CHAPTER NO. I

INTRODUCTION.

1.1 Location :-

Solapur district is one of the six districts of Aurangabad Division, situated on the south-east fringe of Maharashtra State and lies between $17^{\circ}.10'$ and $18^{\circ}.32'$ north latitude and $74^{\circ}.42'$ and $76^{\circ}.15'$ east longitude.

1.2 Boundaries :-

Solapur district is surrounded by Ahmednagar and Osmanabad districts in the north; Osmanabad district and Andhra Pradesh in the east; Sangli district and the Karnatak State to the south and Satara and Pune districts towards the west.

1.3 Topography :-

Hill Ranges :

There is no important hill system in the district. Only in the north of Barshi tansil several spur of Balghat range pass south for a few miles. Of these, the chief is the Barshi ghat, about fourteen miles east of Barshi tansil.

There are also scattered hills in Karmala, Madha and Malshiras tansils. In Karmala, Baghoba hill about 210' high and Bodki hill about 190' high lie about sixteen miles south east of Karmala. The top of these hills is flat. In Madha tansil, Uninchgaon hills, about 300 feet high, lie about four miles north of Madha Tansil. The Gurnand hill is in Malshiras tansil.

The low table-land and small separate hills in Karmala and Madha tansils act as the watershed between Bhima river and Sina river.

1.4 River :-

The chief rivers are the Bhima with its right bank feeders Nira and Man and left bank feeders the Sina and Bhogawati. The Bhima rises in the Sanyadries at Bhimashankar in Khed tansil of Pune district. It runs south east through

Pune, Ahmednagar and Solapur districts of Maharashtra State. The drainage area of Bhima within the district includes on the left bank western half of Karmala, Madha, Pandharpur and South Solapur tansils and on the right bank, the Southern part of Pandharpur and Mangalwedna tansils. The length of Bhima within the limits of the district is 200 kms.

The Mira rises in the Sahyadri in Pune district. It runs south east and east along the borders of Pune, Satara and Solapur districts. It falls into the Bhima about 8 km. south-west of Tembarni in Madha tansil.

The river Man on entering Sangola tansil from the western border flows eastwards draining Sangola tansil and part of Pandharpur and Mangalwedna tansils. It meets Bhima near Pandharpur.

The Sina, which flows from north to south-east parallel to Bhima, drains the tansils of Barsni and North Solapur on the left and part of Karmala, Madha and South Solapur on the right. Bhogawati rises in the Balagnat range in the north-east of Barsni tansil and falls into Sina river near Mohol. For large part of the year the rivers are fordable, except for occasional pools of water found in the Bhima river during summer. During the south-west monsoon the smaller streams and the Bhima river are flooded by heavy falls in the Sahyadries. The greater part of Malshiras tahsil is drained by the river Mira which is the right bank feeder of the Bhima. Sangola, part of Pandharpur and Mangalwedna tahsils are drained by the Man river. The eastern part of Barsni and North Solapur and part of Karmala, Madha and South Solapur tansils are drained by Sina river. Part of the Barsni and Madha tansils lie in the basin of Bhogawati river. Thus, the water courses of the tributaries in the district may be reckoned at about 650 Km.

1.5 Soils :-

The geographical foundation of soil prevailing in Solapur district is mainly of Deccan trap of volcanic origin. The solum is underlain by partially decomposed basaltic rock, locally known as 'MURUM' which overlies parent material. On account of more or less complete absence of leaching, the

soils are base saturated, the exchangeable, calcium being the predominant cation. The lime reserve is fairly high (3.5 to 10 p.c.). The soils exhibit varying degrees of erosion and truncated profile is a common occurrence. The soils in the district can be classified into four main categories on the basis of depth and structure namely :-

- a) Very shallow soils with depth below 7.5 cm.
- b) Shallow soils between 7.5 to 22.5 cm.
- c) Medium deep soils between 22.5 to 90 cm.
- d) Deep soils with depth more than 90 cm.

It is broadly estimated that out of the total cultivated area very shallow soils occupy about 10 p.c. of the area, shallow soils 20 p.c. medium deep soils 45 p.c. area and deep soils 25 p.c. area. In Karmala taluq half the soils is black and the remaining is red and light. The soils of Sangola and Mangalwedna are mainly light brown or greyish black and are shallow. Madna taluq has shallow soil having varying depth and quality. In Pandharpur, soil is pure capable of producing millets only. The soil in Malsiras is shallow and not retentive of moisture. Except along with the banks of the rivers and nullas and the few valleys where the soils are deep, district has shallow soils with low water holding capacity. Crops in this area, therefore, suffer the most during the drought conditions.

1.6 Rainfall:-

Climatically the entire district falls in the rain shadow area. The monsoon period in Solapur district covers the period from mid-June to end of September. There are two peaks in the rainfall pattern of the district. The first in June-July and the second in September with a trough in between. The rainfall through out the district is scanty and annual average is 577 mm. for the district.

The meagre rainfall is received from south west as well as north-east monsoon. The paucity of total amount of rainfall and large variations both in extent and the distribution in different years makes the agriculture almost a gamble on the rains. The analysis of rainfall data since 1953 indicates that not only there are variations in the total rainfall, but also the distribution of rainfall was unevenly spread over the

monsoon seasons. The number of rainy days varies very widely from year to year. During 1977 rainfall was less than the annual normal rainfall at Solapur, Madna, Monol and Mangalvedna centres and it was more than normal rainfall at Barsai, Karala, Pandnarpur, Sangola, Malshiras and Akkalkot centres. During 1978 rainfall was more than normal rainfall at all the centres in the district.

1.7 Famine and scarcity :-

Agro-climatically, the entire district except Akkalkot taluqa falls in the rainfall shadow zone. The district witnesses recurrent scarcity conditions. The Paradasani Committee (1960) after considering the data on rainfall, annewari and declaration of scarcity for 30 years ending 1957, recognised all the taluqas barring patches of Barsai taluqa and irrigated tract of Malshiras in Solapur district as drought prone area. The Irrigation Commission (1962) had also recognised all the taluqas of the district, except Malshiras as drought prone. The Sukhatankar Committee (1973) after studying the erratic behaviour of rainfall pattern and the frequency of a large number of deficient weeks, recognised the entire district except areas served by the protective irrigation system, as drought prone.

Solapur district passed through a period of drought for three years 1970-71, 1971-72 and 1972-73 in succession. In the year 1973-74, although the agricultural situation was normal in the state, scarcity of a lesser magnitude existed in few villages of the district. Due to frequent visitation of scarcity, the agricultural population in the district always suffers heavily.

However, during the years 1977-78 and 1978-79 none of the villages in the district was affected by scarcity conditions.

1.8 Minerals :-

There are no minerals of economic importance in this district. However, minerals like building stone are found in sufficient quantity all over the district.

1.9 Forest :-

The total area under forest which is scattered is 403.23 square km. All these forests are scrub forests, growing thorny bushes. The forest area is much scattered. It may be roughly divided into two tracts, hills between Barsni and Osmanabad on the extreme north and east and hills to the south of Malsniras and Sangola in the extreme south-west.

The forest products of Solapur District are fuel, grasses, Dhawanda gum and agave. The value of forest products was Rs. 18000/- during 1977-78 and Rs. 20000/- in 1978-79.

