Bombay State

# Season and Crop Report of the Bombay State

For the Year 1953-54

BOMBAY

AT THE GOVERNMENT CENTRAL PRESS

Obtainable from the Government Publications Sales Depot, Institute of Science Building, Fort, Bombay (for purchasers in Bombay City); from the Government Book Depot, Charni Road Gardens, Bombay 4 (for orders from the mofussil) or through the High Commissioner for India, India House, Aldwych, London, W.C. 2 or through any recognized Bookseller.

Price—Annas 15 or 1s. 7d.

1956

No. Res/S. & C. R./23007/3341/1431-F of 1956.

Poona-1, dated-21st February, 1956.

From

DR. T. G. SHIRNAME, B.Ag. (Bom.), Ph.D. (Wales),  
F.S.S. (Lond.), F.R.Econ.S. (Lond.),  
Director of Agriculture, Bombay State, Poona.

To

THE SECRETARY TO GOVERNMENT,  
Agriculture and Forests Department,  
Bombay.

Sir,

I have the honour to submit herewith the Annual Season and Crop Report of the Bombay State for the year ending 31st July, 1954.

Yours faithfully,

T. G. SHIRNAME,  
Director of Agriculture.

SEASON AND CROP REPORT OF THE STATE OF BOMBAY FOR  
THE YEAR 1953-54

CONTENTS

	PARAS.	PAGES.
FORWARDING LETTER ... ..	...	I
ANNUAL SEASON AND CROP REPORT ... ..	1-32	1-27
<i>I.—Character of the Season—</i>		
Remarks on the character of the season ... ..	1-3	1- <del>4</del>
<i>II.—Area cultivated and uncultivated</i> ... ..	4-6	5-6
<i>III.—Irrigated areas</i> ... ..	7-10	6-7
<i>IV.—Cropped area</i> ... ..	11-14	7-13
<i>V.—Outturn of crops and their average yields</i> ... ..	15-20	14-21
<i>VI.—Prices—</i>		
Remarks on variations in prices of principal crops ... ..	21-23	21-23
<i>VII.—Agricultural Wages</i> ... ..	24-25	24
<i>VIII.—Agricultural Stock</i> ... ..	26	24-25
<i>IX.—Agricultural Outlook</i> ... ..	27-31	25-26
<i>X.—Condition of the Agricultural population</i> ... ..	32	27
 <b>SUMMARY TABLES—</b>		
A—Classification of area ... ..	...	28
B—Sources of water supply and the area irrigated therefrom... ..	...	28-29
C—Acreage of crops irrigated ... ..	...	30-31
D—Area under all crops ... ..	...	31-34
E—Average yield per acre and the total outturn of crops ... ..	...	35-36
F—Farm prices of principal crops ... ..	...	37
G—Agricultural wages ... ..	...	38
H—Number of livestock, poultry and agricultural machinery ... ..	...	39-40
 <b>STATISTICAL TABLES—</b>		
I—Rainfall ... ..	...	41-46
II—Classification of area ... ..	...	47-51
III-A—Sources of water supply and the area irrigated therefrom ... ..	...	52-63
III-B—Area of crops irrigated ... ..	...	64-81
IV-A—Area under food crops ... ..	...	82-122
IV-B—Area under non-food crops ... ..	...	123-143
IV-C—Details of cropped area ... ..	...	144-148
V-A—Standard Yield per acre and the yield per acre in lb. of the principal crops ... ..	...	149-184
V-B—Total outturn of principal crops in tons ... ..	...	185-190
VI—Farm prices of certain commodities ... ..	...	191-198
VII—Agricultural Wages ... ..	...	199-211
VIII—Special Cattle Census (Agricultural Stock) ... ..	...	212-216

# SEASON AND CROP REPORT OF THE STATE OF BOMBAY FOR THE YEAR 1953-54.

## CHAPTER I—SEASON.

The agricultural season of 1953-54 was satisfactory practically all over the State. It was the best of the last five seasons and the agricultural situation was definitely encouraging after a succession of three bad years. The monsoon commenced by about the middle of June and substantial rainfall was recorded all over the State, although it proved somewhat heavy in parts of North Konkan. During July, the precipitation was heavy in many parts of the Konkan, the Karnatak and western areas of the Deccan and as a result, the crops were damaged in parts of Ratnagiri, Kanara, North Satara and South Satara districts. Agricultural operations were also hindered in some areas of the Konkan and the Karnatak. In some places, in southern parts of the Deccan, however, more rainfall was needed for proper development of crops. The month of August recorded heavy rains in parts of the Gujarat, the Konkan, the western regions of Nasik and North Satara districts and in some areas of Kolhapur and Dharwar districts. As a result, standing crops were damaged to some extent and field operations were also held up in some areas. During the same period, the rainfall proved inadequate in parts of Ahmednagar district in the Deccan and the eastern areas of the Karnatak resulting in a set-back to the growth of the standing crops. In the first week of September, excessive rains were again received in parts of the Gujarat, causing damage to crops and hindering field operations, while in a few areas of the Deccan and the Karnatak the rainfall fell short of requirements. The month of October recorded excessive rainfall in many areas of the Karnatak, in the southern districts of the Konkan and in North Satara district in the Deccan. The precipitation varied from light showers to fairly substantial rains in other parts of the Konkan and the Deccan and it was practically absent in the Gujarat. By the end of October, the rainfall practically ceased. The showers that were received in March proved somewhat harmful to crops in parts of the Gujarat, while the excessive cold of January adversely affected the crop conditions in places in the Gujarat and in Dangs district. On the whole, standing crops fared well in the State except in parts of the South Deccan and in a few places in the Karnatak and the season under review, thus closed with an assurance of good yields.

2. *Distribution of rainfall.*—Table I (pages 41-46) compares the rainfall during the year under report with the normal rainfall at each headquarters station in the State. The figures of normal rainfall for each station were obtained from the India Meteorological Department. The following observations are made from a study of this table.

*Pre-monsoon rains.*—The pre-monsoon rains exceeded the normal at Poona and in the hilly tracts in the Deccan. They were below the normal at Ahmedabad in the Gujarat, at Alibag (Kolaba), Ratnagiri and Karwar (Kanara) in the Konkan, at Jalgaon (East Khandesh), Ahwa (Dangs), Ahmednagar, Sholapur and Satara (North Satara) in the Deccan and at all the reporting district headquarters stations and in the hilly tracts in the Karnatak. At other places in the State, these rains were absent.

*Monsoon rains.*—The monsoon rains were above normal at Mehsana, Himatnagar (Sabarkantha), Ahmedabad, Kaira, Amreli and Surat in the Gujarat, at all the district headquarters stations in the Konkan, at Ahwa (Dangs), Sholapur and Satara (North Satara) in the Deccan and at all the reporting district headquarters stations and in the hilly tracts in the Karnatak. They were below the normal at all other stations in the State.

*Post-monsoon rains.*—The post-monsoon rains exceeded the normal at Ratnagiri and Karwar (Kanara) in the Konkan, at Dhulia (West Khandesh), Sholapur and Satara (North Satara) in the Deccan and at all the reporting district headquarters stations and in the hilly tracts in the Karnatak. They were below the normal at Himatnagar (Sabarkantha) in the Gujarat, at Thana and Alibag (Kolaba) in the Konkan and at Jalgaon (East Khandesh), Ahwa (Dangs), Nasik, Ahmednagar, Poona and in the hilly tracts in the Deccan. These rains were absent at other stations in the State.

*Winter rains.*—The winter rains exceeded the normal at Ahmedabad, Godhra (Panch Mahals), Baroda, Broach and Surat in the Gujarat, at Thana and Karwar (Kanara) in the Konkan, at Ahwa (Dangs), Nasik, Ahmednagar, Satara (North Satara) and in the hilly tracts in the Deccan and at Kolhapur and Belgaum in the Karnatak. They were below the normal at Palanpur (Banaskantha) and Kaira in the Gujarat, at Dhulia (West Khandesh), Jalgaon (East Khandesh) and Sholapur in the Deccan and at Bijapur and in the hilly tracts in the Karnatak. These rains were absent at other stations in the State.

*Total rainfall for the season 1953-54.*—The total rainfall for the season 1953-54 exceeded the normal at all the stations in the Bombay State except at Palanpur (Banaskantha), Godhra (Panch Mahals), Baroda and Broach in the Gujarat and at Dhulia (West Khandesh), Jalgaon (East Khandesh), Nasik, Ahmednagar and Poona in the Deccan, where it was below the normal.

