CHAPTER - I
INTRODUCTION

1.1 LOCATION :

The ~~Satara district~~ is situated partly in the Bhima river basin and partly in the Krishna river basin. The tahsils Khandala, Phaltan and Man are situated in the Bhima river basin, while the rest of the tahsils are situated in the ~~Upper~~ Upper Krishna basin. The district has an area of 10,492 Sq. Kms.

The District lies between $17^{\circ} 5'$ and $18^{\circ} 11'$ north latitude and $73^{\circ} 33'$ and $74^{\circ} 54'$ east longitude.

1.2 BOUNDARIES :

The district is situated on the west of Deccan plateau and is surrounded by the Pune district on the north, by the district of Ratnagiri and ~~Kolaba~~ ^{Kolaba} on the west.

1.3 TOPOGRAPHY :

1) HILLS : There are two main systems of hills in the Satara district. The Sahyadri range and its off-shoots, and the Mahadeo range and its off-shoots. The main range of Sahyadri with a length of about 96 kilometres from north to south forms the western boundary of this district. The Mahadeo range starts about 16 Km. north of Mahabaleshwar and stretches east and south-east across the whole breadth of the district. From this main range of Mahadeo hills three spurs stretch to the south. Hills in the district are very low, barren and ragged except near Mahabaleshwar and Koyana valley. The top ^{of} Mahabaleshwar the highest point in the district, is about 1,436 metres above mean sea level.

- (1) -

/_ the solapur district on the east, by the Sangli district on the South and by

where natural or artificial terracing has accumulated soil with vegetable matter drained by rain, waters. Rich black soil is found in the low lands of the valleys of Krishna, Venna, Kudali, Koyana and Kote rivers in Wai, Jacli and Patan tahsils.

The central portion of the district consists of medium to deep black alluvial soils. Krishna valley soils are said to be one of the richest in the Deccan and the portion which lies in Satara and Karad tahsils is reported as the richest in the Krishna valley. For the most part it is the finest black alluvial soil highly retentive of moisture and very fertile.

The soil in Khandala and Phaltan tahsils is poor and stony in the vicinity of the hills, but there are good black soils along the Nira and its tributary streams. In the eastern part of Khandala tahsils, the soil is poor, shallow and whitish but is capable of growing wheat if adequate water is available.

Towards the east of the Krishna valley the soil is poor with the exception of wide stretches of good black soil along the numerous streams and rivers in Koregaon tahsil.

In the Khatav tahsil, soils are of intermediate depth and more widely spreading than that of Man tahsil but not as rich as in Koregaon tahsil. In Man tahsil, the soils are extremely poor and shallow. Good soil is found only in narrow strips along the streams.

1.4 RAINFALL IN GENERAL AND SCARCITY CONDITIONS :

1) RAINFALL :- The rain starts by the middle of June and lasts till the end of September in the district. The rainfall is not uniform all over the district. It is very heavy in the western ^{regio} and it goes on receding towards eastern part. The extreme West part gets over 5000 mm. rainfall, while the eastern part of the ^{Sahyad} gets the rainfall between 1,200 mm. to 2,000 mm. The north

The normal rainfall recorded at Mahabaleshwar centre is 6, 182mm while at Pachagani it is 1,865 mm. The central Zone gets rainfall between 600 mm. to 1, 200 mm. The district head quarter Satara has normal rainfall of 1,025mm. At other centres it is : Koregaon 707 mm., Khandala 504 mm., Wai 710 mm and Karad 713 mm. In the eastern zone average rainfall is below 600 mm. annually. It is as follows : Phalt

473 mm., Lohiwadi 462 mm., and Vaduj 512 mm.

ii) SCARCITY CONDITIONS : - The eastern part of the district is prone to scarcity conditions. The Fact Finding Committee appointed by the Government of Maharashtra under the Chairmanship of Shri S. R. Sukhatankar has opined that the tahsils of Khandala, Phaltan, Man, Khatav and Koregaon are the drought prone areas in the district. During the year 1979-80 no scarcity conditions prevailed in the district except Man tahsil where the No. of villages affected were 34.

iii) MINERALS :- Except for building stone, lime stone and little iron deposits in about 20 villages of Jacli tahsil and 30 villages in Patan tahsil, deposits of important minerals are not known to have occurred in any part of the district. Building stone sand of good quality and lime stone is found to be available all over the district. Good clay for bricks and tiles is found on the river banks.

iv) FORESTS : An area of about 1544 Sq. Kilo meters or 14.7 percent of the total geographical area of the district is under forests. It is scattered over the entire district. These forests belong to three groups :- (i) the evergreen Sahyadri forests (ii) the plantation on the slopes of the off-shoots of Sahyadri hills that run east and (iii) bush sprinkled hills to the east of Krishna.

