# SEASON AND CROP REPORT OF THE STATE OF MAHARASHTRA FOR THE YEAR 1966-67

## CHAPTER I SEASON

The agricultural season of 1966-67 was characterised by uneven distribution of rains which proved also to be inadequate in some parts with intervening prolonged break at the critical crop growth stages affecting kharif crops to a varying extent whereas the season was favourable to rabi crops in many parts of the State. In view of the damage caused by the continuous drought in the kharif season, the Government declared existence of scarcity in a large number of villages in parts of Thana, Nasik, Jalgaon, Dhulia, Poona, Amraoti, Akola, Yeotmal and Bhandara districts. The scarcity conditions that prevailed during the year under report were, however, of much less severity than those of the previous year when the total rainfall itself was far below the normal, affecting both the kharif and rabi crops as well.

2. *Distribution of rainfall.*—Table 1 (pages 50 to 53) compares the rainfall during the year under report with the normal rainfall of each district headquarter station in the State. The figures of normal rainfall for each station are those supplied by the India Meteorological Department. The following observations are made from a study of this table.

*Pre-monsoon rains.*—The pre-monsoon showers were below the normal in Kolaba, Buldhana and Akola districts, while they were above the normal in the rest of Vidarbha districts, all districts of Poona and Aurangabad divisions and Ratnagiri, Dhulia and Jalgaon districts.

*Monsoon rains.*—The monsoon rains were above the normal in Sholapur, Aurangabad, Buldhana and Chandrapur districts. They were below the normal in districts of Bombay Division, all districts of Poona division except Sholapur district, all districts of Marathwada except Aurangabad and all districts of Vidarbha except Buldhana and Chandrapur districts.

*Post-monsoon rains.*—The post monsoon rains were below normal in the predominantly kharif tract of Kolaba, Amraoti, Wardha and Chandrapur districts and the rabi areas of Ahmednagar, Poona, Satara, Sholapur, Aurangabad, Parbhani, Nanded and Nagpur districts. They were above normal in Ratnagiri, Dhulia, Jalgaon, Sangli, Bhir, Osmanabad, Buldhana, Akola, Yeotmal and Bhandara districts.

*Winter rains.*—The winter rains were above the normal in Dhulia, Satara, Sangli, Aurangabad, Nanded and all districts of Vidarbha except Yeotmal. They were below the normal in Ratnagiri, Jalgaon, Ahmednagar, Poona, Parbhani, Bhir, Osmanabad and Yeotmal districts.

*Total rainfall for the season 1966-67.*—The total rainfall for the season 1966-67 was below the normal at all the Head Quarter stations except Dhulia, Sangli, Sholapur, Aurangabad, Buldhana and Chandrapur districts.

### 3. *Monthwise description of the season.*—

*April and May.*—Pre-monsoon thundershowers were received scattered over the State and they proved to be particularly heavy in May. Mango crops was damaged to some extent in parts of Ratnagiri district. The rain facilitated preparatory tillage operations for the kharif season in the State.

*June.*—The monsoon set in later than usual in the State. The rains received in Konkan districts though below normal were just adequate for sowing of paddy crop in the nurseries whereas sowing of Kharif crops could not be undertaken according to schedule on a large scale in the rest of State due to inadequate rains. The condition of germinated crops was not satisfactory particularly in areas of light soil. Withering of cotton and groundnut crops was reported particularly from Vidarbha districts while paddy seedlings in seed beds suffered in Bhandara and Chandrapur districts of the Vidarbha. More rains were needed for the healthy growth of crops where sown and for undertaking large scale sowing operations in the State.

*July.*—The rains received in the first fortnight of the month proved to be scanty in most parts of the State. As a result sowing of crops was held up at some places while transplanting of paddy was delayed in the Konkan districts. The rains received during the latter half of the month were, however, widespread and beneficial for completing the kharif sowing wherever delayed and for undertaking paddy and nagli transplanting in Konkan districts and Mawal area of the Deccan region while transplanting of paddy was started in the eastern parts of Vidarbha region. Resowing of cotton was carried out in parts of Amravati district while paddy crop was resown at places in parts of Nagpur district. The condition of germinated crops was satisfactory in the State.

*August.*—Sufficient rains were received in the first week of the month in Konkan districts and in the districts of Nasik, Dhulia and Kolhapur which facilitated transplanting of paddy seedlings while the

rains elsewhere were inadequate and scanty till the 3rd week of the month. Growth of paddy seedlings in light soils, bajri, cotton and groundnut was stunted. The crops were on the verge of withering. The rains received in the last week of the month, however, arrested further deterioration of the growth of the crops to some extent. Paddy transplanting in districts of Vidarbha was nearly over while sowing of kharif jowar was completed in parts of Nagpur district. The delayed monsoon and further break in rains, however, resulted in the reduction of area under cotton to some extent in parts of Nagpur Division and Osmanabad district of Aurangabad division. Harvesting of mung was in progress in Osmanabad and Bhir districts, while preparatory tillage operations for the rabi season were undertaken in parts of Sholapur, Aurangabad and Nanded districts.

*September.*—Rains were received all over the State but they proved to be inadequate for midlate and late varieties of paddy in the Konkan. Standing kharif crops elsewhere on the verge of withering needed more rains for their healthy growth. The rains, however, proved beneficial for the sowing of rabi crops particularly rabi jowar and germination of early sown crops was satisfactory in the rabi areas of the Deccan and Marathwada regions. Harvesting of mung was over while that of early paddy, udid, bajri and groundnut was in progress in the State. Preparatory tillage operations for the rabi season were in progress in Vidarbha region.

*October.*—Dry spell continued to prevail in many parts of the State except in Konkan and parts of Poona Division during the month. The rains received were, however, light and inadequate. Kharif jowar, bajri, cotton, groundnut and kharif pulses were affected to a varying extent in many parts of the State while late paddy in Konkan and paddy in nearly 50 per cent of the area in Bhandara suffered much due to dry spell during the critical phase of the crop growth. Immediate rains were needed to arrest deterioration of the standing kharif crops in many parts of the State. Even rabi crops recently sown were also affected in parts of Parbhani district in Marathwada division. Harvesting of kharif crops was in full swing while picking of cotton commenced in the last week of the month. Sugarcane crushing was started in some parts of the State. Sowing of rabi jowar was nearly over in areas of sufficient moisture while that of wheat and gram was started at some places in the State.

*November.*—Widespread rains were received in the second week of the month in the State. The rains affected the standing kharif jowar and cotton in parts of the State. Even groundnut and paddy were

also affected to a varying extent in parts of Satara, Sangli and Kolhapur districts particularly on the river banks due to floods caused by heavy rains accompanied by storm in the area. In Ratnagiri districts, unprecedented heavy damage to the horticultural crops was reported due to cyclone on 13th November 1966. The rains proved very beneficial to rabi jowar which was otherwise on the verge of withering. Sowing of unirrigated wheat, gram and other rabi crops was facilitated and they proved helpful for the growth of all the rabi crops. Harvesting of bajri was over while that of paddy, nagli, kharif, jowar and groundnut was in progress. Picking of cotton was also in progress.

*December.*—Stray showers were received in parts of different districts in the State except in the Konkan region. Sowing of rabi crops like wheat and gram was over in Dhulia, Ahmednagar, Kolhapur, Nanded, Bhandara and Chandrapur districts and that of summer paddy in Kolaba and Ratnagiri districts. More area was brought under rabi crops in Bhandara and Chandrapur districts due to opportune rains and the rabi crops were thriving well except in parts of Nasik district. Harvesting of paddy and groundnut was over while that of kharif jowar and tur and picking of cotton were in progress.

*January.*—There were practically no rains in any parts of the State except in parts of Vidarbha region where the rains received in the 1st week affected the kharif crops at the maturity stage at a few places, while they proved beneficial to rabi crops particularly in Wardha district. Crop condition was reported to be unsatisfactory in Chandor, Yeola and Sinnar talukas of Nasik district. Elsewhere the condition of rabi crops was satisfactory. Cold weather prevailed in most parts of the State. Sowing of summer paddy in Kolaba and Ratnagiri districts was over. Harvesting of kharif jowar and tur was in progress in Vidarbha region. Cotton picking was in progress particularly in Marathwada and Vidarbha regions.

*February.*—There were practically no rains in any part of the State. The weather was dry and cold. Harvesting of rabi crops was in progress all over the State while picking of cotton was over in Marathwada region. Harvesting of tur was nearly over while that of cotton was in progress in Vidarbha region. Preparatory tillage operations for the next season were in progress at places in the State. The condition of standing rabi crops as also summer paddy was satisfactory.

