CHAPTER - I

INTRODUCTION

LOCATION:

1.1 Ratnagiri District is a part of Konkan strip running north to south along the western coast of India and lies between $15^{\circ}36'$ to $18^{\circ}50'$ north latitude and $73^{\circ}50'$ to $74^{\circ}36'$ east longitude. The district has a north south length of about 288 km. and average eastwest extension is about 64 km. except in its extremities, which taper to join the coast line. It has a coast line of about 320 km.

BOUNDARIES:

1.2 The district is surrounded by Sahyadri hills and beyond this, Satara and Kolhapur Districts^{are} in the east, Kolaba District in the north, Arabian Sea in the West and Goa in the south.

TOPOGRAPHY:

1.3 Considering the Physical features, the district can be divided into three parts (i) Hilly area of the Sahyadri and its off shoots (ii) the plateau surfaces which are used for cereal crops like rice and ragi (iii) Coastal plains where coconut and arecanut gardens and fishing are the main sources of livelihood.

HILLS AND RIVERS:

1.4 Over 85 percent of the land surface in Ratnagiri District is hilly. The main range of the Sahyadri consisting of steep and forbidding scraps' forms the eastern boundary of the district. In the centre are the transverse chains of small hills which project from the main range and develop higher elevations in the middle portion, where they are parallel to each other and as a result the numerous streams which flow through the valleys have formed parallel drainage pattern. On the slopes of these hills rice and workas lands are situated. The rivers originate from the Sahyadri ranges and have reached their base level of erosion withi

a distance of 20 km. All the 14 rivers in the district flow from east to west to join the Arabian Sea. Out of these, the more important are i) Savitri forms natural boundary between Ratnagiri and Kolaba districts and is navigable about 35 Km. in Ratnagiri Dist. ii) Vashisthi with a length of about 48 km. is navigable upto 40 kms. iii) Jagbudi is more than 40 kms. long. The length of iv) Shastri and v) Ratnagiri is 64 kms. each. Besides these, there are other rivers namely i) Bav, ii) Muchakundi, iii) Jaitapur, iv) Vaghotan, v) Devgad, vi) Achara, vii) Kalawali, viii) Karli, ix) Terekhol. Most of the rivers receive their water from the Sahyadri main range. In length they seldom exceed 64 km. Their intensely seasonal regime is yet another limitation to their economic use. Parts of these rivers are tidal. In addition to these main rivers, the district has numerous small creeks and back waters all along the coast line. Important creeks are Kelshi, Ade, Kalhadevi, Rddi, Palshet and Borya. All these creeks afford anchorage to small crafts in fair weather and have a local importance in trade and fishing.

SOIL:

1.5 The predominant soils in the district are laterite soils which vary in colours from bright red to brownish red owing to the preponderance of hydrated iron oxides. They are always acidic and fairly well supplied with nitrogen and organic matter. Their texture is loamy and depth varies from one foot to three feet. They are porous not retentive of moisture and are found all over the district except in Mandangad Tahsil. The soils are found in several grades. The main grades are i) Soils useful for paddy cultivation, ii) Workas soils useful for Cashewnuts, Mangoes and ragi cultivation, iii) Soils useful for coconut, iv) Coastal alluvial useful for coconut and arecanut gardens v) Salty lands locally known as Khar or Khajan.

CLIMATE:

1.6 The climate of the district is generally moderate. There are three seasons viz. i) Summer (March to May), ii) Monsoon (June to October) and iii) Winter (November to February). Being a coastal district, the variation in temperature during the day and through the seasons is not large. Maximum temperature at the coast rarely goes beyond 38°C. and in the interior it seldom crosses 40°C. Owing to the proximity of the sea, the district is very humid and the relative humidity seldom goes below 50 percent.

RAINFALL:

1.7 Rainfall is not uniform in all parts of the district. It increases rapidly from the coast towards the Western Ghats on the eastern border of the district. In and near the Ghats rainfall is very heavy. Amboli gets the heaviest rainfall in the district. Practically the entire annual rainfall occurs during the months from June to October. July is the month of heaviest rainfall. During the year 1977 and 1978, maximum rainfall of 4520 mm. and 4925 mm. respectively was recorded ^{at} Sawantwadi only. Comparatively the rainfall was better during the year 1978 as against 1977. All the tahsils except Malwan were having rainfall above 3000 mm. during the year 1978. But during 1977, there were only eight Tahsils viz. Dapoli, Mandangad, Khed, Chiplun, Sangameshwar, Lanja, Kankawali, Sawantwadi/^{having rainfall} more than 3000 mm.

AREA:

1.8 The total geographical area of the district is 13,040 sq. kms. The district stands tenth in area in Maharashtra State. Considering area covered by tahsils, Sawantwadi tahsil has got the maximum area (1336.2 sq. km.) in the district. While Vengurla Tahsil has the minimum area (327.9 sq. km.).