The evergreen forests of Sahyadri range form a belt along the west of the district 10 to 22 Kilometres broad. These forests

exten without a break through the whole length of the district. Th

contains many trees valuable both as timber and firewood. The chief of these are Jambool, Anjan, Ain, Umbar, Kenja, Hirda, Phanas and Nara. Teak mixed with bush-wood is found in the second group of forest lands, i. e. ranges which branch east from the Sahyadris. These forests are much broken by patches of cultivated land. The forests of the third group are only sprinkled with bush and are very much scattered.

v) AREA :- The district has an area of 10,492.6 Sq. kilometers out of which 10,109.6 Sq. kilometers is rural and 382.4 kilometers is urban area. The district ranks 16th in area among the 26 districts of the Maharashtra State.

vi) DEMOGRAPHY :- The Satara district ranks 13th in population among the 26 districts of the Maharashtra State, so far as population of 1971 census is concerned.

The following table gives tahasilwise decadal variation for the last decade.

Sr. No.	DISTRICT/ TAHSIL	POPULATION		Decadal percentage variation

From the above table it will be seen that the decadal variation (1961-71) in Satara district is less than the State variation which is 27.45.

1.5 SPECIAL FEATURES :-

i) SUGAR FACTORIES :- At present six sugar factories, two each in Karad and Phaltan and one each in Patan and Wai tahsils are located in the district. The Krishna Sahkari Sugar Factory located at Rethare Bk. in Karad tahsil is one of the biggest sugar factories in Maharashtra.

ii) INDUSTRIES :- Though there is no concentration of industries in the district some important factories apart from Sugar factories are Cgale Glass works at Cgalewadi near Karad. Cooper Cil Engines at Satara Road in Koregaon tahsil and some cement product industries at Satara and Karad are located in the district. The Maharashtra Scooters Ltd. located at Satara has started its production during the year 1976-77.

Also there is a private seed production establishment viz. Nimbakar seeds which produces various type of hybrid and high yielding seed and distributes the same all over the State.

iii) SMALL SAVINGS :- The district has a distinction of surpassing the Small Savings target by nearly 53% during the year 1976-80. Total amount of Rs. 176.13 lakh was collected from various areas of the district as against the target of Rs. 132.00 lakh for the said year.

iv) FORMATION OF DISTRICT INDUSTRIES CENTRE :

Kanher dam is 1955 mtrs. in length and maximum height 1 50 mtrs. Earth work and Masonary work is in progress.

vi) DROUGHT PRONE AREA PROGRAMME :

Out of total 11 tahsils in the District five are covered under drought prone programme. These tahsils are Tan, Khatav, Khandla and Phaltan and Koregaon. Of these, first four are accepted by the Govt. of India for the central assistance. Nearly 31 % of District population (around 5.15 lakh) is covered by the D. P. A. F. area.

There are 12 watersheds in the five D. P. A. F. Tahsils covering 129 villages. The achievements under the D. P. A. F. programmes are discussed in Chapter

vii) SMALL ENTERPRISE DEVELOPMENT AGENCY (S.E.D.A.) :

Since the inception of S.E.D.A. in Satara District in the year 1976, it is made applicable to all villages from Phaltan, Satara

Jacli, Mahabaleshwar and Wai tahsils. Thereafter 19 villages from Khandala tahasil were added in the operational area of this project.

The following items of development are included in the project.

- i) Agril. Development Programme.

The main programme of this authority is to implement schemes on Agril. and Animal Husbandry for small and marginal farmers.

