of Amreli district.

As regards crop pests and plant diseases, bajri and kharif jowar crops were attacked by grasshoppers in parts of Bhavnagar district, math and cotton crops by hairy caterpillars in parts of Kutch district, groundnut crop by aphids in parts of Bhavnagar and Junagadh districts. Cotton crop by aphids, jassids and woolly-mites and by fungus disease and groundnut crop by tikka in parts of Sorath district. Control and preventive measures were promptly taken in the affected areas.

*Gujarat.*—There were only some stray pre-monsoon showers in parts of the division. There was adequate and widespread rainfall during the months of June, July and August in the division. Sowing of kharif crops was completed by the end of July and transplanting of paddy, nagli and chillies was in full swing. Except for a few light showers in parts of the division, there were practically no rains during the months from September to December. Standing crops were withering due to the prolonged drought. There were some stray showers in the months of January and March and practically no rainfall in the month of February.

As regards crop pests and plant diseases, paddy was attacked by blast in parts of Ahmedabad district, kharif jowar by hairy caterpillars in parts of Chikhli taluka of Surat district; cotton crop by root-rot in parts of Ahmedabad district; by hairy caterpillars and stem-borers in parts of Navsari, Mahuwa and Chikhli talukas of Surat district and by pink boll-worms in parts of Broach and Surat districts. Incidence of leaf eating caterpillars on potato, aphids on mustard and cumin and rust on wheat in parts of Banaskantha district was observed. Preventive and control measures were resorted to in the affected areas.

*Konkan.*—Pre-monsoon showers were fairly good in all parts of the division. The monsoon rains were well distributed throughout the division, though slightly below normal. Excessive rainfall was received in the second week of July which caused floods in the Vaitarne and Ulhas river basins. Relief measures were promptly

taken by Government in the affected areas. In August, widespread rains were received. Standing crop thrived well. Interculturing and weeding operations were in progress. The rains received in September and October were extremely below the normal. Consequently, paddy crop started withering at places due to deficient rains. Harvesting of early paddy was in progress. In November, the rainfall exceeded the normal in parts of the division. The rains received during the second and third weeks of the month caused damage to the paddy crop to some extent in parts of Kolaba district. Harvesting and threshing of paddy were generally in progress. In December and February, there were practically no rains in the division, while there were a few stray showers in the months of January and March. Sowing of Waingan paddy commenced in parts of Ratnagiri district during the month of December and it was completed towards the end of January.

As regards incidence of crop pests and plant diseases, paddy crop was attacked by blast in parts of Thana district by blue beetles and bacterial blight in parts of Mahad, Karjat and Poladpur talukas of Kolaba district and by army-worms in parts of Sawantwadi taluka of Ratnagiri district. Control and preventive measures were adopted in the affected areas.

*Maharashtra.*—Pre-monsoon showers facilitated the preparatory tillage operations. Fairly substantial rains were received in the month of June. In July, the rains were widespread in parts of the division. In Sholapur, crops were reported to have started withering due to lack of soil moisture. In August, there was fairly well distributed rainfall except in South Satara district where more rains were needed for the development of kharif crops. Weeding and interculturing operations were generally in progress, while harvesting of groundnut and other pulses had commenced. Sowing of rabi jowar and planting of Adsali sugarcane were in progress in Ahmednagar district. In September, the rainfall received was extremely below the normal practically all over the division. Consequently, standing kharif crops suffered to a varying extent for want of adequate soil moisture. Substantial rains were urgently needed to save the situation. Rainfall received in October and November was extremely below the normal in the division, it being totally absent in some parts of the division. Paddy crop had practically failed for want of adequate rains in Dangs district. The rains received during the second and third weeks of November proved to be untimely in parts of Sholapur and North Satara districts, where harvested produce lying on the threshing yards was damaged to some extent. There were practically no rains during the months of December and February in the division. There were, however, thunder showers during the month of January in parts of Sangamner and Rahuri talukas of Ahmednagar district and in parts of

Poona district. Harvesting, threshing of rabi crops and planting and crushing of sugarcane were generally in progress. Scarcity of drinking water was felt in the hilly tracts of Nasik district towards the end of March.

As regards crop pests and plant diseases, bajri was attacked by ergot in Miraj taluka of South Satara district, paddy by blast in parts of Nasik district and in Gadhinglaj taluka of Kolhapur district and by army-worms in parts of Poona district. Attack of aphids on groundnut in parts of West Khandesh and Nasik districts; pyrilla on sugarcane in parts of Nasik and Ahmednagar districts; thrips on chillies in parts of West Khandesh district; leaf curl in parts of East Khandesh and Nasik districts; army-worms on kharif jowar in parts of Poona district and grasshoppers in South Satara district was reported. Tobacco crop was attacked by aphids and borers and also by frog-eye in parts of Kolhapur district. Incidence of rust on wheat was observed in parts of Poona and Kolhapur districts and of sugary disease on rabi jowar in parts of Ahmednagar district, while downy-mildew on grapes was reported from parts of Nasik district. Preventive and control measures against these pests and diseases were taken in the affected areas.

*Marathwada.*—Light to fair pre-monsoon rainfall facilitated the preparatory tillage for sowing of kharif crops. The rains received in June, though below the normal, were widespread. Substantial rains were received in the month of July. Sowing of kharif crops was nearing completion. There was heavy precipitation in the month of August. Consequently, mung, groundnut, kharif jowar, cotton and other kharif crops were damaged to some extent. The rainfall received in September was generally below the normal in the division. Weeding and interculturing operations and preparatory tillage for sowing of rabi crops were in progress. The rains received in October fell short of the requirement. Crops started withering in Osmanabad and Nanded districts due to inadequate soil moisture. But for a few stray showers, there was practically no rainfall during November. Rabi crops were suffering for want of adequate moisture. There were no rains in the months of December and February, while there were stray showers during the month of January and thunder showers during the month of March in parts of the division.

As regards crop pests and plant diseases, mung and groundnut crops were attacked by aphids. Chillies by thrips and rabi jowar by grasshoppers in parts of Bhir district. Remedial measures were resorted to in the affected areas.

*Vidarbha.*—Ante-monsoon rains were received in the division and the same facilitated the preparatory tillage operations. In June and July, the rainfall was below the normal. In August, fairly

substantial rains were recorded in the division. The rains, however proved to be excessive in the third week of the month. Standing crops were adversely affected due to excessive soil moisture. In September, except for Arvi tahsil of Wardha district, the precipitation was generally below the normal in the division. Harvesting of groundnut and other kharif pulses and preparatory tillage for sowing of rabi crops were generally in progress. In October, the rainfall was below the normal. Consequently, paddy and other kharif crops started withering at places. Sowing of rabi crops was also retarded at places due to deficient rains. In November and December, there were practically no rains. In January, there were stray thundershowers in parts of the division. Damage to some extent was caused to rabi crops in Gondia tahasil due to hailstorms. In February, a few showers were received in parts of Bhandara and Chanda districts, while thunder showers were received in the month of March in parts of the division.

As regards incidence of crop pests and plant diseases, paddy crop was affected by gall-fly and caterpillars in Sakoli and Gondia tahasils of Bhandara district, groundnut and cotton crops by aphids in parts of Yeotmal, Akola, Amraoti and Buldana districts and cotton crop also by jassids in parts of Amraoti, Yeotmal and Akola districts and by dahiya in most parts of the division. Incidence of leaf curl on chillies was reported from parts of Nagpur, Akola and Wardha districts. While stem-borers and lendra on kharif jowar were observed in parts of Wardha and Amraoti districts respectively. Timely preventive and remedial measures were taken in the affected areas.

## CHAPTER II—AREA CULTIVATED AND UNCULTIVATED

(Table II Pages 58-65)

(Summary Table-A Page 36)

4. *Number of villages.*—During the year under report, the number of villages in the State was 58,064 as against 58,000 during the previous year, thus showing an increase of 64 villages. This increase was mainly noticed in Chanda district where 68 villages of Forest Department were reported during the year.