3. In the Gujarat, there were no ante-monsoon showers. The precipitation during June and July was fairly substantial and wide-spread and established ideal conditions for good germination and growth of crops. During the same period, preparatory tillage operations were in progress and sowing of *kharif* crops had also commenced in some parts. Towards the end of July, more rain was needed in some areas for satisfactory transplanting of paddy seedlings. Rains during August and September were copious and proved somewhat excessive in some tracts where standing crops were adversely affected and field operations were also hampered. In the remaining parts of the division, the crops made satisfactory progress. By the beginning of October, the rainfall practically ceased and the crops which had enough soil-moisture to fall back upon progressed fairly well. The maize crop in some parts of Panch Mahals district suffered on account of inadequacy of rain at the grain formation stage. The yield of tobacco, which promised to be good in early stages of the plant growth, was adversely affected by frost in January. Similar was the case with cotton. The abnormal showers of March, in a few areas hindered cotton picking and affected the quality of wheat stacked in the threshing yards. As regards crop pests and plant diseases, grass-hoppers were noticed in some parts of Banaskantha, Mehsana, Sabarkantha, Panch Mahals, Broach and Surat districts and army-worms

affected the paddy crop in some areas of Broach and Surat districts. Caterpillars were reported from some areas of Mehsana, Ahmedabad, Kaira, Baroda and Surat districts and jassids and aphids were observed on cotton in some parts of Kaira district. Leaf-roller and jassids affected cotton in some areas of Surat district. Jassids on paddy were noticed in parts of Ahmedabad, Kaira and Surat districts. Mildew attack on cumin was reported from parts of Banaskantha, Mehsana and Kaira districts. Rust on wheat occurred in some areas of Banaskantha, Sabarkantha, Ahmedabad and Amreli districts and stem-borer attack on gram was noticed in some areas of Panch Mahals district. Field rat trouble was reported from many areas of the division. Allorriaria on wheat was reported from some parts of Mehsana and Sabarkantha districts.

In the Konkan, pre-monsoon showers were light in parts of the division. Rainfall during the months of June, July and August was generally heavy and was even excessive in some areas. As a result, field operations were hindered in parts of Thana and Kolaba districts and seedlings were washed away in some areas. In Ratnagiri district, the crops on the river banks were affected by floods. September rains were favourable and all the standing crops made satisfactory progress, while the field operations were also carried on uninterruptedly. October rainfall was adequate all over the division except in Thana district where it was deficient or absent. By November, the monsoon had practically ended except for a few light and intermittent showers. All the standing crops and the garden crops generally progressed well and were expected to return satisfactory yields. With regard to crop pests and diseases, paddy pest was noticed in parts of Thana, Kolaba and Kanara districts and army-worms, caterpillars and 'karpa' were reported on paddy from Ratnagiri district. Mangoes were affected by mildew in some areas of Ratnagiri district and caterpillars were reported from parts of Kolaba district. Paddy was damaged by blue-beetles in some areas of Kanara district and army-worms in parts of Kolaba district.

In the Deccan, light pre-monsoon showers gave an impetus to the preparatory tillage operations. From July to October, rainfall was satisfactory and the standing crops fared well and the field operations were carried on unhampered. The rainfall, however, proved somewhat heavy in the western parts, especially of North Satara district, where crops were damaged to some extent. On the other hand in the eastern areas, more rain was needed to promote normal growth of crops. After October, there was practically no rain except for some scanty and scattered showers. The inadequacy of rainfall towards the end of the season told adversely on the growth of crops particularly in the south-eastern tracts of the division, where crop growth was arrested and the crops were even withering in some areas. As regards crop pests and diseases, aphids on hot weather *jowar*, caterpillars on lucerne and pyrilla and rust on sugarcane were noticed in some parts of Ahmednagar district. Caterpillar attacks on *nagli* were reported from some areas of Dangs and Nasik districts; "*tambora*" and thrips affected potatoes in some parts of North Satara district. Leaf-curl on chillies, thrips on vegetables, rust on wheat, aphids on lucerne, tomatoes and chillies, jassids on paddy, beetles on *nagli* and pyrilla on sugarcane were reported to have caused some damage to the respective crops in parts of Nasik

district. Aphis affected groundnut and *rabi jowar* in parts of East Khandesh district and paddy suffered from blast attack in some areas of Nasik and Poona districts. *Chikta* was observed on *jowar* in parts of Ahmednagar, Poona, Sholapur and North Satara districts, while stem-borers attacked the same crop in some areas of West Khandesh and North Satara districts. Rust on wheat was noticed in parts of Sholapur district. Rat trouble was reported from parts of West Khandesh, East Khandesh, Dangs, Nasik, Poona and Sholapur districts. Grass-hoppers were observed on *jowar* in some areas of West Khandesh and East Khandesh districts. Army worms attacked *bajri* and paddy in some areas of Ahmednagar district and thrips affected chillies in parts of West Khandesh district. Leaf blight and Jassids on cotton and thrips and mites on chillies were reported from some areas of Poona district.

In the Karnatak, light to fair rain was recorded during the pre-monsoon period facilitating tillage operations. Rainfall in June was satisfactory and July recorded heavy rains in many parts of the division. As a result, standing crops were damaged in some areas of South Satara district and paddy fields were washed away in some parts of Belgaum district. Agricultural operations were also hampered in parts of Kolhapur and Belgaum districts. Heavy rains were recorded again in August and September and these proved injurious to crops in parts of Kolhapur district. In South Satara district, on the other hand, the rainfall was deficient. All over the division, standing crops were reported to be faring well. During the last week of October, rains were again excessive resulting in damage to cotton, tobacco, paddy and *kharif jowar* crops and in hindrance to field operations. The season was, therefore, marked with heavy precipitation which provided ample soil-moisture for the *rabi* crops. Since the beginning of November, there was practically no rain. Both the *kharif* and the *rabi* crops progressed well except in parts of South Satara district where more rain was needed for the proper growth of crops. As regards crop pests and diseases, stem-borer attack was reported from parts of Dharwar district and grass-hoppers were observed in some areas of Belgaum, Bijapur and Dharwar districts. Caterpillar trouble was reported from parts of South Satara, Kolhapur and Belgaum districts. Mealy bugs and pyrilla on sugarcane, aphis on *jowar*, groundnut and vegetables, caterpillars on *jowar* and tip-burning on paddy were observed in parts of Kolhapur district. Blister beetles on *bajri*, red leaf blight, root-rot, and black arm on cotton, sugary disease and shoot-borer on *jowar*, thrips on chillies, aphis on *jowar* and safflower were observed in parts of Bijapur district. Army-worms were reported from Belgaum district, while semi-loopers attacked *jowar* in parts of Dharwar district. Rust on wheat was reported from parts of South Satara, Kolhapur, Bijapur and Dharwar districts. Leaf-curl affected tobacco in Belgaum district, while jassids on mangoes and rat trouble were reported from parts of South Satara and Dharwar districts. Mango-hoppers were observed in Dharwar district. Attacks by pod-borers on gram, aphis on groundnut, leaf-curl on chillies and red-leaf-blight, black arm and root roller on cotton were reported from some areas of Dharwar district.

## CHAPTER II—AREA CULTIVATED AND UNCULTIVATED.

(Table II—pages 47-51).

(Summary Table A—page 28).

4. *Number of villages.*—During the year under report, the number of villages in the State was 35,943 as against 35,959 during the previous year, thus showing a decrease of 16 villages. This decrease was due to the reduction in the number of villages in West Khandesh district caused by the amalgamation of 17 small villages with the neighbouring bigger villages. In the other districts, negligible changes were noticed in the number of villages due either to the splitting up of certain villages or to the amalgamation of small villages with the neighbouring bigger ones.

5. *Total area—Reporting and non-reporting areas.*—The total area, *i.e.*, the geographical area of the Bombay State was almost stationary, being 70,971,500 acres during the year under report as against 70,794,500 acres during 1952-53, thus recording a slight increase of 0·2 per cent. This apparent increase was mainly due to the increase in acreage in the case of Banaskantha, Surat and Ratnagiri districts. In the case of Banaskantha district, the increase was attributed to the more accurate information obtained due to some of the unsurveyed villages having been surveyed. In the case of Surat district, the increase was due to the additional information obtained for a number of unsurveyed villages on account of subsequent survey. As for Ratnagiri district, the increase was attributed to the errors in the earlier surveys. Of the total area of the State, the reporting area was 64,904,700 acres and the non-reporting area, *i.e.*, the area for which no returns exist, was 6,066,800 acres, as against the corresponding figures of 64,395,500 acres and 6,399,000 acres during the year 1952-53. In Dangs district, although the details for the entire area of 423,000 acres are available, those for the reported area of 94,600 acres are not separately available. Similarly in West Khandesh district, out of the “non-reporting” area of 1,251,200 acres, detailed classification into different categories is available for only 798,500 acres.