1.10 Area :-

Solapur district comprises of an area of 15021 sq.km. which is 4.88 percent of the total area of the state. Of this, urban areas account for 414 sq.km. and rural areas for 14,607 sq.km. In terms of area Barsni is the largest tahsil with an area of 1,626 sq.km. and the smallest tahsil is North Solapur with an area of 736 sq.km.

1.11 Demography :-

According to 1971 census, the population of this district was 22.54 lakhs. The total number of households in the district was 3.90 lakhs. Thus, the average size of household members in the district worked out to be 5.8.

Out of the 22.54 lakhs population in 1971, 16.37 lakhs lived in the rural areas and the remaining 6.71 lakhs lived in urban areas. The percentage of the urban population to the total population works out to be 27.4. The sex ratio (number of females for 1000 males) was 933 in 1971 as against 936 in 1961.

1.12 Density :-

The density of population per square km. for the district was 150 in 1971 as compared to 124 in 1961. Compared with the density of 164 in the State the density of population in the district is little low.

1.13 Decadal Variation :-

The growth of population in the district, like other parts of the state, was phenomenal in the last two decades. The decadal growth rate between 1951-61 was nearly 23.61 percent which is fairly comparable with the state average rate of growth of 23.6 percent. The population of the district increased to 22.64 lakhs in 1971 from 18.66 lakhs in 1961. The decadal growth rate between 1961-71 was 21.2 percent as against the 27.5 percent observed in the state. The decadal growth rates were 21.0 percent between 1951-61 and 18.6 percent between 1961-71 in the urban areas as against 24.6 percent and 22.2 percent in the rural areas. Thus, the population in the rural areas of the district had increased at a faster rate than in the urban areas. This can be attributed to the closure of some textile mills in Solapur city. On the rural area side, the decadal growth rate of Malshiras was 36.1 percent between 1961-71 as against 35.6 percent between 1951-61. The growth of rural population was comparatively less in the tansils of Karmala, Barsni and Mohol (17.4, 17.5 and 18.7 percent respectively). The highest growth in population especially in Malshiras tansil was accompanied by prosperity in agricultural development due to perennial supply of irrigation water through the Neera right bank canal since 1933 and emerging agrobased industries like sugar factories in the last decade.

1.14 Occupational Pattern :-

According to 1971 census, out of the total population of 22.54 lakhs in the district 7.59 lakhs were workers. The distribution pattern of workers in different categories reveals that 35 percent of the workers were cultivators, 33 percent were as agricultural labourers and remaining 32 percent were other workers. The percentages of cultivators and agricultural labourers to the total rural working population were 45 and 41 respectively as against the corresponding percentages 47.5 and 38.1 in the state. Thus, about 86 percent of the working population of the rural areas of the district sustain their livelihood from agriculture.

In the primary sector of the economy comprising of agriculture, agricultural labour, livestock, forestry plantation etc. 70.6 percent workers were engaged, while in secondary sector comprising of manufacturing, processing and construction activities, accounted for 14.5 percent workers and in the tertiary sector comprising of trade and other services, 14.9 percent workers were engaged. It is evident that employment opportunities in the secondary and tertiary sectors have not yet developed. There is, therefore much pressure on the primary sector. If higher employment in secondary and tertiary activities is taken as an indicator of economic advancement of a region, the tansils of Monol, South-Solapur, Sangola and Mangalwedha can be identified as more backward areas of the district having less than 15 percent of the workers engaged in the sectors other than the primary.

1.15 Special Features:-

(i) Industries : Due to Mira Right Bank Canal a large portion of cultivated land has been brought under irrigation for sugarcane cultivation in Malshiras tansil. As such most of the sugar factories are concentrated in Malshiras tansil. Out of 5 sugar factories, 4 are situated in Malshiras tansil and one is situated near Kuntha village in North Solapur tansil. Two new sugar factories have been registered during 1974-75 in Pandharpur tansil and one in Barsni tansil during 1975-76. Due to availability of molasses from sugar factory, the Brahan Maharashtra Sugar Factory Ltd. Shrigur, manufactures rectified spirit and liquor.

Solapur city and Barsni are the important textile centres. In Solapur city there are in all five textile mills out of which Garsing Girgi Mill is run by Government. At Barsni there are three textile mills. So also two spinning mills in the cooperative sector are established at Solapur proper. Besides there are number of Handloom and Powerloom centres in Solapur city. The handloom industry has provided economic subsistence to large population of weavers community.

(ii) Important crops: Both Kharif and rabi crops are grown in Solapur district. But area under rabi crops is predominant.

(iii) Irrigation Projects: The work on the major components of the project viz. Ujani Dam, left and right bank canals and the distribution system of the left bank canal is in progress. The work of the dam was planned to be completed by end of June 1978. The work of left bank canal is in progress upto 106 kms. out of which work up to 27 kms. is almost completed. The work of the aqueduct across Bhina river and right bank canal has been taken in hand. Irrigation potential to the extent of 1,66,400 hectares is likely to be completed after completion of the project.

(iv) Drought Prone Areas:- In view of deplorable conditions prevailing in the drought prone areas, the state Government has undertaken in the Fifth Plan, a programme for drought proofing in 87 tansils of 12 districts of the state, which have been identified by the state Government as drought prone. Out of these 12 districts, two districts viz. Solapur and Ahmednagar have a massive drought prone areas programme for which assistance from the International Development Association, an affiliate body of the world Bank, has been negotiated. The programme is catalytic in character and is expected to generate complementary investment outlay from the financial institutions like the Maharashtra State Cooperative Bank, Maharashtra State Cooperative Land Development Bank and the nationalised banks. The strategy of development in the drought prone areas of Solapur district involves the various measures for land development and moisture conservations, water harvesting and minor irrigation, dry land farming, livestock development, forestry and pasture development.

The D.P.A.P. for Solapur, adopted a watershed approach and initially 10 watersheds, one in each taluka excluding Pandharpur comprising of 113 villages were selected. Ten more watersheds were added in 1977-78, to utilise expected savings in the project outlay. The achievements are discussed in the Chapter IV.

(v) Integrated Rural Development Programme: The integrated Rural Development Programme launched in 10, out of 11 blocks of this district during 1978-79, for providing additional employment opportunities in the rural areas and to raise the

level of income of the weaker sections i.e. small and marginal farmers, Agriculture and non-agriculture labourers and village artisans. The 10 blocks selected are categorised as under :-

<u>D.P.A.P. blocks</u>	<u>C.A.D.A. blocks</u>
1) South Solapur	1) North Solapur
2) Mangalvedna	2) Monol
3) Sangola	3) Madna
4) Karjala	4) Pandnarpur
5) Barsni	5) Malsiras

During the year 1978-79 each of the blocks was given an outlay of Rs.5 lakhs in all Rs.50 lakhs. Against this, the total expenditure was Rs.49.60 lakhs.

(vi) Employment Guarantee Scheme:- The Employment Guarantee Scheme is being implemented since March 1972. The aim of the scheme is (a) providing employment to all rural adults seeking manual un-skilled work and, (b) utilising the man-power so available for the creation of durable productive assets. The scheme has now been extended to the work seekers residing in 'C' class municipal areas also. The works taken up in the programme for Employment Guarantee Scheme is of productive nature viz. minor irrigation, land development, afforestation etc.

Further details of the work done under Drought prone Area Programme and Employment Guarantee Schemes have been discussed in Chapter IV.

