THE SECRETARY TO GOVERNMENT,
AGRICULTURE AND CO-OPERATION DEPARTMENT,
MANTRALAYA ANNEXE,
BOMBAY-400 032.

*Subject:—Annual Season and Crop Report of Maharashtra State
for the year 1976-77.*

Sir,

I am submitting herewith the Annual Season and Crop Report of Maharashtra State for the year 1976-77, ending the 31st July, 1977.

Under the influence of a cyclonic storm in the Arabian Sea, the monsoon arrived in the western coast region slightly earlier than the normal date. Initially, it was vigorous in the South Konkan only, while practically no rains were received till the 24th June 1976 in other parts of the State. After the receipt of widespread rains in the State from the 25th June, kharif sowings started in early July and were completed by the end of July or the first week of August. Due to this delay in sowing rains, the normal areas under cotton could not be sown and its area went down by 1.45 lakh ha. during 1976-77 as compared to that in the preceding year. This area was diverted to kharif jowar crop. The area under kharif pulses also recorded a reduction to some extent while the area under other crops recorded only marginal variations. Due to subsequent sufficient rains in August and till mid-September, the condition of the different kharif crops in the State was good. It was then expected that a bumper kharif harvest would materialise. However, from mid-September, a dry spell for about 7 to 8 weeks prevailed in the State. Though the early kharif crops such as early paddy, hybrid jowar, bajri and early pulses escaped the adverse effects of the long dry spell, the late maturing varieties of these crops, specially those on light to medium soils were affected to Rabi sowings took place in time barring a few areas in the State.

(ii)

The net cropped area in the State was 182.05 lakh ha. in 1976-77 as against 182.62 lakh ha. in 1975-76, showing a decrease by 0.3 per cent. The area cropped more than once increased from 14.02 lakh ha. in 1975-76 to 15.83 lakh ha. in 1976-77 or by 12.8 per cent. The over all total cropped area thus showed an increase from 196.64 lakh ha. in 1975-76 to 197.88 lakh ha. in 1976-77 or by 0.6 per cent.

The area under food crops during 1976-77 was 147.3 lakh ha. and was more by 1.4 per cent over that in the preceding year. On the other hand, the area under non-food crops showed a decrease of 0.77 lakh ha. having gone down to 50.53 lakh ha. 1976-77 from 51.30 lakh ha. in 1975-76.

During the year under report, the net and gross irrigated area was 18.33 and 22.42 lakh ha. respectively, showing an increase of 1.8 per cent and 3.3 per cent over the corresponding figures of the preceding year.

The area under foodgrain crops in 1976-77 was 140.10 lakh ha. and was higher by 1.2 per cent as compared to that in the preceding year. The foodgrain production was higher by 5.79 lakh tonnes having gone up to 96.15 lakh tonnes, from 90.36 lakh tonnes in 1975-76, establishing a new high. The crops of jowar, bajri and maize in particular fared well during the year. The main reasons for the increased production were (i) the higher coverage under hybrid and high yielding varieties, (ii) increased irrigation facilities, (iii) co-ordinated advanced planning by officers of the Agril. Department, Zilla Parishads and other concerned Departments and (iv) absence of major pest and deceases.

The area under cotton during the year was only 21.62 lakh ha. Again, due to long dry spell that prevailed in the State, the bearing of bolls and their development was not satisfactory; hence the production of this crop was low, being 8.47 lakh bales of 170 kg. each.

The area under groundnut increased to 9.05 lakh ha. during the year under report, as compared to 8.54 lakh ha. in the preceding year. The crop was however affected by the long dry spell at the critical stage of growth, affecting the formation and development of pods, thereby lowering the production of this crop.

The cultivation of sugarcane crop increased to 2.98 lakh ha. from 2.68 lakh ha. in 1975-76. The production of gur from the harvested area of 249 lakh ha. was the highest ever, being 24.45 lakh tonnes.

The prices of the important commodities except tur dal, groundnut all oilseed crops, and potato, decreased slightly during 1976-77, mainly due to the increasing trend in the agricultural prdouction.

(iii)

The quinquennial live stock census 1972 showed that in comparison with census figures of 1966, there was a slight decrease of 0.2 per cent in the number of cattle. The total number of buffaloes recorded an increase of 8.5 per cent. The number of buffaloes used for breeding purposes alone, decreased by 6.5 per cent. The number of sheep decreased by 3.5 per cent and horses and ponies together by 42.3 per cent while the number of goats recorded an increase of 15.4 per cent. The poultry population increased by 23.4 per cent.

According to the above census, the number of ghanis decreased by 47.0 per cent and sugarcane crushers decreased by 50.6 per cent. The number of wooden ploughs, iron ploughs and bullock carts showed an increase of 0.8 per cent, 13.2 per cent and 4.0 per cent respectively. On the other hand, the number of oil engines and tractors increased by 17.2 per cent and 71.2 per cent respectively. The number of electric pumps used for irrigation shot up from 37979 to 169778 i. e. four and half times the figure in the preceding census.

Yours faithfully,

S. R. CHOPDE,

Director of Agriculture,

Maharashtra State,

Pune-411 001.

Season and crop Report of the State of Maharashtra for the year 1976-77

CHAPTER I

SEASON

Distribution of Rainfall :

1. Table 1 (pages 31-47 gives the monthly rainfall received during the year *vis-a-vis* the normal rainfall; at selected centres in the State.

(i) *Pre-monsoon rains (April to May 1976)* :—The pre-monsoon showers were above normal only in talukas of Baramati (District Pune), Akola (District Akola), Amravati (District Amravati), Katol (District, Nagpur), Udgir (District Osmanabad) and Sironcha (District Chandrapur). They were normal or near normal in parts of Solapur, Wardha and Nagpur district but below normal or even absent in the rest of the State.

(ii) *Monsoon rains (June to September 1976)* :—The monsoon rains were above normal in Thane, Kulaba, Nasik, Dhule, Pune, Satara, Kolhapur and Parbhani districts but below normal in Ahmednagar, Solapur, Beed, Osmanabad and Buldhana districts. In the remaining districts, the monsoon rains were either normal or near normal.

(iii) *Post monsoon rains (October to November 1976)* : The post monsoon rains were above the normal only in parts of Kulaba and Dhule districts, while they were normal or near normal in Nasik, Jalgaon, Pune, Satara, Kolhapur, Buldhana, Akola and Amravati districts. These rains were below normal in the remaining districts of the State.

(iv) *Winter rains (December 1976 to March 1977)* :—Winter rains were almost absent in most parts of the State except parts of Dhule, Jalgaon, Satara and Kolhapur districts where they were above the normal.

(v) *Total rainfall for the year* :—The total rainfall during the year under report was above the normal in Thane, Kulaba, Nasik, Dhule, parts of Jalgaon, Pune and Satara districts while it was normal or near normal in Ratnagiri, parts of Jalgaon, Kolhapur, Parbhani, Bhandara, Nagpur and Chandrapur districts. The rainfall in the remaining districts of the State was below the normal.

Effect of rainfall on sowings and crop growth :

2. Under the influence of a cyclonic storm in the Arabian Sea, the monsoon commenced in the western Coast slightly earlier than the normal date. It was vigorous initially in South Konkan only. In other parts of the State, there were no rains till the 24th June, 1976. On receipt of widespread rains in the State from the 25th June, Kharif sowings started in early July and were completed by the end of July or first week of August.

During the last three days of July, very heavy rains were recorded in western Maharashtra only, due to which the rivers in that region were in floods. The delayed on-set of sowing rains was responsible for reduction of cotton area, which was diverted mainly to

Kharif jowar. The area under Kharif pulses recorded a reduction to some extent while the area under other crops recorded only marginal variations. Due to subsequent sufficient rains in August and till mid September, the condition of the different kharif crops in the State was good. It was then expected that a bumper kharif harvest would materialise. However, from mid September, a dry spell for about 7 to 8 weeks prevailed in the State. Though the early kharif crops such as early paddy, hybrid jowar, bajri and early pulses escaped the adverse effect of the long dry spell, the late maturing crops like late varieties of paddy, local jowar, cotton, late groundnut and tur crops specially on light to medium soils were adversely affected due to extreme moisture stress. The crops in heavy soils could however sustain the stress to some extent.

The condition of cotton and groundnut crops also was sub-normal due to the moisture stress. In the case of cotton crop, the bearing of bolls and their development was not satisfactory. In case of groundnut crop, the pod formation and pod development were affected. At the time of groundnut harvest also, some difficulty was experienced due to hardening of soils.

The weather conditions during the rabi season 1976-77 were very peculiar. Apart from the long dry spell from mid September to mid November instead of the usual cool weather, the temperatures were above the normal, by 7 to 10°C, while the humidity was below the normal by more than 10%. The weather was thus warmer and drier than usual.

The rabi sowings in the State begin with rabi jowar crop in major crop growing districts of Solapur, Ahmednagar and parts of Pune. The sowing of this crop in these districts was mostly completed by September. In other parts of the State, rabi sowings were held up for want of adequate soil moisture and were completed rather late on receipt of moderate rains on the 6th November 1976 in the Deccan region and on the 9th November 1976 in Marathwada and Vidarbha regions, relieving the anxiety of the cultivators. The delayed sowings had however, adverse effect on the growth of the rabi crops.

