## INTRODUCTION

The Season and Crop Report is an important report published by the Department of Agriculture of Maharashtra State. The present report pertains to the year 1992-93.

The information on Centrewise and Seasonwise rainfall data, district level land utilization statistics, irrigation statistics, area, production and productivity of various crops, farm harvest prices, Agricultural Wages and Agricultural stock etc., is presented in the report. The information is collected through various agencies detailed below :

The rainfall data is based on daily rainfall figures received from Revenue Offices and Indian Meteorological Department for a few selected centres. The data on land utilization, source of irrigation, area irrigated as well as total area under different crops and agricultural wages are collected from District Collectorates through Season and Crop report where as the production estimates are worked out on the basis of Crop Estimation Surveys conducted on certain principal food and nonfood crops. The data on farm harvest prices are collected from Agricultural Development Officers. The data on Agricultural Census of Live-stock conducted by Commissionerate of Animal Husbandry in the year 1992.

The State level figures are presented in summary tables A to I , while districtwise details are furnished in Table - I to Table - VIII.

The main features of the report are summarised below,

The agricultural Season during 1992-93 was not only most favourable than the year 1991-92, but it is a record food grain production year of the state.

The net sown area during the year under report was 180.2 lakh hectares or 58.6 % of Geographical area. The gross cropped area was 211.9 lakh hectares.

The net irrigated area was 26.8 lakh hectares whereas the gross irrigated area was 32.6 lakh hectares.

The foodgrain production in the State was 141.4 lakh tonnes which was 83.4 lakh tonnes during the preceding year showing an increase of 69.5% over that of last year. This remarkable achievement in production of food grain was not only due to favourable climatic condition all year round but also timely and proper action taken regarding input supply by the Department.

However the production of Sugarcane was decreased. Production of sugarcane was 311.1 lakh tonnes while it was 364.6 lakh tonnes during the last year showing a decrease of 14.7 per cent production of cotton increased from 11.6 lakh bales of 170 kg each to 18.9 lakh bales showing an increase of 63.5%. Similarly total oil seeds production increased from 10.9 lakh tonnes to 17.6 lakh tonnes showing an increase of 61.1% during the year under report.

Due to increase in production of jowar, bajri, maize and the abundant availability in market, prices of these commodities were decreased however prices of some commodities like paddy, ragi and gram were increased.

Agricultural wages during 1992-93 were higher than those during 1991-92

The report may prove useful to the users of Agricultural Statistics.

PUNE - 411 001  
Date - September, 1995

# SEASON AND CROP REPORT 1992-93

## CHAPTER I

### EFFECT OF RAINFALL ON SOWING AND CROP GROWTH

During the current year premonsoon showers were received in some parts of south madhya Maharashtra and Marathwada region and in one or two places of Konkan and Vidarbha region in last week of May. These premonsoon showers were beneficial for undertaking preparatory tillage operations.

During the current year the commencement of southwest monsoon was delayed by about a week. Southwest monsoon arrived in Konkan region on 18 th June and entire State was covered up to 20 th June. Light to heavy and widespread rains were received in most parts of the state during the second and third week of June. Besides the delay in the arrival of monsoon it was feeble in parts of Thane, Raigad and eastern parts of Nagpur region. Sowing of kharif crops was started in different parts of the State in the second-third week of June. So also, sowing of paddy and nagli nursery was started in Konkan division. As compared to the last year intensity of monsoon was feeble except 18th to 24th June in parts of the State when widespread and heavy to very heavy rains were received in most parts of the State. Those rains facilitated sowing of kharif crops.

There was break in rains in most parts of the State from 25th June, to 10th July' 1992. Due to these adverse climatic conditions sown kharif crops particularly crops on light soil were adversely affected to some extent and sowing of kharif crops was held up as it was feared that resowing of kharif crops particularly on light soil will have to be done due to inadequate soil moisture. However, much awaited rains were received from 11th July in different parts of the State and were beneficial for improving the condition of standing kharif crops as well as resuming the remaining sowing. Due to receipt of those rains transplanting of paddy was also started in Konkan, Western parts of Kolhapur, Satara, Pune and Nasik districts and eastern parts of Nagpur region. Due to dry spell as stated above kharif crops particularly on light soil in parts of Buldhana, Akola and Amaravati districts of Amaravati division and few pockets of Nagpur division have been harrowed up and resowing had been

done in this area due to rains from 11th July onwards. Again widespread good rains were received in most parts of the State in the month of August and were continued till 9th September' 1992. These rains were helpful for improving the condition of standing kharif crops and completing the transplanting of paddy in Thane, Raigad districts of Konkan, western parts of Ghat region and eastern parts of Nagpur region. At this stage the condition of Kharif crops was reported to be satisfactory in different parts of the State.