*March.*—Few showers were received in parts of the Konkan, Deccan and Marathwada regions. Rains accompanied by hailstorms received in parts of the Vidarbha region to some extent affected fruit gardens and vegetable plantations and standing rabi crops were

damaged in Bhandara and Chandrapur districts. Harvested produce was also affected in parts of Wardha and Nagpur districts while harvesting of wheat was held up in the affected areas of Wardha district. Harvesting of rabi crops was nearly completed all over the State except that the of irrigated wheat at a few places in the State. Picking of cotton was almost over in the Vidarbha region. Preparatory tillage operations for the next seasons were in progress. The conditions of irrigated crops was satisfactory.

4. *Incidence of pests and diseases.*—Catter pillar attack on paddy seedlings was reported in parts of Thana district in June. In August attack of Stemborer on paddy was reported in parts of Ratnagiri district. Paddy crop was also affected by blight in the Vidarbha region. Incidence of aphids on groundnut was reported in Dhulia, Buldhana, Akola, Yeotmal and Wardha districts and thrips on cotton in Dhulia and Amraoti districts was reported. Cotton was also affected by aphids and jassids in Amraoti and red leaf in Yeotmal district. In September, attack of army-worms on paddy in Nasik district and wingless grasshoppers on bajri in the northern part of Ahmednagar district was reported. Incidence of aphids on groundnut and cotton in Dhulia district, aphids and tikka on groundnut in Nanded district and aphids and jassids on cotton in Buldhana district was noticed. Pyrilla on sugarcane was reported in Buldhana and Nanded districts. In October, an attack of army-worms was reported on paddy in Bhandara district while "chikta" disease was noticed on kharif jowar in Nagpur district. Rust attack on wheat was reported in Madha taluka of Sholapur district in November and January while in Nasik, Bhir, Wardha and Nagpur districts it was observed in January, 1967. Incidence was reported of catter pillar on gram in Nasik district, "Chikta" on rabi jowar in Sholapur district and red bugs on cotton in Yeotmal district in January. Wheat rust was reported in February, in parts of Jalgaon, Nasik, Sholapur (Malshiras Taluka), Satara, Sangli (Jath taluka), Osmanabad and Wardha districts. Chilly crop was affected by "churdo-murda" in Chandrapur district while rabi jowar was affected by "Chikta" in Satara district. In March wheat was affected by rust in parts of Nasik district.

Prompt remedial measures were adopted in the case of the crops infested with pests and diseases in the affected areas of the State. Campaigns for aerial spraying on cotton in the affected areas of Akola, Buldhana and Amaravati districts and on rabi-jowar in Poona district were specially organised.

---

## CHAPTER II

### AREA CULTIVATED AND UNCULTIVATED

(Table II Pages 54-55)

(Summary Table-A Page 36)

5. *Number of villages.*—During the year under report, the number of villages in the State was 38,823 as against 38,898 during the preceding year thus showing a decrease of 75 villages. The decrease was due to amalgamation of smaller villages with bigger ones in Kolaba, Nasik and Jalgaon districts. Out of the 75 amalgamated villages, 66 were in Kolaba district alone.

6. *Total area.*—The total area i. e. the geographical area of Maharashtra State according to village papers was 7,60,32,900 acres during the year under report as against 7,60,32,100 acres during the preceding year thus showing a marginal increase of 800 acres. The change in the geographical area was due to the more accurate information available for Sholapur district.

7. *Cropped areas.*—The gross cropped area in the State, showed a slight increase of 1.2 per cent over that of the previous year, it being 4,74,22,100 acres and 4,68,82,500 acres during 1966-67 and 1965-66 respectively. The net cropped area also showed an increase of 0.4 per cent having increased to 4,50,06,800 acres during 1966-67 from 4,48,08,300 acres during 1965-66. The acreage under forests, land put to non-agricultural uses, culturable waste and current fallows showed a decrease of 0.1 per cent, 1.2 per cent, 8.6 per cent and 4.7 per cent respectively while the acreage under barren and unculturable land, permanent pastures and other grazing lands, land under miscellaneous tree crops and groves not included in area sown and other fallows recorded an increase of 0.7 per cent, 0.5 per cent, 6.9 per cent and 3.3 per cent respectively over the corresponding figures of the previous year. The area sown more than once recorded an increase of 20.8 per cent having increased from 20,74,200 acres during 1965-66 to 25,05,900 acres during the year under report. The increase was mainly noticed in Thana, Jalgaon, Ahmednagar, Poona, Sholapur, Buldhana, Nagpur and Bhandara districts of the State.

## CHAPTER III

### IRRIGATED AREAS

(Tables III-A and III-B, pages 56-68)  
(Summary Tables B and C, Pages 37-40)

8. *Sources of water supply.*—During the year under report, the number of Government canals was 625 as against 612 in the previous year, thus recording an increase of 13 canals or by 2.1 per cent. There was, however, a decrease in the mileage of these canals from 2,588 to 2,372 i. e. by 8.3 per cent. The number of private canals increased from 7,604 in 1965-66 to 7,643 in 1966-67 i. e. by 0.5 per cent, while the mileage of these canals showed a decrease of 2.0 per cent, the same having gone down from 5,163 in 1965-66 to 5,058 in 1966-67. The number of tube wells recorded an increase of 75.0 per cent, the same having gone up from 200 in 1965-66 to 350 in 1966-67. The number of wells (other than tube wells) used for irrigation purposes increased from 6,10,708 in the year 1965-66 to 6,26,757 in 1966-67 i. e. by 1.6 per cent. Number of wells used for domestic purposes, number of wells not in use, number of wells having independent ayacuts and number of wells supplementing recognised sources of irrigation increased by 0.9 per cent, 18.4 per cent, 34.2 per cent and 0.4 per cent respectively. Number of reservoir, however, remained the same as that in the preceding year. The number of tanks with ayacut 100 acres or more showed an increase of 66.2 per cent while that of tanks with ayacut less than 100 acres showed a decrease of 1.2 per cent. The number of oil engines recorded an increase of 10.3 per cent, having gone up from 97,061 in 1965-66 to 1,10,026 in 1966-67. The increase was mainly due to special crop campaign programmes launched on a large scale both on the part of Government and Zilla Parishads in the State.

9. The total irrigated area in the State was 34,92,400 acres during the year under report as against 34,29,800 acres during 1965-66 thus recording an increase of 1.8 per cent. The net irrigated area during the year 1966-67 was 30,07,700 acres and it showed an increase of 0.9 per cent over that of 29,80,800 acres in the previous year. During the year under report, the percentage of net area irrigated to the net area sown was 6.7 per cent which was the same as that of last year and that of the gross area irrigated to gross area sown was 7.4 per cent as against 7.3 per cent in the preceding year.

10. *Net area irrigated under different sources of irrigation.*—The area irrigated by Government canals, private canals, and wells decreased by 10,900, 2,500 and 30,900 acres or by 2.0 per cent, 3.4 per cent and 1.7 per cent respectively. On the other hand, area irrigated by tanks and other sources increased by 56,600 and 14,600 acres or by 12.0 per cent and 10.4 per cent respectively.

11. *Irrigated areas under food and non-food crops.*—Out of the total irrigated area during the year under report, 32,28,200 acres were under food crops and 2,64,200 acres under non-food crops. Area irrigated under food crops showed an increase of 4.0 per cent over that of the previous year, the area in 1965-66 and 1966-67 being 31,02,900 acres and 32,28,200 acres respectively. The rise was appreciable in the case of rice, bajri, mug, tur and miscellaneous food crops mostly under fruits and vegetables, the irrigated acreage under these crops having gone up by 16.4 per cent, 62.6 per cent, 25.4 per cent 21.2 per cent and 20.4 per cent respectively. The appreciable increase in the acreage of the food grain crops was attributed to special crop campaigns and hybrid and high yielding varieties programme undertaken in the State and partly to higher prices for tur.

During the year under report, the area irrigated under non-food crops declined to 2,64,200 acres from 3,26,900 in the year 1965-66 or by 19.2 per cent. The decrease in the irrigated acreage was mainly shared by cotton, groundnut, sesamum, castor, tobacco and miscellaneous non-food crops, the irrigated acreage under these crops having gone down by 7.9 per cent, 46.1 per cent, 26.0 per cent, 57.1 per cent, 32.1 per cent and 52.5 per cent respectively.