5. *Total area—Reporting and non-reporting areas.*—The total area i. e. the geographical area of the Bombay State was almost stationary being 121, 311, 100 acres during the year under report as against 121, 198, 200 acres during the previous year, thus showing a small increase of 0.1 per cent. This increase in the geographical area was attributed to the most accurate information supplied

in some of the districts from added areas, especially in the Saurashtra and Kutch division. Of the total area of the State, the reporting area was 111,084,400 acres and the non-reporting area i. e. the area for which no returns exist was 10,226,700 acres. In Dangs district, although the details for the total area of 423,000 acres are available, details for the reported area of 149,500 acres are not separately available.

6. *Cropped area.*—The gross cropped area in the State showed a slight decrease of 1.4 per cent, it being 69,352,400 acres during the year under report as against 70,361,500 acres during the preceding year. The net cropped area also showed a decrease of 0.8 per cent, having gone down from 67,225,100 acres in 1956-57 to 66,714,200 acres in 1957-58. The area under forests was almost stationary, it being 15,826,300 acres during the year under report as against 15,808,700 acres during the previous year. During the year under review, the acreage under barren and unculturable land, culturable waste and land under miscellaneous tree crops and groves not included in area sown, showed a decrease over the corresponding figures of the preceding year by 0.3, 2.6 and 3.0 per cent respectively. On the other than, the acreage under land put to non-agricultural uses, permanent pastures and other grazing land, current fallows and other fallows recorded an increase of 4.6, 2.2, 12.8 and 2.7 per cent respectively as compared with that of the previous year.

### CHAPTER III - IRRIGATED AREAS

(Tables III—A and III-B—Pages 66-125)

(Summary Tables B and C Pages 37-40)

7. *Sources of water supply.*—During the year 1957-58 the number of Government canals reported was 761 as against 757 reported during the year 1956-57, thus recording a slight increase of 0.5 per cent. There was also an increase in the mileage of these canals from 2,961 to 3,124 or by 5.5 per cent. The number of private canals showed an increase of 2.3 per cent or from 7,546 to 7,717; while the mileage of these canals showed an increase by 5.3 per cent or from 4,349 in 1956-57 to 4,360 in 1957-58. The number of Government tube wells went up from 352 to 605 or by 71.9 per cent. This increase was reported from Mehsana and Ahmedabad districts; while the number of private tube wells decreased by 67.2 per cent or from 265 in 1956-57 to 87 in 1957-58. This decrease was noticed mainly in Zalawad district due to wrong information supplied during 1956-57 which was corrected during the year under report. The number of Government masonry wells

used for irrigation purposes recorded an increase of 11·3 per cent. having gone up from 5,818 in 1956-57 to 6,478 in 1957-58, while the number of Government non-masonry wells used for irrigation purposes recorded a decrease of 17·7 per cent, it being 3,967 in 1956-57 as against 3,266 during 1957-58. This decrease was mainly reported by Poona, Buldana and Chanda districts. The number of private masonry and non-masonry wells used for irrigation purposes went up from 536,232 and 294,460 in 1956-57 to 556,897 and 301,568 in 1957-58, respectively or by 3·8 and 2·4 per cent. The number of wells used for domestic purposes went up from 343,510 in 1956-57 to 364,394 in 1957-58 or by 6·1 per cent. The number of wells not in use showed a decrease of 4·5 per cent. The number of wells having independent ayacut and the number of wells supplementing recognised sources of water supply showed an increase of 20·5 and 0·6 per cent, respectively. The number of reservoirs went down by 13·8 per cent or from 1,436 in 1956-57 to 1238 in 1957-58. The number of tanks with ayacut 100 acres or more showed a decrease of 9·5 per cent having gone down from 2,352 to 2,129 in 1957-58; while the number of tanks with ayacut less than 100 acres recorded an increase of 5·9 per cent or from 45,288 in 1956-57 to 47,964 in 1957-58. The number of oil-engines showed an increase from 50,084 during 1956-57 to 52,444 during the year under report or by 4·7 per cent.

8. *Irrigated areas.*—The total area irrigated in the State was 4,204,600 acres during the year under report as against 4,089,500 acres during 1956-57, thus recording an increase of 2·8 per cent. This increase was noticed mainly in the case of rice, sugarcane cotton, tobacco and groundnut crops.

During the year under report, the percentage of net area irrigated to the net area sown was 5·6 as against 5·4 in 1956-57, and that of the gross area irrigated to gross area sown was 6·1 as against 5·8 in 1956-57.

9. *Area irrigated under different sources of irrigation.*—The area irrigated by Government canals, tanks, and wells went up by 27,500, 17,400 and 68,900 acres or by 4·4, 3·4 and 3·0 per cent respectively. On the other hand, the area irrigated by private canals and other sources went down by 7,300 and 6,000 acres or by 11·2 and 5·6 per cent, respectively.

10. *Irrigated areas under food and non-food crops*—The total area irrigated by all sources was 4,204,600 acres as against 4,089,500 acres during the year 1956-57, thus recording an increase of 2·8 per cent. The area irrigated under food crops during 1957-58 was 3,491,900 acres as against 3,444,000 acres during the previous year, thus recording an increase of 1·4 per cent. The significant increase was noticed in the case of rice and sugarcane crops, the irrigated acreages under these having gone up by 2·9 and

8.8 per cent, respectively. The irrigated area under non-food crops also recorded an increase of 10.4 per cent, it having gone up from 645,500 acres during 1956-57 to 712,700 acres during the year under report. The significant increase was mainly due to rise in irrigated area under cotton, groundnut and tobacco by 61.0, 27.1 and 105.1 per cent, respectively.

#### CHAPTER IV—CROPPED AREA

(Table IV-A, IV-B and IV-C, Pages 123.)

(Summary Table D, Pages 41-43)

11. *Total area under crops.*—During the year under report, the gross cropped area of 69,352,400 acres showed a slight decrease of 1,009,100 acres or 1.4 per cent, over the corresponding area of 70,361,500 acres of the preceding year. Of the gross cropped area, 13,051,100 acres were in the Gujarat, 19,818,900 acres in the Maharashtra, 12,049,100 acres in the Marathwada and 11,910,500 acres in the Vidarbha, the percentage decrease over the corresponding figures of the previous years in each division being 4.5, 0.4, 2.3 and 0.5 per cent, respectively. In the Saurashtra and Kutch and the Konkan, however, the gross cropped area of 10,274,500 acres and 2,248,300 acres during the year under report increased by 0.1 and 1.0 per cent, respectively. For the State as a whole, food crops occupied 44,510,600 acres or 64.2 per cent, while non-food crops occupied 24,841,800 acres or 35.8 per cent of the total area sown. During the year under review, the area under food crops showed a decline of 3.0 per cent or 1,398,100 acres as compared with the figure of the previous year, while the area under non-food crops recorded an increase of 1.6 per cent or 389,900 acres.

The table below gives the acreage under food and non-food crops in six divisions of the State during the years 1956-57 and 1957-58:—

(Figures in hundreds)

Division	Food crops			Non-food crops		
	1956-57	1957-58	Percentage increase or decrease	1956-57	1957-58	Percentage increase or decrease
Saurashtra and Kutch	53,592	49,416	- 9.6	49,031	54,329	+ 10.8
Gujarat	79,560	73,439	- 7.7	57,101	57,072	- 0.1
Konkan	16,207	16,093	- 0.7	6,073	6,391	+ 5.1
Maharashtra	149,716	149,926	+ 0.1	49,323	48,263	- 2.1
Marathwada	84,751	82,993	- 2.1	39,599	37,493	- 2.8
Vidarbha	75,261	74,234	- 1.4	44,405	44,871	+ 1.0
total...	459,087	445,106	- 3.0	244,523	248,418	+ 1.6

I will be seen from the above table that under food crops, there was a decrease of 517,600 acres or 9.6 per cent in the Saurashtra and Kutch, 612,100 acres or 7.7 per cent in the Gujarat, 11,400 acres or 0.7 per cent in the Konkan, 175,300 acres or 2.1 per cent in the Marathwada and 102,700 acres or 1.4 per cent in the Vidarbha. In the Maharashtra, however, there was a very slight increase of 0.1 per cent or 21,000 acres. On the contrary, under non-food crops, the Saurashtra and Kutch, the Konkan and the Vidarbha divisions recorded an increase of 10.8, 5.1 and 1.0 per cent or 529,800 acres, 31,200 acres and 46,600 acres, respectively. The divisions of Gujarat, Maharashtra and Marathwada, however, showed a decrease of 0.1, 2.1 and 2.8 per cent or 2,900, 106,000 and 109,700 acres, respectively.