6. *Cropped areas.*—The gross cropped area in the State increased from 43,456,800 acres in 1952-53 to 41,878,200 acres during the year under report, thus recording a slight increase of 3·3 per cent. The net cropped area also showed a slight increase of 2·5 per cent., it being 42,926,500 acres in 1953-54 as against 41,862,200 acres during the previous year. The acreage under “area sown more than once”, however, showed a noticeable increase of 22·4 per cent., having gone up from 1,594,600 acres in 1952-53 to 1,951,700 acres during the year under report. This increase was noticed mainly in the Gujarat and the Deccan where, due to good rainfall, the area under such cultivation went up from 507,800 acres and 773,800 acres in 1952-53 to 660,000 acres and 962,800 acres or by 30·0 and 24·4 per cent., respectively, during the year under report. The area under forests remained almost stationary, it being 10,840,900 acres during the year under report as against 10,759,400 acres during 1952-53, thus recording slight increase of 0·8 per cent., only. During the year under report, the acreages under “Barren and unculturable land” and “Land put to non-agricultural uses”—both went

up by 3·6 and 5·8 per cent., respectively. On the other hand, the acreages under "Culturable waste", "Permanent pastures and other grazing lands", "Land under Miscellaneous tree crops and groves not included in area sown", "Current fallows", and "Other fallow land" recorded a decrease of 2·0, 3·5, 14·4, 21·5 and 19·0 per cent., respectively as compared with the corresponding figures of the previous year.

### CHAPTER III—IRRIGATED AREAS.

(Tables III-A and III-B—pages 52-81).

(Summary Tables B and C—pages 28-31).

7. *Sources of water supply.*—During the year 1953-54, the number of Government canals reported was 799 as against 577 reported during the previous year, thus recording an increase of 38·5 per cent. This increase was mainly due to the increase in Sabarkantha and Nasik districts and was explained as due to wrong reporting in the year 1952-53. There was also an increase in the mileage of these canals from 1,592 to 2,062 or by 29·5 per cent. The number of private canals recorded a slight increase from 7,742 in 1952-53 to 8,042 during the year under report or by 3·9 per cent. The mileage of these canals remained almost stationary, it being 4,739 during the year under report as against 4,757 in 1952-53, thus recording a slight decrease of 0·4 per cent. The number of Government and private tube-wells both went up from 61 and 6 to 76 and 11 or by 24·6 and 83·3 per cent., respectively. The increase in the case of Government tube-wells was only in Mehsana district, while 4 and 1 new private tube-wells were reported from Mehsana and Banaskantha districts respectively. The number of other Government masonry wells used for irrigation purposes only went to from 6,844 to 6,553 during the year under report or by 4·3 per cent., while the number of Government non-masonry wells used for such purposes went up from 2,096 to 2,194 in 1953-54 or by 4·7 per cent. On the other hand, the number of private masonry wells used for irrigation purposes only went up from 325,589 in 1952-53 to 345,173 in 1953-54 or by 6·0 per cent., while the number of private non-masonry wells put to such use decreased from 218,216 to 205,529 during the year under report or by 5·8 per cent. The number of wells used for domestic purposes only went down from 252,365 in 1952-53 to 239,459 during the year under report or by 5·1 per cent. The number of wells not in use showed an increase of 10·4 per cent., having gone up from 63,137 in 1952-53 to 69,687 in 1953-54. The number of wells having independent ayacuts showed a slight decrease of 2·5 per cent., it being 169,273 during 1953-54 as against 173,537 during the previous year. The number of wells supplementing recognised sources of irrigation showed a large increase from 34,277 to 50,915 or by 48·5 per cent. The number of reservoirs also recorded a large increase of 43·5 per cent., going up from 1,168 in 1952-53 to 1,676 in 1953-54. The number of tanks with ayacut 100 acres or more went down by 20·0 per cent., or from 1,289 in the previous year to 1,031 in the year under report. On the other hand, the number of wells with ayacut less than 100 acres went up from 21,426 to 22,723 or by 6·1 per cent. The number of oil-engines showed an increase from 31,354 in 1952-53 to 33,547 or by 7·0 per cent. during the year under report.

8. *Irrigated areas.*—The total area irrigated in the State was 2,687,900 acres during the year under report as against 2,623,900 acres during 1952-53, thus recording a small increase of 2·4 per cent. Significant increase in such area was noticed only in the case of *kharif jowar* and fodder crops by 74·3 and 23·7 per cent., respectively.

During the year under report, the percentage of the net area irrigated to the net area sown was 5·6 as against 5·7 during 1952-53. The percentage of the gross irrigated area to the gross sown area remained the same, *viz.* 6·0 per cent., during the two years under comparison.

9. *Area irrigated under different sources of irrigation.*—The area irrigated by Government canals, private canals and tanks—all went up by 23,600 acres, 18,200 acres and 19,600 acres or by 5·5, 33·0 and 9·3 per cent., respectively. On the other hand, the area irrigated by wells and other sources went down by 41,500 acres and 5,700 acres or by 2·6 and 5·8 per cent., respectively.

10. *Irrigated areas under food and non-food crops.*—The total area irrigated by all sources was 2,687,900 acres as against 2,623,900 acres during the previous year, thus recording an increase of 2·4 per cent. The area irrigated under food crops during 1953-54 was 2,254,200 acres as against 2,170,900 acres during the previous year, thus recording a slight increase of 3·8 per cent. Significant increase was noticed in the case of *kharif jowar* and gram—irrigated acreages under these having gone up by 74·3 and 16·5 per cent., respectively. On the other hand, the irrigated area under non-food crops went down from 453,000 acres in 1952-53 to 433,700 acres in 1953-54 or by 4·3 per cent. A significant decrease of 57,700 acres or 43·4 per cent. was noticed only in the case of tobacco.

#### CHAPTER IV—CROPPED AREA.

(Tables IV-A, IV-B and IV-C—pages 82-148).

(Summary Table D—pages 31-34).

11. *Total area under crops.*—During the year 1953-54, the total gross cropped area of 44,878,200 acres was higher than the corresponding figure of the previous year, *viz.* 43,456,800 acres, by 3·3 per cent. or by 1,421,400 acres. Of this total gross cropped area, 13,943,700 acres were in the Gujarat, 2,443,100 acres in the Konkan, 17,123,500 acres in the Deccan and 11,367,900 acres in the Karnatak, the percentage increase in each division being 2·6, 2·7, 4·8 and 2·0 respectively. For the State as a whole, food crops occupied 32,610,500 acres or 72·7 per cent., while non-food crops occupied 12,267,700 acres or 27·3 per cent., of the total area sown. During the year under review, the acreage under food and non-food crops went up by 1,152,100 acres and 269,300 acres or 3·7 and 2·2 per cent. respectively, while the corresponding areas during 1952-53 were 31,458,400 acres and 11,998,400 acres respectively.

The table below gives the acreage under food and non-food crops in the four divisions of the State during 1952-53 and 1953-54 :—

(Area figures in hundreds).

Division.	Food Crops.			Non-food Crops.		
	1952-53.	1953-54.	Percentage increase or decrease.	1952-53.	1953-54.	Percentage increase or decrease.
	Acres.	Acres.		Acres.	Acres.	
Gujarat ..	90,128	92,126	+2.2	45,788	47,311	+3.3
Konkan ..	18,036	18,875	+4.9	5,749	6,056	+5.3
Deccan ..	127,104	134,369	+5.7	36,350	36,866	+1.4
Karnatak ..	79,316	81,235	+2.4	32,097	32,444	+1.1
State ..	314,584	326,105	+3.7	119,984	122,677	+2.2

It will be seen from the above table that both in the case of food and non-food crops, there has been an increase in the area in all the divisions of the State. In the case of food crops, the increase in the four divisions *viz.*, the Gujarat, the Konkan, the Deccan and the Karnatak was of the order of 199,800 acres, 33,900 acres, 726,600 acres and 191,900 acres or 2.2, 1.9, 5.7 and 2.4 per cent. respectively. In the case of non-food crops, there was an increase of 152,300 acres or 3.3 per cent., 30,700 acres or 5.3 per cent., 51,600 acres or 1.4 per cent. and 31,700 acres or 1.1 per cent., respectively, in the four divisions of the State.

