SOCIO ECONOMIC REVIEW AND DISTRICT STATISTICAL ABSTRACT

1966-67 OF RATNAGIRI DISTRICT :

I N T R O D U C T I O N

1.1 LOCATION AND BOUNDARIES :

1.1 (1) Ratnagiri District lies between 15°36' and 18°50' north latitudes and 73°50' and 74°36' East longitudes. It is situated along the west coast of Maharashtra. The district is surrounded by Kolaba District in the north, Satara and Kolhapur districts in the east, the centrally administrated Goa territory in the south and the Arabian sea in the west.

1.2 AREA AND POPULATION

The total geographical area of Ratnagiri District is 12,905 Sq.Km.(4,983 Sq. miles) and its total population according to 1961 Census is 18,27,203. Thus in terms of area and population, this district accounts for 4.2 percent of area and 4.6 percent of population of the State. The mid Census Population is estimated for 1966 at 19.66 lakhs in the estimates published in the District Census Hand Book. Within Bombay Division, Ratnagiri District ranks second by area and also by population among the six districts, excluding Greater Bombay. In Maharashtra State as a whole Ratnagiri District ranks 9th by size and fourth by population.

1.3 (1) Ratnagiri District is divided into 11 talukas and 4 mahals, the details of each of them are given below:-

Sr. No.	Name of Taluka/Mahal	Area in Sq.Km.	No.of inhabited villages	No.of Towns	Populati-on 1961	Percen-tage	
						Area	Pop-ulation
1	2	3	4	5	6	7	8
1.	Mandangad Taluka	415	91	-	52,056	3.2	2.9
2.	Dapoli Taluka	847	148	3	1,34,709	6.6	7.4

Contd--

-2-

Sr. No.	Name of Taluka/Mahal	Area in Sq.Km.	No. of Inhabited villages	No. of Towns	Population 1961	Percentage	
						Area	Population
1.	2	3	4	5	6	7	8
3.	Khed Taluka	999	146	1	1,37,410	7.7	7.5
4.	Guhagar Taluka	627	78	-	91,513	4.9	5.0
5.	Chiplun Taluka	1,125	131	2	1,70,982	8.7	9.4
6.	Ratnagiri Taluka	925	120	1	1,68,390	7.2	9.2
7.	Sangameshwar Taluka	1,293	170	-	1,57,020	10.0	8.6
8.	Lanja Mahal	733	84	-	82,247	5.7	4.5
9.	Rajapur Taluka	1,284	144	2	1,51,916	10.0	8.3
10.	Deogad Taluka	735	64	-	1,01,351	5.7	5.5
11.	Kankavali Mahal	775	67	-	1,11,513	6.0	6.1
12.	Malwan Taluka	663	59	1	1,27,922	5.1	7.0
13.	Kudal Mahal	820	77	-	1,14,389	6.3	6.3
14.	Vengurla Mahal	328	17	2	86,689	2.5	4.7
15.	Sawantwadi Taluka	1,336	120	1	1,39,136	10.4	7.6
Total		12,905	1,516	13	18,27,203	100.0	100.0

Out of these 13 towns, 7 were having Municipal Administration viz. Khed, Chiplu, Ratnagiri, Rajapur, Malwan, Vengurla, and Sawantwadi.

1.3 (2) The Ratnagiri Zilla Parishad was established in May 1962, with 15 Panchayat Samities whose jurisdiction was concurrent with revenue talukas/nahals given above, except the

P.T.O.

areas administrated by Municipalities. Thus the Zilla Parishad covered 93.0 percent of population while the Municipal Administration covered 7.0 percent of population of the district.

1.4 (1) TOPOGRAPHY

By topographic conditions the district can be divided into three main parts (i) the eastern hilly areas of the Sahyadris and its offshoots, (ii) the plateau surfaces, which are used for cereals crops like rice and ragi and (iii) the coastal plains where coconut and betanuts gardens and fishing are the main feature. Over 85 percent of the land surface is hilly. The main range of the Sahayadris forms the eastern boundary of the district. There are the steep and forbidding scraps of the main Sahyadris. In the centre are the transverse chains of small hills which project from the main range and develop higher elevation in the middle portions, where they are parallel to each other. On the slopes of these hills are situated the rice and varkas lands, In the basins of the rivers are located garden soils. The coastal alluvium strips are deep sandy loams. The inundation of the sea has created salty lands in many places.

1.4 (2) RIVER SYSTEM

Out of 14 rivers flowing in the district only a few are important from the point of navigation. All these rivers originate in the Sahyadri hills and have westward flow. They are flooded in monsoon, but dry during summer months. Only the visshthi river has perennial flow due to westward diversion of Koyana river water for hydro electric plant at Pophali. The length of navigable part of important rivers is given below.

Savitri 24 miles, ----- and Vashishti 28 miles.

Other rivers of some importance are Shastri, Bav, Ratnagiri, Muchkundi, Jaitapur, Vaghotan, Deogad, Achara, Kalavali Karli and Terekhol.

1.4 (3) The Soils:

-4-

There are three kinds of soil prevalent in the district, the most predominant of them is the laterite which is rich in iron and aluminum oxide. The hydrated iron oxide gives the red colour to the soils. These lateritic soils are found mixed with trappean soils in the north and shallow soils in the south. Along the coast are the alluviums. There are small patches of salt lands developed near the creeks. The lateritic soils have loamy texture and their depth varies from one foot to three feet. They are not retentive of moisture. They have several grades such as Rice soils, warkas soils, Garden soils etc. Rice soils can again be classified into Mal i.e. those situated on higher levels and "Panthal" i.e. those near water courses, where a second crop of rabi pulses or summer paddy can be sown. Warkas soils are poor in fertility. Nagali, mangoes and cashew-nuts are important crops of warkas soils. Garden soils are in the basins at the bottom of the hill ranges, they are light easily workable, well drained and fairly fertile. Arecanut and coconuts are important products of these soils. Coastal alluvium are locally known as "^{Pulanwat}Radwark" and are located on coastal strips. They are good for coconut and arecanut plantations. The salt lands were created due to inundation of the sea. A scheme for reclamation of these lands is in operation since 1949 under the Khar lands Development Board.

1.4 (4) CLIMATE: TEMPERATURE AND RAINFALL

The climate of Ratnagiri District though moist is generally healthy. There are four seasons, Summer (March to May) Monsoon (June to September), post-monsoon season (October to November) and winter (December to February). The monsoon bursts over the district by the beginning of June and the rains

P.T.O.

- continue with little intermissions till about middle of October. The average annual rainfall of the district is as a whole is 3,188 mm(125.82)". The rainfall increases rapidly from the coast towards the western ghats on the eastern borders of the district. In and near the Ghats, the rainfall is very heavy. Amboli gets annually on an average 7,446 mm(293.1") of rain as compared to 2,160 mm. in Malwan and 2,246 mm. at Deogad. July is the month of highest rainfall, when about one-third of the annual rainfall is received. Being a coastal district the variation in temperature during the day and through the seasons is not large. In the hot season, temperature rises slowly from March and May is the hottest month. With the onset of monsoon, temperature drops by three to four degrees.

post
In the monsoon months of October and November days are as hot as in May. Along the coast, the maximum temperature rarely goes beyond 38° c but in the interior it may reach 40° c. Owing to proximity of the sea, the climate is humid. Even during the winter and summer the relative humidity seldom goes below 50 percent.