FOREST:

1.9 Total area under forests in the district is 45.49 sq. kms. out of this 28.79 sq. km. is maintained by Revenue Authorities and the rest of the area is under the control of Forest Department. Out of the total forest area, 49.52 sq.kms. area is reserved and the rest of the area is unclassified.

MINERAL:

1.10 Ratnagiri district is endowed with different types of minerals of economic importance. Manganese and Iron ores are found in the southern part of Ratnagiri district at Redi, Banda, Tirawade, Aros etc. Chromite occurs at Kankawali, Wagde and Janavali in Kankawali tahsil. The reserves of chromite in Ratnagiri district are more than 70,000 M. Tonnes. Ilmenite is found in the beach sands stretching about 40 kms. from Purnagad to Malgund near Ratnagiri. Ilmenite is an ore of Titanium metal, Ratnagiri district is also blessed with huge deposits of silica sand and annually thousands of tonnes of silica sand is being despatched to places like Bombay, Pune, Kolhapur, Belgaon, Ichalkarnji etc. There are many good deposits of clay in the district. There are also occurrences of Mica, Felspar, Steatite, Quartz, mineral pigments such as copper, asbestos, limestone, clay, glass sand, building stones, salt etc. and radio active minerals like uranium oxide in some parts of Ratnagiri District.

POPULATION:

1.11 Total population of the district as per 1971 census is 19,90,583 (8,86,995 males and 11,03,588 females). The density of population per sq. km. is 153 as against 164 for Maharashtra State. According to population the district ranks ninth in Maharashtra State. Within the tahsils, the density of population per sq. km. ranges from 257 (Vengurla Tahsil) to 115 (Sawantwadi tahsil). As far as Urban towns are concerned, the density varies from 3,580

(Ratnagiri town) to 250 (Shirgaon town in Chiplun Tahsil). The average density for the district is 1,085. Tahsils viz. Gubagar, Mandangad, Sangameshwar, Lanja, Kantawali, Kudal and Davgad have no urban area. In rural areas the density of population varies from 219 (Vengurla tahsil) to 103 (Sawantwadi tahsil). The average rural density of population for the district is 142 per sq. km.

1.12 Number of females per 1,000 males (i.e. sex ratio) is higher in Ratnagiri district, than the state average, of 930. Similar is the position in Rural and Urban areas. The percentage of Urban population to the total population, is 8.40 which is lowest in Maharashtra State. It may be due to the fact that very little attention is given towards urbanisation of this district. Besides, the continuous migration from this district to the cities like Bombay is the main cause of low Urbanisation as well as abnormal sex ratio. Migration has also affected the growth rate of population of the district as will be seen from the last two decadal variations viz. 1951-61 and 1961-71 which are 6.73 and 8.94. These decadal variations are the lowest in the State of Maharashtra. Corresponding decadal variations for Maharashtra State are 23.60 and 27.45 respectively.

LITERACY:

1.13 The percentage of literacy has gone up from 28.5 in 1961 to 39.6 in 1971. The rate of increase in percentage of literates is more or less the same in respect of males and females, rural and Urban. As far as the religious composition is concerned, the population covers 87% Hindus, 6.3% Muslims and 5.6% Budhists (including Neo Budhist). The percentage of schedule caste and schedule tribes to total population comes to 2.7 as against 11.9 percent in Maharashtra State.

AGRO INDUSTRIES:

1.14 Agricultural products in Ratnagiri district are paddy, Nagli, Oilseeds, Ground-nut, Sugar Cane, Cashewnuts, Coconut, Mango

Betelnut and Kokam Products of economic importance are paddy, mango, Cashewnut, Coconut, betelnut and kokam. In addition to this, Major forest products are Bombao, Hirda, Timber Wood, Kattachi (Kat), grass and other Ayurvedic Vanaspaties, Ratnagiri being a hilly district, land useful for cultivation is comparatively less.

1.15 Ratnagiri district is famous for its quality mangoes. Best quality is known as Alphanso. This is seasonal product and its yield per annum is estimated at 23 thousand tonnes. It gives a seasonal employment to local people, such as collect-ion of mangoes, preparation of wooden boxes, marketing and transporation. Raw as well as canned mangoes are being exported in substantial Quantity. There are about 49 canning units engaged in production of canned mangoes, pickles and chatanis.

1.16 Other important agricultural products are coconut and betelnuts. Industries based on this are 1) Selling of green coconut dried coconut and betelnuts. 2) Coir industries manufacturing coir rope, mattings and carpets. Coconut coir is an important raw material for the coir industry. There were 3 coir units functioning at Walawal, Vengurla and Aronda in this district upto 1978-79.

Cashewnut from this district fetches foreign exchange. There are 21 cashewnut factories in the district. Systematic Cashewnut plantation has been taken up by Govt. recently and yield is expected to increase in the near future. Kokam fruits are also collected seasonally and processed in canning factories.

