PREFACE

The season and crop report of 2000-2001 contains various statistical information in respect of rainfall, land utilization statistics, irrigation, area, productivity and production of various crops, farm harvest prices, agricultural wages and agricultural stock in Maharashtra State.

The main source of the information collected is revenue record maintained at village level where Talathi is the basic worker of the Revenue Department.

The main highlight of the report may be summarised as that the gross cropped area during the year 2000-2001 was 216.19 lakh hectares which is more by 1.1% than the previous year i.e. 1999-2000. The net cropped area during the year was 178.44 lakh hectares. The area under fruit crops increased by 10.5 % where as vegetable area increased by 8.6 % as compare to previous year.

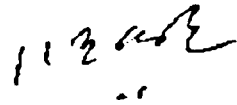

The gross irrigated area was 38.52 lakh hectares and the net irrigated area was 32.49 lakh hectares.

The total food grain production during the year 2000-2001 was 102.24 lakh tones. It shows 17.4 % decrease over previous year.

The production of Sugarcane is decreased by 40.5 % than 1999-2000. The Cotton production during the year was 17.77 lakh bales which decrease by 40.9% over last year production of 30.08 lakh bales.

The oilseed production decreased by 16.3 % in the year 2000-2001 as compared to previous year.

I hope that the report would be useful for various government officials, research workers and all other concerned.

(Dr. Krishna Lavekar)
Commissioner (Agriculture)
Maharashtra State,
Pune – 411 001

PUNE- 411 001
Date- 21/9/2007.

ACKNOWLEDGEMENT

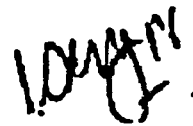

The Season and Crop Report is an important report published by the Department of Agriculture of Maharashtra State. The present report pertains to the year 2000-2001.

The rainfall data is based on daily rainfall figures received from Revenue Department. The data on land utilization, source of irrigation, area irrigated as well as total area under different crops and agricultural wages are collected from District Superintendent of Land Records. Where as the production estimates are worked out on the basis of Crop Estimation Surveys (CES) conducted on principal food and nonfood crops by the officers and field staff of Agri. Department, Revenue Department and Zillha Parishad. The data on farm harvest prices are collected from Agriculture Development Officers. The livestock data is collected from Livestock Census conducted by Commissionerate of Animal Husbandry. I would like to express my thanks to all these officers and their staff.

I am grateful to Shri. P. N. Raut Director of Agriculture (Extension and Training) for his all time inspiration and valuable guidance in preparation of Season and Crop Report.

The work of compilation and computerization was done under the able supervision of Shri. Shashikant Jadhav (Statistician) and Shri. Vijay Musale (Asst. Statistician). The statistical data processing and compilation is done by Shri. Balkrishna Barhate Agriculture Officer with the assistance of Shri. Vishwas Korhale. Agriculture Supervisor Computerisation and data entry work is done by Shri. Prakash Kharat , Verifier Operator .

I am also grateful to the officers of various departments who have directly or indirectly involved for preparation of Season and Crop Report 2000-2001.

Shri. U. D. Kunjir

Chief Statistician

Commissionerate of Agriculture

Maharashtra State, Pune - 411 001.

SEASON AND CROP REPORT 2000-01

Chapter -1

Effect of Rainfall on sowing and growth

Light to medium Pre-monsoon rains were received in all parts of the state during the month of May. Rains received was found to be beneficial for the preparatory tillage operations of Kharif crops.

Monsoon commenced in South konkan on 4th June. It reached in South Madhya Maharashtra on 5th June & in rest of Konkan more parts of Madhya Maharashtra Marathwada & in some parts of Vidarbha region on the 6th June. Monsoon reached in the rest parts of the state on 7th June.