CHAPTER - II
EXPLANATORY NOTE

2.1 The data on different important sectors which have dominant effects on the economy are presented in this abstract for the year 1978-80. In case the data for the relevant year is not available the data for the latest available years are presented. In most of the cases, the reference period of the data is the financial year. The data on Agriculture, however, relates to the agricultural year, whereas the data on 'Co-operation' is for the Co-operative year (1st July to 31st June). The data on other important items like rainfall, temperature, civil and criminal cases, Vital statistics, is for the calendar year. The information as far as possible is presented tahsilwise for inter tahsil comparison.

DISTRICT AT A GLANCE :

2.2 Certain essential data in important spheres, such as,

- i). Population,
- ii. agriculture,
- iii. animal husbandry,
- iv. industries,
- v. Co-operation,
- vi. medical and public health,
- vii. education,
- viii. transport and communication,
- ix. plan expenditure etc..

pertaining to the district is presented along with the corresponding figures for the State for the comparison purpose.

DISTRICT STATISTICAL ABSTRACT :

2.3 The data incorporated in the District Statistical Abstract have been presented in suitable tables, classified in appropriate groups. The concepts adopted in preparation of tables are summarised in the following paragraphs. The limitations of data are cited wherever necessary.

AREA AND POPULATION

2.4 The data of 1971 census mainly on population, area, houses and livelihood Occupation, rural urban break-up etc. are presented in the first seven tables for all tahsils in the district. Data on population per square kilometre, decadal variations during 1951-61 and 1961-71, classification of villages and towns according to population ranges, number of workers and non-workers, population of scheduled castes and schedule tribes, distribution of population according to age group and religion are also given in these tables.

2.5 (a) URBAN AREA :

The following places have been treated as 'urban' areas (towns) -

1. every place having a municipality or cantonment board irrespective of its population,
2. every other place which satisfies following three conditions-
 - i. a population of at least 5,000;
 - ii. at least three-fourth of its male working population engaged in non-agricultural pursuits and
 - iii. a density of population of at least 400 persons per square Km.
3. Any other place not falling under above two categories which possesses certain district characteristics to qualify to its being treated as urban such as its being a project area or a developing township.

(b) RURAL AREA :- These areas which do not satisfy the criteria prescribed for recognising urban area are called 'Rural Area'.

A census village in Maharashtra has always been a revenue village. A revenue village has well-defined boundaries, a map and a separate set of land records irrespective of whether that defined area has any population or not.

~~-----~~

(c) WORKER : A worker is defined as 'a person whose main activity is participation in any economically productive work through his physical or mental activity. Work involves not only actual work but affective supervision and direction of work.

A public or social worker engaged actively in public or work or political worker actively engaged in furthering the political aims of a party was also regarded as a 'Worker'. In case of perennial work, such as, cultivation, livestock, plantation, some type of household industries, a person was treated as a 'worker' by ascertaining whether he had participated any time during the last one year, even if, he was not economically active in the week prior to enumeration. In case of regular work in trade, profession, service or business, a person was considered as 'worker' if he had participated in such regular work on any one of the days during the week preceding the date of enumeration and that work has been returned as his main activity.

(d) NON-WORKER : Non-workers are those who are not mainly engaged in any economically productive work.

A person primarily engaged in household duties or those who were students and help in the family economic activity, but not on full time scale were treated as 'non-worker' in respect of their main activity.

C L I M A T E :

2.6 The rainfall and temperature have pronounced effects on climate. The rainfall data presented in table No. 8 gives normal rainfall, monthly rainfall and number of rainy days during the calendar year 1979 for the selected eleven centres. Normal rainfall figures are worked out on the basis of actual rainfall for the periods ranging from a minimum of five years and a maximum of 80 years. A day was treated as "rainy day" if during the twenty four hours the rain gauge recorded a minimum of 0.5 mm. of rainfall. The table No.

9 gives actual maximum and minimum temperatures recorded during each of the month of the calendar year 1979 in respect of Mahabaleshwar a centre in Satara district.

AGRICULTURE :

2.7 The tahsilwise statistics on important parts of agriculture, such as

- i. land utilisation,
- ii. area under different crops,
- iii. yield per hectare and ceturn of principal crops,
- iv. irrigated area under different crops,
- v. scurcewise irrigated area, and
- vi. data on irrigation etc.

are given in tables 10 to 14.