1.17 Paddy straw is useful for manufacturing paper and board. Recently five units have come up in the district.

1.18 Plantation of Citrenella has been tried at some places and two units are already under trial for manufacturing Citrenella oil. At present there are 66 saw mills which are registered under S.S.I. rules in the district. There are eight Agricultural tool manufacturing units at Sawantwadi.

SPECIAL
FEATURES:

- 1.19 Ratnagiri is one of the marine districts of the State. The coast length is about 320 km. which is more than half of the coastal length of Maharashtra State. The sea water is rich in prawns. About 1350 M.Tonnes of prawns are exported abroad Annually.
- ii. Mangoes and cashewnuts are important cash crops of this district. They are exported abroad.
 - iii. Koyana Hydro Electric Project which generates electricity at Pophali is situated in Chiplun Tahsil of this district.
 - iv. Marine Biological Research Station is established ^{at} Ratnagiri and Konkán Krishi Vidyapith at Dapoli.
 - v. Iron ore mines at Redi in Vengurla tahsil of this district are biggest mechanised mines in the state. During the year 1979, the production of iron ore was 9.75 lakh tonnes of which 8.50 in Metric tonnes were sent out.
 - vi. Kudal is getting industrialised with the establishment of four large engineering factories, namely, Wymen Garden, Sethi Nippna' Powder Metal and Arvind Metal. Besides, one engineering factory known as J.K.Files has been established in .M.I.D.C. area at Ratnagiri and few more are coming up.
 - vii. Ratnagiri has been declared as rural industrial project.
 - viii. The district lacks Rail Communication facilities but all weather port is being developed at Ratnagiri. At present, there are 19 seasonal ports in this district.
 - ix. The district being industrially backward, migration of population (working force) to cities like Bombay is heavy. As a result of this, receipt of money orders is comparatively larger than in any of the districts of Maharashtra State. Hence the District Ratnagiri is generally known for money order economy.

CHAPTER II

EXPLANATORY NOTES ON THE SCOPE AND LIMITATIONS OF DATA PRESENTED IN PART II OF THE DISTRICT STATISTICAL

ABSTRACT FOR THE YEARS 1977-78. & 1978-79.

PURPOSE AND SCOPE:

2.1 In this chapter, short notes on the tables presented in the abstract are given indicating the source of data, terminology used, limitations if any etc. There are in all 93 tables presented in this abstract. The present issue relates to 1977-78 and 1978-79. As far as possible, the data are given for the year 1977-78 and 1978-79. Where it was not possible, data for the latest available years are provided.

I. AREA AND POPULATION:

2.2 There are 7 tables in this group and all these tables are based on 1971 population census. Table No. 1 gives tahsilwise area and population with its break up into Rural and Urban and into male and female, as well as the data on residential houses and households and villages and towns, Rural, Urban, Male and Female with its density for the last three Censuses and decadal variations since 1951 and 1961 is presented in Table No. 2. Tahsil-wise classification of villages and towns according to population ranges is given in table Nos. 3 and 4, respectively. Occupational structure of the population in rural and urban areas is presented separately for all the tahsils in table No. 5. Population distribution into various age groups and according to different religion is shown in table No. 6. Table No. 7 gives tahsilwise distribution of scheduled castes, scheduled tribes and Neo-buddhist population in Rural and Urban areas of Ratnagiri district.

II. CLIMATE:

2.3 In this group only two tables are included. Table No. 8 gives monthwise rainfall data in respect of fifteen tahsil centres in the district for the years 1977- and 1978. In table No. 9, the maximum and minimum monthly temperature for Ratnagiri, Harnai, Devgad and Vengurla centres is given. Normal rainfall is given in table No. 8 at each centre which is based on data of rainfall for the last ten years.

III. AGRICULTURE:

2.4 14 tables are provided in this group. The first six tables Nos. 10 to 15 give provisional data for the years 1975-76, 1976-77 and 1977-78 regarding land utilisation, cropping pattern, yield rate and out turn of principal crops, sourcewise and cropwise irrigated area and position of irrigation wells in use and not in use. Provisional data about yield per hectare ^{are} given in table No. 12 based on the fully revised provisional data for the year 1976-77 and information for the year 1977-78 is based on revised final forecast. Table No. 16 gives availability of under-ground water for the years 1977-78 and 1978-79. Table No. 17 provides information of minor irrigation works for 1976-77 and 1977-78 excluding wells. Major and medium irrigation projects in the district as on 30-6-1978 are given in table No. 18. The wage rate data for three rural centres are given for all months of 1977- and 1978 in table No. 19. In table No. 20 information of agriculture holdings collected during Agriculture Census 1970 is given. The tahsilwise data of agriculture implements collected in 1978 livestock Census are given in table No. 21. There was no famine and scarcity during 1977-78 ^{and 1978-79.} and hence information in table No. 22 is 'nil'. Table No. 23 indicates tahsilwise number of villages affected by scarcity since 1970-71 onwards.