12. *Food crops.*—Among the main food crops, as compared with the corresponding figures of the previous year, the area under rice went up by 3.1 per cent. or 99,200 acres. This increase was shared by all the divisions in the State but mainly by the Gujarat, where the acreage went up by 46,500 acres or 4.3 per cent. The area under wheat recorded an increase of 165,600 acres or 9.2 per cent. This was mainly due to an increase of 174,300 acres or 27.2 per cent., in the Gujarat, which was attributed to favourable rains. The acreage in the Deccan also went up by 10.6 per cent., or 57,600 acres, while that in the Karnatak went down by 66,300 acres or 10.6 per cent. The acreage under *kharif jowar* recorded a decrease of 61,400 acres or 1.5 per cent. at the State level. This decrease was due to the decline in acreage in the Gujarat by 142,200 acres or 9.4 per cent. The Deccan and the Karnatak, on the other hand, recorded an increase of 53,600 acres or 7.3 per cent. and 27,300 acres or 1.5 per cent., respectively. The area under *rabi jowar* also recorded a decrease of 4.7 per cent. or 361,500 acres. This decrease was shared by all the *jowar* growing divisions, *viz.* the Gujarat, the Deccan and the Karnatak and was of the order of 75,500 acres, 237,700 acres and 51,300 acres or 14.5, 4.6 and 2.5 per cent., respectively. The area under *bajri* recorded an increase of 665,800 acres or 9.5 per cent. at the State level. This increase was shared by the Deccan and the Karnatak divisions, where the acreage went up by 487,200 acres

or 15.0 per cent. and 192,700 acres or 19.3 per cent., respectively and was attributed to favourable rains. In the Gujarat, however, there was a slight decrease of 0.5 per cent. or 14,100 acres. The area under *ragi*, for the State as a whole, remained almost stationary showing an insignificant decrease of 800 acres or 0.1 per cent. The area under maize showed a decrease of 1.8 per cent. at the State level, having gone down by 10,400 acres. This decrease was mainly due to a decrease in the area in the Gujarat, where the acreage went down by 2.9 per cent. or 14,800 acres. In the remaining divisions of the Deccan and the Karnatak, however, the acreage went up by 200 acres or 0.5 per cent. and 4,200 acres or 10.8 per cent., respectively. In the case of gram, the acreage went up by 86,800 acres or 13.2 per cent. and this increase was mainly due to an increase in the Gujarat and the Deccan divisions by 51.7 and 11.4 per cent. or 59,200 acres and 34,700 acres respectively. The acreage in the Karnatak, however, went down by 7,600 acres or 3.2 per cent. The area under *tur* recorded an increase of 16.7 per cent., or 103,900 acres at the State level. This increase was shared by all the divisions, but mainly by the Gujarat and the Deccan, where the acreage went up by 41,600 acres or 23.5 per cent. and 49,100 acres or 23.5 per cent., respectively. The increase in the acreage was attributed to the favourable rains. The area under sugarcane decreased by 21,400 acres or 9.5 per cent. for the State as a whole. This decrease was again shared by all the divisions and was of the order of 1,100 acres, 300 acres, 9,600 acres and 10,400 acres or 11.8, 7.3, 7.8 and 11.8 per cent. in the Gujarat, the Konkan, the Deccan and the Karnatak respectively. The total area under *kharif* food crops, for the State as a whole, went up by 4.0 per cent. and the area under *rabi* food crops went up by 3.0 per cent.

13. *Non-food Crops*.—In the case of cotton, there was a large increase in the acreage at the State level by as much as 560,600 acres or 16.3 per cent. This increase was shared by all the cotton-growing divisions of the State *viz.* the Gujarat, the Deccan and the Karnatak and was of the order of 124,800 acres or 6.9 per cent., 270,100 acres or 40.4 per cent. and 165,700 acres or 17.0 per cent., respectively. This large increase in area was attributed partly to favourable rains and partly to diversion of land to this crop. The area under groundnut went down in the Gujarat, the Deccan and the Karnatak divisions by 56,000 acres, 276,800 acres and 106,600 acres or 9.1, 26.8 and 8.8 per cent., respectively, as a result of which the acreage at the State level recorded a fall of 15.4 per cent. or 439,400 acres. The large decrease in the Deccan was reported to be mostly due to the diversion of the area to cotton and partly to food crops. The acreage under sesamum went down by 2.1 per cent. or 7,400 acres, the decrease being shared by the Gujarat, the Konkan and the Karnatak, where it was of the order of 20,700 acres or 8.4 per cent., 1,200 acres or 6.2 per cent. and 1,600 acres or 5.2 per cent. respectively. The Deccan division, however, recorded an increase of 25.5 per cent. or 16,100 acres. The area under tobacco went up by 19,300 acres or 6.6 per cent. This increase was shared by the Deccan and the Karnatak divisions, where the acreage went up by 2,100 acres or 33.3 per cent. and 20,200 acres or 16.3 per cent. respectively. The Gujarat, however, recorded a fall of 1.8 per cent. or 3,000 acres. The large increase in the Deccan and the Karnatak divisions was attributed to the good demand for the commodity in the market and due to favourable rains. The total area under *kharif* non-food crops and *rabi* non-food crops—both went up by 0.7 and 7.6 per cent., respectively.

14. On the whole, during the year under review, there has been only a small increase in the gross cropped area, as compared with the corresponding figure of the previous year. The accompanying table gives the gross cropped area, double cropped area, net cropped area and the area under principal crops in the four divisions of the State during 1952-53 and 1953-54.

## CHAPTER V—OUTTURN OF CROPS AND THEIR AVERAGE YIELDS.

(Tables V-A and V-B—pages 149-190).

(Summary Table E—pages 35-36).

15. *Outturn of crops.*—The table below shows the outturn in tons for principal *kharif* and *rabi* crops :—

(Figures in thousands.)

Division	Kharif Crops			Rabi Crops			Total cereals	Total pulses	Total cereals and pulses
	Cereals	Pulses	Total cereals and pulses.	Cereals	Pulses	Total cereals and pulses.			
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
Gujarat	1,446	141	1,587	333	32	365	1,779	173	1,952
Konkan	758	13	771	32	1	33	790	14	804
Deccan	787	144	931	655	119	774	1,442	263	1,705
Karnatak	730	164	894	463	57	520	1,193	161	1,354
State	3,721	402	4,123	1,423	209	1,632	5,144	611	5,755

As for the outturn of crops, the situation in all the divisions of the State was quite satisfactory and remarkably good yields were recorded resulting in increased average yields and outturn in each division, which may be attributed to the favourable season already described. However, in the comparison made in the following paragraphs of the outturn of crops of the year under report with that of the previous year, it may be borne in mind that the relatively large increase in the outturn observed for the year 1953-54 is partly due to the low yields obtained in 1952-53 caused by the unfavourable season which prevailed in that year and partly due to the better yields obtained in 1953-54 on account of the favourable seasonal conditions.

The remarks in respect of major crops are given below :—

*Rice.*—In the Gujarat, the season was favourable to the crop. The crop was, however, affected to some extent in low lying areas of Mehsana district due to continuous rains. In the Konkan, the rainfall proved heavy in many areas hindering field operations and damaging the crop. In some places young seedlings were washed away and the crop had to be resown. This affected the crop yields to some extent. However, the season on the whole was satisfactory. In the Deccan, the rains were adequate and the germination and further growth of the crop were fairly satisfactory. In the Karnatak, the crop, which was affected on account of heavy and continuous rains in the beginning, progressed well later on. The attack of grass-hoppers and stem-borers was noticed in Kaira district, while jassids trouble and army-worms were reported from parts of Surat district. Army-worms were also noticed in parts of Banaskantha district. Hoppers from some areas of Dahanu taluka and swarming caterpillars from scattered areas in Thana district were reported. The crop was affected by bacterial disease in the early growth stage in parts of Kolaba district. Attack of blue-beetles was reported from places in Mundgod taluka of Kanara district. The crop was affected by army-worms in some areas of Kolaba and Poona districts and parts of Belgaum district. Caterpillars damaged the crop in South Satara and Kolhapur districts.

Mild attack of blue-beetles was reported from Dharwar district. The total area and outturn of the crop in the Bombay State, *viz.*, 3,285,500 acres and 1,343,500 tons showed an increase of 3·1 and 37·8 per cent. respectively, over the corresponding figures of the previous year of 3,186,300 acres and 978,900 tons.

*Wheat.*—In the Gujarat, the crop fared well and the rainfall was adequate. The dry crop suffered to some extent in Ahmedabad district due to cloudy weather. In the Deccan, the condition of the dry crop was unsatisfactory in the early stage in many areas due to inadequate soil-moisture; later on, however, the crop progressed well. It was given irrigation wherever possible. In the Karnatak, the condition of the crop was reported to be fairly good except in some areas where it was adversely affected in growth for want of sufficient moisture in the soil. Rat trouble was reported from parts of Panch Mahals district. The crop was affected by fog in Broach district. Rat trouble was noticed in West Khandesh district and some areas of South Satara district. Rust was observed in some areas of Nasik and Sholapur districts in the Deccan and South Satara, Kolhapur, Bijapur and Dharwar districts in the Karnatak. For the State as a whole, the area and outturn of the crop during the year under report, *viz.*, 1,973,300 acres and 362,700 tons showed an increase over the corresponding figures of 1,807,700 acres and 263,000 tons recorded during the previous year by 9·2 and 37·9 per cent., respectively.

