1) Introduction :1.1 Introduction and Location:

Beed District was known to history as Asmaka during Vedic, Epic and puranic ages. Panini refers to Asmaka which included a portion of Modern Beed District. In the days of pandvas it was known as Durgavati and later on during the regime of queen Champavati it was named as Champavatinagar. It was ruled by the Andharas, Chalukyes, the Rashtrakutas and the Yadvas and subsequently went under the rulers of Delhi. At the time of Mohamed Tughlak, the District was named as Bhir. The history of its name is rather shrouded in Mystery. The District is strewn with ancient religious places, the notable amongst them being (1) Kankaleshwar temple (at Beed town), (2) Yogeshwari Temple ( at Ambejogai town), (3) Vaijnath temple ( at parli town). The vaijnath temple of Parli referred to above is one of the twelve Jyotirlingas.

At the advent of Modern period of history Beed. district was in the erstwhile Hyderabad State. Following the reorganisation of states in 1956, the district of Beed alongwith other districts of Marathwada became a part of the Bombay State, which was bifurcated in 1960 to constitute the present Maharashtra State.

The district is situated in the central part of Marathwada. It lies between 18° -28' to 19° -27' north latitude and 74° -54' to 76° -57' western longitude, with a total geographical area of 11,227 sq.kns.

1.2 Boundaries:

The district is bounded on the north by Aurangabad and Parbhani districts and on the east by the southern portion of Parbhani district. On the West, lies Ahmednagar district. The district has natural boundaries carved by rivers, the Godavari in the north and Manjra on the southern side.

### 1.3 AREA :

Geographical area of this district as per 1971 Census is 11,227 Sq. Kms, out of which 10,903 sq. kms. is rural and 324 sq. kms. is urban. The area under urban towns was more, prior to 1961 Census since there were 8 Municipalities. The Pangaon Municipality in Ambejogai tahsil was deurbanised in 1961 Census and thus the urban area decreased. This district ranks 14th and 4th in the State and Marathwada Region respectively in terms of area. Similarly, the district ranks 23rd in the State in terms of population. As compared the area under the tahsils within the district, Manjlegaon ranks first followed by Kaij, Ambejogai, Georai and Ashti. Patoda tahsil has the smallest area in the district.

### 1.4 TERRITORIAL CHANGES :

Since over a decade no territorial changes in the boundaries and area of the district were effected. The boundaries and the area of the district remained the same. There was however change in the boundaries and area under tahsils within the district. During the year 1975-76 nine villages from Kaij tahsil were transferred to Manjlegaon tahsil. The area covered by these villages was 13.1 thousand hectares.

### 1.5 TOROGLAPHY :

The district is partly table land and partly broken hilly ranges with elevations between 300 to 900 metres. The hill ranges of Balaghat are spread over the central part of the district. The geographical conditions in general in the western part of the district comprising, Beed, Patoda and Ashti Talukas are not favourable as in the eastern part which possesses more fertile soils and assured rainfall. A portion of the district on the south side is plain. Due to the ranges of Balaghat the district is divided into uplands locally called "Gangathadi" some portion of Kaij and Ambejogai taluka is touched by the ranges.

**1.5 Hills, Rivers and Soil :**

The central part of the district is a hilly tract occupied by Balaghat ranges and the major part of Patoda and Ashti Talukas is covered by the hills and appears deserted, when compared with Kaij and Ambajogai talukas. The Balaghat ranges are spread over the northern part of Ashti Taluka, most of Patoda and central part of Beed Taluka. The main rivers of the district are Godavari, Manjra, Sindphana, Kundke, Bindusara, Wan and Sina, Manjra rises from the hills of Patoda. Rivers Kundke, Wan, Sindphana rise from Balaghat hills. The small rivers in the district are Mehkari, Kambli and Kadi.

The entire district is situated in the trap region and its soils are mostly fertile <sup>black</sup> cotten soils, especially to in Georai and Manjlegaon talukas. Deep, Medium and shallow soils are also prevalent in greater part of the district. They are dark gray to black in colour. Black in structure and clayey in texture. The soil is retentive of moisture.

They becomes sticky when wet and cracks freely in the dry weather. The soil from the western part of the district indicates the existance of salt to the extent of 0.5%. The soil alongwith the banks of sindphana, Godavari and Manjra is more fertile. Nearly half of the cultivable area of the district <sup>generally cropped under kharif crops. Jowar, Bajra</sup> is <sup>\*</sup>Other crops included groundnut, rice, pulses, safflower, cotton and sugarcanees.

\*= and Wheat are most important foodcrops of the district.

**1.7 CLIMATE :**

The climate of the district is pleasant and agreeable during the greater part of the year. Patoda and Kaij talukas have good climate even in summer. The village Chincholi in Patoda has highest elevation from the sea level and its weather in summer season is akin to that of hill station. Among all the talukas, climate of Ambajogai is very pleasant, the climate of Beed, Manjlegaon and Georai on the low lands is warm.

**1.8 TEMPERATURE :**

The metrological observatory is located at the district headquarters only and the metrological data regarding temperature etc, recorded at this station may be taken as representative of the <sup>climatic</sup> conditions over the district as a whole. During the hot dry season maximum temperature recorded in the district was

( 4 )

40.4<sup>0</sup> Centigrades in the month of April 79 while the minimum temperature during cool dry season was found 13.7<sup>0</sup> Centigrades in the month of December 79.

TABLE NO. (1)

Monthwise temperature during the year 1979

Sr.No.	Month	Temperature in Centigrade	
		Maximum	Minimum
1.	2.	3.	4.
1.	January, 79	30.5	16.3
2.	February, 79	31.5	14.6
3.	March, 79	35.2	17.7
4.	April, 79	40.4	22.2
5.	May, 79.	39.9	24.8
6.	June, 79	38.1	25.3
7.	July, 79	32.2	23.5
8.	August, 79	30.1	22.1
9.	September, 79	N.A.	N.A.
10.	October, 79	33.3	21.0
11.	November, 79	30.3	19.2
12.	December, 79	29.4	13.7
Year :		40.4	13.7

1.9 Rainfall :

The district is divided into high and low level tracts by the central ghats running through Beed and Satara tahsils. The rainfall is not uniformly distributed in the district during the monsoons. The average rainfall during the year 1979 was 698 mm. as against 706 mm. in 1978. The highest rainfall received during 1979 is found recorded as 916 mm. at Ambejogai centre while highest rainfall recorded in the earlier year 1978 was 888mm. at Chavara centre in Beed Tahsil. The tahsils situated in eastern part of the district, receive generally assured rainfall during monsoon period which starts in June and continues upto end of september the statement given below gives the rainfall at the selected centres during the years 1978 & 1979 .

(5)

Statement showing the actual rainfall at the selected centres in the district during 1978 and 1979.

Sr.No.	Name of the Centre	Normal Rainfall	Rainfall in 1978	
			1978	1979
1.	2.	3.	4.	5.
1.	Beed.	685	736	674
2.	Chandola	652	688	710
3.	Georai	641	638	648
4.	Manjlegaon	700	774	861
5.	Anbejogai.	766	874	916
6.	Kaij	711	641	596
7.	Patoda.	665	686	670
8.	Rooty	737	436	614
9.	Ashti.	698	635	598
Average Rainfall:-		695	706	698.5

It is evident from the statement that average rainfall in the year 1979 is little less than the average during 1978.

#### 1.10. IMPORTANT ECONOMIC DEVELOPMENT.

Beed district is industrially backward. only progress, it can make is in Agriculture by increasing irrigation potential of the district. The District had in the Vth plan hardly 8 % of the cropped area under irrigation. In the V th plan period Jaikwadi stage II was given top priority. Main Projects constructed in the district are as under.

##### a) Jaikwadi Stage II Project.

The work of Jaikwadi Stage-II involved firstly the right bank Canal from Paithan to Manjlegaon through Georai & Manjlegaon Talukas. The length of canal is 132 Kms. of which length of 64 Kms. is completed. The gross area commanded by the project is about 60,000 hectares of which 41,632 hectares is irrigable area by completed project.

The Second item in the stage II is the head works at Manjlegaon which is supposed to store 15.7 T.M.C. of water. The length of the Project canal is 165 Kms. and the gross area commanded by the project is 39,650 hectares of which irrigable area in the district is 28,300 Hectare.

(6).

b) Manjra Project.

The scheme of constructing major irrigation project on Manjra was included in IVth plan since no Major irrigation scheme was taken up for Beed district.

The Project is constructed on down stream of village Dhanegaon in Kaij taluka. The length of canal in Beed district is 95 Kms. The gross area commanded by the project is 15,350 hectares of which 10,138 hectares is irrigable area.

There are five on going medium irrigation project in the district Viz. 1) Kundlika (2) Sarswati (3) Waghebabhulgaon (4) Belpara and (5) Boarna.

The Kundlika project is constructed near village upli in Manjlegaon and envisages irrigation potential of 2963 hectares and command area falls in Manjlegaon taluka.

The site of Sarswati project is near village Hingni (Khd.) in Kaij. Irrigation of 1368 hectares is envisaged by the project and command area falls in Manjlegaon taluka.

The irrigation potential of Waghebabhulgaon Project is 769 hectares while that of Borna Project is 156 hectares.

1.11 Dairy Development.

Dairy Development activities received great importance in the Vth Plan period in the District. This is the activity which can contribute substantially to increase the Economic viability of the weaker section of the community. Under the Programme dairy development societies have been formed and the infrastructure for collection, processing and marketing of Milk is organised.