IV. ANIMAL HUSBANDRY, FOREST AND FISHERIES:

2.5 There are ten tables in this group. Out of which, table No. 24 relates to tahsilwise livestock data as per 1972 livestock Census. Veterinary Statistics, such as availability of medical facilities for livestock, cases treated and inseminations done in each tahsil is given in table No. 25 for the year 1977-78 and 1978-79. Table No. 26 presents diseasewise livestock mortality in the district. Information regarding the recognised slaughter houses and animals slaughtered therein is given in table No. 27 for the years 1977-78 and 1978-79. Table No. 28-A gives classified forest area under the control of revenue and forest departments, while table No. 28-B reveals major and minor forest products obtained from these forests. Table No. 29 is divided into three parts. Table No. 29(A) and 29(B) provide tahsilwise information about inland fisheries for the years 1977-78 and 1978-79 and Table No. 29(B) gives Tahsilwise information of Marine fisheries for the years 1976-77 and 1977-78 while in table no. 29-C, data regarding the quantity of fish brought for curing, salt issued and fish removed is given for the years 1977-78 and 1978-79.

V. EMPLOYMENT, INDUSTRY, MINING AND ELECTRICITY:

2.6 There are in all ten tables in this group. First three tables viz. table Nos. 30, 31, 32 relate to Factory Statistics, while in table No. 33 the information regarding important characteristics of industries as collected in Annual Survey of Industries is given. Table Nos. 34 and 35 provide Employment Exchanges Statistics for the years 1977-78 and 1978-79. Tahsilwise information about works executed under Employment Guarantee Scheme and Employment Generated and expenditure incurred thereunder during the years 1977-78 and 1978-79 is given in table No. 36. Employment in different industries as on 31st March 1978 and 1979 is shown in

table No. 37. The classification of consumption of electricity according to uses is shown in table No. 38 for the years 1977-78 and 1978-79. Table No. 39 provides the information regarding the towns and villages electrified and population covered during the years 1960-61, 1965-66, 1969-70, 1972-73, 1977-78 to 1978-79.

VI. CO OPERATION:

2.7 Eight tables from Table Nos. 40 to 47 are included in this group. Data regarding various activities in Co-operative Sector such as number of co-operative societies of different types, their membership, share capital, working capital, Loan advanced, No. of tanks and loans advanced by them are given in the first four tables for the year 1977-78 and 1978-79, while statistics relating to operation of central and primary co-operative marketing societies and other co-operative societies is presented in table Nos. 44 and 45. There is no regulated market in the district and hence table No. 46 is blank. The Table No. 47 provides data regarding registered money lenders and loans advanced by them during 1977-78 and 1978-79.

VII. MEDICAL AND PUBLIC HEALTH:

2.8 There are five tables in this group. Information in table No. 48 gives data on medical facilities through Public and Public aided bodies in each tahsil during 1977 and 1978. The Tahsilwise data regarding number of births and deaths registered in Ratnagiri District during 1977 and 1978 is presented in table No. 49, while the number of deaths due to important causes during the years 1971 to 1978 is shown in table No. 50 for the district as a whole.

Table No. 51 gives tahsilwise vaccination statistics and cholera inoculations done during the year 1977 and 1978, while family planning statistics is given in table No. 52 for the years 1977-78 and 1978-79.

VIII. EDUCATION:

2.9 The Statistics relating to education is presented in table Nos. 53 to 59. The table No. 53 shows the tahsilwise literacy position in Rural and Urban areas according to 1971 Census. The figures are given in thousands. Table Nos. 54 and 55 indicate Educational level of Rural and Urban population^{as} per 1961 Census. In table No. 56, Information regarding educational institutions, pupils and teachers for the years 1977-78 and 1978-79 is presented for the district as a whole. The next two tables Nos. 57 and 58 (Nos. 57 and 58) in this group relate to backward class enrolment and economically backward class beneficiaries, respectively for the years 1977-78 and 1978-79. Annual expenditure on Primary Education for the years 1977-78 and 1978-79 is given in table No. 59. The figures given in these tables are in lakhs of rupees.

IX. TRANSPORT AND COMMUNICATIONS:

2.10 In all seven tables are included in this group. Rail facility is not available in the district and hence table No. 60 is blank. Table No. 61 provides road length according to category and surface classification as on 31-3-1978 and 31-3-1979. Data of motor vehicles in operation in Thane Region and operational Statistics of Nationalised Road Transport as on 31-3-1978 and 31-3-1979 are presented in table Nos. 62 and 63 respectively. Data of Traffic Census conducted by Public/Deptt. are presented in table No. 64. Information of communication facilities viz. posts, telegraph and telephones for the years 1961-62, 1965-66, 1970-71/^{and} 1974-75 1977-78 and 1978-79 is supplied in table No. 65,

while Rural Broadcasting information as on 31-3-1978 and 31-3-1979 is presented tahsilwise in table No. 66.