*Kharif Jowar.*—In the Gujarat and the Deccan, the crop developed fairly satisfactorily, although in some areas the growth of the crop was hampered on account of the absence of late rains. In the Karnatak, the October rains proved excessive and adversely affected the crop in some parts, particularly in the low-lying areas. The crop suffered due to break in rains in August in dry tracts. Grass-hopper attack was reported from East Khandesh district in the Deccan and from parts of all the districts in the Karnatak except Kolhapur. Army-worms and stem-borers were noticed in parts of South Satara and Dharwar districts in the Karnatak. Sugary disease was observed in parts of Belgaum and Bijapur districts and also rust in the latter district. In spite of a slight decrease in the area under the crop of 1·5 per cent. or from 4,085,700 acres in 1952-53 to 4,024,300 acres in 1953-54, the outturn of the crop increased by as much as 33·0 per cent. or from 607,500 tons in 1952-53 to 807,900 tons during the year under report.

*Rabi Jowar.*—In the Gujarat, the crop progressed fairly well although it suffered to some extent in parts of Broach and Panch Mahals districts due to the absence of late rains and on account of cold wave in January in the former district. In the Deccan, the growth of the crop was fairly satisfactory except in Poona district where it suffered to some extent on account of the failure or deficiency of late rains. The dry crop withered in some areas. In the Karnatak, sowings were delayed in some areas due to heavy rains. Shortage of well water for irrigation was felt in South Satara district. Due to unfavourable climatic conditions, the crop suffered in some places in Bijapur district, while inadequacy of soil-moisture gave a set-back to the crop growth in parts of South Satara district. However, in general, the crop fared well in the division. Slight attack of *Chikta* was observed in parts of Nasik, Ahmednagar and South Satara

districts, while *Khairya* was also observed in Ahmednagar district. Although the area under the crop went down from 7,765,900 acres to 7,401,400 acres or by 4.7 per cent., the outturn of the crop increased by 54.3 per cent. or from 528,000 tons in 1952-53 to 814,600 tons in 1953-54.

*Bajri*.—In the Gujarat, the crop in some areas was damaged to certain extent due to heavy and continuous rains in the months of August and September. The formation of the grain was poor in the case of the early sown crop in the low-lying areas of Mehsana district, while it was discoloured in parts of Kaira district due to heavy rains. Elsewhere in the division the crop progressed fairly well. In the Deccan, the crop generally progressed satisfactorily, but was damaged to some extent due to October rains in parts of East Khandesh, Nasik and Sholapur districts, while it suffered in some areas of Poona district due to insufficient rains. In the Karnatak, sowings were delayed due to inadequate moisture in the soil in Bijapur district. The crop suffered to a varying extent on account of heavy and continuous rains during September and October. The crop was damaged by grass-hoppers in parts of Surat and in a few villages of Hansot Mahal of Broach district. Attack of army-worms was noticed in some talukas of Ahmednagar and parts of Poona district. The crop was attacked by army worms and caterpillars in parts of South Satara and by blister-beetles in some areas of Bijapur district. Whereas the area under the crop recorded an increase of 9.5 per cent. only or from 7,040,200 acres in 1952-53 to 7,706,000 acres in 1953-54, the outturn went up considerably from 570,000 tons of the previous year to 951,400 tons during the year under report or by 66.9 per cent.

*Maize*.—In the Gujarat, the rainfall was favourable to the crop which progressed satisfactorily. The crop was, however, adversely affected by heavy rains in parts of Banaskantha and Broach districts, while it suffered in its early stage in parts of Panch Mahals district due to inadequacy of rains. In the Deccan and the Karnatak the crop was reported to have fared well. In Dangs district, the growth of the crop was adversely affected due to heavy rains and lodging in some areas. In Kolhapur district the crop suffered due to excessive rainfall. Attack of stem-borers was noticed in some parts of Banaskantha district. Caterpillars were observed in the beginning of the season in some areas of Panch Mahals district and later on the crop was affected by 'fadka' grass-hoppers and *katra* in the eastern parts of the district. In spite of a decrease in the area under the crop by 1.8 per cent. or from 581,500 acres in 1952-53 to 571,100 acres in 1953-54, the outturn increased by more than one and a half times or from 91,600 tons in 1952-53 to 239,500 tons in 1953-54.

*Ragi*.—In the Gujarat and the Konkan, the rainfall was sufficient and favourable for the growth and development of the crop. The crop was, however, affected to some extent in its seedling stage due to heavy rains in parts of Ratnagiri district. In the Deccan also the condition of the crop was fairly good. In the Karnatak, the crop suffered in its early stage due to heavy rains in parts of Kolhapur, Belgaum and Dharwar districts, but the condition later on improved due to favourable weather conditions.

The crop was slightly affected by fungus disease in parts of Dangs district, and by swarming caterpillars in Nasik district. Army-worms were observed in parts of Poona district. The area under the crop remained almost constant being 779,700 acres during the year under review as against 780,500 acres during 1952-53 ; but the outturn went up by 19.0 per cent. or from 191,500 tons in the previous year to 227,900 tons during the year under report.

*Gram.*—In the Gujarat, the crop progressed fairly well. However, it suffered to some extent due to excessive cold weather in parts of Mehsana district and due to insufficient soil-moisture in some areas of Panch Mahals and Broach districts. In the Konkan the crop fared generally well. In the Deccan and the Karnatak, the condition of the crop was reported to be fairly good although the crop suffered to some extent in Nasik district due to inadequate soil-moisture. Sowings were delayed in South Satara district due to heavy rains. Slight attack of gram pod-borers was reported from parts of Panch Mahals district. During the year under report the area and outturn of the crop, viz., 743,700 acres and 95,500 tons were above the corresponding figures of 656,900 acres and 59,100 tons of the previous year by 13.2 and 61.6 per cent., respectively.

*Cotton.*—In the Gujarat, the crop progressed well except that it was slightly affected by frost in parts of Mehsana, Sabarkantha, Ahmedabad and Baroda districts and on account of cloudy weather conditions in parts of Broach district. In Amreli district also the crop suffered from excessive rains and cloudy weather conditions which caused shedding of bolls in places. The crop was affected on account of floods in parts of Ahmedabad district. In the Deccan and the Karnatak, the crop fared well although in some places in Belgaum district it suffered in growth due to heavy rains. Sowings were delayed in Poona and southern parts of Ahmednagar district for want of adequate rains. In the Karnatak, the crop was affected by October rains but the condition improved to a considerable extent due to favourable weather conditions later on. The crop was slightly attacked by aphids in parts of Ahmedabad, Kaira and Surat districts, while thrips was noticed in parts of Surat district. Attack of boll-worms and aphids was reported from parts of Amreli district and attack of jassids was noticed in parts of Broach district. Slight attack of root-rot and leaf-rollers was observed in parts of Kaira and Panch Mahals districts, respectively. The crop was slightly affected by jassids, aphids, leaf-rollers and boll-worms in parts of Ahmednagar and Poona districts. Red-leaf-blight was observed in some areas of Sholapur and Belgaum districts. The crop was affected by black arm, red-leaf-blight and by root-rot in parts of Bijapur and Dharwar districts. The area and outturn of the crop in 1952-53, viz., 3,439,600 acres and 641,600 bales went up during the year under report to 4,000,200 acres and 1,065,600 bales or by 16.3 and 66.1 per cent., respectively.

16. *Yield per acre.*—During the year under review, statewide crop estimation surveys were continued on the ten principal crops, viz., paddy, *kharif jowar*, *bajri*, wheat, *rabi jowar*, gram, cotton, tobacco, maize and groundnut, while the survey on *ragi* was continued in Ratnagiri and Dangs districts.