EXPLANATORY NOTE :-

2.1 The data on different important sectors which have dominant effects on the economy are presented in this abstract for the years 1977-78 and 1978-79. In case the data for the years 1977-78 and 1978-79 are not available the data for the latest available year are presented. In most of the cases the reference period of the data is the financial year. The data on agriculture, however, relates to the agricultural year, whereas the data on cooperation is for the cooperative year (1st July to 30th June). The data on other important items like rainfall, temperature, civil and criminal cases, vital statistics are for the calendar year. The information as far as possible is presented tahsilwise for inter tahsil comparison.

District At-A-Glance:-

- 2.2 Certain essential data in important spheres such as,
- i. Population.
 - ii. Agriculture
 - iii. Animal Husbandry
 - iv. Industries.
 - v. Cooperation.
 - vi. Medical and Public Health.
 - vii. Education.
 - viii. Transport and communication.
 - ix. Plan expenditure etc.

Pertaining to the district is presented alongwith the corresponding figures for the state for the comparison purpose.

District Statistical Abstract :-

2.3 The data incorporated in the District Statistical Abstract have been presented in suitable tables, classified in appropriate groups. The concepts adopted in preparation of tables are summarised in the following paragraphs. Limitations of data are cited wherever necessary.

Area and Population:-

2.4 The data of 1971 census mainly on population, area, houses and livelihood, occupation, rural urban break-up etc. are presented in the first seven tables for all tansils in the district. Data on population per square kilometre, decadal variations during 1951-61 and 1961-71, classification of villages and towns according to population ranges, number of workers and non-workers, population of scheduled castes and scheduled tribes, distribution of population according to age group and religion are also given in these tables.

2.5(a) Urban Area :-

The following places have been treated as urban area (towns) :-

1. Every place having a municipality or cantonment board irrespective of its population.
2. Every other place which satisfies following three conditions:
 - i. a population of at least 5,000
 - ii. at least three-fourth of its male working population engaged in non-agricultural pursuits &
 - iii. a density of population of at least 400 persons per square kilometre.

3. Any other place not falling under above two categories which possesses certain district characteristics to qualify to its being treated as urban area as its being a project area or a developing township.

(b) Rural Area

Those areas which do not satisfy the criteria prescribed for recognising urban area are called rural areas,

A census village in Maharashtra has always been a revenue village. A revenue village has well defined boundaries, a map and a separate set of land records irrespective of whether that defined area has any population or not.

(c) Worker :-

A worker is defined as a person whose main activity is participation in any economically productive work through his physical or mental activity, work involves not only actual work but effective supervision and direction of work.

A public or social worker engaged actively in public or social work or political worker actively engaged in furthering the political aims of a party was also regarded as a worker. In case of perennial work, such as cultivation, livestock, plantation, some type of household industries, a person was treated as a worker by ascertaining whether he had participated any time during the last one year, even if, he was not economically active in the week prior to enumeration. In case of regular work in trade, profession, service or business, a person was considered as 'worker', if he had participated in such regular work on any one of the days during the week preceding the date of enumeration and that work has been returned as his main activity.

(d) Non-Worker:-

Non-workers are those who are not mainly engaged in any economically productive work.

Persons primarily engaged in household duties or those who were students and helped in the family economic activity, but not on full time scale were treated as 'Non-worker' in respect of their main activity.

2. Climate:-

2.6 The rainfall and temperature have pronounced effects on climate. The rainfall data presented in table number 8 gives normal rainfall, monthly rainfall and number of rainy days during the calendar year 1977 and 1978 for the selected centres. Normal rainfall figures are worked out on the basis of actual rainfall for the periods ranging from a minimum of 5 years and a maximum of 80 years. A day was treated as a rainy day if during the twenty four hours the rain gauge recorded a minimum of 2.5 mm of rainfall. The table number 9 gives actual maximum and minimum temperatures recorded during each of the month of the calendar year 1977 and 1978 in respect of 2 centres viz. Jeur and Solapur.

3. Agriculture:-

2.7 Important talukwise statistics on agriculture such as.

- i. Land utilization.
 - ii. Area under different crops.
 - iii. Yield, per hectare and outturn of principal crops.
 - iv. Irrigated area under different crops.
 - v. Sourcewise irrigated area and
 - vi. Data on irrigation etc.
- are given in tables 10 to 14.

2.8 The basic definitions adopted are given below:-

(a) Geographical Area:-

It is according to village papers, calculated from village returns prepared for revenue purposes and as such it may be different from that according to surveyor general.

(b) Forests:-

It includes all actually forested areas or lands classed or administered as forests under any legal enactment dealing with forests, whether state owned or private.

If any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or un-cultivated land.

(c) Land put to non-agricultural Uses:-

It stands for all lands occupied by buildings, roads and railways or under rivers, canals etc. and other land put to uses other than agricultural.

(d) Barren and Un-Culturable land:-

It covers land which cannot be brought under cultivation unless at a high cost, whether in isolated blocks or uncultivated holdings. Land like mountains deserts etc. is classified under this category.

(e) Permanent pastures and other grazing land:-

It covers all grazing lands, village common grazing lands and grazing lands within forest area are included under this head.

(f) Culturable waste land:-

These may be either fallow or covered with shrubs and jungles which are not put to any use and include all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once, but not cultivated during the current year and the last five years or more in succession.

(g) Miscellaneous tree crops and groves not included in the net area sown.

This category includes all cultivable land which is not included in net area sown but put to some agricultural use.

(h) Current fallow lands:-

These are lands which are kept fallow during the current year. If any seedling area is not cropped again in the same year, it is also treated as current fallow.

(i) Other fallows:-

All lands which were taken up for cultivation but are temporarily out of cultivation for a period not less than one year and not more than 5 years are classed as other fallow.

(j) Net area sown:-

This consists of net area sown with crops and orchards, area sown more than once being counted only once.

(k) Gross cropped area:-

Total of area under all crops including area under crops sown more than once is taken as gross cropped area.

Cultivable area is a sum of areas under

- a) Miscellaneous tree crops and groves not included in the net area sown.
- b) Current fallows.
- c) Other fallows.
- d) Culturable waste land and
- e) Net area sown.

4. Irrigation statistics:-

- 2.9 Important irrigation statistics regarding
- a) Number of irrigation wells.
 - b) Activities of ground water survey and development agency.
 - c) Minor Irrigation works.
 - d) Major and Medium Irrigation projects and
 - e) Area irrigated under major and medium projects
- are given in table No.s 15, 16, 17, and 18.

5. Allied Agriculture:-

- 2.10 Agricultural wage rates at the selected centres viz.
- a) Mandrup Taluka South Solapur
 - b) Vairag Taluka Barsi.
 - c) Modnab Taluka Madha.

collected by the District Statistical Office through the Block Statistical Assistants are given in table number 19. Number of operational holdings as per agricultural census, 1970 and provisional data for 1976-77 are given in table number 20. Final figures of agricultural implements enumerated during the eleventh livestock census are given in table No. 21. The tansilwise data of famines and scarcity are given in table No. 22 for the years 1977-78 and 1978-79 and in Table No. 23 for the period from 1971-72 to 1978-79.

6. Animal Husbandry and Forests:-

2.11 Population of livestock and poultry as per livestock census, 1972 (final data) is shown tansilwise in table No. 24. Statistics on veterinary facilities existed, animals treated in such centres and diseasewise mortality of livestock are given in table No.s 25 and 26. Table No. 27 furnishes data on animals slaughtered in recognized slaughter houses in the district during the year 1977-78 and 1978-79.

