Season and Crop Report of the Bombay State

For the Year 1954-55

BOMBAY

PRINTED AT THE GOVERNMENT CENTRAL PRESS

Obtainable from the Government Publications Sales Depot, Institute of Science Building, Fort, Bombay (for purchasers in Bombay City); from the Government Book Depot, Charni Road Gardens, Bombay 4 (for orders from the mofussil) or through the High Commissioner for India, India House, Aldwych, London, W.C.2 or through any recognized Bookseller.

Price—Re. 1 or 1s. 8d.

1957

No. Res/S & C.R./52981/21842-F of 1956.

Poona-1, 13th October, 1956.

From

Dr. T. G. SHIRNAME, B.Ag. (Bom.), Ph.D. (Wales),
F.S.S. (Lond.), F.R.Econ. S. (Lond.),
Director of Agriculture, Bombay State, Poona.

To

THE SECRETARY TO GOVERNMENT,
Agriculture and Forests Department,
Sachivalaya, Bombay.

Sir,

I am to submit herewith the Annual Season and Crop Report of the Bombay State for the year ending 31st July, 1955.

Yours faithfully,

T. G. SHIRNAME,
Director of Agriculture, Bombay State.

SEASON AND CROP REPORT OF THE STATE OF BOMBAY FOR THE YEAR 1934-55

CONTENTS

	PARAS.	PAGES.
FORWARDING LETTER	I
ANNUAL SEASON AND CROP REPORT	1-32	1-27
I. <i>Character of the Season—</i>		
Remarks on the character of the season	1-3	1-5
II. <i>Area cultivated and uncultivated</i>	4-6	5
III. <i>Irrigated areas</i>	7-10	6-7
IV. <i>Cropped area</i>	11-14	7-13
V. <i>Outturn of crops and their average yields</i>	15-20	14-21
VI. <i>Prices—</i>		
Remarks on variations in prices of principal crops	21-23	22-23
VII. <i>Agricultural Wages</i>	24-25	24
VIII. <i>Agricultural Stock</i>	26	24-25
IX. <i>Agricultural Outlook</i>	27-31	25-26
X. <i>Condition of the Agricultural Population</i>	32	27
SUMMARY TABLES—		
A—Classification of area	28
B—Sources of water supply and the area irrigated therefrom	28-29
C—Acreage of crops irrigated	30-31
D—Area under all crops	31-34
E—Average yield per acre and the total outturn of crops	35-36
F—Farm prices of principal crops	37
G—Agricultural wages	38
H—Number of livestock, poultry and agricultural machinery...	39-40
STATISTICAL TABLES—		
I—Rainfall	41-46
II—Classification of area	47-51
III-A—Sources of water supply and the area irrigated therefrom...	52-63
III-B—Area of crops irrigated	64-81
IV-A—Area under food crops	82-122
IV-B—Area under non-food crops	123-143
IV-C—Details of cropped area	144-148

	PARAS.	PAGES.
STATISTICAL TABLES—contd.		
V-A—Standard yield per acre and the yield per acre in lb. of the principal crops 	149-184
V-B—Total outturn of principal crops in tons 	185-190
VI—Farm prices of certain commodities 	191-198
VII—Agricultural Wages 	199-211
VIII—Special Cattle Census (Agricultural Stock) 	212-216

SEASON AND CROP REPORT OF THE STATE OF BOMBAY FOR THE YEAR 1954-55.

CHAPTER I—SEASON.

The agricultural season of 1954-55 was favourable over most parts of the State. The ante-monsoon showers received were adequate only in the southern areas and sowing of paddy was undertaken in parts of the Konkan and the Karnatak. In June, the rainfall was substantial in the Konkan and light to moderate in other areas of the State. Preparatory tillage operations and sowing of *kharif* crops were in progress; but *kharif* sowings were held up in some parts due to inadequate rainfall. During the months of July, August and September, the precipitation was copious and widespread and as a result, field operations were carried on briskly and standing crops also made satisfactory progress. The rainfall received till and during October proved somewhat excessive in some areas and standing crops in parts of Ahmedabad, Kaira, West Khandesh, Dangs and Kolhapur districts were damaged to some extent. Elsewhere in the State, condition of crops was reported to be good. More rainfall, however, was needed in some areas of Nasik and North Satara districts in the Deccan and in South Satara, Bijapur and Dharwar districts in the Karnatak. During November, there was practically no rainfall in the State. In the second fortnight of December, the rainfall was light to fair in many areas, while in the month of January there were a few light showers in parts of the Deccan. February was practically rainless, and standing crops in parts of Ahmednagar, Poona, Sholapur and North Satara districts in the Deccan and South Satara district in the Karnatak were reported to be withering due to inadequate soil-moisture. Elsewhere, crops were making satisfactory progress and irrigation was resorted to wherever possible. During the second and fourth week of March, there were light showers in many areas of the Deccan and the Karnatak and these proved harmful to cotton in parts of the Karnatak. Fodder and water shortage prevailed in some areas of Dangs, Poona, Belgaum and Bijapur districts, while only water scarcity was reported from parts of North and South Satara districts.

2. *Distribution of rainfall.*—Table I (pages 41-46) compares the rainfall during the year under report with the normal rainfall at each headquarters station in the State. The figures of normal rainfall for each station were obtained from the India Meteorological Department. The following observations may be made from a study of this table:—

Pre-monsoon rains.—With the exception of Dharwar and Sholapur, where the rainfall exceeded the normal, the pre-monsoon rains were slightly below the normal at Karwar (Kanara), Kolhapur, Belgaum and in the hilly tracts of the Deccan and the Karnatak and much below the normal at Alibag, Ratnagiri, Nasik, Ahmednagar, Poona, Satara and Bijapur. At other places viz., at all the headquarters stations in the Gujarat except Broach, where there was light shower of one cent., these rains were absent as also at Thana, Dhulia, Jalgaon and Ahwa.

Monsoon rains.—The monsoon rains were slightly below the normal at Nasik and Dharwar, while they were appreciably in excess of the normal at all the stations in the State.

Post-monsoon rains.—The post-monsoon rains exceeded the normal at Baroda, Godhra, Surat and Karwar (Kanara), while they were below the normal at rest of the stations in the State except at Palanpur, Amreli and Jalgaon, where they were totally absent.

Winter rains.—The winter rains were in excess of the normal at Surat, Ratnagiri, Nasik, Poona and in the hilly tracts of the Deccan and the Karnatak, the same being below the normal at Thana, Karwar (Kanara), Dhulia, Jalgaon, Ahwa, Ahmednagar, Sholapur, Satara, Kolhapur, Belgaum, Bijapur and Dharwar and were totally absent at rest of the stations in the State.

Total rainfall for the season 1954-55.—The total rainfall for the season 1954-55 exceeded the normal at all the stations in the State except at Nasik, Satara, Kolhapur, Bijapur and Dharwar where it was slightly below the normal.

3. In the Gujarat, there were no pre-monsoon showers. During June and July, the precipitation in general was good. This facilitated timely preparatory tillage and also *kharif* sowing operations. In some areas of Banaskantha, Sabarkantha, Kaira and Panch Mahals districts more rains were needed for *kharif* sowings. Germination of crops was good and weeding and interculturing operations were in progress. Towards the end of July, transplanting of paddy was in progress. During the months of August and September, there was substantial and widespread rainfall; but it proved heavy in many areas of the division and damaged standing crops to some extent. October showers which were light to fair were mostly received during the 1st week of the month. Standing crops were in good condition except in parts of Ahmedabad and Kaira districts where they were adversely affected. Harvesting of *kharif* crops, preparatory tillage for and sowing of *rabi* crops were in progress. During November, there was practically no rainfall, while light to fair rainfall was recorded over many areas during the second fortnight of December. During the months of November and December, condition of standing crops was good. Harvesting and threshing of *kharif* crops, weeding and interculturing of *rabi* crops and picking of cotton were in progress. After December, the rains practically ceased except for a few sporadic showers during 1st and 3rd week of March in parts of Banaskantha and Mehsana districts.