X. LOCAL BODIES:

Nos.

2.11 Four tables, Nos. 67 to 70 in this group pertain to income and expenditure of local bodies such as village panchayats, Zilla Parishad and Municipal Councils. Table No. 67 gives at a glance income and expenditure of village panchayats, Zilla Parishad and Municipal Councils for the years 1965-66 and 1968-69 to 1978-79. Next table gives panchayat samitiwise detailed break up of income and expenditure of village panchayats during 1977-78 and 1978-79. Table No. 69 is divided into three parts, namely headwise information of receipts, Govt. grants to Zilla Parishad and expenditure of Zilla Parishad for the years 1976-77 and 1977-78 (Actuals) 1978-79 (Revised) and 1979-80 (estimated). Table No. 70 gives sub-headwise income and expenditure of Municipal Councils for the years 1977-78 and 1978-79.

XI. PLAN AND COMMUNITY DEVELOPMENT:

2.12 Out of five tables in this group, the first two tables Nos. 71 and 72 give the expenditure and physical achievements of district level plan schemes during the years 1977-78 and 1978-79. Table Nos. 73, 74 and 75 relate to the activities pertaining to Community Development Blocks. Table No. 73 gives stagewise coverage, table No. 74 depicts total expenditure incurred in each block. Physical achievements in these blocks for the year 1977-78 and 1978-79 are shown in table No. 75.

8. 12 12 thousands.

XII. PRICES:

2.13 Three tables are included in this group. There is no Agriculture Produce Market Committee in the district and hence table No. 76 is blank. The monthly averages of weekly prices of important commodities collected from selected shops at district head-quarters during 1977 and 1978 have been presented in table No. 77. The consumer price index numbers for 1977-78 and 1978-79 (Revised Series) for working class at Bombay and Jalgaon are given in table No. 78.

XIII. MISCELLANEOUS:

2.14 The last group 'Miscellaneous' of the Abstract covers official statistics giving information regarding police force and crime statistics, work disposed off in Civil and Criminal Courts, Cinema Statistics, Theatres and their seating capacity, banking Offices, scheduled banks and joint stock companies, Life Insurance Statistics, Performance of Small Savings, thasilwise collection of land Revenue and ^{Number} % of presses and publication, during the year 1978-79 three tables showing distribution of food grains through fair price shops, procurement of food grains through levy, results of general election and candidates according to party affiliations. In the last table No. 93 some important indicators for the district are worked out from the tables in the Abstract, which indicate general trend of development in various sectors over a period of more than two decades.

C H A P T E R . . . I I I

Analytical Review of Sectoral Trends.

3.1 An attempt is made in this chapter to study the trends in development of various Socio - Economic aspects of Ratnagiri District by working out various indicators in selected achievements in various sectors such as agriculture, co-operation, Livestock, electricity, employment education, medical facilities, prices etc. Generally tahsil is taken as unit and indicators have been worked out to review the progress so far achieved in various sectors of economy. Year 1960-61 (i.e. the last year of Second Five Year Plan) is taken as base year for reviewing the level of achievements.

3.2 Agriculture : The development so far done during the period of the last ¹⁸ years can be assessed from the following indicators. It is seen from the below given table that there was very little increase in double cropping as the percentage of gross cropped area to net area sown was almost constant during the last 18 years for the district as a whole. On the contrary, it was decreasing in Ratnagiri, Guhagar, Dapoli, Khed, Rajapur, Mandangad and Devgad tahsils. This was due to peculiar topographical position of the district and lack of irrigation facilities. In comparison of the district percentage, position was little bit better in Kudal Sawantwadi, Vengurla and Malwan. In spite of the multifarious efforts so far made in agricultural development, agricultural backwardness still remained as prominent feature of our economy.

Table No. 3.2

3.3 So far the cropping pattern is concerned, paddy under cereals, kulthi under pulses, coconut under oil seeds and fruits such as mangoes and cashew-nut are the major crops grown in this district. Below table reveals that the area under total cereals, total pulses total food grains and total non-food crops was decreased. This does not appear consistent with the fact as the tendency to bring additional area under cultivation is day by day increasing. Cultivation of paddy, mango and cashewnut, sugarcane, groundnut and coconut was on increasing trend. The extent of increase can not be quantified as the area under mango, cashewnut, coconut is not available for previous years.

3.4 Principal crops of this district can be indentified as paddy, kulathi, mangoes, cashewnut, coconut and bettlenut of which the yield rate and outturn of paddy is only available. It is observed from the following table that the yield rate and production was comparatively better during the year 1976-77. Production of other crops such as ragi, tur, groundnut and chillies was decreasing. The increasing trend is seen in respect of seasamum and sugarcane only. Ratnagiri district is famous for its quality mangoes. Best quality, known as Alphanso is grown on a large scale and still there is much scope for it. Its yield per annum is roughly estimated to 20000 tonnes. Since it fetches foreign exchange it is well known cash crop. Cashew of best quality is also grown in this district.

