## CHAPTER - I.

### INTRODUCTION AND BRIEF HISTORY :-

There was long standing demand, a 300 year old dream for creating Jalna as an independent district in the Marathwada which was fulfilled recently in the year 1981. A meeting of the State Cabinet was held at Aurangabad on 23rd and 24th January, 1981 and it was decided that on the auspicious day of 1st May, 1981, the Maharashtra day, the Jalna would be one more district in the State of Maharashtra and in Aurangabad region. It was the 27th district in Maharashtra and the 6th district in Aurangabad region created on 1st May, 1981. In the newly formed district of Jalna five tahsils are included. Four tahsils viz. Jalna, Ambad, Jafferabad and Bhokardan were carved out from Aurangabad district on its bifurcation and included in new district. While tahsil of Partur was carved out from Parbhani district and included in it. The boundaries of all the tahsils in the newly formed district were concurrent and coinciding with the boundaries of previous tahsils of the former districts from which they were carved out except that the fourteen villages of Bhokardan Tahsil were excluded from the former Tahsil carved out. Thus the newly formed tahsil of Bhokardan is exclusive of fourteen villages viz. Wakad, Anad, Ghanegaon Hivri, Murti, Nanda, Malkheda, Palaskheda, Sawait, Titvi, Sawaladbara, Dabha, Pimpalwadi, Mahalabdha and Devhari.

The city Jalna and the headquarter of newly formed Jalna district is situated on the confluence of Kundalika and Sina rivers. It was known as Hirwali in the ancient days. There are different versions on how the city got the name Jalna. Swami Chakradhar who founded Mahanubhav panth had his residence at this place for some time. In the Lila Charitra of Mahanubhav there is a mention of this place as "Hirwali" till the end of Yadva rule in 1300 A.D., the place was known as Hirwali. According to "Haquiqaat Nama" "Jalarai" was the chief ruler of the Hirwali. Even though he lost the battle fought against him, Hirwali was named as Jalna after him. It was a tiny villages of 44 huts around the temple Mumbadevi. TRADITION ASCRIBES THE

Tradition ascribes the foundation of the town as far back as time of Rama, Hero of Ramayana whose consort Sita said to have resided here. It was then known as Janakpur. Subsequently at the desire of a merchant the name was changed as Jalna from his occupation of Jalaha, a weaver.

LOCATION, TOPOGRAPHY AND SOILS:-

Jalna district with its 7.40 lakh hectares area and 8.97 lakhs of population lies between  $19^{\circ}.15$  and  $20^{\circ}.32$  North latitude and  $75^{\circ}.36$  and  $76^{\circ}.45$  east longitude approximately. It is bounded on the north by Jalgaon district, on the east by Buldhana and Parbhani districts, on the south by Beed district and on the west by Aurangabad district. The main range of Jalna hill with branches off from the Satmala range runs west east for a length of about 100 Km. There are no leading peaks in this range. The small peaks includes the, hills of Jalna, Partur and Ambad having narrow ridges with flat tops that stretch eastward and gradually sink into the plain. The slope of the land is towards south and the average elevation above sea level is found as 534 meters. The Godawari is the main river of the district. It forms the southern boundary for about 60 Kms. and separates the district from Beed district. Its principal tributaries are Dudhana and Ghalati flow from the central part of the district. The other rivers are Purna, Girja and Khelna which flow from the northern part of the district. The Kundlika the tributary of Dudhna passes through Jalna city.

The soil of Jalna district is black cotton soil derived from the trap volcanic rock and is rich in plant food. It is a soil of regur formed by the weathering of the trap rock. The soil varies considerably in texture and depth and can be classified as light, medium and heavy soils formed as a result of their location. The soils along the river banks are deep, black and very fertile. The geological formation of the soil can be stated as (i) Middle traps of

Deccan territory, (ii) Older alluvial deposits of Godawari, (iii) Modern alluvial deposits of Godawari and other rivers forming upper layer. The plant nutrients such as lime magnesia, Iron and Alkalies are available in black soil on which dry crops such as cotton flourish well. It swells and becomes sticky on watering while develops cracks on drying.