The onset of cold weather was delayed till 3rd week of December and the soil moisture had started receding. Hence, the cultivators in some parts undertook sowing of rainfed wheat without waiting for the onset of the cold weather. The crop thus sown was stunted and did not throw tillers and the earheads were also small with very few grains.

The widespread and substantial rains in the State on the 20th, 21st and 22nd November 1976, were helpful to some extent to the rabi crops.

The unirrigated crop sown later with the onset of cold weather, as also the irrigated crops, were in good condition. On the whole, the condition of wheat crop during 1976-77 was not satisfactory, as in the preceding

Year. The condition of gram crop was fair to satisfactory.

Light to moderate rains were received during the first week of March 1977, in different parts of the State. They did not adversely affect the standing rabi crops, to any appreciable extent.

The condition of summer paddy in the districts of Thane, Kulaba, Ratnagiri, Bhandara and Chandrapur

and of other summer crops of groundnut, maize and Vaishakhi Mung was generally satisfactory.

On the whole, the agricultural season 1976-77 was generally favourable to the millet crops of Jowar, Bajra and Maize while for other crops including cotton and groundnut, it was not favourable.

CHAPTER II

AREA CULTIVATED AND UNCULTIVATED

(Table II, pages 48-49)

(Summary Table-A, pages 16)

Number of villages :

3. The number of revenue villages in the State was 38,857 in 1976-77, as against 38,870 in the preceding year. The decrease in the number by 13 villages was due to programme for amalgamation of villages carried out in Kulaba, Yavatmal, Wardha, Bhandara and Chandrapur districts.

Total Geographical area :

4. Geographical area by village papers (vide Summary table) was 307.6 lakh hectares.

5. It will be seen from the Summary Table-A (Page 16) that during the year under report, the net cropped area in the State was 182.05 lakh hectares as against 182.62 lakh hectares in 1975-76, thus showing a decrease by 0.3 % over that in 1975-76. The area cropped more than once increased from 14.02 lakh ha. in 1975-76 to 15.83 lakh ha. in 1976-77 or by 12.8%.

The overall total cropped area thus showed an increase from 196.64 lakh ha. in 1975-76 to 197.88 lakh ha. in 1976-77 or by 0.6%. The increase in the total cropped area during the year under report is attributed to the increase in the area under double cropping (or even multiple cropping at few places in the State,) due to increased irrigation facilities and also to the larger coverage under hybrid jowar crop.

At the State level, area under non-agricultural uses, and current fallows increased during the year under report by 2.7% and 8.9% respectively, as compared to the corresponding areas in the preceding year, while the areas under culturable waste land, permanent pastures and other grazing land, decreased during 1976-77, by 2.3% and 1.3% respectively, as compared to the areas in the year 1975-76. The other items of land utilisation recorded marginal variations.

CHAPTER III

IRRIGATED AREA

(Table III-A and III-B, pages 50-61)

(Summary Tables 'B' and 'C', pages 17-18)

6. The number of wells, (excluding tube wells) used for irrigation purposes showed an increase over the previous year, it went up from 7,78,713 in 1975-76 to 7,85,186 during 1976-77 or by (0.8 percent).

The number of wells used for domestic purposes and number of wells having independent ayacut also recorded an increase by 0.7 percent and 1.0 percent, respectively. The number of wells not in use, and number of wells supplementing recognised sources of irrigation also showed an increase by 0.2 percent and 6.9 percent respectively.

The number of oil engines decreased by 6.1 percent, on the other hand the number of electric pumps was higher by 11.5 percent.

7. The net irrigated area increased from 18.02 lakh ha. in 1975-76 to 18.33 lakh ha. during 1976-77

or by 1.8 percent. The corresponding increase in the gross irrigated area was 21.71 lakh ha. in 1975-76 to 22.42 lakh ha. during 1976-77 or by 3.3 percent.

During 1976-77, the percentage of net area irrigated to net area sown in the State was 10.1 percent while that of gross area irrigated to gross area sown was 11.3 percent. The corresponding figures during 1975-76 were 9.9 percent and 11.0 percent respectively.

8. Net area irrigated by surface and well irrigation : The net area irrigated by surface irrigation increased by 3.3 percent, having gone up to 7.41 lakh ha. in 1976-77 from 7.17 lakh ha. in 1975-76. The net area irrigated by wells also showed an increase from 10.84 lakh ha. in 1975-76 to 10.92 lakh ha. in 1976-77 (or by 0.7 percent).

9. Sourcewise gross area irrigated : The gross area irrigated in the State by surface irrigation increased from 8.49 lakh ha. in 1975-76 to 8.83 lakh ha. during 1976-77 (or by 4.0 percent) while the gross area irrigated by wells increased by 0.3 percent, having gone up from 13.22 lakh ha. in 1975-76 to 13.59 lakh ha. during 1976-77.

10. Irrigated area under food and non-food crops : The Summary Table 'C' (Page 18) gives the cropwise irrigated area. It is seen from this table that out of the total gross irrigated area of 22.42 lakh ha. during 1976-77, an area of 20.82 lakh ha. (or

91.1%) was under food crops and 1.60 lakh ha. (or 8.9 percent) was under non-food crops. Among the food crops, food-grains occupied the major share of 15.09 lakh ha. (or 72.4%).

Though the irrigated area under all groups of crops showed an increase during the year 1976-77, the irrigated areas under a few crops viz. rice, rabi jowar and cotton decreased by 1.5%, 1.5% and 3.0% respectively. Turmeric and onion are grown only under irrigation and their area declined by 28.18% and 13.6% respectively.

CHAPTER IV 62-85

CROPPED AREA

(Table IV—A, IV—B and IV—C pages 62-82)

(Summary Table D pages 19-22)

11. The divisionwise gross cropped area, area cropped more than once, net cropped area and the area under food and non-food crops for the two years 1975-76 and 1976-77 are shown in the following tables :

(i) Gross cropped area :

(Area in '00 'ha.)

Division	Gross/Cropped area		Percentage increase (+) or decrease (-) over 1975-76
	1975-76	1976-77	
Bombay	.. 34,426	35,333	+ 2.6
Pune	.. 54,105	54,355	+ 0.5
Aurangabad	.. 52,763	53,437	+ 1.2
Nagpur	.. 55,345	54,759	- 1.0
State Total	.. 1,96,639	1,97,834	+ 0.6

It is seen from the above that at the State level, the gross cropped area recorded a slight increase, having gone upto 197.83 lakh ha. in 1976-77 from 196.64 lakh ha. in 1975-76 or by 0.6%. The corresponding increase in the divisions of Bombay, Pune and Aurangabad was 2.6%, 0.5% and 1.3% respectively while in Nagpur Division, there was a fall by 1.0%.

(ii) Area cropped more than once :

(Area in '00 'ha.)

Division	Area cropped more than once		Percentage Increase (+) or decrease (-) over 1975-76
	1975-76	1976-77	
Bombay	.. 2,543	2,868	+ 12.5
Pune	.. 4,434	4,960	+ 11.8
Aurangabad	.. 3,399	4,288	+ 26.1
Nagpur	.. 3,647	3,719	+ 2.0
State Total	.. 14,023	15,835	+ 12.9

During the year under report, area cropped more than once in the State increased by 1.81 lakh ha., having gone upto 15.83 lakh ha. from 14.02 lakh ha. in 1975-76

(iii) Net cropped area :

(Area in '00 'ha.)

Division	Net cropped area		Percentage increase (+) or decrease (-) over 1975-76
	1975-76	1976-77	
Bombay	.. 31,883	32,465	+ 1.8
Pune	.. 49,671	49,395	- 0.6
Aurangabad	.. 49,364	49,149	- 0.4
Nagpur	.. 51,698	51,040	- 1.3
State Total	.. 1,82,616	1,82,049	- 0.3

As compared to the preceding year, the net cropped area in the State decreased slightly by 0.3% during the year 1976-77. The decrease in Pune, Aurangabad and Nagpur divisions was to the extent of 0.6%, 0.4% and 1.3% respectively. In Bombay division, the area increased by 1.8%.

(iv) Total area under food and non-food crops :

(Area in '00' ha.)

Division	Food Crops		Percentage increase (+) or decrease (-) over 1975-76	Non-food crops		Percentage increase (+) or decrease (-) over 1975-76
	1975-76	1976-77		1975-76	1976-77	
Bombay ..	26,423	27,007	+ 2.2	8,003	8,326	+ 4.0
Pune ..	44,033	44,234	+ 0.5	10,072	10,121	+ 0.5
Aurangabad ..	39,433	40,835	+ 3.6	13,230	12,602	- 4.7
Nagpur ..	35,451	35,256	- 0.6	19,894	17,503	- 1.9
State Total ..	1,45,340	1,47,332	+ 1.4	51,299	50,552	- 1.4

At the State level, the area under food crops during 1976-77 recorded an increase over that in the preceding year, having gone up to 147.33 lakh ha. from 145.34 lakh ha. or by 1.4 %. The corresponding increases in the divisions of Bombay, Pune, and Aurangabad were 2.2 %, 0.5 % and 3.6 % respectively; in Nagpur division, the area decreased by 0.6 %.