1.5 SPECIAL FEATURES:

The following special features of the district are worth noting.

1) The district is one of the maritime districts of the State with the coastal belt extending upto about 320 Kms. from Borya to Redi. The area is rich in fish, but is not fully exploited due to ageold practice of fishing by Sail Craft, however, with the implementation of Plan Schemes, the mechanised boats are being acquired by fishing community. Difficulties of communications, transport etc. are also responsible for under-exploitation of the vast natural resources.

-6-

In 1961 Census, 11,841 persons were reported as engaged in fishing as principal work, They are scattered in 118 villages. Fishing is usually done all along the coast within 16 Kms. from the coast. Though transport facilities are inadequate, a major portion of the fish caught is transported to Bombay and towns like Kolhapur, Belgaum. There is also good local demand. There were 193 mechanised fishing boats in the district at the end of March 67.

ii) Mangoes and cashewnuts are important cash crops of the district. The Government has taken up special schemes to encourage the setting up of large scale plantation of these crops. Cashewnuts are exported to U.S.A. The Alphanso mango is world renowned for its taste.

iii) MINES AND MINERALS :

Some of the important minerals found in the district are iron or chromite, ilmenite, bauxite, manganese, limestones, silica sand, mica etc. In 1961 census, 5,992 persons were engaged in mining. Almost all the quantity of iron extracted is exported to foreign countries. Silica sand is useful for glass industry.

iv) The Koyna hydro electric Project generates its electricity at Pophali which is in Chiplun Taluka of this district.

v) One important feature of the district is that it is not served by Railways. All the traffic needs are met by road or sea transport. Also there is no large scale industrial factories in the district. This has caused a continuous outflow of job seeking persons estimated at 33,000 per year.

CHAPTER- IIAN EXPLANATORY NOTES :

In this chapter short notes on the tables presented in the abstract part are given. In the last District Statistical Abstract, there were 90 tables and 5 lists. In all there were 95 tables. In this present District Statistical Abstract there are 86 tables.

The mode of tables numbering has been changed in present abstract as per instructions.

TABLE NO. 1 :-

This table presents no. of rainy days and total rainfall at 16 selected centres. 15 Taluka places have rain gauges and one remaining exists at Harnai. In almost all centres the central tendency of rainfall is, it falls heavily in July, falls from June to September. This district has experienced rainfall in May 1966 at some centres. The following is the rain-fall in July 1966 at different centres.

Sr. No.	Name of Centre	Rainfall in Mms.
1.	Mandangad	1,923
2.	Dapoli	1,664
3.	Khed	1,747
4.	Harnai	932

15.	Vengurla	1,093
16.	Sawantwadi	1,491

The highest rainfall in 1966 was at Kankavali and the lowest was at Malwan. During 1965 the highest rainfall was at Rajapur and the lowest rainfall was recorded at Sawantwadi. Even though the rainfall is regular and plentiful, the variations are observed.

TABLE NO. 2 :-

This table gives mean, mean minimum, mean maximum temperature of 4 selected centres in the district.

TABLES :- 3, 4, 5, 6, 7 are ~~direct~~ dedicated to statistics relating to population of Ratnagiri District. This is fully discussed at 3.3 in chapter 1 of the Socio Economic Review.

TABLE No. 8 :-

This table gives data on ~~Scheduled~~ Castes and Scheduled Tribes in Ratnagiri District. The various sub-castes are given in chapter one of the Socio Economic Review. The population of scheduled castes in this district comes to 2.08% of the total population. The scheduled tribes are negligible in this district. The District Census Hand-Book clearly states that substantial population belonging to Mahar community reported itself as "Boudh" and hence the

-- percent ~~per~~ proportion came down from 7.53 to 2.08 % of the total population. According to 1961 population there were 37,939 persons belonging to Scheduled Castes. Table No. 53 gives beneficiaries in these classes. During 1965-66, 19,280 students were given concession and during 1966-67, 7,547 students took benefit of the scheme. This means during 1965-66 about 24% of the total scheduled caste population took benefit. Scheduled tribe population in 1961 is reported to be 3,101. As against this during 1966-67, 2,292 students have been reported to have been benefited under the backward class concessions. This is possible because students belonging to other districts also come in the district to take education in specialised branches like Agriculture and engineering. Ratnagiri has both the facilities.

TABLE NOS:- 9,10, 11, 12, 13, 14 , 15 are dedicated to agricultural statistics, minor irrigation and cropping pattern etc. Here we shall explain some of the salient features of the agricultural and forest economy of the district. Out of the total geographical area of 12,78,798 hectares out of which 25,254 i.e. 1.97% comes under forest. Table No. 24(A) gives Rangewise Forest area in Ratnagiri District for 1965-66 and 1966-67. The total of Reserve, Protected and Unclassed forest comes to 42,547 hectares in 1966-67. Forest produce in this district is to the tune of --- Rs. 1,22,62,000 was extracted. This gives Rs. 288 forest produce per hectare in this district. Major produce is timber, the value of which was Rs. 1,14,85,000 during 1966-67. It is interesting to compare the land revenue collection with value of forest produce. The land revenue collection during 1966-67 was Rs. 17,71,443 this makes it clear that value of forest produce is more in this district than the land revenue which confirms the agricultural inferior

land in this district. However, during the plan period diversification of agricultural economy by way of horticultural, fisheries development was done. During 1966-67 5,880.47 tonnes quantity of cured fish was removed in Ratnagiri district. Even though per capita Gross value of Agricultural output(1961 ending) is the lowest in the district. Ratnagiri has the potentiality of forest and fisheries which is being developed in successive plans. Table No. 9 gives land utilization data, according to which 1,90,173 hectares of land is culturable waste out of the geographical area of 12.79 lakh hectares, net area sown is 3,05,681 hectares in 1965-66. This comes to 23.9% of the geographical area. Area sown more than once is negligible i.e. 10,080 hectares as compared to the geographical area and gross cropped area i.e. 3,69,642 hectares in 1965,66 . The tail water of Koyana project is made available to Ratnagiri District in Chiplun Tahasil and intensive efforts are being made to grow sugar-cane in that area. In 1964-65 only 158 hectares area was under sugar-cane and during subsequent year 289 hectares of area is reported under sugar-cane. Out of this 289 hectares under sugar-cane 42 hectares were in Chiplun Tahasil where Sugar-cane Development Officer of Ratnagiri district is situated.

TABLE No. 11 gives yield per hectare and outturn of principal crops in Ratnagiri district. The ~~table~~ table provides information for cereals, pulses, sugarcane, groundnut, sesamum etc. crops. The crops like mangoes, betlenut, coconut, cashewnut etc. produced in this district do not find place in the statement. Yield per hectare of rice is 1174 Kg. and that of Ragi is 713 Kg.

TABLE NO. 16 regarding major and medium projects in this district is blank as there are no major and medium projects in this district. However, the tail water of Koyana made available at Chiplun Tahasil gives a chance to this district to experiment in large scale irrigation and the effects of irrigation are being felt in that area.