The black soil is found in Ambad and Partur Tahsils while shallower and courser soils are observed towards north in Jalna, Bhokardan and Jafferabad tahsils. Since the black soil retains moisture for pretty long time, crops such as cotton, Sugarcane, Rabi Jowar, Bajra Kharif Jowar, Pulses etc. are grown in comparatively medium shallow and courser soils.

CLIMATE:- The climate of Jalna district is pleasant during the greater part of the year. The climate year may be divided into three short seasons

- (i) a moderately warm wet season from June to September
- (ii) a cool dry season from October to February and
- (iii) Hot dry season from March to May.

The rainy season which lasts from June to September is warm and pleasant during rains as the temperature does not fall below  $17^{\circ}\text{C}$ . and normally ranges between  $21^{\circ}\text{C}$ . to  $30^{\circ}\text{C}$ . The winter season is comparatively dry and starts from November and ends in February. January is the coldest month of the year. The maximum temperature in the month of May rises even as high as  $41^{\circ}\text{C}$ . Hot dry winds prevail occasionally in April & May. During summer, the days are hot but nights are fairly cool.

RAINFALL:- On the basis of the total rainfall and its distribution, the district can be divided in two zones. The first comprising of Bhokardan, Jafferabad and Jalna talukas with approximate rainfall 700 mm. favourable for kharif cropping. The second zone comprises of talukas of Ambad and Partur where rainfall raises from 700 mm. to 800 mm. more favourable for rabi cropping.

Rainfall is not uniform in all the parts of the district. The area of assured rainfall are Jalna and Ambad talukas. The areas of moderate normal rainfall from 625 mm. to 750 mm. are Bhokardan and Jafferabad. The rainfall is mostly from south west Mansoon. The district receives few showers of north east Mansoon also in the midst of October.

The table below indicates normal and actual rainfall during 1981 at various centres in Jalna district.

TABLE NO

Table showing centrewise normal rainfall and actual rainfall during the year 1981.

| Sr. No. | Name of the centre | Normal rainfall in mm. | Rainfall during 1981 in mm. |
|---------|--------------------|------------------------|-----------------------------|
| 1.      | Bhokardan          | 735                    | 395                         |
| 2.      | Jafferabad         | 770                    | 672                         |
| 3.      | Jalna              | 755                    | 928                         |
| 4.      | Ambad              | 818                    | 621                         |
| 5.      | Partur             | 930                    | 770                         |

It may be observed from the above table that during the year 1981 the rainfall at centre Jalna was more than normal rainfall while it was less in other centres viz Bhokardan, Jafferabad, Ambad and Partur.

The reliability of the rainfall is slightly low in the district. According to Sukhtankar Committee, the Wadigodri and Ambad circles of Ambad taluka are akin to scarcity. The area declared as akin to scarcity is only 7% of the area of the district.

FORESTS:- The area under forest is 50 Sq Kms. Forests are scattered in Bhokardan taluka. These forests have thorny shrubs with barren and rocky patches scattered all over. On the whole the forests in the district are of an inferior type. Sandal wood is found in vallyes at foot hills in Bhokardan and Jalna talukas. Wood found in the forest is mostly used for making coal. Other forest produce includes Karanj, Bagwat, Bhilwan, Tarwad, Honey etc.

MINERALS:- Very few minerals of economic value are found in the district. Those found are Jaspars, Agata, Carnal-ian, Chakedary, Beliotraps and rock crystals, both white and amethystine kankar or nodular limestone, basalt and granite occur all over the district, and are utilized for building purposes.