---

## CHAPTER IV

### CROPPED AREAS

(Tables IV-A, IV-B and IV-C pages 69-95)

(Summary Table D, pages 41-43)

12. *Total area under crops*:—The accompanying table (at page 10) gives areas under food and non-food crops, the gross cropped area, area sown more than once, net cropped area and area under principal crops for each division and for the state during the years 1965-66 and 1966-67. The gross cropped area during the year under report was 4,74,22,100 acres having gone up by 5,39,600 acres or by 1.2 per cent as compared to the area in the year 1965-66. In respect of the divisions, the gross cropped area was 86,14,000 acres in Bombay division, 1,35,72,900 acres in Poona division, 1,24,66,800 acres in Aurangabad division and 1,27,68,400 acres in Nagpur division and was more than that of the previous year by 1.2 per cent, 0.9 per cent, 0.7 per cent and 2.2 per cent in Bombay, Poona, Aurangabad and Nagpur divisions respectively.

The area sown more than once (mainly under double cropping) showed an increase of 16.4 per cent during the year under report having gone up from 20,74,200 acres during 1965-66 to 24,15,300 acres during 1966-67. The increase was noticed in the divisions of Bombay, Poona, and Nagpur to the extent of 19.4 per cent, 30.4 per cent and 27.8 per cent respectively while it decreased in Aurangabad division by 3.8 per cent. The net cropped area during the year under report was 4,50,06,800 acres and was higher by 1,98,500 acres or by 0.4 per cent than the corresponding area of 4,48,08,300 acres during the preceding year. The increase was shared by Aurangabad and Nagpur divisions to the extent of 1.0 per cent and 1.3 per cent respectively while in Bombay and Poona divisions the area decreased very slightly over the corresponding figures in the previous year.

For the state as a whole, food crops occupied an area of 3,40,02,100 acres or 61.7 per cent of the total gross cropped area while the remaining 1,34,20,000 acres (i.e. 38.3 per cent) were brought under non-food crops. The State area under food crops showed an increase of 2.8 per cent or by 9,17,200 acres while the area under non-food crops decreased by 2.7 per cent or by 3,77,700 acres as compared with the corresponding figures of the preceding year.

The table below gives the area under food and non-food crops in all the divisions of the State during the years 1965-66 and 1966-67.

(Area in '00' acres)

| Division   | Food Crops |          |   | Non-food Crops |          |   |
|------------|------------|----------|---|----------------|----------|---|
|            | 1965-66    | 1966-67  | Percentage increase (+) or decrease (-) | 1965-66        | 1966-67  | Percentage increase (+) or decrease (-) |
| 1          | 2          | 3        | 4                                       | 5              | 6        | 7                                       |
| Bombay     | 60,233     | 63,451   | + 5.3                                   | 25,105         | 22,689   | - 9.6                                   |
| Poona      | 1,05,637   | 1,06,804 | + 1.1                                   | 29,189         | 28,925   | - 0.9                                   |
| Aurangabad | 87,443     | 89,096   | + 1.9                                   | 36,308         | 35,572   | - 2.0                                   |
| Nagpur     | 77,530     | 80,670   | + 4.0                                   | 47,975         | 47,014   | - 0.8                                   |
| State      | 3,30,843   | 3,40,021 | + 2.8                                   | 1,37,977       | 1,34,200 | - 2.7                                   |

It is seen that the area under food crops increased by 3,21,300 acres, 1,16,700 acres, 1,65,300 acres and 3,140 acres or by 5.3 per cent, 1.1 per cent, 1.9 per cent and 4.0 per cent in Bombay, Poona, Aurangabad and Nagpur divisions respectively as compared to the corresponding areas of the previous year. The area under non-food crops declined in all the divisions viz., Bombay, Poona, Aurangabad and Nagpur by 9.6 per cent, 0.9 per cent, 2.0 per cent and 0.8 per cent or by 2,41,600 acres, 26,400 acres, 73,600 acres and 36,100 acres respectively.

13. *Food crops.*—Among the main food crops, the area under rice increased by 81,500 acres or by 2.5 per cent during the year under report as compared with that of last year. The increase was shared by all the divisions except Bombay, Aurangabad where the area decreased by 0.5 per cent, 11.9 per cent. The area under wheat crop also increased by 0.8 per cent or by 16,300 acres. The increase was noticed in Poona and Nagpur divisions by 6.5 per cent and 2.9 per cent respectively while in Bombay and Aurangabad divisions it decreased by 4.1 per cent, 0.9 per cent respectively. The area under kharif jowar recorded an increase of 1.2 per cent having gone up from 64,33,800 acres in 1965-66 to 65,12,600 acres in the year 1966-67. This increase was shared by the divisions of Bombay, Aurangabad and Nagpur it being 4.3 per cent, 0.8 per cent and 2.3 per cent respectively while in Poona division it declined by 32,500 acres or by 4.6 per cent. The area under rabi jowar slightly decreased by 0.3 per cent having

gone down from 85,33,100 in 1965-66 to 85,11,600 acres during the year 1966-67 the decrease being due to reduction in the area in Poona division to the extent of 12,39,900 acres or by 2.3 per cent. An increase was, however, noticed in the other divisions to the extent of 23.1 per cent, 0.3 per cent and 2.2 per cent in Bombay, Aurangabad and Nagpur divisions respectively. Area under bajri recorded an increase of 10.4 per cent having risen from 45,16,300 acres in the year 1965-66 to 49,87,300 acres in 1966-67. The increase was shared by all the divisions to the extent of 10.9 per cent, 10.3 per cent, 10.0 per cent and 11.2 per cent. Area under all cereal crops together during the year 1966-67 was 2,66,15,100 acres as against 2,59,71,600 acres during the previous year, thus showing an increase by 2.5 per cent. Area under pulses also increased by 5.2 per cent having gone upto 60,61,200 acres in 1966-67 from 57,62,000 acres during 1965-66. This increase was due to the increase in area of all the pulses crops except the area under masur which was decreased by 1.7 per cent. Summing up, it is seen that the total area under food grains increased by 9,42,700 acres or by 2.9 per cent.

Area under sugarcane decreased by 37,500 acres or by 8.9 per cent having declined from 4,23,100 acres during 1965-66 to 3,85,600 acres in the year 1966-67.

14. *Non-food crops*.—Among the non-food crops the area under cotton showed a decrease of 2,50,900 acres or by 3.7 per cent over the corresponding area of the previous year. This decrease was shared by all the divisions to the extent of 9.2 per cent, 7.3 per cent, 5.9 per cent and 1.4 per cent in Bombay, Poona, Aurangabad and Nagpur divisions respectively as compared with the corresponding area last year. The area under groundnut also showed a decrease of 12.6 per cent or by 3,49,000 acres having gone down from 27,60,900 acres during the year 1965-66 to 24,11,900 acres during 1966-67. The decrease in the area was noticed in all the divisions to the extent of 29.5 per cent, 6.3 per cent, 6.1 per cent and 9.4 per cent in Bombay, Poona, Aurangabad and Nagpur divisions respectively as compared to the corresponding area last year. During the year under report the area under tobacco increased by 1,100 acres or by 3.4 per cent and this increase was noticed to the extent of 5.1 per cent in Poona division while in Aurangabad division the area decreased by 18.2 per cent or by 400 acres. In the other two divisions, the area remained the same as the corresponding area last year.

## CHAPTER V

### OUTTURN OF CROPS AND THEIR AVERAGE YIELDS

(Tables V-A and V-B pages 96-138)  
(Summary Tables D and E, pages 41-44)

15. *Outturn of crops.*—The table below gives the total outturn in tons of kharif and rabi crops, in four divisions of the State.