Fortunately there was a break in rains from 10th to 27th September' 1992 in most parts of the State. Due to this break the condition of kharif crops was improved. Again from 28th to 30th september' 1992 light to medium rains were received in Konkan and Ghat region. Very heavy rains were also recorded in Velhe and Purandhar tahasils of Pune district. These rains were beneficial for standing kharif crops and for sowing of rabi crops particularly in Pune division. The Sowing of rabi crops was in progress in Pune division.

During the first week of October weather was intermitently cloudy and light to medium rains were received in some parts of Konkan and madhya Maharashtra region. Again during the second week of October light to heavy rains were received in most parts of the State which facilitated rabi sowing in different parts of the State.

During the month of November weather was mostly dry in Konkan and Vidarbha regions, while it was cloudy in madhya Maharashtra and Marathwada regions. Light to medium rains were received in some parts of madhya Maharashtra and Marathawada regions particularly from 17th to 21st November' 1992. These rains were beneficial for proper growth of sown rabi crops.

Weather was mostly dry and cold during the month of December' 1992 and January' 1993 and no rains were received in the State.

There was a severe cold spell in last week of December' 1992 and early January' 1993. Again there was cold spell in third week of February' 1993. This cold

spell helped in improving condition of wheat and gram crops.

Harvesting of kharif crops was completed in November and picking of cotton in December while harvesting of Tur crop was in progress in different parts of the state.

Sowing of rabi crops was over in the State and it was completed to the extent of 90% by mid of January' 1993. Condition of irrigated rabi crops was reported to be satisfactory while condition of rainfed rabi crops particularly on light soil was reported to be unsatisfactory due to inadequate soil moisture. Hailstorm occurred in last week of February' 1993 and first week of March, in parts of Jalgaon, Nanded, Buldhana, Akola, Amaravati, Yavatmal,

Wardha, Nagpur and Bhandara districts. Due to this hailstorm, standing crops viz. tur, wheat, gram, sunflower were affected to some extent.

Sowing of summer crops like summer paddy and summer ground nut was completed by end of January' 1993 in Konkan division and that of summer groundnut and summer sunflower was mostly completed in rest parts of the State by end of February' 1993. Condition of summer crops was reported to be satisfactory. Harvesting of summer crops was mostly completed in the State by end of June' 1993.

Table - I in this report gives districtwise rainfall in millimeters pertaining to rainfall centers in Maharashtra for the year under report i.e. 1992-93.

---

## CHAPTER - II

### LAND UTILISATION

(Table "II", Pages 48 to 49)

(Summary Table "A" and "A-I" Pages 8 to 9)

#### Number of villages :-

The number of villages in the State was 43,827 as against 43,529 during the preceeding year. The increase was due to the formation of new villages.

#### Total Geographical Area :-

Geographical area in the State was 307.58 lakh hectares.

It can be seen from Summary Table A-I that out of total Geographical area 180.20 lakh hectares was net cropped area which showed an increase of 0.7 per cent. The total cropped area during the year under report was 211.89 lakh hectares as against 201.33 lakh hectares in the preceeding year showing an increase by 5.2%. The area sown more than once increased from 22.39 lakh hectares in 1991-92 to 31.68 lakh hectares during the year under report

showing an increase of 41.5 %.

The area under current fallows showed a slight decrease of 7.7% over that of the last year. But the area under forest and permanent pasture showed a slight increase of 0.2% and 3.7% respectively. The area under non-agricultural use showed a slight increase of 1.8%. However the area under barren and unculturable land and culturable waste land showed a decrease of 2.7% and 1.9% as compared to the preceeding year. The area under miscellaneous trees and grooves also increased during the year under report by 1.5%.

The Summary Table A-I gives the district wise details of percentage area under each of the category under ninefold classification in each district of the State.

---

## CHAPTER - III

### IRRIGATED AREA

(Table III, Pages 50 to 65)

Summary Table "B" and "C" Pages 10 to 12)

Source of water supply and area irrigated therefrom is presented in summary table "B".

During the year under report the number of wells used for irrigation purpose (other than tube wells) increased by

7.1% having gone up from 10,68,239 in 1991-92 to 11,44,406 in 1992-93. But the number of wells used for domestic purpose showed a decrease of 1.9% in the year under report over last year.

The net area irrigated in the State decreased by 1.2% having gone down from 27.13 to 26.80 lakh hectares during the year under report. The gross irrigated area however remains practically the same having gone down from 32.52 to 32.61 lakh hectares during the year under report 1992-93.