2.8 The basic definitions adopted are given below:-

- a) Geographical area : It is, according to village papers calculated from village returns prepared for revenue purposes and as such it may be different from that according to Surveyor General.
- b) Forests :- It includes all actually forested areas or lands classed or administered as 'forests' under any legal enactment dealing with forests, whether State owned or private. If any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated land or uncultivated land.
- c) Land put to non-agricultural uses : It stands for all lands occupied by buildings, roads and railways or under rivers, canals etc., and other land put to uses other than agricultural.
- d) Barren and unculturable land : It covers land which cannot be brought under cultivation unless at a high cost, whether in isolated blocks or uncultivated holdings. Land like mountains, deserts etc. is classified under this category.
- e) Barren and unculturable land : It covers all grazing lands. Village common grazing lands and grazing lands within forest area are included under this head.
- f) Culturable waste land : This may be either 'fallow' or 'covered with shrubs and jungle' which are not put to any use

e) Permanent pastures and other grazing lands :

It covers all grazing lands. Village common grazing lands and grazing lands within forest area are included under this head.

f) CULTURABLE WASTE LAND : These may be either 'fallow' or 'covered with shrubs and jungles' which are not put to any use and include all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and the last five years or more in succession.

g) Miscellaneous tree crops and groves not included in the net area sown :

This category includes all cultivable land which is not included in Net area sown but put to some agricultural use.

h) Current fallow lands : These are lands which are kept fallow during the current year. If any seedling area is not cropped again in the same year, it is also treated as 'current fallow'.

i) Other fallows : All lands which were taken up for cultivation but are temporarily out of cultivation for a period not less than one year and not more than 5 years are classed as 'other fallow'.

j) Net area sown : This consists of net area sown with crops and orchards, area sown more than once being counted only once.

k) Gross cropped area : Total of area under all crops including area under crops sown more than once is taken as 'Gross cropped area'.

(l) " Cultivable area is a sum of areas under-

(a) Miscellaneous tree crops and groves not included in the net area sown,

(b) current fallows,

(c) other fallows,

(d) culturable waste land, and

(e) net area sown.

IRRIGATION STATISTICS :

2.9

Important irrigation statistics regarding

- i. number of irrigation wells,
 - ii. activities of ground water survey and development Agency,
 - iii. Minor irrigation works,
 - iv. major and medium irrigation projects, and
 - v. area irrigated under major and medium projects,
- are given in table No. 15, 16, 17, and 18.

AN ANALYTICAL REVIEW OF SECTORIAL TRENDS.

3.1 Data on various fields of developments have been presented in Part II of this issue under the heading District Statistical Abstract. An attempt has been made in this Chapter to present a comparative picture of tahasils in the district during the years 1960-61, 1970-71, 1976-77, 1977-78 and 1978-79. The indicators of different developmental Sectors are worked out to show the position of each tahasil in the district during the above periods.

3.2 Agriculture :- The development in the field of agriculture can be assessed from six main indicators. They are (1) Percentage of gross area sown to net area sown. (2) Percentage distribution of gross area under important crops to total gross cropped area. (3) Productivity of important crops. (4) Percentage of net area irrigated to net area sown. (5) Percentage of area under different irrigated crops to gross irrigated area. (6) Sourcewise net irrigated area.

Figures for 1978-79 are provisional and are under clarification.

3.6 The production of any crop depends on various factors like use of improved seeds, irrigation facilities, use of fertilisers and much on timely rains. As much the yield rates show fluctuation from year to year. It can be said that the yield rates show downward fluctuation in 1977-78 while in 1978-79 again the yield rates show increase over 1977-78.

3.7 Tahasilwise percentages of net irrigated area to net area sown are given below :

The tahasils Wai, Khandala, Phaltan, Karad and Mahabaleshwar have good irrigation facilities while the tahasils Satara, Kcregaon, Man, Khatav, and Patan have less than 15 % net irrigated area of net area sown.

3.8 The area under different irrigated crops is compared with the gross irrigated area in the following table.

Nearly two-third of the gross irrigated area is used for growing cereals - mainly Jowar (Rabi), Rice and Wheat. The use of irrigated land for sugarcane is showing increasing trend.