3.5. Generally there is very little scope for irrigation in this district due to hilly nature. It is seen from the below table that there was no increase in irrigation. This position appears to be inconsistent with the fact as the sources of irrigation were increased during the last 18 years. Irrigation position was comparatively better during the year 1970-71 and during subsequent years it was decreased in most of the tahsils. Position in respect of Mandangad, Sangameshwar, and Vengurla was encouraging. In Sawantwadi tahsils, there was 7% decrease in irrigation which is not convincing with the facts.

3.6 Paddy and coconut are the two major irrigated crops of this district, which cover more than 30% irrigated area. During the period of the last 18 years, irrigated area under paddy was decreased as compared to the year 1960-61 which is not convincing while the irrigated area under coconut had an increasing trend. The area under sugarcane was also increasing. The details of other crops are indicated in below tables.

3.7 The table given below depicts that 41% area was irrigated by private canals upto 1970-71 but subsequently it was shifted to well irrigation which covered 35% irrigation of the district. Irrigation by Govt. Canals was almost constant while by tanks and other sources it was on increasing trend.

3.8 Co-operation:

3.8 The co-operative credit Societies play vital role in the field of agricultural development by extending credit facilities on an extensive scale. Various types of achievements in respect of credit societies are detailed in the following table.

Agril.

It is seen from the following table that number of primary/socie-
 ties ^{were} decreasing. The reason for this position may be the
 liquidation of Societies. Though the societies had been decreased,
 there was increase in membership working Capital and Loan advanced
 as compared to the years 1960-61 and 1970-71. During the year 1960-61
 per member advance was Rs. 25
 which was increased to Rs. 49 during 1978-79. As compared to the
 advance, per member
 per member/outstanding loan was Rs. 100, which is an indicator
 of poor repaying capacity of the members. With all these achievements,
 There still remained much to be done.

Agricultural wage Rates:

3.9 - Agricultural wage rates are being collected regularly from
 three centres viz. Harnai, ^{from} Dapoli Block, Nawad from Sangameshwar
 Block, and shiroda from Vengurla Block. Average wage rates for
 all these centres for the years 1977 and 1978 are shown in below
 table. Wage rate for male was Rs. 5.50 to Rs. 6.00 while for female
 it was Rs. 3.00/Rs. 4.70. Since the selected farmer / Shiroda had
 not employed male labour, the wage rate is ^{at} quoted in below
 table. However, it was Rs. 7.00 per male during 1978. These wage
 rates were collected from the selected farmers who employ the
 labourers on permanent basis on comparatively lower wage rates.

Hence these rates does not represents the district position.

However these rates may be considered as broad indicator.

Livestock:

3.10 Livestock makes a substantial contribution to the economy by providing subsidiary income to farmers, food to human population and employment potential to landless labourers. The last livestock Census was carried out during 1972 in Maharashtra and findings regarding Livestock per 100 hectares of cultivable land are quoted in below given table. From the below table, it is observed that the bovine and ovine population per 100 hectare of cultivable land was highest in Sawantwadi tahsil and lowest in Mandangad, Rajapur and Vengurla tahsils. It was less than district average in all the tahsils except Ratnagiri, Guhagar, Sawantwadi and Malwan.

Poultry:

3.11 Ratio of poultry to population is shown in the below table. It is observed from the table that there is increase in the poultry. As compared to human population, there were 613 poultry birds per thousand human population during 1966 while it was 619 during 1972. From the last two livestock censuses, it is observed that within the tahsils, poultry birds were decreased in Chiplun, Sangameshwar, Lanja, Sawantwadi, Vengurla and Malwan whereas the increase was visible in rest of the tahsils. Within the tahsils, number of poultry birds was highest in Kankawali tahsil, followed by Guhagar and Kudal.

Electricity:

3.12 It is seen from the following table that 813 villages out of 1519 villages were so far electrified. During the year 1978-79, the per capital consumption of electricity was 24.30 k.w.h as against 0.85 k.w.h. during the year 1960-61. Out of total consumption during the year 1978-79, 28% electricity was used for domestic purpose, 9% for commercial, 37% for industrial and 4% for agricultural purpose. Tahsilwise Statistics regarding pumps energised and per capital consumption was not available.

Employment:

3.13 Employment generation is one of the most important aims of the Planning Process in a over populated country like India. Employment exchange statistics, give an indication of the magnitude of the unemployment problem to a very limited extent because the majority of unemployed persons do not avail of the facilities provided by the employment exchange. Position of Ratnagiri District regarding the registration, vacancies and placement is indi-

cated in below table. It is seen from the table that the persons on live-register were 16,581 during 1978-79 as against 2,840 in 1960-61. As against the registration, the employment was given only to 546 persons during 1978-79 which is only 6%. This achievement is not encouraging in the light of the work done during the years 1970-71 and 1977-78. Thus the gravity of the problem of unemployment is day by day increasing.