The State area under non-food crops during 1976-77 showed a decrease of 0.75 lakh ha. The decrease in Aurangabad and Nagpur divisions were 4.7% and 1.9% respectively while in the divisions of Bombay and Pune, it increased by 4.0% and 0.5% respectively.

CHAPTER V

AREA, AVERAGE YIELD AND OUTTURN OF CROPS

(Table IV-A and IV-B Pages 62-83)

(Table V-A and V-B Pages 86-110

(Summary tables 'D' and 'E' Pages 19-23

12. The area, average yield and outturn of different principal crops during the year under report are presented in the following paragraphs along with the corresponding figures for the preceding year.

During the year under report, the delayed onset of sowing rains was responsible for reduction of cotton area which was diverted mainly to kharif jowar. Due to sufficient rains in August and till mid September the condition of the kharif crops was good. However, from mid September, there were no rains in the State and a dry spell prevailed for about 7 to 8 weeks. Though early kharif crops such as early paddy, hybrid jowar, bajri and early pulses escaped the adverse effects of the dry spell, the late maturing varieties particularly on light to medium soils, were affected due to extreme moisture stress.

The weather conditions during the rabi season were very peculiar. Besides a long dry spell from mid September to mid November 1976, the temperatures were 7° to 10° C above the normal and the relative humidity was below the normal by more than 10 percent. The weather was thus warm and dry..

A. Kharif foodgrain crops :

(i) Rice.—The rains received in the first week of June facilitated timely sowing of paddy nursery in Konkan region. Similarly, in Kolhapur district where dry sowing of paddy is practiced, these early rains were helpful for proper germination. Due to torrential rains during first week of June, the paddy crop in parts of Kolhapur and Nasik districts, were washed away and resowing was done. With the receipt of widespread rains on the 25th June 1976, sowing of paddy nurseries was completed in eastern parts of Vidarbha region. The transplanting of the crop in Konkan and Ghat areas was completed by the 1st week of August, while these operations in Bhandara, Chandrapur and Nagpur districts were completed mostly by mid August.

The condition of the transplanted crop was satisfactory. The coverage under high yielding varieties was substantial and their condition was also good. From mid September there was a dry spell for about 7 to 8 weeks but the early and mid late varieties escaped the adverse effects of the dry spell. The late varieties of paddy,

however, were affected adversely to some extent, thereby lowering in production.

The crop was also affected by stem borers in Thane and Kulaba districts and by gall fly in Bhandara and Chandrapur districts to some extent. Control measures were undertaken in these areas.

The crop of summer paddy, grown over an area of 26,600 hectares in Ratnagiri, Thane, Kulaba, Bhandara and Chandrapur districts was in good condition.

The area, average yield per hectare and production of rice including summer rice in each of the 4 divisions of the State for the two years, viz. 1975-76 and 1976-77 are presented in the table below.

Division	Crop : Rice (Total)									
	Area in '00' ha.		Percentage increase (+) or decrease (-) over 75-76	Average yield per ha.		Percentage increase (+) or decrease (-) over 75-76	Production of rice in '00' tonnes		Percentage increase (+) or decrease (-) over 75-76	
	1975-76	1976-77		1975-76	1976-77		1975-76	1976-77		
1	2	3	4	5	6	7	8	9	10	
Bombay ..	5,012	5,114	+ 2.1	1,683	1,488	-11.6	8,437	7,611	-9.8	
Pune ..	1,934	2,096	+ 8.4	1,896	2,052	+ 8.2	3,666	4,300	+ 17.3	
Aurangabad ..	951	1,193	+ 25.4	1,228	884	-28.0	1,168	1,055	-9.7	
Nagpur ..	6,260	6,225	- 0.5	1,531	1,117	-27.0	9,587	6,955	-27.5	
State ..	14,157	14,628	+ 3.3	1,615	1,362	-15.7	22,858	19,921	-12.8	

It is seen from the above table that the State level area under rice increased by 0.47 lakh ha. or by 3.3 % in 1976-77 as compared to that in the preceding year. The average yield of rice decreased from 1615 kg./ha. in 1975-76 to 1362 kg./ha. in 1976-77 or by 15.7%. The decrease was noticed in all the divisions except Pune where the yield was higher by 8.2% during 1976-77. In spite of increase in area, the production of the crop during 1976-77 was less by 12.8% as compared to the production in 1975-76. The main reason for decrease in average yield and in production was the moisture stress during critical period of crop growth and grain formation.

(ii) *Kharif Jowar*.—On receipt of the widespread rains in the State from the 25th June, the sowing of the hybrid crop was undertaken.

The sowing of the local varieties commenced in early July and was completed by the end of July. The delayed onset of sowing rains was responsible for reduction of area under cotton which was diverted mainly to kharif jowar. Hence the area under this crop increased by 2.44 lakh ha. in 1976-77 as compared to that in

1975-76. Due to sufficient rains in August and till mid September the condition of the crop was good. However, after mid September, there were no rains in the State and a dry spell prevailed for about 7 to 8 weeks. Though hybrid jowar being early variety, escaped from this dry spell, the local varieties of jowar on light to medium soils were affected to some extent. During the year under report, the coverage under hybrid and high yielding varieties was much larger, being 13.88 lakh ha. as compared to 7.54 lakh ha. in the preceding year and the condition of this hybrid crop was very good. A minor incidence of midge-fly was reported on hybrid crop from parts of Deccan, Marathwada and Western Vidarbha regions and all out efforts were made to control the pest.

On the whole, the condition of kharif jowar particularly that of hybrid jowar was good and the overall production of this crop was 28.76 lakh tonnes as against the 22.45 lakh tonnes in the preceding year.

The table below gives the area, average yield per ha. and production of kharif jowar in each division of the State during the two years viz. 1975-76 and 1976-77.

Division	Crop : Kharif Jowar									
	Area in '00' ha.		Percentage increase (+) or decrease (-) over 1975-76	Average yield per ha.		Percentage increase (+) or decrease (-) over 1975-76	Production in '00' tonnes		Percentage increase (+) or decrease (-) over 75-76	
	1975-76	1976-77		1975-76	1976-77		1975-76	1976-77		
1	2	3	4	5	6	7	8	9	10	
Bombay ..	2,549	2,987	+ 17.2	1,338	1,187	-11.3	3,410	3,546	+4.0	
Pune ..	3,321	3,727	+12.2	1,530	1,274	-16.7	5,082	4,747	-6.6	
Aurangabad ..	8,539	9,617	+12.6	630	879	+39.5	5,380	8,452	+57.1	
Nagpur ..	13,080	13,595	+ 3.9	656	884	+34.8	8,574	12,017	+40.2	
State ..	27,489	29,926	+ 8.9	817	961	+17.6	22,446	28,762	+28.1	

The total area at the State level increased by about 2.44 lakh ha. or by 8.9 % in 1976-77 as compared to that in the preceding year. The increase was noticed in all the four divisions in the State.

The average yield per ha. in the State was more by 17.6 % in 1976-77 as compared to that in 1975-76. The increase was shared by two divisions of Aurangabad and Nagpur while in the other two divisions of Bombay and Pune the average yield showed a decrease.

The overall production of the crop increased to 28.76 lakh tonnes in 1976-77 as compared to 22.45 lakh tonnes in year 1975-76. The increase was noticed in all the divisions except Pune in which the production went down by 6.6 % as compared to that in the preceding year.

(iii) *Bajri*.—Widespread rains were received in the State from 25th June. Due to these rains sowing of

Bajri was taken up and completed by end of July or 1st week of August. The area under this crop particularly under hybrid varieties decreased to some extent in 1976-77 because of incidence of Downey Mildew in the previous two years.

The germination and growth of the crop were quite satisfactory in all the parts of the State. Rains in August and till mid September were beneficial for the proper growth of this crop. As this crop is of short duration, it escaped the adverse effects of long dry spell that prevailed in the State. No major pests and diseases were observed on this crop. On the whole the season was favourable to this crop.

The divisionwise area, average yield per ha. and production of bajri during the two years 1975-76 and 1976-77 are presented in the table below :—

Divisions	Crop : Bajri									
	Area in '00' ha.		Percentage increase (+) or decrease (-) over 75-76	Average yield in ha.		Percentage increase (+) or decrease (-) over 75-76	Production of Bajri in '00' tonnes		Percentage increase (+) or decrease (-) over 75-76	
	1975-76	1976-77		1975-76	1976-77		1975-76	1976-77		
1	2	3	4	5	6	7	8	9	10	
Bombay ..	5,928	5,598	— 5.6	463	554	+ 19.6	2,740	3,099	+ 13.1	
Pune ..	7,807	7,661	— 1.9	224	301	+ 34.3	1,750	2,303	+ 31.6	
Aurangabad ..	3,854	3,612	— 6.3	250	289	+ 15.6	963	1,043	+ 8.3	
Nagpur ..	488	425	— 12.9	300	310	+ 3.3	147	131	— 10.8	
State ..	18,077	17,296	— 4.3	310	380	+ 22.5	5,600	6,576	+ 17.4	

It is seen from the above that the area under bajri at the State level decreased by about 0.78 lakh ha. or by 4.3 % as compared to that in the year 1975-76. This decrease was seen in all the four divisions of Bombay, Pune, Aurangabad and Nagpur to the extent 5.6 %, 1.9 %, 6.3 % and 12.9 % respectively.