The district has one govt. Milk supply scheme with 1,2 lakh litres capacity installed at Beed. Two chilling centres have a capacity of 12,000 litres. The Project has started functioning in the year 1973. The project has potential enough to provide subsidiary occupation to the agriculturists and landless labourers to improve their economy.

( 7 ).

1.12. Industries:

There are few large scale Industries in Beed District. Notable among these are the Thermal Power Plant at Parli-Vaijnath of 65 K.V. One additional unit producing 210 K.V. is under construction. Three sugar factories have also been established in the district The sugar factory of Ambejogai has started functioning in 1976 while Georai Factory started in 1978. Kada sugar Factory has also started functioning in 1979. All the three sugar Factories have received Govt. share Capital contribution of Rs. one crore each prescribed for backward district.

Three more sugar factories are coming up one each at patoda, Beed and Manjlegaon for which collection of share Capital is in progress.

The tanning project sponsored by SICOM has also been established at Beed.

These industries have helped in enlarging employment opportunities raising the incomes and standard of living of the rural communities and diversification of rural occupation etc.

CHAPTER- II.

Explanatory note on scope and limitations of statistics presented in the district Statistical Abstract 1979-80.

2.1. Introduction.

The present publication of the District Statistical Abstract for the year 1979-80 is the 17th issue since the first was published in the year 1958-59. This yearly publication contains exhaustive statistics relating to various aspects of the district including socio Economic indicators. The information and the data in this publication is collected from the various offices of the state and Central Government the Reserve Bank, Zilla Parishad, Panchayat Samities, Municipal Councils, Electricity Board, Life Insurance Corporation and the state Road Transport Corporation. The sources of information Collected are mentioned as foot note under each table of the publication.

2.2. District at a glance.

The summary figures of the Broad and important items of the district in comparison with Maharashtra state are depicted in the beginning of the publication as District-At-A-Glance. The period of reference indicated is the same for both the District and the state.

The scope and limitations of each set of statistical information presented here in this publication is explained in brief in the following paragraphs.

2.3 Area & Population.

The information of 1971 Population Census in comparison with earlier censuses of 1951 & 1961 is presented in various forms in seven tables under the head area & Population.

The talukawise data of 1971 Population census pertaining to area, population density, towns and villages, occupied residential houses, households and sex wise population according to rural & Urban classification is presented in table No.1 while its density and decadal percentage variation for 1951, 1961 & 1971 Censuses according to rural and Urban classification is shown in Table No.2. The talukawise classification of villages according to Population ranges as per 1971 Census is depicted in Table No. 3 while Classification of towns is given in Table No. 4. The talukawise classification of workers and non-workers according to rural and urban as per livelihood classes of 1971 census is reported in Table No. 5 Population distributed in various age groups according to rural and urban and different religion as per 1971 Census is mentioned in Table No. 6, while talukawise rural urban population of scheduled caste, Scheduled

tribes neo budhists etc, is given in Table No.7.

2.4. Rainfall & Climate.

The monthwise data pertaining to actual rainfall in the year 1979 recorded at the selected centres of Beed, Chausala, Georai, Manjlegaon, Ambejogai, Kaij, Patoda, Ruti & Ashti in the district and number of rainy days is indicated in Table No. 8. The normal rainfall (Usually the average of eight to ten years rainfall) is also mentioned against each centre. The Monthly Maximum and Minimum temperature recorded at Beed for the year 1979 is reported in Table No. 9.

2.5. Agriculture.

2.5.1. Agriculture is predominant economic activity of the district. The statistical table numbers 10 to 23 give total geographical area, area under different crops, area irrigated with the different sources, no. of irrigation wells in use, tanks, availability of groundwater, minor, medium and major irrigation works etc.

2.5.2 Agriculture statistics is obtained mainly from the annual season and crop report of the district for the year 1976-77, 1977-78, and 1978-79. All the figures in the Table Numbers 10 to 15 for the year 1976-77 & 1977-78 are final where as 1978-79 are provisional.

2.5.3. The data on land utilisation is presented in table No. 10 and details of cropwise area in each taluka for the years i.e. 1976-77, 1977-78 and 1978-79 are given in table No. 11. Estimated information pertaining outturn and average yield rate per hectare of principal crops of the district for the years 1976-77, 1977-78 & 1978-79 is shown in table No. 12. Net area irrigated with different irrigational facilities available in the district for the years 1977-78 and 1978-79 is indicated in Table No. 13, whereas irrigated area under different principal Crops in each taluka for the same years is reported in Table No. 14. Number of wells in use/not in use and other wells for the years 1977-78 and 1978-79 are given in Table No.15, The information pertaining to activity of groundwater survey and development agency for 1979-80 is given in Table No. 16. The table number 17 and 18 give information regarding minor irrigation works for the year 1978-79 and Medium and Major

irrigation projects as on 30-6-1979 in each taluka. Agricultural wage rates presented in Table No. 19 for the year 1979 are of the three selected Centres i.e. (1) Taluka Georai. (2) Renapur: Taluka Ambejogai and (3) Taluka ~~Ashti~~ Ashti in the district. Table No. 20 indicated the data for 1976-77 pertaining to number of operational holding and area operated, no. of operational holding reporting irrigations and net area irrigated and number and area of operational holdings by tenure and by size class of operational holdings in the district. The data on different types of agricultural implements equipments and Machineries in use in each taluka for Agricultural Census 1978 is shown in table No. 21. Table numbers 22 and 23 give the data on famine and history of Scarcity for the year 1979-80 and for the years 1971-72 to 1979-80. respectively.

#### 2.6 Animal Husbandry.

2.6.1 The Table No. 24 furnishes the data on different categories of livestock and poultry in the district as per quinquennial livestock Census conducted in 1978. In table No. 25 the information relating to veterinary facilities available in each taluka of the district during the year 1979-80 is shown. The details of disease-wise livestock mortality in 1979-80 is shown in table No. 26. Table No. 27 indicates data pertaining to the number of recognised slaughter houses and animals slaughtered there in during 1979-80.

#### 2.6.2 Forest and Fisheries.

Data pertaining to forest area under different ranges, the quantity of Minor and Major forest Produce and estimated cost of forest produce during the year 1979-80 is presented in Table No. 28 -A and B Table No. 29-A give the information in respect of inland fisheries for year 1979-80.

#### 2.7 Industry Employment Mining & Electricity.

2.7.1 Industry and Employment: The data on factories registered under Factory Act 1948 for the years 1978 and 1979 is presented in Table No. 30, 31 and 32. The Types of factories covered with its details are as under (1) Factories using power and employing 10 or more workers (2) Factories not using power but employing 20 or more workers and (3) Factories not covered in 1 and 2 but notified by the Government as covered under Factory act.

2.7.2. The details of each type of industry, the total No. of working factories and number of mandays worked during the year under report as well as average daily employment classified by males and Females separately are given in Table No. 30. The classification of industries is based on standard classification. The information pertaining to table No. 31 and 32 gives the distribution of factories according to their working strength and the distribution of the factories according to number of days worked respectively. The information in respect of Annual Survey of Industry for the years 1977-78 and 1978-79 is shown in Table No. 33.

#### 2.7.3 Employment Exchange statistics.

The data pertaining to employment exchange statistics of the district and works undertaken under employment Gurantee Scheme and expenditure incurred during the year 1979-80 in the district is indicated in table numbers 34, 35 and 36 respectively, while table No. 37 gives the volume of different industries as on 31.3.1980.

2.7.4 The figures of electricity generated, consumption of electricity for domestic, Commercial, industrial, public lighting and other purposes etc. 1979-80, are shown in table No. 38 and number of villages and towns electrified and population covered up to the year ending 1980 are shown in the table No. 39.

#### 2.8 Co-operation.

This section deals with various activities of the Co-operatives movement. An abstract of the the different types of Co-operatives societies in existence in the district as on 30-6-80 is presented in table No.40 and number of Co-operative banking facilities with total number of memberships, share capital reserve and other funds and amount of loans advances i.e. short term, medium term and long term etc as on 30-6-1980 is indicated in table No. 41. The details data on primary Agricultural Credit Societies functioning in each taluka as on 30-6-80 are given in table No. 42 and data about other co-operative Societies of Different types in each taluka in the district for the same period is shown in the table No.43. Operations of the central and primary co-operative marketing Societies as on 30.6.80 are shown in table No. 44 and details of other different types of societies in the district as on 30-6-80 are reported in table No. 45.

Activities of the regulated Markets in each taluka as on 30-6-80 is presented in table No. 46. The data regarding the money lenders and loans advanced by them during the year 1978-79 is given in table No. 47.

#### 2.9 Medical and public Health.

The data on medical and public health is presented in 5 different tables. Medical facilities made available through public and public aided bodies for the year 1979 are shown in table No. 48. Number of births and deaths registered in 1979 and No. of deaths occurred due to various important causes in 1971 to 1979 are reported in table No. 49 and 50 respectively. The information in respect of vaccination statistics for 1979 is displayed in table No. 51, while table No. 52 gives the information about family planning activities undertaken in the district during the year 1979-80.

#### 2.10. Education.

The details of information about education statistics is displayed in 7 types of tables. The total male and female literates with their percentage both for rural and urban areas as per 1971 Census is shown tahsilwise in table No. 53. The data on education in rural and urban areas as per 1961 Census is shown in table numbers 54 and 55. Information appearing in table No. 56 indicates educational institutions of different categories rendering the services in the district alongwith total enrolment of boys and girls and number of teachers both trained and untrained for the year 1979-80. The data on percentage of beneficiaries from backward classes and concessional free education availed by the economically backward class communities for the years 1978-79 & 1979-80 is displayed in the table numbers 57 and 58 respectively. The expenditure incurred on primary educational institutions by way of grants-in-aid for the year 1979-80 is given in table No. 59.