INDUSTRIES.:- The M.I.D.C. has developed the industrial area on Devalgaon Raja road where one cooperative industrial estate is established in the year 1962. The area of cooperative Industrial estate is 33 Hectares, wherein 45 plots have been allotted. In all 32 sheds have been constructed. 28 Units are functioning in these sheds. Beside M.I.D.C. has allotted 36 plots to individual units. The M.I.D.C. has acquired 158.10 hectares of land on Jalna-Aurangabad road. There are 223 plots in these area out of which 187 plots have been allotted. Mini Industrial estate is established at Ambad. There are 12 sheds in the estate out of which 7 have been allotted.

There are in all four large/medium scale industries functioning in additional industrial area Jalna.

-((6))-

Following four more large scale units are likely to be started.

1. M/S Needle Roller Bearing Co.Ltd., Jalna.
2. M/S Hindustan Ferado Pvt.Ltd. Jalna
3. M/S Samarth Sahakari Sakhar Karkhana Mahakala, Tq.Ambad.
4. M/S Samarth Cylender Pvt.Ltd. Jalna.

Besides these one more sugar facgory has been given a letter of intent. 822 small scale units are registered in the district. The broad classification of the units is shown as under.

| Sr. No. | Industry category      | No. of Units. | No. of units functioning out of 3 |
|---------|------------------------|---------------|-----------------------------------|
| 1       | 2                      | 3             | 4                                 |

CHAPTER - II.

Explanatory note on scope and limitations of Statistics presented in the Socio Economic Review and District Statistical Abstract, 1981-82.

=====

1. This is the first publication of Socio Economic Review and District Statistical Abstract for the year 1981-82 consequent on formation new of Jalna district from 1st May, 1981. This publication presents statistics on important Socio Economic aspects of development of Jalna district which contributed to increase the economy of the district. The data presented are therefore Socio Economic Indicators for important sectors of development. The data are mostly for the year 1981-82. The data for the preceding or for the latest available year are presented wherever it is not available for the year 1981-82. The reference period is financial year for majority of the sectors. The data on Agriculture are for Agriculture year while data on co-operative are for cooperative year. The data on some of the items such as rainfall, temperature, Medical health & vital statistics, crime statistics are for the calender year. The tahsilwise data are presented wherever possible for inter-tahsil comparison. Attempt has also been made to depict the data for the series of years to know the rate of development over period of time wherever possible. However due to some constraints and due to non-availability of data exclusively for Jalna district, the data for past years are not presented in few sectors. In some of the cases where data for newly formed district are not made available, the data for the old district of Aurangabad from which major portion of the district has been carved out, has been depicted. It is worth-mentioning here that the data of 14 villages of Bhokardan transferred to Soegaon in Aurangabad district while forming Jalna district has been excluded wherever possible in number of tables. However in othere tables data is inclusive of these villages. The agencies from whom data are collected are the State/Central Government offices, situated at various level and local bodies in the district. The source from which data are collected is stated in the foot-note.

2. DISTRICT AT A GLANCE:-

The highlights of the district are shown sectorwise on various items under the District at a glance wherein district is compared with the Maharashtra State. As far as possible latest year of reference is followed in respect of items indicated and shown against each.

2.2 :- The present publication is presented in two parts. The first part contains the descriptive portion in four chapters while the second part contains the figurative statistics in various tables.

2.3:- The first chapter is introductory and explains the highlights of the district while second chapter indicates the scope and limitations of the data presented in the publication. The Third chapter gives analytical review and sectorial trend of development over years while broad features of the Annual Plan 1981-82 implemented in the district is explained sectorwise in brief in chapter four.

2.4:- The graphs on some of the important items such as land utilisation, production of foodgrains, educational institutions plan expenditure and collection of land revenue have been depicted at the end of Part-I.

2.5:- The scope and limitations of the data presented in various tables of the publication are explained sectorwise in the following paragraphs.