Sowing of Paddy & Ragi in nursery was in progress in Konkan region due to receipt of satisfactory rains in first week of June. Sowing of kharif crops like Bajri, Jowar, Tur, Mung, Udid, Gr.nut, Sesamum, Sunflower, Soyabean & Cotton etc. was commenced in many parts of the state. Rains received in the month of June was 70 % to 80 % of normal rainfall in Thane, Satara, Kolhapur districts while it was 62 % & 67 % respectively in Amaravati & Gondiya districts. Rains received in Yavatmal, Wardha & Raigad districts was nearly normal while rest of the 25 districts received above normal rainfall. There was break in rains from 10th June to 28th June in most parts of the state. Growth of kharif crops was affected & sowing of kharif crops was held up due to break in rains. Kharif crops on light & medium soils were showing the sign of withering growth of many kharif crops was stunted. Sowing of kharif crops was held up in many parts of the state.

However rains again started in most parts of the state from 29th June. Rains received was beneficial for the survival of the kharif crops which were withering due to insufficient rains. Condition of kharif crops was improving due to receipts of rains. Tansplanting of Paddy & Ragi was commenced in Konkan, Nasik & Kolhapur divisions. Similarly sowing of kharif crops was in progress. Germination & growth of sown crops was reported to be satisfactory. However there was again break in rains from 22nd July. But rains received in the month of July was above normal in 15 districts while in 12 districts received 75 % to 100 % rains of the normal & 6 districts received 50 % to 75 % of the normal rainfall. Transplanting of Paddy & Ragi was held up in some parts of the state due to break in rainfall from 22nd July. Remaining sowing of kharif crop was also affected. Crops on light soils was also affected & growth of those crops stunted. Yield of kharif crops may go down to some extent due to dry spell. Medium to heavy rains again started in most parts of the state from 8th & 9th August These rains were beneficial for the survival of the kharif crops, and was beneficial for the standing kharif crop But intensity of rainfall again reduced from 14th August & hence rains were needed in most parts of the state. Rains restarted from 20th & 23rd August in most of the parts of the state. Sowing of kharif crops was completed except transplanting of paddy crops. Transplanting of paddy was nearly completed. Interculturing operations in kharif crops were in progress. Rains received in month of August was above normal in 13 district, normal in 10 districts, below normal in 7 districts. Rains received in Dhule, Nandurbar & Jalgaon districts was below 50 % of the normal rainfall. In general present condition of kharif crops was reported to be

satisfactory but yield of all kharif crops may go down to some extent due to dry spell.

Rains received in the month of September was above normal only in Sangli & Kolhapur districts and 3 districts received 50 % to 80 % of the normal while remaining all districts received below 50 % of the normal rains. At state level kharif crops sowing was completed to the extent of 102 %. Rains required urgently in all parts of the state for the proper growth of standing of kharif crops as well as for the sowing of rabi crops. Harvesting of Mung & Udid was in progress. Harvesting of kharif crops was started in many parts of the state. Preparatory tillage operations of rabi crops was in progress in harvested areas. Sowing of rabi crops was commenced in parts of Pune, Kolhapur & Aurangabad divisions.

Rains received in the month of October was above normal in 3 districts only & 9 districts received 70 % of the normal rains. One district received between 50 % to 70 % of the normal rains while rest of all districts received below 50 % of the normal rainfall. Growth of kharif crops was affected due to long dry spell. Yield of kharif crops may go down to some extent. Harvesting of kharif crops was in progress. Sowing of rabi crops was in progress & completed to the extent of 62 % till the end of October. Rabi sowing area may go down to some extent due to inadequate soil moisture.

Rains were not received in the month of November. Harvesting of kharif crops was nearly completed. Picking of Cotton was in progress. Sowing of rabi crops was in progress where the irrigation facilities are available. At state level rabi sowing was completed to the extent of 78 % till the end of November. Growth of rabi crops was also affected in some parts of the state due to inadequate soil moisture & long dry spell. Unirrigated rabi crops which sown on light soils withered due to inadequate soil moisture. At state level sowing of rabi crops was completed to the extent of 85 %.

Light and medium rains were received in few parts of Vidarbha region & in one or two places of Marathwada region during 1st to 5th March.

The targets of the area to be sown in kharif was nearly achieved. It is estimated that the production target could be reached to the extent of 60 % targets in respect of kharif foodgrains, 58 % in respect of oilseed, 92 % in respect of Sugarcane & 41 % in respect of Cotton were achieved.