The State average yield of this crop however, increased having gone upto 380 kg./ha. in 1976-77 from 310kg./ha. in 1975-76, or 22.5 %. The increase was observed in all the four divisions and ranged from 3.3 % in Nagpur division to 34.3 % in Pune division.

As a result of the increase in average yield, the State production of bajri also increased by about 0.98 lakh

tonnes or by 17.4 % in 1976-77 as compared to that in the preceding year. The increase was noticed in all the divisions except Nagpur where the crop is grown on a very small scale.

(iv) *Ragi*.—The sowing of this crop was completed in time. Transplanting was completed by July end or by the 1st week of August. The condition of the crop till mid September was good. However, from mid September the late varieties of this crop were adversely affected due to the dry spell of about 7to 8 weeks thereby reducing the crop production.

The division and State level area, average yield per ha. and production of the crop for the two years i. e. 1975-76 and 1976-77 are presented in the Table below.

Division	Crop : Ragi									
	Area in '00' ha.		Percentage increase (+) or decrease (-) over 75-76	Average yield per ha.		Percentage increase (+) or decrease (-) over 75-76	Production in '00' tonnes		Percentage increase (+) or decrease (-) over 75-76	
	1975-76	1976-77		1975-76	1976-77		1975-76	1976-77		
1	2	3	4	5	6	7	8	9	10	
Bombay ..	1,455	1,391	— 4.4	878	770	— 12.3	1,278	1,071	— 16.2	
Pune ..	643	687	+ 6.8	932	901	— 3.5	599	619	+ 3.3	
Aurangabad ..	5	2	— 60.0	888	797	— 10.2	4	2	— 50.0	
Nagpur	
State ..	2,103	2,080	— 1.1	895	813	— 9.2	1,881	1,692	— 10.0	

The area under the crop at the State Level decreased slightly by 1.1 % during 1976-77 as compared to that in the preceding year. The decrease was observed mainly in Bombay division to the extent of 4.4% while the area increased by 6.8% in Pune division.

The State average yield per ha. of ragi decreased to 813 kg./ha. in 1976-77 from 895 kg/ha. in 1975-76. The decrease was noticed in all the divisions of the State and was of the order of 12.3% and 3.5% in Bombay and Pune divisions respectively. With the decrease in area and average yield the production also decreased by 10.0% at the State level. The decrease was noticed in Bombay division to the extent of 16.2% while the production

increased by 3.3% in Pune Division as compared to that in the preceding year.

(v) *Tur*.—Due to the inadequate rains at the sowing time particularly in Ahmednagar, Pune and Solapur districts and parts of Marathwada and Vidarbha regions, the sowing of this crop was hampered and the area decreased slightly as compared to that in the preceding year. Further at the critical crop growth stage, long dry spell affected the crop heavily in all the parts of the State. Hence the production of this crop was considerably less than that in the preceding year.

The table below gives the area, average yield per ha. and production of tur in each division in the State for the two years 1975-76 and 1976-77.

Division	Crop : Tur									
	Area in '00' ha.		Percentage increase (+) or decrease (-) over 75-76	Average yield per ha.		Percentage increase (+) or decrease (-) over 75-76	Production in '00' tonnes		Percentage increase (+) or decrease (-) over 75-76	
	1975-76	1976-77		5	6		7	8	9	
1	2	3	4	Kg.	Kg.	7	8	9	10	
Bombay ..	320	335	+ 4.7	759	672	— 11.5	243	225	— 7.4	
Pune ..	1,336	1,190	— 10.9	380	419	+ 10.3	508	499	— 1.8	
Aurangabad ..	2,732	2,587	— 5.3	402	351	— 12.7	1,099	909	— 17.3	
Nagpur ..	2,367	2,271	— 4.1	941	576	— 38.8	2,228	1,307	— 41.3	
State ..	6,755	6,383	— 5.5	604	461	— 23.7	4,078	2,940	— 27.9	

It is seen from the above that the State area under tur crop decreased by 5.5% during 1976-77 as compared to that in the year 1975-76. The decrease was noticed in all the divisions except Bombay where the area increased by 4.7 %. The State average yield per hectare also decreased by 23.7%. The decrease was noticed in all the divisions in the State except Pune in which the average yield increased slightly i. e. by 10.3 %. As a result of decrease in State area and average yield of the crop, the production of tur went down by 27.9% and the decrease was noticed in all the divisions of the State.

(vi) *Wheat*.—As a result of the dry spell of 7 to 8 weeks from mid September, sowings of wheat under rainfed conditions were delayed. With the receipt of moderate rains on the 6th November, 1976 in the Deccan region, on the 9th November, 1976 in the Marathwada and Vidarbha regions followed by widespread and substantial rains in the

State on 20th, 21st and 22nd November, 1976, the sowing of the crop was completed though late.

Due to the delay in the onset of cold weather and the receding soil moisture, the cultivators in some parts undertook the risk by sowing wheat even when it was not cold enough for normal sowing. In such areas the crop of wheat was not healthy. Its growth was stunted. In such areas, the number of tillers and the size of earheads were small, with very few grains. The unirrigated crop which was sown late with the onset of cold weather, as also the irrigated crop were, however, in good condition. On the whole, the condition of wheat crop during the year 1976-77 was not as satisfactory as in the preceding year.

The area, average yield per ha. and the production of wheat during the two years 1975-76 and 1976-77 are given in the following table.

Division	Crop : Wheat									
	Area in '00' ha.		Percentage increase (+) or decrease (-) over 75-76	Average yield per ha.		Percentage increase (+) or decrease (-) over 75-76	Production in '00' tonnes		Percentage increase (+) or decrease (-) over 75-76	
	1975-76	1976-77		5	6		7	8	9	
1	2	3	4	Kg.	Kg.	7	8	9	10	
Bombay ..	2,167	2,363	+ 9.0	1,046	873	— 16.5	2,266	2,064	— 8.9	
Pune ..	2,292	2,278	— 0.6	1,105	958	— 13.3	2,533	2,183	— 13.8	
Aurangabad ..	3,326	3,231	— 2.9	1,033	706	— 31.6	3,434	2,282	— 33.5	
Nagpur ..	3,906	3,817	— 2.3	962	681	— 29.2	3,758	2,598	— 30.9	
State ..	11,691	11,689	— Neg.	1,026	781	— 23.9	11,991	9,127	— 23.9	

Though the State area under wheat practically remained the same as in the preceding year being 11.69 lakh ha. during 1976-77, it decreased in the three divisions of Pune, Aurangabad and Nagpur while it was more by 9.0% in Bombay division. The State average yield per ha. of wheat decreased by 23.9% during 1976-77 as compared to that in 1975-76 because the season was not favourable to this crop. The decrease in yield per ha. was observed in all the four divisions in the State. The production of wheat in the State also decreased by 23.9% having gone down to 9.13 lakh tonnes in 1976-77 from 11.99 lakh tonnes, in 1975-76. The decrease was shared by all the four divisions in the State.

(vii) *Rabi Jowar*.—Sufficient rains in August and till mid September facilitated the sowing of rabi jowar in major rabi jowar growing districts of Solapur, Ahmednagar and Pune. In other parts of the State, rabi sowings held up for want of adequate soil moisture and were completed rather late, on receipt of moderate rains on the 6th November 1976, in the Deccan region and on the 9th November, 1976 in Marathwada and Vidarbha regions. The condition of the sown crop was satisfactory.

The divisionwise area, average yield per ha. and production of the crop for the two years 1975-76 and 1976-77 are given in the table below:

Division	Crop Rabi Jowar									
	Area in '00' ha.		Percentage increase (+) or decrease (-) over 75-76	Average yield per ha.		Percentage increase (+) or decrease (-) over 75-76	Production in '00' tonnes		Percentage increase (+) or decrease (-) over 75-76	
	1975-76	1976-77		1975-76	1976-77		1975-76	1976-77		
1	2	3	4	5	6	7	8	9	10	
Bombay ..	1,431	1,610	+ 12.4	Kg. 554	Kg. 747	+ 34.8	793	1,202	+ 51.6	
Pune ..	18,481	18,552	+ 0.4	332	441	+ 32.8	6,143	8,174	+ 33.1	
Aurangabad ..	10,298	10,355	+ 0.6	425	689	+ 62.1	4,376	7,135	+ 63.0	
Nagpur ..	2,887	2,385	- 17.4	294	432	+ 46.9	848	1,031	+ 21.6	
State ..	33,097	32,902	- 0.6	365	533	+ 46.0	12,160	17,542	+ 44.3	

The production of the crop during 1976-77 was normal it, however appears to be much higher as compared to that in the preceding year, because the production during 1975-76 affected considerably.

(viii) *Gram*: With the receipt of moderate rains in early November in parts of Marathwada and Vidarbha regions and wide-spread and substantial rains thereafter, the sowing of the crop could be completed by December end.

The condition of this crop especially on light to medium soils was not satisfactory due to moisture stress and the crop suffered to some extent. This has resulted in lower average yield per ha. and hence the production as compared to that in the year 1975-76.

The area, average yield per ha. and production of the crop in each division in the State for the two years 1975-76 and 1976-77 are presented in the Table below.