I- AREA AND POPULATION:

In all nine tables are presented in this section. The data depicted in these tables is mostly as per 1971 Census. The table No.1.1 gives the tahsilwise area, population, towns and villages, households and residential houses classified according to rural urban classification. It also presented the density of population and classification of population according to males and females. The concept urban in 1971 census is termed as the place having municipal corporation or municipal council or cantonment Board or civil line irrespective of population. The other places having population of 5000 or more or density of population more than 400 sq.Kms. or 75 percent of working male population which pursues occupation other than agriculture or the population possessing certain urban characteristics are also termed as urban areas.

1.2:- The areas which do not satisfy the criteria prescribed for recognising urban areas are termed as rural areas. These are statutory revenue villages having well defined boundaries and a separate land records. These villages include hamlets wadies, Tandas and padas. The villages having no population are recognised as un-inhabited villages.

1.3:- The table No.1.2 indicates the decadal variation of population since 1951 to 1971 while table No.1.3 presented the Tahsilwise classification of villages according to 1971 Census population ranges. In table No.1.4 tahsilwise towns have been classified according to population ranges. The workers and non-workers of each tahsil have been classified according to livelihood classes in Table No. 1.5. Here the worker is defined as a person who is economically active and has participation in any economically productive work, physically or mentally. The persons participating in seasonal works such as cultivation livestock, dairy, households, industry on regular basis atleast for more than a hour a day throughout the major part of the working season are also treated as workers. The persons in regular employment in trade, profession, service business commerce and Industry in the week preceeding the day of actual enumeration are also treated as workers.

1.4.:- The non-workers are those who are not gainfully occupied and are not engaged in any economically productive work. These are primarily housewives engaged in household duties. The students beggars, pensioners, royalty, rent and dividend receives are also treated as non-workers.

1.5:- The table No.1.6 A gives the population of old Aurangabad district according to age groups of 1971 Census. While Table No. 1.6 B presents the religion-wise classification of population of old Aurangabad district as a whole as per 1971. The data for these table for the newly formed district of Jalna is not available.

-((11))-

1.6:- The data of scheduled caste, scheduled tribes and new-Budhists population as per 1971 Census and revised population figures of 1977 is depicted in Table No.1.7. The distribution of houses by material used for walls and roof as per 1971 Census is shown in Table No.1.8 while the distribution of households according to size, status & tenure is shown in table No.1.9. In absence of the data for newly formed Jalna district data of old Aurangabad district is presented in both these tables of 1.8 and 1.9.

## 2. RAINFALL AND CLIMATE:-

2.1:- The table No.2.1 gives the total monthly rainfall and the number of rainy days for the calender year 1981 for the selected centres in the district. A day is treated as rainy day, if it has during the 24 hours recorded a minimum of 2.5 mm.rainfall in rainguage. The annual rainfall for each centre is indicated and normal rainfall is shown in the table. The normal rainfall is the average rainfall for a minimum period of five years or maximum period of 80 years. The monthwise maximum and minimum temperature recorded by Chikhalthana and Aurangabad centres of Aurangabad district for the year 1981 is shown in Table No.2.2 in absence of the observatory in Jalna district.

## 3. AGRICULTURE:

3.1:-In all thirteen tables on Agficultural statistics are included in this section. Tahsil-wise data on land utilisation sources of irrigation yield and out-turn of different principal crops and area under irrigated and unirrigated crops is presented for the years 1979-80 and 1980:81 for the first five tables. Tahsilwise data of irrigation wells is shown for counsecutive three years from 1979-80 in table No.3.6. The size class-wise operational holding and area operated in the year 1976-77 is given in Table No.3.10 while data on agricultural implements as per livestock census 1978 is exhibited in Table No.3.11. The information on major and minor irrigation works wage rates and scarcity for the year 1981-82 is given in other tables.

3.2:- The concepts adopted for various terms used in these tables are as follows.

a) Geographical area:- The geographical area shown in these tables is the area according to village papers prepared by the revenue department and it may not tally with the area of the surveyor General of India.