(Figures in hundreds).

| Division   | Kharif crops |        |        | Rabi crops |        |        | Total   |        |        |      |
|------------|--------------|--------|--------|------------|--------|--------|---------|--------|--------|------|
|            | Cereals      | Pulses | Total  | Cereals    | Pulses | Total  | Cereals | Pulses | Total  |      |
|            | 1            | 2      | 3      | 4          | 5      | 6      | 7       | 8      | 9      | 10   |
|            | Tons         | Tons   | Tons   | Tons       | Tons   | Tons   | Tons    | Tons   | Tons   | Tons |
| Bombay ... | 9,165        | 1,144  | 10,309 | 1,728      | 119    | 1,847  | 10,893  | 1,263  | 12,156 |      |
| Poona —    | 7,064        | 1,265  | 8,329  | 9,567      | 329    | 8,896  | 15,631  | 1,594  | 17,225 |      |
| Aurangabad | 4,884        | 1,894  | 6,778  | 7,129      | 544    | 7,673  | 12,013  | 2,438  | 14,451 |      |
| Nagpur     | 9,661        | 1,973  | 11,634 | 2,829      | 283    | 3,112  | 12,490  | 2,256  | 14,746 |      |
| State ...  | 30,774       | 6,276  | 37,050 | 20,253     | 1,275  | 21,528 | 51,027  | 7,551  | 58,578 |      |

From the above table, it is seen that at the state level the production of cereals and pulses was 58,57,800 tons of which 37,05,000 tons was of kharif crops while the remaining 21,52,800 tons was contributed by rabi crops. The production of cereals alone was 51,02,700 tons while that of pulses was 7,55,100 tons. Amongst the divisions the total production of cereals and pulses was the highest viz., of the order of 17 lakh tons in Poona division followed by Nagpur and Aurangabad divisions the total production of each of which was of the order of 14 lakh tons. For the remaining division of Bombay, the production was of the order of 12 lakh tons.

The remarks in respect of major crops are given below:—

*Rice.*—The rains received in June were just adequate for large scale sowing operations of paddy in the Konkan districts and in parts of Bhandara and Chandrapur districts of Vidarbha region. Due to

inadequacy of rains during growth period, paddy seedlings suffered particularly in the paddy growing areas of Vidarbha. Due to scanty rains in the first fortnight of July, transplanting of paddy seedlings was delayed in the Konkan districts till second fortnight of July where wide-spread and adequate rains were received. Resowing of paddy was carried out at places in parts of Nagpur district. Paddy transplanting was over in Konkan and paddy growing areas of Deccan region on receipt of sufficient rainfall during the first week of August while that in eastern parts of Vidarbha was nearly over by the last week of August when adequate rains were received in the area. Due to inadequacy of rains in September, midlate and late varieties of paddy were affected particularly in Konkan districts. In October, due to dry spell during the critical phase of crop growth, late paddy in Konkan and paddy in nearly 50 per cent of the area in Bhandara district suffered appreciably. Due to gusty winds accompanied by heavy rains in November, standing paddy crop in fields in river side area was damaged to some extent in Satara, Sangli and Kolhapur districts. Incidence of catter pillar was reported on paddy seedlings in parts of Thana district. Attack of stemborer was reported in parts of Ratnagiri district while the crop was affected by incidence of blight in Vidarbha region. The crop also suffered from army worm attack in Nasik and Bhandada districts.

On the whole, the condition of the paddy crop in the State was not satisfactory during the year under report.

The area under the crop increased from 32,65,000 in 1965-66 to 33,46,500 acres in 1966-67 or by 2.5 per cent. The production increased from 8,70,300 tons in 1965-66 to 10,35,500 tons in 1966-67 or by 19.0 per cent, the increase being due to the fact that the condition of the crop in the preceding year was poor due to abnormal scarcity conditions which prevailed that year.

*Wheat.*—The rains received in September proved beneficial for undertaking sowing of unirrigated wheat in parts of Deccan and Marathwada regions. The crop sown earlier, however, suffered to some extent due to inadequacy of soil moisture caused due to dry spell practically in October and first week of November. Large scale sowing operations were over in November as a result of widespread and opportune rains in the second week of the month. The rains proved helpful for the growth of the crop. Sowing of irrigated wheat was practically over by December end and the unirrigated crop was thriving well as a result of scattered showers received in the month all

over the state except in parts of Nasik district. As a result of opportune rains more area was brought under the crop in Bhandara and Chandrapur districts of Vidarbha region. The rains received in the first week of January proved beneficial to wheat particularly in Wardha district. The cold weather in January and February was conducive to the proper growth of the crop. The crop, however, suffered in Chandrapur and Bhandara districts due to rains accompanied by hail-storm in March and its harvesting delayed in the affected area of Wardha district. Incidence of rust was reported in parts of Nasik, Jalgaon, Satara, Sangli, Sholapur, Bhir, Osmanabad, Wardha and Nagpur districts. On the whole, the condition of wheat crop, both irrigated and dry, was satisfactory in the State.

The area under the crop increased from 20,58,100 acres in 1965-66 to 20,74,400 acres in 1966-67 or by 0.8 per cent. The outturn of the crop also increased from 2,75,600 tons in 1965-66 to 3,57,900 tons in 1966-67 or by 29.9 per cent.

*Kharif jowar.*—Sowing of the crop on a large scale was delayed till the second fortnight of July in most parts of the State due to inadequacy of rains in the sowing period. The growth of the crop was affected due to scanty rains received during the growth period in most parts of the State except in Poona division. The rains received in November being heavy, affected the standing crop to a varying extent in parts of the State. The crop at maturity stage was affected at a few places in Vidarbha due to rains in the first week of January. The crop was affected by 'Chikta' in Nagpur district. The condition of the crop, on the whole, was not satisfactory all over the State during the year under report.

The area under the crop increased from 64,33,800 acres in 1965-66 to 65,12,600 acres in 1966-67, or by 1.2 per cent. The outturn of the crop increased from 11,27,400 tons to 13,57,500 tons in 1966-67 or by 20.4 per cent, the increase being due to the fact that the season in the preceding year was the worst in all the divisions of the State.

*Rabi jowar.*—Rains received in the last week of August facilitated sowing of the crop at places in Deccan and Marathwada regions. Sowing continued in September and the germination of the early sown crop was reported to be satisfactory due to receipt of rains though inadequate in the areas. Practically dry spell prevailed in October due to which the crop just sown in Parbhani district and eastern part of Deccan districts was on the verge of withering. The crop was, however, saved as a result of widespread and opportune rains received in the second week of November. The stray showers received in most

parts of the State in December and early January provided beneficial for the growth of the crop. Incidence of 'Chikta' was reported on the crop in Satara and Sholapur districts. On the whole, the condition of the crop was satisfactory in the State.

The area under the crop decreased from 85,33,100 acres in 1965-66 to 85,11,600 acres in 1966-67, the decrease being 0.3 per cent. The outturn of the crop increased from 11,31,100 tons in 1965-66 to 16,54,800 tons in 1966-67 or by 46.3 per cent due to favourable season in the growth period of the crop.

*Bajri*.—Due to inadequacy of rains at the sowing stage, large scale sowing of the crop was delayed till July when rains favourable for the sowing of the crop were received. The crop sown, however, suffered in growth particularly in light soil due to scanty rains received till the third week of August when due to the receipt of sufficient rains, the crop condition improved to some extent. The rains received in September proved beneficial to the crop but later in October due to practically dry spell the late sown crop was affected to a varying extent in parts of the State. Attack of wingless grass hoppers was reported on the crop in parts of Ahmednagar district. On the whole, the condition of the crop in the State was fairly satisfactory.

The area under the crop increased from 45,16,300 acres in 1965-66 to 49,87,300 acres in 1966-67 or by 10.4 per cent. The outturn of the crop also increased from 3,64,000 tons in 1965-66 to 4,58,600 tons in 1966-67 or by 26.0 per cent.

*Ragi*.—The season proved favourable to the crop at the sowing stage in Konkan region. The seedling growth was affected to some extent due to scanty rains in the first fortnight of July. Rains received in the second fortnight facilitated transplanting of the seedlings and the crop thrived well due to sufficient rains received in the first as well as last week of August. The rains received in September and October being inadequate, the late maturing crop was affected to some extent. On the whole, the season was fairly satisfactory to the crop.

The area under ragi decreased from 5,71,900 acres in 1965-66 to 5,53,700 acres in 1966-67 or by 3.2 per cent, while the outturn of the crop increased from 1,11,600 tons in 1965-66 to 1,43,000 tons in 1966-67 or by 28.1 per cent. The outturn estimates have been computed partly on the basis of the crop estimation survey data for the districts of Thana, Kolaba, Ratnagiri, Nasik, Dhulia, Ahmednagar, Poona, Satara and Kolhapur and partly on the estimates based on anna valuation figures reported by the collectors for the remaining districts during the year under review.