As regards crop pests and plant diseases, locust swarms were reported from parts of Banaskantha, Mehsana, Sabarkantha, Broach and Surat districts and grass-hopper and rat trouble was reported from many areas. Caterpillars were observed in parts of the division. Cotton was affected by thrips and aphids in Ahmedabad, by thrips, aphids and leaf-roller in Kaira, Panch Mahals and Baroda districts, by shoot-borers and termites in Kaira and by jassids in Baroda district. Aphids on groundnut and jowar were reported from some areas of Amreli district. Mildew on cumin was noticed in a few localities of Kaira district and pod-borer on gram was observed in some parts of Broach district. Wheat was affected by rust in some areas of Banaskantha and Mehsana districts.

In the Konkan, there were light pre-monsoon showers in some parts of the division. During June, rainfall was good and preparatory tillage operations and sowing of *kharif* crops were in progress. Germination of crops was also good. Transplanting of paddy commenced in some areas. Rainfall during the months of July, August and September was substantial and widespread and facilitated transplanting operations of paddy and *naghi* during August. The rainfall, during the above months, however, proved heavy in some parts of Thana, Kolaba and Ratnagiri districts, where standing crops were adversely affected and agricultural operations were also hindered. Rainfall in October was also copious. During that month standing crops made satisfactory progress. Harvesting of paddy and sowing of *rabi* crops were in progress. The rainfall practically ceased from November onwards, except for some light and sporadic showers during the second half of December.

The paddy crop was affected to a varying extent by different pests and diseases in different parts of the division. In particular, the crop was affected by stem-borer in parts of Kolaba, Ratnagiri and Kanara districts and by 'Karpa', caterpillars and army-worms in some areas of Ratnagiri district. Infestation by blue beetles was reported from many areas of the division. The crop suffered from blast in Kolaba district and by 'Kane' pest and leaf roller in parts of Kanara district. Leaf roller, jassids and hoppers attacked the crop in some parts of Thana district.

In the Deccan, there were light pre-monsoon showers and these facilitated preparatory tillage operations for the *kharif* cultivation. Good rainfall was recorded during the months of June and July, when sowing of *kharif* crops was in progress on an extensive scale. Towards the end of July the rains proved somewhat heavy in parts of Sholapur district where cotton and chillies were affected to some extent. More rainfall was, however, needed in some areas of West Khandesh, East Khandesh and North Satara districts. Condition of crops elsewhere was reported to be good and transplanting of paddy was in progress. August and September recorded substantial rains and standing crops were making satisfactory progress. In parts of West Khandesh, Nasik and Sholapur districts, however, the rainfall proved heavy and crops were adversely affected. On the other hand, more rainfall was needed in some parts of Dangs and eastern areas of North Satara districts. Harvesting of *kharif* crops, preparatory tillage for *rabi* cultivation and sowing of *rabi* crops were in progress. Fairly good rainfall was recorded in October and this proved somewhat heavy in parts of West Khandesh and Dangs districts. During the same period, more rainfall was needed in Nasik and North Satara districts. During November there was practically no rain, while light showers occurred during the 2nd half of December. Condition of standing crops in the division was reported to be good except in some areas of Ahmednagar, Poona, Sholapur and North Satara districts, where more rainfall was needed for their normal growth. During January and again in March, there was light and scattered rainfall in East Khandesh, Nasik, Ahmednagar and Poona districts. During January harvesting of *kharif* crops and picking of cotton were in progress. Scarcity conditions were reported to be prevailing at places in West Khandesh, Poona and Sholapur districts; while fodder and water scarcity was experienced in parts of East Khandesh, Dangs, Ahmednagar, Poona and North Satara districts.

As regards crop pests and plant diseases, aphids on lucern and groundnut, rust on tomatoes, thrips on onions, stem borer and pyrilla on sugarcane, jassid hoppers, army-worms and blast on paddy and grass-hoppers on jowar were reported from parts of Nasik district. Caterpillars on vegetables, boll worm, jassids, caterpillars and thrips on cotton, leaf curl and thrips on chillies, mealy bugs on sugarcane, aphids on groundnut and pulses, 'tambara' on potatoes, blast on paddy and rust on wheat were reported from some areas of North Satara district. Boll worm on cotton, leaf-curl on chillies and aphids on groundnut were reported from some areas of East Khandesh district. Incidence of stem-borer and pyrilla on sugarcane, thrips on chillies and *bajri*, aphids on cotton, rust on potatoes and wheat, 'Karpa' on paddy, 'chikta' on jowar were noticed in parts of Poona district. Thrips on chillies, aphids on cotton and groundnut and 'mawa' on groundnut were observed at places in Sholapur district. Groundnut was affected by aphids in places in West Khandesh district. Army-worms on *bajri*, leaf roller on cotton, and 'chikta' on jowar were reported from some areas of Ahmednagar district, while grass-hoppers and locusts were also observed in some areas of the district. Rat trouble was experienced in parts of East Khandesh, Dangs, Nasik, Ahmednagar, Poona and Sholapur districts.

In the Karnatak, light to fair rains were recorded in the division during the pre-monsoon period, when preparatory tillage operations for *kharif* cultivation were in progress. During June and July rainfall was generally adequate. More was, however, needed in some parts of South Satara and Bijapur districts. During the above period, sowing of *kharif* crops and weeding and interculturing operations were in progress. Transplanting of paddy was also undertaken in some areas. The months of August and September recorded good rainfall but it was inadequate in parts of Belgaum and Dharwar districts. October rainfall was adequate except for some areas of South Satara, Bijapur and Dharwar districts where more rain was needed for promoting healthy growth of crops. In parts of Kolhapur district, on the other hand, crops were damaged to some extent by the rain received during the third week of October, when weeding, interculturing and harvesting of *kharif* crops, preparatory tillage and sowing of *rabi* crops were in progress. There were practically no rains in November, while in December there were light to fair rains. Standing crops were progressing well except in some parts of South Satara and Bijapur districts where they were withering due to inadequate soil-moisture. There was practically no rainfall in January and February while the light scattered showers recorded in the division during the second and fourth weeks of March proved harmful to cotton crop. Fodder and water scarcity was experienced in parts of Belgaum and Bijapur districts, while only scarcity of water was felt in some areas of South Satara district.

As regards crop pests and plant diseases, leaf curl on chillies and maize, grass-hoppers and army-worms on paddy, groundnut and jowar were reported from places in South Satara district. Stem-borer on sugarcane and jowar, grass-hoppers and aphids on groundnut, blast and blue beetles on paddy, aphids and leaf-curl on chillies and rust on *kharif* jowar were observed in some parts of Belgaum district. Leaf curl on chillies, aphids on groundnut and jowar, blast and caterpillars on paddy, mealy bugs on sugarcane and rust on wheat were noticed in some areas of Kolhapur district. Caterpillars on pulses, aphids on groundnut, thrips on chillies, red leaf blight on cotton and rust on wheat were reported from some areas of Bijapur district.

Grass hopper, blast and blue beetles on paddy, red leaf blight on cotton and rust on wheat were reported from some parts of Dharwar district. Rat trouble was reported from some areas of Belgaum, Kolhapur and Dharwar districts.

CHAPTER II—AREA CULTIVATED AND UNCULTIVATED.

(Table II—pages 47-51).

(Summary Table A—page 28).

4. *Number of villages.*—During the year 1954-55, the number of villages was 35,815 which was less than the corresponding number of the previous year, viz. 35,943 by 128. This decrease was mainly accounted for by Sabarkantha, West Khandesh, East Khandesh and Nasik Districts, wherein 123 small villages or hamlets or deserted villages were merged or amalgamated into the neighbouring bigger villages. Regarding the remaining 5 villages the decrease was attributed either to the amalgamation of small villages into bigger ones or to the wrong reporting of the number in the earlier year viz. 1953-54.

5. *Total area—Reporting and non-reporting areas.*—The total area, i.e., the geographical area of Bombay State was almost stationary being 71,024,900 acres during the year under report as against 70,971,500 acres during the previous year, thus showing a small increase of 0·1 per cent. This increase in the geographical area was attributed to the more accurate information obtained due to some of the unsurveyed Jagiri Villages in Sabarkantha district having been surveyed. Of the total area of the State, the reporting area was 65,174,000 acres and the non-reporting area, i.e., the area for which no returns exist, was 5,850,900 acres as against the corresponding figures of 64,904,700 acres and 6,066,800 acres during the previous year. In Dangs, although the details for the total area of 423,000 acres are available, details for the reported area of 149,500 acres are not separately available. Similarly in West Khandesh district, out of the 'non-reporting' area of 1,269,800 acres, detailed classification into different categories is available for only 793,400 acres.

