No. RES/P. 111 of 1953.

Poona-1, 8th June 1953.

From

DR. T. G. SHIRNAME, B.Ag. (Bom.), Ph.D. (Wales), F.S.S. (Lond.),
F.R.Econ.S. (Lond.),
Director of Agriculture, Bombay State, Poona.

To

THE SECRETARY TO GOVERNMENT,
Agriculture and Forests Department,
Bombay.

Sir,

I have the honour to submit herewith the Annual Season and Crop Report of the Bombay State for the year ending the 31st July 1951.

Yours faithfully,

T. G. SHIRNAME,
Director of Agriculture.

INTRODUCTION

The Annual Season and Crop Report of the Bombay State deals with agricultural statistics of the State and contains a detailed survey of seasonal conditions, rainfall, land utilisation, area and crops irrigated, area and outturn of crops, agricultural wages and prices, livestock situation, etc. In spite of the broad uniformity of the purpose which such reports from different states are expected to serve, it was found that both as regards the nature of the information incorporated and the manner of its presentation, the reports of different States presented considerable differences. With a view to secure greater uniformity in the presentation of agricultural statistics of different States of the Indian Union and in order to facilitate extracting information on features common to many States, Ministry of Food and Agriculture, Government of India, New Delhi, have for the first time standardised the form of the report and the present report has been modelled on this standard. This being the first year of this standardised report, comparative figures for the previous year are lacking in the case of some items. The present report, however, is a more comprehensive document than the previous ones and contains more detailed statistics on a large number of items not included till now. This has made this report a more useful work of reference and to that extent has enhanced its utility.

T. G. SHIRNAME,
Director of Agriculture, Bombay State, Poona.

SEASON AND CROP REPORT OF THE STATE OF BOMBAY FOR THE YEAR 1950-51.

CHAPTER I—SEASON

1. The agricultural season of 1950-51 was not satisfactory over large part of the State. The pre-monsoon showers were confined to the southern parts of the State, comprising most of the Karnatak, and the districts of Ratnagiri and North Kanara. The monsoon commenced late in June when rains in adequate quantities were received in the Konkan, the Karnatak and the eastern parts of the Deccan. These rains facilitated sowing of *kharif* crops. In Gujarat, light showers were received in June and were useful for preparatory tillage, and in some places sowing of *kharif* crops was also undertaken. Heavy rainfall was experienced in the month of July and in the first week of August over the greater part of the State. This heavy rainfall delayed sowing operations in some parts of the State, and crops in low-lying areas suffered some damage. There was practically no rain in Gujarat in the latter half of August, and the precipitation elsewhere also proved inadequate for proper growth and development of crops. The rainfall in September was quite adequate and fairly widespread but in some parts of Gujarat and in North Kanara district, it was excessive. In Thana district, on the other hand, the precipitation was not adequate and the growth of the paddy crop, was retarded due to deficient soil-moisture. On the whole, the monsoon season was unfavourable to the growth of *kharif* crops, particularly to *bajri* and maize in Gujarat. Good rainfall was received in the month of October in the Konkan and in the western parts of the Deccan and Karnatak. Elsewhere, the precipitation was inadequate and the crops did not make satisfactory growth due to lack of soil-moisture. The rainfall in November was light and sporadic. The failure of late rains gave a set-back to *rabi* crops. In short, the season, during the year under review, was marked by irregular rainfall and the incidence of insect pests and plant diseases, which reduced crop yields. Prolonged breaks in the rains resulted in the scarcity of water and fodder in some areas.

2. *Distribution of rainfall.*—Table I (pages 32-35) compares the rainfall during the year under report with the normal rainfall at each headquarters station in the State. The figures of normal rainfall for each station were obtained from the India Meteorological Department. The following observations may be made from a study of this table.

Pre-monsoon rains.—The pre-monsoon rains exceeded the normal at Ratnagiri and Karwar (North Kanara) in the Konkan, in Poona, Satara (Satara North) and in the hilly tracts of the Deccan and in Kolhapur and Dharwar in the Karnatak, while they were below the normal at Dhulia (West Khandesh), Jalgaon (East Khandesh), Ahwa (Dangs) and Sholapur in the Deccan and at Sangli (Satara South), Belgaum, Bijapur and in the hilly tracts of the Karnatak. At other places viz. at all district headquarters stations in Gujarat, at Thana and Alibag (Kolaba) in the Konkan and at Nasik and Ahmednagar in the Deccan, these rains were absent.

Monsoon rains.—The monsoon rains were above the normal at all the stations in Gujarat except at Surat where it was below the normal. These rains exceeded the normal at Ratnagiri and Karwar (North Kanara) in the Konkan, at Ahwa (Dangs), Ahmednagar, Sholapur, Satara (Satara North) and in the hilly tracts in the Deccan, and at Belgaum, Bijapur, Dharwar and in the hilly tracts in the Karnatak. They were either normal or below the normal at other stations in the State.

Post-monsoon rains.—The post-monsoon rains were absent at all the district headquarters stations in Gujarat and at Sangli (Satara South) in the Karnatak. They, however, exceeded the normal at Alibag (Kolaba) in the Konkan, at Satara (Satara North) in the Deccan and at Kolhapur, Bijapur, Dharwar and in the hilly tracts of the Karnatak but were either normal or below the normal at other stations in the State.

Winter rains.—The winter rains were below the normal at Godhra (Panch Mahals) in Gujarat and at Ahwa (Dangs) and Ahmednagar in the Deccan. These rains were absent at the remaining stations in the State.

Total rainfall for the season 1950-51.—The total rainfall for the season 1950-51 exceeded the normal at all the district headquarters stations in Gujarat except at Broach and Surat where it was below the normal amount. In other divisions of the State, the total rainfall was above the normal at Ratnagiri and Karwar (North Kanara) in the Konkan, at Ahwa (Dangs), Satara (Satara North) and in the hilly tracts in the Deccan and at Kolhapur, Belgaum, Dharwar and in the hilly tracts in the Karnatak, it being below the normal at the remaining stations.

3. In Gujarat, light showers of rain received in the month of June facilitated preparatory tillage, whole *kharif* sowings also commenced in some places. The month of July and the first week of August were marked with heavy precipitation over most of the division and although this was followed by a period of drought or slight rainfall, there were heavy showers again in the month of September. As a result, *kharif* sowings could not be proceeded with smoothly, while the crops already sown were damaged by excessive rainfall particularly in the low-lying areas. In the month of October, there were only light showers in some places in Broach district, the rainfall being practically absent thereafter over the whole division. Locust attack was reported in June from parts of Banaskantha district and the attack persisted almost throughout the season. The same pest was also noticed in Surat, Amreli, Ahmedabad and Mehsana districts later in the season. Caterpillars were observed in parts of Ahmedabad and Banaskantha districts and grasshoppers and "katra" in Mehsana and Panch Mahals districts. Stem-borer attack on *jowar* was reported from places in Amreli district. Rat trouble was noticed in Broach district.