(b) Land put to non-agricultural uses:- It is the land covered under buildings, roads, railways, bridges, rivers, canals etc. and other lands put to uses other than agriculture.

c) Barren and unculturable land:- The land which cannot be brought under cultivation by simple means unless at a high cost. The lands such as mountains deserts are classified under this category.

d) Permanant pastures and grazing lands:-

It covers the grazing land, village common grazing land and the grazing land within the forest.

e) Culturable waste:- This is the land which has not been brought under cultivation anytime before and is covered under shrubs and jungles. This land can however be brought under cultivation with little efforts and at low cost.

f) Misc. trees crops and groves not included in the net area sown:- This includes all cultivable land which is not included in net area sown.

g) Current fallows:- The land which is kept fallow during current year is the current fallow land.

h) Other fallows:-

The lands which were under cultivation but are temporarily out of cultivation for a period not less than one year and more than five years are classed as other fallows.

i) Net area sown:- This is the net land cultivated during current year. The area sown more than once is counted only once.

j) Gross cropped area:- This is the total area under crops including the area sown more than once and twice-

k) Cultivable area is the sum of areas under :-

- i) Net area sown
- ii) Cultivable waste.
- iii) Current and old fallows.
- iv) Miscellaneous trees and crops and groves not included in net area sown.

#### 4. ANIMAL HUSBANDRY FOREST AND FISHERIES:

The livestock population and the population of poultry as per 1978 census is shown in Table No.4.1 while the Statistics on veterinary facilities existed and animals treated during 1981-82 is given in table No.4.2. There was no mobile veterinary unit in the district during 1981-82. The number of animals fallen due to various diseases and disease-wise mortality of livestock is shown in table No.4.4 for 1981-82. The number of animals slaughtered in recognised slaughter houses in the year 1963-64 and 1981-82 is given in table No. 4.5. The area duly classed in reserved protected and unclassed under revenue and forest department separately is shown for the year 1960-61 and 1981-82 in table No.4.6.

The quantity and value of various forest produce in 1960-61 and 1981-82 are shown in Table No.4.7.

The forest area in these tables may not tally with the area shown in Table Nos. 3.1 etc. due to different concepts of classification. Reserved forest are mainly for timber production in which grazing is not allowed. The grazing and cultivation with certain restrictions is allowed in protected forest. The unclassed forest is the unoccupied waste or in accessible forest. The statistics relating to area suitable for fish culture and that brought under pisciculture fish production, value of catch to producer and carp fry used for the years 1960-61 and 1981-82 is shown in table No.4.8.

#### 5. EMPLOYMENT, INDUSTRY, MINING AND ELECTRICITY.

5.1:- The statistics relating to registered and working factories under different industry sub-groups with average daily employment mandays worked etc. for the years 1980 and 1981 is given in Table No.5.1 while

classification of factories according to working strength and the number of days worked in 1980 and 1981 is shown in table No. 5.2 and 5.3. The information as regards fixed capital, working capital output, input value and employment of the registered factories as per Annual Survey of industries for the year 1979-80 and 1980-81 is given in Table No.5.4. In this the term factory used is the establishments employing ten or more workers working with the aid of power or employing 20 or more workers and working without aid of power and registered under factory Act, 1948. The information for all these 4 tables is depicted for old Aurangabad district as separate information for Jalna district is not available. The employment exchange statistics regarding registration, vacancies notified, placements done employment seekers on live register and the placements according to national classification of occupation as at the end of year 1982 is shown in table No.5.5 while vocational guidance given at the exchange is given in Table No.5.6. The works undertaken under employment Guarantee scheme, the employment generated and expenditure incurred during 1981-82 is shown in Table No. 5.7. The employment in different industries as at the end of March, 1982 is shown in Table No.5.8. The electricity ~~xxxx~~ consumed for various purposes during 1981-82 is shown in table No.5.10 while towns and villages electrified with population as at the end of March, 1982 is shown in table No.5.9.