12. *Food Crops.*—Among the main food crops, as compared with the corresponding figures of the previous year, the area under rice went down by 1.2 per cent or 50,100 acres. This decrease was noticed in the Saurashtra and Kutch and the Gujarat where the acreage went down by 1,300 and 129,700 acres or 0.7 and 10.1 per cent, respectively. On the other hand, the Konkan, the Maharashtra, the Marathwada and the Vidarbha recorded an increase of 0.8, 3.3, 11.4 and 2.7 per cent or 8,100, 21,800, 18,900 and 31,100 acres, respectively. At the State level, the area under wheat decreased by 16.1 per cent or by 584,400 acres. This decrease was shared by all the wheat growing divisions but mainly in the Saurashtra and Kutch, the Gujarat, the Maharashtra and the Vidarbha where the acreage went down by 47,600, 300,600, and 70,600 and 62,500 acres or 12.8, 39.8, 9.0 and 7.2 per cent, respectively. During the year 1957-58 the acreage under kharif jowar at the State level went down by 361,100 acres or 3.8 per cent. The decrease was noticed mainly in the Saurashtra and Kutch, the Gujarat and the Marathwada and was of the order of 105,400 acres or 5.8 per cent, 68,800 acres or 5.3 per cent and 159,200 acres or 8.2 per cent, respectively. The Maharashtra division, however, recorded an increase of 1.6 per cent or 19,200 acres. The acreage under rabi jowar at the State level recorded an increase of 227,500 acres or 2.8 per cent. This increase was shared by the Saurashtra and Kutch, the Maharashtra, the Marathwada and the Vidarbha divisions by 30,700 acres or 76.9 per cent, 92,000 acres or 1.8 per cent, 118,100 acres or 5.3 per cent and 10,400 acres or 2.0 per cent, respectively, while the Gujarat showed a decrease of 6.5 per cent or 23,700 acres. The area under bajri slightly went down by 1.2 per cent or 103,500 acres. This decrease was noticed mainly in the Saurashtra and Kutch and the Maharashtra where the acreage went down by 11.6 per cent or 288,000 acres and 2.5 per cent or 93,000 acres, respectively. The Gujarat, however, recorded an increase of 18.2 per cent

or 296,600 acres under this crop. The area under ragi recorded an increase of 5.2 per cent or 38,600 acres. This increase was mainly due to rise of acreage in the Gujarat, the Maharashtra, the Marathwada and the Vidarbha by 36.6, 7.4, 175.8 and 18.2 per cent or 40,700, 25,200, 5,800 and 200 acres, respectively. The Konkan division, however, showed a slight decrease of 1.3 per cent or 3,300 acres. The area under maize also recorded an increase of 12.9 per cent or 63,200 acres. This significant increase was shared mainly by the Gujarat and the Maharashtra by 14.3 per cent or 60,000 acres and 4.0 per cent or 1,800 acres, respectively, while the Vidarbha showed a decrease of 1.0 per cent or 100 acres. The area under gram went down by 26.2 per cent or 431,100 acres. This decrease was mainly due to fall of acreage in the Saurashtra and Kutch, the Gujarat, the Maharashtra and the Vidarbha by 64,700, 274,500, 53,600 and 23,700 acres or 57.7, 79.1, 11.2 and 11.9 per cent, respectively. The acreage under tur showed a slight increase of 0.9 per cent or 14,200 acres. This increase was shared by the Gujarat, the Maharashtra and the Vidarbha by 2.7, 1.4 and 3.6 per cent or 4,800, 4,300 and 18,500 acres, respectively. The Konkan and the Marathwada showed a decrease of 4.7 per cent or 700 acres and 2.3 per cent or 12,300 acres, respectively. The area under sugarcane recorded an increase of 7.9 per cent or 23,200 acres. This significant increase was shared by the Gujarat, the Maharashtra, the Marathwada and the Vidarbha where it was of the order of 4.9, 10.4, 11.9 and 9.0 per cent or 600, 22,000, 4,000 and 600 acres, respectively. The Saurashtra and Kutch, however, showed a decrease of 14.5 per cent or 3,900 acres. The total area under kharif and rabi food crops for the State as a whole went down by 1.7 and 5.9 per cent, respectively.

13. *Non-food Crops.*—In the case of cotton, the acreage at the State level went down by 1.6 per cent or 177,200 acres. This decrease was due to fall of acreage in the Saurashtra and Kutch, the Maharashtra and the Marathwada by 28,200 acres or 1.8 per cent, 200,800 acres or 18.0 per cent and 70,900 acres or 3.7 per cent, respectively. On the contrary, the Gujarat and the Vidarbha recorded an increase of 1.4 per cent or 41,900 acres and 80,800 acres or 2.4 per cent, respectively. The area under groundnut went up by 12.5 per cent or 728,900 acres. This significant increase was shared by the Saurashtra and Kutch, the Gujarat, the Maharashtra and the Vidarbha, it being of the order of 20.6, 25.5, 8.3 and 10.5 per cent or 511, 100, 151, 800, 129, 900 and 33,200 acres, respectively, while the Marathwada showed a decrease of 11.0 per cent or 96,900 acres. The total area under sesamum showed a decrease of 4.0 per cent, or 27,300 acres. This decrease was shared mainly by the Saurashtra and Kutch, the Maharashtra and the Marathwada, by 43,600 acres or 16.4 per cent, 7,900 acres

or 10.3 per cent and 2,100 acres or 2.8 per cent, respectively, while the Gujarat and the Vidarbha recorded an increase of 16.1 and 7.9 per cent or 16,800 and 11,400 acres, respectively. The area under tobacco went down by 16.0 per cent or 42,400 acres. This decrease was noticed in all divisions, particularly in the Gujarat and the Maharashtra where the acreage went down by 14.1 per cent or 26,700 acres and 19.0 per cent or 13,000 acres, respectively. The total area under kharif non-food crops went down by 0.2 per cent and that of rabi non-food crops went up by 11.6 per cent.

14. On the whole, during the year under review, the gross cropped area went down by 1.4 per cent or 1,009,100 acres as compared with the corresponding figure of the previous year. The accompanying table gives the gross cropped area, double cropped area, net cropped area and the area under principal crops in the six divisions of the State during the years 1956-57 and 1957-58.

## CHAPTER V—OUTTURN OF CROPS AND THEIR AVERAGE YIELDS

(Tables V-A and V-B, Pages 258-337)

(Summary Table E—Pages 44-45)

15. *Outturn of crops.*—The table below gives the outturn in tons of principal Kharif and rabi crops:—

(Figures in thousand tons)

Division	Kharif crops			Rabi crops			Total cereals	Total pulses	Total cereals and pulses
	Cereals	Pulses	Total Cereals and pulses	Cereals	Pulses	Total Cereals and pulses			
1	2	3	4	5	6	7	8	9	10
Saurashtra and Kutch ...	485	21	506	45	2	47	530	23	553
Gujarat ...	892	76	968	214	18	232	1,106	94	1,200
Konkan ...	612	10	622	14	...	14	626	10	636

Marathwada ...	614	150	764	465	113	578	1,079	263	1,342
Vidarbha ...	866	194	1,060	318	72	390	1,184	266	1,450
State ...	4,793	630	5,423	2,065	342	2,407	6,861	972	7,833

The remarks in respect of major crops are given below:—

*Rice*:—In the Gujarat, the rainfed crop was reported to be withering due to break in rains in many areas. The crop was given irrigation wherever possible. Slight attack of jassids and skipper was noticed in parts of Ahmedabad district. Caterpillars were reported from Kamrej taluka of Surat district. In the Konkan, the crop was dried due to insufficient rainfall. The transplanting was postponed for want of rains in parts of Kolaba district. The growth of the crop suffered for want of sufficient moisture in the soil in

parts of Ratnagiri district. Attack of blast, stem-borer was reported from Thana district. Grass-hoppers, bacterial blight and army-worms affected the crop in Kolaba district. Attack of army-worms was reported from Ratnagiri district. In the Maharashtra, the condition of the crop was reported to be satisfactory. The growth of the crop was hampered due to insufficient moisture in the soil in parts of Nasik district, while it suffered in Ahmednagar district on account of heavy rains. Blast was reported in Nasik district. Attacks of stem-borer, blue beetle and hispa pests were observed in parts of Kolhapur district. In the Marathwada and the Vidarbha, the crop condition was satisfactory. The area and outturn of the crop which were 4,292,500 acres and 1,393,200 tons during 1957-58, were below the corresponding figures of the preceding year, viz. 4,342,600 acres and 1,578,400 tons or by 1.2 and 11.7 per cent respectively.