During the year under report, the percentage of net area irrigated to net area sown in the state was 14.9 which was 15.2 during the last year, while that of gross irrigated area to gross area sown was 15.4 as against 16.2 during the last year.

#### Sourcewise net and gross irrigated area:-

The net irrigated area by surface irrigation decreased by 3.9% during the year under report as compared to the previous year. So also the net area irrigated by wells increased by 0.3% as compared to the year 1991-92.

The gross irrigated area by surface irrigation in the State decreased by 0.4% while the gross irrigated area by well irrigation increased having gone up from 212.12

lakh hectares to 213.44 lakh hectares.

The total irrigated area under surface irrigation constituted 34.6% to the total irrigated area while total area irrigated by wells was 65.4% of the total irrigated area.

The crop wise irrigated area during 1992-93 is presented in Summary Table "c" alongwith the corresponding area in 1991-92. It can be seen that out of the total irrigated area of 32.61 lakh hectares the irrigated area under food crops occupied a large share of 28.55 lakh ha. or 87.5 % while the remaining area of 4.06 lakh ha. or 12.5% under non-food crops.

The Table III-A gives districtwise information regarding number of wells, oil engines, electric pump and percentage of net irrigated area to net area sown and gross irrigated area to gross area sown, while Table III-B gives cropwise irrigated area and percentage of area irrigated by surface irrigation and by well irrigation in each district of Maharashtra State.

## CHAPTER - IV CROPPED AREA

(Table IV-A, IV-B & IV-C pages 66 to 89)  
Summary table "D, D-I, D-II & D-III " pages 13 to 21)

Gross cropped area, area cropped more than once and area under various food and nonfood crops are shown in summary table "D".

From this table it can be seen that the gross cropped area increased by 5.2% during the year under report having gone up from 201.3 lakh hectares to 211.9 lakh hectares. The net cropped area however showed a slight increase of 0.7% during the year under report as compared to the preceeding year. The area sown more than once increased from 22.39 lakh hectares in 1991-92 to 31.68 lakh hectares or by 41.5%.

During the year under report the total area under food crops increased by 6.6% so also the area under nonfood crops increased by 2.0%.

This increase in area under food crops is mostly due to increase in area of cereals viz.. wheat by 6.0%, jowar by 8.3%, bajri by 1.7% and pulse crops viz..gram by 37.0%. The area under condiments and spices also showed an increase of 21.1% during the year under report.

In case of nonfood crops, the increase in area is mostly due to increase in area of almost all edible oil seeds except kharif groundnut which was decreased by 14.6 % as compared to year 1991-92. But all the remaining oil seed

crops showed increase as compared to the preceeding year viz.. safflower 63.2 % soyabean 38.0 %, rape and mustard 35.3 %, sunflower 19.1 % and summer groundnut by 11.5 % respectively.

Out of the total cropped area in the State the percentage covered by certain categories of crops is indicated below :

Crop	Area (in "00" Ha.)	Percentage area to Total cropped area.
Rice	15700	7.4
Kh. Jowar	28528	13.5
Rabi Jowar	30679	14.5
Bajri	19313	9.1
Wheat	6838	3.2
Total cereals	105954	50.0
Gram	5935	2.8
Tur	10250	4.8
Total pulses	33861	16.0
Total foodgrains	139815	66.0
Ground nut	6584	3.1
Total Oilseeds	25734	11.0
Cotton	25743	12.1
Sugarcane	5385	2.5

District wise details pertaining to the above table are

given in table D-II showing cropwise percentage of area to total cropped area in each district.

Thus it can be seen that out of the total cropped area in the State 66.0% area was covered under food grain crops. The area under cotton however decreased by 6.7 % as compared to the last year. The above categories put together covered about 91.6% area of the total cropped area while rest of the crops i.e. condiments, spices, fruits, vegetables, drugs, narcotics and fodder crops etc. covered remaining 8.4% area.

Table "D-I" shows percentage area under major

foodgrain crops to total area under foodgrain crops in each district.

Table "D-II" shows cropwise percentage of area to total cropped area in each district.

Table "D-III" gives districtwise percentage of area under principal crops to State level area under corresponding crop.

Districtwise area under food and nonfood crops are presented in Table IV-A and Table IV-B respectively while Table IV-C gives seasonwise classification of area in each district of Maharashtra State.