2.12 The data on area under forests and major and minor forest produce for the years 1977-78 and 1978-79 have been

shown in tables 28(a) and 28(b) respectively. Area under forest with classification into.

- i. reserved
- ii. protected and
- iii. Un-classed forest under the control of the Revenue Department and under State Forests Deptt.

has been shown. These areas may not tally with the area under forests shown in table No. 10 due to different concepts of classification into above three heads. Reserved forests are intended mainly for timber production in which rights of grazing and cultivation are seldom allowed.

Grazing and cultivation under certain limitation and restrictions are allowed in protected forests. The unclassified forests refer to inaccessible forests or unoccupied waste.

7. Inland Fisheries:-

2.13 The statistics relating to total area suitable for fish culture, ponds, lakes and reservoirs, area under pisciculture, inland fish production and carp fry used for pisciculture are given in table No. 29 (a).

8. Employment, Industry and Electricity :-

2.14 The statistics relating to working factories under different groups with average daily employment mandays worked, classification of factories according to working strength and number of days worked are given for the years 1977 and 1978 in table No.s 30, 31 and 32. The term factory includes:-

- a) Those employing ten or more workers working with the aid of power.
- b) Those employing 20 or more workers and working without aid of power and
- c) Those registered under the factory Act 1948. Even though the above conditions are fulfilled the Defence factories are excluded.

Statistics regarding number of registered factories, productive capital investment, output and employment provided under different industries based on Annual survey of Industries for the years 1973-74 and 1975-77 is given in table no. 33. Monthwise registration, vacancies notified, placements done, number of employment seekers on the live register at the end of the month, occupationwise and sectorial, turnover and employment exchange have been shown in table No.s 34, 35 and 37. The information regarding the employment generated under Employment Guarantee scheme works is also given in table number 36.

2.15 Data on consumption of electricity under different categories during the years 1977-78 and 1978-79 is given in table No. 38 and number of towns and villages electrified during and upto the end of selected years are shown in table No.39. The data are collected from Maharashtra State Electricity Board,

9. Cooperation:-

2.16 Statistical information on the cooperative institutions and their activities have been given for the years 1977-78 and 1978-79 on the following items:-

- i. Loan advanced by Cooperative banks and primary agricultural credit societies different types of societies, their memberships.
- ii. Total value of purchase and sales by the central and primary cooperative marketing societies and

iii. Annual arrivals in the regulated markets in each tansil of district in tables 40 to 46. Tansilwise data regarding number of members, capital structure, loans advanced and recovered, etc. have also been given.

Working Capital:-

2.17 It includes paid up capital, deposits and borrowings, loans outstanding includes outstandings in respect of loans; cash credits and over-drafts and the amount of the outstanding bills purchased or discounted. Overdues refer to the amount of loans or instalments which was due for collection but which was not actually collected and for the repayment of which no extension has been granted by the competent authority. Information of registered money lenders and loans advanced by them is given in table number 47.

2.18 The main functions of agricultural credit societies are to help members by way of providing short and medium term loans for meeting their agricultural necessities like improved seeds, fertilizers, agricultural improved implements etc. The help is also extended in the matters of storage, transportation and sales of the agricultural produce.

2.19 The agricultural non-credit societies look after the work of better farming by way of educating the agriculturists in the adoption of improved agricultural practices, crop protection etc. The societies also undertake educational, economical, cultural and house building activities so as to uplift the standard of living of the agriculturists.

2.20 The main function of the Urban Bank, Urban credit Cooperative societies and salary earners cooperative societies is to promote the qualities of economy, and

Cooperation among the members and also to make them industrious. They also augment the saving habits of the people by way of making the banking facilities easily available. They give loans to the members on the securities like gold, immovable property, Government securities, commercial goods, etc. They also provide loans to the artisans and small traders.

2.21 The main functions of non-agricultural non-credit societies are to run printing presses, to provide electricity to members and consumers for domestic, industrial and agricultural purposes, to run montessories, primary schools and educational institutions for educational spread and things of the kind.

2.22 The main function of Primary Cooperative Marketing society is the purchase and sales of agricultural produce grown by its members or member cooperative societies in its area of operation.

10. Medical and Public Health :-

2.23 In this section, data on medical and public health are given for the years 1977 and 1978/given. Table No. 48 gives medical facilities available through public and public aided bodies in each tansil alongwith indoor and outdoor patients treated. Data on vital statistics e.g. tansilwise births and deaths and infant deaths registered in the year 1977 and 1978 with break-up into male and female and number of deaths due to important causes, from the year 1971 to 1978 is given in tables No:49 and 50 respectively. Vaccination statistics and cholera inoculation done in each tansil during 1977 and 1978 is given in table No. 51. Table No. 52 gives statistics on family planning during the years 1977-78 and 1978-79.

11. Education :-

2.24 The data on tansilwise number of literates alongwith percentage of literacy as per 1971 census are shown in table no. 53. The data on education level of people in rural and urban areas are given in table No.s 54 and 55. The data regarding pupils and teachers with number of institutions in pre-primary, primary, secondary and higher categories are presented in table No. 56. The data on backward class enrolment and concessions granted to economically backward class and expenditure incurred under normal and plan grants on primary education in the district is shown in table No.s 57 to 59.

12. Transport and communication:-

2.25 Length of railway routes according to gauge is shown in table No. 60. The table No. 61 gives road length according to category and surface classification. Roads maintained by municipal councils/cantonment boards are also shown separately in this table. The data of number of motor vehicles in operation in Pune region covering Pune, Amadnagar and Solapur districts together are shown in table No. 62 (Districtwise figures are not available). Important operational statistics relating to Solapur division of Maharashtra State Road Transport Corporation are given in table No. 63.

2.26 Results of traffic census conducted in May 1977 and May 1978 on important roads in Solapur district are given in table No. 64. Statistics on Postal, Telegraphs and telephone facilities and on rural broadcasting are depicted in the table Nos. 65 and 66 respectively.

13. Local Bodies:-

2.27 The financial position of village Panchayats,

Municipal Councils and Zilla Parishad is shown in this section for the years 1976-77, 1977-78 and 1978-79.

2.28 The number of village Panchayats includes number of independent village Panchayats as also group village Panchayats. Income and expenditure of village Panchayats are exclusive of opening and closing balances respectively. Grants include grants from Government as well as from Zilla Parishad and Panchayat Samities for developmental activities. Government grants to village panchayats are mainly land revenue grants, equalisation grants and local cess grants. Government grants in respect of Municipal Councils are mainly grants on account of dearness allowances, grants for roads, for water supply, for educational purposes, for medical purposes and on account of percentage in land revenue. The receipts of Zilla Parishad are shown under four sub-heads, viz.

- i. Self raised resources.
- ii. Government grants.
- iii. Grants for agency scheme and
- iv. Debt. section. The expenditure is shown under two heads Revenue Expenditure and Debt. Section.

2.29 The data are collected from the Zilla Parishad Solapur and all the municipal councils in Solapur District.

14. Plan and Community Development:-

2.30 Data on plan expenditure under State and Local sectors and physical achievements in important fields during the years 1977-78 and 1978-79 are given respectively in table No.s 71 and 72. Statistics in respect of coverage of community development programme, stagewise expenditure of various blocks and blockwise physical achievements under community development programme are shown in table nos. 73 to 75.