*Wheat*:—In the Gujarat, the condition of the crop was reported to be satisfactory. In the Maharashtra, the crop was damaged to some extent due to lack of soil moisture in parts of Khandesh district. In other divisions of the State, the crop thrived well except in parts of Vidarbha where it was unsatisfactory due to failure of late rains. Attack of rust was reported from parts of Saurashtra and Kutch and the Marathwada divisions. The area and outturn under the crop, which were 3,634,800 acres and 604,900 tons during the year 1956-57 went down by 16.1 per cent and 18.8 per cent or to 3,050,400 acres and 490,900 tons respectively during the year under report.

*Kharif Jowar* —In the Saurashtra and Kutch, the condition of the crop was not satisfactory for want of rains. Grasshopper trouble was reported from Gohilwad district, while tikka was noticed on the crop in parts of Sorath district. In the Gujarat, the condition of the crop was reported to be poor in many areas due to inadequate rainfall. The crop was resown in parts of Amreli district due to heavy rains. Red rust disease appeared on the crop in parts of Surat district. In the Maharashtra, the crop progressed well except in some areas where the growth was arrested on account of prolonged drought condition. Attack of Grasshopper was reported from Nasik district. In the Marathwada, the crop suffered due to continuous rains in August. In the Bhir district, October rains damaged the crop to some extent. In the Vidarbha, the crop fared well except in some areas where it suffered to some extent, due to break in rains. The area and outturn under the crop which were 9,372,500 acres and 2,169,300 tons during 1956-57 went down by 3.8 and 25.7 per cent respectively or to 9,011,400 acres and 1,612,900 tons during the year under report.

*Rabi Jowar*:—In the Gujarat, due to absence of late rains, sowing of the crop was held up in some areas. The early sown crop was not satisfactory on account of inadequate moisture in the soil. In the Maharashtra, the crop condition was reported to be satisfactory except in parts of Khandesh where the crop failed due to inadequate soil moisture. The crop was, however, resown at places. In the Marathwada and the Vidarbha, the germination and the stand of the crop were reported to be satisfactory. The area and outturn increased from 8,262,800 acres and 1,235,400 tons during the previous year to 8,490,300 acres and 1,658,400 tons during the year under report or by 2·8 and 34·2 per cent, respectively.

*Bajari*:—In the Gujarat, the rainfall was insufficient in some areas which affected the crop yield. The late sown crop suffered due to failure of rains. Stray attack of katra was reported from western parts of Banaskantha district. In the Maharashtra, the crop fared well except in parts of Nasik district where the germination was not satisfactory due to lack of moisture in the soil. Grasshopper trouble was reported from parts of Nasik district. In the Saurashtra and Kutch, the crop was reported to be withering due to long break of rains. Attack of grasshopper was reported from Gohilwad district. In the Marathwada, the crop was affected due to excessive rains in parts and it turned yellow. In the Vidarbha, the germination of the crop was reported to be satisfactory. The crop was late sown in parts of Wardha district due to inadequate soil moisture. The crop suffered to some extent in parts of the division due to untimely rains. Although the total area under the crop during the year 1957-58, viz. 8,599,000 acres was lower than the area of 8,702,500 acres during the previous year or by 1·2 per cent, the outturn went up to 1,085,300 tons in 1957-58 as against 841,200 tons during the preceding year, thus recording an increase of 29·0 per cent.

*Maize*:—In the Saurashtra and Kutch, the crop was reported to be withering for want of rains. In the Gujarat, the crop was attacked by katra and resowing was resorted in parts of Panch Mahals district. Slight attack of caterpillars was also reported from Panch Mahals district, but the damage was negligible. In the Maharashtra, the condition of the crop was reported to be satisfactory. In the Marathwada, the crop suffered to some extent due to continuous rains in August. In the Vidarbha, the sowing was completed under favourable condition and the germination was reported to be satisfactory. The area and outturn of the crop, which were 490,400 acres and 93,400 tons in 1956-57 went up to 553,600 acres and 211,600 tons during 1957-58 or by 12·9 and 126·6 per cent, respectively.

*Ragi*.—In the Gujarat, the absence of rainfall at the time of maturity of the crop resulted in lowering its yield. In the Konkan, the crop progressed well except in parts of Ratnagiri district where the late rains in November adversely affected the crop. Heavy attack of caterpillars was reported from parts of Ratnagiri district. In the Maharashtra, the crop suffered to some extent particularly in Nasik district, due to insufficient rains. Although the area under the crop went up from 743,900 acres during 1956-57 to 782,500 acres during the year under report or by 5.2 per cent, the outturn went down from 228,900 tons in 1956-57 to 215,400 tons during the year under report or by 5.9 per cent.

*Gram*.—In the Gujarat, the crop suffered in growth to some extent on account of lack of soil moisture. Leaf eating caterpillars were noticed in parts of Banaskantha district. In the Maharashtra, the crop suffered on account of prolonged drought. In the Marathwada, the crop fared well. Pod-borer attack was noticed at places in Aurangabad district but it was subsequently brought under control. In the Vidarbha, the crop suffered to a varying extent on account of inadequate rains. The area and outturn of the crop which were 1,645,700 acres and 228,900 tons in 1956-57 went down to 1,214,600 acres and 144,200 tons or by 26.2 and 37.0 per cent, respectively during the year under report.

*Cotton*.—In the Saurashtra and Kutch, the crop suffered to some extent on account of inadequate rains which resulted in lowering its yield. In the Gujarat, the condition of the crop was generally reported to be satisfactory. The crop suffered to some extent on account of inadequacy of soil moisture. Due to peculiar weather conditions, the opening of bolls occurred early in some areas. The crop suffered from root-rot in parts of Baroda, Kaira, Ahmedabad and Sabarkantha districts. The late crop was attacked by spotted and pink boll-worms in the low lying areas of Broach and Baroda districts. Heavy attack of pink boll-worms was reported from Surat district which spoiled the quality of the produce. In the Maharashtra the crop progressed well except in some areas where it received a set back due to prevalence of dry spell. The crop was attacked by aphids and thrips in parts of Poona district. In the Marathwada, the sowing was delayed due to inadequate rains, while the continuous rains in August hampered the agricultural operations and the growth of the crop was arrested. The condition, however, improved to some extent subsequently. Shedding of flowers was reported on account of long spell of hot weather at the fag end in some parts. Boll-worms were noticed on the dry crop, while jassids, aphids and boll-worms were reported on irrigated cotton. Cotton bug and slight attack of wilt were reported from Nanded district. In the Vidarbha, the crop suffered in the

Wet soil area due to absence of rains in October. Dahiya was noticed on the crop in parts of Wardha district. In Yeotmal district, the crop suffered to some extent on account of fog. The area and outturn which were 10,834,800 acres and 2,176,300 bales in 1957-58 were below the corresponding figures of 11,012,000 acres and 2,299,700 bales or by 1.6 and 5.4 per cent, respectively.

16. *Yield per acre.*—During the year under review, Statewise crop estimation surveys were continued on the ten principal crops, viz. paddy, kharif jowar, bajri, wheat, rabi jowar, gram, cotton, tobacco, maize and groundnut, while the survey on ragi was continued in Ratnagiri and Dangs districts and on tur in the districts of the Vidarbha division.