TABLE NO. 17 is regarding agricultural wage rates. Table 18 describes agricultural implements. This table is important as it clearly indicates the degree of mechanization of agriculture of any area. From that point of view there were in 1966, 610 iron ploughs, 5,092 carts, 16 power operated sugarcane crushers and 41 bullock-power sugarcane crushers in this district. There were 608 oil engines and 214 electric pumps, 13 tractors in the district. Maximum number of electric pumps i.e. 39 are found in Guhagar Tahasil. Chiplun Tahasil has 27 oil engines and 28 motor pumps. Fishing boats (as per 1966 Cattle Livestock implements Census) were 4,542 in number. All these figures show that the district is not much behind in mechanization considering its topography.

TABLE NO. 19

This table gives information regarding famine scarcity conditions. During 1966-67 this district was free from such calamities. However, November 1966, cyclone difficulties were experienced in 758 villages and 66,075 khatedars were affected in these villages. The above villages were granted full suspension of land Revenue. Estimated loss of crops was colossal and to the tune of Rs. 600,00,000. Live stock loss was estimated to the extent of Rs. 51,87,971 considering the bullock power agricultural economy of this district, the loss was considerable. To help the people to

P.T.O.

restore normalcy Rs. 1,34,017 were spent and Tagai to the tune of Rs. 1,87,044 was advanced to the needy people. The calamity struck, severely to the Ratnagiri, Sangameshwar, Lanja, Rajapur, Deogad, Malwan, Vengurla, Kudal and Sawantwadi Tahasils and upset the normal life in these part of the district.

TABLE NO. 20, 21;22,23 are dedicated to livestock census data and other livestock statistics. The analysis is more or less the same as the figures remain unchanged.

TABLE NO. 24(A) and 24(B) give forest data which is important from the economy of the district. The same is discussed elsewhere in this chapter.

TABLE NO. 25 gives quantities of fish brought for curing in this district. Figures for the year 1965-66 and 1963-67 are provided. They show an increasing trend. There are 21 fish curing yards of which yards at Mirkarwada, Ratnagiri, Malwan cater more than 1,000 tonnes of fish. Marine fishery is an important economic aspect of this district and from that point of view the office of Superintendent of Fisheries is located in this district. In this office the developmental aspects of Marine fishery is looked at census of fishermen is conducted loans etc. are advanced.

TABLE NO. 26 gives factory statistics. The following data will reveal the important Industries and employment position in the district:-

Sr. No.	Industry Sub-group	Total Workers	Total man days worked	No. of factories
1.	Total	2,035	4,16,298	45
2.	Electrical Light and power	209	65,685	2

Sr. No.	Industry Sub-group	Total Workers	Total man days worked	No. of factories
3.	Repairs of Motor Vehicles & Cycles	358	79,935	10
4.	Manufacture of food preparation(cashewnut)	836	1,88,772	6
5.	Canning & preservation of fruits and vegetables	88	9,504	2
6.	Canning & preservation of fish	22	1,210	1
7.	Manufacture of non-metallic mineral products(stone dressing)	132	23,666	15

Note:- Other minor factories make up total as shown at serial 1 in the table.

The table reveals total absence of big factories and factory workers. Textile industry is not shown in the table, but table no. 27 gives 1 factory and 15 workers. The overall picture of factory statistics is miniature as compared to other districts except Kolaba in the division.

TABLE NOs. 29,30, 31 give employment exchange statistics which is explained in the chapter of analytical review of the Socio Economic Review.

TABLE NO. 32 A and 32 B gives data of Government employers in the district. This aspect is described in the Analytical Review Chapter.

TABLE NO. 33 relates to Annual survey of Industries. Table No. 34 gives generation and consumption of electricity in this district. Table No. 35 indicates towns and villages electrified. By end of March 1967, 114 villages were electrified with a population of 2,97,507. In addition 10 towns with 1,21,151 population were electrified.

P.T.O.

One town was electrified by a private company.

TABLE NOS. 36 to 43 gives cooperative movement statistics which is explained at various places in the review.

TABLE NO. 44 gives medical facilities data by end of 1966 December there were 5 hospitals, 19 dispensaries, 10 maternity homes, 26 primary health centres with 55 doctors and 169 nurses in the district. There were 826 beds, 507 for males, 287 for females and 32 for children.

TABLE NO. 45 & 46 give vital statistics. Table No. 47 gives vaccination data in the district.

TABLE NO. 48 gives drinking water data.

TABLE NO. 49, 50, 51, 52 describes literacy in each Tahasil of this district and educational statistics. The data in table no. 52 is given for the district as a whole as Tahasilwise data was not available. Tables Nos. 53, 54 indicate backward class concessions and beneficiaries thereof. Table No. 55 gives expenditure on Primary Education. All primary education in this district is under the Zilla Parishad. Rs. 1,16,98,000 are spent for primary education in this district. Table No. 56 gives classification of towns and villages without primary schools or schooling facility. By end of march 1967 only 18 villages were not having schools or schooling facility in the district. These villages belonged to the low population groups. 11 villages belonged to '0-199' group and 6 to '200-499' group and the remaining one to '400-599' group.

TABLE NO. 57(A) shows railway statistics. This is the only district in the division which has no railway line. However, the same is made good by coastal transport in

- fair weather. There are 19 fair weather ports. Ratnagiri all weather port is take up in hand for development.

TABLE NO. 58 gives road length according to category and surface in Ratnagiri district. The data as on 31-3-1961 1966 and 1967 is given. After the inception of Zilla Parishads in 1962 some roads were handed over to the Zilla Parishad and the same is reflected in the table in the decline of road length under B. & C after 1961. As on 31-3-1967, the road length under B.C. was 813.30 Km. The Zilla Parishad, Ratnagiri had ~~4~~ 4,077.15 Km. roads. Municipal roads were 197.45 Km. out of the 814.91 Km. road under B. & C., 228.86 was cement concrete, 484.71 Black topped and 98.93 was water Bound Macadam. Only 2.41 Km. was granular. As for the Zilla Parishad roads, out of the 4,077.15 Km. length of roads, 2,136.35 Km. was of Granular, 1,507.69 was of water Bound type and only 85.79 Km. was Black topped. The Bombay Goa Road which passes through the Ratnagiri, is under the B. & C Department and is kept up to date Pecularity of the district is now no Tahasil is inaccessibile in any season. Mandangad which required a week to reach a decade ago, is linked with daily plying S.T. bus. In mansoon roads are the only communication in this district.

TABLE NO. 59 :-

This gives information of Motor Vehicles in operation in this region i.e. Thana, Kolaba and Ratnagiri districts, As districtwise figures are not available, No comments are given.

TABLE NO. 60

Operational statistics of S.T. (Ratnagiri District) is given in this table. As said earlier, road is the backbone of P.T.O.

- transport in this district. This is quite clearly revealed in this district there were 303 routes with 26m368 Km. length. The average vehicles on road are 249 with average daily earnings of Rs. 73,017/- . About 69,656 passengers travelled every day. The table shows an increasing trend of this statistics from 1966 to 1967.