15. Prices :-

2.31 The table No. 76 gives monthly average wholesale prices of agricultural commodities transacted in regulated markets. The district average for each variety and for each month is also given.

2.32 The table No. 77 gives the monthly average minimum and maximum retail prices of important commodities at Solapur head-quarters during 1977 and 1978. As the information collected for the given commodities is restricted to only one quotation and that also from only one shop in the district headquarters, the averages shown for individual commodities cannot be said to be fully representative but the data may prove useful as broad indicator of the trend in changes in retail prices over the period of time. The table No. 78 gives consumer price index number for working class of Solapur and Pune centres for the years 1977-78 and 1978-79. For the calculation of index the years 1960 and 1961 are taken as base years for Solapur and Pune centres respectively.

16. Miscellaneous:-

2.33 Statistical data pertaining to police force, crime statistics, cases disposed of in civil and criminal courts, cinema statistics regarding seating capacity in different types of theatres, number of banking offices, number of scheduled banks, their deposits and advances and number of joint stock companies, insurance policies and amount insured, collection of small savings, land revenue collections, number of presses, news-papers and periodicals published etc. are given in the table No.s 79 to 89. Table No. 90 gives information about the quantity of Rice, wheat and sugar

issued to fair price shops. The demand and procurement of levy in Balour district are indicated in Table No. 91. Statistics relating to General elections of Assembly 1978 and Lok Sabha 1977 are presented in table No. 92.

2.34 A table showing trends in selected indicators in the field of development such as ;

- a) Agriculture
- b) Livestock
- c) Industry
- d) Education
- e) Health etc.

for the years 1950-51, 1960-61, 1966-67, 1970-71, 1974-75, 1977-78 and 1978-79 is appended at the end. These selected indicators are very useful for assessing progress in various fields over important periods in the recent past.

CHAPTER - III

AN ANALYTICAL REVIEW OF SECTORIAL TRENDS

1977-1979.

3.1 The trends observed in various Socio Economic Sectors during 1977-78 and 1978-79 in Solapur district are analysed in this chapter.

The data for the years 1977-78 and 1978-79 are compared with the past data for the years 1960-61 or 1961-62 and 1970-71 which will indicate changes over the period.

Agriculture

3.2 Like other districts of Maharashtra state, Solapur district is an agricultural one and rural life in this district is mainly dependent on agriculture. This district is noted for growing jowar, Groundnut, Pulses and to some extent sugarcane. Main crop, however, is jowar, which is mostly harvested in kabi season. Cultivation is wide spread in Rabi season in this district. About 70 percent of area under cultivation is allocated to Rabi crops. Rainfall in Solapur district is scanty and many times uneven. It has been observed that over 85 percent of district area is drought Prone. This proportion is the highest in the state.

3.3 The development in the field of Agriculture can be assessed from three main indicators. They are

- (i) Percentage of gross area to net area sown;
- (ii) Percentage of net area irrigated to net area sown; &
- (iii) Productivity of important crops.

Following table gives tansilwise percentages of gross cropped area to net area sown during 1960-61, 70-71, 75-76, 76-77 and 1977-78.

Table No.-1.

Tansilwise percentage of Gross Cropped area to net area sown in Solapur district during the years 1960-61, 1970-71, 1975-76, 1976-77 and 1977-78.

Sr. No.	Tansil	Percentage of gross cropped area to net area sown during

Total		103.1	102.9	107.2	107.3	102.7

3.4. The figures of area cropped more than once during the years 1960-61, 1970-71, 1975-76 and 1976-77 were respectively as 37, 33, 82 and 81 thousand hectares.

There is a considerable increase in the double cropped area during 1975-76. The figures for 1976-77 are provisional

and hence no comments are offered.

Changes in Cropping Pattern.

3.5 The following table will broadly indicate the trend of cropping pattern in the district.

Table No.2

Percentage distribution of area under important crops to total gross cropped area.

Sr. No.	Name of crop	Percentage of area under crops to total gross cropped area during the years

10.	Chillies	NA	0.66	0.39	0.33
11.	Cotten	0.90	1.14	0.83	1.01

The cropping pattern of the district does not show any significant change over the period of years. There is, however, slightly increasing trend in the area sown under wheat, Bajra, Gram, Tur, Sugarcane and Cotten over a period of years since 1960-61. Jowar is the main crop of this district which covers about 60 percent of gross cropped area.

The following table gives the yield rates and out turn of principal crops in Solapur district for the years 1961-62, 1970-71, 1976-77 and 1977-78.

11. Chillies	539	662	692	788	41	51	36	41	

The data of yield rates in respect of almost all the crops except wheat sugarcane shows much variations and they are not comparable for the different reference years for the same crops. The yield rates however, depend on many factors such as rains, type of soil natural conditions, use of improved practices etc.

3.7 The tahsilwise percentage of the net irrigated area to net area sown are as follows.

Table No. 4

Percentage of net irrigated area to net area sown

Sr. No.	Tahsil	Percentage of net irrigated area to net area sown during			
		1960-61	1970-71	1973-74	1974-75

	11. Madna	7.57	9.52	11.19	12.94
	District Total	9.22	9.93	9.80	10.82

Percentage of net irrigated area to net area sown shows negligible increase in respect of tahsils Solapur North, Akkalkot, Pandharpur, Malsiras and Madna. However, there is no significant increase in percentage of net irrigated area to net area sown in respect of other tahsils during the different reference years.

3.8 The area under different irrigated crops is compared with the gross irrigated area in the following table.

Table No. 5

Percentage of area under different irrigated crops to gross irrigated area.

Sr. No.	Name of the crop	Percentage of area under different irrigated crops to gross irrigated area

9.	Chillies	5.66	5.38	5.93	3.18
10.	Cotton	NA	6.00	3.15	3.77

There is an increasing trend in the area irrigated under sugarcane crop during the last 18 years. However, no significant change is seen in percentage of area under different irrigated crops to gross irrigated area in respect of other crops for the different reference years. Maximum irrigated area is covered by the crop kabi Jowar, which is the main crop of the district.

3.9 The net area irrigated by different sources in 1960-61, 1970-71, 1973-74 and 1974-75 is given in the following table.

Table No. 6

Sourcewise net irrigated area in Solapur district.

P - Private.

It is evident from the above figures that the irrigation in the Solapur district mostly rely on wells as 83 percent area irrigated land is covered by well irrigation. The source of Govt. canal irrigation is mainly available in Malsiras Tansil.

Cooperation.

3.10 Agricultural credit:

In order to increase agricultural production substantially investment on large scale is quite essential. But due to poor conditions of farmers investment from their own resources is not possible. In turn, the inputs in agriculture suffers and ultimately returns from agriculture gets affected. So as to increase the investment in agriculture, agricultural credit societies were formed. All the villages in this district are covered under cooperation. The following table will give the position of agricultural credit societies in the district for 1960-61, 1970-71, 1977-78 and 1978-79.

viii. Loans overdues	NA	2,88,18	7,30,59	8,71,86

3.11 Although no. of agriculture credit societies has more or less remain the same during the last 18 years, there has been substantial increase by 226 percent in the members since 1960-61.