17. *Kharif crops.*—The State as well as the divisionwise average yields per acre of kharif crops based on the crop estimation surveys are given below:—

Division	Yield per acre								
	Rice			Kharif Jowar			Bajri		
	1956-57	1957-58	Percentage increase or decrease	1956-57	1957-58	Percentage increase or decrease	1956-57	1957-58	Percentage increase or decrease
	lb.	lb.		lb.	lb.		lb.	lb.	
Saurashtra and Kutch	733	1152	+ 59.2	182	126	- 30.8	262	301	+ 14.9
Gujarat	689	374	- 45.0	285	215	- 24.6	153	329	+ 115.0
Konkan	1,038	1,146	+ 11.3	640	373	- 41.7	—	—	...
Maharashtra	811	737	- 9.1	770	834	+ 8.3	222	266	+ 19.8
Marathwada	434	395	- 9.0	565	446	- 21.1	159	199	+ 25.2
Vidarbha	873	745	- 15.1	636	431	- 37.2	431	198	- 54.1
State	814	727	- 10.7	518	401	- 22.6	217	283	+ 30.4

From the above table, it is seen that for rice, the average yield at the State level, decreased by 10.7 per cent, going down from 814 lb. in 1956-57 to 727 lb. during the year under report. This decrease was shared by all the divisions except the Saurashtra and Kutch and the Konkan where there was an increase in the average yield

per acre from 793 lb. and 1030 lb. in 1956-57 to 1152 lb. and 1,146 lb. in 1957-58 or by 57.2 per cent and 11.3 per cent, respectively. The average yield per acre of kharif jowar showed a decrease from 518 lb. to 401 lb. or by 22.6 per cent. This decrease was shared by all the divisions except the Maharashtra where the average yield per acre increased by 3.3 per cent or from 770 lb. in 1956-57 to 834 lb. in 1957-58. In the case of bajri, the State average yield recorded an increase of 30.4 per cent it being 283 lb. during 1957-58 as against 217 lb. during the previous year. This increase was shared by all the Bajri growing divisions except the Vidarbha division and was of the order of 14.9, 115.0, 19.8 and 25.2 per cent, respectively. The average yield for the Vidarbha division declined by 54.1 per cent or from 431 lb. during 1956-57 to 198 lb. during the year under review.

The average yield per acre of tur and sesamum (based on annual valuation figures of the Revenue Department, except for tur in respect of the Vidarbha division) for the different divisions of the State are as shown below:—

Division	Yield per acre					
	Tur			Sesamum		
	1956-57	1957-58	Percentage increase or decrease	1956-57	1957-58	Percentage increase or decrease
	lb.	lb.		lb.	lb.	
Saurashtra and Kutch ...	...	...	...	111	114	- 6.3
Gujarat ...	429	355	- 17.2	221	200	- 10.0
Konkan ...	272	238	- 12.5	199	195	- 2.0
Maharashtra ...	558	612	+ 9.7	238	257	- 4.1
Marathwada ...	340	313	- 9.4	178	183	+ 2.8
Vidarbha ...	850	734	- 13.6	197	200	+ 1.5
State ...	563	520	- 7.6	173	171	- 1.2

For tur, the average yield showed a decline of 7.6 per cent, going down from 563 lb. in 1956-57 to 520 lb. during the year under

report. This decrease was shared by the Gujarat, the Konkan, the Marathwada and the Vidarbha divisions, the average yield having gone down from 429 lb., 272 lb., 340 lb. and 850 lb. in 1956-57 to 355 lb., 238 lb., 308 lb. and 734 lb., respectively in 1957-58, or by 17.2, 12.5, 9.4 and 13.6 per cent, respectively. The Maharashtra division, however, recorded an increase from 558 lb. in 1956-57 to 612 lb. during the year under report or by 9.7 per cent. In the case of sesamum, the average yield at the State level showed a slight decrease of 1.2 per cent or from 173 lb. in 1956-57 to 171 lb. in 1957-58. This decrease was noticed mainly in the Saurashtra and Kutch, the Gujarat and the Maharashtra and was of the order of 6.3, 10.0 and 4.1 per cent, respectively. The Marathwada and the Vidarbha, however, recorded an increase of 2.8 and 1.5 per cent, respectively, or from 178 lb. and 197 lb. in 1956-57 to 183 lb. and 200 lb. during the year under report.

18. *Rabi crops*.—The State and the divisionwise average yield per acre of the rabi crops (based on crop estimation surveys) are as under:—

Division	Yield per acre					
	Wheat			Rabi jowar		
	1956-57	1957-58	Percentage increase or decrease	1956-57	1957-58	Percentage increase or decrease
	lb.	lb.		lb.	lb.	
Saurashtra and Kutch ...	750	663	- 11.6	376	549	+ 46.0
Gujarat ...	370	400	+ 8.1	429	489	+ 14.0
Maharashtra ...	287	370	+ 28.9	300	404	+ 34.7
Marathwada ...	267	323	+ 21.0	402	499	+ 24.1
Vidarbha ...	370	230	- 37.8	322	437	+ 35.7
State ...	373	360	- 3.5	335	438	+ 30.7

From the above table, it is seen that for the year 1957-58, the State average yield per acre of wheat went down by 3.5 per cent or from 373 lb. in 1956-57 to 360 lb. during 1957-58. The decrease was noticed mainly in the Saurashtra and Kutch, and the Vidarbha divisions, it being of the order of 11.6 and 37.8 per cent, or from

750 lb. and 370 lb. in 1953-57 to 663 lb. and 230 lb., respectively, during the year under report. The Gujarat, the Maharashtra and the Marathwada divisions, however, recorded an increase of 8.1, 28.9 and 21.0 per cent or from 370 lb., 237 lb. and 267 lb. in 1956-57 to 403 lb., 370 lb. and 323 lb., respectively during the year under review. For rabi jowar, the average yield per acre at the State level recorded an increase of 30.7 per cent, it being 433 lb. during 1957-58 as against 335 lb. in 1956-57. The significant increase was shared by all the divisions especially by the Saurashtra and Kutch, the Maharashtra and the Vidarbha divisions, where it went up by 46.0, 34.7 and 35.7 per cent, respectively or from 376 lb., 300 lb. and 322 lb. in 1956-57 to 549 lb., 404 lb. and 437 lb. during the year under report.

The average yield per acre of rabi crops, viz. gram (based on crop estimation surveys), linseed, rape and mustard (based on the annual valuation figures of the Revenue Department) for the six divisions of the State are given below:—

Division	Yield per acre								
	Gram			Linseed			Rape and Mustard		
	1956-57	1957-58	Percentage increase or decrease	1956-57	1957-58	Percentage increase or decrease	1956-57	1957-58	Percentage increase or decrease
	lb.	lb.		lb.	lb.		lb.	lb.	
Saurashtra and Kutch.	263	170	- 35.4	204	...	...	240	129	- 46.2
Gujarat	... 364	274	- 24.7	...	...	...	413	373	- 9.7
Konkan	... 280	224	- 20.0	...	...	...	...	...	...
Maharashtra...	309	275	- 11.0	228	242	+ 6.1	302	157	- 48.0
Marathwada	... 235	284	- 0.4	183	192	+ 2.1	140	178	+ 27.1
Vidarbha	... 335	217	- 35.2	187	202	+ 8.0	398	420	+ 6.3
State	... 312	266	- 14.7	189	199	+ 5.3	395	316	- 20.0

For gram, the average yield for the State went down from 312 lb. to 266 lb. in 1957-58, or by 14.7 per cent. The decrease was noticed in all the divisions particularly in the Saurashtra and

Kutch, the Gujarat, the Konkan and the Vidarbha divisions, the average yield going down from 263 lb., 364 lb., 280 lb. and 335 lb. in 1956-57 to 170 lb., 274 lb., 224 lb. and 217 lb. during 1957-58 or by 35.4, 24.7, 20.0 and 35.2 per cent, respectively.