Division	Crop : Gram									
	Area in '00' ha.		Percentage increase (+) or decrease (-) over 75-76	Average yield per ha.		Percentage increase (+) or decrease (-) over 75-76	Production in '00' tonnes		Percentage increase (+) or decrease (-) over 75-76	
	1975-76	1976-77		5	6		8	9		
1	2	3	4	Kg.	Kg.	7	175	184	+ 5.1	
Bombay ..	411	440	+ 7.1	426	418	- 1.9	522	355	- 32.0	
Pune ..	1,230	1,102	-10.4	424	322	-24.1	736	539	- 26.8	
Aurangabad ..	1,928	1,870	- 3.0	382	288	-24.6	372	239	- 35.8	
Nagpur ..	894	796	-11.0	416	300	-27.9	1,805	1,317	- 27.0	
State ..	4,463	4,208	- 5.7	404	313	-22.5				

It is seen from the above that the area under gram crop at the State level, decreased by 5.7% during 1976-77 as compared to that in the 1975-76. The decrease was noticed in all the three major crop growing divisions of the State.

The State average yield per ha. also showed a decrease by about 23 % during 1976-77 as compared to that in 1975-76. This downward trend was noticed in all the four divisions due to unfavourable seasonal conditions. The production of gram in the State also decreased by

27.0 % during 1976-77 and the decrease was shared by all the divisions in the State except Bombay division where with increase in area, the production during 1976-77 increased by 5.1 % as compared to that in the year 1975-76.

(ix) *Area under foodgrain crops* : The State and divisionwise area under cereals, pulses and foodgrains for the two years 1975-76 and 1976-77 are given in the Table below.

(Area in '00' ha.)

Division	Crop : Foodgrain Crop									
	Cereals		Percentage increase(+) or decrease(-) over 75-76	Pulses		Percentage increase(+) or decrease(-) over 75-76	Total foodgrans		Percentage increase(+) or decrease(-) over 75-76	
	1975-76	1976-77		1975-76	1976-77		1975-76	1967-77		
1	2	3	4	5	6	7	8	9	10	
Bombay	10,743	20,207	+ 2.3	5,077	5,084	+ 0.1	24,820	25,291	+ 1.9
Pune	35,162	35,611	+ 1.3	5,963	5,713	- 4.2	41,125	41,324	+ 0.5
Aurangabad	27,543	28,519	+ 3.5	10,612	10,887	+ 2.3	38,155	39,406	+ 3.3
Nagpur	26,858	26,702	- 0.6	7,487	7,380	- 1.4	34,345	34,082	- 0.8
State		1,09,306	1,11,039	+ 1.6	29,139	29,054	- 0.3	1,38,445	1,40,103	+ 1.2

It is seen from the above table that the area under foodgrain crops in the State increased by 1.2 % in 1976-77 as compared to that in the year 1975-76. This increase in area was mainly due to increase in area under kharif jowar. In the kharif season the unsown area under cotton was diverted mainly to kharif jowar crop. Though the overall foodgrain area increased, the area under pulses

slightly decreased by 0.3 % as compared to that in 1975-76 while the area under cereals showed an increase by 1.6 % during 1976-77 as compared to that in 1975-76.

(x) *Production of foodgrain crops* : -The table below gives the production of cereals, pulses and foodgrains in each of the four divisions and the State for the two years 1975-76 and 1976-77.

(Production in '00' tonnes)

Division	Production of foodgrain crop									
	CEREALS		Percent- age in- crease(+) or decrease(-) over 1975-76	PULSES		Percent- age in- crease(+) or decrease(-) over 1975-76	FOODGRAINS		Percent- age in- crease(+) or decrease(-) over 1975-76	
	1975-76	1976-77		1975-76	1976-77		1975-76	1976-77		
1	2	3	4	5	6	7	8	9	10	
Bombay	19,524	19,334	- 1.0	2,289	2,252	- 6.0	21,813	21,586	- 1.04
Pune	20,532	23,146	+ 12.7	2,127	2,062	- 3.1	22,659	25,208	+ 11.2
Aurangabad	15,603	20,372	+ 30.6	3,621	3,522	- 2.7	19,224	23,894	+ 24.3
Nagpur	23,028	22,865	- 0.7	3,638	2,597	-28.6	26,666	25,462	- 4.5
State		78,687	85,717	+ 8.9	11,675	10,433	-10.6	90,362	96,150	+ 6.4

The overall foodgrain production in the State increased to 96.15 lakh tonnes during 1976-77 from 90.36 lakh tonnes in 1975-76 or by 6.4 % the overall increase was due to the higher cereal production, mostly of kharif jowar crop. The production of pulses decreased by about 1.24 lakh tonnes as compared to that in 1975-76.

(xi) *Sugarcane* : The State and divisional level area, average yield per ha. and production of sugarcane (gur) for the two years 1975-76 and 1976-77 are presented in the following table.

Division	Crop-Sugarcane									
	Area in '00' ha.		Percentage increase(+) or decrease(-) over 1975-76	Average yield in quintals		Percentage increase(+) or decrease(-) over 1975-76	Production in '00' tonnes (Gur)		Percentage increase(+) or decrease(-) over 1975-76	
	1975-76	1976-77		1975-76	1976-77		1975-76	1976-77		
1	2	3	4	5	6	7	8	9	10	
Bombay .. .	287 (266)	340 (287)	+ 18.5 (+ 7.9)	98	109	+ 11.2	2,597	3,117	+ 20.0	
Pune .. .	1,976 (1,602)	1,996 (1,613)	+ 1.0 (+ 0.7)	103	107	+ 3.9	16,501	17,270	+ 4.7	
Aurangabad .. .	368 (368)	598 (549)	+ 62.5 (+ 49.1)	74	68	- 8.1	2,738	3,756	+ 37.2	
Nagpur .. .	47 (47)	46 (37)	- 2.1 (- 21.3)	74	80	+ 8.1	350	296	- 15.4	
State ..	2,678 (2,283)	2,980 (2,486)	+ 11.3 (+ 8.9)	97	98	+ 1.0	22,186	24,446	+ 10.2	

Note— Production is based on harvested area, figures in brackets under columns 2, 3 and 4 refer to harvested area.

During the year under report, the area under sugarcane, average yield per ha. of gur and its total production in the State showed an increase of 11.3 %, 1.0 % and 10.2 % respectively as compared to that in the preceding year.

(xii) *Cotton* : The sowing of irrigated cotton in Ahmednagar, Pune, Solapur, and Satara districts was completed during the second fortnight of May 1976.

The sowing of unirrigated cotton was completed by the middle of July. Due to delayed onset of sowing rains, the area under this crop was less than that in the preceding year which itself was less than the normal area. Due to subsequent rains till mid September the condition of the crop was satisfactory. From Mid September, there was a dry spell all over the State for about 7 to 8 weeks and hence the crop was affected adversely due to moisture

stress. The condition of the standing rainfed cotton in major cotton growing areas was fair. with moderate to substantial and widespread rains received in November 1976, the crop condition improved to some extent.

There were no major pests and diseases on this crop. Control measures against common pests like aphids, jassids and bollworms were undertaken by the cultivators.

In general the condition of cotton crop was sub-normal. The bearing of bolls and their development was not satisfactory.

The area, average yield per hectare and production of cotton at division and State level for the two years 1975-76 and 1976-77 are given in the Table below :

Division	Crop : Cotton									
	Area in '00' ha.		Percentage increase(+) or decrease(-) over 75-76	Average yield in Per ha. (Lint)		Percentage increase (+) or decrease(-) over 75-76	Production in '00' bales of 170 (Kg.) each		Percentage increase(+) or decrease(-) over 75-76	
	1975-76	1976-77		1975-76	1976-77		1975-76	1976-77		
1	2	3	4	5	6	7	8	9	10	
Bombay .. .	1,957	1,719	-12.2	108	85	-21.3	1,245	863	-30.7	
Pune .. .	266	243	-8.6	265	284	+ 7.2	414	408	-1.4	
Aurangabad .. .	5,598	4,976	-11.1	36	56	+ 55.6	1,187	1,651	+ 39.1	
Nagpur .. .	15,248	14,684	-3.7	55	64	+ 16.4	4,955	5,549	+ 12.0	
State	23,069	21,622	- 6.3	58	67	+ 15.5	7,801	8,471	+ 8.6	

During the year under report, the State level area under cotton decreased by 6.3 % as compared to that in the preceding year. The decrease was noticed in all the four divisions ranging from 3.7 % in Nagpur division to 12.2 % in Bombay division.

During 1976-77 the State average yield per ha. of cotton was low being 67 kg. ha. it was higher by 15.5 % as compared to that in the preceding year, this is because 1975-76 was an abnormal year for cotton. It was higher in all the divisions except Bombay where it was lower by 21.3 % during 1976-77 as compared to that in the preceding year.

The production of cotton during 1976-77 was low, although it showed an increase by 8.6 % over 1975-76. The increase in production is shared by the two divisions of Aurangabad and Nagpur while it had decreased in the other two divisions of viz. Bombay and Pune.

(xiii) *Groundnut* : On receipt of widespread rains in the State from 25th June, sowing of groundnut was undertaken and completed by the July end. Due to subsequent rains till mid September, the condition of the crop was satisfactory. From the second fortnight of September, a dry spell prevailed in the State for about 7 to 8 weeks.