In the Konkan, the monsoon commenced in June with fairly wide-spread rainfall and sowing operations started over most of the division. In Ratnagiri district, however, more rains were needed for the satisfactory growth of the germinated seedlings. July rains were favourable but the showers of August and September proved excessive in parts of North Kanara district. In Thana district, on the other hand, the growth of paddy was

retarded due to deficient soil-moisture. Good showers were received in the month of October and with light showers in November the season closed. Blast on paddy was reported from parts of Kolaba, Ratnagiri and North Kanara districts. Caterpillars damaged paddy crop in North Kanara district. "Karpa" was observed in Ratnagiri and "Mann" and "Kane" pests were noticed in places in North Kanara district. Locust attack was reported from parts of Thana district.

In the Deccan, during May, light showers were received in parts of Sholapur district followed by fairly substantial rain in June in the eastern parts of the division. The month of July brought heavy and wide-spread rain over the whole division, but this proved somewhat excessive and delayed sowing operations and damaged crops in some areas. Elsewhere, sowing operations were carried on uninterruptedly and crops made fairly satisfactory progress. The rainfall in the subsequent months was favourable in the division except in the south-eastern areas where more rain was needed to promote satisfactory growth of crops. The monsoon practically closed with light and sporadic rains in November. Leaf-curl was noticed on chillies in parts of Sholapur district. Grasshopper attack on *bajri* was reported from Satara North and Nasik districts. Blister beetle attack was noticed on *bajri* in Ahmednagar and Poona districts. Sugarcane was affected by stem-borer in Poona district. Rust on potato and aphid on onion and tobacco were reported from Satara North district.

In the Karnatak, light showers were received during the pre-monsoon period and fairly substantial rains occurred during the months of June and July. *Kharif* sowings were undertaken on an extensive scale and crops made satisfactory progress. August rainfall was light and proved inadequate for the proper development of crops. The rainfall in September was fairly wide-spread but October rains proved heavy except in Bijapur district and retarded the normal crop growth. Again, there were light showers in places in November and December and more rain was necessary for the growth of *rabi* crops, sowing of which was over. Grasshoppers were reported from many parts of the division. Paddy was affected by blast in certain areas in Belgaum district. Stem-borer attack was also observed in Belgaum and Dharwar districts and caterpillars were noticed on *jowar* in Kolhapur district.

CHAPTER II—AREA CULTIVATED AND UNCULTIVATED

(Table II—Pages 37-41)

(Summary Table A—page 22)

4. *Number of Villages.*—The total number of villages in the State was 36,155, showing an increase of 113 as compared with that of the previous year. The change in the number of villages was noticed in most of the districts of the State and was due mainly to the amalgamation or transfer of villages between adjoining districts from outside the State for administrative convenience.

5. *Total area reporting and non-reporting areas.*—The total area i.e. the geographical area of Bombay State was 70,299,100 acres as against 67,436,100 acres i.e. 4.2 per cent. more than during the previous year. Of this geographical area, the reporting area was 63,621,200 acres and the non-reporting area i.e. the area for which no returns exist, was 6,677,900 acres as against 62,359,100 acres and 5,077,000 acres respectively of the previous year. These differences in the above acreage figures were due mainly to the fact that the figures of 1949-50 were exclusive of the area of Banaskantha district as details of classification of area for that district were not then available. The figures of acreage for the year under report include the geographical area of Banaskantha district also. The increase was also contributed by the amalgamation or transfer of villages in many of the districts in the State, particularly West Khandesh district.

6. *Cropped areas.*—The gross and net cropped areas in the State remained practically the same as those of the previous year showing an increase of only 0.6 per cent. and 0.2 per cent. respectively. The acreages under the above two heads increased from 42,362,800 acres and 41,081,500 acres of the previous year to 42,602,600 acres and 41,144,600 acres respectively during the year under report. The twice cropped area showed an increase from 1,281,300 acres to 1,458,000 acres or of 13.8 per cent. over that of the previous year and this increase was shared by all the divisions in the State, most of it being shared by Gujarat and the Deccan divisions. The acreage under forests registered an increase of 9.5 per cent. from 9,913,900 acres (excluding Banaskantha) during 1949-50 to 10,860,600 acres during the year under report. The area under current fallows was 3,091,700 acres while the total area under cultivation including current fallows was 44,236,300 acres. The barren and unculturable land exclusive of Satara North and Belgaum, for which figures are not received, comprised 4,427,000 acres. The areas under "land put to non-agricultural uses", "culturable waste", "permanent pastures and other grazing lands", "land under miscellaneous crops and not included in the area sown" and "other fallow land" were 1,069,000 acres, 2,625,700 acres, 2,260,700 acres, 1,148,000 acres and 3,671,800 acres respectively.

CHAPTER III—IRRIGATED AREAS

(Tables III-A and III-B—Pages 42-71)

(Summary Tables, B and C—Pages 23-25)

7. *Sources of water supply.*—During the year under review, the number of private canals, Government canals and tube wells, was 4,701, 739 and 1,594 respectively. The mileages for private and Government canals were 2,909 miles and 987 miles respectively. The number of Government wells used for irrigation purposes only under masonry and non-masonry construction was 9,065 and 10,487 respectively, while that of private wells used for irrigation purposes only was 310,652 and 180,799 under masonry and non-masonry types respectively. The total number of wells (other than tube

wells) in use for irrigation purposes only, thus, works out to 511,003. The number of wells used for domestic purposes only and the number of wells not in use were 176,491 and 67,039 respectively.

8. *Irrigated area.*—The irrigated area in the State under all crops increased during the year under report. The increase was noticed mainly in the case of wheat, *bajri*, barley, sugarcane and cotton by 17.6, 25.2, 76.2, 13.7 and 46.1 per cent. respectively over that of 1949-50. The result of this was that the total irrigated area increased by 10.6 per cent. while the area under food crops increased by 4.6 per cent. in comparison with those of the preceding year.

During the year under report, the percentage of net irrigated area to the net cropped area was 4.8, as against 4.3 in 1949-50. The percentage of total irrigated area to total sown increased from 4.7 in 1949-50 to 5.2 in 1950-51.

9. *Area irrigated under different sources of irrigation.*—The area irrigated by Government canals decreased by 4,800 acres which was 1.3 per cent. below the corresponding figure of the previous year. On the other hand, the area irrigated by private canals, tanks, wells and other sources increased by 7,700 acres or 12.0 per cent., 50,500 acres or 32.8 per cent., 158,800 acres or 15.3 per cent. and by 3,000 acres or 2.3 per cent. respectively over the corresponding figures of 1949-50.