In the case of linseed, the average yield per acre recorded an increase of 5.3 per cent or from 189 lb. during the preceding year to 199 lb. during the year under report. The average yield of rape and mustard went down by 20.0 per cent or from 395 lb. to 316 lb. in 1957-58. This decrease was shared mainly by the Saurashtra and Kutch, the Gujarat and the Maharashtra divisions where the average yield went down by 46.2, 9.7 and 48.0 per cent or from 240 lb., 413 lb. and 302 lb. in 1956-57 to 129 lb., 373 lb. and 157 lb., respectively during 1957-58, while the Marathwada and the Vidarbha showed an increase of 27.1 and 6.3 per cent, or from 140 lb. and 398 lb. in 1956-57 to 178 lb. and 420 lb. in 1957-58, respectively.

19. *Cotton, sugarcane and tobacco.*—The table below gives the average yield per acre of cotton (lint) (based on crop estimation surveys), sugarcane (gul) (based on anna-valuation figures of the Revenue Department) and tobacco (based partly on crop estimation surveys in the major crop growing districts and partly on anna-valuation figures of the Revenue Department):—

Division	Yield per acre								
	Cotton			Sugarcane			Tobacco		
	1956-57	1957-58	Percentage increase or decrease	1956-57	1957-58	Percentage increase or decrease	1956-57	1957-58	Percentage increase or decrease
	lb. (Lint)	lb. (Lint)		lb. (Gul)	lb. (Gul)		lb. (Dryleaf)	lb. (Dryleaf)	
Saurashtra and Kutch	111	75	- 32.4	4,980	5,181	+ 6.2	...	...	...
Gujarat	81	78	- 3.7	4,662	4,742	+ 1.7	641	389	- 39.3
Konkan	...	...	...	2,240	2,240	...	...	...	...
Maharashtra	98	119	+ 21.7	7,498	7,527	+ 3.8	409	496	+ 21.3
Marathwada	47	62	+ 31.9	3,809	3,969	+ 4.2	560	373	- 33.4
Vidarbha	83	80	- 3.6	2,775	2,823	+ 1.7	448	353	- 21.2
State	82	79	- 3.6	6,594	6,700	+ 1.6	576	415	- 23.0

The average yield of cotton (lint) for the State was 79 lb. as against 82 lb during the previous year, thus showing a decline of 3.6 per cent. The average yield went down in the Saurashtra and Kutch, the Gujarat and the Vidarbha divisions by 32.4, 3.7 and 3.6 per cent or from 111 lb., 81 lb. and 83 lb. in 1956-57 to 75 lb., 78 lb. and 80 lb., respectively during 1957-58. The Maharashtra and the Marathwada divisions, however, showed an increase from 98 lb. and 47 lb. during 1956-57 to 119 lb. and 62 lb. during the year under report or by 21.7 and 31.9 per cent, respectively. The State average yield per acre of sugarcane was 6,700 lb. (gul) in 1957-58 as against 6,594 lb. (gul) during 1956-57 showing a slight increase of 1.6 per cent. All the divisions of the State contributed towards the increase. The average yield of tobacco (dry leaf) decreased by 28.0 per cent or from 576 lb. in 1956-57 to 415 lb. during the year under report. The decrease was shared by all the divisions except the Maharashtra where it showed an increase from 409 lb. to 496 lb. during the year under report or by 21.3 per cent.

20. *Cotton*.—During the year under report, the total area and outturn of cotton were 10,835 thousand acres and 2,176 thousand bales as against 11,012 thousand acres and 2,300 thousand bales during the preceding year. Thus, there was a decrease of 1.6 per cent and 5.4 per cent in the area and the outturn respectively.

The table below gives the total area and outturn of cotton according to different divisions in the State during 1956-57 and 1957-58 :—

(Area and outturn figures in thousands)

Division	Area in acres			Outturn in bales of 992 lb. each-		
	1956-57	1957-58	Percentage increase or decrease	1956-57	1957-58	Percentage increase or decrease
Saurashtra and Kutch	1,607	1,578	- 1.8	437	301	- 31.1
Gujarat	2,930	2,972	+ 1.4	606	501	- 17.5
Maharashtra	1,112	911	- 18.0	277	276	- 0.4
Marathwada	1,934	1,863	- 3.7	233	201	- 14.1
Vidarbha	3,429	3,511	+ 2.4	727	715	- 1.7
State	11,012	10,835	- 1.6	2,300	2,176	- 5.4

## CHAPTER VI—PRICES

(Table VI Pages 333-351)

(Summary Table F 46)

21. Table VI of the report gives the average prices during the harvest period of the principal crops in different districts. The prices of agricultural produce ruled higher during the year under report in comparison with those of the preceding year.

22. The major variations, in the average harvest prices of the principal commodities at the State level and in different divisions as compared with the prices during corresponding period of the previous year (i. e. 1956-57), are summarised below :—

At the State level, the prices of rice (paddy), viz. Rs. 14.17 per maund of 82, 2/7 lbs. as higher by 7.3 per cent than that of the previous year. The price went up by 23.5, 7.4 and 8.1 per cent in the Gujarat, the Konkan and the Vidarbha divisions respectively, while it declined by 3.4, 3.7, and 5.4 per cent in the Saurashtra and Kutch, the Maharashtra and Marathwada divisions respectively. The price of wheat, viz. Rs. 19.32 per maund was higher by 4.8 per cent than that of the preceding year at the State level. The upward trend was noticed in all the divisions. In the Saurashtra and Kutch, the Gujarat, the Maharashtra, the Marathwada and the Vidarbha it rose by 5.7, 2.8, 5.1, 8.6, and 2.0 per cent respectively when compared with that of the previous year. The price of Rs. 12.13 per maund of jowar was lower by 9.2 per cent. The decline in price was noticed in all the divisions except the Saurashtra and Kutch (where it slightly rose by 0.6 per cent) and was of the order of 3.8, 10.7, 13.0 and 4.4 per cent in the Gujarat, the Maharashtra, the Marathwada and the Vidarbha respectively. At the State level, the price of Rs. 15.28 per maund of bajri was lower by 5.2 per cent as compared with that of the previous year. The decline in price was noticed in almost all the divisions except the Saurashtra and Kutch where it rose by 3.4 per cent. In the remaining divisions of the Gujarat, the Maharashtra, the Marathwada, and the Vidarbha, the decline was of the order of 4.7, 5.5, 11.1 and 2.0 per cent, respectively. The average price of barley, viz. Rs. 13.35 per maund at the State level ruled higher by 21.8 per cent than that of the preceding year. The price was higher by 45.9 and 5.4 per cent in the Saurashtra and Kutch and Gujarat divisions respectively. The average price of ragi (nachani), viz. Rs. 12.27 was lower than that of the previous year by 3.9 per cent at the State level. It decreased by 9.7 and 3.2 per cent in the Konkan and the Maharashtra respectively, while it increased by 16.6 per cent in the Gujarat division. The price of maize, viz. Rs. 13.01 per maund was lower by 6.7 per cent at the State level. It went down by 4.5, 7.8, 25.8 and 17.4 per cent in the Saurashtra and Kutch, the Gujarat, the Marathwada and the Vidarbha respectively. It

went up by 4.4 per cent in the Maharashtra division. The price of kodra, viz. Rs. 9.16 per maund was higher by 21.8 per cent at the State level. The increase of 27.7 per cent was noticed in the Gujarat, while a decline by 20.8 and 23.0 per cent was noticed in the Marathwada and the Vidarbha respectively. Among pulses, the average price of Rs. 20.12 per maund of the tur dal at the State level was higher by 15.4 per cent. The increase was of the order of 0.9, 32.4, 18.5 per cent in the Gujarat, the Maharashtra and the Marathwada respectively. It went down by 1.8 per cent in the Vidarbha division. The price of gram, viz. Rs. 14.51 per maund was higher by 6.8 per cent. It went up by 18.1, 3.5, 6.2 and 6.7 per cent in the Saurashtra and Kutch, the Gujarat, the Maharashtra and Marathwada respectively. It declined by 9.0 per cent in the Vidarbha division. The average price of gol, viz. Rs. 14.71 per maund was higher by 6.6 per cent at the State level. It went up by 1.0, 13.4, 7.7, 7.1 and 0.8 per cent in the Saurashtra and Kutch, the Gujarat, the Maharashtra, the Marathwada and the Vidarbha respectively. The average price of groundnut at the State level, viz. Rs. 16.71 per maund was higher by 2.6 per cent than that of the previous year. It was higher by 4.9, 8.2, 2.8, and 8.2 per cent in the Gujarat, the Maharashtra, the Marathwada and the Vidarbha respectively. It declined by 2.1 per cent in the Saurashtra and Kutch. The price of Rs. 51.43 per maund of tobacco was higher by 34.7 per cent at the State level as compared with that of the previous year. The price increased by 65.9 and 164.2 per cent in the Gujarat, and Marathwada respectively. The average price of cotton (kapas) of Rs. 33.14 per maund was higher by 7.2 per cent at the State level. The increase in price was noticed in all the divisions and was of the order of 17.2, 5.2, 24.1, 11.9 and 0.6 per cent in the Saurashtra and Kutch, the Gujarat, the Maharashtra, the Marathwada and the Vidarbha respectively.