It is, however, discouraging to note that the amount of overdues also increased from Rs.288.18 lakhs in 1970-71 to Rs.871.86 lakhs 1978-79.

Agricultural wage rates.

3.12 The data on agricultural wage rates in rural areas are collected in three rural centres in Solapur district since July 1963. These centres are Mandrup from South Solapur tahsil, Vairag from Barsi tahsil and Modnimb from Madna tahsil.

-ed

The average wage rates (unskill/labour) at the three centres in Solapur district during the year 1963, 1970 & 1978 are as under:

Sr. Centre No.	1963		1970		1978	
	Men	Women	Men	Women	Men	Women
1. Mandrup	1.50	0.81	2.42	1.27	3.50	3.00
2. Vairag	1.54	0.82	2.12	1.03	3.17	1.67
3. Modniab	1.66	0.82	2.42	1.19	4.50	3.50

From the above table, it is revealed that the wage rates have shown an increasing trend during the last 15 years. Further it can be seen from the table that levels of wage rates are generally high at Modniab centre and low at Vairag centre. The reason for the high wage rates at Modniab may be attributed to the fact that it is a commercial centre and hence greater demand for labourers.

3.13 Live stock.

Animal husbandry in India from the view point of its substantial contribution in providing income and draught power to farmers and subsidiary food to human population, assumes great importance in the rural economy even today. The twelfth live stock census was conducted in 1978. However, since the final figures of this census are not yet made available, the data for 1972 census is analysed below.

3.14 The bovine and ovine population per hundred hectares of land as per 1972 census works out to be 96 for the district.

3.15 The variation in livestock population during the five years since 1966 can be seen from the following table.

Table No.9

Livestock population (figures in '000')

Sr. No.	Category	Population		Increase or decrease.
		1966	1972	
1	2	3	4	5

4.	Sheep	256	230	(-) 36
5.	Goats	336	427	(+) 91
6.	Poultry	473	604	(+) 131

From the above, it is seen that the cattle and sheep population has decreased considerably as compared to 1966 census figures. This is due to the fact that Solapur District was affected by famine and chronic scarcity. There is a slight increase in the population of buffaloes while the

population of goats and poultry increase considerably as compared to 1966 census figures.

3.16 Consumption of electricity:

Out of 948 inhabited villages in the district 758 villages have been electrified till the end of March 1979. Talukwise distribution of these villages along with number of agricultural

pump sets energised in each tahsil is given in the following table

Table No. 11

Total 190 villages are remained to be covered under electrification programme. The entire district will be covered under electrification programme by 31-3-1983.

With the expansion of kural Electrification activities, the use of electric pumpsets for irrigation purposes is also increasing. From the above table it is seen that the number of electric pump sets increased from 6370 in 1970-71 to 22527 in 1978-79.

Electricity consumption per capita for different purposes is given below:

Table No.12

Sr. No.	Purpose	Per capita consumption during the year(kwh)		
		1960-61	1970-71	1978-79
1	2	3	4	5
1.	Domestic	0.94	3.58	6.22
2.	Commercial, light and small power.	2.11	2.88	4.36

6.	Other purposes.	0.18	1.16	1.56
7.	Total	9.37	54.12	71.98

The per capita consumption of electricity in 1978-79 increased upto 71.98 kwh. as against 9.37 kwh. in 1960-61 and 54.12 kwh. in 1970-71. This increase is mainly because of increase in the number of electrified villages and towns in the district.

Per capita consumption for industrial purposes has increased to 44.96 kwh. in 1978-79 from only 5.87 kwh. in 1960-61

3.17 Employment Exchange Vacancies:

Employment generation is one of the important aims of planning in an over-populated country like India. Employment Exchange statistics gives an indication of the magnitude of the unemployment problem to a very limited extent because it does not include the large number of unemployed persons seeking manual work and those who have not enrolled with the employment exchange.

The position of Solapur district regarding registration and vacancies notified etc. can be seen from the table given below.

Table No. 13

Number of candidates enrolled and vacancies notified in 1961-62, 1970-71, 1977-78 and 1978-79.

Sr.No.	I t e m	During			
		1961-62	1970-71	1977-78	1978-79
1	2	3	4	5	6
1.	No. of Registration	3,213	11,527	14,620	18,752
2.	No. of vacancies notified.	1,361	1,414	1,213	1,514
3.	No. of live register (at the end of March)	5,082	9,744	24,710	30,998
4.	No. of candidates placed.	712	532	783	1,003

From the above table it is seen that there is^a considerable increase in the enrolment of candidates in 77-78 and 78-79 as compared to 1961-62, 1970-71. So also the number of candidates remaining on live register of the employment exchange is also increased as compared to the figures of 1961-62, 1970-71. The percentage of placement to total enrolment has however decreased in 1970-71, 77-78 and 78-79 as compared to in 1961-62. It was 3.7 in 1961-62 whereas it was 5.0, 5.4 and 5.4 in 1970-71, 1977-78 and 1978-79 respectively. This may be due to increase in number of registrations in employment exchange and direct recruitment through state selection board at Aurangabad of class III employees.

3.18 Medical Facilities.

The following table gives the data about medical facilities, no. of patients treat^aed in public and public aided institutions in the district.

Table No.14

9.	No. of outdoor patients treated in '000'	585	901	1306	1396

It can be seen from the above table that increase in no. of hospitals in the reference years in this district was significant. The increase in no. of hospitals in this period is from 3 in 1961 to 10 in 1978. There is no substantial increase in no. of dispensaries during the last 17 years; however there is increase in no. of maternity houses and primary health centres. The increase in no. of doctors in this period is appreciable being about 216 percent in 1978 as compared to 1961. Growth in medical and health facilities can also be viewed by considering the indoor facilities available in beds and indoor patients treated by the institutions. It is

evident from the above table that increase in no. of beds was about 200 percent during the reference period. Number of beds available to people through these institutions has increased to 53 per lakh population in the year 1978 from 36 in the year 1961. It is also evident that number of indoor patients treated per bed has increased to 41 in 1978 from 34 in 1961.

Education

3.19 The following table gives the data of educational facilities in the district during the reference years.

Table No. 15

	Enrolment	3,512	12,997	19,694	18,959
	Teachers	169	506	755	748

There has been considerable increase in the number of primary/secondary and higher institutions during last 18 years. The average no. of students per primary school which was 150 in the year 1961-62, the same has increased to 209 in the year 1978-79.

Teacher/pupil ratios in respect of primary, secondary and Higher are given in the following table.

Table No.15

I t e m	Y e a r			
	1961-62	1970-71	1977-78	1978-79
1	2	3	4	5

II. <u>Teacher/Pupil Ratio</u>				
Primary	40	37	36	38
Secondary	26	26	27	24
Higher	21	26	26	25

With the establishment of more number of secondary schools the ratio of secondary to primary institutions is reduced from 14 in 1961-62 to 8 in 1978-79. No. of higher institutions has been increased from 6 in 1961-62 to 21 in 1978-79, as a result a ratio of higher/secondary is declined from 19 in 1960-61 to 11 in 1978-79.

The teacher/pupil ratios for different categories of institutions also reveal that the staffing strength is maintained nearly about the standard norms prescribed.

3.20 Banking.

There were 50 banking offices in Solapur district in 1961. The number increased to 96 in 1971 and further increased to 207 in 1977. The expansion of banking offices gathered momentum since 1971. Following table will indicate the development of banking activities in Solapur district.