As a result, the crop was affected at its critical stage of growth due to moisture stress.

Subsequently, though the crop survived due to rains in November, the pod formation and pod development was not satisfactory due to moisture stress in earlier period. Some difficulty was also experienced by cultivators at the time of harvest due to hardening of soils. As a result of this, the average yield per ha. of the crop was affected and the production was also lower as compared to that in the preceding year.

The State and divisional level area, average yield per ha. and production of groundnut for the two years 1975-76 and 1976-77 are given in the following table :-

Division	Crop : Groundnut									
	Area in '00' ha.		Percentage increase (+) or decrease (-) over 75-76		Average yield in per ha.		Percentage increase (+) or decrease (-) over 75-76		Production in '00' tonnes	
	1975-76	1976-77	4	5	6	7	8	9	10	
1	2	3								
Bombay ..	2,727	2,954	+ 8.3	905	Kg.	761	-15.9	2,469	2,247	- 9.0
Pune ..	2,383	2,510	+ 5.3	914	Kg.	881	- 3.6	2,177	2,211	+ 1.6
Aurangabad ..	1,993	1,960	- 1.7	478	Kg.	359	-24.9	952	704	-26.1
Nagpur ..	1,441	1,624	+12.7	921	Kg.	410	-55.5	1,327	666	-49.8
State ..	8,544	9,048	+ 5.9	811	Kg.	644	-20.6	6,925	5,828	-15.8

The State area under groundnut increased by 5.9 % during 1976-77 as compared to that in the year 1975-76. The increase was observed in all the divisions except Aurangabad where it decreased by 1.7%. Due to adverse seasonal conditions, the State average yield and production of the crop decreased by 20.6 % and 15.8 % respectively. The decrease in yield per ha. was noticed in all

the divisions in the State, while the production decreased in all the divisions except Pune Division.

(xiv) *Sesamum* : The area, average yield and production of sesamum in each division and at the State level for two years 1975-76 and 1976-77 are presented in table below :-

Division	Crop : Sesamum									
	Area in '00' ha.		Percentage increase (+) or decrease (-) over 75-76		Average yield per ha.		Percentage increase (+) or decrease (-) over 75-76		Production in '00' tonnes	
	1975-76	1976-77	4	5	6	7	8	9	10	
1	2	3								
Bombay ..	214	248	+15.9	318	Kg.	226	-28.9	68	56	-17.6
Pune ..	99	134	+35.4	283	Kg.	269	- 4.9	28	36	+28.6
Aurangabad ..	349	318	- 8.9	203	Kg.	167	-17.7	71	53	-25.4
Nagpur ..	854	902	+ 5.6	172	Kg.	183	+ 6.4	147	165	+12.8
State ..	1,516	1,602	+ 5.7	207	Kg.	194	- 6.3	314	310	- 1.3

The area under sesamum, at the State level increased by 5.7 % during 1976-77 as compared to that in the year 1975-76. The increase in area was noticed in all the divisions of the State except Aurangabad division where the area decreased by 8.9 %.

The average yield per ha. of the crop showed a decrease by 6.3 % during 1976-77 as compared to that in the year 1975-76. The decrease was noticed in the three divisions viz. Bombay, Pune and Aurangabad while it had increased by 6.4 % in Vidarbha.

The production of the crop also decreased at the State level by 1.3 % during 1976-77. The decrease was noticed in Bombay and Aurangabad divisions to the extent of 17.6 % and 25.4 % respectively while in the remaining two divisions of Pune and Nagpur, it increased by 28.6 % and 12.8 % respectively as compared to that in the preceding year.

(xv) *Linseed* : The table below gives the area, average yield per ha. and production of linseed at the division and State level for the two years 1975-76 and 1976-77.

Division	Crop: Linseed									
	Area in '00' ha.		Percentage increase (+) or decrease (-) over 75-76	Average yield per ha.		Percentage increase (+) or decrease (-) over 75-76	Production in '00' tonnes		Percentage increase (+) or decrease (-) over 75-76	
	1975-76	1976-77		1975-76	1976-77		1975-76	1976-77		
1	2	3	4	5	6	7	8	9	10	
Bombay	5	3	-40.0	200	269	+34.5	1	1		
Pune	73	66	-9.6	205	273	+33.2	15	18	+20.0	
Aurangabad	1,289	1,225	-5.0	225	199	-11.6	290	244	-15.9	
Nagpur	1,625	1,517	-6.6	175	204	+16.6	284	309	+8.8	
State	2,992	2,811	-6.0	197	204	+3.6	590	572	-3.1	

The area, at the State level, under linseed decreased by 6·0% during 1976-77 as compared to that in the year 1975-76. The decrease was noticed in all the four divisions of Bombay, Pune, Aurangabad and Nagpur to the extent of 40·0%, 9·6%, 5·0% and 6·6% respectively. The State average yield per hectare of the crop increased by 3·6% during 1976-77 as compared to that in the year 1975-76 and the increase was shared by all

the divisions of the State except that of Aurangabad where it decreased by 11·6%.

The production of the crop in the State decreased by 3·1% in the year under report. The decrease was more in Aurangabad division to the extent of 15·9% while in the remaining two divisions growing the crop, viz. Pune and Nagpur, the production increased to the extent of 20·0% and 8·8% respectively.

CHAPTER VI

PRICES

(Table VI, pages 102-105)

(Summary Table F pages 24)

13. The districtwise farm harvest prices of the principal crops during the peak marketing periods in the year 1976-77 are given in the main Table VI of the report. The State level average prices during the five years from 1972-73 to 1976-77 are given in the Summary Table 'F'. As compared to the preceding years, the prices of all the important commodities (except tur dal, groundnut and all oilseed crops and potato) decreased slightly during 1976-77 mainly due to the increasing trend in the agricultural production.

14. The major variations in the average farm harvest prices at the State and division levels are briefly commented in the following paragraphs.

The price of paddy at the State level was Rs. 119.74 per quintal and was lower by 12.6% than that in the preceding year. The decrease was noticed in all the divisions of Bombay, Pune, Aurangabad and Nagpur divisions to the extent of 12.9%, 16.9%, 15.9% and 9.7% respectively.

The price of wheat at the State level was Rs. 142.09 per quintal and was lower than that in the preceding year by 8.6%. The decrease was noticed in all the four divisions of Bombay, Pune, Aurangabad and Nagpur and was 21.2%, 13.0%, 2.1% and 7.4% respectively.

The State level price of jowar was Rs. 119.18 per quintal and was lower by 15.4%. The decrease in the different divisions ranged between 13.4% to 15.2%.

The State average price of bajri was Rs. 112.41 per quintal and was lower by 11.7%. The decrease was noticed in all the divisions, varying from 6.0% to 12.7%.

The average price of ragi was Rs. 129.12 per quintal, showing a slight increase by 1.6%. The increase was noticed in both the major crop growing divisions of Bombay and Pune and was of the order 1.5% and 8.2% respectively.

The State level average price of maize was Rs. 102.03 per quintal and was lower by 7.0% than that in the preceding year. The decrease in Bombay and Pune divisions was 20.2% and 5.3% respectively whereas there was a slight increase of 0.4% and 1.8% respectively in Aurangabad and Nagpur divisions.

The price of this dal was Rs. 288.80 per quintal and was appreciably higher viz. by 53.0% than that in the preceding year. The increase was seen in all the divisions ranging from 48.2% to 59.4%.

The State level average price of gram was Rs. 152.41 per quintal and was lower by 6.1% as compared with that in the preceding year. The decrease ranged from 2.1% in Bombay division to 8.9% in Pune Division.

The average price of raw sugar (gur) at the State level was Rs. 175.99 per quintal and was slightly lower viz. by 1.2% than that in the preceding

year. The decrease was noticed in Pune and Aurangabad divisions. However, there was increase of 7.4% in Bombay division.

The State level average price of groundnut was Rs. 269.04 per quintal and was considerably higher viz. by 33.6% than that in the preceding year. The increase was observed in all the four divisions and was of the order of 28.0%, 34.6%, 46.7% and 37.1% respectively in Bombay, Pune, Aurangabad and Nagpur divisions.

At the State level, the price of tobacco was Rs. 849.41 per quintal and was lower by 3.5% as compared to that in the preceding year.

The State level prices of the remaining commodities of Castor seed, linseed, sesamum and potato increased by 58.2%, 55.1%, 31.7% and 7.9% respectively while that of chillies showed a decrease of 29.3% in 1976-77.

15. The table below gives the yearwise (1972-73 to 1976-77) average prices of bajri, wheat, groundnut and cotton prevailing during the peak marketing periods at a few selected centres.

Commodity	Centre	Price per quintal in Rupees				
		1972-73	1973-74	1974-75	1975-76	1976-77
Bajri	.. 1. Nasik	.. 151.53	130.67	202.50	121.17	119.40
	2. Phulambri (Aurangabad)	.. 152.67	121.80	182.00	119.00	116.20
Wheat	.. 1. Gada (Nagpur)	.. 76.00	185.92	203.44	155.24	152.60
	2. Jalna (Aurangabad)	.. 76.00	184.30	206.80	146.87	152.40
Groundnut	.. 1. Karad (Satara)	.. 266.00	255.20	269.69	164.50	276.66
	2. Osmanabad	.. 256.00	275.60	242.97	163.50	344.81
Cotton (Jariila)	.. 1. Bombay	.. 551.00	842.30	873.16	NR	NR

The centres mentioned in the Table show typical representative markets and accordingly depict the general trend in prices of the essential commodities in the State.