6. *Cropped areas.*—The gross cropped area in the State showed a slight increase from 44,878,200 acres in 1953-54 to 45,223,100 acres in 1954-55 or of 0·8 per cent. The net cropped area also showed a slight increase from 42,926,500 acres in the previous year to 43,159,600 acres during 1954-55 or of 0·5 per cent. The 'area cropped more than once' increased from 1,951,700 acres in 1953-54 to 2,063,500 acres during the year under report or by 5·7 per cent. The area under forests showed a small decline of 86,100 acres or 0·8 per cent., going down from 10,840,900 acres in 1953-54 to 10,754,800 acres during 1954-55. During the year under report, the acreages under 'Barren and Unculturable land', 'Permanent pastures and other grazing lands' and 'Other fallow land' showed an increase over the corresponding figures of the previous year by 3·1, 2·8 and 4·4 per cent., respectively. On the other hand, the acreages under 'Land put to non-agricultural uses', 'Culturable waste', 'Land under miscellaneous tree crops and groves not included in area sown' and 'Current fallows' recorded a decrease of 5·7, 8·3, 8·3 and 8·3 per cent., respectively, as compared with the corresponding figures of the previous year.

CHAPTER III—IRRIGATED AREAS.

(Tables III-A and III-B—pages 52-81).

(Summary Tables B and C—pages 28-31).

7. *Sources of water supply.*—During the year under report, the number of Government canals reported was 1,090 as against 799 reported during the year 1953-54, thus recording an increase of 36.4 per cent. This increase was mainly due to the transfer of 417 canals from the 'Private Canals', which was wrongly reported in 1953-54 in North Satara district, to the category of 'Government Canals'. The mileage of these canals showed an increase of 8.1 per cent. rising from 2,062 in 1953-54 to 2,229 during the year under report. This was attributed to the fact that the mileage of the canals transferred to the 'Government canals' category, as stated above, was not in proportion to the number. Consequent upon the increase in the number and mileage of Government canals, the number and mileage of private canals went down during the year under report by 8.9 and 1.4 per cent. or from 8,042 and 4,739 in 1953-54 to 7,326 and 4,674, respectively during 1954-55. The number of Government tube wells in the State went up by as much as 147.4 per cent. rising from 76 in 1953-54 to 188 during the year under report. This was mainly because of the increase in the number of such tube-wells in the case of Mehsana district by 113. The number of private tube-wells increased from 11 in 1953-54 to 12 in 1954-55. The number of Government 'masonry' and 'non-masonry' wells used for irrigation purposes only recorded a slight increase of 3.6 and 2.3 per cent., respectively rising from 6,553 and 2,194 during the previous year to 6,792 and 2,244 during the year under report. Similarly the number of private 'masonry' and 'non-masonry' wells used for irrigation purposes only, also rose from 345,173 and 205,529 in the year 1953-54 to 350,272 and 205,678 during the year under report or by 1.5 and 0.1 per cent., respectively. The number of wells used for domestic purposes only recorded a small increase of 2.1 per cent. going up from 239,459 in 1953-54 to 244,498 during 1954-55. The number of wells not in use went up by 2.0 per cent., it being 71,094 during 1954-55 as against 69,687 during the previous year. The number of wells having independent ayacuts was 176,876 during the year under report, as against 169,273 of 1953-54, thus recording an increase of 4.5 per cent. The number of wells supplementing recognised sources of irrigation went down by 28.7 per cent., it being 36,296 in 1954-55 as against 50,915 during 1953-54. The number of reservoirs recorded a considerable fall from 1,676 in the previous year to 1,439 during 1954-55 or by 14.1 per cent. While the number of tanks with ayacut 100 acres or more showed a slight increase from 1,031 in 1953-54 to 1,051 during the year under report, that of tanks with ayacut less than 100 acres showed an increase of

as much as 23·9 per cent. rising from 22,723 in the year 1953-54 to 28,160, during the year under report. The number of oil engines showed a small increase of 4·0 per cent., it being 34,905 during 1954-55 as against 33,547, during the previous year.

8. *Irrigated areas.*—The total irrigated area in the State during the year under report was 2,572,100 acres as against 2,687,900 acres during the year 1953-54, thus recording a decrease of 4·3 per cent. The decrease in area was noticed mainly in the case of *kharif* jowar and tobacco.

During the year under report, the percentage of net area irrigated to the net cropped area was 5·2 per cent. as against 5·6 during the year 1953-54. The percentage of the total irrigated area to the gross cropped area was 5·7 during 1954-55 as against 6·0 during the year 1953-54.

9. *Area irrigated under different sources of irrigation.*—While the area irrigated by Government canals went up slightly by 1·1 per cent. or 4,900 acres during the year under report, the acreages irrigated by private canals, tanks and wells went down by 4,300 acres, 13,200 acres and 113,400 acres or by 5·9, 5·8 and 7·4 per cent. respectively, as compared with the corresponding figures of the previous year. The area irrigated by other sources remained the same, being 92,600 acres during both the years.

10. *Irrigated areas under food and non-food crops.*—As reported in paragraph 8, the total area irrigated during the year under report was 2,572,100 acres as against 2,687,900 acres during the previous year, thus recording a decline of 4·3 per cent. The area irrigated under food crops was 2,183,800 acres during 1954-55 as against 2,254,200 acres during 1953-54, thus recording a fall of 3·1 per cent. Significant decrease in the irrigated area under *kharif* jowar was noticed as it declined by 47·4 per cent. The area irrigated under non-food crops, which was 433,700 acres during the previous year, went down to 388,300 acres during the year 1954-55, thus recording a decline of 10·5 per cent., this decrease was mainly because of the fall in the irrigated acreage under tobacco.

CHAPTER IV—CROPPED AREA.

(Tables IV-A, IV-B and IV-C—pages 82-148).

(Summary Table D—pages 31-34).

11. *Total area under crops.*—During the year under report, the gross cropped area of 45,223,100 acres showed a slight increase of 344,900 acres or 0·8 per cent. over the corresponding area of 44,878,200 acres of the year 1953-54. Of the gross cropped area, 14,171,700 acres were in the Gujarat, 17,177,200 acres in the Deccan and 11,461,100 acres in the Karnatak, the percentage increase over the corresponding figures of the previous year in each division being 1·6, 0·3 and 0·8 respectively. In the Konkan, however, the gross cropped area of 2,413,100 acres during the year under report, was below the corresponding figure of the previous year by 1·2 per cent. For the State as a whole, food crops occupied 31,419,000 acres or 69·5 per cent., while non-food crops occupied 13,804,100 acres or 30·5 per cent. of the total area sown. During the year under review, the area under food crops showed

a decline of 3·7 per cent. or 1,191,500 acres as compared with the figures of the previous year, while the area under non-food crops recorded an increase of as much as 12·5 per cent. or 1,536,400 acres.

The table below gives the acreage under food and non-food crops in the four divisions of the State during the years 1953-54 and 1954-55 :—

(Figures in hundreds.)

Division	Food crops			Non-food crops		
	1953-54	1954-55	Percentage increase or decrease	1953-54	1954-55	Percentage increase or decrease
Gujarat ...	92,126	86,025	—6·6	47,311	55,692	+17·7
Konkan ...	18,375	18,494	+0·6	6,056	5,637	—6·9
Deccan ...	134,369	130,753	—2·7	36,866	41,019	+11·3
Karnatak ...	81,235	78,918	—2·9	32,444	35,693	+10·0
State ...	326,105	314,190	—3·7	122,677	138,041	+12·5

It will be seen from the above table, that under food crops, there was a decrease of 610,100 acres or 6·6 per cent. in the Gujarat, 361,600 acres or 2·7 per cent. in the Deccan and 231,700 acres or 2·9 per cent. in the Karnatak. In the Konkan, however, there was a very slight increase of 0·6 per cent. or 11,900 acres. On the contrary, under non-food crops, the Konkan division recorded a decrease of 41,900 acres or 6·9 per cent. The divisions of the Gujarat, the Deccan and the Karnatak recorded an increase of 17·7 per cent., 11·3 per cent. and 10·0 per cent. or 838,100 acres, 415,300 acres and 324,900 acres respectively.