*Gram.*—Rains received in October were light and inadequate and the sowing of the crop on a large scale was delayed till the middle of November. Due to substantial rains in the second week of November, sowing of gram was completed. The growth of the crop improved as a result of scattered showers in December. The crop in Vidarbha was benefited due to the rains in the first week of January. Incidence of catter pillar on gram was reported in Nasik district. The season during the year under report was favourable to the crop. The area under the crop increased from 7,71,600 acres in 1965-66 to 8,33,500 acres in 1966-67 or by 8.0 per cent. The outturn of the crop also increased from 77,600 tons in 1965-66 to 1,03,600 tons in 1966-67 or by 33.5 per cent due to season being favourable to the crop.

*Cotton.*—Large scale sowing of cotton was delayed till second fortnight of July when widespread and good rains were received in the State. The early sown crop at places in Vidarbha region withered to some extent. In fact, resowing of the crop was undertaken in parts of Amravati district in the latter half of July. The growth of the crop particularly in light soil was stunted on account of inadequate rains till 3rd week of August. The delayed monsoon and subsequent break in rains resulted in the reduction of area in parts of Vidarbha region and Osmanabad district of Marathwada region. Standing crop of cotton suffered to a varying extent due to inadequacy of rains in September and October in many parts of the State while the crop in matured stage was damaged on account of heavy rains in parts of the State in the second week of November. The standing crop was affected to some extent at places in Vidarbha where rains accompanied with hailstorm were received in March. Elsewhere, the condition of the crop was satisfactory. Incidence of thrips on cotton was reported in Dhulia and Amraoti districts while it suffered from aphids and jassids in Dhulia, Buldhana and Amraoti districts and red leaf in Yeotmal district. Remedial measures were undertaken in the affected areas as a result of which the condition of the crop improved to some extent.

The area under the crop decreased from 67,10,600 acres in 1965-66 to 64,61,700 acres in 1966-67 or by 3.7 per cent. The production of lint increased from 10,05,100 bales (of 392 lb. each) in 1965-66 to 10,80,700 bales in 1966-67 or by 7.5 per cent.

*Groundnut.*—The rains received in June were inadequate due to which large scale sowing was delayed till second fortnight of July when sufficient rains were received all over the State. The early sown crop in Vidarbha, however, withered to some extent due to inadequacy of rains in June. The crop was on the verge of withering due to

inadequacy of rains till the 3rd week of August and the late variety was affected due to inadequacy of rains in November and practically dry spell in October to a varying extent in many parts of the State. Due to heavy rains accompanied by storm, the floods caused damaged the crop in the areas adjoining to rivers in parts of Satara, Sangli and Kolhapur districts. Incidence of aphids was reported on groundnut in Dhulia, Buldhana, Akola, Yeotmal and Wardha districts while the crop suffered from aphids and tikka in Nanded district. The condition of the crops was, on the whole, not satisfactory.

The area under the crop showed decrease from 27,60,900 acres in 1965-66 to 24,11,900 acres in 1966-67 or by 12.6 per cent. The outturn of the crop also decreased from 4,65,800 tons to 4,46,200 tons or by 4.2 per cent.

16. *Yield per acre.*—During the year under report, statewide crop estimation surveys were continued on the eight principal crops viz., paddy, kharif jowar, bajri, wheat, rabi-jowar, gram, cotton and groundnut while the survey on ragi was restricted to districts in the Deccan growing the crop on a large scale and that on tur in the eight districts of the Nagpur division. It was also continued on the minor but important cash crop of tobacco.

17. *Kharif crops.*—The state as well as the divisionwise average yields per acre of kharif crops based on the crop estimation surveys are given below:—

The results of the surveys were utilised for computing the yield per acre and the outturn of these crops in districts where the coverage was partial. From the remaining districts growing tur, ragi and tobacco, annawari figures reported by Collectors were used for working the yield per acre.

| Division   | Yield per acre |         |   |              |         |   |         |         |   |  |
|------------|----------------|---------|---|--------------|---------|---|---------|---------|---|--|
|            | Rice           |         |   | Kharif jowar |         |   |         | Bajri   |   |  |
|            | 1965-66        | 1966-67 | Percentage increase (+) or decrease (-) | 1965-66      | 1966-67 | Percentage increase (+) or decrease (-) | 1965-66 | 1966-67 | Percentage increase (+) or decrease (-) |  |
|            | 2              | 3       | 4                                       | 5            | 6       | 7                                       | 8       | 9       | 10                                      |  |
|            | lb.            | lb.     |   | lb.          | lb.     |   | lb.     | lb.     |   |  |
| Bombay     | 849            | 876     | + 3.2                                   | 173          | 556     | + 221.4                                 | 217     | 220     | + 1.4                                   |  |
| Poona      | 489            | 658     | + 75.0                                  | 666          | 714     | + 7.2                                   | 163     | 204     | + 25.1                                  |  |
| Aurangabad | 297            | 252     | - 15.1                                  | 391          | 430     | + 10.0                                  | 161     | 168     | + 16.0                                  |  |
| Nagpur     | 463            | 547     | + 18.1                                  | 371          | 423     | + 14.0                                  | 146     | 177     | + 21.2                                  |  |
| State      | 597            | 693     | + 16.1                                  | 393          | 467     | + 18.8                                  | 181     | 206     | + 13.8                                  |  |

It is seen from the table above that the state average yield of rice had increased from 597 lb. per acre in 1965-66 to 697 lbs. per acre in 1966-67 or by 16.7 per cent. The increase was shared by all the divisions of the state except Aurangabad division where the yield per acre had reduced by 15.1 per cent. In the case of kharif jowar, the state average yield per acre showed an increased of 18.8 per cent, having gone up from 393 lb. per acre in 1965-66 to 467 lb. per acre in 1966-67. The increase was shared by all the divisions in the State but it was predominantly so in Bombay division due to yield per acre in the preceding season itself being too low due to scarcity condition which prevailed that year. The state average yield of bajri increased by 13.8 per cent having gone up from 181 lb. per acre in 1965-66 to 206 lb. per acre in 1966-67. The increase was shared by all the divisions of Bombay, Poona, Aurangabad and Nagpur and was 1.4 per cent, 25.1 per cent, 16.0 per cent and 21.2 per cent respectively.

The average yield per acre of tur and sesamum (based on anna valuation figures of the revenue department except for tur in respect of the Nagpur division) for the different divisions of the state are as shown below:—

| Division   | Yield per acre |         |   |         |         |   |
|------------|----------------|---------|---|---------|---------|---|
|            | Tur            |         |   | Sesamum |         |   |
|            | 1965-66        | 1966-67 | Percentage increase (+) or decrease (-) | 1965-66 | 1966-67 | Percentage increase (+) or decrease (-) |
| 1          | 2              | 3       | 4                                       | 5       | 6       | 7                                       |
|            | lb.            | lb.     |   | lb.     | lb.     |   |
| Bombay     | 405            | 483     | + 19.2                                  | 186     | 200     | + 7.5                                   |
| Poona      | 497            | 592     | + 19.1                                  | 225     | 214     | - 4.9                                   |
| Aurangabad | 295            | 294     | - 0.3                                   | 184     | 173     | - 6.0                                   |
| Nagpur     | 411            | 559     | + 26.7                                  | 191     | 170     | - 11.0                                  |
| State      | 392            | 456     | + 16.3                                  | 192     | 178     | - 7.3                                   |

The State average yield per acre of tur showed increase by 16.3 per cent having gone up from 392 lb. per acre in 1965-66 to 456 lb. per acre in 1966-67. This increase was shared by all the divisions except Aurangabad where it declined slightly viz., by 0.3 per cent. In the case of sesamum, the state average yield showed a decline from 192 lb. per acre in 1965-66 to 178 lb. per acre in 1966-67 or by 7.3 per cent. The decrease was observed in all the divisions except Bombay division where it showed increase by 14 lb. or 7.5 per cent.