23. The table below compares the prices of Vijay and Virnar cotton ruling at Bombay during the year under review with those of the preceding year and the average of the five years ending 1955-56:—

Variety of Cotton	Prices per Khandi of 784 lb.			Variation	
	Average of the five years ending 1956	1957	1958	Compared with the average price	Compared with the price of 1957
	Rs.	Rs.	Rs.	Per cent	Per cent
Vijay ...	929	969	900	- 3.1	- 7.1
Virnar ...	821	820	774	- 5.7	- 5.6

In September 1957, in view of the unfavourable weather reports, the prices rose during the first fortnight; but thereafter drifted lower, on rejection of the plea for a reduction in excise duties on cloth, accumulation of cloth stocks and credit stringency. However, prices rose again by the end of the month due to unfavourable crop reports and delay in the movement of new crop owing to heavy rains in Khandesh and Vidarbha. During October, due to improved demand from the spinners in view of depleted stocks and the announcement of an export quota, the contract moved up. Due to revival of demand on expectation of a reduction of sales tax, possibly also of the excise duty on cloth and of an export quota, values spurted up towards the end of the November. During December, increasing arrivals at terminal markets, lack of support from mills and investors, sluggish conditions in the textiles and financial stringency were the main factors which caused a sharp setback in the prices, in the second week of the month. Due to inclement weather and fears of damage to the crop in the Saurashtra and the Gujarat, the contract moved up by the end of the month. Due to heavy arrivals at terminal markets, value eased back in the beginning of the month of January 1958; but on account of steady improvement in the off-take of cloth, encouraging up-country advices and marked rise in prices of cotton on Broach line; a firm trend prevailed. During February, due to heavy arrivals of new crop, limited demand from spinners, reports of accumulation of cotton stocks, the contract gradually drifted lower. The down-trend was, however, checked due to expectation of reduction of export duty. During March, after the announcement by the Prime Minister, of reduction in the excise duties on coarse, medium and super fine cloth and power-looms which brightened hopes of better off-take in cloth and consequent revival of mill demand, the maturing contract March delivery, spurted up on the 24th, but on the last trading day the 25th again declined. During April, may contract slipped back. On expectation of release of export quota, a mild recovery was noticed. Prices were, however, not sustained due to heavy arrivals of new crop in up-country markets, heavy accumulation of stocks in the Saurashtra and the Gujarat regions and consequent fall in interior markets, absence of any relief in the form of export quota coupled with proximity of the delivery period. These resulted in the slumping down of the contract on the 28th. However, on reports that if the relief in excise duty did not result in clearance of accumulated cotton cloth stocks Government would seriously think of other steps, prices improved and continued to rule higher as will be evinced from the trend of prices in the sub-joined table, wherein the prices of Virnar fine and Vijay fine ruling at Bombay have been given for those months for which prices were available.

## CHAPTER VII—AGRICULTURAL WAGES

(Table VII—Pages 352-375)

(Summary Table G—Page 47)

24. In this State, according to the Manual of Revenue Accounts, agricultural labour is classified under three categories, viz., (a) skilled, (b) ordinary, and (c) field labour. Skilled labour comprises of carpenters, black-smiths and cobblers, ordinary labour consists of load-carrying coolies, well-diggers, mason's or carpenter's assistants, earth workers, etc. while field labour comprises of ploughmen, sowers, reapers, harvesters, weeders and transplinters, etc. In the report (in table VII-Agricultural Wages) in addition to the above

three categories, one more category is added, viz. herdsmen, whose main work is to collect livestock from different owners and to feed them in the jungle during the day and to bring them back in the evening to the owner's places.

25. Table VII of the report gives districtwise figures of wages of different classes of agricultural labour. Perusal of summary table 'G' shows that during the year 1957-58, the average rates of wages of carpenters showed a slight rise from Rs. 3.45 during the preceding year to Rs. 3.52 during the year under report, that of black-smiths from Rs. 3.23 to Rs. 3.28, of field labours from Rs. 1.41 to Rs. 1.42; while those of herdsmen showed a slight decline from Rs. 1.9 to Rs. 1.2. The wages of cobblers and other agricultural labour remained stationery and were Rs. 2.74 and 1.27 respectively.

## CHAPTER VIII—AGRICULTURAL STOCK

(Table VIII—Pages 373-387)

(Summary Table H—Page 48-49)

26. Table VIII of this report gives the details of livestock, poultry and agricultural machinery and implements as per quinquennial census of livestock conducted in April, 1956, by the Director, Bureau of Economics and Statistics. The comments on the variation in the livestock numbers during the two quinquennia are based on the note sent by the Director, Bureau of Economics and Statistics. Summary Table H gives the total number of livestock, poultry, agricultural machinery and implements, under each main head.

*Cattle.*—There is a slight increase in the number of cattle from 18,954,675 to 20,211,190 or by 6.6 per cent over that of the preceding quinquennial census of livestock taken in May, 1951. The number of breeding bulls over three years went down by 37.0 per cent. This decline was due to the general tendency to utilise the bulls kept for breeding purposes, for other work also. It is, therefore, likely that a substantial number of the breeding bulls might have been enumerated as "working bulls" and consequently included in that category. On the other hand, the number of 'other males over three years' recorded a slight increase of 7.5 per cent. The number of breeding cows over three years recorded an increase by 3.4 per cent, while the number of other cows over three years went down by 50.9 per cent. It will be seen from the foot-

note given below Table VIII that the number of breeding cows in columns 5 and 11 relates to the cows in milk, dry cows and also cows not calved. The number of young stock showed an increase of 16.3 per cent over that of 1950-51.

*Buffaloes.*—The total number of buffaloes increased from 5,146,389 to 5,327,709 or by 3.5 per cent over that of 1950-51. The number of breeding bulls over three years as also the number of other males over three years declined by 9.2 and 9.4 per cent respectively. The number of breeding cows over three years recorded a decrease of 3.0 per cent while the number of 'other cows over three years' increased by 27.2 per cent. The number of young stock, recorded an increase of 16.3 per cent. There had been reports that the people engaged in milk trade resorted to killing the young stock, as the rearing of the calves proved uneconomic. Government have, therefore, taken steps by instituting calf rearing units. As a result, the survival rate of the young stock has considerably increased as evinced at the time at the 1956 census, which speaks for the increase noticed.

*Sheep and Goats.*—The number of sheep increased by 1.8 per cent and that of goats by 17.3 per cent as compared with the corresponding numbers of the year 1950-51.

*Horses and Ponies.*—The total number of horses and ponies remained practically the same as that of the year 1950-51.

The number of mules went down by 68.7 per cent and that of donkeys, camels and pigs showed a rise of 1.2, 15.7 and 27.4 per cent respectively.

The total number of livestock recorded an increase of 7.7 per cent over that of the year 1950-51.

*Poultry.*—The total number of poultry showed an increase of 47.1 per cent. The increase in the number of poultry is principally due to the mass vaccination programme launched by the Veterinary Department.