Medical Facilities:

3.14 Below table indicates the medical facilities and their performance during the years 1961, 1971, 1977 and 1978. It is seen that there was increase in number of hospitals and dispensaries during the last 18 years. However, the number of primary health centre is constant. As compared to the year 1961 there was 477% and 42% increase in indoor and outdoor patients treated, respectively during 1978. This clearly indicates the extent of expansion of medical facilities over a period of 18 years.

Education:

3.15 Education is backbone of Socio Economic Development and accordingly the priority was attached to educational programme in all the plans. Education statistics at various level of education have been depicted in the table given below, which indicates considerable increase in educational activities during the period of 18 years. Slight decrease in number of students in primary school is visible during the year 1978-79.

3.16 The above table reveals the expansion of education facilities at various levels of education. The following table indicates important ratio in education. It is observed from the ratios that secondary and higher educational institution were increased. But number of teachers in relation to students was on increasing side at primary level while in respect secondary and higher level education, it was decreasing.

Commercial Banking:

3.17 Tahsilwise number of banking Offices and number of households per banking office for the year 1978-79 is given in the following table. The similar information is not available for the years 1960-61 and 1970-71. It is seen that there was 95% increase in banking offices during 1970-71 and 292% during 1978-79. Though there is sizeable increase in banking facilities was visible, there was no increase in number of households served per banking office. On the contrary number of households per bank was decreased during 1978-79. The main reason for this position may be either the new offices were opened in places which were already served or new offices were opened in the villages having small population. It may be noted that the households from the villages and towns having banking offices were considered to work out the indicator of households served per banking office.

Road Development:

3.18 Roads are one of the important pre-requisites of the Konkan development as there is no other means of transport in this hilly district. The special priority has to be attached to the road development programme of this district. The total length of the road was 2382 km. upto 1960-61 and 6291 km. upto 1978-79. The increase in road length during the last 18 years ^{out} works / ^{to} 164%. During 1960-61, the road length per 100 sq. km. was 18 km. which was increased to 48 km, during 1978-79(*)

Prices:

3.19 Since November 1962, the prices of important commodities are being collected by the District Statistical Officers at district head quarters on each Friday. As these prices were collected for the selected commodities from the selected shops, these may not represent the district position ^{in general.} However, the data may prove useful as broad indicator of the trend of changes in retail prices over a period of time in the district. The following table indicates the average retail prices of the selected commodities for the years 1962-63, 1970-71, 1977-78 and 1978-79 collected at Ratn giri. It is observed that there was rising trend in prices of all the commodities since the base year 1962. In comparison to earlier year 1977-78, declining trend in the prices of Jowar (White), Sugar (II-grade) Gur, Groundnut oil, Vanaspati (loose), dry chillies, Kerosene and shirting was visible during 1978-79.

(*) Data regarding the villages connected by all weather road and other roads is not available for 1960-61 and 1970-71. During the years 1977-78 and 1978-79, there were 558 and 563 villages connected by all weather roads and 177 and 212 by other roads respectively.

CHAPTER IV

ANNUAL PLAN 1977-78 And 1978-79

4.1 The Government of Maharashtra has accepted the principle of decentralised Planning and its implementation since third five year plan. Accordingly, a large number of schemes were brought down to the district level and were categorised as district level plan schemes. In order to have greater involvement of local participation and representation of the aspirations of local people, the Government of Maharashtra adopted 'District as a unit of Planning' during fifth plan. The main objectives of district planning ^{were} i) the reduction of inter district and intradistrict imbalances ii) to ensure rational utilisation of resources and iii) Proper co-ordination and implementation of development programme.

4.2 The organisational machinery set up in each district for the formulation, monitoring and overseeing of the District Plan originally consisted of (a) the District Planning Board, and (b) District Development and Consultative Council. These two bodies have subsequently been amalgamated and formed in a single body known as District Planning and Development Council, which is presided over by the designated Minister of the District. Initially, the Chief Executive Officer, of Zilla Parishad, was to function as the member secretary of this body. But subsequently Collector of the district ^{was} appointed as member Secretary with effect from 15-12-1975. The services of the Deputy Chief Executive Officer (Planning) along with the planning cells of Zilla Parishad consisting of one planning assistant and one junior clerk and two Research Assistants from the Directorate of Economics & Statistics, Government of Maharashtra were also placed at the disposal of District Planning and Develop-

ment Council. They have to work under administrative control of Collector and member Secretary of District Planning and Development Council. To assist the council in its deliberations, a small Executive Committee is appointed under the Chairmanship of designated Minister of the District. The Collector also functions as the member Secretary of this committee.