3.9 The distribution of irrigated area by different sources is as follows.

T A B L E No. 6

Sourcewise net area irrigated in the District Satara.

Sr. No.	Source of Irrigation	Net area irrigated (in hectares) during				
		1960-61	1970-71	1975-76	1976-77	1977-78

	Total	79581	82508	84071	90045	93167

In most of the tahasils excepting Phaltan the irrigation is mainly rely on wells by which nearly 50% of net irrigated area is covered. In Manmad Khatav tahasils about 96% and 75% of the net irrigated area is covered by well irrigation. The source of Govt. canal irrigation is mainly available in Phaltan tahasil.

3.10 CO-OPERATION

The co-operative Societies play an important role in the field of agricultural development by extending credit facilities on an extensive scale. The progress of facilities given by Agricultural credit societies during the years 1960-61, 1970-71, 1977-78, 1978-79 and 1979-80 are given in the following table.

T A B L E No. 7

4.	Loan Outstanding	204.29	725.78	801.71	775.85	8,32.82

3.11 It will be seen from the above data that although there is no much change in the number of agricultural credit Societies functioning in the district during last 18 years, there has been considerable increase in their membership. However, it is discouraging to note that the amount of outstanding loan is very high and shows increase in 1979-80 over that in 1978-79.

WAGE RATES

3.12 The data on agricultural wage rates in rural areas are collected in three rural centres in Satara District since July 1963. The centres are Umbraj from Karad tahasil, Koregaon from Koregaon tahasil and Limb from Satara tahasil.

The average wage rate during the year 1979 for male field labour at Umbraj was found to be Rs. 5.75 as against Rs. 6.00 in 1978. While the same at Koregaon and Limb were Rs. 3.00 and Rs. 5.00 respectively. The average Wage rates for females at Umbraj, Koregaon and Limb during 1979 were Rs. 4.75, 2.00, 3.00 respectively

3.13 LIVESTOCK :

Itemwise consumption of electricity for different purposes is given in table No. 33. The consumption of electricity is significantly increased from 51 Million KWH in 1970-71 to 79 Million KWH in 1979-80. Per capita consumption is increased almost ten times during last 20 years.

3.16 Enrolment in the Employment Exchange and Vacancies notified.

Following table gives the statistical data available in connection with employment.

5.	Candidates on Live Register at the end of the year.	2,398	5,774	20,965	23,442

3.17 Enrolment in 1979-80 is 124 percent higher than that in 1960-61. The percentage of placement to total registration is decreased considerably from 18 percent in 1960-61 to 4 percent in 1979-80. This is due to the establishment of Divisional Selection Board through which most of the vacancies are filled in. The comparative figures of last three years of the number on live register reflect the magnitude of the unemployment problem. This does not also include the unemployed persons seeking manual work and those who have not registered their names with the employment exchange.

3.18 Medical facilities: The following table gives the data on medical facilities available in the district.

The ratio of a doctor to population is one of the indicators of the progress of medical facilities. The ratio was one doctor per 24,237 population in 1961, which is now one doctor per 16,868 population. Number of private doctors is not considered while calculating the said ratio.

3.19 Medical facilities have increased substantially since 1961. This has enabled to treat large number of indoor and outdoor patients at public medical institutions.

3.20 EDUCATION : The educational facilities have also increased remarkably during last 10 to 15 years. At present almost all the villages have been provided with primary school facilities. The following table given the number of institutions, No. of pupils and no. of teachers.

3.21 From the above data, it would be ^{seen} that as against the 2,18,102 students in primary schools there were 23,112 students in Secondary schools (i. e. 10.5 %) in 1961 while in 1979-80. There were 1,09,236 students in Secondary schools as against 3,37,072 in Primary schools (i. e. 32.40 %) This shows that there has been considerable decline in drop cut rate of students from primary to Secondary education. Similar percentages for enrclment of students in Secondary to higher institutions were 7.7 % in 1961 and 16.74 % in 1979-80. The substantial increase in these rates can be attributed mainly to a good network of higher educational facilities established even at tahasil places and big villages. This can also be vividly seen from the following ratios.