12. *Food Crops*.—Among the main food crops, as compared with the corresponding figures of the previous year, the area under rice went up by 3·3 per cent. or 109,000 acres. This increase was shared by all the divisions in the State, but mainly by the Gujarat, where there was an increase in the acreage by 62,500 acres or 5·6 per cent. At the State level, the area under wheat remained almost stationary, recording a small decline of 0·6 per cent. or 11,000 acres. This was because, the fall in the acreage in the Gujarat of 9·2 per cent. or 75,200 acres was counterbalanced to some extent by the increase in the Deccan by 11·6 per cent. or 69,600 acres. The Karnatak division recorded a small decrease of 1·0 per cent. or 5,500 acres. During the year under report, the acreage under *kharif* jowar at the State level, recorded a decline of 295,300 acres or 7·3 per cent. This decrease was shared by all the jowar-growing divisions in the State, viz. the Gujarat, the Deccan and the Karnatak and was of the order of 8·0 per cent. or 109,500 acres, 9·4 per cent. or 73,800 acres and 6·0 per cent. or 112,000 acres respectively in these divisions. The acreage under *rabi* jowar also went down in all these jowar-growing divisions by 92,700 acres, 303,400 acres and 97,000 acres or 20·8,

6.2 and 4.8 per cent. respectively and consequently the acreage at the State level declined by 6.7 per cent. or 493,100 acres. The area under *bajri* also recorded a decrease of 366,000 acres or 4.7 per cent. at the State level. This was mainly due to the decline in acreage in the Gujarat, which recorded a fall of 12.1 per cent. or 335,100 acres. While the Deccan recorded a small decline of 1.4 per cent. or 50,500 acres, the Karnatak showed an increase in the acreage by 19,600 acres or 1.6 per cent. The area under *ragi* showed a small increase of 26,700 acres or 3.4 per cent. This was shared by the Deccan and the Karnatak divisions, where the increase was of the order of 7.2 and 8.0 per cent. or 16,500 acres and 11,200 acres respectively. The Gujarat recorded a small decrease, while the Konkan showed a slight increase. The area under maize remained almost stationary, going down by 0.6 per cent. or 3,500 acres. The area under gram, at the State level, recorded an increase of 11.4 per cent. or 84,700 acres and was mainly due to an increase in area in the Gujarat by as much as 46.5 per cent. or 80,800 acres. This large increase in the Gujarat was attributed mainly to "sufficient soil moisture in the land and hence attraction of sowing this crop in more area". Among the remaining gram-growing divisions, the Deccan recorded an increase of 7.4 per cent. or 25,100 acres, while the Karnatak showed a decline of 21,100 acres or 9.3 per cent. The area under *tur* remained almost the same, showing a very small increase of 0.1 per cent. or 700 acres. The area under sugarcane showed an increase of 23,700 acres or 11.7 per cent. This increase was shared by all the divisions except the Konkan where there was a small decrease of 200 acres or of 5.3 per cent. The Gujarat, the Deccan and the Karnatak showed an increase of 22.0, 9.6 and 14.3 per cent. or 1,800 acres, 10,900 acres and 11,200 acres respectively. The total area under *kharif* and *rabi* food crops, for the State as a whole, went down by 3.2 and 4.6 per cent. respectively.

13. *Non-food crops*.—In the case of cotton, there was a large increase in the acreage in the three cotton-growing divisions, viz. the Gujarat, the Deccan and the Karnatak and was of the order of 32.3 per cent. or 620,600 acres, 17.2 per cent. or 161,600 acres and 22.5 per cent. or 256,500 acres, respectively in these divisions and consequently the acreage at the State level went up by 26.0 per cent. or 1,038,700 acres. This increase in acreage was mainly attributed to high price obtained for the commodity in the market and also to favourable rains. The area under groundnut also showed a large increase in the acreage at the State level by 29.5 per cent. or 714,300 acres. This increase was again shared by all the three divisions of the State viz., the Gujarat, the Deccan and the Karnatak, where it was of the order of 46.3, 47.0 and 9.0 per cent. or 259,500 acres, 355,600 acres and 99,300 acres respectively. This increase was again attributed to the good price for the commodity and also the tendency on the part of the cultivators to grow more non-food crops, which fetch good prices. The total area under sesamum showed a small increase of 14,200 acres or 4.0 per cent. This was shared by the divisions of the Gujarat and the Deccan, while the Konkan and the Karnatak divisions recorded a small decrease. At the State level, there was a decline in the area under tobacco by 8.5 per cent. or 26,500 acres. This decrease was shared by the Gujarat and the Karnatak, where it was of the order of 10.8 per cent. or 17,400 acres and 6.7 per cent. or 9,600 acres respectively. The Deccan division, however, recorded a small increase of 500 acres or of 6.0 per cent.; for the State, total area under *kharif* and *rabi* non-food crops went up by 11.1 and 19.6 per cent. respectively.

14. On the whole, the gross cropped area during the current year remained almost the same, as compared with the corresponding figure of the previous year. The accompanying table gives the area under food crops, non-food crops, the gross cropped area, the double cropped area, the net cropped area and the acreages under the different principal crops in the four divisions of the State during the years 1953-54 and 1954-55.

CHAPTER V—OUTTURN OF CROPS AND THEIR AVERAGE YIELDS.

(Tables V-A and V-B—pages 149-190.)

(Summary Table E—pages 35-36.)

15. *Outturn of crops.*—The table below gives the outturn in tons, of principal kharif and rabi crops :—

(Figures in thousand tons.)

Division	Kharif Crops			Rabi Crops			Total cereals	Total pulses	Total cereals and pulses
	Cereals	Pulses	Total cereals and pulses	Cereals	Pulses	Total cereals and pulses			
Gujarat ...	1,322	154	1,476	325	38	363	1,647	192	1,839
Konkan ...	702	14	716	25	...	25	727	14	741
Deccan ...	1,012	155	1,167	795	121	916	1,807	276	2,083
Karnatak ...	860	97	957	469	53	522	1,329	150	1,479
State ...	3,896	420	4,316	1,614	212	1,826	5,510	632	6,142

Regarding the outturn of crops, the situation in the different divisions was satisfactory, good yields being recorded as a result of the favourable character of the season as already described in Chapter I.

Rice.—In the Gujarat, the germination of the crop was fairly satisfactory and the crop progressed well except in parts of Kaira, Panch Mahals and Baroda districts, where it was damaged to some extent due to unfavourable rains. In the Konkan, the crop lodged in parts of Thana district owing to excessive rains, while the growth of the crop was adversely affected by continuous rains in some areas of Ratnagiri district. The late crop suffered, to some extent, in parts of Kolaba district for want of adequate rains at the time of grain formation. The crop, however, fared well elsewhere in the division. In the Deccan, the sowing was delayed in parts of West Khandesh and Nasik districts on account of insufficient rainfall. Later, in this division and in the Karnatak, the crop progressed well except in Bijapur district, where it suffered due to lack of adequate moisture in the soil. Rat trouble was noticed in some fields of Panch Mahals district. The crop was affected by bacterial blight, stem-borer and leaf-roller in parts of Kolaba district. Sporadic attacks of blue-beetles and army worms were reported from the northern and southern parts of Ratnagiri district. In Daags district, there was rat trouble and the crop was attacked by top-shoot borers, stem borers and hoppers in some parts. Blast was noticed in some areas of Ahmednagar district. Rat trouble and blast were reported from some areas of Kolhapur district. The crop was damaged by rust in parts of South Satara district, while it was attacked by grass-hoppers,

blue beetles, blast and rice-hispa in parts of Belgaum district. Attacks by blue-beetles and blast were reported from some areas of Dharwar districts. Although the total area under the crop viz. 3,394,500 acres during the year under report was more than the area of 3,285,500 acres during the previous year by 3.3 per cent., the outturn went down from 1,348,500 tons in 1953-54 to 1,336,800 tons or by 0.9 per cent.