18. *Rabi crops*.—The State and the divisionwise average yields per acre of the rabi crops (based on the results of crop estimation surveys) are as under:—

| Division   | Yield per acre |         |   |            |         |   |        |
|------------|----------------|---------|---|------------|---------|---|--------|
|            | Wheat          |         |   | Rabi Jowar |         |   |        |
|            | 1965-66        | 1966-67 | Percentage increase (+) or decrease (-) | 1965-66    | 1966-67 | Percentage increase (+) or decrease (-) |        |
| 1          | 2              | 3       | 4                                       | 5          | 6       | 7                                       |        |
|            | lb             | lb      |   | lb         | lb      |   |        |
| Bombay     | ...            | 441     | 436                                     | - 1.1      | 325     | 457                                     | + 40.6 |
| Pona       | ...            | 401     | 418                                     | + 4.2      | 286     | 370                                     | + 56.8 |
| Aurangabad | ...            | 232     | 311                                     | +34.0      | 399     | 549                                     | + 37.3 |
| Nagpur     | ...            | 245     | 409                                     | +66.9      | 345     | 468                                     | + 35.6 |
| State      | ...            | 300     | 386                                     | + 28.7     | 297     | 435                                     | + 46.5 |

It is seen from the table that the average yield per acre of wheat at the State level increased from 300 lb. in 1965-66 to 386 lb. in 1966-67 or by 28.7 per cent. This increase was shared by all the divisions except Bombay division specially Aurangabad and Nagpur divisions where it was considerable and was of the order of 34.0 per cent and 66.9 per cent respectively. In Bombay Division the yield declined

slightly viz. by 1.1 per cent as compared to that of last year. The average yield per acre of rabi jowar at the state level also showed an increase from 297 lb. in 1965-66 to 435 lb. in the year 1966-67 or by 46.5 per cent. The increase was shared by all the divisions and was considerable in the case of Poona division, the increase being by 56.5 per cent. The average yield per acre of rabi crops viz., gram (based on crop estimation surveys), linseed, rape and mustard (based on the anna valuation figures of the revenue department) for the different divisions of the State are given below:—

| Division   | Yield per acre |         |   |         |         |   |                  |         |   |
|------------|----------------|---------|---|---------|---------|---|------------------|---------|---|
|            | Gram           |         |   | Linseed |         |   | Rape and Mustard |         |   |
|            | 1965-66        | 1966-67 | Percentage increase (+) or decrease (-) | 1965-66 | 1966-67 | Percentage increase (+) or decrease (-) | 1965-66          | 1966-67 | Percentage increase (+) or decrease (-) |
| 1          | 2              | 3       | 4                                       | 5       | 6       | 7                                       | 8                | 9       | 10                                      |
|            | lb.            | lb.     |   | lb.     | lb.     |   | lb.              | lb.     |   |
| Bombay     | 228            | 268     | +17.5                                   | 208     | 193     | - 7.2                                   | 249              | 280     | +12.4                                   |
| Poona      | 230            | 265     | +15.2                                   | 153     | 221     | +29.9                                   | ...              | ...     | ...                                     |
| Aurangabad | 222            | 274     | +23.4                                   | 181     | 167     | - 7.7                                   | 154              | 112     | -27.3                                   |
| Nagpur     | 228            | 311     | +36.4                                   | 149     | 179     | +20.1                                   | 172              | 213     | +23.3                                   |
| State      | 225            | 278     | +23.5                                   | 162     | 174     | + 7.4                                   | 163              | 151     | - 7.4                                   |

It is seen from the table above that the state average yield of gram crop had increased by 23.6 per cent having gone up from 225 lb. per acre in 1965-66 to 278 lb. per acre in the year 1966-67. The increase was shared by all the divisions in the State. The state average yield per acre of linseed also increased from 162 lb. in 1965-66 to 174 lb. in 1966-67 and the increase was shared by Poona and Nagpur divisions whereas the yield per acre declined in Bombay and Aurangabad divisions the decrease being of the order of 7 per cent each. In the case of rape and mustard, the state average yield per acre decreased from 163 lb. in 1965-66 to 151 lb. in 1966-67 or by 7.4 per cent. The decrease in the yield was noticed in Aurangabad division being of the order of 27.3 per cent. In Bombay and Nagpur divisions, however, the yield per acre increased of 12.4 per cent and 23.6 per cent respectively.

19. *Cotton, sugarcane and tobacco.*—The table below gives the average yield per acre of cotton (lint) and sugarcane (gur) (based on the results of crop estimation surveys) and also tobacco (based partly on survey data in the major crop growing districts and partly on anna valuation figures of the revenue department:—

| Division   | Yield per acre |       |                                       |                 |       |                                       |         |       |                                       |        |
|------------|----------------|-------|---------------------------------------|-----------------|-------|---------------------------------------|---------|-------|---------------------------------------|--------|
|            | Cotton (lint)  |       |                                       | Sugarcane (gur) |       |                                       | Tobacco |       |                                       |        |
|            | 1965-          | 1966- | Percentage                            | 1965-           | 1966- | Percentage                            | 1965-   | 1966- | Percentage                            |        |
|            | 66             | 67    | increase<br>(+) or<br>decrease<br>(-) | 66              | 67    | increase<br>(+) or<br>decrease<br>(-) | 66      | 67    | increase<br>(+) or<br>decrease<br>(-) |        |

| Bombay     | ...            | 97    | 80                                    | + 116.2         | 7,495 | 8,160                                 | + 8.9   | ...   | ...                                   | ...    |
| Poona      | ...            | 96    | 174                                   | + 81.2          | 7,959 | 8,684                                 | + 10.5  | 431   | 461                                   | + 7.0  |
| Aurangabad | ...            | 57    | 58                                    | + 1.7           | 6,512 | 5,933                                 | - 8.8   | 509   | 373                                   | - 26.7 |
| Nagpur     | ...            | 63    | 63                                    | ...             | 5,132 | 4,359                                 | - 14.9  | 373   | 373                                   | ...    |
| State      | ...            | 59    | 66                                    | + 11.9          | 7,523 | 8,040                                 | + 6.7   | 434   | 453                                   | + 4.4  |

The State average yield per acre of cotton (lint) recorded an increase of 11.9 per cent having gone up from 59 lb. in 1965-66 to 66 lb. in 1966-67. The increase was shared by all the divisions except Nagpur where it remained of the same order as that of last year. The relatively high yield rate in Poona division was on account of the appreciable area under irrigated varieties of cotton like Laxmi, Deviraj etc. in that division.

In the case of sugarcane the State average per acre of gur recorded a increase of 6.7 per cent having gone up from 7,533 lb. in 1965-66 to 8,040 lb. in 1966-67 and this increase was shared by Bombay and Poona divisions, the increase in the former being by 8.9 per cent and in the latter by 10.5 per cent. In the divisions of Aurangabad and Nagpur, the production of gur declined by 8.8 per cent and 14.9 per cent respectively.

The State average yield per acre of tobacco (dry leaf) recorded an increase of 4.4 per cent having gone up from 434 lb. in 1965-66 to 453 lb. in the year 1966-67. The increase of 7.0 per cent was noticed

in the predominantly tobacco growing Poona division. In Aurangabad division, however, the yield per acre declined by 26.7 per cent, whereas it remained unchanged in Nagpur division.

20. *Cotton*.—The table below gives the total area and outturn of cotton (lint) according to different divisions and state as a whole during the years 1965-66 and 1966-67.

(Area and outturn figures in thousands).

| Division      | Area in acres |         |   | Outturn in bales of 392 lb each |         |   |
|---------------|---------------|---------|---|---------------------------------|---------|---|
|               | 1965-66       | 1966-67 | Percentage increase (+) or decrease (-) | 1965-66                         | 1966-67 | Percentage increase (+) or decrease (-) |
| 1             | 2             | 3       | 4                                       | 5                               | 6       | 7                                       |
| Bombay ...    | 803           | 729     | - 9.2                                   | 76                              | 148     | + 94.7                                  |
| Poona ...     | 117           | 108     | - 7.7                                   | 29                              | 48      | + 65.5                                  |
| Aurangabad .. | 1901          | 1788    | - 5.9                                   | 277                             | 264     | - 4.7                                   |
| Nagpur ...    | 3890          | 3837    | - 1.4                                   | 623                             | 620     | - 0.5                                   |
| State ...     | 6711          | 6462    | - 3.7                                   | 1005                            | 1031    | + 7.6                                   |

It is seen from the table above that the total area under cotton was 6,462 thousand acres while its outturn (of lint) was estimated at 1,081 thousand bales (of 392 lb. each) during the year under report as against 6,711 thousand acres and 1,005 thousand bales (of 392 lb. each) in 1965-66 thus showing decrease in the area by 3.7 per cent and increase in the outturn by 7.6 per cent at the State level. The decrease in the area was shared by all the divisions while the increase in the outturn was noticed in Bombay and Poona divisions only where it was of the order of 94.7 per cent and 65.5 per cent respectively. In Aurangabad division the outturn declined by 4.7 per cent while the decline was slight viz., by 0.5 per cent in the case of Nagpur division in the State.