3.24 ROADS :- The Pune, Miraj, Kolhapur broadgauge railway route goes through Satara District with the total length of 124 Kms. At the end of the year 1978-79 & 1979-80 total length of all types of roads excluding the municipal roads was 7,197 Kms. & 7,164 Kms respectively. The road length at the end of the year 1960-61 was 2,481 Kms. Thus the road length per 100 Sq. Kms. of area is increased from 24 Kms. in 1960-61 to 68 Kms. in 1979-80.

Following table gives the total road length in the district for B and C. and Zilla Parishad.

3.26

Since November 1962 the prices of important commodities are collected by District Statistical organisations at each District Headquarter on every Friday. As the prices are collected for selected commodities from selected shops they may not represent the district position but the data may still prove useful as a broad indicator of the trend in changes in retail prices over the period of time in the district. The following table indicates the average prices of some important commodities collected at Satara town for the year 1962-63, 1970-71, 1977, 1978 and 1979.

CHAPTER IV

INTRODUCTION

4.1 Since the commencement of the Fifth Five Year Plan i. e. from 1974-75 the idea of Planning from below has started operating and the formulation of the District Plan was started. The new approach conceive that the formation of district plan is the only means for ensuring efficient use of local potential and resources as also for providing a firm basis for planning at the State level. From 1974-75 district planning bodies were constituted for each district and the district was adopted as a 'unit' of Planning. The object of the district plan is to maximise the benefits of the Plan expenditure by bringing in past experience, knowledge and local needs.

4.2 The District Planning body which is called as the District Planning and Development Council is headed by the 'Palak Mantri' of the District as Chairman. Other Ministers of the District and the Divisional Commissioner are Vice Chairman and the Collector as the member Secretary. The members of the Council include all M. P.s., M.L.As., M.C.s. President, A Zilla Parishad, Mayor, one President each from 'A', 'B' & 'C' class municipal Councils, Chairman of District Central Co-operative Bank, Chief Executive Officer, Zilla Parishad, Director, Land Development Bank, nine non-official members etc. The Council generally meets twice a year for formulating and coordinating district development Plans.

4.3 To assist the council in its day to day Planning & Development activities, an Executive Committee is constituted at district level. The Chairman and Vice Chairman of the committee are the same as that of the council. The Member Secretary, is, however, the District Planning Officer. The Committee consists of some selected members from the Council. The Committee meets regularly for the Plan performance and to suggest ways and means for effective implementation of the plan schemes.

In this Chapter a brief review of the Annual Plans 1978-79 and 1979-80 is taken.

The following table gives the consolidated information about the budget and expenditure figures under State Plan and Centrally sponsored schemes for Fifth Plan period and for the year 1978-79 and 1979-80.

From the above table, it will be seen that the total expenditure of Rs. 1915.48 lakhs was incurred on State Plan Schemes during the Fifth Plan period as against the budget provision of Rs. 2290.11 lakhs.

The performance of the state Plan and centrally sponsored schemes during the years 1978-79 and 1979-80 is reviewed separately in the following paragraphs :-

1. STATE PLAN SCHEMES

The following table shows the budget and expenditure figures under different major heads for the reference period under review

B= Budget.

E= Expenditure

In the above table, the bracketted figures show the extent of utilisation of the budget provisions under each major head of development. A comparison of expenditure incurred under different major heads during two annual plan periods 1978-79, 1979-80 reveals that even though there is an overall increase in the expenditure during the year 1979-80, there is decrease in expenditure under Irrigation & Power, transport & Communication & Social services. However the decreases are not much except under Social Services which is to the extent of Rs. 36.20 lakhs.

There is also significant increase in the expenditure during the year 1979-80 ^{Agril. programme} on as compared to that in the year 1978-79.

The following table gives the percentage distribution of total expenditure incurred on different major heads of development.

T A B L E No. 3

6.	Social Services	28.57	21.72
7.	Miscellaneous	13.73	23.03

There is no significant variation in the percentage distribution of expenditure incurred during the reference periods under review except on Miscellaneous and Social Services. During 1979-80 in total expenditure, the share of the major head Agril. Programme is maximum i. e. a about 27 % percent followed by 23 % of Miscellaneous.