The rabi season in the state was also not satisfactory. It is estimated that the production of rabi foodgrains may be achieved to the extent of 60 % where as rabi oilseed may achieved up to 52 % of the targets.

Sowing of summer crops was in progress in different parts of the state. At state level sowing of summer crops was completed to the extent of 72 %. Germination & growth of sown summer crops was reported to be satisfactory. The targets of the area to be sown in summer could not be achieved due to inadequate irrigation facilities in the state.

CHAPTER II

LAND UTILISATION

(Table II)

The number of villages in the state was 44120.

Geographical area.

Geographical area in the state is 307.58 lakh ha. It can be seen from summary tables A that out of the total geographical area 178.44 lakh ha. was net cropped area which shows a increase of 1.0 % as compared to the preceding year. The total cropped area during the year under report was 216.19 lakh ha. showing an increase of 1.1%. The area sown more than once, increased by 1.5 % i.e. from 37.20 lakh ha. to 37.74 lakh ha. during the year 2000-2001.

The area under current fallow shows a decrease of 7.3 % where as the area under other fallow shows an decrease of 5.4 % i.e.

- from 13.50 lakh ha. to 12.77 lakh ha. during the year 2000-2001. The area under non agricultural use shows a slight increase of 0.3% as against the preceding year, where as the area under culturable waste land remained same . The area under forest land shows a increase of 0.3 % against the last year where as the area under barren and unculturable land remained same i.e .15.44 lakhs ha.

The summery table A-1 gives the districtwise details of percentage area under each of the category in nine fold classification in each district of Maharashtra State.

CHAPTER III

IRRIGATED AREA

(Table III)

Irrigated area and source of water supply is mention in summery Table 'B'

Sources of irrigation:

During the year under report, the number of wells used for irrigation purpose (other than tube wells) increased by 0.6 % having gone up from 1310280 to 1317982 in 2000-2001.

The number of oil engines & electric pumps showed a slight increase as 2.9% & 2.2% respectively as compared to 1999-2000.

Sourcewise Net and Gross Irrigated Area:

During the year under report the percentage of net irrigated area to net area sown was 18.2 . While that of gross irrigated area to gross area sown was 17.8 % which was 18.1 % during last year.

The net irrigated area by surface irrigation decreased by 2.4 % as compared to last year. Where as the net area irrigated by wells decreased by 1.0 %.

The area irrigated by surface irrigation constituted 30.4% of the total irrigated area where as area irrigated by well comprises of 69.6%.

The cropwise irrigated area during 2000-2001 is presented in summary Table - 'C' along with the corresponding area in 1999-2000 .It can be seen that out of total irrigated area of 38.52 lakh ha. in the state, the irrigated area under food crops occupied a large share of 34.09 lakh ha. i.e. 88.5 % while remaining 4.43 lakh ha. i.e. 11.5 % under non food crops.

The Table III-A gives districtwise information responding number of wells, oil engines, electric pump sets and percentage of net irrigated area to net area sown and gross irrigated area to gross area sown, while Table III-B gives cropwise irrigated area and percentage to area irrigated by surface irrigation and well irrigation in each district of the state.

---0---0---0---0---

CHAPTER – IV CROPPED AREA

(Table IV -A, IV-B, & IV-C)

Gross cropped area, area cropped more than once and area under various food crops and non food crops are shown in summary table ' D '. It can be seen from this table that the gross cropped area increased by 1.1 % during the year under report as compared to the previous year i.e. 1999-2000. having gone up from 213.82 lakh ha. to 216.19 lakh hectares. The net cropped area increased from 176.62 lakh hectares to 178.44 lakh.

The increase in area of food crops was seen in cereals showing increase of 2.8 %, having gone up from 95.65 lakh hectares to 98.28 lakh hectares. This increase was seen in Jowar(Total) 7.7 % Bajri 5.0 % & Maize (Total) 17.1 % respectively. While decrease in Wheat by 26.4 %.