10. *Irrigated areas under food and non-food crops.*—The total area irrigated by all sources of irrigation was 2,223,500 acres in 1950-51 as against 2,010,700 acres during the preceding year, thus recording an increase of 10.6 per cent. The irrigated area under food crops during the year under report was 1,822,100 acres as against 1,742,800 acres in 1949-50 an increase of 4.6 per cent. Barley, though it occupies a small acreage in the State, recorded the highest increase of 76.2 per cent., followed by *bajra* (25.2 per cent.) and wheat (17.6 per cent.). The total irrigated area under non-food crops also recorded a big increase. It rose to 401,400 acres in 1950-51 from 268,300 acres in 1949-50, an increase of 49.6 per cent. Cotton recorded a big increase of 46.1 per cent.

CHAPTER IV—CROPPED AREA

(Tables IV-A, IV-B and IV-C—Pages 72-138)

(Summary Table D—Pages 26-27)

11. *Total area under crops.*—The total gross cropped area in Bombay State was almost stationary being 42,602,600 acres as against 42,362,800 acres or only 0.6 per cent. more than that during the preceding year. Of this area 13,154,000 acres were in Gujarat, 2,259,700 acres in the Konkan, 16,142,000 acres in the Deccan and 11,046,900 acres in the Karnatak, the percentage increase in each division being 1.0, 1.2, 0.1 and 0.6 respectively. Food crops occupied 30,236,800 acres or 71.0 per cent. while the non-food crops occupied 12,365,800 acres or 29.0 per cent. of the total area sown.

The table below gives the acreage under food and non-food crops in the four divisions of the State during 1949-50 and 1950-51.

(Acreage figures are in hundreds)

Division	Food crops			Non-Food crops		
	1949-50*	1950-51	% Increase or decrease	1949-50*	1950-51	% Increase or decrease
Gujarat ...	66,653	62,232	-5.3	43,373	49,308	+13.7
Konkan ...	17,330	17,410	+0.5	5,004	5,187	+3.7
Deccan ..	124,880	126,247	+1.1	36,326	35,173	-3.2
Karnatak ...	79,505	76,479	-3.8	30,357	33,990	+12.0
State ...	308,568	302,368	-2.0	115,060	123,658	+7.5

Note —*In 1949-50 the figures for "Condiments and spices" were included in "Food crops", whereas in 1950-51 they have been included in Non-food crops and hence the figures of "Condiments and spices" have been subtracted from the figures of total food crops for 1949-50 and added to the figures of total non-food crops for 1949-50 for the sake of comparison.

It will be seen from the above table, that the area under food crops declined by 620,000 acres or 2.0 per cent. as compared with the corresponding figure of the previous year. The decline was particularly noticeable in Gujarat and the Karnatak being 462,100 acres or 5.3 per cent. and 302,600 acres or 3.8 per cent. respectively. The area under non-food crops, on the other hand, increased by 859,800 acres or by 7.5 per cent. and the increase was shared to a varying extent by all the divisions of the State except by the Deccan, where its acreage went down by 115,300 acres or by 3.2 per cent..

12. *Food crops.*—Among the main food crops, the area under paddy increased by 106,500 acres or 3.4 per cent. over the area in the preceding year. The increase was shared by all the divisions in the State. The area under wheat likewise showed an overall increase of 112,100 acres or 5.4 per cent. over that of the previous year. The increase was particularly noticeable in Gujarat being of the order of 96,100 acres or 13.6 per cent. The increase in the Deccan was 19,500 acres or 2.7 per cent. while in the Karnatak the area declined by 3,500 acres or 0.5 per cent. The area under *kharif* and *rabi jowar* was almost the same as that of the previous year and there was no marked variation in their areas in any of the divisions of the State except in Gujarat where an increase in acreage by 17.1 per cent. is noticed for *rabi jowar*. In the case of *bajri*, compared with 1949-50, the area declined by 448,600 acres or 7.2 per cent. and to a large extent this decrease was in Gujarat namely, 459,300 acres or 20.9 per cent. and next in order was the Karnatak, 87,100 acres or 9.1 per cent.. Against this decline, there was an increase of 137,800 acres or 4.8 per cent. in the Deccan. The area under ragi declined by 4.8 per cent. and the decrease was shared by all the divisions in the State. There was an overall increase of 48,800 acres or 5.5 per cent. under gram and a large part of this increase was shared by Gujarat with

65,900 acres or 42.1 per cent. and the Konkan, 300 acres or 7.9 per cent. As against these, there was a decline in the acreage in the Deccan and the Karnatak of 7,600 acres or 1.7 per cent. and 9,800 acres or 3.4 per cent. respectively. The area under *tur* went down by 105,700 acres or 14.9 per cent. and the decrease was shared by all the divisions except the Konkan where it rose by 1,000 acres or 7.9 per cent. Sugarcane acreage showed an increase in all the divisions except in the Konkan where it remained stationary. The total increase in the State is 22,500 acres or 12.3 per cent. over that of 1949-50.

13. *Non-food crops.*—Area under cotton shows an increase of 960,800 acres or 38.6 per cent. over that of the preceding year. The increase was shared by all the divisions, Gujarat 538,300 acres or 38.7 per cent., the Deccan 132,300 acres or 47.5 per cent. and the Karnatak 290,200 acres or 35.3 per cent. The area under groundnut increased by 70,400 acres or 2.7 per cent. over that of last year. Among the different divisions of the State, Gujarat showed an increase of 139,500 acres or 31.2 per cent. and the Karnatak, 59,900 acres or 5.7 per cent. while elsewhere in the State, the acreage went down by about 11 per cent. The area under sesamum increased by 87,800 acres or 30.4 per cent. and the increase was noticeable in all the divisions in the State except the Karnatak where it went down by 5,900 acres or 14.7 per cent. The area under tobacco increased by 30,000 acres or 12.6 per cent. Gujarat and the Deccan showed an increase of 43,700 acres or 34.0 per cent. and 200 acres or 2.9 per cent. respectively, while in the Karnatak the acreage went down by 13,900 acres or 13.5 per cent.

14. Taking all crops together, there has been little change in the total area under crops as compared with the preceding year. The table below gives the gross cropped area and the area under the principal crops in the four divisions of the State during 1949-50 and 1950-51.