17. *Kharif crops*.—The State as well as the divisionwise average yields per acre of *kharif* food crops based on crop estimation surveys are given below :—

Division.	Yield per acre.								
	Rice			Kharif Jowar			Bajri		
	1952-53	1953-54	Percentage increase or decrease.	1952-53	1953-54	Percentage increase or decrease.	1952-53	1953-54	Percentage increase or decrease.
	Lb.	Lb.		Lb.	Lb.		Lb.	Lb.	
Gujarat	319	692	+116.9	218	277	+27.1	266	348	+30.8
Konkan	1,069	1,289	+20.6	509	533	+4.7			
Deccan	534	615	+15.2	198	575	+190.4	129	251	+94.6
Karnatak	692	792	+14.5	480	523	+9.0	118	190	+61.0
State	688	919	+33.6	333	450	+35.1	181	277	+53.0

From the table, it is seen that for rice, the average yield per acre went up in all the divisions of the State, with a consequent increase in the State average yield from 688 lb. to 919 lb. per acre or by 33.6 per cent. This increase at the State level was largely due to the large increase in the average yield in the Gujarat, where it went up by 116.9 per cent. or from 319 lb. in 1952-53 to 692 lb. per acre during the year under report. The average yield per acre of *kharif jowar* for the State as a whole was 450 lb. as against 333 lb. during the previous year, thus recording an increase of 35.1 per cent. This was largely due to the increase in the average yield of the Deccan from 198 lb. to 575 lb. or by 190.4 per cent. The low yield obtained in 1952-53 was due to the unfavourable season, which affected all the crops in this division severely that year. The remaining divisions also recorded an increase in the average yield. In the case of *bajri*, the yields recorded a considerable increase in all the *bajri*-growing divisions, particularly in the Deccan, the average yields per acre being 348 lb., 251 lb., and 190 lb. in 1953-54 in the Gujarat, the Deccan and the Karnatak divisions, respectively, as against 266 lb., 129 lb. and 118 lb. in 1952-53, thus recording an increase of 30.8, 94.6 and 61.0 per cent., respectively. Consequently, the state average went up from 181 lb. in 1952-53 to 277 lb. during the year under report or by 53.0 per cent.

The average yield per acre of *tur* and sesamum (based on anna-valuation figures of the Revenue Department) for the four divisions of the State are as shown below :—

Division.	Yield per acre.					
	Tur			Sesamum		
	1952-53	1953-54	Percentage increase or decrease.	1952-53	1953-54	Percentage increase or decrease.
	Lb.	Lb.		Lb.	Lb.	
Gujarat	307	456	+48.5	187	262	+40.1
Konkan	264	282	+6.8	221	198	-10.4
Deccan	369	461	+24.9	149	198	+32.9
Karnatak	462	536	+16.0	146	216	+47.9
State	384	481	+25.3	178	240	+34.8

For *tur* again, the average yields per acre in all the divisions except the Konkan (where the area under the crop is very small being only 14,300 acres), and at the State level, went up considerably, those for the Gujarat, the Deccan, the Karnatak and the State going up from 307 lb., 369 lb., 462 lb. and 384 lb. in 1952-53 to 456 lb., 461 lb., 536 lb. and 481 lb. during the year under report or by 48·5, 24·9, 16·0 and 25·3 per cent., respectively. The Konkan division also recorded a small increase of 6·8 per cent. in the average yield. In the case of sesamum also, there was a large increase in the average yield per acre. Thus, at the State level, it increased from 178 lb. in 1952-53 to 240 lb. in 1953-54 or by 34·8 per cent. and was due to the increase in the average yields in all the divisions except the Konkan (having a small area of 18,100 acres under the crop), where the average yield went down by 10·4 per cent.

18. *Rabi crops*.—The State and divisionwise average yields per acre of *rabi* crops (based on crop estimation surveys) are as under :—

Division.	Yield per acre.					
	Wheat			Rabi Jowar		
	1952-53	1953-54	Percentage increase or decrease.	1952-53	1953-54	Percentage increase or decrease.
	Lb.	Lb.		Lb.	Lb.	
Gujarat	542	551	+1·7	445	461	+3·6
Deccan	225	378	+68·0	105	220	+109·5
Karnatak	192	245	+27·6	196	264	+34·7
State	326	412	+26·4	152	246	+61·8

From the table, it is seen that for both wheat and *rabi jowar*, there was an increase in the average yield in all the three crop-growing divisions of the State. For wheat, the increase in the Deccan and the Karnatak was of the order of 68·0 and 27·6 per cent., the average yields per acre rising from 225 lb. and 192 lb. to 378 lb. and 245 lb., respectively, resulting in an increase in the State average yield per acre from 326 lb. to 412 lb. or by 26·4 per cent. The average yield in the Gujarat showed a slight increase. In the case of *rabi jowar*, the state average yield per acre was 246 lb. as against 152 lb. during the previous year, thus recording a large increase of 61·8 per cent., which is due to the considerable increase in the average yield of the Deccan division (growing 66·6 per cent. of the crop in the State) from 105 lb. in 1952-53 to 220 lb. during the year under report, or by 109·5 per cent. The Karnatak division also gave a higher yield of 264 lb. per acre in 1953-54 as compared with 196 lb. per acre of the previous year, the increase being 34·7 per cent. The average yield in the Gujarat showed a small increase.

The average yields per acre of *rabi* crops *viz.*, gram (based on crop estimation surveys), linseed, rape and mustard (based on anna-valuation figures of the Revenue Department) for the four divisions of the State are given below :—

Division.	Yield per acre								
	Gram			Linseed.			Rape and Mustard.		
	1952-53	1953-54	Percentage increase or decrease.	1952-53	1953-54	Percentage increase or decrease.	1952-53	1953-54	Percentage increase or decrease.
	Lb.	Lb.		Lb.	Lb.		Lb.	Lb.	
Gujarat	274	334	+21.9	..	..	..	287	357	+24.4
Konkan	267	238	-10.9	..	..	..	..	..	..
Deccan	186	285	+53.2	109	161	+47.7	196	226	+15.3
Karnatak	185	257	+38.9	156	183	+17.3	243	280	+15.2
State	202	288	+42.6	143	177	+23.8	269	328	+21.9

For gram, the average yield per acre at the State level as well as in the Gujarat, the Deccan and the Karnatak divisions went up considerably, being 288 lb., 334 lb., 285 lb. and 257 lb. during the year under report, as against the corresponding figures of the previous year, *viz.*, 202 lb., 274 lb., 186 lb. and 185 lb., thus recording an increase of 42.6, 21.9, 53.2 and 38.9 per cent. respectively. The Konkan division (having a small area of 4,700 acres under the crop), however, recorded a decrease of 10.9 per cent. In the case of linseed, the average yield per acre for the State rose from 143 lb. in 1952-53 to 177 lb. in 1953-54 or by 23.8 per cent. The average yield of rape and mustard also went up from 269 lb. in 1952-53 to 328 lb. during the year under report or by 21.9 per cent.

19. *Cotton, sugarcane and tobacco.*—The table below gives the average yield per acre of cotton (based on crop estimation surveys), sugarcane (based on anna-valuation figures of the Revenue Department) and tobacco (based partly on crop estimation surveys in the major crop-growing districts and partly on anna-valuation figures of the Revenue Department).

Division	Yield per acre.								
	Cotton.			Sugarcane.			Tobacco		
	1952-53	1953-54	Percentage increase or decrease.	1952-53	1953-54	Percentage increase or decrease	1952-53	1953-54	Percentage increase or decrease.
	Lb. (Lint).	Lb. (Lint).		Lb. (Gul)	Lb. (Gul)		Lb. (Dry leaf).	Lb. (Dry leaf).	
Gujarat	99	125	+25.3	4,745	5,026	+5.9	602	659	+9.5
Konkan	..	..	..	3,879	4,185	+7.9	..	..	..
Deccan	44	109	+147.7	5,861	6,774	+15.6	569	480	-15.6
Karnatak	45	66	+46.7	6,580	6,321	+4.0	438	366	-16.4
State	73	104	+42.6	5,865	6,481	+10.5	532	519	-2.4

The average yield per acre of cotton for the State was 104 lb. (lint) as against 73 lb. (lint) during the previous year. The average yield went up considerably in all the three crop-growing divisions and mainly in the Deccan, where it increased from 44 lb. (lint) to 109 lb. (lint) per acre or by 147·7 per cent. The yield per acre of sugarcane was 6,481 lb. (*gul*) during 1953-54 as against 5,865 lb. (*gul*) recorded during the previous year, thus showing an increase of 10·5 per cent., which was shared by all the divisions in the State. The average yield per acre of tobacco remained almost stationary, being 519 lb. (dry leaf) in 1953-54 as against 532 lb. (dry leaf) recorded during 1952-53, thus showing a slight decrease of 2·4 per cent.

20. *Cotton*.—During the year under report, the total area and outturn of cotton were 4,000 thousand acres and 1,066 thousand bales as against 3,440 thousand acres and 642 thousand bales during 1952-53, thus recording an increase of 16·3 and 66·0 per cent., respectively.

The table below gives the total area and outturn of cotton in the different cotton-growing divisions of the State during 1952-53 and 1953-54.

(Area and outturn figures in thousands).