In case of pulses the area increased slightly by 1.2 % over the preceding year. The area under condiments and spices showed increase of 4.3 % during the year under the report.

In case of non food crops, the area remain same as the preceding year. The area under edible oil seed decreased by 2.5 %. Whereas area under Coconut increased by 14.7 % while, Safflower area is decreased by 11.2 % & Sunflower also decreased by 17.9 % and Soyabean increased by 9.3 % as compared to last year.

Out of the total cropped area in the state, the percentage covered by certain categories of crops is indicated below.

Crop	Area ('00"ha.)	Percentage area to total cropped area.
Rice	15115	7.0
Kharif Jowar	19096	8.8
Rabi Jowar	31839	14.7
Bajri	18009	8.3
Wheat	7549	3.5
Total cereals	98284	45.5
Gram	7892	3.7
Tur	10965	5.1
Total pulses	36063	16.7
Total Foodgrains	134347	62.1
Groundnut	4939	2.3
Total oil seeds	25867	12.0
Cotton	30815	14.3
Sugarcane	6801	3.1

The area cropped more than once also increased by 1.5 % having gone up from 37.20 lakh ha. to 37.74 lakh ha. during the year under report.

During the year under report, the area under food crops increased by 2.7 % . So also the area under non- food crops decreased by 2.4 % as compared to the previous year.

Thus it can be seen that, out of the total cropped area in the state 62.1 % area was covered under foodgrain crops. Rabi jowar and Cotton covered comparatively larger area of 14.7% and 14.3 % respectively to the total cropped area. The above categories put together covered about 91 % area to the total cropped area. While rest of the crops i.e. condiments and spices, fruits, vegetables, drugs & narcotics and fodder crops etc. covered remaining 9 % area.

Table D-1 gives districtwise percentage of area under principal food grain crops to total area under food grain crops in each district of Maharashtra state.

Table D-2 shows cropwise percentage of area to total cropped area in each district of the state.

Districtwise percentage of area under principal crops to state level area under corresponding crops is shown in table D-3.

The districtwise area under food & non food crops is presented in table IV-A & IV-B respectively. While table IV-C gives seasonwise classification of area in each district of Maharashtra state.

---0---0---0---0---

CHAPTER - V

AVERAGE YIELD AND OUT TURN OF CROPS

(Table V-A & V-B)

For most of the crops during the year 1999-2000 the season was unfavorable as compared to last year. As a result the production of food grains showed a decrease of 8.5 % having gone down from 128.64 lakh tones to 117.74 lakh tones during the year under report. This decrease was seen in mostly Kh.Jowar, Bajari, Wheat & Tur crops.

Season and Crop Report 2000-2001.

The table below gives the contribution of various crops in the production of food grains during the year 2000-2001.

Crop	Out turn M.Tones	Percentage out turn to total out turn of food grain crops.
Rice(Total)	19637	19.2
Bajari	10877	10.6
Ragi	1297	1.3
Kharif Jowar	23899	23.4
Rabi Jowar	16063	15.7
Wheat	9475	9.3
Other cereals	4026	3.9
Gram	4121	4.0
Tur	6668	6.5
Other pulses	6176	6.1
Total	102239	100.0

From the table, it can be seen that the major contribution to food grain crops comes

from Kharif and Rabi Jowar which accounts to 39.1% being the most important crop of the state, followed by Rice 19.2 percent.

In case of Sugarcane, the production in terms of cane showed decreased of 7.1 % having gone down from 533.32 lakh tones to 495.70 lakh tones during the year under report.

However in case of Cotton the production decreased by 40.9 % as compared to the last year that is from 30.08 lakh bales to 17.77 lakh bales.

The total oil seed production decreased from 25.84 lakh tones to 21.66 lakh tones, showing decrease of 16.2 % as compared to the previous year. This decrease in production was mainly due to decrease in productivity of Groundnut (kharif & summer) , Seasamum, Rapeseed & Mustard, Linseed etc.