TABLE NO. 61 gives traffic census of important roads carried out in November 1965. There are about 39 names of road. Data regarding location of count posts, Type of surface, width of carriage etc. is presented. This information is collected from the Research Officer, B. & C. Department, Bombay.

TABLE NO. 62 gives postal, telegraphs and telephone statistics. Data is given for 1961-62, 1964-65, 1965-66, 1966-67 years. From 1961-62 to 1966-67 number of post offices increased from 549 to 629. The telegraph offices went from 51 to 61 offices. Letter boxes dropped from 2,331 to 2,060 during the same period. Postmen increased from ~~22~~ 213 to 250. No. of telephones went from 347 to 735. No. of Radio licences in 1961-62 were to the extent of 3,294. This figure went 6,085. Table No. 63 gives rural broadcasting statistics.

TABLE NOS. 64, 65 gives income and expenditure of local bodies and Panchayats. Table No. 66 A, 66 B give data regarding headwise income and expenditure of Zilla Parishad. Table No. 67 gives income and expenditure position of municipalities.

TABLE NO. 68 gives plan expenditure and Table No. 69 gives plan physical achievements. The data is explained in the appropriate chapter.

TABLE NOS. 70, 71, 72 give Community Development information of the Panchayat Samities.

TABLE NO. 73 give average retail prices of important commodities at District Head Quarter .

TABLE NO. 74 gives consumer price index of Bombay as no consumer price index is calculated at Ratnagiri.

The remaining Tables give information on police force, Crimes, Judicial disposal of cases, Cinema, Banking Statistics etc. of the District.

SOCIO ECONOMIC REVIEW OF RATNAGIRI DISTRICT 1966-67

: C H A P T E R -III :

AN ANALYTICAL REVIEW

3.1 This chapter attempts to present certain important Socio economic features of Ratnagiri District. This review is mainly based on the information presented in the Statistical Abstract.

3.2 CLIMATE :- RAINFALL AND TEMPERATURE

It will be seen that the district enjoys the benefit of plentiful and regular rainfall. It has been stated in the District Gazetteer, that during the period of 50 years from 1901 to 1950, the year 1931 was with the heaviest rainfall which was 143 percent of the normal, and in 1941, which was the year of lowest rainfall it was 58 percent of normal. It is also observed that during the same period of 50 years, there were only six years having rainfall which was less than 80 percent of the normal, and none of them were consecutive.. Practically, the entire annual rainfall occurs in the months from June to October, with July being the month of highest rainfall. Being a coastal district, the variation in temperature during the day and throughout the seasons is not large. At coastal places the maximum temperature rarely goes beyond 38° c., but for interior places, it may reach 40° c. or 41° c. The table No. 2 of the Abstract gives the month-wise figures of Maximum, Minimum and Average Temperature at four centres, viz. Harnai, Ratnagiri, Deogad and Vengurla.

3.3 POPULATION

Details about talukwise population, its breakup into rural and urban, density and variation during the decade 1951-61 will be seen in Table No.3. Total population of Ratnagiri District was 17.12 lakhs in 1951 and it increased by 6.7 percent to 18.27 lakhs in 1961. The rate of increase is

-- smaller as compared to other districts in Bombay Division, the relevant figures of percentage increase are as follows:-

Thana	28.9%
Kolaba	16.5%
Nasik	29.7%
Dhulia	27.4%
Jalgaon	20.0%
Bombay Division	20.9%
Maharashtra State	23.6%

In fact, the rate of growth of population in Ratnagiri District is the lowest among all the districts. Continuous stream of out migration is the biggest single factor contributing to this special feature of the district. Among the 15 Tahsils of the district, the rate of growth shows some variation, with Kudal Mahal having the highest growth rate viz. 12.7% while at the other extreme, Malwan taluka showed a decline of 1.5 percent over the period of 1951-61. Absence of industrial activity is also seen from Table No. 5 which shows classification of towns according to population ranges. The biggest town (Ratnagiri) had a population of 31,091 only in 1961.

The density of population for Ratnagiri district was 142 per Sq.Km. in 1961.

This can be compared with 138 per Sq.Km. for Bombay Division and 129 per Sq.Km. in Maharashtra State. Only two districts in Bombay Division were having a density figure lower than Ratnagiri District, they were Nasik(119) and Dhulia(107). The district with highest density was Thana(179 per Sq.Km). Within the Ratnagiri District, the density varied from 104 per Sq.Km. in Sawantwadi taluka to 264 per Sq.Km. in Vengurla taluka.

The classification of villages according to population
P.T.O.

is shown in Table No.4. Average population per village comes to 1,108. Out of 1,516 inhabited villages, 401 were with a population of less than 500, while 184 villages had population above 2,000.

Out of total population of 18,27,203 as per 1961 Census, 8,16,804 were males, and 10,10,399 females. The sex ratio was 1,237 females per 1,000 males. The comparative figures of sex ratio of other districts of Bombay Division and Maharashtra State are:-

Kolaba	1,058
Dhulia	967
Jalgaon	957
Nasik	945
Thana	919
Bombay Division	1,008
Maharashtra State	936

It will be seen that the out-migration of males members of population is a common phenomena for Ratnagiri and Kolaba districts. The sex ratio of each taluka of Ratnagiri District is given below:-

Mandangad	1,288	Ratnagiri	1,217	Kankavali	1,241
Dapoli	1,299	Sangameshwar	1,261	Malwan	1,279
Khed	1,222	Lanja	1,272	Kudal	1,184
Guhagar	1,433	Rajapur	1,297	Vengurla	1,075
Chiplun	1,202	Deogad	1,260	Sawantwadi	1,117

The highest sex ratio is seen in Guhagar taluka (1,433) while the lowest ratio is seen in Vengurla taluka (1,075).

Economic classification of population in each taluka in Ratnagiri district is given in Table No.6. As compared to other districts of Bombay Division, the percentage of working

-population to total population is the lowest, which can be seen from the following figures:-

Nasik	49.3%
Dhulia	47.3%
Thana	47.1%
Kolaba	46.9%
Jalgaon	46.2%
Ratnagiri	44.8%
Bombay Division	46.9%

This shows that dependant population is more in Ratnagiri district than in any other district of the division . The taluka-wise percentage of workers to total population is :-

Mandangad	46.7	Ratnagiri	39.4	Kankavali	47.3
Dapoli	44.6	Sangameshwar	46.7	Malwan	41.7
Khed	46.0	Lanja	50.1	Kudal	47.0
Guhagar	47.2	Rajapur	44.2	Vengurla	42.3
Chiplun	44.1	Deogad	45.9	Sawantwadi	45.7

It will be seen that there is even distribution of working population, the maximum percentage (50.1%) is for Lanja taluka while at other end, the minimum figure is for Ratnagiri taluka (39.4%).