4.3 Fifth five year plan was commenced from 1974-75 and completed by 1978-79. The Govt. had proposed a ceiling of Rs. 50.08 crores for Ratnagiri District Plan on the basis of the specified methodology as indicated below:

Table No. 4.3.

4.4 Keeping in view the national and state objectives, the draft fifth plan for Ratnagiri district was prepared and allocation of total outlay was made as detailed below.

Table No. 4.4

Table showing the sectoral allocation of total outlay and expenditure incurred upto 1978-79(Fifth Plan). (Rs. in crores)

Sr.No.	Sector	Fifth Plan outlay		Percentage of allotted outlay to total outlay	Total Expenditure	% of expenditure to outlay of Sector
		Proposed	Actually Allotted

4.	Social Services	14.35	9.62	24.88	8.44	87.73
Total		50.08	38.67	100.00	34.94	90.35

4.5 It is revealed from the above table that the proposed outlay was not actually released during the plan period. Allocation of proposed outlay amongst major sectors was more or less balanced . But in actual release of outlay, the 1/3 grants were budgeted for Industry, Mining and Transport which was desirable, as the district is backward in industrial and road development. Expenditure so far incurred during the period of fifth plan amounts to 90%. The expenditure position of Industry and mining and transportation and Social Services Sectors is not comparatively upto the mark.

4.6 As regards the annual performance, the same was not upto the mark/ because the original outlay was reduced from Rs.1113.40 lakhs to Rs. 996.16 lakhs after considering the bottlenecks and difficulties experienced by the imple-

menting agencies. The budgeted outlay for the years 1976-77 and 1978-79 was kept intact. The budget provision allotted for the years 1977-78 was much more and it is almost double during the year 1978-79 as compared to earlier year 1976-77. The expenditure incurred during the last three years of fifth plan amounts to 88%, 93% and 98% respectively. It is seen that the expenditure for the last year of the fifth plan is very satisfactory as compared to earlier years. The share of the local sector in the expenditure so far made during these years under reference was not uniform. It was 21% in 1976-77 / 17% in 1978-79. It was very poor i.e. (9%) during 1977-78. Major headwise budget provision and expenditure made during the years is given below:

4.7 It is seen from the above table that generally expenditure incurred under various major heads was satisfactory. During the year 1976-77, the expenditure on co-operation and community Development Programme, Social Services and Other Programme was less than 90%. In the year 1977-78 a similar position was in the case of co-operation and community Development and irrigation and power.

4.8 An attempt is made in subsequent paras to review the progress of the various schemes implemented under major sub-heads. There was in all 119, 155 and 164 schemes so far implemented during the year 1976-77, 1977-78 and 1978-79, respectively.

Agricultural Programmes

4.9 There were 7 sub-heads under this programme and details about the schemes are given below.

Table No. 4.9.

4.10 In General:- expenditure position is satisfactory. However, during the year 1976-77, and 1977-78 less than 90% expenditure was booked on Crop husbandry, and dairy development. The same position was also observed in respect of Animal Husbandry during the year 1977-78 and in respect of Soil Conservation during the year 1978-79. Agricultural Production:

4.11 Agricultural Production: Under Crop husbandry, during the year 1977-78, 65 quintals paddy^{seed} was distributed, Additional area of 100 hectares under mango and 142 hectares under coconut was covered. 250 demonstration plots^{were} arranged^{area of} 165 hectares was terraced. 650 m. tonnes^{of} chemical fertilizers were distributed and 25 new gobar gas plants were constructed. During the year 1978-79, 12 quintals of paddy seed, 13000 mango grafts and coconut grafts were distributed. 263 demonstration plots were arranged and 78 hectares were terraced. 728 m. tonnes^{of} chemical fertilizers were distributed. 56 new gobar gas plants were established.

Animal Husbandry:

4.12 The achievements under this sub-head were as under.

Minor Irrigation:

4.13 During the year 1977-78, 24 new wells and 2358 Kaccha bandharas were constructed and in 1978-79, 2 wells and 2505 bandharas were constructed. 32 pump sets were installed during 1977-78 and 17 during 1978-79. Irrigation potential of 4185 hectares and 5036 hectares were created during 1977-78 and 1978-79, respectively.

Forest :

4.14 Afforestation of 205 hectares and 229 hectares were done during the years 1977-78 and 1978-79, respectively. Area of 500 hectares and 1164 hectares was brought under valuable trees during respective years. 6 Central nurseries were being maintained.

Fisheries:

4.15 Under fisheries programme, 250000 and 200000 fingerlings were stocked during the years 1977-78 and 1978-79. 15 and 41 indigenous boats were mechanised during 1977-78 and 1978-79, respectively. During the year 1977-78, four fisher youths were trained and two during 1978-79.

Co-operation and Community Development:
