## PREFACE

Reliable and up-to-date statistics is the backbone of any developmental planning and policy formulation. This has become more important in the context of economic liberalization programmes currently underway in the country. As the nodal department for the official statistics, it has been the endeavour of the Central Statistical Organisation (CSO) in the Ministry of Statistics & Programme Implementation to make available such statistics and indicators for general view. One of the various ways of serving this objective is to bring out a publication entitled "Selected Socio-Economic Statistics for India" on a regular basis. Keeping in view the utility of publication expressed by various users it has now been made an annual publication. The present issue is eighth in the series of this publication.

Efforts have been consistently made to improve the coverage, content and presentation of the publication and make it more users friendly. With this aim in view a number of new graph and charts have been incorporated. With these changes, I hope our esteemed readers will find this publication more useful and informative.

But for the active and willing support of the various data source agencies by way of supplying desired information/data with the minimum possible time lag, it would have not been possible for the CSO to bring out this publication. I sincerely thank all of them for their cooperation and hope that the same cooperation would continue in future also.

The publication has been prepared in Social Statistics Division of Central Statistical Organisation under overall supervision and guidance of Shri R.L. Narasimhan, Deputy Director General. Dr. R.N. Pandey, Joint Director, took keen initiative in enlarging the scope and quality of the publication. Shri Suraj Bhan and Shri Rajesh Bhatia, Assistant Directors, Shri Ajay Rawat and Shri Rajesh Panwar, Junior Investigators, Ms. Chandertara and Shri Gurdeep Singh, Computer (Senior Scale) sincerely put in hard work in collecting the required data and preparing the manuscript of the publication. All of them deserve my sincere thanks and appreciation.

I hope that this publication will go a long way in meeting the felt need of planners, administrators and researchers in understanding changes taking place in the social economic situation of the country. Though on our own we have been trying to improve the coverage and quality of this publication, suggestions from the esteemed readers for the same are most welcome.

New Delhi  
February 2000

K.V.Irniraya  
Secretary  
Ministry of Statistics &  
Programme Implementation

## CONTENTS

<b>TABLES</b>	<b>PAGE</b>
<b>I. POPULATION</b>	
1(a). Population totals-India & States	1-3
1(b). Mid year (as on 1 <sup>st</sup> October) estimates of population –India & States	5-6
2. Important administrative and key population Statistics, India and States.	7
3. Percentage of Male and Female population by Educational Level, 1991- All India	8
4. Population growth rates from censuses	9
5. Percentage distribution of population by sex and age groups	10
6. Rural-Urban growth of population	11
7(a). Percentage of urban population to total population - India	12
7(b). Percentage of urban population to total population - State	13
8(a). Percentage distribution of population according to village size categories in different States of India, 1991	14
8(b). Percentage of total population in rural areas by size of villages -India	15
9. Percent of total population in urban areas by size of towns - India	15
10(a). Percentage of Scheduled Castes and Scheduled Tribes in the total population – India	16
10(b). Scheduled Castes and Scheduled Tribes population according to 1991 Census - States	16
11. Density of population -India & States	17
12. Sex ratio of Indian population	18
13. Percentage distribution of migrants in different migration streams	19
14(a). Migrants (Percent) by place of last residence and sex – All India	20
14(b). Percentage Distribution of Migrant by Reasons- All India	20
15. Percentage of currently married females to all females for different age groups	21
16(a). Vital rates based on Sample Registration System by rural & urban areas - India	22
System by rural & urban areas during 1995	25
16(b). Vital rates based on Sample Registration	
17(a). Age specific mortality rates -India (Rural)	26

17(b). Age specific mortality rates -India (Urban)	27
17(c). Age specific mortality rates -India (Combined)	28
18(a). Age specific fertility rates -India	29-30
18(b) Fertility rates by background characteristics-1992-93	32
19(a). Infant mortality rates by rural and urban areas - India	34
19(b). Infant mortality rates by rural and urban areas during 1997 - States	35
20. Infant and child mortality rates by background characteristics- 1992-93	36
21(a). Expectation of life at birth by sex - India	37
21(b). Expectation of life at birth by sex - States	39
22. Percentage distribution of deaths by major cause Groups (India-Rural)	40

## **II ENVIRONMENT**

23. Availability of land	41
24. Percentage distribution of area by land use	42
25. Distribution of rural households by size class of land cultivated during agriculture year, 1993-94	43

## **III HEALTH AND FAMILY WELFARE**

26. Percentage of couples currently practicing family planning methods - India	43
27. Effective Couple Protection Rate (CPR) due to all methods as on 31 <sup>st</sup> March – India & States	45
28. Immunisation of children against specified diseases	46
29. Number of doctors and nursing personnel per one hundred thousand population	47
30. Number of beds (all types) per one hundred thousand population	48
31. Number of hospitals, dispensaries and public health centers	49
32. Facilities under the Indian system of medicine(ISM) and homeopathy (H)	51
33. Number of ISM and H (Registered Practitioner) per ten thousand population - States	52
34. Type of medical attention at birth (Percentage)	53
35. Type of medical attention at death (Percentage)	54
36. Expenditure incurred on education, health and social security and welfare services	55
37. Number of disabled persons, India	56

#### **IV NUTRITION**

38.	Average daily intake of proteins & calories	56
39.	Per capita availability of food grains and other selected commodities	57
40	Distribution of households and population by monthly per capita expenditure (Rs.) class, 1993-94	58

#### **V HOUSING AND TRANSPORT**

41.	Housing amenities	58
42(a)	Households and housing stock	59
42(b)	Number of household 1991-States	60
43(a)	Average size of the households and average number of persons per dwelling	61
43(b)	Number of households, population , number of living quarters with rural-urban break-up	61
44.	Female headed Household and their Average Seize, All India	62
45.	Type of housing structure	62
46.	Number of households, population and living quarters with details of dwellings	63
47.	Occupied housing units by number of rooms per housing units and average number of persons per room with rural-urban break-up	64
48.	Number of homeless households and population Sex-wise with rural-urban break up	65
49.	Size/classwise identified /estimated slum population 1991 - India	65
50.	Statewise identified/estimated percentage distribution of slum population according to size/class categories of cities/towns in 1991	66
51.	Per capita annual consumption of electricity and petroleum products	67
52.	Road length and motor vehicles	68

#### **VI EDUCATION**

53 (a).	Literates per thousand population - India	69
53 (b).	Literates per thousand population in 1991- States	70
54(a)	Literacy rates as estimated through variouys rounds of NSSO surveys – India and States	71
54(b).	Percentage of literates by age and sex	73
55.	Gross enrolment as percentage to the total population by age and sex	74
56.	Percentage of female students to total number of students at different levels of education	75

57.	Percentage of female teachers to male teachers at different levels of education	76
58.	Pupil-teachers ratio in schools	77
59.	Number of girls per hundred boys enrolled in schools and colleges	78
60.	Enrolment trend of females in university education in major disciplines of education	79
61.	Number of educational institutions - India	80
62.	Progress of educational institutions (selected professional courses ) – All India	81
63.	Percentage dropout in different stages of school education	82
64.	Educational composition of population by number of years of schooling	83
65.	Percentage allocation of total (Center + State) budget for education by sub-sectors of education (Revenue Accounts)	84
66.	Educational expenditure as percentage of GDP(current prices) – All India	85

## **VII SCIENTIFIC RESEARCH AND DEVELOPMENT**

67.	Stock of scientific and technical personnel	86
68(a)	Scientific manpower	87
68(b)	Distribution of Employed Scientists/Engineers by primary work Activities and sector, 1981	87
69(a).	Expenditure on Scientific research and development	88
69(b)	National Expenditure on Research and Development by sectors	89

## **VIII LABOUR AND EMPLOYMENT**

70.	Work Participation Rate as per 1991 Population Census, India & States.	90
71.	Percentage Distribution of Working Children by sex, Rural/Urban and Educational level 1991.	91
72.	Working Children by Rural/Urban and Sex, 1991	91
73.	Labour force participation rates as per various rounds of NSSO by age (percent)	92
74.	Labour force participation rates by states and union territories	95
75.	Educational composition of labour force - India (Rural/Urban)	96
76.	Labour Force Participation Rates (LFPR) for educated persons – All India	99

77.	Unemployment rates as per various rounds of NSSO by age (percent)	100
78.	Percentage distribution of workers by industry	103
79.	Distribution of Main Workers by Occupation and Education And Sex, 1981 and 1991	104
80.	Distribution of Main Workers by Industry and occupation And Sex 1991	105
81.	Distribution of household by size and number of main workers, 1981	106
82(a)	Employment in organised sector - India	106
82(b)	Employment in organised sector as on 31 <sup>st</sup> March, 1996- States	107
83.	Employment in Central Government	108
84	Percentage of Employed person who had changed the Nature of work and/or establishment by each usual status Educational level and sex, 1993-94	108
85(a).	Job seekers registered with employment exchanges - India	109
85(b).	Job seekers registered with employment exchanges during 1997 - States	111
86.	Number of enterprises and employment per Enterprise - India	112
87.	Industrial injuries - incidence rates and frequency rates	113
88.	Man-days lost per thousand workers employed in manufacturing units in the public and private sectors	114

## **IX INCOME AND CONSUMPTION**

89.	Per capita household consumption expenditure (In Rs.)	115
90	Consumption of Broad Group of items per person for a Period of 30 days (percentage) All India	116
91.	Gross national product (GNP) and per capita income	117
92(a)	Percentage of population below the poverty line - India	118
92(b).	Number and percentage of population below the poverty line by States, 1993-94 (Modified Expert Group)	119

## **X PRICES**

93.	Price Indices	120
-----	---------------	-----

## **XI MASS COMMUNICATION**

94.	Newspapers and periodicals	121
95.	Films and cinemas	122
96.	Radio and television	123

97.	Post offices and telephones	124
98.	No. of electors and percentage voting in various general elections	125
99.	No. of persons contesting and elected in various general elections	127

## **XII PUBLIC ORDER AND SAFETY**

100.	Disposal of crimes under the Indian Penal Code	130
101.	Juvenile Delinquency	131
102	Suicide rate in India	132

## **XIII INTERNATIONAL COMPARISONS**

103.	Human Development Index of selected developed and SAARC Countries	134
104.	Gender related development Index of selected developed and SAARC Countries	136
105.	Population, Area, Density and percentage of urban Population to total population of Selected Countries	137
106.	Gender empowerment measure	138
107.	Trends in Human development	139
108.	Child Survival and development	140
109.	Health profile of SAARC Countries	141

<b>EXPLANATORY NOTES</b>	<b>142-152</b>

- \* The reference date in 1971 census was 1 April 1971. In working out the decadal variations for 1961-71 and 1971-81 the change in reference date in 1971 census has been taken into account.
- \*\* In 1981 Census the reference date was 1 March 1981 in all states except Jammu and Kashmir where it was 6 May 1981. No Census was conducted in Assam in 1981. However the interpolated population of Assam has been taken into account in calculating the growth rates.
- @ The 1991 census in J & K could not be conducted. However, the projected population has been taken into account for the state in calculating the growth rate of All India.

\$ While working out the density of India, Jammu & Kashmir has been excluded as comparable figures of area and population are not available for the state.

@ The 1981 census could not be held in Assam, therefore, for calculating the density of India & Assam, the population figures for 1981 for Assam as worked by interpolation have been taken.

For working out the density of India and J&K, the entire area and population of those portions of J&K which are under illegal occupation of Pakistan and China have not been taken into account.

\* The 1991 census was not held in J&K. For calculating density of India and J&K, the population figures of 1991 for J&K as projected by standing committee of experts in population projections (Oct, 1989) have been taken.

**Table 12 : Sex ratio of Indian Population**

Source : Annual Reports of National Nutrition Monitoring Bureau (NNMB), Hyderabad

+ Results are based on Repeat Surveys conducted earlier during 1975-79 to study changes in consumption and nutritional situation.

@ During 1983 the surveys were conducted on a sub-sample of NSSO 'Central' sample in only four states viz. Andhra Pradesh, Gujarat, Orissa and Tamil Nadu

\* Report of NNMB(1993) During the years 1991 & 1992, surveys were conducted on a sub-sample of NSSO 'Central' sample in the states of Kerala, Tamil Nadu, Karnataka, Andhra Pradesh, Maharashtra, Gujarat, Orissa and West Bengal

Note: During 1981 and 1982, the NNMB surveys were incomplete and hence the results not reported.

\*\* Report of NNMB (1996) represents the simple average at state level estimates of consumption for the State of Kerala, Tamil Nadu, Karnataka, Andhra Pradesh, Maharashtra, Gujarat, Madhya Pradesh, Orissa.

! During 1996-97 Second Repeat Surveys were conducted in the State of Kerala, Tamil Nadu, Karnataka, Andhra Pradesh, Maharashtra, Gujarat and Orissa (NNMB II Repeat Survey)

Source :	National Sample Survey Organisation									
Note :	Figures relate to usual status of individuals. Figures for the year 1972-73 and 1977-78 relate to the population aged five years and above while figures for the year 1983 and 1987-88 relate to the population aged 15 years and above. Thus the figures relating to 1983 , 1987-88 and 1993-94 would be slightly reduced if the persons in the labour force in the age group of 5-14 are included in the estimation.									

### Educational Composition of Rural Female Labour Force

a Data refer to the most recent year available during the period specified in the column heading

b data refer to the cumulative reported AIDS cases among adults and children.

c Data refer to 1993 or a year around 1993.

## EXPLANATORY NOTES

### POPULATION

**Table 4 -** The three types of growth rates have been calculated as follows:-

Annual arithmetic growth rate

$$(r_a) = \frac{P_{t+10} - P_t}{P_t} \times \frac{1}{10}$$

Annual geometric growth rate

$$(r_g) = \text{antilog} \left( \frac{1}{10} (\log P_{t+10} - \log P_t) \right) - 1$$

Annual exponential growth rate

$$[\log P_{t+10} - \log P_t]$$

$$(r_e) = \frac{[\log P_{t+10} - \log P_t]}{10}$$

where  $P_t$  = Initial population.

$P_{t+10}$  = Population after 10 years

**Table 6 -** An urban area is defined as follows:

- (a) All statutory towns i.e. all places within a municipality, corporation, municipal board, cantonment board or notified town area committee etc.
- (b) All other places which satisfy the following criteria:
  - (i) a minimum population of 5,000
  - (ii) at least 75% of male working population engaged in non-agricultural pursuits; and
  - (iii) a density of population of atleast 400 persons per square kilometre (1000 per sq. mile)

The urban criterion of 1981 varies slightly from that of 1961 and 1971 censuses. In that the males working in activities such as fishing, logging etc. were treated as engaged in non-agricultural activities whereas in 1981 they were treated as on par with cultivators and agricultural labourers. The definition adopted in 1991 census was similar to that of 1981 census.

**Table 10. -** The statutory lists of Scheduled Castes ( SC ) and Scheduled Tribes ( ST ) are notified in pursuance of Articles 341 and 342 of the

constitution. These lists have been modified, amended or supplemented from time to time. From the 1951 census onwards the census questionnaire contains items of enquiry to ascertain whether the respondent belongs to SC or ST and if yes, the name of the caste/tribe to which he belongs.

**Table 11-** Density of population is defined as the number of persons per square kilometer.

**Table 12.-** Sex ratio is defined as the number of females per thousand males in the population.

**Table 14.-** A person is considered to be a migrant if his/her place of enumeration (Village/town) is different from the last (previous) usual residence. The usual residence for the purpose of census is taken to be the person staying continuously for a period of six months or more. However, the visit of married women (staying sometimes more than six months) to their parents house for child birth or for any other reason are not considered as migratory movement. Again, movement from one locality to another within the same town or village is not considered as migration.

**Table 16-** The Sample Registration System of the Registrar General is a dual record system with the primary objective of providing reliable estimates of birth and death rates for rural and urban areas. The field operations consist of continuous enumeration by local part-time enumerators. Once in six months the supervisory staff, who are full timers, conduct a retrospective survey to arrive at an independent set of vital events which are then matched. The unmatched and partially matched events are re-verified in the field.

Crude Birth rate(CBR) is defined as the number of live births per thousand population in a given year.

Crude Death Rate(CDR) is defined as the number of deaths per thousand population in any given year.

Natural Growth Rate = Crude birth rate- Crude death rate

**Table 17-** Age-specific mortality rate is defined as the number of deaths in specific age-group per thousand population in the same age-group in a given year.

**Table 18-** Age-specific fertility rate is defined as the number of live births in a specific age-group of women per thousand female population of that age-group.

**Table 19-** Infant mortality rate refers to the measurement of mortality in the first year of life and is computed by relating the number of deaths under one year of age to the annual number of live births.

**Table 21-** The expectation of life at birth is the average number of years expected to be lived at the time of birth if current mortality trends were to continue. These expectations are based on life table derived by comparing the population  $p(1) \times$  at age  $x$  in one census with their survivors reported at age  $p(2)_{x+10}$  in the next census. From the 10 year survival ratios, survival ratios for individual years have been estimated. For younger and older ages, special methods have been adopted. With these survival ratios ( $p_x$ ) and smoothed-age data, mortality rates ( $q_x$ ) are worked out and the life table is prepared, the last column of which gives the expectation of life at age  $x$ . The life tables are also prepared with the age-specific death-rates obtained by the Sample Registration System.

**Table 22-** The data given in this table are based on the survey conducted by the Office of the Registrar General continuously in selected sample villages having Primary Health Centre (PHC). It adopts the technique of lay diagnosis reporting employing paramedical personnel of the selected PHCs for the field work. During the year 1993, 1407 PHCs villages were covered which reported 29597 deaths. This survey is presently not being implemented in Andaman and Nicobar, Chandigarh, Daman & Diu, Lakshadweep, Mizoram and Sikkim.

## ENVIRONMENT

**Table 23-** Forest land available per person has been worked out by dividing the area under forest, as given by the Ministry of Agriculture by the population figures for the corresponding year. The figures given by the Ministry of Agriculture under Permanent pasture and other grazing land, miscellaneous tree crops and groves not included in net sown area, cultivable waste land, fallow land and net area sown have been added to obtain the total agricultural land. This was divided by the rural population figure for average availability of agricultural land for each person in rural areas.

**Table 24.-** This table presents data regarding percentage distribution of the total reported area by land use. The different categories of land utilisation are as under:-

Forest :- includes area actually under forest or land classified or administered as forests under any legal enactment.

Not available for cultivation:- is land which is absolutely barren for cultivation or uncultivable or covered by buildings, walls, roads, railways, mountains, deserts etc.

Permanent pasture and other grazing land:- cover all grazing land whether they are permanent pastures and meadows or not any village common grazing land.

Land under misc. tree crops and groves not included in net area sown:- includes all cultivable land not included under area sown but put to some agricultural use.

Cultivable waste land :- includes all land available for cultivation but not taken up for cultivation or taken up for cultivation once but not during the last five or more years.

Fallow land: all land which were taken up for cultivation but are temporarily out of cultivation for a period not less than one year and not more than five years.

Net area sown: For computing the net area sown area sown more than once has been counted only once.

## HEALTH AND FAMILY WELFARE

**Table 27** - Taking into account the attrition due to aging (going out of the reproductive age-group), mortality and in the case of IUD, additional factors of expulsions and removals, the number of couples currently protected by the different methods of family planning as a percentage of the estimated number of eligible couples in the country gives the percentage of couples currently protected.

**Table 36**- The figures used in this table are from National Accounts Statistics. Total expenditure on health, education, social security & welfare services includes both current and capital expenditure. Current expenditure includes consumption expenditure subsidies, current transfer to local authorities and other current transfer payments. Capital expenditure includes gross fixed capital formation, changes in stocks net investment in shares, capital transfer to local authorities, other capital transfer payments loans and advances to local authorities and domestic sector. The total expenditure excludes local authorities and consumption on fixed capital The expenditure under education, health etc. include expenditure on administration, regulation and research also. Per capita expenditure has been worked out by dividing the total expenditure by mid year (as on 1st Oct. ) population.

## HOUSING AND TRANSPORT

**Table 42**- A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mixed of both. Sample of unrelated households are boarding houses, messes, hotels, residential hotels, rescue homes, jails, asylums etc.. These are called institutional households.

**Table 48**- Houseless persons are those who was found to live on the roadside pavements, in hume pipes, under the staircases, in the open temples, mandumps, platforms etc. These persons are generally counted on the last day of reference period of the censuses.

**Table 49**- Figures in this table are based on the report of the Task Force on Slums constituted by the Town & Country Planning Organization (TCPO).

**Table 52-** Road length per thousand persons has been worked out by dividing the road length figures published by the Ministry of Surface Transport with the annual estimates of population worked out for various years by the office of the Registrar General of India by taking into account the population of 1981 Census. Similarly the number of registered motor vehicles per thousand has also been worked out in the same manner.

## EDUCATION

**Table 53-** A person who can both read and write with understanding in any language is considered as literate and a person who can merely read but cannot write is taken to be as literate. It is not necessary that a person who is literate should have received any formal education or should have passed minimum educational standard. For calculating the literacy rate (literate per 1000 population) the denominator is the corresponding section of the total population. For all ages(both sexes) it is the total population.

**Table 55-** Gross enrolment ratio measures what percentage of the total population in the relevant age-group is being covered by the various educational programmes being run in the country, i.e.,

$$\text{Gross enrolment ratio at stage I} = \frac{\text{Enrolment at stage I}}{\text{Population in the age group corresponding to the I stage}} \times 100$$

Two stages are: primary (Classes I-V) and middle (Classes VI-VIII).

The corresponding age-group for these stages are 6-11 years and 11-14 years respectively. Therefore, gross enrolment ratio for primary stage (I-V) is

$$\frac{\text{Total Enrolment in Classes I-V}}{\text{Total population in the age group 6-11 years}} \times 100$$

While interpreting these figures it should be noted that there may be many students outside the age-group 6-11 enrolled in classes I-V. Therefore, enrolment ratios in some age groups can be more than 100.

**Table 56-** This table gives the status of female education at different levels.

**Table 58-** The pupil-teacher ratio is defined as the average number of students per teacher for a particular type of school, e.g.,

Pupil-teacher ratio for secondary school	$\frac{\text{Total enrolment in secondary school}}{\text{Total number of teachers in secondary school}}$
--	--

**Table 63-** Dropout rate in different stages of school education

Dropout rate:

Dropout rate at primary stage during a given year is defined as the ratio of the difference of enrolment in class I in the fourth year preceding and the enrolment in class V during the year to the enrolment in the class I in the fourth year preceding. In mathematical terms, these rates for primary (I-V), middle (I-VIII) and secondary (I-X) stages are defined as:

$$\text{Drop out rates at Primary stage (I-V)} = \frac{\text{Enrolment in class I preceding four years (i.e. 1987-88) minus Enrolment in class V during the year (1991-92)}}{\text{Enrolment in class I preceding four years (i.e. 1987-88)}} * 100$$

$$\text{Drop out Rates At Middle stage (classes I-VIII) during 1991-92} = \frac{\text{Enrolment in class I preceding 7 years (i.e. 1984-85) minus Enrolment in class VIII during the year (1991-92)}}{\text{Enrolment in class I preceding 7 years (i.e. 1984-85)}} * 100$$

$$\text{Drop out rates at Secondary stage (classes I-X) during the year 1991-92} = \frac{\text{Enrolment in class I preceding 9 Year (i.e. 1982-83) minus Enrolment in class X during the year (1991-92)}}{\text{Enrolment in class I preceding 9 years (i.e. 1982-83)}} * 100$$

## LABOUR AND EMPLOYMENT

**Table 77-** NSSO surveys have adopted three different approaches to measure employment and unemployment. According to usual status approach, a person is considered as working or employed if he/she is engaged relatively for a longer time, during the reference period of last 365 days in any one or more of the work activities. He/she was considered as seeking or available for work or unemployed if he/she was not working but was either seeking or available for work for a relatively longer period of the

specified reference period. According to current weekly status, a person is considered to be employed if he/she pursues any one or more of the gainful activity for atleast one hour on any day of the previous week. On the other hand, if a person does not pursue any gainful activity but has been seeking or available for work, the person is considered as unemployed. According to current daily status, a person is considered as employed for the entire day of the reference period of one week if he/she had worked four hours or more during the day. If he had worked for one hour but less than four hours, he is considered for working as half day and seeking/available for work for other half of the day. If a person is not engaged in any work, even for one hour on the day, but was seeking/available for work for four hours or more, he is considered as unemployed for the entire day. The aggregate of day units, either half or full under different activity categories during the reference week divided by seven provides the estimates of average number of persons days by activity category during an average week over the survey period of one year.

**Table 82-** The data used in this table are based on the Employment Market Information (EMI) programme of the Directorate General of Employment and Training. The EMI covers on a statutory basis, all establishment in the public sector and all non-agricultural establishments employing 25 persons or more in the private sector. From March 1966, the coverage was increased and establishments employing 10 persons or more in the private sector were added, though on a voluntary basis. The EMI programme does not cover employment in the unorganised sectors like agriculture, self-employed persons and establishments in the private sector employing less than 10 workers.

**Table 83-** Data given in this Table is based on the census of Government Employees which is conducted every year by the Directorate General of Employment and Training (DGET). The census cover all persons actually holding on the date of census, civilian post in and under the Central Government, whose pay and allowances, honorarium, or any other remuneration etc are paid out of the consolidated fund of India.

1. Regular Staff:

(i) Permanent employees : One who holds a Central or State Governments post substantively on the date of the census.

(ii) Temporary employees: The employees who have not been declared permanent in the post he is holding or in any other substantial post.

2. Non-Regular staff:

This category of employees census includes state government employees on deputation to Central Govt., Honorary employees, besides regular work - charged employees, part time employees of the Central Govt. employees paid out of

contingencies and whole time or part time employees in Indian embassies and missions abroad including locally recruited staff subject to discharge on not less than one month's notice and employees of ad hoc committees set up by the Central Government.

Indices:

The indices in the table have been worked out for all the years by taking 1971=100 as base both for total (Regular & Non-Regular) and Regular Employees of the Central Government.

**Table 85-** The day to day registration at employment exchanges and notification of vacancies by the employers generate comprehensive information which facilitates the appraisal of the organised labour market. The statistical returns from employment exchanges relating to various characteristics of job seekers fresh or otherwise, and the demand pattern of employment in industry and service sector provide only a broad indication of the unemployment situation in the organised labour market. However, as registration is voluntary and they are located in urban areas, they cannot be deemed to cover all job seekers. Further, there are known deficiencies arising from the fact that not all the registrants would be really without a job. Moreover, the number of job seekers is not necessarily the number of unemployed persons.

**Table 87-** Under the Factories Act, statistics of injuries resulting from industrial accidents by reason of which persons affected are prevented from attending to work for a period of 48 hours or more immediately following the injury are required to be reported to the factory inspectors. For statistical purposes the number of injuries is given by the number of persons receiving injuries as a result of accidents and this number can be more than the actual number of accidents because one accident may result in injuries to more than one person. The data on injuries relate only to the factories submitting returns, as no estimates of injuries can be made for the defaulting factories.

The frequency rate of injuries is calculated by dividing the total number of injuries by the corresponding man-days worked. Incidence rate gives the injuries per thousand persons employed.

**Table 88-** An industrial dispute is taken to be a temporary stoppage of work by all employees or a group of employees of an establishment (strike) to express a grievance or to press a demand. Similarly, temporary withholding of work from a group of employees by an employer or a group of employers (lockout) in a unit in connection with matters relating to employment or unemployment or terms and conditions of employment is also taken as an industrial dispute. Only those work stoppages which involve 10 or more workers whether directly and /or indirectly are included in these statistics. The figures of man-days lost are obtained by adding up the actual resultant vacancies caused directly and/or indirectly, during work stoppage in each shift of each potential working day

(excluding weekly offs and other scheduled holidays when the establishment would have remained closed even if no work stoppage had taken place).

## INCOME AND CONSUMPTION

**Table 89**-Household consumption expenditure comprises of all expenditure incurred by the household, exclusively on domestic account, including consumption out of home-grown produce or transfer receipt like gifts, loan etc. The expenditure on household enterprises is excluded from consumer expenditure. While consumption out of transfer receipts is included, transfer payments of all kinds such as loans, gifts, charities in money or in kind like grain loan etc. are excluded. Expenditure on purchase and construction of residential houses are considered to be expenses on capital account and hence are excluded from the consumer expenditure; but the expenditure towards maintenance of residential building is included in the consumer expenditure of the household.