---0---0---0---0---
CHAPTER - VI
PRICES
 (Table VI)

The state level average farm harvest prices of most commodities during the year 2000-2001 were nearly same as that of preceding year i.e. 1999-2000

The scheme for monopoly purchase of Cotton was continued in the state during the year 2000-2001. The monopoly purchase prices of Cotton are as follow's ...

Year	Monopoly purchase Prices Rs.	
	Variety	
	H - 4	L R A
1999-2000	2,300	2,175
2000-2001	2,300	2,175

The price of Tobacco was reported only from Kolhapur district and was higher than that of the last year.

The state level farm harvest prices are given in summary table G and districtwise prices are given in table VI for the year 1999-2000 and 2000-2001.

CHAPTER - VII AGRICULTURAL WAGES

(Table VII)

According to the Revenue Accounts Manual Agricultural Labour is classified under three categories viz. Skilled labour, Field labour and Other agricultural labour.

Skilled labour comprises of carpenters, blacksmiths and cobblers while field labour ploughmen, reapers, sowers, transplanter, weeders, harvesters and other agricultural labour includes load carrying hamals, well diggers, assistants of masons and carpenters, earth workers etc. One more category of labour viz. Herdsmen whose main work is to take the livestock owned by different owners to the woodlands of forests for grazing is also included in table VII on agriculture wages.

Table- VII, of the report gives districtwise & monthwise figures of average daily wages of different classes of agricultural labours, Summary table H gives the state level information on wages in the different months during the year 1999-2000 and 2000-2001. Summary table H-1 gives average daily wages paid to agricultural & skilled labour in each district of state for the year under report.

The table below gives the daily wages of different types of labours at the state level for the two years i.e. 1999-2000. and 2000-2001.

AGRICULTURAL WAGES (DAILY)

Year	Skilled labour			Field labour			Other Agril. Labour		
	Carpenter	Black smith	Cobbler	Male	Female	Children	Male	Female	Herdsman
1999-2000	81.23	72.70	62.91	51.62	38.62	24.51	44.52	33.80	44.93
2000-2001	82.23	73.54	64.04	52.80	40.24	25.03	45.77	34.94	45.59

It is seen from the above table that wages for all the categories of labour during 2000-2001 were higher than those of 1999-2000.

---0--0--0--0---

CHAPTER – VIII
AGRICULTURAL STOCK

(Table VIII)

Table VIII of this report gives the details of livestock, poultry, agricultural machinery and implements as per quinquennial census of livestock and agricultural machinery conducted in 1997 by the Commissioner, Commissionerate of Animal Husbandry, Government of Maharashtra Pune.

Summary Table – I gives total number of livestock poultry, agricultural machinery and implements at state level and the comment on the same are briefly given below.

1.Cattle : The number of cattle decreased to 15614653 from 17441008 in 1997 showing an decrease of 10.5 percent. This includes cross breed and indigenous cattle both of which the cross breed cattle showed an increase from 1769333 to 2456884 i.e. by 38.9 percent during the year 1997, where as the indigenous cattle decreased by 0.4 %. The total cross breed male increased from 383992 to 578137 showing an increase of 50.6 %. Similarly cross breed cows showed an increase of 35.6 % from 1385341 to 1878747. The cross breed cows in milk showed an increase of 33.7 % .

2.Buffaloes : The total number of buffaloes recorded an increase of 11.5 % during 1997 having gone up to 6072688 from 5447238 in 1992. The number of male buffaloes also increased from 1001820 in 1997 to 1065010 or by 6.3 %. Similarly female buffaloes showed an increase of 12.6 %. The female buffaloes in milk showed an increase of 19.5 % from 1799093 to 2150753 during the livestock census conducted in 1997.

3. Sheep and Goats : The number of sheep and goats increased by 9.5 % and 15.0 % respectively as compared to the corresponding number in the previous census during 1992.

4. Horses and Ponies : The total number of horses and ponies increase by 4.9 % during 1997 as compared to that in 1992. The number of mules, and donkeys showed an decrease of 2.6 % and Pigs 51.1 % respectively. Whereas the number of camels increased by 1036.3 %.