Acreage figures

1	GUJARAT			KONKAN		
	1949-50	1950-51	Percentage increase or decrease	1949-50	1950-51	Percentage increase or decrease
	2			3

CHAPTER V—OUTTURN OF CROPS AND THEIR AVERAGE YIELDS

(Tables V-A and V-B—pages 139-180)

(Summary Table E—page 23)

15. *Cutturns of crops.*—The table below shows the outturn in tons, for the principal *kharif* and *rabi* foodgrain crops:—

(Figures in thousands)

Division	Kharif crops			Rabi crops		
	Cereals	Pulses	Total cereals and pulses	Cereals	Pulses	Total cereals and pulses
	Tons	Tons	Tons	Tons	Tons	Tons
Gujarat	894	124	1,018	234	33	267
Konkan	560	14	574	40	1	41
Deccan	590	110	700	567	106	673
Karnatak	472	73	545	543	85	633
Total	2,516	321	2,837	1,389	225	1,614

The 1950-51 season has been less satisfactory from the point of view of outturns of crops than the preceding one. The overall production of foodgrain crops decreased as compared with the preceding year due partly to a decrease in the acreages under food crops and partly to lower yields per acre due to bad season.

The remarks in respect of major crops are given below:—

Rice.—The monsoon set in late delaying the sowing of paddy. The crop was adversely affected in Gujarat by continuous rains in July and drought in August, and although September rains improved the condition in some areas, the yield of the crop did not come up to expectations mainly on account of the failure of August rains. In the Deccan, due to inadequate rains, the crop suffered at the grain formation stage, thus resulting in low yields. In the Karnatak and the Konkan also, the crop suffered from uneven distribution of rains. The early sown crop almost failed due to inadequate rains at the time of sowing and resowing had to be resorted to in some areas in these two divisions. Considerable damage was caused to the crop by field rats in Broach district in Gujarat. Slight attack of grasshoppers was reported from places in Belgaum district and of stem-borer from places in Belgaum and Kolhapur districts. The total acreage and outturn under the crop in the State viz. 3,266,900 acres and 1,088,600 tons showed an increase of 3.4 and 5.6 per cent. respectively over the corresponding figures of the preceding year of 3,160,600 acres and 1,031,200 tons respectively.

Wheat.—The crop was fairly satisfactory in Gujarat but it received a setback in the Deccan due to deficient late rains in some parts. In the Karnatak, the crop was sown in time and did fairly well. In Gujarat in early stage, the crop was infested by locusts in parts of Banaskantha district. Slight rust attack was observed in parts of Ahmednagar and Satara North districts in the Deccan where preventive measures such as sulphur dusting were resorted to. As compared to the acreage and outturn figures of 1949-50 viz. 2,079,100 acres and 331,400 tons respectively, this year the area and outturn, 2,191,200 acres and 366,300 tons showed an increase of 5.4 and 10.5 per cent. respectively.

Kharif Jowar.—Due to uneven distribution of rainfall, the condition of the crop in Gujarat was not satisfactory, although at Surat, it did comparatively better. In the Deccan, the prolonged break in rains in August-September, arrested the growth of the crop although the condition improved to some extent by rains received in September. In the Karnatak, only in Belgaum district, the season was favourable, while elsewhere it was less satisfactory. The crop was damaged by locusts in Banaskantha district in Gujarat. Slight attacks of field rats and locusts were reported from parts of Broach district. Smut disease was noticed at places in Nasik district. Grasshopper trouble was reported from places in Bijapur district while slight attack of rust was noticed in some talukas of Belgaum district. The acreage and outturn of the crop were almost the same as those of the previous year being 3,955,500 acres and 747,900 tons in 1949-50 as against 3,936,200 acres and 747,700 tons during the year under report.

Rabi Jowar.—The growth of *rabi jowar* was adversely affected in Gujarat due to absence of late rains. In the Deccan, the dry crop suffered considerably over most of the division for want of sufficient moisture resulting in greatly reduced yields. In the Karnatak also, the crop did not thrive well due to the same reason. The crop was damaged by locusts in parts of Broach, Amreli and Banaskantha districts and had to be resown in some parts of Amreli district. Slight occurrence of 'khaira' disease was noticed in parts of Satara North district and of "*chikta*" disease in a few places in Poona and Belgaum districts. The area increased from 7,785,100 acres to 7,813,300 acres or by 0.4 per cent. but the outturn decreased from 822,400 tons to 634,300 tons or by as much as 22.9 per cent. as compared with the corresponding figures of the previous year.

Bajri.—In Gujarat, the season proved extremely unfavourable for the crop. The delayed monsoon caused delayed sowings, resulting in reduction in the acreage while the unfavourable nature of the season reduced the yields. Seedlings were damaged by continuous rains in July and at the maturity stage also the crop suffered due to heavy rains of September, resulting in low yield. In the Deccan and the Karnatak, the germination and early growth of the crop were fairly satisfactory but the prolonged break in rains in August affected the crop growth to some extent. The rains in September, however, were beneficial. The crop was reported to be poor at some places in Sholapur and Ahmednagar districts in the Deccan due to deficient rains. The crop was considerably damaged by locusts at places in Amreli and Banaskantha districts and also by hairy-caterpillars in parts of Banaskantha district. Slight attack of beetles was noticed in Panch Mahals district. Attack of grasshoppers was noticed at places in Bijapur district in the Karnatak but the pest was brought under control by dusting of gammexine and the ultimate

disappearance of the pest is attributed to heavy showers received later. As a result of seasonal conditions, the area and outturn of the crop decreased from 6,231,800 acres and 718,100 tons in 1949-50 to 5,783,200 acres and 504,800 tons in 1950-51 or by 7.2 and 29.7 per cent. respectively.

Maize.—On account of excessive and uneven distribution of rains, the germination and growth of the crop were not satisfactory, on the whole, in Panch Mahals district, the chief maize producing tract. The same conditions prevailed to a varying extent, elsewhere in the Gujarat division. In the Deccan and the Karnatak, the crop suffered to some extent on account of long break in monsoon rains. The late advent of the monsoon caused considerable reduction in the acreage under the crop while the unfavourable character of the season is reflected in the low outturn. The area and outturn of the crop were less by 15.9 per cent. and 55.5 per cent. or from 535,900 acres and 172,600 tons in 1949-50 to 450,500 acres and 76,800 tons in 1950-51.

Ragi.—On the whole, the crop in Gujarat fared well, although it was affected to some extent by mid-September rains in Sabarkantha district. In the Deccan and the Karnatak, the crop suffered due to prolonged break in rains in August but the rains received later were beneficial. In the Deccan, the crop, however, suffered due to inadequate rains in Ahmednagar and Poona districts. In the Konkan, the rainfall was favourable for the crop which did well. The area and outturn of the crop viz. 747,500 acres and 212,100 tons in 1950-51 were 4.8 per cent. and 12.7 per cent. respectively below the area and outturn viz. 785,300 acres and 243,000 tons in 1949-50.