**Table 91**- Per capita income for a particular year is obtained by dividing the net national product at factor cost by the estimated mid-year population in that year. Since the national income is calculated for the financial year, the estimated population corresponds to mid-financial year i.e. 1st October. The estimates of per capita income corresponding to the New series had been calculated after comprehensive review of both the data base and the methodology employed in the erstwhile old series. Efforts have been made to make use of as much as possible of the current data available through various all-India surveys. Revised procedures and methodological improvements had been adopted to derive the intermediate items. The coverage of the New series had also been enlarged so as to include the state of Sikkim.

**Table 92**- Percentage of population below the poverty line is worked out on the basis of household consumption expenditure data released by the NSSO in its 50th Round report titled " Report on the 5th Quinquennial Survey on Consumer expenditure, NSSO, May, 1996".

## PRICES

**Table93** – A Consumer Price Index (CPI) measures changes over time in the general level of prices of goods and services that a population under reference, acquire, use or pay for consumption. In practice a CPI measures the cost of purchasing a representative market basket of goods and services. Four CPIs, namely CPI for Industrial Workers [CPI(IW)], CPI for Urban Non-Manual Employees [CPI(UNME)], for Agricultural labours [CPI (AL) and CPI for Rural labourers [CPI (RL)], are compiled and released on monthly basis at national level. The CSO releases CPI (UNME), whereas the other three CPIs are brought out by the Labour Bureau. The current series of CPI (IW) relate to the base 1982=100; and is compiled for 70 centres. The base year of both CPI (AL) and CPI(RL) is 1986-97=100 CPI (UNME), having the current base of 1984-85=100, covers 5f9 selected urban centres. A wholesale Price Index(WPI), on base 1981-82=100, is also released on a weekly basis with a

time lag two weeks by the office of the Economic Adviser, Ministry of Industry.

## PUBLIC ORDER AND SAFETY

**Table 100-** Percentage of cases pending investigation means cases pending investigation at the end of the year to total cases for investigation. Percentage of cases pending trial relates to cases pending trial at the end of the year to total cases for trial. Conviction percentage refers to cases resulting in conviction to total cases for which trials were completed.

**Table 101-** Earlier Juvenile boys and girls were of the same age group (i.e. below 21 years). Since 1988 Juvenile boys and girls are of different age groups (i.e. boys below 16 years and girls below 18 years)

**Table 102-** Incidence of suicides per lakh of population has been worked out on the basis of sex-wise estimated annual population supplied by the office of the Registrar General, India based on 1981 and 1991 Censuses.

## International Comparisons

**Table 103 & 106 -** Human Development Index was released for the first time by the UNDP for 30 countries of the world in 1990. The UNDP has defined human development as the process of enlarging people's choices. Income is one of those choices but it does not cover the totality of human life. Health, education, a good physical environment and freedom of action and expression are just as important. The Human Development Index (HDI), therefore, combines indicators of national income, life expectancy and educational attainment to give a composite measure of human progress. To derive the measure mathematically, first, a measure of deprivation ( $I_{ij}$ ) of each indicator ( $X_i$ ) relating to j-th country is defined as follows:-

$$I_{ij} = \frac{(\max X_{ij} - X_{ij})}{(\max X_{ij} - \min X_{ij})}$$

Then, an average deprivation indicator is estimated by simply taking the average of three deprivation indicators defined above, i.e.

$$I_j = (\sum_{i=1}^3 I_{ij}) / 3$$

and finally, HDI is defined as one minus the average deprivation index,

$$(HDI)_j = (1 - I_j)$$

### **Gender Empowerment Measure (GEM)**

The Gender related Development Index (GDI) measures achievements in the same dimensions and variables as the HDI, but captures inequalities in achievement between women and men. It is simply the HDI adjusted downward for gender inequality. The greater the gender disparity in basic human development, the lower a country's GDI compared with its HDI. The Gender Empowerment Measure (GEM) reveals whether women can take active part in economic and political life. It focuses on participation, measuring gender inequality in key areas of economic and political participation and decision making. It tracks the percentages of women in Parliament, among administrators and managers and among professional and technical workers- and women's earned income as a percentage of men's. Differing from the GDI, it exposes inequality in opportunities in selected areas.