#### 2.11. Transport and communication.

This section deals with upto date statistics in respect of facilities of various modes of transport available in the district. The data on railway length according to different types of rail gauges in the district as on 31-3-80 is shown in table No. 60. The road length according to different categories as well as types of surfaces of roads as on 31-3-80 is given in table No. 61. The Number of motor vehicles in operation as on 31-3-80 in Aurangabad division is shown in table No. 62

(as the information in respect of Beed district is not separately maintained.) The details of operational statistics of nationalised road transport of M.S.R.T.C. Beed division for the year 1979-80 are given in table No. 63. The information of traffic Census of important roads in Beed district carried out by public works department in december 1979 is displayed in table No.64, while postal facilities available in rural and urban areas of the district during the year 1961-62, 1965-66, 1970-71, 1973-74, to 1979-80 are shown in table No. 65. The data on rural broadcasting, radio listening sets installed and population covered as on 31-3-80 is given in table No.66.

#### 2.12. Local Bodies.

The sub-section "Local Bodies" deals with upto date statistics pertaining to village panchayats Municipal councils and Zilla Parishad of the district. The information of income and expenditure of the local bodies for the year 1965-66, 1968-69, 1969-70, 1970-71 to 1979-80. is shown in table No. 67. The information pertaining to income and expenditure of village panchayats for the year 1979-80 is given in table No. 68. The details of headwise receipts and expenditure of Zilla parishad, Beed for the year 1978-79 to 1980-81 are displayed in table No.69-A, 69-B and 69-C, while income and expenditure of Municipal Councils for 1979-80 is given in table No. 70.

#### 2.13 Plan and community Development.

Statistical data relating to plan and community development is shown in 5 tables. The details of expenditure and physical achievements under various schemes included in the Annual plan for the years 1978-79 and 1979-80 are shown in table No. 71 and 72 respectively. the table No. 73 gives particulars of C.D. programme as on 31-3-80 in the district. The expenditure incurred out of C.D. schematic funds in different stages of the blocks since inception till 31-3-80 is shown in table No. 74 and the blockwise physical achievements under selected items of all blocks (stagewise) operating in the district in 1979-80 is presented in table No. 75.

#### 2.14 Prices.

This section gives details of information of prices, of the essential commodities in the district. The average monthly wholesale prices of important agricultural commodities of the regulated markets in the district for the year 1979 are shown in table No. 76.

The Weekly retail prices of essential commodities at district headquarter for the year 1979 are shown in table No. 77. The consumer price index for the working class of Aurangabad and Nanded Centres for the year 1979-80 is exhibited in table No. 78.

2.15 Judiciary.

The data on judiciary and crime statistics for the year 1979 in the district is displayed in table Nos. 75 to 76.

2.16 Miscellaneous

The statistics pertaining to cinemas, Banks and joint stock companies, Insurance policies, Small savings, Land revenue, printing presses, Newspapers and periodicals etc, are given in table numbers 82 to 89. The details of information regarding the quantity of rice, wheat and sugar issued to the Fair price shops in the district are displayed in table No. 90 for the year 1971 to 1980 while table No. 91 gives the information of demand and procurement of levy in the district for the year 1970-71 to 1979-80. The table No. 92 gives the data pertaining to General Elections held of the parliamentary & Assembly constituencies in the years 1980 and 1978 respectively. while table No. 93 gives the summary of trends in selected indicators of the district for the current decade and for the last two decades.

CHAPTER -III.An Analytical Review,I N D I C A T O R S :1. AGRICULTURE.

3. This chapter deals with important selected indicators of the district for comparative study.

3.1 Percentage of gross cropped area to net area sown . . .

The indicator shows the extent of double cropped area in relation to the net cropped area of the district. The double cropped area of the district increased in the year 1977-78 over the years 1960-61 and 1970-71.

The double cropped area decreased in Georai, Manjlegaon and Ambejogai Taluka in the year 1970-71 over the year 1960-61. It increased in remaining tahsils of Beed, Kaij, Patoda and Ashti during the same period. The percentage of the double cropped area increased in Georai, Ambejogai and Patoda talukas in the year 1977-78 and 1978-79 over the 1970-71. It has however decreased in Beed, Manjlegaon, Kaij and Ashti talukas during the same period. The reason for decrease of double cropped area over these years are inadequate facilities of Irrigation, unassured rainfall and less fertile soil in the district and also increase in the net area sown.

Percentage of Gross cropped area to Net cropped area in the years 1960-61, 1970-71, 1977-78 and 1978-79.

Table No. 1.

Sr. No.	Name of the Taluka.	Percentage of Gross cropped area to Net area sown.			
		1960-61	1970-71	1977-78	1978-79
1.	Beed	103.8	112.1	104.0	107.0
2.	Georai.	117.8	102.0	104.0	103.4
3.	Manjlegaon.	116.0	106.9	103.5	104.1
4.	Ambejogai.	104.2	101.9	102.4	104.2
5.	Kaij.	100.4	104.5	100.3	100.3
6.	Patoda.	100.0	103.5	104.7	136.1
7.	Ashti.	103.5	121.1	106.2	112.0
District Total		105.7	106.9	103.4	107.3

The percentage of gross cropped area to Net cropped area in to the year 1977-78 was highest in Ashti taluka and lowest in Kaij taluka in the district, whereas it was highest in the Patoda and lowest in the Kaij taluka in the year 1978-79.

3.2 The following table will broadly indicate the trend of cropping pattern in the district.

Percentage of gross area under important crops to total gross cropped area in the district.

Table No. 2.

Sr. No.	Important Crops.	Y E A R S . . . . .			
		1960-61	1970-71	1977-78.	1978-79.
1.	2.	3.	4.	5.	6.
1.	Rice.	0.99	1.15	1.12	0.96
2.	Wheat.	5.37	4.69	9.24	5.71
3.	Kh. Jowar.	10.48	9.63	16.00	19.73
4.	Rabi Jowar.	31.76	23.54	25.26	24.91
5.	Bajra.	9.47	17.23	12.67	15.75
6.	Total Cereals.	61.29	57.59	64.46	68.05
7.	Gram.	4.39	3.40	4.04	3.01
8.	Tur.	2.44	3.58	4.22	3.25
9.	Total Pulses	12.53	21.23	14.80	14.10
10.	Total Foodgrain.	73.82	78.82	79.26	83.05
11.	Sugarcane.	0.30	0.32	0.97	1.00
12.	Total Foodcrops.	75.63	80.51	81.72	85.10
13.	Cotton	7.41	5.77	3.70	2.77
14.	Groundnut	8.16	5.26	3.14	2.52
15.	Total Non-foodcrops	24.37	19.49	18.28	14.91
16.	Total Cropped area.	100.00	100.00	100.00	100.00

The percentage of Area under foodcrops to, Gross cropped area shows the remarkable increase in the year 1970-71, 1977-78 and 1978-79 when compared with the figures in the year 1960-61. The Percentage of area under total Pulses shows remarkable increase in the year 1970-71 as compared to the year 1960-61. However this has further decreased in the years 1977-78 and 1978-79, as compared to the year 1970-71. The percentage of area under sugarcane was almost the same in the years 1960-61 and 1970-71, while it was increased in the years 1977-78 and 1978-79, as compared to the year 1960-61 and 1970-71.

The cropping pattern shown above indicates that 80 to 85% area is utilised for ~~main~~ foodcrops while 10 to 15% area of the gross cropped area is covered under non foodcrops. Cereals occupy 60 to 70 % of the gross cropped area, while Pulses occupy 10 to 20%.

### 3.3. Production of Important crops:-

The Agricultural production is depend upon various factors such as natural conditions, facility of soil, input factors etc. The following table shows the yield per hectares and production of ~~the~~ important crops in the year 1960-61, 1970-71, 1977-78 and 1978-79.

Table No. 3.

Yield rate and Out turn of Principal crops.

Sr.No.	Crops.	Yield in Kg (Per Hect)				Out-turn in '00' Tonne			
		1960-61	1970-71	1977-78	1978-79	1960-61	1970-71	1977-78	1978-79
1.	2.	3.	4.	5.	6.	7.	8.	9.	10.
1.	Rice..	811	515	1,032	1,260	64	51	1,19	1,16
2.	Wheat.	337	300	1,435	730	226	127	4,92	3,58
3.	KH.Jowar..	853	263	811	789	704	820	2862	3020
4.	RabiJowar.	818	-	-	-	2048	-	-	-
5.	Bajra.	253	500	480	352	189	645	489	384
6.	Gram.	292	206	343	388	102	60	111	108
7.	Tur.	242	103	372	444	47	30	125	154
8.	Sugarcane.	4645	7261	6312	6125	113	167	486	342
9.	Cotton(interm of bales)	137	12	115	166	455	343	190	340
10.	Groundnut.	836	630	617	462	538	271	163	98
11.	Chillies.	453	291	695	431	26	16	16	22

The above table indicates that the production of all crops has been increased except cotton, Groundnut and Chillies in the year 1977-78 and 1978-79 as compared to the year 1960-61. so also yield of all crops have increased except ~~the~~ Jowar and Groundnut in the year 1977-78 as compared to the year 1960-61 and Jowar ~~and~~ Groundnut ~~and~~ Chillies in the year ~~the~~ 1978-79 as compared to the year 1960-61.