Division.	Area in acres.			Outturn in bales of 392 lb. each.		
	1952-53	1953-54	Percentage increase or decrease.	1952-53	1953-54	Percentage increase or decrease.
Gujarat ..	1,799	1,923	+6·9	455	613	+34·7
Deccan ..	668	938	+40·4	75	261	+248·0
Karnatak ..	973	1,139	+17·1	112	192	+71·4
State ..	3,440	4,000	+16·3	642	1,066	+66·0

## CHAPTER VI—PRICES.

(Table VI—pages 191-198).

(Summary Table F—page 37).

21. Table VI of the report gives the average prices, during the harvest period of the principal crops in different districts. The favourable character of the season resulted in high crop yields consequent upon which the prices of agricultural produce ruled low in general. The policy of gradual relaxation of price control, which was adopted last year to minimise the irksomeness of controls without increasing the risk of encountering an undue rise in prices was found beneficial towards stabilising the food prices and assuring equitable distribution of foodgrains. It also helped to restore freedom of production and trade. The controls on foodgrains were lifted up by the end of the season due to the favourable food position in the country and the achievement of the targets fixed for food production for this stage of the First Five Year Plan.

22. The major variations in the average harvest prices of principal commodities at the State level and in the different divisions as compared with the prices during the corresponding period of the previous year are summarised below. It may be stated here that the prices for the two years under comparison are weighted averages and as such the figures taken for 1952-53 here slightly differ from those appearing in the printed report for that year.

At the State level, the price of rice (paddy) viz. Rs. 12-13 per maund of 82 2/7 lb., was lower by 7.7 per cent., than that of the previous year. The price fell by 5.9, 9.9, 9.6 and 7.3 per cent. in the Gujarat, the Konkan, the Deccan and the Karnatak, respectively. The price of wheat, viz. Rs. 16-14 per maund, was lower by 7.2 per cent. for the State, it being 9.4, 5.9 and 15.8 per cent. below last year's prices in the case of the Gujarat, the Konkan and the Karnatak, respectively. It, however, increased by 1.7 per cent. in the Deccan. The price of Rs. 12-9 per maund of *jowar* at the State level was higher by 7.5 per cent. when compared with that of the previous year. The rise was noted in all the divisions and was of the order of 1.9, 5.1, 1.0 and 24.0 per cent. in the Gujarat, the Konkan, the Deccan and the Karnatak, respectively. At the State level, the average price of Rs. 13-3 per maund of *bajri* showed a rise of 5.5 per cent. when compared with that of Rs. 12-8 of the previous year. The price increased in all the divisions the increase over that of the previous year being 1.0, 15.7, 8.4 and 15.7 per cent. in the Gujarat, the Konkan, the Deccan and the Karnatak, respectively. The average price of Rs. 9-6 for barley for the State ruled lower by 15.7 per cent. than that of the previous year. The price fell by 15.6 and 15.0 per cent. in the Gujarat and the Deccan, respectively, although that in the Karnatak recorded an increase of 8.5 per cent. The average price of Rs. 11-10 for *ragi* (nachni) for the State was lower than that of the previous year by 9.7 per cent. : the price decreased by 20.2, 31.6 and 15.8 per cent. in the Gujarat, the Konkan and the Karnatak, respectively, while that in the Deccan showed an increase of 30.5 per cent. The average price of maize viz. Rs. 8-12 per maund was lower by 16.2 per cent. falling by 16.3 and 20.0 per cent. in the Gujarat and the Konkan, respectively, while that in the Deccan went up by 5.0 per cent. The price in the Karnatak, however, remained constant. The average price of kodra of Rs. 8-6 was higher by 7.2 per cent. for the State rising by 6.4 and 25.0 per cent. in the Gujarat and the Deccan respectively. It, however, went down by 9.4 and 8.5 per cent. in the Konkan and the Karnatak, respectively. Among pulses, the average price of *tur dal* at the State level, viz., Rs. 16-15 was lower by 1.5 per cent. The price fell by 19.2, 13.0 and 4.5 per cent. in the Konkan, the Deccan and the Karnatak, respectively. It, however, rose by 1.4 per cent. in the Gujarat. The price of gram viz., Rs. 15-9 per maund was lower by 22.9 per cent. The fall was noted in all the divisions and was by 12.5, 19.3, 26.3 and 26.2 per cent. in the Gujarat, the Konkan, the Deccan and the Karnatak, respectively. The average price of *gul*, viz., Rs. 18-12 was higher than that of the previous year by 13.6 per cent. The rise was noted in all the divisions and was by 22.6, 14.8, 8.5 and 18.5 per cent. in the Gujarat, the Konkan, the Deccan and the Karnatak, respectively. The average price of groundnut, viz., Rs. 17-2 was higher by 4.2 per cent. than that of the previous year and it was 3.2, 4.7 and 5.4 per cent. higher in the Gujarat, the Deccan and the Karnatak, respectively. The price of Rs. 41/- per maund of tobacco was lower by 36.1 per cent. having gone down by 36.0, 8.3 and 3.7 per cent. in the

Gujarat, the Deccan and the Karnatak, respectively. This fall in the price of tobacco may partly be attributed to the restrictions imposed on the export of the commodity which resulted in depression in the tobacco market. The average price of cotton *viz.*, Rs. 34-11 was higher by 1.1 per cent. at the State level. The rise was noted in the three crop-growing divisions where it was by 9.6, 11.5 and 4.7 per cent. in the Gujarat, the Deccan and the Karnatak, respectively.

23. The table below compares prices of Broach and Jarila cotton ruling at Bombay during the year under review with those of the previous year and the average of the preceding five years :—

Variety of cotton.	Price per khandi of 784 lb.			Variations.	
	Average for the five years ending 1952.	1953.	1954.	Compared with the average price.	Compared with the price of 1953.
	Rs.	Rs.	Rs.	Per cent.	Per cent.
Broach ..	864	925	925	+7.1	Nil.
Jarila ..	712	820	820	+15.2	Nil.

The prices of cotton in the latter part of 1953 till November 1953, showed a downward trend due to less favourable business transactions and they were at the lowest during October-November 1953. There has, however, been a rise in prices upto February 1954, in view of good crop prospects and hopes for more liberal export policy of raw cotton for the season. But due to inadequate export facilities, etc., there was again a fall in the prices. Measures were, however, taken by Government by way of a slight reduction in export duty and in the excise duty, etc., so as to improve the demand for cotton and cotton textiles both at home and abroad.

In the sub-joined table, the prices of Jarila fine and Broach (Vijay) cotton ruling at Bombay have been given for the months for which the prices were available :—

(Price per khandi of 784 lb).

Year and month.	Jarila (Fine) (Average price)	Broach (Vijay) (Average price).
	Rs.	Rs.
August 1953 .. ..	729	864
September 1953 .. ..	715	....
October 1953 .. ..	690	....

April 1954 .. ..	754	852
May 1954 .. ..	741	856
June 1954 .. ..	710	823
July 1954 .. ..	703	810

## CHAPTER VII—AGRICULTURAL WAGES.

(Table VII—pages 199-211).

(Summary Table G—page 38).

24. In this State, according to the Manual of Revenue Accounts, agricultural labour is classified under three categories, *viz.* (a) skilled, (b) ordinary and (c) field labour. Skilled labour comprises carpenters, blacksmiths and cobblers; ordinary labour consists of load-carrying coolies, well-diggers, masons or carpenters' assistants, earth workers, etc., while field labour comprises ploughmen, sowers, reapers, harvesters, weeders and transplanters, etc. In the report (in Table VII—Agricultural wages), in addition to the above three categories, one more is added, *viz.* herdsmen, whose main work is to collect livestock from different owners and to feed them in the jungle during the day and to bring them back in the evening to the owners' places.

25. Table VII of the report gives districtwise figures of wages of different classes of agricultural labour. Wages of agricultural labour did not show marked variations as compared with those in the previous year although in view of the gradual fall in prices of agricultural produce, the agricultural wages also showed a downward trend and remained almost constant throughout the year. A perusal of the table shows that during the year under report, the annual average rates of wages under all occupations were slightly lower than the corresponding rates in the previous year. Due to satisfactory nature of the agricultural season, the agricultural labour remained employed in the field work during the major part of the year, while, in the scarcity zones, the agricultural labour was engaged on scarcity relief works started by Government.

## CHAPTER VIII—AGRICULTURAL STOCK.

(Table VIII—pages 212-216).

(Summary Table H—pages 39-40).

26. Table VIII of this report gives details of livestock, poultry and agricultural machinery and implements in the Bombay State as enumerated in the Census of livestock held in January, 1951. The details were published in the Season and Crop Report for 1950-51, and the same figures and remarks are repeated in the present report and will be continued in the subsequent report till the figures of next quinquennial livestock census become available.