Wheat.—In the Gujarat and the Deccan, the crop progressed well. However, the unirrigated crop suffered to some extent on account of insufficient moisture in the soil in parts of Nasik and Poona districts of the Deccan division. In the Karnatak, the crop suffered from insufficient soil-moisture in the eastern areas where the condition of the crop was not satisfactory. Elsewhere in that division, the crop progressed generally well. Rat trouble was reported from parts of Mehsana, Panch Mahals and Broach districts. Rust affected the crop in parts of Baraskantha, Mehsana and Ahmedabad districts. Stem-borer and locust trouble was reported from parts of Dangs district while rat trouble was observed in some areas of West Khandesh and East Khandesh Districts. Rat trouble and incidence of rust were reported from parts of Nasik and Ahmednagar districts. Slight attack of rust was noticed in parts of Kolhapur, Belgaum, Bijapur and Dharwar districts and rat trouble was reported from some fields in South Satara district. Although the total area under the crop during the year under report, viz. 1,962,300 acres was slightly lower than the area of 1,973,300 acres during the previous year by 0.6 per cent., the outturn in the year 1954-55 was 376,600 tons as against 362,700 recorded during 1953-54, thus showing an increase of 3.8 per cent.

Kharif jowar.—In the Gujarat, the rainfall was favourable except in parts of Ahmedabad, Panch Mahals and Broach districts, where the crop suffered to some extent in the beginning of the season on account of uneven distribution of rain. The season, on the whole, was favourable for the crop. In the Deccan, the germination and further growth of the crop were reported to be satisfactory although in parts of West Khandesh district, the rainfall proved inadequate in the beginning. But the late rains improved the situation. The crop suffered, to certain extent, in parts of Poona district on account of rains at the time of harvest. In the Karnatak, the crop suffered in growth in parts of South Satara district, while in parts of Bijapur district the crop was withering on lighter soil due to inadequate moisture. Earlier in the season, growth of the crop was stunted in parts of Dharwar district, but due to late rains the crop recouped its condition and progressed fairly well. In Kolhapur district, December rains spoiled grains to certain extent. Slight attack of aphids was reported from parts of Amreli district. Grass-hopper trouble was reported from parts of Mehsana, South Satara and Bijapur districts and from Athani and Chikodi Talukas of Belgaum district. Field rat trouble was reported from the eastern areas of Dharwar district. Cut worm was observed in parts of Kolhapur district. Although the area under the crop went down from 4,024,300 acres in 1953-54 to 3,729,000 acres during the year under report or by 7.3 per cent. the outturn went up from 807,900 tons in the previous year to 993,000 tons during the year under report, or by 22.9 per cent.

Rabi jowar.—In the Gujarat, the crop progressed well although the sowings were delayed in parts of Panch Mahals and Broach districts due to the wet condition of the soil. In the Deccan also, the crop fared well. In the

Karnatak, the crop suffered in growth for want of sufficient rains, in parts of South Satara and Bijapur districts and Athani and Ramdurg talukas of Belgaum district. Later in the season, the crop condition improved. Rat trouble was reported from parts of Panch Mahals and Ahmednagar districts. Although the area under the crop during 1954-55 viz. 6,908,300 acres was below the corresponding area of 7,401,400 acres of the previous year by 6.7 per cent., the outturn during the year under report was above the corresponding outturn of the previous year by as much as 34.0 per cent., the figures for the years 1953-54 and 1954-55 being 814,600 tons and 1,091,300 tons, respectively.

Bajri.—In the Gujarat, the crop was damaged in many parts of the division due to heavy rains received in the month of September. The crop, however, improved later in the season. In the Deccan, the crop progressed well, except in parts of East Khandesh, Ahmednagar and Nasik districts, where it was adversely affected due to heavy rains. In the Karnatak, the crop fared well except in parts of Bijapur district, where due to inadequate moisture in the soil, the growth was retarded and the crop withered, especially on light soils. The crop was attacked by grass-hoppers in parts of Banaskantha, Mehsana, Panch Mahals and Broach districts and also by blister beetles in parts of Broach district. Slight attack of grass-hoppers was noticed in parts of Nasik and Ahmednagar districts. The crop was slightly affected by grubs-attack in parts of Poona district and by blister beetles in Sholapur district. Mild sporadic attacks of grass-hoppers were reported from parts of Bagalkot, Hungund and Muddebihal Talukas of Bijapur district. The area and outturn under the crop, which were 7,706,000 acres and 951,400 tons during the year 1953-54 went down by 4.7 and 5.5 per cent. or to 7,340,000 acres and 898,900 tons respectively, during the year under report.

Maize.—In the Gujarat, the crop progressed well except in parts of Panch Mahals district, where it suffered due to heavy rains. In the Deccan, the crop showed satisfactory progress except in the western areas of West Khandesh district, where the growth of the crop was checked on account of insufficient rains. In the Karnatak, the crop fared well. In the beginning, the crop was attacked by hairy caterpillars in some areas of Panch Mahals district and later by "phadka" and grass-hoppers in some places. Top shoot-borer adversely affected the grain setting of late cobs in places in Dangs district. The area and outturn of the crop, which were 567,600 acres and 218,700 tons during the year under report, were below the corresponding figures of 571,100 acres and 2,39,500 tons of 1953-54 or by 0.6 and 8.7 per cent. respectively.

Ragi.—In the Gujarat and the Konkan, the rainfall was adequate and favourable for the development of the crop, which progressed fairly satisfactorily. In the Deccan also the condition of the crop was reported to be fairly good. However, it was affected in growth to some extent due to inadequate rains at the time of transplanting in parts of Dangs district. In the Karnatak, the crop suffered in growth for want of rains in parts of Kolhapur district, while elsewhere in the division, the condition was reported to be satisfactory. Rat trouble was reported from parts of Dangs district. The area and outturn of the crop during the year under report viz. 806,400 acres and 250,300 tons were above the corresponding figures of the previous year of 779,700 acres and 227,900 tons or by 3.4 and 9.8 per cent. respectively.

Gram.—In the Gujarat and the Deccan, the crop progressed well although the time of sowing was delayed due to heavy rains in parts of Broach district in the Gujarat Division. In the Karnatak, the growth of the crop was adversely affected by cloudy weather in parts of South Satara district and due to inadequate soil moisture in the eastern parts of Belgaum district. Elsewhere in the division, the crop progressed well. Rat trouble was noticed in parts of Panch Mahals district, while sporadic attacks of pod-borers were reported from Broach district. The area and outturn of the crop, which were 743,700 acres and 95,500 tons in 1953-54 went up to 828,400 acres and 116,200 tons or by 11.4 and 21.7 per cent. respectively during the year under report.

Cotton.—In the Gujarat, the crop progressed fairly well except that the crop in the low-lying areas of Broach district was damaged by heavy rains of August and September. In the Deccan, the crop progressed well except in parts of West Khandesh and Nasik districts, where it suffered to some extent on account of inadequacy of rains. It suffered also in parts of East-Khandesh and Ahmednagar districts due to heavy rains in September. In the Karnatak, the dry crop suffered due to prolonged break in rains, particularly in parts of South Satara district, but improved later in the district on account of favourable rains in October. The crop in parts of Bijapur district was considerably affected in the latter half of March by heavy rains and dry easterly winds. The crop was attacked by termites to a little extent in parts of Banaskantha district and by aphids, leaf-rollers and rats in parts of Panch Mahals district. Heavy infestation by white ants, jassids, thrips, leaf-roller etc. was reported from Kaira district. The crop was attacked by *katra* in parts of Mehsana district and by caterpillars in parts of Ahmedabad and Broach districts. Grass hopper and rat trouble were reported from places in Broach district. Sporadic attacks of jassids were noticed in some areas of Ahmedabad district. The crop was attacked by Aphids in Malegaon taluka of Nasik district and in parts of Poona district. In the northern and the southern areas of Ahmednagar district, the crop was attacked by jassids, aphids and thrips to a slight extent. Top shoot-borers and thrips were observed in parts of North Satara district. The crop was slightly attacked by boll worms and leaf-rollers in parts of Ahmednagar district, while attacks of aphids were noticed in some areas of Sholapur district. The crop was affected by boll worms and anthracnose disease in parts of East Khandesh district. Laxmi cotton suffered from severe attack of black arms and red leaf blight in many parts of the Karnatak division. The area and outturn of the crop, which were 4,000, 200 acres and 1,065,600 bales in 1953-54 went up by 26.0 and 28.2 per cent. or to 5,038,900 acres and 1,366,400 bales respectively, during the year under report.