*Agricultural Machinery and Implements.*—The number of tractors, electric pumps, oil engines, ploughs, carts and ghanies showed an increase of 175.2, 73.8, 55.0, 19.8, 5.2 and 10.2 per cent respectively, while that of sugarcane crushers declined by 4.2 per cent when compared with the corresponding figures of the 1951 census.

---

## CHAPTER IX—AGRICULTURAL OUTLOOK

27. As mentioned in Chapter I of the report, the season under review was unsatisfactory over large part of the State and judged

by crop production, it was less satisfactory than the preceding one. The monsoon set in in time and substantial and widespread rains were recorded during July and August. The prolonged drought that prevailed during the subsequent months of September and October, however, arrested the growth of standing crops and caused reduction in the crop yields and also caused scarcity of water supply and fodder in some areas.

28. The table below compares for the years 1956-57 and 1957-58 the actual acreage sown and the outturn of foodgrain crops produced in the State and its different divisions.

(Figures in thousands)

Division	Area in acres		Outturn in tons	
	1956-57	1957-58	1956-57	1957-58
Saurashtra and Kutch	5,237	4,731	621	553
Gujarat	7,745	7,103	1,331	-1,200
Konkan	1,576	1,562	591	637
Maharashtra	14,411	14,395	2,288	2,653
Marathwada	8,219	8,060	1,335	1,342
Vidarbha	7,331	7,213	1,953	1,449
State	44,519	43,067	8,119	7,834

29. It will be seen from the above table that the area under foodgrain crops has gone down from 44,519 thousand acres during the year 1956-57 to 43,067 thousand acres during the year under report. This decrease has been shared by all the divisions. The outturn of foodgrain crops, at the State level, also shows reduction, having declined from 8,119 thousand tons during the year 1956-57 to 7,834 thousand tons during the year under report. This decrease was mainly noticed in the Vidarbha division where it went down from 1,953 thousand tons in the preceding year to 1,449 thousand tons during the year under report. A decrease to some extent was also noticed in the divisions of the Saurashtra and Kutch and the Gujarat, while it showed a slight rise in the divisions of the Konkan, the Maharashtra and the Marathwada. Measures such as grant of *tagai* loans for the construction and repairs to wells, distribution of improved seeds and manures, adoption of improved cultivation and plant protection practices

etc. by the cultivators in general contributed towards relieving the situation caused by the natural calamities. The prices of rice and wheat ruled slightly higher over those of the preceding year, while those of jowar and bajra showed a downward trend. The development projects continued to function in several National Extension Blocks during the year under review and proved to be beneficial to the masses in the rural areas.

30. The condition of cattle on the whole was somewhat satisfactory. However, scarcity of water supply and fodder was experienced in parts of the State. There were also outbreaks of cattle diseases such as foot and mouth, black-quarter, rinderpest, haemorrhagic septicæmia, etc. in the affected areas. There were also outbreaks of influenza, cholera, small-pox, etc. in parts of the State; but these too were brought under control by taking prompt remedial and preventive measures in the affected areas. Prevalence of these epidemics and epizooties, however, did not impede the progress of the agricultural operation to any considerably large extent.

31. The table below gives the average prices of agricultural commodities prevailing at harvest time for the years from 1953-54 to 1957-58 :—

(Prices are in rupees per maund of 3,200 tolas except cotton, the prices of which are recorded in rupees per Khandi of 784 lbs.)

Commodity	Centre	1953-54	1954-55	1955-56	1956-57	1957-58
		Rs. nP.	Rs. nP.	Rs. nP.	Rs. nP.	Rs. nP.
<b>A. Food Crops.—</b>						
Jowar ...	1. Sholapur ...	12.19	5.69	12.00	15.12	11.93
	2. Akola ...	—	—	10.10	11.95	11.30

Note.—Dashes indicate that the prices are not available.

The centres mentioned in the table are the representative markets and accordingly the prices of agricultural produce in these markets indicate the general trend in the fluctuations of prices of the commodities in the State.

---

## CHAPTER X—CONDITIONS OF AGRICULTURAL POPULATION

The unfavourable seasonal conditions described in Chapter I of the report resulted in reduced yields of certain crops and created scarcity conditions in certain areas. The cost of living, in general, continued to remain at the higher level all over the State. The benefits that should have accrued as a result of high prices of agricultural commodities were, however, to a certain extent off-set by the increased cost of cultivation resulting from the high cost of labour, high price of agricultural cattle, implements and also of other necessities of life. There was dearth of labour in some areas owing to the labour migrating to industrial towns, factory areas and to the construction works in operation which fetched higher wages. Efforts were continued for the successful implementation of the Five Year Plan and the beneficial results so far achieved have been encouraging. On the other hand due to failure of rains, scarcity was declared in Okhamandal taluka in Amreli district, Mahuwa taluka in Bhavnagar district and in a few villages in Jalgaon and Khamgaon talukas of Buldana district. Work was provided by Government to the scarcity affected persons in these areas, by way of relief. Condition akin to scarcity also prevailed in parts of Panch Mahals and Baroda districts, due to drought and relief measures by way of advancing Tagavi loans for seed purposes and opening relief work affording seasonal employment, to help the poor and deserving cultivators, were taken by Government in the affected areas. Owing to failure of Kharif crops in some parts of Chanda district, land revenue amount Rs. 22,083 of 1st Kist was suspended under Government orders. The Bombay Money Lenders' Act and the Bombay Agricultural Debtors' Relief Act in operation also gave protection to the cultivators from the usurious practices of private money lenders. The Bombay Tenancy and Agricultural Lands Act, helped to improve the lot of the tenant class.

## SUMMARY TABLE A

## CLASSIFICATION OF AREA

(Figures in hundreds)

Heads of classification	1956-57		1957-58		Percentage increase or decrease
	Area in Acres	Percentage to total	Area in Acres	Percentage to total	
Total area (by village papers) ...	1,211,982	...	1,213,111	...	+0.1
Forests ...	158,087	13.0	153,263	13.0	+0.2
Barren and unculturable land ...	170,710	14.1	170,207	14.0	-0.3
Land put to non-agricultural uses.	21,887	1.8	22,893	1.9	+4.6
Culturable waste ...	35,040	2.9	34,114	2.8	-2.6
Permanent pastures and other grazing lands.	60,095	5.0	61,443	5.1	+2.2
Land under miscellaneous tree crops and groves not included in area sown.	17,122	1.4	16,610	1.4	-3.0
Current fallows ...	35,203	2.9	39,700	3.3	+12.3
Other fallows ...	41,537	3.4	42,734	3.5	+2.7
Net area sown ...	672,251	55.5	637,142	53.0	-6.3
Area sown more than once ...	31,364	2.6	26,332	2.2	-15.9
Total sown area ...	703,615	58.2	663,524	55.3	-11.4

*Notes.*—The geographical area and area under "forests" during 1956-57 published in the Season and Crop Report of 1956-57, has been modified as subsequently area under Forests, under the Forests Department in Sorath district was reported.

## SUMMARY TABLE B

SOURCES OF WATER SUPPLY AND THE AREA IRRIGATED  
THEREFROM IN THE BOMBAY STATE DURING 1957-58

SUMMARY TABLE E—*contd.*

[Outturn figures in hundreds]

Crops	1956-57		1957-58	
	Average yield in lbs. /acre	Total outturn in tons	Average yield in lbs. /acre	Total outturn in tons.
Cotton (lint) ...	82	22,997 (Bales)	79	21,763* (Bales)
Groundnut ...	623	16,240	588	14,846*
Sesamum ...	173	530	171	503
Rape ...	408	233	332	100
Mustard ...	350	60	294	64
Linseed ...	189	563	109	553
Castor ...	271	367	282	261
Tobacco ...	576	682	415	413†

\* These outturn estimates are entirely based on the results of Crop estimation surveys conducted in the year 1957-58.

† These outturn estimates are obtained by using the results of Crop Estimation Survey for districts mentioned below against each crop; the anna valuation and the Standard Normal yield reported by the Collector being used in the case of the remaining districts.

Maize—All Gujarat Districts.

Ragi—Ratnagiri and Dangs Districts.

Tur—All Vidarbha districts.

Tobacco—All Gujarat districts and South Satara and Kolhapur Districts.