The effect of migration is also seen from dependancy ratio i.e. the ratio of dependants(0-14 years age-group and above 60) per 100 persons of supporting population(age-group 15-59 years). The figure of Ratnagiri District and Maharashtra State are:-

	Ratnagiri District	Maharashtra State
Dependency Ratio in 1951	89.9	79.2
1961	96.7	84.9

The scheduled castes population of the district was ⁻²²⁻ 37,939 i.e. 2.08 percent of the total population, while scheduled tribes population was only 3,101 i.e. 0.17 percent of total population. By size, the important scheduled castes reported in the Census are Mahar, Chambhar, Bhangil, Mang and Holar. Amongst scheduled tribes, the important tribes are Kathodi, Pardhi, and Bhil. Talukawise population of these castes and tribes is shown in Table No. 8.

3.4 AGRICULTURE AND IRRIGATION

About 81.2 percent of the workers in Ratnagiri district are engaged in agriculture. However, due to small holdings of land and absence of cash crops, the gross value of agricultural output per capita of rural population is very low. In fact, it is lowest in the Bombay division, which can be seen from the data given below:-

District	Per capita (Rural Population) Gross value of Agricultural out-put (1961 ending)
1. Jalgaon	Rs. 201
2. Nasik	Rs. 159
3. Kolaba	Rs. 155
4. Dhulia	Rs. 149
5. Thana	Rs. 131
6. Ratnagiri	Rs. 72

The low income from agriculture is also due to the low ratio of gross cropped area to total geographical area. This percentage is 28.9 for Ratnagiri District while for Maharashtra State as a whole it is 60.6 per-cent. Within the district, the proportion of Gross cropped area varies from 17.1% in Deogad Taluka to 45.1% in Dapoli Taluka. The talukawise percentages of gross cropped area to total geographical area are worked out

- from Table No. 9 and are given below:-

-23-

Mandangad	25.6	Ratnagiri	31.5	Kankavali	27.7
Dapoli	45.1	Sangameshwar	25.3	Malwan	32.3
Khed	25.8	Lanja	34.1	Kudal	27.4
Guhagar	21.8	Rajapur	26.1	Vengurla	47.8
Chiplun	40.8	Deogad	17.1	Sawantwadi	19.6

Regarding cropping pattern it will be seen from Table No.10 that Rice is the principal crop of the district accounting for 35.6% of the total cropped area followed by Ragi(14.3%) and Kodra (6.8%). All food crops together accounted for 69.0 percent of gross cropped area. Among non-food crops, the most important items was fodder crops as the area under cash crops like cotton oilseeds, tobacco was negligible. On the whole the cropping pattern is better than the average for the state. The Techno Economic survey of Maharashtra has estimated the gross value of agricultural output per acre of cropped area in 1965-66 at Rs. 124 for Ratnagiri District as compared to Rs. 76 per acre for Maharashtra State. However, this advantage is wiped off by the high density of population. The gross cropped area per agricultural worker on land was 3.50 acres for Maharashtra State, while it was 1.34 acres for Ratnagiri District. Talukawise variation were small ranging from 0.84 per acres per worker in Deogad Taluka to 2.04 acres in Dapoli Taluka.

Absence of cash crops is also seen from the low level of institutional finance to agriculturists. The following figures show the gross cropped area in each taluka and the amounts of fresh loans advanced by primary agricultural credit societies

P.T.O.

for the year 1965-66 and their ratio:-

-24-

Taluka	Gross cropped area in Hectares in 1965-66 (Rs. '000')	New loans advanced by Coop. Societies in 1965-66 (Rs. '000')	Loan per Hectare (Rs. per Hectare)
1. Mandangad	11	2.23	20
2. Dapoli	39	2.16	6
3. Khed	26	5.69	22
4. Guhagar	14	1.67	12
5. Chiplun	46	9.57	21
6. Ratnagiri	29	5.38	19
7. Sangameshwar	32	2.13	7
8. Lanja	25	2.37	9
9. Rajapur	31	3.07	10
10. Deogad	13	2.47	19
11. Kan kavali	21	2.03	10
12. Malwan	20	1.98	10
13. Kudal	22	3.02	13
14. Vengurla	14	1.14	8
15. Sawantwadi	26	3.33	13
Dist. Total	370	48.28	13

This ratio for the district as a whole is very low as compared to most of the districts of Bombay Division. For example the ratio was Rs. 30 per Hectare in Dhulia District, Rs.52 per Hectare in Nasik District. The main reason for low level of agricultural finance is the absence of cash crops. Even the marketing societies have to deal in commodities other than agricultural produce or requisities. Table No. 40 will show that the total purchase in 1966-67 by 19 primary Cooperative Marketing Societies amounted to Rs. 2.01 crs., but the purchase of agricultural produce and agricultural requisities

P.T.O.

- totalled to only Rs. 6.73 lakhs, i.e. 3% of total purchases. Amongst sales these two groups accounted for Rs. 29.60 lakhs out of total sales of Rs. 230.42 lakhs i.e. about 13 percent.

The data regarding average wage rates prevailing in three centres are given in Table No. 17, for the years 1965 and 1966. It will be seen that the agricultural labour was mainly employed during Kharif season. The unskilled male workers received wages at an average rate of Rs. 2.54 per day in 1965 and Rs. 3.15 in 1966. The corresponding rates per unskilled females were Rs. 1.48 and Rs. 1.70 per day. The wage rates for field labour and other agricultural operations were generally at the same level. The wage rates for carpenters varied between 3.00 to Rs. 4.10 per day during the period.

The data of agricultural implements and livestock population as per 1966 Livestock Census (Provisional Figures) is shown in Table No. 18 and 20. It will be seen that there were 608 Oil Engines and 214 Electric Pumps in 1966. There were 2.24 lakhs ploughs giving a ratio of 61 ploughs per 100 hectares of sown area.

From livestock data of Table No. 20, the ratio of the number of livestock per 100 hectares of cultivable area is worked out and shown below for each taluka of Ratnagiri District.

Taluka	Livestock per 100 hectares of cultivable area		Taluka	Livestock per 100 hectares of cultivable area
1. Mandangad	114	(9)	Rajapur	106
2. Dapoli	122	(10)	Deogad	113
3. Khed	103	(11)	Kankavali	122
4. Guhagar	90	(12)	Malwan	155
5. Chiplun	104	(13)	Kudal	96
6. Ratnagiri	92	(14)	Vengurla	139
7. Sangameshwar	90	(15)	Sawantwadi	93
8. Lanja	113		Total	106

It will be seen that the highest ratio was for Malwan taluka while the lowest ratio was for Guhagar & Sangameshwar talukas-

On the other hand the ratio of poultry per 100 persons was almost the same amongst talukas, which can be seen from figures shown below:-

Taluka	Poultry per 100 human population	Taluka	Poultry per 100 human population
1.Mandangad	52	(9) Rajapur	56
2.Dapoli	61	(10) Deogad	49
3.Khed	57	(11) Kankavali	73
4.Guhagar	58	(12) Malwan	70
5.Chiplun	61	(13) Kudal	63
6.Ratnagiri	55	(14) Vengurla	54

8.Lanja	75	Dist.Total	61

3.5 FACTORY AND EMPLOYMENT STATISTICS :

From Table No. 26, it will be seen that there were 45 registered factories in the district, in 1966. Out of these, two factories were closed. The data regarding employment etc. was available for 34 factories only, which employed 1,663 persons, consisting of 755 males and 908 females. Total number of man-days worked in these factories amounted to 4.16 lakhs, giving an average of about 12,200 man-days per factory. The maximum number of factories were recorded under the group, "Manufacture of non metallic Mineral production (Stone Dressing and Crushing etc.) viz. 15 factories. However, the maximum employment in terms of total workers as well as man-days was seen in the group, "Manufacture of Miscellaneous Food Preparations-Cashewnut Industry etc." viz. 836 workers and 1.89 lakh man-days. The break-up of workers in this group is 85 men and 751 women.

P.T.O.

Employment statistics in Table No. 29 shows that the number of vacancies notified increased from 1,836 in 1965-66 to 2,205 in 1966-67. The number of candidates placed in employment increased from 1,487 to 1,748 during the same period. The share of private sector in this employment was 10% in 1965-66 and 28% in 1966-67. From Table No. 30 it will be seen that about 50% of placements in 1965-66 and 40% of placements in 1966-67 were for clerical and related posts, the next important group was "Workers in transport and Communications" accounting for 13% of total in 1965-66 as well as in 1966-67.

The Table No. 31 shows the changes in the volume of employment, giving comparative data of 217 establishments as on 31-3-1966 and of 215 establishments as on 31-3-1967. It will be seen that total employment increased by 808 to 29,342 during the period of one year.

The data of the Census of Government employees in Table No. 32(B) shows that there were 8,448 Government employees as on 1-7-1966 in Ratnagiri District. Departmentwise breakup shows that the Revenue and Forest Department had the largest / i.e. 66% of the total. The remaining other employees number of Government employees, / followed by Home Department and the Agriculture and Co-operation Department. These three departments together accounted for 5,313 out of the total of 8,448 Government employees were appointed in nine other departments. The Table No. 32(A) shows the pay range-wise classification of these employees.

The information of Annual Survey of Industries for 1961 is shown in Table No. 33. Productive capital invested in 39 working factories was Rs. 1.21 crors while the value of production was Rs. 1.24 crs. and the value added by manufacture was Rs. 0.30 Crors.

The number of electrified towns and villages increased from 89 at the end of 1965-66 to 125 at the end of 1966-67. It will be seen from Table No. 35 that a total population of 4.34 lakhs was benefited from this electrification programme. Thus by the end of March 1967, 8 percent of the villages and about 25 percent of population received the benefit of electrification. The consumption of electricity increased from 71 lakhs Kwh. in 1965-66 to 97 lakhs Kwh. in 1966-67.

3.6 COOPERATIVE STATISTICS

Total numbers of Cooperative Societies in Ratnagiri District was 1,012 as on 30-6-1967. They consisted of 742 credit societies and 270 non-credit societies. There were 707 Primary Agricultural Credit Societies, 14 Urban Banks and Urban Credit Societies, 16 Salary Earners Societies, 20 Agricultural Marketing Societies, 38 fisheries societies, 15 Animal Husbandry Societies, 9 farming societies, 8 handloom weavers societies and 83 other industrial societies. Besides these there was one District Central Co-operative Bank, one Land Development Bank and 16 Supervising Unions. The District Central Co-operative Bank had a total working capital of Rs. 227 lakhs and had advanced loans amounting to Rs. 45.6 lakhs in short term and Rs. 3.3 lakhs in medium term during 1966-67, the corresponding figures for 1965-66 were Rs. 207 lakhs of working capital, Rs. 173 lakhs of short term loans and Rs. 3.6 lakhs of medium term loan. The Land Development Bank advanced loans amounting to Rs. 1.78 lakhs during 1966-67 as compared to Rs. 1.29 lakhs in previous year. The Urban Bank disbursed loans totalling Rs. 135 lakhs in 1966-67 as compared to Rs. 119 lakhs in 1965-66. The Primary Agricultural Credit Societies advanced loans totalling Rs. 45 lakhs in 1966-67. The percentage of overdues to outstanding increased from 36% in 1965-66 to 52% in 1966-67.

Table No. 40 shows that total purchases by Primary Co-operative Societies amounted to Rs. 201 lakhs in 1966-67. The sales increased from Rs. 157 lakhs in 1965-66 to Rs. 230 lakhs in 1966-67. Out of these sales the share of agricultural produce was Rs. 0.50 lakhs and agricultural requisities was Rs. 14.6 lakhs in 1965-66, while the corresponding figures were Rs. 0.09 lakhs and Rs. 29.5 lakhs in 1966-67. The rest of the sales related to commodities like cement, foodgrains of fair price shops etc. This shows that for want of cash crops, the co-operative marketing is not developed to any substantial extent.

3.7 PUBLIC HEALTH

It will be seen from Table No. 44 that there were 62 public institutions, with 55 doctors and 169 nurses and 826 beds at the end of 1966. This gives a ratio of 3.5 institutions and 46 beds per lakh of population. The number of indoor patients treated decreased from 18,462 in 1965 to 17,324 in 1966, while the number of out door patients declined from 3,04,838 in 1965 to 3,01,493 in 1966.

The information of births and deaths in each taluka of Ratnagiri district for years 1965 and 1966 is shown in Table No. 45. The total number of births increased from 47,903 in 1965 to 49,600 in 1966. Similarly the number of deaths also showed an increase from 19,765 in 1965 to 20,927 in 1966. The number of infant deaths increased from 2,698 to 2,798 during the same period.

The causes of deaths as shown in Table No. 46 indicate that the most frequent cause of death was respiratory diseases followed by T.B. and dysentery. These three diseases together accounted for about 16 percent of deaths in 1966.

Table No. 58 gives the data of villages without drinking water sources, as per 1964 Survey. There were 73 villages

-30-

and 697 hamlets without any drinking water source, while 604 villages and 2,416 hamlets had inadequate drinking water supply.

3.8 EDUCATION

Ratnagiri District had a literacy percentage of 28.49 as per 1961 Census. For males the percentage was 42.16, while for females, it was 17.44. Talukawise comparison (Table No. 49) shows the highest literacy percentage in Malwan taluka while the lowest literacy percentage was found in Lanja taluka.

From Table No. 52 it will be seen that total number of primary schools in the district increased by 25 to 2,720 in 1966-67 while the enrolment increased by 6,470 to 3,19,271, giving a ratio of 117 students per school for 1966-67 as compared to 116 students per school in the previous year. The number of teachers increased by 388 to 8,107. The ratio of schools to teachers improved from 2.9 to 3.0, while the ratio of students per teacher changed from 40.5 to 39.4. The proportion of trained teachers increased from 79.9% in 1965-66 to 81.6% in 1966-67. Among students the enrolment of boys increased by 1.1% while that of girls increased by 3.5%. However, the ration of girls per 100 boys enrolled was 69 in 1965-66 and 70 in 1966-67.

In Secondary Education, the number of institutions increased by 10 to 178. The enrolment increased by 2,728 to 40,078 giving a ratio of 225 students per school in 1966-67 as compared to the ratio of 222 students per school in the previous year. The number of teachers increased from 1,585 to 1,630 in 1966-67. The ratio of teachers to school decreased from 9.4 per school in 1965-66 to 9.2 teachers per school in 1966-67, while the ratio of students per teacher increased from 24 to 25 during the same period. The proportion of trained teachers was 72.8% in 1966-67 as compared to 71.7 in the previous year.