3.4. Net Irrigated area to Net sown area:-

The net irrigated area and net area sown in the year 1977-78 are 69,234 hectares and 7,89,100 hectares respectively. The percentage of net area irrigated to net area sown worked out to 8.7 percent. The following table gives net area irrigated to net area sown during the year 1960-61, 1970-71, 1977-78 and 1978-79.

Table No. 4.

Net Irrigated area to Net sown area (in Hectares).

Sr.No.	Items	1960-61	1970-71	1977-78	1978-79.
1.	2.	3.	4.	5.	6.
1.	Net area Irrigated.	38,067	57,518	94,262	69,234
2.	Net sown area.	7,46,397	7,97,511	8,07,000	7,89,100
3.	Percentage of Net Irrigated area to net sown area.	5.1	7.2	11.7	8.7

The above table reveals that the net irrigated area is increased in the year 1970-71, 1977-78 and 1978-79 as compared to the year 1960-61. However the net sown area is slightly decreased in the year 1978-79 as compared to the year 1977-78. The percentage of net area irrigated to net sown area is higher in the year 1977-78 as compared to the year 1960-61 and 1970-71, However it is decreased in the year 1978-79.

The inadequacy of rain may be the probable reason for decrease the net area sown and the slow increase in the irrigation percentage.

3.5. Percentage of area under different irrigated crops to gross irrigated area.:-

The Gross irrigated area in the district has been increased substantially from 41,664 hectares in 1960-61 to 77,365 hectares in 1978-79. However the figures of the Gross area irrigated is decreased in the year 1978-79 as compared to the year 1977-78. This decrease was also mainly due to drought condition prevailed in the district in the year 1975-76 and 1976-77 which badly affected the water level in the ground. The percentage of area under different irrigated crops to gross irrigated area is as follows:-

shows that the percentage of total irrigated area under foodgrains has slightly increased from 83.28 in the year 1960-61. to 83.45 in the year 1978-79. The following table shows an idea how changes in irrigated area have been occurred.

Table No. 5.

= Percentage of area under different irrigated crops to gross irrigated area.

Sr.No.	Name of Crops	Y E A R S . . . . .			
		1960-61.	1970-71.	1977-78.	1978-79.
1.	2	3	4	5	6
1.	Rice	3.73	3.38	1.79	3.41
2.	Wheat	15.18	12.65	19.41	30.66
3.	i)Kharif Jowar	53.69	0.86	8.50	9.26
	ii)Rabi Jowar		54.73	40.74	33.44
4.	Bajra	2.45	2.54	6.12	---
5.	Total cereals	76.18	75.46	78.37	78.46
6.	Gram.	6.06	5.17	4.81	4.91
7.	Total pulses	7.09	7.43	4.83	4.09
8.	Total Food grains	83.28	82.90	83.25	83.45
9.	Sugarcane	5.83	3.93	6.97	9.50
10.	Chillies.	7.54	3.98	2.12	1.84
11.	Total Food Crops	96.96	95.02	94.96	95.46
12.	Cotton,	1.96	1.71	3.10	1.33
13.	Groundnut	0.46	1.74	1.75	0.76
14.	Total non Food Crops	3.04	4.98	5.04	3.54
Total :-		100.00	100.00	100.00	100.00

(Note: Totals do not tally due to roundings)

From the above table it can be seen that the percentage of area irrigated to total irrigated area under wheat and sugarcane showed an increase in the year 1977-78 & 1978-79 as compared to the years, 1960-61 and 1970-71, while other crops showed decrease in the year 1973-79 as compared to year 1960-61.

3.6 Sourcewise net irrigated area

The net area irrigated by different sources in the years 1960-61, 1970-71, 1977-78 and 1978-79 is given in the following tables.

Table No.6

Sr. No.	Source of Irrigation	<u>Net area irrigated (in hectares)</u>			
		1960-61	1970-71	1977-78	1978-79
1	2	3	4	5	6
1.	Surface Irrigation	4,236	17,173	20,149	10,387
2.	Wells	33,830	40,335	74,113	58,347
T o t a l:		38,066	57,513	94,262	69,234

From the above table it can be seen that the net area irrigated has increased during the year 1977-78 as compared to the years 1960-61 and 1970-71. However it is decreased in the subsequent year. The net area irrigated by wells has increased during the year 1970-71 and 1977-78 as compared to the year 1960-61 while it has been decreased in the subsequent year.

....

"2" Co-operation.3.7 Agriculture Credit.

The Numbers of Primary Agricultural Credit Societies, its members, working capital loan advanced, loan over dues and loans outstanding.

3.7.1 The Co-operatives have a major role in making available credit to the farmers undertaking agro. inputs which is the basic object of the working of the Agricultural . The source Co-operative Societies play an important role in the field of Agricultural development by extending the credit facilities on an extensive basis. The progress of the credit societies during the years 1960-61, 1970-71 and 1978-79, is shown in the Table given below:-

Table No. 7.

Primary & Agricultural credit Societies with membership working capital loan advanced, loan overdues and loans outstanding.

Sr. Item No.	Y E A R S				
	1960-61	1970-71	1978-79	1979-80	
1.	2.	3.	4.	5.	6.
1. No. of Agricultural Credit Societies	1,193	760	762	755	
2. Membership	69,087	97,318	1,53,956	1,51,354	
3. Working Capital(Rs in '000')	72,69	6,29,56	11,48,33	11,00,85	
4. Loans Advanced(in Rs. '000' ).	74,39	3,16,53	1,63,32	1,37,95	
5. Loans over dues. (" )	N.A.	213.04	5,40,88	5,14,38	
6. Loans outstanding(" )	N.A.	495.31	7,94,05	6,26,88	

From the above table it can be seen that the number of societies have decreased in the year 1970-71 as compared to the year 1960-61. Whereas it is increased by two in the year 1978-79 as compared to the year 1970-71. However it is decreased in the year 1979-80 as compared to the year 1978-79. While the trend of the membership is upward and it is increased from 69,087 in the year 1960-61 to 1,53,956 in the year 1978-79 but subsequently due to decrease in the number of Societies effected on the membership and decreased slightly in the year 1979-80.

The percentage of increase in the membership during the period 1960-61 to 1978-79 and 1979-80 is 122.8% and 119.0 % respectively.

The loan advanced also shows the remarkable increase which accounts nearly 126.2 % during the period 1960-61 to 1978-79. However the percentage is slightly decreased in the year 1979-80. The trend seems to be increasing in respect of both the remaining two items upto 1978-79 and this is the disturbing factor in the proper and smooth functioning of the Societies.

### "3" Wage Rates.

The agricultural wage rates data is being collected in the selected three rural centres in Beed district since June 1963. These selected rural centres are Unapur in Georai taluka, Renapur in Ambejogai taluka and Kada in Ashti taluka. The data on Agricultural wage rates in respect of skilled and unskilled labours is being regularly collected fortnightly. The average wage rates were observed to be almost doubled in the year 1979 than the wage rates in the year 1963. The average wage rates per day during the year 1979 for Male field labours were worked out to be Rs. 3.54 at Unapur Centre Rs. 3.00 at Renapur centre and Rs. 3.91 at Kada centre. The same for female Field labours were worked out to be Rs. 3.27 at Unapur centre and Rs. 2.00 each at Renapur and Kada centre.

### 4. LIVESTOCK

3.9 Livestock helps sustain and improve the Farmers Economic condition. Bovines play a multiple role. They are Major source of motive power in agriculture Sector provide nutrients in crop production and supply protein for human consumption, Milk and meat. Agriculture and livestock raising is an inter dependent activity. Livestock development also acting as an instrument of Rural development. The bovine and ovine population of the district in quinquennial livestock census of 1978 was 12,10,000. Bovine and ovine population in 1978 livestock census increased by about 2,46,353 head as compared to 1972 census it was more by about 1,66,093 heads in 1978 Census as compared to 1966 census.

The bovine & ovine Population was 973145 in 1972 and head decreased over 1966 population due to Scarcity in the year 1972 the table below Bovine & ovine population per 100 hectares of cultivable Land.

Table No. 8.

Bovine and ovine population per 100 Hectares of cultivable Land.

Sr. No.	Tahsil	Bovine and Ovine Population (Latest livestock Census 1978.)	Cultivable Land (in hectare) in the year corresponding to the livestock Census year 1978-79.	Bovine and ovine per 100 Hectares.
1.	2.	3.	4.	5.
1.	Beed.	1,81,103	1,29,343	140
2.	Georai.	1,67,326	1,46,758	114
3.	Manjlegaon	1,68,010	1,50,473	112
4.	Anbejogai.	1,95,469	1,64,230	119
5.	Kaij.	2,07,043	1,78,791	115
6.	patoda.	1,58,839	1,09,671	145
7.	Ashti.	1,41,708	1,30,565	108
Total:-		12,19,498	10,09,831	127

From the above table it is seen that the indicator in Ashti Tahsil is lowest and the same is highest in patoda tahsil. It is below in the district average in tahsil except Beed and Patoda tahsils.

### 3.10 Poultry population in the district.

The poultry population in the district as per 1978 census was 3,40,131. The poultry population increased in 1978 Census as compared to the year 1972. whereas it was found to be doubled than the strength of 1966. The ratio of poultry per hundred human population was observed to be 26 in 1978 Census. The ratio was 12 & 17 per hundred of population in 1966 and 1972 respectively.