The procurement-cum-purchase-prices for Jowar and rice were fixed by Government during the above period and they are given below.

Commodity	Prices per quintal in Rupees				
	1972-73	1973-74	1974-75	1975-76	1976-77
Jowar	.. 1. Superfine	.. 58.00	90.00	74.00	74.00
	2. Medium	.. 56.00	88.00	72.00	72.00
	3. Coarse	.. 50.00	82.00	66.00	66.00
Rice	.. 1. Superfine	.. 109.00	120.00	127.00	127.00
	2. Superior	.. 101.50	113.00	115.00	115.00
	3. Medium	.. 94.50	105.00	112.00	112.00
	4. Coarse	.. 86.00	98.00	105.00	112.00

CHAPTER VII
AGRICULTURAL WAGES
 (Table VII, pages 106-117)
 (Summary Table 'G' pages 25-27)

16. According to the Revenue Accounts Manual, Agricultural Labour is classified under three categories, viz. (i) skilled labour, (ii) ordinary labour, and (iii) field labour. Skilled labour comprises of carpenters, blacksmiths and cobblers. Ordinary labour includes load carrying coolies, well-diggers, assistants of masons and carpenters, earth workers, etc. while field labour includes ploughmen, sowers, transplanters, weeder, reapers, harvesters, etc. One more category of labour viz. herdsmen, whose main daily work is to take the livestock owned

by different owners, to the jungle for grazing is also included in Table VII on Agricultural wages.

17. Main Table VII of the report gives district-wise and monthwise figures of daily wages of different classes of agricultural labour. Summary Table 'G' gives the State level information on wages in different months along with the corresponding information for the preceding year.

Average agricultural wages of different categories of agricultural labour, during the years 1975-76 and 1976-77 are presented in Table below :-

Agricultural wages (Daily)

Year	Skilled labour			Field Labour			Other Agril. Wages		Herdsmen
	Carpenter	Blacksmith	Cobbler	Male	Female	Child	Male	Female	
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1975-76 ..	8.96	8.19	6.55	3.93	2.90	2.03	3.70	2.72	3.14
1976-77 ..	9.51	8.64	6.86	4.25	3.20	2.31	3.97	2.98	3.51

It is seen from the above that at the State level, average daily wages of all the categories were

higher during 1976-77 as compared to the wages in 1975-76.

CHAPTER VIII
AGRICULTURAL STOCK
 (Table VIII, Pages 118-133)
 (Summary Table 'H' pages 28-30)

18. Table VIII of this report gives the details of livestock, poultry, agricultural machinery and implements as per quinquennial census of livestock and agricultural machinery conducted in 1972 by the Director, Directorate of Economics and Statistics, Maharashtra State, Bombay. Summary Table 'H' gives provisional total number of livestock, poultry, agricultural machinery and implements according to different categories and comments on the same are briefly given below :—

(i) *Cattle*.—There was a slight decrease in the number of cattle from 1,47,29,446 in 1966 to 1,47,05,147, in 1972 or by 0.2%. The total number of males of age over three years decreased by 5.2%. Out of these, the number of males used for work only recorded a decrease of 3.4%. The number of 'other males' over three years showed an increase of 9.1%.

Among the females over three years, the number of breeding cows recorded an increase of 1.0% while those in milk increased by 4.2%. The number of young stock recorded an increase of 7.3% over that in 1966.

(ii) *Buffaloes*.—The total number of buffaloes recorded in 1972 was 33,00,746 as against 30,41,919 in 1966 showing an increase of 8.5%. Among the different categories of buffaloes, the number of males over three years was 3,08,353 showing a decrease of 9.2% over that in 1966. Among the females, the number in milk was 9,54,884 in 1972 showing an increase of 11.7%. The total number of breeding buffaloes showed an increase of 7.8%. The number of young stock recorded an increase of 16.0%.

(iii) *Sheep and Goats*.—The number of sheep decreased by 3.5% whereas that of goats increased by 15.4% as compared with the corresponding number of the year 1966.

(iv) *Horses and Ponies etc.*.—The total number of horses and ponies declined considerably i. e. by 42.3% in comparison with that of 1966.

The number of mules and camels declined by 64.4% and 63.7% or by 847 and 1232 respectively.

The decrease in the number of donkeys was by 18.2% while the number of pigs increased by 12.0% over that of the year 1966.

(v) *Poultry*.—The total number of poultry showed an increase by 23.4%.

Contagious Diseases (1976-77) :

Livestock :

The incidence of Haemorrhagic Septicaemia in Bovines was reported from all the districts except, Bombay, Thane, Pune and Amravati. A total of 994 outbreaks were reported, affecting 3318 animals out of which 2561 animals died.

The incidence of Black Quarter was reported from all the districts except Bombay, Thane and Amravati. A total of 1433 outbreaks were reported, affecting 3987 animals, out of which 3125 animals died.

Rinderpest was reported from Kolaba and Pune districts in the State, affecting 122 animals in 3 outbreaks and 35 animals were died.

Foot and Mouth Disease was reported from all over the State except, Bombay, Thane, Kolaba and Amravati districts. A total of 902 outbreaks were reported affecting 27977 animals, out of which only 20 animals were died.

Surra in Bovine was reported from Nasik, Jalgaon and Dhule districts in Bombay division and Buldhana, Bhandara, Chandrapur and Yavatmal

districts from Nagpur regions only. A total of 335 animals were affected out of which 183 died.

Anthrax in Bovine was reported by Bhandara and Chandrapur districts only. A total of 42 animals were affected and 30 animals died.

Sheep and Goat : Sheep and Goat Pox was reported from Nasik, Jalgaon, Satara, Solapur, Aurangabad, Beed, Osmanabad, Wardha and Yavatmal districts in the State. A total of 45 outbreaks were reported affecting 428 animals and 68 deaths.

Enterotoxaemia was reported from Nasik, Sangli, Solapur, Aurangabad, Parbhani, Beed and Osmanabad districts of the State affecting 217 animals out of which 117 died.

Foot and Mouth Diseases, Haemorrhagic Septicaemia and Black Quarter was reported from one or two districts only in the State.

Poultry : Ranikhet was reported by Beed, Nanded, Osmanabad and Yavatmal districts of the State, affecting 173 birds out of which 152 died.

Fowl Pox was reported by Kolhapur and Beed districts only from the State, affecting 26 birds, out of which 5 died.

Prompt preventive measures were adopted for controlling the outbreaks and spread of contagious diseases.

On the whole the condition of livestock and poultry was fairly satisfactory in the State.

CHAPTER IX

AGRICULTURAL OUTLOOK

19. The agricultural season 1976-77 was generally favourable to the millet crops of Jowar, Bajra and Maize while for other crops including cotton and groundnut, it was not favourable. The delayed onset of sowing rains over major area of the State was responsible for reduction of cotton area (which was diverted) mainly to kharif jowar. The area under cotton was only 21.62 lakh ha. as against 23.07 lakh ha. in the preceding year, (which itself was lower than the normal area) i. e; a reduction by 1.45 lakh ha. Till mid September, the condition of all the kharif crops was very good and it was then expected that a bumper kharif harvest would materialise, but these expectations were belied due to subsequent dry spell that prevailed for about 7 to 8 weeks in the State. The early varieties of paddy, hybrid jowar, bajra and early pulses could escape the adverse effects of the dry spell. However, the late maturing varieties of paddy, local jowar, cotton, late groundnut and tur crops, specially on light to medium soils, were affected due to moisture stress.

As a result of the dry spell of 7 to 8 weeks from mid September, the rabi sowings under rainfed conditions were delayed. Delay in onset of cold weather affected the early sown wheat crop adversely. The unirrigated crop

sown with the onset of cold weather as also the irrigated crop was in good condition.

Even with the conditions as above, the total foodgrains production could reach a high level of 96.15 lakh tonnes mainly because of good harvest of kharif jowar. The higher coverage under H. Y. V. also contributed to achieve this.

The supply of fodder was generally satisfactory and their prices ruled at a reasonable level in different markets of the State.

The availability of water for drinking and irrigation purposes was adequate in the State.

Through intensive efforts on the part of Government and semi Government bodies and also due to advanced planning and its proper execution, the agriculturists could avail various facilities as in the last year.

Due to the programme of construction of new wells, availability of water storage and utilisation through ayacut development work in different major and medium irrigation projects, large scale installation of electric pumps, the irrigated areas increased to 22.42 lakh ha. as compared to 21.71 lakh ha. in the preceding year.

CHAPTER X
CONDITION OF AGRICULTURAL POPULATION

20. The agricultural labours were kept engaged in the production programme throughout the season. Their wages were higher than those in the preceding year. The price level in the State more or less was steady during the year under report. Commodities like rice, wheat, jowar and sugar were available in the open market and in fair price shops to meet the needs of agricultural population.