#### 6. COOPERATION -

6.1:- The statistics relating to cooperative movement in the district is furnished in Table Nos.6.1 to 6.12. Different types of co-operative societies in 1981-82 are shown in Table No.6.1 while selected data on these cooperative societies is given in Table No.6.2. The audit classification of all these societies is depicted in table No.6.3. There were no cooperative banks existing in the district in the year 1981-82. The Table No.6.5 gives the information of primary agricultural

credit societies which were in operation in 1981-82. The table depicts the No. of Khatedars, members, share capital working capital, loans advanced and repaid and the overdues. Crop loan advanced is given in Table No. 6.1. While crop loan advanced to farmers societies is given in Table No. 6.2. The data on operation of central and primary marketing societies is furnished in Table No. 6.7, while data on operation of non-agricultural credit societies is given in table No. 6.8. The table No. 6.9 to 6.12 give the information of other types of societies regulated markets and money lenders. Here the working capital includes the paid up capital deposits and the borrowings. Outstanding loans includes cash credits, overdues and loans. Overdues refer to amount due for repayment but not actually repaid and for which no legal extension is granted.

#### 7. MEDICAL AND PUBLIC HEALTH.

7.1. In this section data on medical and public health facilities for the year 1981 is given. Table No. 7.1 gives medical facilities available through public health and public aided bodies in each tahsil with the number of patients treated. The data on vital statistics viz. births deaths, including infant deaths, registered in each tahsil for the year 1981 is given in table No. 7.2. The causes of deaths occurred in 1981 and allied years are furnished in Table No. 7.3 while tahsilwise cholera inoculations performed and vaccination done is shown in Table No. 7.4. Table No. 7.5 gives the family planning statistics during the year 1981-82.

8. Education:- The data on tahsilwise number of literates and percentage of literacy as per 1971 Census are shown in Table No. 8.1 while data on education level of the people in rural and urban areas are given in Table Nos. 8.2 & 8.3. The data regarding educational institutions and teachers according to type of institutions is given for three consecutive years from 1979-80 to 1981-82 in table No. 8.4.

while stagewise pupils according to type of educational institution and sex of pupil are depicted in Table No.8.5. Other type of educational institutions are shown in Table No.8.6 while concession given to economically backward classes of free education is given in Table No.8.7. The table No.8.9 gives the data on vocational and technical institutions while table No.8.10 gives the data on adult education centres. The table No.8.11 gives data on teachers training institutions during 1979-80 and 1980-81.

#### 9. TRANSPORT AND COMMUNICATION:-

The length of railway route according to guage is given in Table No.9.1. Table No.9.2 gives road length according to category and surface classification as at the end of March, 1961 and March, 1982. The roads maintained by Municipal councils are also shown seperately. The data of number of vehicles in operation as at the end of March, 1982 is shown in Table No.9.3. Important operational statistics relating to district of Maharashtra state road transport corporation is given in Table No.9.4. The data on traffic census conducted in December, 1981 on important roads in the district is given in Table No.9.5. The statistics on posts, Telegraphs and Telephones facilities is shown in Table No. 9.6, while rural broad-casting statistics is given in table No.9.7.

#### 10. LOCAL BODIES.

10.1:- The financial position of the village Panchayats, Zilla Parishad and Municipal council in the district for the year 1981-82 is shown in this section. In table No.10.1 comparative position of Income and expenditure of village Panchayats

Zilla Parishad and Municipal councils for the year

1965-66, 1970-71 and 1975-76, 1980-81 and 1981-82 is shown while in subsequent table Nos. 10.2, 10.3 and 19.4, the income and expenditure of village panchayats Zilla Parishad and Municipal council for the year 1981-82 is given according to various sources of income and according to items of expenditure. The income and expenditure of the Zilla Parishad is however shown as per headwise receipt and headwise expenditure.