The enrolment of boys increased by 6.6 percent while that of girls increased by 9.4 percent. The ratio of girls per 100 boys increased from 36 in 1965-66 to 37 in 1966-67.

The number of higher institutions remained unchanged at 7 in 1966-67 however, their enrolment increased by 59 percent to 2,474 of which 81.3% were boys while 18.7% were girls as compared to the ratio of 74.4% boys and 25.6% girls in the previous year. The number of teachers increased from 115 to 172 during the same period.

Besides these, there were 16/special schools, and 6 pre-primary schools.

Table No. 53 shows the enrolment and concessions to Backward class students, Total enrolment declined from 1,09,939 in 1965-66 to 1,09,924 in 1966-67 while the amount of concessions declined from Rs. 29 lakhs to Rs. 19 lakhs. From Table No. 53, it will be seen that total expenditure on primary education in Ratnagiri District increased from Rs. 109.9 lakhs to Rs. 117.0 lakhs in 1966-67.

3.9 TRANSPORT

The information of Road Mileage in Ratnagiri District is given in Table No. 58. Total extra Municipal Road mileage increased from 4,886 Km. in 1965-66 to 4,892 Km. in 1966-67 while length of municipal roads increased from 194 Km. to 197 Km. in the same period.

The data on operations of State Transport Corporation in Ratnagiri Division shown in Table No. 60 indicates that total number of routes increased from 265 in 1965-66 to 303 in 1966-67 while the number of passengers travelled per day increased from 63,000 to 70,000 during the same period. Average daily earnings increased from Rs. 65,000 in 1965-66 to

- Rs. 73,000 in 1966-67.

The postal statistics in Table No. 62 show that there were 629 post offices , 61 Telegraph Offices and 735 Telephone connections in Ratnagiri District.

3.10 LOCAL BODIES :-

From Table No. 65 it will be seen that the total number of village panchayats increased from 923 in 1965-66 to 973 in 1966-67. However, their income decreased from Rs. 74.6 lakhs in 1965-66 to Rs. 59.6 lakhs in 1966-67. There was also a decline in the total expenditure from Rs. 75.7 lakhs to Rs. 62.2 lakhs during the same period. Total revenue receipts of Ratnagiri Zilla Parishad declined from Rs. 387 lakhs in 1965-66 to Rs. 350 lakhs in 1966-67, while revenue expenditure also declined from Rs. 381 lakhs to Rs. 350 lakhs during the same period. The main reason for decline in income and expenditure was the reduction in Government grants from Rs. 355 lakhs to Rs. 317 lakhs. Income of all Municipalities increased from Rs. 33 lakhs in 1965-66 to Rs. 39.5 lakhs in 1966-67. The main reason for increase in income was the increased receipts from Octroi, which increased from Rs. 21.7 lakhs to Rs. 26.4 lakhs. Total expenditure of these Municipalities increased from Rs. 30 lakhs to Rs. 37 lakhs.

MISCELLANEOUS

For the Plan Schemes there is a separate chapter. Community Development, the Table No. 71 shows that expenditure on C.D.blocks, upto end of March 1967 was-

Rs. 246 lakhs on Stage I Blocks

Rs. 22 lakhs on Stage II Blocks

Rs. 3 lakhs on Post-stage II Blocks.

The Table No. 79 shows that there were 25 places which were served by banks in 1967 as compared to 22 in 1966. Total number of banking offices at the end of 1967 was 56 consisting of 24 offices of scheduled banks and 32 offices of co-operative banks. The Table No. 82 shows that total gross collections of small savings increased from 165.6 lakhs in 1965-66 to Rs. 174.6 lakhs in 1966-67 while net collections increased from Rs. 28.8 lakhs to 32.8 lakhs during the same period. Land revenue collection in 1965-66 was Rs. 18.8 lakhs and in 1966-67 it was Rs. 17.7 lakhs.

SOCIO ECONOMIC REVIEW AND DISTRICT STATISTICAL
ABSTRACT OF RATNAGIRI DISTRICT

C H A P T E R I V

THE A N N U A L P L A N 1 9 6 6 - 6 7

The Third Five Year Plan period ended in March 1966. The year 1966-67 would normally have been the first year of the fourth plan. But the finalisation of the country's Fourth Plan was delayed owing to the preoccupation of the Government of India on border troubles with Pakistan and the uncertainties of foreign aid following this situation. As a result, the Annual Plan for 1966-67 was framed as an interim plan for one year, without prejudice to the size and content of the Fourth Plan of the State.

Before discussing the Annual Plan 1966-67, it would be useful to note the outlays and achievements of the earlier plans. At the time of implementation of the First Plan and major part of Second Plan, the present Maharashtra State was a part of Bombay State, which also included other regions like Gujrat. As a result figures of comparative outlays are not available for three plans. The Third Five Year Plan of the State involved an outlay of Rs. 390.20 crs. as against this, the actual expenditure during the same period was Rs. 434.7 crs. in spite of economies and curtailment of outlays on schemes of lower priorities as per the Mid Term Appraisal. The increase in expenditure was mainly due to the greater emphasis on policies and programmes requiring special attention in the context of the National Emergency. The impact of plan outlays can be seen from the growth in the State Income and per Capita Income of Maharashtra State.

P.T.O.

Item	Years			
	1955-56	1960-61	1964-65	1965-66
1. Total State Income (At constant prices 1955-56-Rs.Crs.)	1,004.2	1,370.2	1,522.0	1,471.4 *
2. Per Capita Income (At constant prices 1955-56 in Rs.)	292	350	357	338 *

* Provisional

It will be seen that the State Income at constant prices increased by 36 percent in the Second Five Year Plan, it further increased by 11.0 percent in the Four Years Period of 1961-65, but in the last year it should a decline of 3.3 percent, as a result the increase over five year plan period was only 7.3 percent. Similarly the per capita income increased from Rs. 350 in 1960-61 to Rs. 357 in 1964-65, but declined to Rs. 338 in 1965-66. The main reason for the decline in the last year was the decline in agricultural output which factor combined with growth of population greatly nullified the relatively small gains under other sectors.

During the Third Plan period, the expenditure incurred on district level schemes implemented in Ratnagiri District amounted to Rs. 704.41 lakhs. In the year 1966-67, the total expenditure was Rs. 212.14 lakhs. The following summary table shows the comparative figures under major heads of development.

Sr. No.	Head of Development	Third Plan		Year 1966-67	
		Amount (Rs. lakhs)	Percentage to total	Amount (Rs. lakhs)	Percentage to total
1.	Agricultural Programme	171.35	24.3	72.72	34.3
2.	Co-operation and Community Development	176.99	25.1	28.31	12.4

Contd.