## 5. Electricity.

### 3.11. Consumption of Electricity.

Electricity is vital for Agricultural and Industrial development, emphasis on Rural electrification programme is laid in the plans for development of Agricultural through energisation of irrigation pumps. There is rapid progress in consumption of electricity in the district. Which is a clear indication of general progress. The electricity consumed in 1960-61 was 330 thousand K.W.H. Units, and has increased to 25945 thousand K.W.H. units. in the year 1979-80. The consumption of electricity was 78 time more in the year 1979-80 as compared to the year 1960-61. However the electricity consumption was decreased in the year 1979-80 as compared to the year 1978-79. The reason for shortfall in consumption during the year 1979-80 is due to H.P. tariff applied with effect from 1st September 1978 in respect of Agriculture consumers.

The consumption of electricity for Industrial purposes was found to be the highest than other purposes, in the year under review. The consumption of Electricity for domestic purpose is next to the industrial purpose. in the year under review.

The talukawise No. of Towns and villages electrified and pumps energised and the per capita consumption is shown in the table given below with the comparison of figures in the year 1960-61.

Table No. 9.

No. of Towns and villages electrified, pumps energised & per capita consumption in Beed district during 1960-61 & 1979-80.

Sr. Tahsil No.	Town/village electrified.	Pumps energised		per capita consumption in K.W.H.			
		1960-61	1979-80 latest	1960-61	1979-80		
1.	2.	3.	4.	5.	6.	7.	8.

2. Georai.	1/1	1/123	Breakup is not available.	1,372	Break up is not available.	12.7	
3. Manjlegaon.	1/1	1/130	Breakup is not available.	934	Break up is not available.	14.3	
4. Ambejogai.	1/-	2/144	Breakup is not available.	3,470	Break up is not available.	26.1	
5. Kaij.	-/-	1/126	Breakup is not available.	1,219	Break up is not available.	19.6	
6. Patoda.	-/-	-/70	Breakup is not available.	461	Break up is not available.	0	
7. Ashti.	-/-	1/98	Breakup is not available.	1,445	Break up is not available.	2.4	
<b>Total:-</b>	<b>4/2</b>	<b>7/835</b>	<b>17</b>	<b>11,180</b>	<b>0.2</b>	<b>20.2</b>	

○ Break up of electricity consumption is not available in respect of Beed and patoda taluka From the above table it is seen that during the year 1960-61 only 4 towns and 2 villages were electrified while as on 31-3-1980 7 towns and 835 villages were electrified. The percentage of electrified villages to the total number of in-habited villages worked out to be 81.23. The total number of pumps energised were 17 in the year 1960-61, where as it has increased to 11,180 in the year under review (as per latest census 1978 ) the per capita consumption of electricity in the year 1979-80 increased upto 20.2 K.W.H. as against 0.2 K.W.H. in the year 1960-61.

#### 6. Employment.

The figure of enrolment of candidates in the employment exchange is increasing day by day. Total 9723 Candidates have enrolled themselves in the employment exchange offices in the district during the year under review. The figure of candidates enrolled were 3873 and 5702 in the year 1960-61 and 1970-71 respectively. The figure of enrolled during the year 1979-80 increased near about three times to the figure in the year 1960-61 and twice to the figure in the year 1970-71.

Table No. 10.

No. of candidates enrolled and vacancies notified in the years 1960-61, 1970-71 and 1979-80.

Sr. NO.	Item	years.		
		1960-61	1970-71	1979-80.
1.	2.	3.	4.	5.
1)	Candidates enrolled	3873	5702	9723
2)	Vacancies notified	555	444	894
3)	Placement in vacancies.	394	324	547
4.)	Percentage of Placement to enrollment.	10	6	5
5))	Candidates on live Registrar at the end of the year.	1815	3906	19906

The above table shows the important statistical data in connection with the employment exchange. The figure of enrolment of candidates at the employment exchange is higher by 151 % in the year 1979-80 than that of 1960-61. The percentage of placement to total enrolment during the year has been decreased from 10 in the year 1960-61 to 6 each in the years 1970-71 and 1979-80 respectively. The trend of notification of Vacancies and placement of Candidates has been decreased in the year 1970-71 as against the year 1960-61. However it has increased in the year under review as compared to the years 1960-61 and 1970-71. The No. of candidates on the live Register has alarmingly increased 19,906 by end of 1979-80 from a figure of only 1815 at the end of March, 1961. This is an indication of the extent of increase in no. of employment sector.

7. Medical Facilities.

3.13. Indoor and outdoor patients treated in the Hospitals and dispensaries.

Better medical facilities are being provided in Govt hospitals under dispensaries which results in a continuous increase in the No. of indoor patients treated during the year 1979-80. The figure of indoor patients treated during the year 1979-80 was 18,566. The No. of indoor patients treated in 1961 was 6,300 while it was 18,267 in 1971. This shows the increasing trend of treatment facilities available by indoor

The outdoor patients treated in the Hospitals and dispensaries during the year 1979 were 11,44,763. The figures of patients treated in 1961 was 5,02,218 and in 1971 was 6,23,331. As there are hospitals at Beed and Ambejogai, the treatment in these two talukas was more as compared to the other talukas in the district. following table shows the number of patients treated in public and aided medical institutions in the district.

Table No. 11.

In door and outdoor patients treated in public /public aided institutions in Beed district.

Sr. No.	Item	Y E A R S - . . . .		
		1961	1971	1979.
1.	2.	3.	4.	5.
1.	Indoor patients	6,300	19,267	85,661
2.	Outdoor patients.	5,02, 218	6,23, 331	11,34,763
Total :-		5,08,518	6,42,598	12,30,424

From the above table it is seen that the number of indoorpatients treated is increased more than 13 times in 1979 as compared to the figures in 1961. The figure of outdoor patients has also give to double in 1979 as compared to the figure in 1961. This change is mainly due to increase in medical facilities during the period of 1961 to 1979 alongwith increase in population .

The No. of Hospitals and primary Health centres have increased from 2 & 7+1 M.H. unit in 1960 to 3 and 13 in the year 1979 respectively. The total number of dispensari-  
-es were 21+1 T.B. Clinic in the district in the year 1979.

### 8. Education.

#### 3.14 Increase in the number of students in different Categories.

The remarkable change has been observed in the field of educational facilities during the last 20 years. At present almost all villages have been provided with primary school facilities. Greater emphasis is being laid on the programme of universalising the elementary education and enrolment of girls and children of the weaker sections of the community. The following table shows the number of institution number of pupils and number of Teachers in the different categories of education <sup>in</sup> the district.

TABLE NO. 12

Sr. No.	Item	YEARS		
		1960-61	1970-71	1979-80
1.	<u>PRIMARY EDUCATION</u>			
	Institutions.	973	1,447	1,583
	Enrolement	57,067	1,05,778	1,52,096
	Teachers	1,703	3,611	4,158
2.	<u>SECONDARY EDUCATION.</u>			
	Institutions.	35	139	151
	Enrolement.	11,206	40,711	52,067
	Teachers.	538	1,822	2,276
3.	<u>HIGHER EDUCATION.</u>			
	Institutions	2	5	15
	Enrolement.	412	4,013	6,819
	Teachers.	33	104	496

From the above table it is seen that in the primary education an addition of 610 Institutions and 166.5 percent increase in the enrolement during the period from 1960-61 to 1979-80 is observed.

The number of Teachers has also increased by 2,455 during the same period. The number of Secondary Institutions has increased by 116 during the period from 1960-61 to 1979-80. While the enrolement has increased from 11,206 in the year 1960-61 to 52,067 in the year 1979-80 and the number of Teachers increased by 1,738 in the same period.

In case of Higher Education, the number of Institutions also increased from 2 in the year 1960-61 to 15 in the year 1979-80. The figure of enrolement has increased from 412 in the year 1960-61 to 6,819 in the year 1979-80. The number of Teachers also increased from 33 in the year 1960-61 to 496 in the year 1979-80.

### 3.15 Important Ratio in Education.

The table given below shows the important ratio regarding institutions like secondary to primary institution and Higher to Secondary institution in the year 1960-61, 1970-71 and 1979-80.

Table No. 13.

Sr. No.	Item	Y E A R S . . . . .		
		1960-61	1970-71	1979-80.
1.	2.	3.	4.	5.
<u>INSTITUTIONS</u>				
1)	Secondary to Primary.	1:28	1:10	1:10
2)	Higher to Secondary.	1:17	1:28	1:10

From the above table it can be seen that the ratio of primary institutions per Secondary Institution was observed to be 28 in the year 1960-61 where as the ratio of Secondary Institution per Higher institution was observed to be 17 in the same year. This ratio decreased from 28 in the year 1960-61 to 10 in the year 1970-71 and 1979-80 in respect of Secondary to primary. where as the ratio was increased from 17 in the year 1960-61 to 28 in the year 1970-71 in respect of Higher to Secondary. Subsequently the ratio was decreased from 28 to 10 in the year 1979-80.

The categorywise position of the number of educational institutions Teachers and pupils and percentage increased (+) and decreased (-) over the year 1960-61 is shown in the following table.

(30)  
TABLE-14.