11. PLAN:-

11.1:- The year 1981-82 was the second of the sixth five year plan. It was however implemented as Annual Plan 1981-82. The data on plan expenditure under state and local sector and as per heads of development for the year 1981-82 is given in table No.11.1 while the physical achievements of the Annual Plan 1981-82 are exhibited in table No.11.2.

12. PRICES AND INDEX NUMBERS:-

The monthly average wholesale prices of certain agricultural commodities prevailing in the regulated agricultural produce market committees in the district for the year 1961, 1980 and 1981 are shown in table No. 12.1 with the yearly average of each commodity. The month-wise average retail prices of the important commodities of the Aurangabad district headquarter for the year 1981 are given in table No.12.2 as the Jalna headquarter price centre was not started functioning in the year 1981. The consumer price Index number for working class for the year 1981-82 for Aurangabad and Nanded centres taking 1960 as base year are shown in Table No.12.3.

13. JUDICIAL AND ADMINISTRATION:-

The strength of police force is shown in Table No. 13.1 while the cases tried under various crimes reported

in the year 1981 is given in table No.13.2. The prisoners held due to various causes in the district is given in table No.13.3 while age and sexwise classification of convicts is given in table No.13.4. The civil and criminal cases disposed in the courts during 1961 and 1981 are shown in table No.13.5.

14. BANKING AND INSURANCE:-

14.1:- The No. of Joint stock companies in Aurangabad district as at end of March, 1961, 1981 and 1982 is given in Table No.14.2 while the data on banking offices in the district is shown in table No.14.1. The data on insurance policies is exhibited in Table No.14.3.

15. MISCELLANEOUS:

15.1:- Cinema statistics is given in table No.15.1 while information on collection of small saving for the year 1981-82 is shown in table No.15.2. Table No.15.3 gives the tahsilwise collection of land revenue in the district for the year 1981-82 while table No.15.4 gives the information of presses, newspapers and periodicals as at the end of March, 1982 in the district. Table No.15.5 gives the information of quantity of foodgrains and sugar issued to the fair price shops in the district during 1981 while table No.15.6 exhibits the demand and produrement of levy in 1980-81 and 1981-82. The general election statistics is shown in table No.15.7. The lists of inspection and travellers bungalows and list of railway stations in the district is given in Table No.15.8 and 15.9. Important selected indicators are given in the last table No.15.10.

CHAPTER-III.

Indicators of Economic Development:-

In this chapter attempt is made to describe the economic development of the district by drawing certain economic indicators. The emphasis is made on agriculture programme. Efforts are made to give the position in the indicators for the years 1960-61, 1970-71, 1978-79, 1979-80, 1980-81 & 1981-82. The date of agriculture is however for the year 1980-81.

1. AGRICULTURE:-

Indicator No.1 gives the Tahsilwise percentage of gross cropped area to net sown area in the district. It shows the extent of double cropping in the district. Double cropping of certain crops is just possible if the rains are sufficient and timely. However double cropping is mostly dependent on availability of irrigation facilities in the district. In Jalna Dist. out of five tahsils the tahsils of Jafferabad and Bhokardan are predominantly kharif sowing areas while tahsils of Jalna, Ambad and Partur are rabi sowing areas. The crops of Mung, Udid etc. are sown in Kharif if the rains are satisfactory and timely. The second crops of jowar wheat gram etc, are sown in Rabi on the same area.

The following table gives the percentage of gross cropped area to net sown area.

TABLE NO.3.1.