Under the Employment Guarantee Scheme, the man-days of work (provided) increased from 10.95 crore man-days in 1975-76 to 13.32 crore man-days in 1976-77.

Land reforms have assumed a new significance in the developing economy as they hold the key to social and economic structures, beneficial to agricultural development. Important steps which Government had already taken in this behalf viz. (i) commencement of ownerships rights on the tenant cultivators by implementing tenancy laws, (ii) minimisation of inequalities in respect of land holdings by imposing ceiling on upper limit on land holding, and (iii) consolidation of land holdings and preventing their fragmentation, continued to reinforce the agricultural production programme.

The ceiling on agricultural holdings was brought down in the light of the National policy evolved in 1972. The revised or lower ceiling for different classes of land are as follows :—

- (a) Perennially irrigated land : 7.2 ha. (18 acres).
- (b) Assured seasonally irrigated : 10.8 ha. (27 acres).

(c) Paddy land in certain assured rainfall areas and lands getting unassured seasonal irrigation : 14.4 ha. (36 acres).

(d) Dry crop land : 21.6 ha. (54 acres).

The unit of application of lower ceiling is a family unit consisting of husband, wife and minor children. The revised ceilings were brought in force with effect from 2nd October 1975. Till December 1976, in all 90,917 returns were received under this Act and enquiries in respect of 86,783 returns were completed. As a result of these enquiries, an area of nearly 1.32 lakh ha. was available for disposal of which nearly 99 thousand hectares were distributed to 64,541 landless and other persons.

Different financial institutions were actively associated with the agricultural finance in the State. These were Co-operative agricultural credit societies, State Co-operative Land Development Bank, Commercial Banks, and the Agricultural Refinance and Development Corporation. The first three agencies extended direct credit to the cultivators. Most of Maharashtra has been brought under regulation of the Maharashtra Agricultural Produce Marketing (Regulation) Act, 1963, the only areas not covered being Greater Bombay and Ratnagiri districts. The net work of regulated markets is extensive with 221 regulated markets and 200 sub-yards. The commodities brought under regulation within the purview of the Act, covered agricultural produce including produce of horticulture as also produce of animal husbandry and forestry.

Rural electrification scheme continued to help the agriculturist in energising electric pumps for irrigating crops wherever possible, depending on the availability of water in wells, tanks, rivers, etc.

SUMMARY TABLE 'A'
Land Utilisation Statistics (1976-77)

Head of Classification	1975-76		1976-77		Percentage increase (+) or decrease (-) over 1975-76
	Area	Percent- age to total	Area	Percentage to total	
1	2	3	4	5	6
Reporting area for the land utilisation statistics.	3,07,583	3,07,583
1. Forests ..	53,337	17.3	53,272	17.3	- 0.1
2. Barren and uncultivable land ..	17,381	5.6	17,343	5.6	- 0.2
3. Area under non-agricultural uses ..	9,482	3.1	9,742	3.2	+2.7
4. Culturable waste land ..	10,201	3.3	9,965	3.2	- 2.3
5. Permanent pastures and other Grazing lands.	16,151	5.3	15,937	5.2	- 1.3
6. Land under Misc. Tree crops and groves not included in net area sown.	1,933	0.6	1,934	0.6	+0.1
7. Current fallows ..	8,450	2.8	9,205	3.0	+8.9
8. Other fallows ..	8,032	2.6	8,136	2.7	+1.3
9. Net area sown ..	1,82,616	59.4	1,82,049	59.2	- 0.3
10. Area sown more than once ..	14,023	4.5	15,835	5.1	+12.8
Total Cropped area ..	1,96,639	63.9	1,97,884	64.3	+0.6

SUMMARY TABLE 'B'

**Sources of water supply and the area irrigated therefrom in
Maharashtra State during 1976--77**

(Area in '00 'ha.)

Males over 3 years— (1) Used for breeding only ..	30,437	21,028	- 30.9		
(2) Used for breeding and work, both ..	3,18,356	1,84,429	- 42.1		
(3) Used for work only ..	61,25,552	59,17,756	- 3.4		
(4) Others ..	75,786	82,728	+ 9.1		
Total ..	65,50,141	62,05,941	- 5.2		
Females over 3 years—(1) In milk ..	16,06,727	16,73,495	+ 4.2		
(2) Dry and not calved ..	28,73,900	28,52,537	- 0.7		
Total breeding cows ..	44,80,627	45,26,032	+ 1.0		
(3) Others ..	53,693	60,746	+ 13.1		
Total ..	45,34,320	45,86,778	+ 1.2		
Young stock, Total three years and under ..	36,44,985	39,12,428	+ 7.3		
Total Cattle ..	1,47,29,446	1,47,05,147	- 0.2		
<i>Buffaloes :—</i>					
Males over 3 years— (1) Used for breeding only ..	15,851	14,822	- 6.5		
(2) Used for breeding and work, both..	27,539	22,438	- 18.5		
(3) Used for work only ..	2,88,680	2,62,942	- 8.9		
(4) Others ..	7,617	8,151	+ 7.0		
Total ..	3,39,687	3,08,353	- 9.2		
Females over 3 years—(1) In milk ..	8,55,013	9,54,884	+11.7		
(2) Dry and not calved ..	8,55,720	8,88,832	+ 3.9		
Total breeding buffaloes ..	17,10,733	18,43,716	+ 7.8		
(3) Others ..	24,344	26,813	+10.1		
Total ..	17,35,077	18,70,529	+ 7.8		
Young stock (Total three years and under) ..	9,67,155	11,21,864	+16.0		
Total buffaloes ..	30,41,919	33,00,746	+ 8.5		
Total Bovine ..	1,77,71,365	1,80,05,893	+ 1.3		
Total Sheep ..	22,05,063	21,28,036	- 3.5		
Total Goats ..	51,21,337	59,10,554	+ 15.4		
Total Horses and Ponies— ..	1,01,004	58,287	- 42.3		
Mules ..	1,316	469	- 64.4		
Donkeys ..	65,891	53,882	- 18.2		
Camels ..	1,935	703	- 63.7		
Pigs ..	1,81,122	2,02,936	+ 12.0		
Total Livestock ..	2,54,49,033	2,63,60,760	+ 3.6		

SUMMARY TABLE 'H'—Contd.

<i>Poultry .—</i>			
Fowls (Hens, Cocks and Chickens)	.. 98,36,877	1,21,79,536	+ 23.8
Other Poultry (Ducks etc. and others).	.. 65,110	37,031	- 43.1
Total Poultry	.. 99,01,987	1,22,16,567	+ 23.4

AGRICULTURAL MACHINERY AND IMPLEMENTS

a) *Bullock and manually operated implements :—*

Wet land puddler	1,36,739
Clod crusher	63,510
Earth levelers } Ridgers	6,517
or scrappers } Iron petari	5,084
} Keni	39,943
Seed dressing drum	4,647
Seed drills } Local	9,62,141
} Improved with device	12,353
Maize sheller	2,205
Inter-culturing } Local hoe	19,56,138
} Akola hoe	48,784
} Rotary hoe	4,226
Threshers } Stone roller	11,150
} Paddy threshers	3,027
} Olpad threshers	629
} Winnower	4,330
} Chaff cutter	13,418

(b) *Sugarcane crushers :—*

(i) Worked by power	5,864
(ii) Worked by bullocks	2,884
Total (i)+(ii)	.. 17,694	8,748	-50.6

(c) *Plant Protection equipment sprayers and dusters :—*

Hand operated	41,339
Engine operated	3,752
Tractor operated	756
Total	45,847

(d) *Oil engines with pump sets used for :—*

Irrigation	.. 1,46,786	1,72,003	+ 17.2
Other Agricultural Purposes	1,675
Total	1,73,678

SUMMARY TABLE 'H'—Concl.

Category and description	1	1965—66	1971—72	Percentage increase (+) or decrease (-)
		2	3	4
(e) Electric pump sets used for :—				
Irrigation	..	37,979	1,69,778	+ 347.0
Persian wheel or Rahat	2,507
Okati	1,310
(f) Tractors :—				
Crawler tractors { Government	136
{ Private	457
Hand tractors or { Government	56
power tiller { Private	442
Four wheeled tractors { Government (i)	8
{ Private (ii)	5,598
Total (i)+(ii)	..	3,274	5,606	+71.2
(g) Tractor operated implements :—				
Ploughs { Mouldboard	12,040
{ Discplough	2,170
Discharrow	1,725
Cultivator power tiller	2,290
Levelers or scrappers	330
Seed-cum-fertilizer drills	877
Seed planter	121
Rotavator	167
Trailor	1,728
Other tractor operated implements	474
(h) Power drawn machines and misc. equipments :—				
Threshers { Wheat threshers	527
{ Paddy threshers	185
{ Threshers for other crops	235
Miaze shellers	30
Harvester combine	57
Power chaff cutter	857
Other power operated equipments	424
(i) Ghanis	..	3,777	2,000	-47.0
(j) Phoughs { Wooden	..	17,64,899	17,79,557	+ 0.8
{ Iron	..	4,65,447	5,26,995	+13.2
(k) Blade Harrow of Bakhar or Guntuka	24,86,564
(l) Cart (Animal drawn)	..	14,61,154	15,20,776	+ 4.0
(m) Moats	3,40,094