## CHAPTER - V

### AVERAGE YIELD AND OUT TURN OF CROPS

(Table V-A & V-B, Pages 90 to 101)

Summary Table "E" & "F", Pages 22 to 23)

The overall seasonal condition during the year 1992-93 was favourable as compared to 1991-92. As a result the production of food grains remarkably increased by 69.5% or from 83.40 lakh tonnes to 141.4 lakh tonnes during the year under report. This increase was due to increase in productivity which increased from 634 Kg/ha. to 1012 Kg/ha. showing an increase of 59.7 %. The increase in production was in all the major cereals and pulses like wheat, rice, ragi, jowar, bajri, maize, gram tur, mung, udid and kulthi etc.

The pulse production during the year under report also showed an increase of 94.8 percent which doubled as compared to the previous year having gone up from 9.5 lakh tonnes to 18.5 lakh tonnes during the year under report. The major increase was shown in gram 46.2%, tur 63.8%, kulthi 70.8%, Mung 176.0 % udid by 187.5 respectively.

This increase in production was because of most favourable climatic condition all the year round and timely and proper action taken by the Department regarding input supply and technical guidance.

The table below gives the contribution of various crops in the production of foodgrains during the year under report.

From this table, it can be seen that the major contribution to foodgrain crops come from jowar (both kharif and rabi) and which accounts to 47.5% being the most important crop of the State followed by rice (total) 16.9 percent.

Crop	Outturn ('00" M. Tonnes)	Percentage outturn to total outturn of foodgrain crops.
Rice (Total)	23968	16.9
Bajri	17910	12.7
Ragi	2044	1.5
Kharif Jowar	50676	35.8
Rabi Jowar	16586	11.7
Wheat	8003	5.7
Other cereal crops	3797	2.7
Gram	3014	2.1
Tur	5904	4.2
Other pulse crops	9536	6.7
<b>Total</b>	<b>141438</b>	<b>100.0</b>

In case of sugarcane, the production in terms of cane showed a decrease of 14.7%, during the year under report, having decrease from 364.6 lakh tonnes to 311.1 lakh tonnes in 1992-93 mainly due to decrease in productivity.

Similarly in case of cotton the production increased from 11.6 lakh bales to 18.9 lakh bales during the year under report.

The total oilseed production was 17.6 lakh tonnes and showed an increase of 61.1% as compared to the preceeding year. This increase was mainly observed in groundnut (kharif and summer), sesamum, rape, mustard, nigerseed, safflower, sunflower and soyabean.

## CHAPTER - VI PRICES

(Table VI, Pages 102 to 105)  
(Summary Table "G", Page 24)

The State level average farm harvest prices of all commodities during the year 1992-93 were less than those of the preceeding year.

Increase in production and decrease in demand appears to be the main reason for lower prices of some commodities during the year 1992-93. However prices of paddy, ragi and gram were increased slightly due to increase in demand while prices of potato, gur and castor seed were increased due to decrease in production.

The scheme for monopoly purchase of cotton was

continued during the year 1992-93 and average monopoly purchase price of cotton during the year was Rs. 849.00 per quintal as against Rs. 736.30 of preceeding year.

The price of tobacco was reported only from one centre in Kolhapur and was higher than that of the last year.

The State level farm harvest prices are given in Summary table "G" and districtwise prices are shown in Table No. VI.

## CHAPTER - VII AGRICULTURAL WAGES

(Table VII, Pages 106 to 117)  
Summary Table "H" & "H-1", Pages 25 to 26)

According to the Revenue accounts Manual Agricultural labour is classified under three categories.

[1] Skilled labour, [2] Field labour and [3] Other agricultural labour.

Skilled labour comprises of carpenters, blacksmiths and cobblers while field labour includes ploughmen, sower, transplanter, weeders, reapers, harvesters and other agricultural labours including load carrying hamals, well diggers, assistants of masons and carpenters, earth workers etc.. One more category of labour viz.. herdsmen whose main work is to take the livestock owned by different owners to the wood lands or forests for grazing

is also included in Table -VII on Agricultural wages.

Main Table - VII, of this report gives districtwise and month wise figures of average daily wages of different classes of agricultural labours.

Summary Table "H" gives the State level information on wages in the different months during the year 1992-93 alongwith the corresponding information for the year 1991-92 and Summary table "H-1" gives districtwise information on wages for the year 1992-93.

The Table below gives the daily wages of different types of labours at the State level for the two years i.e. 1991-92 and 1992-93.

### AGRICULTURAL WAGES (DAILY)

(Figures in Rs. and Paise)

Year	Skilled labour			Field labour			Other Agril labour		
	Carpenter	Black smith	Cobbler	Male/	Female	Children	Male	Female	Herdsmen
1991-92	42.74	38.64	34.09	22.45	16.21	11.88	21.82	15.85	19.80
1992-93	45.11	42.38	36.84	24.71	17.93	13.10	23.55	17.37	22.69

It is seen from the above table that wages for all the categories of labour during 1992-93 were higher than those of 1991-92.