*Cattle.*—There is an increase in the number of cattle from 11,422,021 to 11,915,298 or 4.3 per cent., over that of the preceding year. The number of breeding bulls over three years remained almost the same as in the previous year, while the number of other males over three years increased by 6.4 per cent. The number of breeding cows over three years, however, went down by as much as 34.1 per cent., as against which there was an increase in the number of other cows over three years by as much as 112.4 per cent. The number of young stock showed an increase of 4.3 per cent., over that of 1949-50.

*Buffaloes.*—The total number of buffaloes decreased from 4,293,336 of 1949-50 to 4,161,950 or by 3.1 per cent. The number of breeding bulls over three years showed a considerable drop of 68.2 per cent., while the number of other males over three years, breeding cows over three years and young stock also decreased by 10.0, 18.8 and 13.1 per cent., respectively. The number of other cows over three years, however, increased by 132.2 per cent..

*Sheep and goats.*—While the number of sheep went down by 17.0 per cent., that of goats increased by 7.2 per cent. as compared with the corresponding number of the previous year.

*Agricultural Machinery and Implements.*—During 1950-51 the number of tractors in the State was 1,072. Unfortunately, data for earlier years are not available, but the recent drive for Grow More Food has definitely resulted in an increase in the number of tractors. The number of ploughs was 2,582,286 while the number of carts totalled 1,077,372.

## CHAPTER IX—AGRICULTURAL OUTLOOK.

27. As mentioned in Chapter I of the Report, the season under review was satisfactory over most of the State and proved the best of the last five seasons. It was favourable both for *kharif* and *rabi* crops over most parts of the State on account of the adequacy and even distribution of rainfall resulting in satisfactory growth of crops. The favourable character of the season was reflected in the increase in the total area under cultivation and the appreciable increase in the total output of the principal crops.

28. The table below compares for the years 1952-53 and 1953-54 the actual acreage sown and the outturn of foodgrain crops in the State and in its different divisions.

(Figures in thousands).

Division.	Area in acres.		Outturn in tons.	
	1952-53.	1953-54.	1952-53.	1953-54.
Gujarat .. ..	8,815	8,993	1,251	1,952
Konkan .. ..	1,728	1,748	672	804
Deccan .. ..	12,365	13,103	903	1,705
Karnatak .. ..	7,626	7,840	1,060	1,294
State .. ..	30,534	31,684	3,886	5,755

29. Owing to the satisfactory yield position of different crops, no shortage of food and fodder was experienced and this, to some extent, brought an improvement in the economic condition of the cultivators. The favourable character of the season gave an impetus to bring more land under cultivation and the cultivators availed themselves of the various concessions afforded by Government towards adoption of intensive and improved methods of cultivation. The agriculturists took a keen interest in adopting scientific

methods to improve their crop yields and many more of them successfully adopted the Japanese method of cultivation of paddy with a view to get increased yields. Supply of improved seeds and manures, grant of remission and suspension where necessary, advance of *tagai* loans, adoption of improved cultivation practices, etc., contributed towards the increase in the yield of foodgrains. As a result of the satisfactory food position, Government gradually lifted the control on the movement and sale of different foodgrains and the cultivators could get ready market for their produce. The progress of the Five Year Plan, which is directed to bring about an all round economic development particularly of the rural areas, gathered a further momentum and as a result there were signs of general improvement in the agricultural economy. As the Community Development Projects started in the year 1952-53, with a view to lift the rural community to higher levels of economic organisation and arouse enthusiasm in it for new knowledge and improved ways of life, were confined to limited areas only, covering about 1,300 villages located in Mehsana, Sabarkantha, Thana, Kolaba, Kolhapur and Belgaum districts of the State, more areas were included in the scheme with a similar objective by converting one or two talukas in some of the other districts into Community Development Blocks or National Extension Service Blocks during the year under report. This has been helpful in associating the people in the rural areas, in particular, with the execution of the Five Year Plan and carrying out constructive work with their active help and co-operation with particular reference to the agricultural sector.

30. The condition of cattle was generally satisfactory. There were outbreaks in some areas of cattle diseases, such as hæmorrhagic septicæmia, rinderpest, foot and mouth and other animal diseases but these were brought under control by prompt and effective measures. These epizotics, however, did not hamper the progress of agricultural operations to any considerable extent.

31. The table below gives the average prices of agricultural commodities prevailing at harvest time for the years 1949-50 to 1953-54.

Prices in rupees per maund of 3,200 tolas except for cotton the prices of which are recorded in rupees per khandi of 784 lb.

Commodity.	Centre.	1949-50	1950-51	1951-52	1952-53	1953-54
		Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
<b>A. Food crops—</b>						
Jowar ..	(1) Sholapur ..	13 5 4	11 8 0	11 0 0	11 1 4	12 3 0
Bajri ..	(2) Nasik ..	.....	11 0 0	11 0 0	12 8 4	14 3 0
Rice ..	(3) Thana ..	20 0 0	20 0 0	20 0 0	18 2 0	21 5 4
<b>B. Export crops—</b>						
Wheat ..	(1) Ahmedabad ..	.....	20 2 4	20 5 4	20 8 0	18 0 0
Groundnut ..	(2) Karad ..	20 0 0	13 5 4	12 4 11	15 3 10	12 10 2
		<i>Per Khandi</i>				
Cotton (Jarlla) ..	Bombay ..	620 0 0	865 0 0	820 0 0	820 0 0	820 0 0

The centres mentioned in the above table are representative markets and accordingly the prices of agricultural produce in these markets indicate the general tendency in the variations of prices of these commodities in the State.

**CHAPTER X—CONDITION OF AGRICULTURAL POPULATION**

32. With a good season resulting in increased agricultural production, the food position was satisfactory and there was a general sufficiency of fodder over most of the State. Efforts were continued for the successful implementation of the Five Year Plan and the results so far achieved may be said to be encouraging. There was a greater awareness of the problems of planning for development and a greater hope of the realisation of the objectives of the Plan aided by the favourable season. However, high and sustained endeavours were still needed to carry out this stupendous undertaking to bring about an all round improvement with a view to raise the living standards of the people particularly in the rural areas. With this end in view, the pace of the working of the Community Development Programme was accelerated and new areas were brought under this scheme by converting one or two talukas located in different districts into Community Development Blocks or National Extension Service Blocks. All these efforts aided by the various facilities and assistance rendered by Government afforded considerable relief to the cultivators and helped them to make good the loss suffered in the previous year due to the failure of crops in large areas, while the improvement in the domestic production and the prevalence of open market prices benefited the consumer in general. With increased crop yields and progressive relaxation of controls on foodgrains and restoration of free market conditions, people had no difficulty in getting the foodgrains in open markets at reasonable rates. The market prices remained fluctuating immediately after the removal of control, but later on, they began to stabilise with a tendency to scale down. Wages of agricultural labour continued to be steady almost throughout the year being slightly lower than those in the previous year and the prices of foodgrains also showed a downward trend on account of the satisfactory crop yields.

T. G. SHIRNAME,  
Director of Agriculture,  
Bombay State, Poona.

## SUMMARY TABLE A.

## CLASSIFICATION OF AREA.

(Acreage figures in hundreds).

	1952-53		1953-54		Percentage increase or decrease.
	Area.	Percentage of total.	Area.	Percentage of total.	
	Acres.		Acres.		
Total area (by village papers)	707,945	..	709,715	..	+0.2

## SUMMARY TABLE E—concl'd.

[Outturn figures in hundreds.]

Crops	1952-53		1953-54	
	Average yield in lb. per acre	Total outturn in tons	Average yield in lb. per acre	Total outturn in tons
Cotton	73	6,416 (Bales)	104	10,656* (Bales)
Groundnut	311	3,967	658	7,116*
Sesamum	178	287	240	379
Rape	288	45	336	71
Mustard	245	31	317	42
Linseed	143	33	177	87
Castor	246	165	338	308
Tobacco	592	699	519	727†

\* These outturn estimates are entirely based on the results of Crop estimation surveys conducted in the year 1953-54.

† These outturn estimates are obtained by using the results of Crop estimation surveys for districts mentioned below against each crop; the anna-valuation and the Standard Normal Yield reported by the Collectors being used in the case of the remaining districts:—

Maize—All Gujarat districts and Belgaum district.

Ragi—Ratnagiri and Dange districts.

Tobacco—Ahmedabad, Kaira, Panch Mahals, Baroda, Broach, South Satara, Kolhapur, Belgaum and Dharwar districts.

N.A. = Not available.

*Note.*—The figures for 1949-50 and 1950-51 are not strictly comparable except for the groups "total of Cattle and Buffaloes" partly due to the fact that the census enumeration forms utilised for 1951 Livestock Census differed from those used in 1949-50 Census and partly to the possible difference in the geographical coverage of the two censuses.