Gram.—For this crop, in Gujarat the rainfall was generally adequate except at places in Surat, Amreli and Broach districts. In the Deccan, the crop suffered to some extent in East Khandesh and Ahmednagar districts but was fairly satisfactory elsewhere in the division. In the Karnatak and in the Konkan, the condition of the crop was reported to be fairly well. Some stray pods were affected by caterpillars in a few places in Banaskantha district. The area increased from 894,900 acres to 943,700 acres or by 5.5 per cent. while the outturn decreased from 120,500 tons to 117,200 tons or by 2.7 per cent. as compared with the figures of the previous year.

Cotton.—The crop in Gujarat was not satisfactory on the whole. It suffered in many places due to continuous and heavy rains of July. In fact, the sowing operations in the two important cotton growing districts, Baroda and Broach were delayed due to these heavy rains and in many places resowing had to be done. Again the crop was affected at a later stage due to want of sufficient rain. Excessive rains of September were reported to have resulted in stunted growth of the crop in Mehsana, Sabarkantha and Kaira districts. The crop was also adversely affected by cold in Mehsana and Sabarkantha districts. Cloudy weather conditions late in the season caused shedding of bolls and buds in places of Mehsana district. In the Deccan, where early varieties of cotton are mostly cultivated, the crop progressed fairly satisfactorily. In the Karnatak sowings were delayed in some parts on account of continuous rains and over-growth of weeds in the fields. As a result, the crop received a set-back in growth in its initial stage and remained stunted. The unfavourable easterly winds also adversely affected the crop to some extent but conditions improved later due to favourable winds in January and February, 1951. Root-rot attack was observed at places in

Kaira district and locusts did some damage to the crop in parts of Broach, Mehsana, Sabarkantha and Banaskantha districts. The crop was affected in some areas by rhyzoctonia and red-leaf blight. The area and outturn of the crop were greater by 38.6 per cent. and 32.9 per cent. than that of the previous year, the area and outturn in 1949-50 being 2,490,900 acres and 592,000 bales respectively as against 3,451,700 acres and 786,900 bales respectively in 1950-51. However, only in Gujarat due to the seasonal conditions described above, the increase in the outturn was not commensurate with the increase in area.

16. *Yield per acre.*—During the year under review, State-wide crop-cutting experimental surveys were conducted on seven principal crops viz. paddy, *bajri*, *kharif jowar*, wheat, *rabi jowar*, cotton and tobacco. Surveys were also conducted on maize, ragi, kodra, groundnut and gram confined to one district for each crop. In addition, experiments were continued in the canal tracts to estimate the average yield per acre of irrigated paddy, wheat, *bajri* and *rabi jowar*.

17. *Kharif crops.*—The State as well as divisionwise average yields per acre of *kharif* food crops, based on crop-cutting experiments, are given below :—

Division	Yield per acre								
	Rice			Kharif Jowar			Bajri		
	1949-50	1950-51	Percentage increase or decrease	1949-50	1950-51	Percentage increase or decrease	1949-50	1950-51	Percentage increase or decrease
	lb.	lb.		lb.	lb.		lb.	lb.	
Gujarat	545	516	-5.3	236	266	+12.7	334	161	-51.8
Konkan	949	963	+1.5
Deccan	543	522	-3.9	532	552	-5.2	220	222	+0.9
Karnatak	768	943	+22.8	530	521	-1.7	184	177	-3.8
State	731	746	+2.1	424	425	+0.2	258	196	-24.0

It will be seen from the above table, that for rice the average yield per acre for the State was 746 lb. as against 731 lb. during the previous year. The highest average yield of 963 lb. was obtained in the Konkan as against 949 lb. during last year. The average yield per acre of *kharif jowar* for the State was 425 lb. as against 424 lb. during 1949-50. The yield per acre in Gujarat rose by 12.7 per cent. over the yield of the previous year but in the Deccan and Karnatak, it fell by 5.2 per cent. and 1.7 per cent. respectively. The average yields in the Deccan and in Karnatak were 107.5 per cent. and 95.9 per cent. respectively more than that obtain in Gujarat. The average yield per acre of *bajri* for the State was 196 lb. as against 258 lb. of the preceding year. The average yield in the Deccan was almost the same as in the previous year being higher by only 0.9 per cent. and the average yield in the Karnatak was low by 3.8 per cent.; but the yield obtained in Gujarat was very low being 51.8 per cent. below that of 1949-50 figure, thus proving that this was a very unfavourable season for the crop in this division.

The average yield per acre of *tur* and sesamum (based on anna valuation figures of the Revenue Department) for the four divisions of the State are as shown below :—

Division	Yield per acre					
	Tur			Sesamum		
	1949-50	1950-51	Percentage increase or decrease	1949-50	1950-51	Percentage increase or decrease
	lb.	lb.		lb.	lb.	
Gujarat	402	390	- 3.0	268	230	- 14.2
Konkan	317	327	+ 3.2	238	257	+ 8.0
Deccan	589	456	- 22.6	224	150	- 33.0
Karnatak	485	555	+ 14.4	209	189	- 9.6
State	483	469	- 2.9	250	213	- 14.8

For both the crops viz *tur* and sesamum, the State average yields per acre have gone down from 483 lb. and 250 lb. to 469 lb. and 213 lb. respectively. In the case of *tur*, the Karnatak recorded the highest yield per acre of 555 lb. while for sesamum the highest yield of 257 lb. was obtained in the Konkan being 14.4 per cent. and 8.0 per cent. respectively above the average yields obtained during 1949-50.

18. *Rabi crops*.—The State and divisionwise average yields per acre of *rabi* crops (based on crop-cutting experiments) are as under :—

Division	Yield per acre					
	Wheat			Rabi Jowar		
	1949-50	1950-51	Percentage increase or decrease	1949-50	1950-51	Percentage increase or decrease
	lb.	lb.		lb.	lb.	
Gujarat	441	512	+16.1	406	377	- 7.1
Konkan
Deccan	409	374	- 8.6	230	153	- 31.3
Karnatak	203	204	- 1.9	221	193	- 11.3
State	357	374	+ 4.8	237	182	- 23.2

It will be seen from the above table that the average yields per acre of wheat and *rabi jowar* for the State were 574 lb. and 182 lb. respectively as against 357 lb. and 237 lb. respectively during the previous year. The average yield of wheat in Gujarat was 16.1 per cent. more than that obtained during the previous year and was more than double that of the Karnatak. In the Deccan and Karnatak the yields were low by 8.6 per cent. and 1.9 per cent. respectively. In the case of *rabi jowar* the average yields in Gujarat, the Deccan and Karnatak showed a decrease of 7.1, 31.3 and 11.3 per cent. respectively, as compared with the corresponding figures of the preceding year.