16. *Yield per acre*.—During the year under review, statewide crop estimation surveys were continued on the ten principal crops, viz., paddy, *Kharif jowar*, *bajri*, wheat, *rabi jowar*, gram, cotton, tobacco, maize and groundnut, while the survey on ragi was continued in Ratnagiri and Dangs districts.

17. *Kharif crops*.—The State as well as the divisionwise average yields per acre of *kharif* food crops based on crop estimation surveys are given below :—

Division	Yield per acre								
	Rice			Kharif Jowar			Bajri		
	1953-54	1954-55	Percent- age increase or decrease	1953- 54	1954- 55	Percent- age in- crease or decrease	1953- 54	1954- 55	Percent- age in- crease or decrease
	Lb.	Lb.		Lb.	Lb.		Lb.	Lb.	
Gujarat	692	649	-6.2	277	279	+0.7	348	376	+8.0
Konkan	1,289	1,154	-10.5	533	640	+20.1
Deccan	615	645	+4.9	575	761	+32.3	251	245	-2.4
Karnatak	792	949	+19.8	523	756	+44.6	190	157	-17.4
State	919	882	-4.0	450	596	+32.4	277	274	-1.1

From the above table, it is seen that for rice, the average yield at the State level recorded a decline of 4.0 per cent. going down from 919 lb. in 1953-54 to 882 lb. during the year under report. This decrease was shared by the Gujarat and the Konkan Divisions, where it was of the order of 6.2 and 10.5 per cent., the average yields in these divisions going down from 692 lb. and 1,289 lb. in 1953-54 to 649 lb. and 1,154 lb. respectively in 1954-55. The remaining divisions recorded an increase. The average yield per acre of *kharif* jowar recorded an increase from 450 lb. to 596 lb. or by 32.4 per cent. This increase was shared by all the divisions, but mainly by the Deccan and the Karnatak, where the average yield per acre went up by 32.3 and 44.6 per cent. or from 575 lb. and 523 lb. to 761 lb. and 756 lb. respectively. In the case of *bajri*, the State average recorded a small decline of 1.1 per cent., it being 274 lb. during 1954-55 as against 277 lb. in the previous year. This decrease was mainly due to the decline in the average yield in the Karnatak from 190 lb. to 157 lb. or by 17.4 per cent. The average yield for the

Deccan declined by 2·4 per cent. or from 251 lb. to 245 lb. and that in the Gujarat rose from 348 lb. to 376 lb. or by 8·0 per cent. during the year under report.

The average yields per acre of tur and sesamum (based on anna-valuation figures of the Revenue Department) for the four divisions of the State are as shown below :—

Division	Yield per acre					
	Tur			Sesamum		
	1953-54	1954-55	Percentage increase or decrease	1953-54	1954-55	Percentage increase or decrease
	Lb.	Lb.		Lb.	Lb.	
Gujarat ...	456	458	+0·4	262	259	-1·1
Konkan ...	282	286	+1·4	193	205	+3·5
Deccan ...	461	537	+16·5	198	258	+30·3
Karnatak ...	536	543	+1·3	216	191	-11·6
State ...	481	511	+6·2	240	251	+4·6

For tur, the average yield per acre recorded an increase from 481 lb. to 511 lb. or of 6·2 per cent. This increase was shared by all the divisions, but mainly by the Deccan, where the average yield went up by 16·5 per cent. or from 461 lb. in 1953-54 to 537 lb. during the year under report. The highest yield was obtained in the Karnatak, which recorded an average yield of 543 lb. as against 536 lb. in the previous year. In the case of sesamum, the average yield at the State level went up from 240 lb. in 1953-54 to 251 lb. during the year under report or by 4·6 per cent., the highest average yield being recorded in the Gujarat of 259 lb. in 1954-55 as against 262 lb. during the previous year. The increase in the average yield at the State level was mainly due to the rise in the yield in the Deccan from 198 lb. to 258 lb. or by 30·3 per cent.

18. *Rabi crops*.—The State and divisionwise average yields per acre of *rabi* crops (based on crop estimation surveys) are as under :—

Division	Yield per acre					
	Wheat			Rabi Jowar		
	1953-54	1954-55	Percentage increase or decrease	1953-54	1954-55	Percentage increase or decrease
	Lb.	Lb.		Lb.	Lb.	
Gujarat ...	551	547	-0·7	461	480	+4·1
Deccan ...	378	432	+14·3	220	380	+72·7
Karnatak ...	245	270	+10·2	264	269	+1·9
State ...	412	430	+4·4	246	354	+43·9

From the table, it is seen that for 1954-55, the State average yield per acre of wheat rose by 4.4 per cent. or from 412 lb. to 430 lb. during 1954-55, while the average yield went down slightly by 0.7 per cent. in the Gujarat and those in the Deccan and the Karnatak rose by 14.3 and 10.2 per cent. respectively. In the case of *rabi* jowar, the average yield per acre was 354 lb. as against 246 lb. thus recording an increase of 43.9 per cent. at the State level. This was mainly due to the large increase in the average yield by as much as 72.7 per cent. in the Deccan or from 220 lb. to 380 lb. in 1954-55, while the average yield in the Gujarat and the Karnatak also rose slightly by 4.1 per cent. and 1.9 per cent. or from 461 lb. and 264 lb. to 480 lb. and 269 lb. respectively.

The average yields per acre of *rabi* crops, viz., gram (based on crop estimation surveys), linseed, rape and mustard (based on anna-valuation figures of the Revenue Department) for the four divisions of the State are given below:—

Division	Yield per acre								
	Gram			Linseed			Rape and Mustard		
	1953-54	1954-55	Percentage increase or decrease	1953-54	1954-55	Percentage increase or decrease	1953-54	1954-55	Percentage increase or decrease
	Lb.	Lb.		Lb.	Lb.		Lb.	Lb.	
Gujarat	334	400	+19.8	747	747	...	357	439	+23.0
Konkan	238	292	+22.7
Deccan	285	290	+1.8	161	163	+1.2	226	246	+8.8
Karnatak	257	251	-2.3	183	188	+2.7	280	286	+2.1
State	288	314	+9.0	177	187	+5.6	328	412	+25.6

For gram, the average yield for the State went up from 288 lb. to 314 lb. or by 9.0 per cent. This increase was shared mainly by the Gujarat and the Konkan, where the average yields went up by 19.8 and 22.7 per cent. or from 334 lb. and 238 lb. to 400 lb. and 292 lb. respectively. While the Deccan recorded a slight increase, the Karnatak showed a slight decrease.

In the case of linseed, the average yield per acre went up by 5.6 per cent. or from 177 lb. in 1953-54 to 187 lb. during the year under report. The average yield of rape and mustard also went up by 25.6 per cent. or from 328 lb. to 412 lb. in 1954-55.

19. *Cotton, Sugarcane and Tobacco.*—The table below gives the average yield per acre of cotton (based on crop estimation surveys), sugarcane (based on anna-valuation figures of the Revenue Department) and tobacco (based

partly on crop estimation surveys in the major crop-growing districts and partly on anna-valuation figures of the Revenue Department):—

Division	Yield per acre								
	Cotton			Sugarcane			Tobacco		
	1953-	1954-	Percentage	1953-	1954-	Percentage	1953-	1954-	Percentage
	54	55	increase or decrease	54	55	increase or decrease	54	55	increase or decrease
	Lb. (lint)	Lb. (lint)		Lb. (gul)	Lb. (gul)		Lb. (dry leaf)	Lb. (dry leaf)	
Gujarat	... 125	144	+15.2	5,026	4,838	-3.7	659	572	-13.2
Konkan	4,185	3,982	-4.9
Deccan	... 109	82	-24.8	6,774	7,239	+6.9	480	529	+10.2
Karnatak	... 66	58	-12.1	6,321	6,406	+1.3	366	375	+2.5
State	... 104	106	+1.9	6,481	6,754	+4.2	519	478	-7.9

The average yield per acre of cotton for the State was 106 lb. (lint) as against 104 lb. (lint) during the previous year, thus showing a rise of 1.9 per cent. The average yield went up in the Gujarat from 125 lb. lint to 144 lb. lint or by 15.2 per cent. The remaining divisions, however, recorded a decline in the average yield, those in the Deccan and the Karnatak going down from 109 lb. lint and 66 lb. lint to 82 lb. lint and 58 lb. lint or by 24.8 and 12.1 per cent. respectively. The State yield per acre of sugarcane was 6,754 lb. (gul) as against 6,481 lb. (gul) thus recording an increase of 4.2 per cent. The average yield of tobacco went down from 519 lb. dry leaf to 478 lb. dry leaf or by 7.9 per cent. at the State level.