-36-

Sr. No.	Head of Development	Third Plan		Year 1966-67	
		Amount (Rs. lakhs)	Percentage to total	Amount (Rs. lakh)	Percentage to total
3.	Irrigation & Power	-	-	45.60	21.4
4.	Small Scale Industries	2.87	0.4	0.08	0.1
5.	Transport & Communication	237.69	33.8	47.46	22.4
6.	Social Services	115.51	16.4	19.97	9.4
Total		704.41	100.0	212.14	100.0

It will be seen that the emphasis in Annual Plan 1966-67 was more on Agricultural Programmes. Also the programmes of Industry, Irrigation and Power received more attention than the programmes in Third Plan. The Programme of Rural Electrification was treated as district level scheme and hence the substantial outlay under this head. The annual average plan expenditure during Third Plan works out to Rs. 141 lakhs, while in 1966-67 the corresponding figures was Rs. 212 lakhs, representing an increase of 50 percent. Another important feature is the decline in share of expenditure under Community Development and Cooperation, Transport and Communications and Social Services.

A brief description of some important schemes implemented in Ratnagiri District during 1966-67 is given below.

I AGRICULTURAL PROGRAMMES

(a) AGRICULTURAL PRODUCTION:- Under the scheme for "Development of Horticulture", a budget provision of Rs. 6.00 lakhs was made for grant of loans to cultivators for new plantations, renovation and rejuvenation of old gardens, etc. out of this provision total expenditure incurred was Rs. 5.98 lakhs. Physical achievement was 23,223 acres of cashewnut

P.T.O.

plantation and 1,217 acres of other plantations, 1,155 acres of rejuvenation and 3,863 acres of renovation of mango trees. On the scheme of "Crop Campaign", an amount of Rs. 10.93 lakhs was spent against the provision of Rs. 24.56 lakhs, under this scheme, 1,739 nurseries of taichung paddy and 555 other nurseries were raised, free distribution of fertilizers for 25,000 acres and subsidised distribution of fertilizers for 100 acres under wheat were undertaken and seed treatment in 100 acres of wheat was achieved.

(b) MINOR IRRIGATION :- Under the scheme of construction of Community Wells an amount of Rs. 1.50 lakhs was spent out of provision of Rs. 3.70 lakhs and the work of 33 wells was in progress. A provision of Rs. 9.88 lakhs was sanctioned for the scheme of "Minor Irrigation Works" in local sector, of this Rs. 9.54 lakhs were spent, resulting in irrigation potential of 1,593 acres.

(c) SOIL CONSERVATION:- The provision of Rs. 10.00 lakhs for the scheme of "Terracing of lands" was fully achieved and 953 acres of terracing was completed. For the scheme of "Land Development Cum Horticulture" an amount of Rs. 12.48 lakhs was spent for plantation in 12,751 acres and trenching in 10,893 acres. The scheme envisages departmental work in lands belonging to private cultivators so as to raise cashewnut plantations on a large scale. The expenditure is to be treated partly as loan and partly as subsidy. This scheme is in operation since 1964-65 and the benefits in terms of increase in cashewnut production will be witnessed by 1970-71. An amount of Rs. 1.53 lakhs was spent under the scheme for "Reclamation of Khar and Khajan Lands" and reclamation of 1,444 acres was completed.

(d) DAIRY DEVELOPMENT:- The scheme of " Dairy Development in under-developed road regions" was put into operation in October 1964, by starting milk collection centres at Mahad, Khed and Chiplun as feeder units to Poona Milk Scheme. The Konkan Dairy Project contemplates an integrated programme for reaising the milk potential of the underdeveloped areas in the region. Three sub-schemes at Mahad, Khed and Chiplun were sanctioned in 1966-67 and an expenditure of Rs. 7.49 lakhs was incurred. Average daily collection of milk in flush season was 2,930 litres.

(e) FORESTS:- An important scheme under this head is the "Development of Minor Forest Products" under which an expenditure of Rs. 1.28 lakhs was incurred and plantation in 1,400 lakhs was completed.

(f) MARINE FISHERIES :- The scheme for "Mechanisation of Indigenous Boats" involved an outlay of Rs. 1.01 lakhs and 40 engines and 20 winches were supplied to fisherman. Another important scheme was "Improvement of fishing boats" under which assistance totalling Rs. 3.80 lakhs was given for construction of 29 new boats, one decked boat and for decking of 24 existing boats. Assistance in the form of subsidy totalling Rs. 1.32 lakhs was given for purchase of fishery requisites such as nylon and hemp twine, fish hooks, H.S.D. Oil etc.

Total expenditure on all schemes of Agricultural Development involved an outlay of Rs. 72.72 lakhs and accounted for 34% of total expenditure.

II COOPERATION AND COMMUNITY DEVELOPMENT:- Out of the total expenditure of Rs. 26.31 lakhs under this head, the schemes under "Cooperation" involved an expenditure of Rs. 0.31 lakhs while schemes under "Community Development"

accounted for expenditure of Rs. 26.00 lakhs. The most important scheme was the "Community Development Project" for which Rs. 19.93 lakhs were spent. An amount of Rs. 4.11 lakhs was spent under the scheme of "Utilisation of Rural Man Power". Under the C.D. Programme, all panchayat Samities were covered one (Mandangad) panchayat Samiti was in post stage II, 5 were in Stage II and the remaining 9 were in stage I, at the end of March 1967.

III IRRIGATION & POWER :- The only schemes under this head implemented at District level was the scheme of "Rural Electrification" with an outlay of Rs. 45.60 lakhs 36 villages were electrified during 1966-67, bringing the total number of villages and town electrified to 125 as on 31-3-1967.

IV TRANSPORT AND COMMUNICATIONS:- The 9.50 lakhs were spent on the scheme of West Coast Road for improvement of surface in 21.73 miles and 50 cross drainage works. On the scheme of District Roads expenditure incurred was Rs. 22.68 lakhs for new construction in 12 miles, improvement in 16.25 miles, 42 cross drainage works and construction of 11 bridges. The scheme for "Rural Roads" involved an outlay of Rs. 1.66 lakhs for construction of new roads of 6.00 miles. An amount of Rs. 13.03 lakhs was spent on the scheme of 'Development of all weather Port at Ratnagiri'. The expenditure was incurred on reclamation and road works. The agency for construction of break-water was fixed. On the scheme of "Development of Minor Ports" an amount of Rs. 0.49 lakhs was spent and one water supply scheme, one sanitary arrangement and jetty at one port was completed. Similarly under the scheme of "Development of

-40-

- Inland water ways" one water supply scheme was completed.

V SOCIAL SERVICES:- Under this head, there are 9 sub-heads. Only some important schemes are discussed below. For the scheme for "Expansion of Primary Education" an amount of Rs. 2.05 lakhs was spent and 253 teachers were posted. Expenditure of Rs. 2.48 lakhs was spent and for the scheme of "Basic Training to Primary Teachers" . The scheme of "Educational concessions to Backward classes" involved an expenditure of Rs. 2.60 lakhs. An amount of Rs. 1.27 lakhs was spent on the scheme for " Development of Govt. Polytechnic". The scheme for "National Malaria Eradication Programme" involved an expenditure of Rs. 1.43 lakhs. An amount of Rs. 5.43 lakhs was spent on the scheme of "Family Planning" and sterilization of 3,101 persons and 5,169 loop cases were completed. The scheme of "Technical and Vocational Training" under which the Industrial Training Institute, Ratnagiri is set up involved an expenditure of Rs. 1.21 lakhs. The work of construction of two buildings was in progress.