18. The average yields per acre of *rabi* crops viz. gram, linseed, rape and mustard (based on anna valuation figures of the Revenue Department) for the four divisions of the State are given below :—

Division	Yield per acre								
	Gram			Linseed			Rape and mustard		
	1949-50	1950-51	Percentage increase or decrease	1949-50	1950-51	Percentage increase or decrease	1949-50	1950-51	Percentage increase or decrease
	lb.	lb.		lb.	lb.		lb.	lb.	
Gujarat ..	335	331	-1.2	175	224	+28.0	322	363	+12.7
Konkan ...	320	273	-14.7
Deccan ...	325	265	-18.5	189	147	-22.2	397	280	-29.5
Karnatak ...	248	256	+3.2	150	181	+20.7	300	264	-12.0
State ...	302	278	-7.9	162	170	+4.9	325	356	+9.5

The average yield per acre of gram for the State was 278 lb. as against 302 lb. during last year. In Gujarat and the Karnatak the yields were almost the same as obtained during last year but in the Konkan and Deccan the yields were less by 14.7 and 18.5 per cent. respectively. In the case of linseed the average yield per acre for the State was 170 lb. as against 162 lb. during 1949-50, while for rape and mustard the average yield per acre was 356 lb. during the year under report as against 325 lb. during the previous year.

19. *Cotton, Sugarcane and Tobacco.*—The table below gives the average yields per acre of cotton (based entirely on crop-cutting experiments), sugarcane (based entirely on anna valuation figures) and tobacco (based on crop-cutting experiments for Gujarat and the Karnatak districts and on anna valuation figures for the Deccan districts) :—

Division	Yield per acre								
	Cotton			Sugarcane			Tobacco		
	1949-50	1950-51	Percentage increase or decrease	1949-50	1950-51	Percentage increase or decrease	1949-50	1950-51	Percentage increase or decrease
	lb. of lint.	lb. of lint.		lb. of gul.	lb. of gul.		lb. of dry leaf.	lb. of dry leaf.	
Gujarat ...	123	106	-13.8	4,626	4,480	-3.2	516	672	+30.2
Konkan	3,786	3,848	+1.6
Deccan ...	80	99	+23.8	6,947	6,533	-6.0	459	498	+8.5
Karnatak ...	47	57	+21.3	6,382	6,757	+5.9	473	459	-3.0
State ...	93	89	-4.3	6,581	6,482	-1.5	496	596	+20.2

The average yield per acre of cotton for the State was 89 lbs. of lint during 1950-51 as against 93 lb. during the previous year. The average yield of the crop in Gujarat went down by 13·8 per cent. while in the Deccan and Karnatak the average yields were 23·8 and 21·3 per cent. respectively above the yields obtained during 1949-50. The average yield per acre of sugarcane for the State was 6,482 lb. (*gul*) as against 6,581 lb. during the previous year. The average yield per acre of tobacco for the State was 596 lb. of dry leaf as against 496 lb. during 1949-50.

20. *Cotton*.—During the year under review the total area and outturn of cotton in the State were 3,452 thousand acres and 787 thousand bales of 392 lb. each respectively. The corresponding figures for the previous year were 2,491 thousand acres and 592 thousand bales. Both acreage and outturn of the crop showed an appreciable increase when compared with the figures of the previous year and this may be attributed partly to the high prices that prevailed in the market for the crop during the year under report. The table below gives the total area and outturn of cotton in different divisions of the State during 1949-50 and 1950-51 :—

(Figures in thousands)

Division	Area in acres			Outturn in bales (of 392 lbs. each)		
	1949-50	1950-51	Percentage increase or decrease	1949-50	1950-51	Percentage increase or decrease
Gujarat ...	1,390	1,928	+38·7	437	522	+19·5
Deccan ...	279	411	+47·3	57	104	+82·5
Karnatak ...	822	1,113	+35·3	98	161	+64·3
Total ...	2,491	3,452	+38·6	592	787	+32·9

CHAPTER VI—PRICES

(Table VI—pages 181-188)

(Summary Table F—page 29)

21. Table VI of the Report gives the average prices of principal crops in different districts during harvest time. Due to continuance of price control, the prices of foodgrains and other essential commodities during the year under report did not show marked variations. The prices of foodgrains were almost the same as in the previous year, while the prices of commercial crops showed an upward trend.

22. The major variations in the average prices at harvest time of principal commodities both at the State level and in the various divisions of the State are summarised below :—

At State level the average price of rice was Rs. 12-5-0 per standard maund of 82 2/7 lb., this being the same as prevailed during the previous year. The price fell by 2·2 per cent. in Gujarat but rose by 7·1 and 2·2 per cent. in the Konkan and Deccan respectively and it remained stationary in the Karnatak. The average price of wheat viz. Rs. 17-7-0 per standard maund of 82 2/7 lb. was lower by 4·5 per cent. than that of the previous year. The price remained

stationary in Gujarat but rose by 1·2 and 1·5 per cent. in the Konkan and the Karnatak respectively and fell by 0·7 per cent. in the Deccan. The average price of *jowar* viz. Rs. 10-13-0 per Standard maund rose by 1·8 per cent. The price decreased in Gujarat and in the Deccan by 1·6 and 0·6 per cent. respectively but rose in the Konkan and Karnatak by 7·2 and 2·5 per cent. respectively. The average price of *bajri* viz. Rs. 11-8-0 per Standard maund remained practically the same as in the preceding year being lower only by 1·6 per cent. It was stationary in the Konkan and Deccan but ruled lower by 1·0 and 9·5 per cent. in the Gujarat and the Karnatak respectively. The average price of Rs. 9-12-0 for *nachani* (ragi) ruled higher by 2·0 per cent. It rose by 4·0 and 3·8 per cent. in Gujarat and the Karnatak respectively but fell by 10·0 and 5·8 per cent. in the Konkan and Deccan respectively. The average price of kodra, Rs. 10-6-0 was higher by 7·1 per cent. as compared with the price of the previous year. It rose by 11·3 per cent. in Gujarat but fell by 12·5 and 3·4 per cent. in the Konkan and Deccan respectively. Among pulses, the average price of *tur dal* namely, Rs. 18-2-0 was lower by 0·7 per cent. It rose by 4·1 and 2·8 per cent. in Gujarat and the Karnatak respectively and fell by 6·2 per cent. in the Deccan and the price remained stationary in the Konkan. The average price for gram which was Rs. 17-13-0 per maund rose by 0·7 per cent. having gone up by 3·5 per cent. and 2·4 per cent. in Gujarat and the Deccan respectively and gone down by per cent. in the Karnatak.