Table No. 17
Banking facilities

1	2	3	4	5	6	7	8
Total	50	96	207	6954	4059	1,332	

From the above table it is seen that a net work of banking offices is spread over in rural areas of the district. As a result the ratio of one bank to household has declined from 6954 households per banking office in 1961 to 1,332 in 1977.

3.21 Transport and Communication:

Facilities about transport and communication play important role in planned development. Transport facilities provide a vital media both for exchange and growth of social and economical activities. All along, Government is pursuing plans to development these facilities. Railways and Roads form two aspects of these facilities for Solapur district. In Solapur district there has been no change in the rail length since long. However, the road length has undergone considerable change since March 1961. The road length per 100 km. of area was 14.0 by March 1961. The Ratio rose to 21.4 by March 1971 and to 59.5 by March 1979.

3.22 Prices:

Since November 1962 prices of important commodities are being collected by District Statistical Organisations at each of the district head quarter on each friday. The following

table indicates the average prices of some important commodities collected at Solapur city for the year 1964, 1970, 1977 and 1978.

16.	Washing soap (501 Bar)	Bar	1.61	2.11	2.30	2.90

It appears from the above table that there has been constant rise in prices in almost all the essential commodities since 1964. A significant price rise is observed in case of Tur dal, Groundnut oil, Vanaspati, Tea leaf, shirting cloth etc.

The prices collected for the given commodities is restricted to only one quotation and that too from only one shop at the district head quarter. The averages shown for individual commodities can not be said to be fully representative but the above data may however be useful as a broad indicator of the trend in changes.

Price index is worked out by the commissioner of Labour. The Consumer Price Index for working class for Solapur centre has reached the mark of 343 in 1978-79 with the base year 1950.

Annual Plan : 1977-78 and 1978-79.

Introduction: District Planning

4.1 The Maharashtra Govt. adopted the policy of District Planning from the Fifth Five Year Plan with two main objectives viz. i) Removal of the interdistrict and intradistrict imbalances in development and ii) desire to ensure that the district will be given an opportunity to attain full development having regard to their potential, available manpower and other resources.

With a view to providing proper planning machinery at the district level for formulating development plans for each district in the context of the decision of Govt. to adopt the district as basic unit of planning a District Planning and Development Council has been constituted for each district by amalgamation of District Planning Boards and District Development consultative councils constituted in the year 1972. On this body, representation is given to the elected representatives of the people in the Parliament and State Legislature as also of the urban local bodies, viz. the District Central Cooperative Bank, the Land Development Bank, the Head Bank of the District, the Regional Development Corporation, Zilla Parishad Officials, Divisional Commissioners etc. Besides nine non-official members representing various interests such as industry, trade and commerce, universities and social welfare are appointed on this body. The Minister in charge of the District has been appointed as Chairman of the District Planning and Development Council with a view to obtaining close

coordination between the policies of the state Govt. and of the district. The Collector of the District has been appointed as member secretary of the D.P.D.C.

The D.P.D.C. has been entrusted with the functions of giving guidelines to various implementing agencies at the District level in the task of Plan formulation and to ensuring coordination between various implementing agencies including the Zilla Parishad. The day to day task of plan formulation and implementation is entrusted to a smaller committee consisting of some of the members of the D.P.D.C. The Chairman and Vice-Chairman of the committee are the same as that of the council. The secretarial work is however entrusted to District Planning Officer.

The D.P.D.C. has to meet twice in a year mainly to review the progress of Plan at the end of the year and to finalise and approve the District Annual Plans. The Executive Committee of the councils is required to meet once in a month (1) to consider monthly progress report of plan schemes, (2) to identify reasons for shortfall in financial and physical achievement and (3) ^{to} suggest measures for expeditious implementation of the programmes. (4) to consider excess requirements/savings indicated by the District implementing Officers and propose reappropriation for approval of Govt. The committee has also been empowered to consider new schemes or works for inclusion in the District Annual Plan in case that is found necessary.

4.2 Annual Plans- 1977-78 and 1978-79.

As per original schedule the year 1977-78 and 78-79 were the 4th and final year of the Fifth Five year Plan. However, the

Govt. of India decided to terminate the 5th Five Year Plan at the end of 1977-78 and start the new Five Year Plan from 1978-79. Hence the Fifth Plan Period covers only four years (1974-75 to 1977-78)

A brief review of the progress of Annual Plans 1977-78 and 1978-79 is taken in following paragraphs.

Govt. had approved plan outlay of Rs.955.55 lakhs and Rs.1086.89 lakhs for the years 1977-78 and 78-79 respectively.

The major groupwise distribution of these outlays was as follows.

Table No.1

Sr.No.	Major/Sector group.	Approved outlays(Rs.in lakhs)	
		1977-78	1978-79
1.	Agricultural Programmes, cooperation and community	323.39 (33.3)	355.52 (32.7)
2.	Irrigation and Power	129.79 (13.6)	103.00 (9.5)
3.	Industry and Mining, Transport and communication.	96.41 (10.1)	184.44 (17.0)
4.	Social Services.	277.39 (29.0)	299.93 (27.6)
5.	Miscellaneous including E.G.S.	128.57 (13.5)	144.00 (13.2)
Total		955.55 (100)	1086.89 (100)

(NB.: Figures in bracket indicate percentage to total)

During the course of the year the D.P.D.C. has made readjustment in plan outlay considering the excesses/ savings indicated by the District Implementing Officers. As against these revised plan outlays actual expenditure incurred during the two years under reference is indicated in the following table.

Table No. 2

			(121.3)	2903.77	(123.68)	1083.89	(118.2)

Note: Figures in bracket indicate percentage of expenditure to revised outlay.

It is seen from the foregoing paragraphs that there is an overall increase in the expenditure during the year 1978-79 under all the major heads except cooperation and E.G.S. wherein only minor decrease is seen. The Agricultural programme and

Transport and communication has shown a significant increase in expenditure during 1978-79 over the year 1977-78. This was due to intensification of programmes of Brought Prone Area Programme, Minor Irrigation, and crash programme of rural roads. From the year 1978-79 the Govt. has initiated a crash programme for construction of rural roads with a view to providing road links to state highways or Major district roads in the rural areas. The social services sector has also shown an increase in allocation of outlay in 1978-79 over 1977-78. This was due to increase in the inevitable expenditure of existing scheme in General Education, Medical and Health, water supply and sanitation, welfare of backward classes and nutrition. The sub-sectorwise expenditure is shown in table No. 71 of part-II of this publication.

The following table gives the percentage distribution of total expenditure incurred on different major heads of development.

Table No.3

Percentage of Expenditure.

Sr.No.	Major Head of Development.	Annual Plan 1977-78	Fifth plan 1974-75 to 77-78	Annual plan 1978-79
1	2	3	4	5
1.	Agricultural Programme	18.59	16.32	22.70
2.	Cooperation and Community Development	8.55	3.70	6.97
3.	Irrigation and Power.	10.07	22.22	3.21
4.	Industry and Mining	2.09	5.12	3.04
5.	Transport and communication	2.77	2.75	8.98
6.	Social services	21.27	17.43	22.10
7.	Miscellaneous	36.66	32.46	28.00
	Total	100.00	100.00	100.00

There is no significant variation in the percentage distribution of total expenditure incurred during the reference

and
period except on Transport/Communication during 73-79. The sudden rise in percentage of expenditure on Transport and communication can be attributed to crash programmes of Road Development undertaken during 1973-79.