The number of total livestock recorded an increase of 8.9 % during the year 1997 over that of the census 1992.

5. Poultry : The total number of poultry showed an increase of 10.0 %.

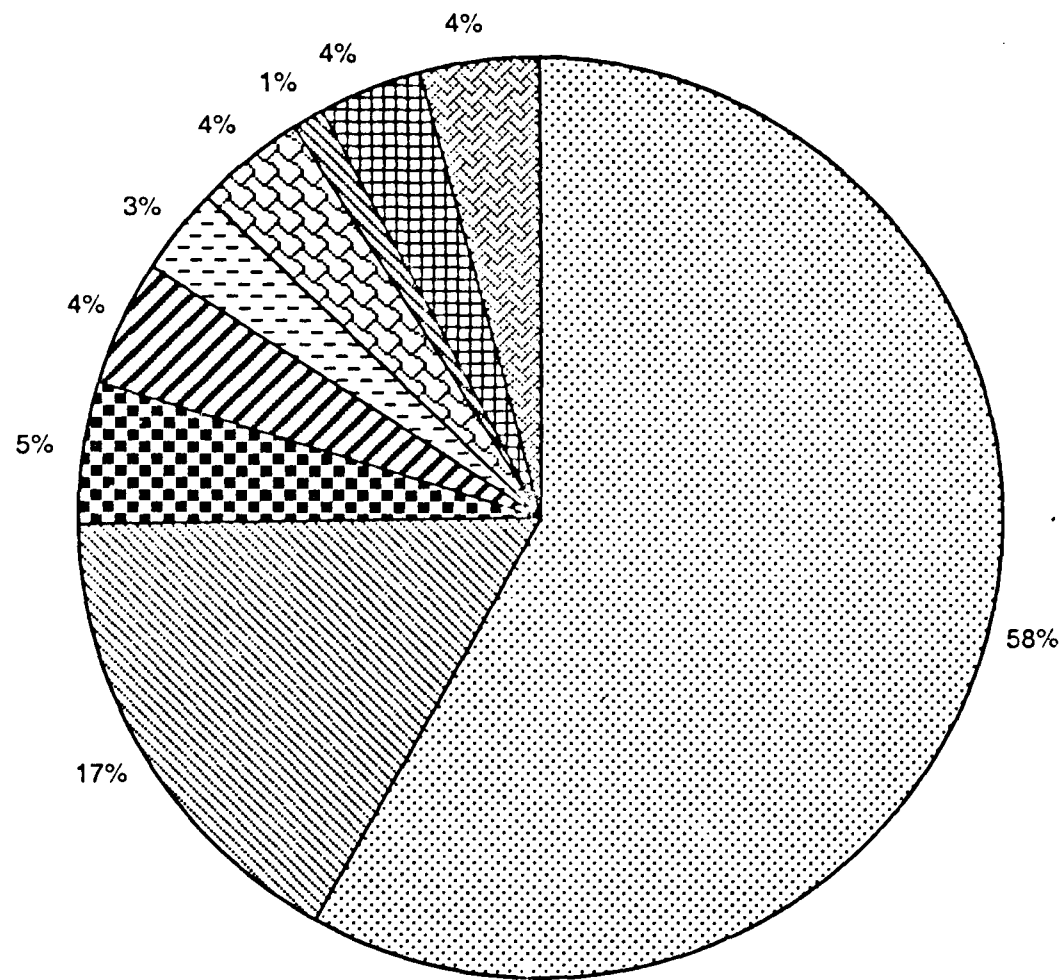

6. Agricultural Machinery and Implements : The number of tractors increase by 74.5 % so also the tractor operated implements decreased by 36.03 % as compared to 1992. There was an increase in Ghanis (both power and non-power) by 56.4 % over that of the previous census. The number of wooden and iron ploughs showed decrease of 27.9 % and 36.86 % respectively .

Sugarcane crusher showed an increase 17.45 % while that of plant protection equipment's increased by 28.0 % and electrical pump sets used for irrigation purpose increased by 12.9 % as compared to the corresponding figures of the census year 1992.