## CHAPTER VI

### PRICES

(Table VI, pages 139-144)

(Summary Table F, page 45)

21. The table VI of the report gives the average prices during the peak marketing period immediately after the harvest of the principal crops in different districts of the state. The prices of agricultural produce except sugar (raw) and cotton (unginned) rules higher during the year under report in comparison with these of the preceding year.

22. The major variations in the average farm harvest prices of principal commodities at the state level and in different divisions as compared with the prices during the corresponding period of the previous year are summarised as follows:—

At the state level, the price of paddy viz., Rs. 28.44 per maund of 82-2/7 lb., was lower by 7.2 per cent than that of the previous year. The price showed a decrease of 14.2 per cent in Bombay divisions while it ruled higher by 6.3 per cent, 9.0 per cent and 35.2 per cent in Poona, Aurangabad and Nagpur divisions respectively. The price of *Wheat*, viz., Rs. 43.32 per maund, was higher by 3.9 per cent than that of the preceding year at the state level. The increase was noticed in all the divisions except Poona division and was of the order of 2.3 per cent, 2.2 per cent and 9.1 per cent in Bombay, Aurangabad and Nagpur divisions respectively. In Poona division the price was slightly less than that of the preceding year viz., by 1.5 per cent. The price of *Jowar* at the state level was Rs. 22.26 and it was slightly higher by 1.0 per cent than that of the preceding year. It was higher in Aurangabad and Nagpur divisions to the extent of 3.6 and 5.7 per cent respectively while it ruled lower by 7.8 per cent and 2.8 per cent in Bombay and Poona divisions respectively. The price of Rs. 30.18 per maund of *Bajri* at the state level was lower by 19.2 per cent as compared with that of the previous year. Higher price prevailed in Aurangabad division to the extent of 3.0 per cent while it ruled lower by 21.8 per cent, 23.1 per cent and 18.7 per cent in Bombay, Poona and Nagpur divisions respectively. The average price of Rs. 32.73 per maund of *Ragi* (nachani) at the state level ruled higher by 10.4 per cent and the increase was noticed in the Bombay division by 17.3 per cent whereas there was slight decrease to the extent of 0.3 per cent in Poona division. The price of *Maize* was Rs. 24.84 per maund at the state level and it was lower by 14.2 per cent. The decrease was also noticed in the divisions of Bombay, Poona and Aurangabad to the extent of 11.2 per cent, 15.9 per cent and 12.6 per cent respectively.

Among the pulses, the average price of Rs. 56.99 per maund of *gram* at the state level was higher by 16.6 per cent than that of the previous year. The increase was shared by all the divisions being of the order of 14.6 per cent, 23.2 per cent, 12.8 per cent and 24.00 per cent in Bombay, Poona, Aurangabad and Nagpur divisions respectively. The price of Rs. 57.18 per maund of *tur dal* was higher by 53.1 per cent than that of the preceding year at the state level. The increase was noticed in all the divisions and was of the order of 57.8 per cent, 25.4 per cent, 33.8 per cent and 51.9 per cent in Bombay, Poona, Aurangabad and Nagpur divisions respectively.

The average price of Rs. 52.23 per maund of *sugar (raw)* shot up by 96.6 per cent at the state level as compared with that of the previous year. The increase was shared by all the divisions it being of the order of 14.8 per cent, 97.5 per cent, 114.2 per cent and 90.4 per cent in Bombay, Poona, Aurangabad and Nagpur divisions respectively. The average price of *groundnut* at the state level viz. Rs. 49.15 was higher by 8.0 per cent as compared with that of the previous year. The increase was noticed in all the divisions and was of the order of 3.5 per cent, 28.3 per cent, 23.4 per cent and 3.5 per cent in Bombay, Poona, Aurangabad and Nagpur divisions respectively. At the state level, the price of tobacco viz., Rs. 124.43 was lower than that of the previous year by 15.3 per cent and the increase was noticed in the divisions of Poona by 18.6 per cent while in Aurangabad division it increased by 9.9 per cent. The average price of cotton (unginned) viz. Rs. 52.74 per maund increased by 24.7 per cent at the state level. The price of cotton increased by 12.8 per cent, 135.9 per cent, 52.2 per cent and 9.9 per cent in Bombay, Poona, Aurangabad and Nagpur divisions respectively.

23. The table below compares the prices of Vijaya (Digvijaya) and Jarrila/Virnar cotton ruling at Bombay during the year under report with those of the preceding year and the average of 5 years ending 1964-65.

| Variety of cotton    | Price per 3 quintals                     |         |         | Variation as compared with the |                  |
|----------------------|--|---------|---------|--------------------------------|------------------|
|                      | Average of the five years ending 1964-65 | 1965-66 | 1966-67 | Average price                  | Price of 1965-66 |
| 1                    | 2  | 3       | 4       | 5                              | 6                |
|                      | Rs.                                      | Rs.     | Rs.     | Percent.                       | Percent.         |
| Vijay (Digvijay) ... | 875                                      | 1,078   | 1,149   | + 31.3                         | + 6.6            |
| Jarrila/Virnar ...   | 796                                      | 918     | 1,016   | + 27.3                         | + 7.2            |

It is seen from the above table that as compared to quinquennial spot market prices, the yearly average price of Virnar during the year under review increased by nearly 27 per cent whereas the corresponding increase in case of Digvijay was of a higher order of 31 per cent. The rise in price over that of the last year in the case of Digvijay as well as Virnar was of the order of nearly 7 per cent only in both the varieties.

The trend in the market cotton prices as reported in the Bombay Cotton Annual (1966-67) is summarised in brief for the period from September 1966 to March 1967.

The prices of most of the varieties of cotton ruled above the appropriate ceilings during the latter part of 1965-66. In spite of good prospects the prices showed no tendency to decline despite measures evolved to keep the prices within ceilings in the early part of the current season.

In opportune rains in certain parts and dry spell in some areas in *October* affected the standing crop adversely. As a result the crop prospect was affected and movement delayed to some extent. The requirements of Textile Industry increased both on account of addition of new spindlings and withdrawal of power cut. As a result of these factors there was a great demand for cotton whereby prices continue to rise in October/November 1966. To overcome this situation several steps were taken both by the Government and the Industry. Government announced on the 3rd December 1966 among other things a rise in the ceiling prices of cotton by 5 per cent to ease the situation.

With the increased tempo of arrivals of cotton in the market, there was a moderate decline in prices in January/February 1967 but superior qualities continued to be quoted at higher levels.

Measures for checking the rising prices viz. (i) undertaking massive programme of requisitioning of cotton by Government from February 1967 onwards and (ii) subjecting cotton and kapas to a severe credit squeeze were adopted. The Reserve Bank of India took certain steps in the matter and the measures had a salutary effect on prices temporarily; however owing to the shortage of cotton, the prices soon recovered and remained high till the end of the season.

As against these prices the spot market prices in respect of Virnar and Digvijay increased and varied narrowly from Rs. 978 to Rs. 1,026

or by Rs. 48 and from Rs. 1,098 to Rs. 1,155 or by Rs. 57 respectively during the period as will be evident from the trend of the prices recorded monthwise in the following tables.

## (Prices per 3 quintals)

| Year | Month       | Jarilla/Virnar Fine<br>(Average price) | Digvijay fine<br>(Average price) |
|------|-------------|--|----------------------------------|
| 1    | 2           | 3                                      | 4                                |
|      |             | Rs.                                    | Rs.                              |

## CHAPTER VII

### AGRICULTURAL WAGES

(Table VII pages 145-157)

(Summary Table G, Pages 46)

24. According to manual of Revenue Accounts, agriculture labour in this state is classified under three categories viz. (i) skilled, (ii) ordinary and (iii) field labour. Skilled labour comprises of carpenters, black-smiths and cobblers. Ordinary labour consists of load carrying coolies, well diggers, masons or carpenters' assistants, earth workers etc., while field labour comprises of ploughmen, sowers, reapers, harvesters, weeders, transplanters etc. In the report (reference table VII of Agricultural Wages) in addition to the above three categories, one more category is added, viz. herdsmen whose main work is to collect livestock from different owners, take them to the jungle for grazing during the day and bring them back in the evening to the respective owners.

25. Table VII of the report gives districtwise figures of wages of different classes of agricultural labour. Perusal of Summary Table C, will show that during the year 1966-67, the wages of carpenters showed a rise from Rs. 4.73 to Rs. 5.20 during the year under report, of blacksmith from Rs. 4.40 to Rs. 4.76, of cobblers from Rs. 3.51 to Rs. 3.91, of field labourers from Rs. 2.18 to Rs. 2.49 and of other agricultural labourers from Rs. 1.94 to Rs. 2.32. The wages of herdsmen also slightly increased from Rs. 1.75 of the previous year to Rs. 1.96 during the year under report.