20. *Cotton.*—During the year 1954-55, the total area and outturn of cotton were 5,039 thousand acres and 1,366 thousand bales as against 4,000 thousand acres and 1,066 thousand bales during the previous year. Thus there was an increase in area by 26.0 per cent. and that in outturn by 28.1 per cent.

The table below gives the total area and outturn of cotton in the different divisions of the State during 1953-54 and 1954-55:—

(Area and outturn figures in thousands.)

Division	Area in acres			Outturn in bales of 392 lb. each		
	1953-54	1954-55	Percentage	1953-54	1954-55	Percentage
			increase or decrease			increase or decrease
Gujarat	... 1,923	2,544	+32.3	613	933	+52.2
Deccan	... 938	1,100	+17.3	261	228	-12.6
Karnatak	... 1,139	1,395	+22.5	192	205	+6.8
State	... 4,000	5,039	+26.0	1,066	1,366	+28.1

CHAPTER VI—PRICES.

(Table VI—pages 191-198).

(Summary Table F—page 37).

21. Table VI of the report gives the average prices, during the harvest period, of principal crops in different districts. The favourable character of the season resulting in high crop production tended to lower the prices of agricultural produce in general.

22. The major variations, in the average harvest prices of principal commodities at the State level and in the different divisions as compared with the prices during the corresponding period of the previous year, are summarised below.

At the State level, the price of rice (paddy) viz., Rs. 11-3 per maund of 82 2/7 lb. was lower by 12·7 per cent. than that of the previous year. The price fell by 12·6, 12·0, 9·4 and 17·3 per cent. in the Gujarat, the Konkan, the Deccan and the Karnatak respectively. The price of wheat viz. Rs. 15-3 per maund was lower by 10·0 per cent. for the State, corresponding figures for the Gujarat, the Konkan, the Deccan and the Karnatak being respectively 10·4, 3·1, 14·4 and 2·2 per cent. The price of Rs. 7-1 per maund of jowar, at the State level, was lower by 43·4 per cent. when compared with that of the previous year. The fall was noted in all the divisions and was of the order of 42·2, 30·8, 47·1 and 45·8 per cent. in the Gujarat, the Konkan, the Deccan and the Karnatak respectively. At the State level, the average price of Rs. 8-6 per maund of *bajri* showed a fall of 36·5 per cent. when compared with that of Rs. 13-3 of the previous year. The price showed a decrease in all the divisions, the fall being below that of the previous year by 39·5, 16·7, 35·3 and 42·5 per cent., in the Gujarat, the Konkan, the Deccan and the Karnatak respectively. The average price of Rs. 7-14 per maund for barley for the State ruled lower by 16·0 per cent. as compared with the corresponding figure of the previous year. The price went down by 15·8, 17·6 and 37·1 per cent. in the Gujarat, the Deccan and the Karnatak respectively. The average price of Rs. 8-10 per maund at the State level for *ragi* (*nachni*) was lower than that of the previous year by 25·8 per cent., the fall being by 19·9, 39·0 and 37·6 per cent. in the Konkan, the Deccan and the Karnatak respectively. The price, however, increased by 7·1 per cent. in the Gujarat division. The average price of maize viz. Rs. 5-14 per maund was lower by 32·9 per cent. at the State level, falling by 33·6, 39·7 and 37·6 per cent. in the Gujarat, the Deccan and the Karnatak respectively. The average price of kodra of Rs. 5-5 per maund was lower by 36·6 per cent. for the State, falling by 38·3, 44·8, 11·7 and 9·3 per cent. in the Gujarat, the Konkan, the Deccan and the Karnatak respectively. Among pulses, the average price of Rs. 11-11 per maund for *tur dal* at the State level was lower by 31·0 per cent. The price fell by 39·0, 29·9, 23·5 and 30·7 per cent. in the Gujarat, the Konkan, the Deccan and the Karnatak respectively. The price of gram viz. Rs. 12-6 per maund was lower by 20·5 per cent. at the State level, it being 33·8, 4·6 and 28·2 per cent. lower in the Gujarat, the Deccan and the Karnatak respectively. The price, however, increased by 11·8 per cent. in the Konkan. The average price of *gul* viz., Rs. 12 per maund was lower than that of the previous year by 36·0 per cent. the prices being down by 36·2, 5·6, 37·0 and 34·7 per cent. in the Gujarat,

the Konkan, the Deccan and the Karnatak respectively. The average price of groundnut at the State level, viz. Rs. 11-6 per maund was lower by 33·6 per cent. than that of the previous year. It was 32·2, 33·7 and 35·4 per cent. lower in the Gujarat, the Deccan and the Karnatak respectively. The price of Rs. 43-13 per maund of tobacco was higher by 6·9 per cent. at the State level going up by 9·2 and 12·7 per cent. in the Gujarat and the Deccan respectively. The price, however, went down in the Karnatak by 6·6 per cent. The average price of cotton viz. Rs. 31-2 per maund was lower by 10·3 per cent. at the State level. The fall was noted in all the divisions and was by 15·6, 16·2 and 21·3 per cent. in the Gujarat, the Deccan and the Karnatak respectively.

23. The table below compares the prices of Broach and Jarila cotton ruling at Bombay during the year under review with those of the previous year and the average of the preceding five years :—

Variety of Cotton	Price per khandi of 784 lb.			Variations	
	Average of the five years ending 1953	1954	1955	Compared with the average price	Compared with the price of 1954
	Rs.	Rs.	Rs.	Per cent.	Per cent.
Broach ..	879	925	925	+5·2
Jarila ..	749	820	820	+9·5

The prices of cotton in the latter part of 1954 showed an upward trend and touched the highest rate of Rs. 721 in October 1954. This was due to the reduction in export duties and release of further export quotas consequent to devaluation of Pakistan rupee. There was, however, downward trend in the prices thereafter and reached the lowest level at Rs. 577 in April 1955. This was due to lack of adequate demand from mills and due to heavy arrivals of new crop and accumulation of stocks at up-country centres. Thereafter reports of higher textile production and better demand for cloth stimulated demand for ready cotton and prices advanced moderately. Demand for exportable varieties was fairly steady.

In the sub-joined table, the prices of Jarila fine and Broach (Vijay) cotton ruling at Bombay have been given for the months for which the prices were available.

(Price per khandi of 784 lb.)

Year and month	Jarila (fine) (Average price)	Broach (Vijay) (Average price)
	Rs.	Rs.
August 1954	713	824
September 1954	715
October 1954	721
November 1954	706
December 1954	708
January 1955	667
February 1955	625
March 1955	606	678
April 1955	577	670
May 1955	600	705
June 1955	588	726
July 1955	609	754

CHAPTER VII—AGRICULTURAL WAGES.

(Table VII—pages 199-211).

(Summary Table G—page 38).

24. In this State, according to the Manual of Revenue Accounts, agricultural labour is classified under three categories viz. (a) skilled, (b) ordinary and (c) field labour. Skilled labour comprises carpenters, black-smiths and cobblers, ordinary labour consists of load carrying coolies, well-diggers, masons' or carpenters' assistants, earth workers, etc., while field labour comprises ploughmen, sowers, reapers, harvesters, weeders and transplanters, etc. In the report (in Table VII—Agricultural Wages) in addition to the above three categories, one more is added viz., herdsmen, whose main work is to collect livestock from different owners and to feed them in the jungle during the day and to bring them back in the evening to the owners' places.

25. Table VII of the report gives districtwise figures of wages of different classes of agricultural labour. Wages of agricultural labour did not show marked variations as compared with those in the previous year although in view of gradual fall in prices of agricultural produce, the agricultural wages showed only slight downward trend during certain months and remained almost constant later during the year. A perusal of the table shows that during the year under report, the annual average rates of wages under all occupations remained almost constant as compared with those in the preceding year, except in the case of wages of herdsmen, the downward trend of which was uniform and so the annual average also.

CHAPTER VIII—AGRICULTURAL STOCK.