**CHAPTER - VIII**  
**AGRICULTURAL STOCK**

*(Table VIII, Pages 118 to 131)*  
*(Summary Table 'I', Pages 27 to 30)*

Table VIII of this report gives the details of livestock, poultry, agricultural machinery and implements as per quinquennial census of livestock and agricultural machinery conducted in 1992 by the Commissioner, Commissariat of Animal Husbandry, Government of Maharashtra.

Summary Table "I" gives total number of livestock, poultry, agricultural machinery and implements at State level and the comments on the same are briefly given below.

**1. Cattle :**

The number of cattle increased to 1,74,41,008 from 1,69,83,266 in 1992 showing an increase of 2.7%. This includes cross breed and indigenous cattle both of which the cross breed cattle showed an increase from 12,04,574 to 17,69,333 i.e. by 46.9% during the year 1992, where as the indigenous cattle decreased by 0.7%. The total cross breed male increased from 3,11,990 to 3,83,992 showing an increase of 23.1%. Similarly cross breed female showed an increase of 55.2% from 8,92,584 to 13,85,341. The crossbreed female cattle in milk showed an increase of 56.6% .

**2. Buffaloes :**

The total number of buffaloes recorded an increase of 14.6 % during 1992 having gone upto 54,47,238 from 47,55,317 in 1987. The number of male buffaloes also increased from 8,83,130 in 1987 to 10,01,820 or by 13.4%. Similarly female buffaloes showed an increase of 14.8%. The female buffaloes in milk showed an increase of 12.50% from 15,99,556 to 17,99,093 during the

livestock census conducted in 1992.

**3. Sheep And Goats :**

The number of sheep and goats increased by 7.0 and 8.1 % respectively as compared to the corresponding number in the previous census during 1987.

**4. Horses And Ponies :**

The total number of horses and ponies declined by 5.9 per cent during 1992 as compared to that in 1987. The number of mules, donkeys and pigs showed an increase of 6.2 % and 11.9 % respectively. Whereas the number of cammels decreased by 48.1 per cent. The number of total livestock recorded an increase of 6.2 per cent during the year 1992 over that of the last census year i.e. 1987.

**5. Poultry :**

The total Number of poultry showed an increase of 29.6 %.

**6. Agricultural Machinery And Implements :**

The number of tractors increased by 44.4%. So also the tractor operated impliments increased by 32.1% as compared to 1987.

There was an increase in Ghanis (both power and nonpower) by 48.8% over that of the previous census. The number of wooden and iron ploughs showed an increase of 5.6% and 14.4% respectively.

Sugarcane crusher showed an increase of 5.5% while that of plant protection equipments increased by 48.2% and electrical pump sets used for irrigation increased by 25.8% respectively as compared to the corresponding figures of the last census year 1987.

---

**SUMMARY TABLES**

**SUMMARY TABLE "A"**  
**Land Utilisaton Statistics, 1992-93**

(Area in "OO" hectares)

Sr. No.	Head of Classification	1991-92	1992-93	Percentage to total	Percentage increase (+) or decrease (-) over 1991-92
1	2	3	4	5	6
	Reporting area for the Land Utilisation Statistics (Geographical area)	307583	307583	—	—
1	Forest	51341	51447	16.7	0.2
2	Barren and Unculturable Land	16354	15906	5.2	- 2.7
3	Area under non-agricultural use	11656	11866	3.8	1.8
4	Culturable waste land	9666	9479	3.1	- 1.9
5	Permanent pastures and other grazing land	11377	11803	3.8	3.7
6	Land under Miscellaneous tree crops and grooves not included in net area sown.	2832	2874	0.9	1.5
7	Current fallow	14155	13064	4.2	- 7.7
8	Other fallows	11254	10941	3.6	- 2.8
9	Net area sown	178948	180203	58.6	0.7
10	Area sown more than once	22386	31683	10.3	41.5
	<b>Total cropped area (9+10)</b>	<b>201334</b>	<b>211886</b>	<b>68.9</b>	<b>5.2</b>

**SUMMARY TABLE - A-1**

*Statement showing percentage area under each of the nine fold classification  
in each district of Maharashtra State 1992-93*

Sr. No.	District	Forest	Barren & unculturable land	Land under non-agricultural use	Culturable Waste	Permenant Pastures & Other grazing land	Land Under Misc. trees & grooves not included in net area sown	Current Fallows	Other Fallows	Net area sown	Reported area for Land Utilisation Statistics