---

## CHAPTER VIII

### AGRICULTURAL STOCK

(Table VIII-Pages 158-166)

(Summary Table H, Pages 47-48)

26. Table VIII of this report give the details of livestock, poultry, agricultural machinery and implements as per quinquennial census of livestock conducted in 1966 by the Director, Bureau of Economics and Statistics, Bombay. The comments on the variation in the livestock numbers during the two quinquennia are based on the note sent by the Director, Bureau of Economics and Statistics. Summary Table H gives total number of livestock, poultry, agricultural machinery and implements under each main head. As the previous census, the information in respect of male (cattle and buffaloes) was collected too under the three categories viz., these (i) used for breeding only, (ii) used for breeding and work both and (iii) used for work only.

*Cattle.*—There was a decrease in the number of cattle from 1, 53, 27, 575 in 1961 to 1,47,29,446 in 1966 or by 3.9 per cent. The number of bulls used for work only showed an increase of 0.4 per cent while the number of other males over three years recorded a decrease of 21.8 per cent. The total no. of males of age over three years increased by 0.9 per cent.

Among the females over three years the number of breeding cows recorded a decrease of 2.3 per cent while those in milk declined by 1.5 per cent. The number of young stock recorded a decrease of 13.1 per cent over that of 1961.

*Buffaloes.*—The total number of buffaloes recorded in 1966 was 30,41,919 as against 30,87,014 in 1961 showing a decrease of 1.5 per cent. Among the different categories of buffaloes the number of males over three years was 3,39,687 showing a decrease of 3.8 per cent over that in 1961. Among the females, the number in milk was 8,55,013 in 1966 showing an increase of 3.4 per cent. The total number of breeding buffaloes indicated an increase of 7.2 per cent. The number of young stock recorded a decrease of 11.7 per cent.

*Sheep and Goats.*—The number of sheep increased by 5.4 per cent and that of goats decreased by 1.1 per cent as compared with the corresponding numbers of the year 1961.

*Horses and Ponies.*—The total number of horses and ponies declined by 3.3 per cent in comparison with that of 1961.

The number of mules and camels showed an increase of 42.6 and 32.6 per cent or by 393 and 476 respectively.

The increase in the number of donkeys was by 7.2 per cent while the number of pigs declined by 5.4 per cent.

The total number of livestock recorded a decrease by 2.3 per cent over that of the year 1961.

*Poultry.*—The total number of poultry showed a decrease by 6.4 per cent.

*Agricultural Machinery and Implements.*—The number of tractors increased by 129.4 per cent while ghanies decreased by 33.0 per cent. Similarly the number of wooden ploughs, iron ploughs and carts showed an increase of 5.5 per cent, 17.0 per cent and 8.8 per cent respectively. Sugarcane crushers increased by 12.0 per cent while oil engines and electric pumps for irrigation purposes increased by 130.3 per cent and 481.6 per cent respectively in comparison with the corresponding figures of the 1961 census.

---

## CHAPTER IX

### AGRICULTURAL OUTLOOK

27. The agricultural season of 1966-67 was characterised by uneven distribution of rains which proved inadequate in most parts with prolonged break at critical stages of crop growth affecting the crop yields adversely particularly in the kharif season. In fact scarcity was declared in parts of the state during the year under review.

28. The table below compares for the years 1965-66 and 1966-67 the actual areas sown and the outturn of food grain crops in the state and in different divisions.

(Figures in thousands).

| Division   | Area in acres |         | Outturn in tons |         |       |
|------------|---------------|---------|-----------------|---------|-------|
|            | 1965-66       | 1966-67 | 1965-66         | 1966-67 |       |

| State      | ...           | 31,734  | 32,643          | 4,621   | 5,858 |

It will be seen from the table above that the area under food grain crops increased from 31,734 thousand acres in 1965-66 to 32,646 thousand acres in i.e. by 912 thousand acres the year under report. The outturn of food grains was higher by 1,237 thousand tons having gone up from 4,621 thousand tons in 1965-66 to 5,858 thousand tons in 1966-67. The increase in the production was shared by all the divisions of the state. Amongst the divisions the increase in production was noticed in Bombay, Poona, Aurangabad and Nagpur divisions by 21.4 per cent, 37.8 per cent, 21.5 per cent and 26.2 per cent respectively. The higher production during the year under report was however partly due to the fact that the production level achieved last

year itself was too low on account of unusually adverse seasonal conditions which prevailed that year and partly to operation of measures such as grant of tagai loans for construction of new wells, repairs to old wells, supply of improved seeds, manures, fertilisers and pesticides, adoption of soil conservation measures, improved cultivation and plant protection practices most of which were covered under special kharif, rabi and summer crop campaigns launched during the year with the provision of various incentives. The launching of hybrid seed production programme as well as commercial hybrid programme contributed to some extent in increasing the production of the crops. The supply of oil engines as well as installation of electric pumps on a planned basis for irrigating crops on a larger scale also played a prominent role in bringing more area under cultivation particularly under irrigated wheat and thereby production of crops. Besides, the development projects continued to function on priority basis during the year under review and proved beneficial to the agriculturists in tiding over the situation of partial failure to a large extent in parts of the state.

29. The condition of the cattle was satisfactory in the state particularly as prompt remedial and preventive measure were taken against incidence of Rinderpest, Foot and Mouth disease, Black Quarter and Anthrax Haemorrhagic Septicaemia in Cattle and Buffaloes, Enterotoxaemia, Pox and Pleuropneumonia in Sheep and Goats and Ranikhet, Fowl Pox and Coccidiosis in Poultry in the affected areas of the state and the situation was kept under control.

Supply of fodder was adequate in most districts of the state. In deficit areas however, the need was met by procuring fodder from neighbouring areas where the position was satisfactory.

Agricultural labour condition was reported to have been hit to some extent due to increase in the prices of essential commodities (as compared to 1964-65) excepting those covered under monopoly procurement scheme. The labourers however received higher wages in the areas where scarcity works were in progress.

30. The table below gives the average prices of agricultural commodities prevailing at harvest time for the year 1962-63 while for the year 1963-64 to 1966-67 prices given relate to the peak marketing period and hence are not strictly comparable.

(Prices are in Rs. per maund of 8,200 tolas except the prices of cotton which are recorded in Rs. per khandi of 784 lb.).

*Note.*—Dashes indicate that prices are not available.

AA-Superfine, A-Superior, B-Medium, C-Coarse.

The centres mentioned in the table are the representative markets and accordingly the prices of agricultural produce in these markets indicate the general trend in the fluctuations of prices of the commodities in the state during the period under review.

## CHAPTER X

### CONDITION OF AGRICULTURAL POPULATION

31. The agricultural season was characterised by partial drought condition in most parts of the State particularly in the kharif season. As a consequence, the average yield rates particularly of late maturity crops declined to some extent. The prices of agricultural commodities continued to rule high in the year under review. Similarly the agricultural wages also increased affecting the economic conditions of the agriculturists despite the fact that the crop production was more appreciable than that of last year, a year of abnormal scarcity. As a result, the monetary returns to the cultivators were reduced. The condition of agricultural labour was improved to a large extent in the scarcity stricken areas on account of their employment on a large scale in bunding schemes and other construction works undertaken by the Government and Zilla Parishads and continued supply of foodgrains at fair price shops in operation in the districts. Due to good wages offered dearth of labour was not keenly felt in the affected areas though it continued as usual in the neighbourhood of industrial and factory areas. Loans were advanced to the needy agriculturists by Government, Zilla Parishads, Land Mortgage Banks and various societies in the districts also under various Government Schemes already undertaken on priority basis particularly in the drought affected areas. The cultivators were provided with various facilities particularly oil engines, electric pumps and subsidies for constructing bandharas for maximum utilisation of irrigation potential. Various incentives were provided to step up food production under special kharif, rabi and summer campaigns and hybrid and high yielding varieties programmes. Launching of intensive cultivation programmes on a planned basis for enhancing yield rates of principal foodcrops had also helped in replacing (to the extent covered by the programme) the traditional method of cultivation adopted largely by the cultivators. As usual, the Bombay Tenancy Act, the Agricultural Land Improvement Act, Prevention of Fragmentation and Consolidation of Holding Act resulted in an overall improvement of agriculture and welfare of the agriculturists in the State.