Sr. No.	Educational Institutions, Teachers & Pupils.	Position in the District during the years .....			Percentage increase (%) over the year 1960-61.	
		1960-61	1970-71	1979-80	1970-71	1979-80
1.	2.	3.	4.	5.	6.	7.
<b>A. INSTITUTIONS.</b>						
1.	Primary	973	1,447	1,583	48.7	62.7
2.	Secondary.	35	139	151	297.1	331.4
3.	Higher.	2	5	15	150.0	650.0
<b>B. TEACHERS.</b>						
1.	Primary	1,703	3,611	4,158	112.0	144.1
2.	Secondary	538	1,822	2,276	238.6	323.0
3.	Higher.	33	104	496	215.1	1,403.0
<b>C. PUPILS</b>						
1. Primary:-						
	i) Boys	43,916	77,958	99,734	77.5	127.1
	ii) Girls	13,151	27,330	52,362	111.5	298.1
2. Secondary:-						
	i) Boys	9,530	33,181	39,002	248.1	309.2
	ii) Girls	1,676	7,530	13,065	349.2	679.5
3. Higher:-						
	i) Boys	270	3,793	5,833	1,304.8	2,060.3
	ii) Girls	--	220	986	--	--

From the above table it can be seen that the number of Institution teachers and pupils increased substantively in the years under review as compared to the year 1960-61. The number of primary, Secondary and Higher Institutions was recorded 62.7 percent 331.4 percent, and 650.0 percent increased respectively, in the year 1979-80 over the figures for the year 1960-61. The number of Teachers i.e. Primary, Secondary and Higher was recorded 144.1 percent, 323.0 percent, and 1,403.0 percent increased respectively in the year under review over the year 1960-61. From the Figures of Pupils both the boys and girls it is noticed that there has been tremendous increase in the number of pupils attending in the year under review as compared to the year 1960-61.

9. Banking.3.16. Increase in the commercial Banking.

The banking facility has become a basic need in the development activities as the Banks are playing very important role in the Field of Agricultural and Industrial development by providing to the Agriculturists and small Units of Industries. The Co-operative banks have also made Considerable progress by expanding their activities in the rural areas. The Following table indicates the Taluk-wise increase in the number of banking offices in the years 1960, 1970 and 1978.

Table No. 15.

Sr. No.	Tahsil	Number of banking offices.			No. of households served per banking office.		
		1960	1970	1978	1960	1970	1978.
1.	2.	3.	4.	5.	6.	7.	8.
1)	Beed.	1	8	21	7419	1118	731
2)	Georai.	-	5	8	-	357	888
3)	Manjlegaon.	1	4	12	3571	577	654
4)	Ambejogai.	5	11	23	1217	1024	793
5)	Kaij.	-	4	9	-	734	794
6)	Patoda.	1	3	6	930	533	480
7)	Ashti.	1	6	9	1994	379	333
Total:-		9	42	88	2,222	814	700

\* Households figures are estimated.

From the above table it is seen that the banking offices have increased from 9 in the year 1960 to 88 in the year 1978. These 88 Banking offices are situated in 44 different places in the district. For every 2222 households in the year 1960, there was a banking office in this district. Subsequently in the year 1970 for every 814 households there was a banking office and in the year 1978 every 700 households there was a banking office in this district. As there is increase in the number of banking offices the number of households served per banking offices has been decreased from 2222 in 1960 to 700 households in the year 1978.

### 10. Roads.

The Transportation is the basic need of any area to reach and to be reached for organising any services. The Road length of all types of Roads in the district was 4047 Kms in the year 1979-80. The Road statistics of the district shows that the Road length was 762 Kms in the year 1960-61 and 3826 Kms in the year 1978-79. The communication facilities are increasing day by day by making approach Roads in the rural areas. Easy approaches are made by constructing rural Roads to villages and these roads are linked to district Roads. The Road length per 100 Sq. Kms. of area increased from 7.0 Kms in 1960-61 to 34.1 Kms in the year 1978-79 and 36.0 Kms in the year 1979-80.

### 11. Prices.

The prices of the essential commodities are being Collected by the District Statistical Organisation at the District Head Quarter on each Friday since November 1962. The prices are being collected from the Selected shop, though they may not represents the district position but from the said data it will be useful to prove as a broad Indicator of the trend in changes in the retail prices, over the period of time in the district. The below given table indicates the average retail prices of some important essential commodities collected at Beed town for the year 1963, 1970 and 1979.

Table No. 16.

Average Retail prices at Beed District Head Quarter.

(Figures in Rs.)

Sr. No.	Commodity.	unit.	YEARS		
			1963	1970	1979.

/Berkary.

It is seen from the above table that the price of almosts all commodities have increased during the period from 1963 to 1979.

The consumer price Index for working class of Nanded centre shows that the general price Index in 1979-80 increased upto 379, from the base year 1961 where as the consumer price. Index for working Class of Aurangabad Centre shows that the General price Index in 1979-80 increased upto 3.84 from the base year 1961.

CHAPTER IV  
ANNUAL PLAN 1979-80

With the launching of the First Five Year Plan in the country in the year 1951, an era of planning had started aiming at a balanced economic growth of all sectors and full utilisation of available resources. The Second, Third and Fourth Five Year Plans then followed. Initially the planning process started from the National level and percolated down to the states level. The states formulated their plans within the policies framed at National level.

The planning commission, at the outset of the Fifth Five year plan stressed the need to adopt multi level approach in Planning at the state and sub-state levels. The planning at sub-state level meant to formulate a plan of action which would take into consideration the level of development reached, the resources available and the needs of the people living in the area. This policy also aimed at involvement of the representatives of the people in the process of formulation and implementation of the plans at sub-state level.

In accordance with this policy of decentralisation of the planning efforts Govt. of Maharashtra adopted the principle of District Planning since the commencement of the Fifth Five Year Plan in 74-75. Accepting the district as a unit of Planning the Govt. of Maharashtra constituted District Planning Boards in 1972 and also set up a District Development Consultative council to serve as a forum for ascertaining the views of the people and their felt needs.

The main objectives of the planning at the district level are:-

1. To utilise fully the natural resources at the district level.
2. To prepare a perspective plan for development of the region within the frame work of National and State level policies.
3. To remove the imbalances in the areas within the region.

4. The above two bodies were amalgamated to form a new body of District Planning and Development Council in the year 1974. It consists of the following official and non-official members.

- 1) The designated Minister of the District - Chairman.
- 2) The Commissioner of the concerned Division-Vice Chairman.
- 3) All members of the Lok Sabha and Vidhan Sabha- Members elected from the District.
- 4) All members of the Rajya Sabha & Vidhan Sabha- Members residing in the District.
- 5) The Collector of the District Member
- 6) The President of the Zilla Parishad Member
- 7) The Mayor of the Municipal Corporation Member or the president of the largest Municipal Council in the District.
- 8) The Chairman, District Central Co-operative Bank-Member
- 9) The Director, Maharashtra State Co-operative Dev. Bank representing the Dist. on the Board of Directors. Member
- 10) The Regional Manager of the Lead Bank Member
- 11) A representative of Regional Dev. Co. op. Member
- 12) Three non-official members of the former Dist. Planning Board nominated by Govt. Member
- 13) Four non-official members of the former Dist. Dev. Consultative council nominated by Govt. Member
- 14) The Chief Executive Officer, Zilla Parishad. Member -Secretary

The D.P.D.C. is assisted by the Executive Committee consisting of the Chairman, Vice Chairman, Zilla Parishad President, one of the four representatives of urban local bodies, all members of the parliament and state legislature from the District, Chairman, D.C.C. and Manager Lead Bank, Collector and C.E.O. The District Planning Office acts as Secretary to this Executive Committee. The main functions of the D.P.D.C. are:-

1) The ensure coordinated action by various implementing agencies at the District level including Zilla Parishads.

2) The give guide-lines to the various implementing agencies at the district level in regard to preparation and implementation of the perspective five year and annual plans.

3) Subject to orders of the State Govt. to approve the perspective five year plan and annual plans of the District and

( 36 )

4) To review from time to time the implementation of the five year and annual plans and make recommendations to the State Govt./State Planning Board in that behalf.

The organisational set up of the D.P.D.C. at the District level consists of a Small Planning cell headed by the collector and member secretary of the D.P.D.C. District Planning Officer, two Research Asstt., One Planning Asstt., and a Typist.

Maharashtra State took a lead in preparation of District plans and issued guidelines to the D.P.D.Cs. to prepare the District five year plan. The D.P.D.C. Beed accordingly drafted its five year plan after taking its consideration the natural resources available and ascertaining the need of the people. The sectoral allocations were finalised and the draft plan was drafted and submitted to Govt. However the draft district plans were not finally approved by Govt. because of country's Fifth Plan not getting a final shape for a considerable period of time. The D.P.D.Cs. were subsequently directed to prepare the Annual Plans every year which were approved by Govt. in Planning Department.

The D.P.D.Cs. were given district share of plan allocation which was worked out on the basis of certain indicators. The D.P.D.C. has finalised a plan of 3380 lakhs for the Fifth plan for the District Beed. The sectorwise allocations approved by D.P.D.C. and the yearwise expenditure during the Fifth plan period is as under:-

.....

(37)

Fifth Plan Expenditure in Beed District

(Rs. in lakh)

Heads of Development	Fifth plan outlay as finalised by DPDC	Expenditure on Annual Plans					Total
		1974 : 75	1975 : 76	1976 : 77	1977 : 78	1978 : 79	
1	2	3	4	5	6	7	8

<b>Total:</b>	<b>3380.00</b>	<b>376.38</b>	<b>438.98</b>	<b>675.24</b>	<b>641.34</b>	<b>665.91</b>	<b>1111.</b>

In addition to the outlay of Rs. 3380.00 lakh, the D.P.D.C. suggested additional schemes worth Rs. 10.54 lakh demanding extra allocation. The district was also getting allocation for Rs. 6.91 lakh on state level schemes benefitting Beed District and Rs. 22.41 lakh for centrally sponsored schemes.