(Table VIII—pages 212-216).

(Summary Table H—pages 39-40).

26. Table VIII of this report gives details of livestock, poultry and agricultural machinery and implements in the Bombay State as enumerated in the Census of livestock held in January 1951. The details were published in the Season and Crop Report for 1950-51, and the same figures and remarks are repeated in the present report and will be continued in the subsequent report till the figures of next quinquennial livestock census become available.

Cattle.—There is an increase in the number of cattle from 11,422,021 to 11,915,298 or 4·3 per cent, over that of the preceding year. The number of breeding bulls over three years remained almost the same as in the previous year, while the number of other males over three years increased by 6·4 per cent. The number of breeding cows over three years, however, went down by as much as 34·1 per cent., as against which there was an increase in the number of other cows over three years by as much as 112·4 per cent. The number of young stock showed an increase of 4·3 per cent., over that of 1949-50.

Buffaloes.—The total number of buffaloes decreased from 4,293,336 of 1949-50 to 4,161,950 or by 3·1 per cent. The number of breeding bulls over three years showed a considerable drop of 68·2 per cent., while the number of

other males over three years, breeding cows over three years and young stock also decreased by 10·0, 18·8 and 13·1 per cent. respectively. The number of other cows over three years, however, increased by 132·2 per cent.

Sheep and goats.—While the number of sheep went down by 17·0 per cent., that of goats increased by 7·2 per cent. as compared with the corresponding number of the previous year.

Agricultural Machinery and Implements.—During 1950-51 the number of tractors in the State was 1,072. Unfortunately, data for earlier years are not available, but the recent drive for Grow More Food has definitely resulted in an increase in the number of tractors. The number of ploughs was 2,582,286 while the number of carts totalled 1,077,372.

CHAPTER IX—AGRICULTURAL OUTLOOK.

27. As described in Chapter I, of the report, the season under review was favourable over most parts of the State. The favourable character of the season was reflected in an increase in the total area under cultivation as will be seen from Summary Table "A" and an appreciable increase in the total output of the principal crops.

28. The table below compares for the years 1953-54 and 1954-55, the actual acreage sown and the outturn of foodgrain crops in the State and its different divisions :—

(Figures in thousands.)

Division	Area in acres		Outturn in tons	
	1953-54	1954-55	1953-54	1954-55
Gujarat ...	8,993	8,411	1,952	1,839
Konkan ...	1,748	1,771	804	741
Deccan ...	13,103	12,705	1,705	2,083
Karnatak ...	7,840	7,599	1,294	1,479
State ...	31,684	30,486	5,755	6,142

29. Although the acreage under foodgrain crops went down to some extent, there was corresponding increase in area brought under cultivation of non-food crops, which fetched better prices than foodgrains. The prices of grains went down due to decontrol and removal of quantity restrictions on all foodgrains and free movement and trade of all grains allowed by Government. Despite the decrease in area under foodgrain crops, there has been an appreciable increase in the outturn of these crops as a result of favourable season. The cultivators, in general, evinced interest in adopting scientific methods and large number of them successfully adopted the Japanese method of cultivation of paddy. Supply of improved seeds and manures, grant of *tagai* loans, adoption of improved cultivation practices, etc., contributed towards the increase in the yield of foodgrains. The agriculturists were, however,

discouraged to some extent due to considerable fall in prices of foodgrains and switched on to growing more non-food, i.e., money crops. The Development Projects continued to function in several National Extension Blocks during the year under report and proved of immense benefit to the masses in the rural areas.

30. Condition of cattle was generally satisfactory. There were outbreaks in some areas of cattle diseases, such as haemorrhagic septicaemia, rinderpest, foot and mouth, black quarter, anthrax and other animal diseases, but these were brought under control by prompt, effective and timely measures. There were also outbreaks of attacks of malaria, cholera, small-pox, etc., in certain areas of the State, but these too were brought under control by resorting to prompt remedial and preventive measures. Prevalence of these epidemics epizootics, however, did not hamper the progress of the agricultural operations to any considerable extent.

31. The table below gives the average prices of agricultural commodities prevailing at harvest time for the years 1950-51 to 1954-55.

Prices are in rupees per maund of 3,200 tolas except for cotton, the prices of which are recorded in rupees per khandi of 784 lb.

Commodity	Centre	1950-51	1951-52	1952-53	1953-54	1954-55
		Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.

* Information not received.

The centres mentioned in the above table are representative markets and accordingly the prices of agricultural produce in these markets indicate the general tendency in the variations of prices of the commodities in the State.

CHAPTER X—CONDITION OF AGRICULTURAL POPULATION.

32. The favourable character of the season was reflected in the increased agricultural production and the food position was satisfactory and there was also general sufficiency of fodder over most parts of the State. Scarcity conditions, however, prevailed in parts of Sholapur and Bijapur districts due to failure of crops and in order to mitigate the situation and to afford relief, Government started relief works such as construction of dams, large scale contour bunding, etc. Efforts were continued for the successful implementation of the First Five Year Plan and the results so far achieved have been encouraging. With the increased crop yields and total relaxation of controls on all foodgrains and restoration of free market conditions, the prices of foodgrains went down to a considerable extent; while the prices of other articles of necessity and also the wages of the agricultural labour continued to be steady almost throughout the year, being slightly lower than those in the previous year in certain cases. As a result of such conditions, the general economic condition of the agricultural population did not improve and hence it could not be said to be quite satisfactory.

T. G. SHIRNAME,
Director of Agriculture,
Bombay State, Poona.

SUMMARY TABLE A.

CLASSIFICATION OF AREA.

(Figures in hundreds.)

Heads of classification	1953-54		1954-55		Percentage increase or decrease
	Area	Percentage of total	Area	Percentage of total	
	Acres.		Acres.		
Total area (by village papers).	709,715	...	710,249	...	+0.1
Forests	108,409	15.3	107,548	15.1	-0.8
Barren and unculturable land...	62,553	8.8	64,483	9.1	+3.1
Land put to non-agricultural uses.	10,354	1.5	9,760	1.4	-5.7
Culturable waste	28,652	4.0	26,265	3.7	-8.3
Permanent pastures and other grazing lands.	24,937	3.5	25,647	3.6	+2.8
Land under miscellaneous tree crops and groves not included in area sown.	5,386	0.8	4,937	0.7	-8.3
Current fallows	15,155	2.1	13,904	2.0	-8.3
Other fallow land	25,004	3.5	26,109	3.7	+4.4
Net area sown	429,265	60.5	431,596	60.7	+0.5
Area sown more than once	19,517	2.7	20,635	2.9	+5.7
Total sown area	448,782	63.2	452,231	63.6	+0.8

SUMMARY TABLE B.

SOURCES OF WATER SUPPLY AND THE AREA IRRIGATED THEREFROM IN THE BOMBAY STATE DURING 1954-55.

Total, Food Crops	63,931	69,035

SUMMARY TABLE E—*contd.*

[Outturn figures in hundreds.]

Crops	1953-54		1954-55	
	Average yield in lb. per acre	Total outturn in tons	Average yield in lb. per acre	Total outturn in tons
Cotton	104	10,653 (Bales)	106	13,664* (Bales)
Groundnut	658	7,116	562	7,872*
Sesamum	240	379	251	512
Rape	336	71	413	136
Mustard	317	42	409	28
Linseed	177	37	187	41
Castor	338	308	392	319
Tobacco	519	727	478	613†

* These outturn estimates are entirely based on the results of Crop estimation surveys conducted in the year 1954-55.

† These outturn estimates are obtained by using the results of Crop estimation surveys for districts mentioned below against each crop; the *anna-valuation* and the *Standard Normal Yield* reported by the Collectors being used in the case of the remaining districts:—

Maize—All Gujarat districts, Belgaum, South Satara and Kolhapur districts.

Ragi—Ratnagiri and Dangs districts.

Tobacco—Mehsana, Ahmedabad, Kaira, Panch Mahals, Baroda, Broach, South Satara, Kolhapur, Belgaum and Dharwar districts.

Note.—The figures for 1949-50 and 1950-51 are not strictly comparable except for the groups "total of Cattle and Buffaloes" partly due to the fact that the census enumeration forms utilised for 1951 Livestock Census differed from those used in 1949-50 Census and partly to the possible difference in the geographical coverage of the two censuses.