The average price of *gul*, Rs. 18-5-0 was higher than that of the previous year by 4·6 per cent. It fell by 5·0 per cent. in Gujarat but rose by 10·1, 0·7 and 4·9 per cent. in the Konkan, Deccan and Karnatak respectively. The average price of groundnut viz. Rs. 19-5-0 was higher by 3·3 per cent. than that of 1949-50 being 5·1, 1·6 and 6·4 per cent. higher than the prices of last year in Gujarat, the Deccan and Karnatak respectively. The average price of tobacco, Rs. 145-15-0 remained almost stationary showing only a rise of 0·4 per cent. It ruled higher by 1·9 and 2·1 per cent. in Gujarat and the Karnatak respectively but was lower by 5·1 per cent. in the Deccan.

The average price of cotton (cleaned) viz. Rs. 39-5-0 ruled higher by 8·8 per cent. than that in the preceding year, the prices showing an upward trend by 9·2, 12·2 and 5·4 per cent. in Gujarat, the Deccan and Karnatak respectively compared with the prices of the previous year.

23. The table below compares the prices of Broach and Jarila Cottons ruling at Bombay during the year under review, with those of the previous year and the average of the preceding five years.

Variety of cotton	Prices per <i>khandi</i> of 784 lb.			Variation	
	Average for five years ending 1949	1950	1951	Compared with the average price	Compared with the price of 1950
	Rs.	Rs.	Rs.	Per cent.	Per cent.
Broach	596	712	955	+60·2	+34·1
Jarila	507	620	865	+70·6	+39·5

According to the East India Cotton Association Ltd., during the year practically all cottons were being bought by the nominee appointed by the State Government at ceiling prices of Rs. 865 for Jarila and Rs. 955 for Broach (Vijay) in each case per *khandi* of 784 lb. irrespective of quality and staple. These ceiling prices may, therefore, be taken as the rates ruling during the period.

CHAPTER VII—AGRICULTURAL WAGES

(Table VII—pages 189-201)

(Summary Table G—page 30)

24. In this State according to the Manual of Revenue Accounts, agricultural labour is classified under three categories viz (a) skilled, (b) ordinary, and (c) field labour. Skilled labour comprises carpenters, black-smiths and cobblers; ordinary labour consists of load carrying coolies, well diggers, masons or carpenters' assistants, earth workers, etc., while the field labour includes ploughmen, sowers, reapers, weeders, transplanters, etc. In this report in Table VII—Agricultural Wages—in addition to the above, one more column of herdsmen, whose main work is to collect livestock from different owners and to feed them in the jungle during the day and again bring them back to the owners' place, is added.

25. Table VII of the report gives districtwise figures of wages of different classes of agricultural labour. A perusal of Table VII shows that during the year 1950-51, on account of high cost of living and dearth of agricultural labour, the wages continued to be high throughout the year and in particular there was a rise during the harvesting period when scarcity of labour was felt in some areas. It is significant to note that the daily wages remained almost constant throughout the year, more especially in the case of herdsmen, field labour and other agricultural labour. The inevitable seasonality of demand for agricultural labour has had, therefore, no effect on the rates of daily wages.

CHAPTER VIII—AGRICULTURAL STOCK

(Table VIII—pages 202-203)

(Summary Table H—page 31)

26. Table VIII of this report gives the details of livestock, poultry and agricultural machinery during the year under report.

Cattle.—There is an increase in the number of cattle from 11,422,021 to 11,915,298 or by 4.3 per cent. over that of the preceding year. The number of breeding bulls over three years remained almost the same as in the previous year, while the number of other males over three years increased by 6.4 per cent. The number of breeding cows over three years, however, went down by as much as 34.1 per cent. as against which there was an increase in the number of other cows over three years by as much as 112.4 per cent.: The number of young stock showed an increase of 4.3 per cent. over that of 1949-50.

Buffaloes.—The total number of buffaloes decreased from 4,293,336 in 1949-50 to 4,161,950 or by 3.1 per cent.. The number of breeding bulls over three years showed a considerable drop of 68.2 per cent., while the number of other males over three years, breeding cows over three years and young stock also decreased by 10.0 18.8 and 13.1 per cent. respectively. The number of other cows over three years, however, increased by 132.2 per cent..

Sheep and Goats.—While the number of sheep went down by 17.0 per cent. that of goats increased by 7.2 per cent. as compared with the corresponding numbers of the previous year.

Agricultural Machinery and Implements.—The number of tractors in the Bombay State during 1950-51 was 1072. Unfortunately, data for earlier years are not available, but the recent drive for Grow More Food has definitely resulted in an increase in the number of tractors. The number of ploughs was 2,582,485, while the number of carts totalled 1,077,312.

CHAPTER IX—AGRICULTURAL OUTLOOK

27. As mentioned in Chapter I of the Report, the season under review was unsatisfactory over large part of the State and judged by crop production, it was less satisfactory than the preceding one. The monsoon set in a little later than usual and the distribution of rain was also not favourable. These caused reduction in acreage under most of the crops and especially under *bajri* and maize. The prolonged and untimely break in rains arrested the growth of standing crops while the absence of late rains resulted in lowering the crop outturns and caused scarcity of water and fodder in some areas.

28. The table below compares for the years 1949-50 and 1950-51, the actual acreage sown and the tonnage of foodgrain crops produced in the State and in its different divisions :—

[Figures in thousands].

Division	Area in acres		Outturn in tons	
	1949-50	1950-51	1949-50	1950-51
Gujarat	8,429	8,098	1,549	1,285
Konkan	1,639	1,697	618	615
Deccan	12,237	12,333	1,065	1,373
Karnatak	7,750	7,500	1,224	1,178
State	30,105	29,628	5,056	4,451

29. During the year under review, a vigorous campaign was carried on for intensifying the G.M.F. drive and the cultivators were helped to bring more land under cultivation and to grow more food crops. The G.M.F. Campaign helped, to certain extent, in ameliorating the condition of the masses. Measures such as grant of *tagai* loans for the construction and repairs of wells and tanks, distribution of improved seeds, insecticides, fungicides etc., provided a stimulus to the agriculturists to grow more food crops while the assistance rendered in the preparation of compost and farm yard manures helped to augment their manure supply.

As in the past, Contour bunding of fields, tractor ploughing and provision for facilities for lift irrigation were taken up on a large scale during the year under report.

Despite these efforts, both the acreage and yield showed reduction as compared with the previous year mainly due to unfavourable character of the agricultural season. As a result, there was deficiency of food and fodder in some areas and Government took prompt measures to meet the situation. Food supply was regulated by procurement and equitable distribution of foodgrains. The statutory control on prices of food stuffs was continued and movement of major foodgrains was regulated in a manner that ensured adequate supplies to consuming centres.