Annual Plans 1979-80

The 1978-79 is the last year of the Fifth Plan which 1979-80 is the First year of the Sixth Plan. The total expenditure to the tune of Rs. 560.12 lakhs and Rs. 125.69 lakhs was incurred on the State sector and local sector schemes respectively during the year 1978-79. The percentage of expenditure on State sector and local sector schemes with total expenditure comes to 83.8% and 16.2% respectively in the year 1977-78, whereas the same is worked out as 81.7% and 18.3%, for state and local sector schemes respectively during the year 1978-79.

....

(38)

An amount of Rs.734.29 lakhs and Rs.72.90 lakhs was spent on the state and local sector schemes respectively during the year under review. The percentage of expenditure on the state and local sector schemes with the total expenditure comes to 90.9% and 9.1% respectively in the year 1979.80.

Major headwise plan expenditure on state and local sector schemes and percentage of expenditure during the Annual Plan 1978-79 and 1979-80 is given in the table below:-

(Rs. in lakhs)

Sr. No.	Major Head	1978-79			1979-80		
		State sector	Local sector	Total	State sector	Local sector	Total
1	2	3	4	5	6	7	8
1.	Agriculture Programme (Crop Husbandry)	124.10 (18.1)	50.55 (7.4)	174.65 (25.5)	121.31 (15.0)	34.77 (4.4)	156.08 (19.4)
2.	Co-operation & community Development	2.77 (0.4)	1.93 (0.3)	4.70 (0.7)	0.84 (0.1)	-	0.84 (0.1)
3.	Irrigation & Power	116.86 (17.0)	-	116.86 (17.0)	144.58 (17.9)	-	144.58 (17.9)
4.	Industry & Mining	22.07 (3.2)	-	22.07 (3.2)	18.05 (2.2)	-	18.05 (2.2)
5.	Transport & Communication	47.47 (7.0)	29.69 (4.3)	77.16 (11.3)	54.34 (6.7)	18.92 (2.4)	73.26 (9.1)
6.	Social Services.	73.00 (10.7)	43.52 (6.3)	116.52 (17.0)	135.17 (16.7)	19.21 (2.4)	154.38 (19.1)
7.	Miscellaneous (EGS)	173.85 (25.3)	-	173.85 (25.3)	260.00 (32.2)	-	260.00 (32.2)
T o t a l :-		560.12 (81.7)	125.69 (18.3)	685.81 (100.0)	734.29 (90.9)	72.90 (9.1)	807.19 (100.0)

Note: The figures in the bracket indicate the percentage of total expenditure.

.....

The study of above table reveals that the highest percentage of expenditure i.e. 32.2% was booked on Miscellaneous (EGS) in the year 1979-80 where as 25.3% in the year 1978-79 was made on the same major head. It can also be seen that the major head Agriculture Programme (Crop husbandry) ranks second for incurring expenditure during the year under review 19.4% to the total plan expenditure. The major head of social services stands third in terms of percentage expenditure during the year under review, having 19.1% to the total expenditure. In agriculture programme major portion of expenditure was shared by the state sector having percentage as 15.4% in the year 1979\_80. The expenditure booked on the remaining major heads in the year 1979-80 was comparatively less i.e. 17.9% expenditure was incurred on irrigation and power, and 9.1%, 2.2% and 0.1% expenditure was registered on Transport and Communication, Industry and Mining & Co-operation and Community Development sub-heads respectively.

The headwise performance is discussed below:-

Agricultural Programme:

The amount of expenditure incurred during the year 1979-80 under Agriculture Programme comes to Rs.156.08 lakhs which is 19.4 per cent, of the total expenditure. The details of sub headwise expenditure incurred in the year 1979\_80 in this major are shown in the table below with the percentage (in brackets) to the total expenditure under agricultural programme.

Sr. No.	Sub-head of Development.	Expenditure in Rs. lakhs		
		1979-80		
		State Sector	Local Sector	Total
1	2	3	4	5
1.	Agricultural Production (crop husbandry)	1.70 (1.1)	0.47 (0.3)	2.17 (1.4)
2.	Minor Irrigation	55.42 (35.5)	32.49 (20.8)	87.91 (56.3)
3.	Soil Conservation	9.06 (5.8)	-	9.06 (5.8)
4.	Ayacut Development	7.64 (4.9)	-	7.64 (4.9)
5.	Animal Husbandry	2.84 (1.8)	0.72 (0.5)	3.56 (2.3)
6.	Dairy Development	6.06 (4.4)	-	6.06 (4.4)

1	2	3	4	5
7. Drought Prone Area Programme.	29.21 (18.7)	1.09 (0.7)	30.30 (19.4)	
8. Forest	1.37 (0.9)	-	1.37 (0.9)	
9. Fisheries	2.34 (1.5)	-	2.34 (1.5)	
10. Ware Housing & Marketing	0.50 (0.3)	-	0.50 (0.3)	
11. Integrated Rural Development Programme	4.37 (2.8)	-	4.37 (2.8)	
<b>T o t a l :-</b>	<b>121.31</b> <b>(77.7)</b>	<b>34.77</b> <b>(32.3)</b>	<b>156.08</b> <b>(100.0)</b>	

From the above table it is seen that during the year 1979-80 the highest percentage of expenditure of 56.3 was incurred on Minor Irrigation sub head followed by 19.4 and 5.8 per cent expenditure on Drought Prone Area Programme and Soil Conservation. This shows that highest priority is accorded to the Minor Irrigation sub-head. Under the agricultural programme major portion of expenditure was under the state sector having percentage of expenditure as 77.7 in the 1979.80 .

Agricultural Production:

Under this sub-head of development Rs. 2.17 lakhs were spent during the year 1979-80 which is 1.4% to the total expenditure incurred under the agricultural programme. In order to promote the agricultural production in the district the schemes such as Resettlement of agricultural labourers on forest land, distribution of oil seed and Rhizobium were implemented in the year 1979-80. The plant production measures were also adopted for protecting the plants from the hazards of shootfly, midgefly and rodent ratmanace. In this connection the subsidy was available to small and marginal farmers.

So far as physical achievements are concerned for the control of midgefly, shootfly, spraying on plants & crops was undertaken on 11369 hectares of area in the district.

....

During the year 1979-80 total 52 electric pumpsets were installed and 500 goats were distributed under the Integrated Rural Development Programme. Under the scheme 'Resettlement of agricultural labourers on the forest land' 220 families were covered. Under the Drought Prone Area Programme various activities were undertaken during the year under review out of these some are illustrated as below:

Sr.No.	I t e m	Unit	1979-80
1	2	3	4
1.	Rectification	Hect.	645
2.	Irrigation Tanks	No.	5
3.	Construction of new Wells	"	20
4.	Subsidy on inputs, farmers	"	36
5.	Demonstration plots	"	105
6.	Distribution of sheep & Goats	"	95
7.	First year plantation (Farn Forests).	Hect.	168
8.	Road side plantation	"	75

The object of DPAP has emphasis on creating job opportunities in the areas declared as drought prone through a programme designed to bring out Integrated Rural Development among at increase in the level of income of the targetted group rural populace especially small and marginal farmers and landless labourers.

Minor Irrigation:

The minor irrigation is considered as core programme to attain the Agri.Economic Development. It is felt that imbalance in the development, can be corrected to considerable extent by creating Minor Irrigation facilities which tend to produce more of agricultural production which is essential incoming the rural economy and setting right the economic conditions of the poor farmers. With this aspect in view, schemes of construction of Minor Irrigation tanks, bandharas, new wells and repairs to old wells and installation of pump sets were programmed and implemented during 1979-80. During the year under review an amount of Rs.87.91 lakhs was spent being 56.3% of the total expenditure under agriculture programme.

Nineteen subsidy cases were sanctioned in the year 1979-80 for construction of new wells and 7 subsidy cases were sanctioned for installation of pumping sets. 22 Irrigation tanks were constructed creating additional Irrigation potential of 682 hectares during the year under review. Three percolation tanks were constructed with the irrigation potential of 118 hectares in the same year.

Soil Conservation:

Soil conservation measures aim at reducing the rate and quantity of rain-fall run-off to check the soil erosion. Measures to retain the moisture in the soils and prevent soil erosion are of vital importance in a district where the rainy season is small and rain-fall is erratic. The object of soil conservation measures is to maximise infiltration of rain water and arrest soil erosion. Moisture is the ultimate factor for crop growth and good yield. The measures include contour bunding, nala bunding works which help recharging underground water. An expenditure of Rs.9.06 lakhs was incurred being 5.8% of the total expenditure on Agricultural programme in the year 1979-80. An area of 10306 hectares was rectified under the bunding programme. The new bunding works were undertaken in 10743 hectares and 453 nallas were bunded during the year under review.

Ayacut Development:

Ayacut development programme aims at maximum utilisation of irrigation potential created from irrigation projects and also from lift irrigation schemes. Levelling of the field and construction of field channels form part of the programme for reaching water to all the fields in the command of the project. During the year under review the Ayacut development works were under taken in the command of irrigation lands and the expenditure to the tune of Rs.7.64 lakhs was booked covering an area of 1145 hectares.

Animal Husbandry:

Agriculture and livestock are interdependent economic activities. Livestock development helps sustain and improve the farmers economy. The programme of Animal husbandry was implemented with the object of suppling Food requirement. The expenditure of Rs.3.56 lakhs was incurred during the year 1979-80 being 2.3% of the total expenditure incurred on the agricultural programme.

300 sheep were distributed to the weaker sections in the year 1979-80. During the year under review 4 shibirs were arranged by the department. Under the programme of fodder development, 75000 plants were distributed. Milch cows numbering 175 were distributed to the weaker sections during the year under review.