4.3 Physical achievements:

The details of physical achievements under different plan schemes are given in Table No. 72 of Part-II of this publication. However, a brief review of the important achievements under each sub-head of development is taken in the following paragraphs:-

(I) Agricultural Programme:- This major sector is comprised of the following sub-sectors 1) Agricultural production 2) Minor Irrigation 3) Soil conservation 4) Ayacut development 5) Animal Husbandry 6) Dairy Development 7) Forest 8) Fisheries 9) D.P.A.P. and 10) Community Development.

(i) Agricultural Production:- An area of 600 hectares was covered under Rat and paste control programme, carbofuron treated seeds of 25 quintals were distributed to cultivators. Subsidy was given to small farmers having dry land below 16 acres on purchase of improved seeds of jowar. In all 177 kg. and 300 kg. of subsidised improved seeds of jowar were distributed to eligible cultivators during the year 1977-78 and 78-79 respectively.

During the year 1978-79, a new scheme of laying out of demonstrations in oil seeds was introduced in this district under which 703 demonstrations were held on groundnut and safflower.

(ii) Minor Irrigation:- The ground water development programme covers two schemes viz.- construction of new wells and installation of pumpsets. subsidy given to the no. of cases

in both the schemes is indicated below.

Year	New wells	Installation of pumpsets.
1977-78	31	36
1978-79	217	265

Under surface water development programme, 11 minor irrigation works which included Tanks and KT weirs, were completed by the end of March 1979. In local sector 2 works, one each of Percolation Tank and lift irrigation work were completed.

(iii) Soil conservation:- Under this programme more work was done in the year 1978-79 than the previous year which can be seen from the following figures.

Item	Unit	Achievement in	
		1977-78	1978-79
1. Contour Bunding	Hec.	7020	3199
2. Reclamation of saline land.	Hec.	167	228
3. Rectification	Hec.	12395	29142

Under the scheme of afforestation for soil conservation, operations of different stages covering an area of 205 hectares were carried out by the end of the year 1978-79.

(iv) Ayacut development:- Under this programme also more work was done in year 1978-79 than previous year even though targets allotted could not be achieved.

The yearwise target and achievement is below:-

Year	Land Development in hectares	
	Target	Achievement
1977-78	7150	3031
1978-79	8469	3707

(v) Animal Husbandry :- Artificial insemination facilities were provided in 30 sub-centres in the district by the end

of 78-79. During the same period, 4 vet. dispensaries and 3 aid centres were started; besides it was decided to establish one polyclinic in the district, for which, the construction of building was started. During the year 1977-78 and 1978-79, 2850 and 5600 animals respectively were treated for immunization from foot and mouth disease under the scheme of supply of milch cows to weaker sections, 20 cows were distributed through loan from banks for which subsidy in interest was given from plan provision.

(vi) Dairy Development: - With a view to raise the capacity of milk handling from 2000 litres to 51000 litres per day, an expansion programme of Govt. milk scheme Solapur was launched from 1977-78 and incidental activities were carried out during the period under reference. Financial assistance in the form of management subsidy was given to 6 and 29 Dairy Societies during the year 1977-78 and 1978-79 respectively.

(vii) Fisheries: Under this programme 36 lakhs fish seeds in 1977-78 and 13 lakhs fish seeds in 78-79 were distributed in order to stock in the water pools in the district. 22 Fisher youths were deputed for training in fisheries and cotton/Nylon twine to the extent of 1554 kg. was supplied to fishermen through cooperative societies during both the years respectively.

(viii) Forest: Three schemes viz. Development of minor forest produce, Farm forestry and Fodder development were implemented in 189 hectares.

(ix) Community Development Programme: - Mainly the work of completion of incomplete C.D. Works were carried out under this programme. During the period under reference the under mentioned works were completed.

Sr.No.	Item	No. of incomplete works completed	
		1977-78	1978-79
1.	School rooms	133	96
2.	Roads and C.D. Works	96	94
3.	Panchayat Ghar	12	11
4.	Others	3	3

(x) Drought Prone Areas Programme: (DPAP):- All the tansils in the district except some pockets coming under Major Irrigation Programme viz. Bhina (Ujjani) Project are recognised as drought prone. A special programme called D.P.A.P. is being implemented in 20 watersheds selected for the purpose, with the assistance of World Bank. The programme is aimed at increasing the irrigation potential, ground water as well as surface water, in these watersheds. Besides, emphasis is also given on the other activities like agricultural extension, Dairy Development, pasture development and livestock development. Information on the progress of the important activities undertaken in this programme is given in the following table.

(ii) Health:—Construction works of spillover items of PHC/ subcentres and quarters for medical interns were continued. Medicinal grants to PHCs. and subcentres were given to 70 units.

(iii) Water supply and sanitation:— Under Govt. water supply schemes in urban areas one work viz. laying of additional pipe line in Akkalkot Municipal Council was completed in 1977-78 and other two works were in progress. During 78-79 first stage work of improvement to Barsi water supply scheme was completed. Under Municipal water supply schemes, three works were in progress. In case of rural water supply programme, 14 and 19 piped water supply schemes were continued during 1977-78 and 1978-79 respectively. Besides 51 and 66 incomplete dug wells were completed during the years under reference respectively; were 68/borewells in 1977-78 and 196 borewells in 1978-79 were drilled through G.S.D.A. Financial Assitance of Rs.7.00 lakhs was given to Solapur Municipal Council and 150 bore wells were drilled during 1977-78.

(iv) Housing:— Under the scheme of environmental improvement in urban slums, the Solapur Municipal Corporation has provided various basic amenities in 16 urban slums. The under mentioned basic aenties were provided during both the years.

Amenities provided	Unit	Year	
		1977-78	1978-79
1	2	3	4
1. Road constructed	sq.km.	27605	564
2. Gutters constructed	Mtrs.	14320	200
3. Latrine seats constructed	No.	253	115
4. Water supply	No.	130	14

Under Rural Housing Programme the number of huts constructed was 875 and 254 during the year 1977-78 and 78-79 respectively for providing to landless labourers.

(v) Urban Development:- 5 Municipal councils were assisted for implementing various activities under development plans in 1977-78 and 1978-79. Besides permission was given to Solapur Municipal Corporation to raise open market borrowings to the extent of Rs. 105 lakhs during two years period for improvement of its water supply scheme and implementation of other developmental activities under I.U.D.P.

(vi) Labour and labour welfare:- In Industrial Training Centre at Solapur, in order to accommodate more trainees, intake capacity has been raised by 104 seats. Financial assistance in the form of noncurium was given to educated unemployed numbering 1167.

(vii) Welfare of B.C. and Social Welfare:- The progress in this sector is additive to the development programme under other sector which directly or indirectly benefits the backward and weaker sections of the society. The important physical achievements under this sector are indicated in the following table.

Note:-(i)Min.Price = Minimum Price (ii)Max Price = Maximum price

(iii)Average price will be based on the weekly price quotation covering a month (i.e. Arithmetic mean)

(iv)As the information collected for the given commodities is restricted to only one quotation and that too only from one shop at District head quarter, the average shown for individual commodity can not be said to be fully representative but data may prove useful as broad indicator of trend incanges in retail prices over a period of time.