30. The condition of cattle was generally satisfactory. Epizootics like haemorrhagic septicaemia, rinderpest, foot and mouth diseases etc. prevailed in some parts but they did not assume such epidemic proportions as to interfere with the normal progress of agricultural operations. Sheep and goats were reported to have suffered heavily from rinderpest in Satara (South) district.

31. The table below gives the average prices of agricultural commodities prevailing at harvest time, for the years 1946-47 to 1950-51.

Prices in Rupees per maund of 3,200 tolas except for cotton the prices for which are recorded in rupees per khundi of 784 lb.

Commodity	Centre	1946-47	1947-48	1948-49	1949-50	1950-51
		Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
A. Food Crops.						
Jowar ...	1 Sholapur ..	8 0 0	10 0 0	13 5 4	13 5 4	11 6 10
Bajri ...	2 Nasik ...	10 0 0	13 5 4	20 0 0	11 0 0
Rice ...	3 Tuana ..	13 5 4	20 0 0	20 0 0	20 0 0	20 0 0
B. Export Crops.						
Wheat ...	1 Ahmedabad ...	13 5 4	13 0 0
Groundnut ...	2 Karad ...	20 0 0	20 0 0	20 0 0	20 0 0	13 5 4
			<i>Per khandi.</i>			
Cotton (Jarila) ...	Bombay .	497 0 0	865 0 0	620 0 0	620 0 0	865 0 0

The centres given in the table above are representative markets and accordingly the prices of agricultural produce in these markets indicate the general tendency in the variations of prices of these commodities in the State.

CHAPTER X—CONDITION OF AGRICULTURAL POPULATION

32. The economic condition of the agriculturists during the year under report was much the same as in the previous year. The facilities afforded by Government in their G.M.F. drive helped to better the production capacity of the cultivators. The prices of uncontrolled agricultural commodities continued to be at a high level due to unhealthy speculative tendencies prevailing in the markets and the poor yields of food crops was to some extent compensated by high prices of money crops like cotton and groundnut. The benefits that should have accrued as a result of the above measures were, however, to a certain extent, off-set by the increased cost of cultivation resulting from the scarcity and high cost of labour, high prices of agricultural cattle, implements and also of other necessities of life. There was dearth of labour in some areas owing to the labour migrating to industrial towns and factory areas and this maintained the rates of agricultural wages at a high level. The Bombay Money Lenders' Act and the Bombay Agricultural Debtors' Relief Act continued to be in operation and gave protection to the cultivators from the usurious practices of private money lenders. The Bombay Tenancy and Agricultural Land Act helped to improve the lot of the tenant class.

Poona-1.

T. G. SHIRNAME,
Director of Agriculture, B. S., Poona.

SUMMARY TABLE "A"

CLASSIFICATION OF AREA

[Area figures in hundreds.]

Heads of Classification.	1949-50.		1950-51.		Percentage increase or decrease.
	Area.	Percentage of total.	Area.	Percentage of total.	
	Acres.		Acres.		
Total area (by village papers) ...	674,361	702,901	+4
Forests	99,139	14.7	108,606	15.4	+9.5
Barren and uncultivable land...	N.A.	44,270	6.3
Land put to non-agricultural uses.	N.A.	10,690	1.5
Culturable waste	N.A.	26,257	3.7
Permanent pastures and other grazing lands.	N.A.	22,607	3.2
Land under miscellaneous tree crops and grove not included in area sown.	N.A.	11,480	1.6
Current fallows	70,425	10.4	30,917	4.4
Other fallow land	N.A.	36,718	5.2
Net area sown	410,815	60.9	411,446	58.5	+0.2
Area sown more than once ...	12,813	1.9	14,580	2.1	+13.8
Total cropped area ...	423,628	62.8	426,026	60.6	+0.6

N. A. = Not available.

Note.—The area details except for total cropped area, area sown more than once and net area sown for Banaskantha district were not available for 1949-50 and hence the State totals for that year are exclusive of figures for Banaskantha district.

SUMMARY TABLE "B"

Sources of water supply and the area irrigated therefrom in Bombay State during 1950-51.

(i) Specification of Sources:—						No.

SUMMARY TABLE "H".

Number of Livestock, Poultry and Agricultural Machinery.

				1949-50	1950-51	Percentage increase or decrease
Cattle—						
Males over 3 years	Breeding Bulls ...	83,967	89,106	+0.2
			Other males over 3 years.	4,986,114	5,304,355	+6.4
Females over 3 years	Breeding Cows ...	2,634,602	1,36,680	-34.1
			Other Cows over 3 years.	815,451	1,796,056	+112.4
			Young Stock ...	2,766,887	2,939,101	+4.3
Total, Cattle ...				11,442,021	11,915,248	+4.3
Buffaloes—						
Males over 3 years	Breeding Bulls ..	68,621	21,830	-68.2
			Other Males over 3 years.	316,726	285,049	-10.0
Females over 3 years	Breeding Cows ...	1,892,394	1,536,342	-18.8
			Other Cows over 3 years.	390,072	905,656	+132.2
			Young Stock ...	1,625,523	1,413,073	-13.1
Total, Buffaloes ...				4,223,326	4,161,950	-3.1
Total, Sheep ...				3,023,662	2,515,423	-17.0
Total, Goats ...				4,021,337	4,311,630	+7.2
Horses and Ponies—						
Males over 3 years	N.A.	53,786
Females over 3 years	N.A.	37,986
Young Stock	N.A.	42,653
Total Horses and Ponies	N.A.	134,425
Mules	N.A.	3,022
Donkeys	N.A.	115,743
Camels	N.A.	25,813
Pigs	N.A.	73,664
Total, Live-stock ...				N.A.	23,256,937
Poultry—						
Fowls	N.A.	6,244,774
Ducks	N.A.	40,822
Others	N.A.	Nil.
Total Poultry ...				N.A.	6,285,596
Agricultural Machinery and Implements—						
Ploughs	N.A.	2,582,286
Carts	N.A.	1,077,372
Sugarcane Crushers	N.A.	19,018
Tractors	N.A.	1,072
Oil Engines	N.A.	28,140
Electric Pumps	N.A.	1,837
Ghanies	N.A.	11,786

N.A. = Not available.

Note.—The figures for 1949-50 and 1950-51 are not strictly comparable except for the groups "total of Cattle and Buffaloes" partly due to the fact that the census enumeration forms utilised for 1951 livestock census and part differed from those used in 1949-50 census and partly to the possible difference in the geographical coverage of the two censuses.