Dairy Development:

Dairy Development is also one of means to provide supplementary occupation to rural area. During the year 1979.80 an expenditure of Rs.6.86 lakhs was booked under this sub-head being 4.4% of the total expenditure incurred under the agricultural programme.

Draught Prone Area Programme:

Under the Drought Prone Area Programme, activities of soil conservation, Minor irrigation, Ground water development, Dry land farming, Animal husbandry and Forest works more undertaken This is an area development programme but also include the beneficiary componant also. The programme aims to develop the area prone to drought so that the developmental activities help the farmers to produce more and increase the personal earnings. The programme has been implemented in watersheds selected for this purpose. An amount of Rs.30.30 lakhs was spent during the year under review.

Forest

In Beed district, area under forest is about 22000 hectares, which is about 2% of the total area of the district. Taking into consideration the importance of forest for conserving soil and to maintain ecological balance, the afforestation needs to be paid greater attention. Under this sub-head an expenditure of Rs.1.37 lakhs was incurred during the year 1979-80 which is 0.9 per cent to the total expenditure on Agricultural programme. The farm forestry programme was undertaken in 114 hectares in the year 1979-80 where as mixed plantation on waste land was taken up in 114 hectares during the same year.

Fisheries:

Beed district has considerable potential for development of inland fisheries. Water spread area suitable for pisciculture is about 18000 hectares. The programme for fisheries development aims to supplement food required for human consumption. The expenditure on this programme was Rs.234 lakhs during the year 1979-80.

..being 1.5 per cent, to the total expenditure on the agriculture on the agricultural programme. During the year 1979-80 Fingerlings stocked and fish netted was to the tune of 309 lakhs and 385 M. ts. respectively. Similarly the Training to Fisher youth was also provided to 10 candidates during the year 1979-80. 62 kgs. the Nylon twine was given on subsidy as assistance to the fisherman during the period under review.

Co. operation and Community Development:

The programme is divided into two sub-heads i.e. co. operation and Community Development Programme. The expenditure on the sub-head of development 'Co. operation' was incurred to the tune of Rs. 0.84 lakh during the year 1979-80 which worked out to 0.1% to the total plan expenditure. Where as no expenditure was booked under the sub-head 'Community Development Programme' during the year under review. The co. operative movement in the district is fairly developed. The credit sector shows good progress though the non-credit sector is not well developed when compared to other districts. To provide the credit facilities to the Agriculturists the activities of the Co. operative societies has been intensified during the year 1979-80 and short term and medium term loans to the tune of Rs. 332.47 lakhs and Rs. 62.04 lakhs were distributed for undertaking seasonal agricultural operations. The percentage of recovery during the year 1979-80 was 19.3% where as the same was 14.4% in the year 1978-79.

Irrigation and Power:

During the year 1979-80 an amount of Rs. 144.58 lakhs was spent on this major head 'Irrigation and Power' being 17.9% to the total plan expenditure in the district. The work of five medium irrigation projects i.e. Kundlika, Saraswati, Borña, Belpara and Waghebabhulgaon were in progress during the year 1979-80. In addition to this 38 villages were electrified and 142 pumpsets were installed on wells in the district during the year 1979-80 under rural electrification programme. Under normal development 648 pumpsets were installed during the same period. Five harijan Bastis were also electrified in the year 1979-80.

Industry and Mining:

Beed district is an industrially backward district. There is no any large scale Industry. The expenditure incurred on this programme was Rs.18.05 lakhs which works out to 2.2% to the total plan expenditure during the year 1979-80. An amount of Rs.15.81 lakhs was utilised mainly for providing seed money assistance to the 344 educated unemployed to start their own industries. The Financial Assistance under S.S.I.Units was provided to 297 persons in 1979-80. Seven societies of block level village artisans were assisted by the department during the year by providing share capital.

Transport and Communication:

The expenditure incurred on the programme during 1979-80 was Rs.73.26 lakhs being 9.1 per cent. Under this programme the roads of 203 kms.were constructed under crash programme of rural roads and construction of new roads during the year 1979-80. Total 430 C.D.works were also provided in the year 1979-80. One culvert and 4 bridges were also constructed.

Social Services:

This major head of development of social services includes in all ten sub-heads. The expenditure incurred on this Major head of development was Rs.154.38 lakhs forming 19.1 per cent to the total plan expenditure in the district. The details of the sub-headwise expenditure incurred during the year 1979-80 is shown below with the percentage in brackets to the total expenditure under social services.

Sub-headwise expenditure incurred under  
Major Head "Social Services"during the year 1979-80

Sr. No.	Sub-head of Development.	Expenditure(Rs.in lakhs)1979-80		
		State Sector	Local sector	Total
1	2	3	4	5
1.	General education	10.24	9.26	19.50
	1(a)Art & culture	(6.6)	(6.0)	(12.6)
2.	Technical education	0.04	-	0.04
		(0.02)	-	(0.02)
3.	Medical & Public Health	1.94	0.01	1.95
		(1.3)	-	(1.3)

1	2	3	4	5
4. Water supply		61.75 (40.0)	5.42 (3.5)	67.17 (43.5)
5. Nutrition programme		-	2.33 (1.5)	2.33 (1.5)
6. Housing		31.89 (20.7)	-	31.89 (20.7)
7. Urban Development		18.85 (12.2)	-	18.85 (12.2)
8. Welfare of Backward Class		2.23 (1.5)	2.19 (1.4)	4.42 (2.9)
9. Social Welfare		-	-	-
10. Labour & Labour welfare		8.23 (5.3)	-	8.23 (5.3)
<b>T o t a l :</b>		<b>135.17</b> <b>(87.6)</b>	<b>19.21</b> <b>(12.4)</b>	<b>154.38</b> <b>(100.0)</b>

It can be seen from the above table that maximum expenditure of Rs.67.17 lakh was incurred on water supply forming 43.5% to the total expenditure under Social Services. This shows that the highest priority was given to the water supply during the year 1979-80. The next sub-head having largest expenditure is housing. The sub sector General education and Urban Development stand third. The expenditure on remaining sub-heads was below 5.3 per cent to the total expenditure under Social Services in the year under review.

General Education & Technical Education:

All the schemes under General Education were implemented by the local sector with the exception of Technical school which was implemented under the State Sector. The total expenditure of Rs.19.50 lakhs was booked under this sub-head being 12.6 per cent of the total expenditure on the Social Services. No expenditure was booked under the sub-head Technical education in the year 1979-80.

Medical and Public Health:

Under this sub-head of development the expenditure incurred was Rs.1.95 lakhs out of which Rs.1.94 lakhs and Rs.0.01 lakh was shared by state and local sector respectively. The construction work of hostel for nurses under training was completed in the year 1979-80. During the year 1979-80 two primary health centres were upgraded into rural hospitals.

Water Supply & Drainage:

In the year 1979-80 under this sub-head of development the schemes of piped water supply in rural areas were implemented by the state sector and local sector and the expenditure of Rs.61.75 lakhs and Rs.5.42 lakhs was incurred being 40.0% and 3.5% respectively to the total expenditure on Social Services. The water supply schemes were given priority and large amount was provided.

During the year 1979-80 ten rural piped water supply schemes were started. Similarly 71 drinking water wells were constructed under this programme. During the year 1979-80 construction of 137 bore wells was undertaken by G.S.D.A. The programme of deepening of wells was also implemented during the year under review.

Nutrition programme:

This programme is being implemented in five blocks in the district. The expenditure incurred on this scheme was Rs.2.33 lakh forming 1.5 per cent of total expenditure on Social Services.

Housing:

The programme of Rural Housing is being implemented since Third Plan period. The schemes for construction of huts and extension of <sup>Gaothan</sup> ~~villages~~ are amalgamated now. An expenditure of Rs.31.89 lakhs was incurred on this sub-head in the year under review which forms 20.7% of the total expenditure on Social Services. Under the extension of village gaothan and provision of housesites, 8 villages with area of 9.2 hectares were covered in the year under review.

Urban Development:

Under this sub-head the expenditure incurred was Rs.18.85 lakhs forming 12.2 per cent to the expenditure on Social Services. The loans and advance was provided to municipal councils in the district for implementation of development plan of municipal councils in the year under review.

Welfare of Backward Classes:

The schemes of Welfare of Backward Classes, have been implemented by the state and local sectors and an expenditure of Rs.2.23 lakh and Rs.2.19 lakh was incurred respectively.

(48)

During the year 1979-80 the financial assistance was given to one B.C. Industrial Society. Four Ashram Shalas were started during the year under review. The improvement of 2 harijan basties was made in this year.

Social Welfare:

No expenditure was incurred under this sub-head during the year under review.

Labour and Labour Welfare:

Beed district has one established Industrial Training Institute with a big campus. In addition one mini I.T.I. has been sanctioned by Govt. in 1977-78 and has been started at Parli Vaijnath. The training was imparted in the institute for rural artisans. The expenditure incurred on this sub-head of development was Rs. 8.23 lakhs forming 5.3% to the expenditure of Social Services.

Miscellaneous Programme:

This major head of development include information and publicity alongwith Rural Broadcasting and Employment Guarantee Scheme. No expenditure under the first two sub-heads was incurred during the year under review. While under EGS an expenditure of Rs. 260.00 lakhs was incurred forming 32.2% to the total expenditure under plan schemes in the district. Under Employment Guarantee Scheme, works were provided to all the able bodied un-skilled persons from rural areas whenever such demand was felt. The works like nala bunding, percolation tanks, minor irrigation works, afforestation and construction of link roads were taken up.