Table showing tahsilwise percentage of gross cropped area to net area sown for the years 1960-61, 1970-71, 1978-79, 1979-80 and 1980-81.

| Sr. No.      | Tahsil.    | Percentage of gross cropped area to net area sown |           |                 |           |                 |           |                 |           |                 |           |
|--------------|------------|---|-----------|-----------------|-----------|-----------------|-----------|-----------------|-----------|-----------------|-----------|
|              |            | 1960-61   |           | 1970-71         |           | 1978-79         |           | 1979-80         |           | 1980-81         |           |
|              |            | Perce-<br>ntage                                   | Ra-<br>nk | Perce-<br>ntage | Ra-<br>nk | Perce-<br>ntage | Ra-<br>nk | Perce-<br>ntage | Ra-<br>nk | Perce-<br>ntage | Ra-<br>nk |
| 1            | 2          | 3   | 4         | 5               | 6         | 7               | 8         | 9               | 10        | 11              | 12        |
| 1.           | Bhokardan  | 101.7   | 5         | 107.0           | 2         | 106.8           | 5         | 106.8           | 5         | 107.5           | 4         |
| 2.           | Jafferabad | 103.5   | 3         | 102.2           | 3         | 114.6           | 2         | 114.6           | 2         | 113.8           | 1         |
| 3.           | Jalna      | 105.0   | 2         | 107.6           | 5         | 111.3           | 3         | 112.0           | 3         | 111.5           | 2         |
| 4.           | Ambad      | 102.0   | 4         | 107.0           | 2         | 115.8           | 1         | 115.9           | 1         | 109.8           | 3         |
| 5.           | Partur     | 106.4   | 1         | 113.3           | 1         | 107.2           | 4         | 107.4           | 4         | 105.5           | 5         |
| <b>TOTAL</b> |            | <b>103.7</b>                                      |           | <b>108.0</b>    |           | <b>111.4</b>    |           | <b>111.6</b>    |           | <b>109.4</b>    |           |

It is seen from the table shown above that the percentage of double cropping of the district was highest in the year 1979-80. The trend of double cropping till the year 1979-80 over the years 1960-61, 1970-71 and 1978-79 was observed increasing while it was seen decreased in the subsequent year 1980-81. The reasons for such decrease may be attributed to untimely and unsatisfactory rains. In the year 1980-81 the percentage of double cropping was higher than the district in tahsils of Jafferabad, Jalna and Ambad while it was higher than the district percentage in the year 1979-80 in tahsils of Partur and Jafferabad, Jalna and Ambad.

Another important indicator is the percentage distribution of area under different crops to gross cropped area.

This indicator gives the cropping pattern of the district. The important crops sown in the district are exhibited. The main crops sown in the district are Jowar, pulses and cotton. Since the rains in the district are scanty and untimely these crops are sown, Wheat and Bajra and also sown in the district but the area under these crops is quite meagre compared to main crops. The area under cotton the cash crop is almost rain fed. The other cash crops sown are groundnut and sugarcane. The area under these is also pretty small.

TABLE NO.3.2.

Table showing percentage distribution areas under different crops to gross cropped area for the years 1960-61, 1970-71, 1978-79, 1979-80 and 1980-81 (Area in '00' hectares).

| Sr. No. | Crops          | 1960-61 |       | 1970-71 |       | 1978-79 |       | 1979-80 |       | 1980-81 |       |

| 15.Total<br>gross<br>cropped area | 6282 | 100%  | 7091 | 100%  | 6988 | 100%  | 7008 | 100%  | 6636 | 100%  |    |

It may be seen from the above table that nearly 42 percent area is under cereals and Jowar is the main crop followed by Bajra and wheat. The area under pulses is 25 percent while area under cotton is 19 percent. The crops of tur and gram are important under pulses. The area under sugarcane is little over half percent. The area under groundnut is little over one percent. The cropping pattern is almost the same during last twenty years. There is only one change observed. The area under groundnut is continuously decreasing day by day.

The third important indicator is the yield rates and out-turn of various crops in the district. The comparative position of yield rates and out-turn of various crops grown in the district for the years 1960-61, 1970-71 and 1978-79, 1979-80 and 1980-81 is given in the table shown below. The yield rates of crops are observed varying year to year. The corresponding out-turn of the crops are also observed varying year to year. The yield rates are dependent on timely rainfall, weather conditions, inputs, improved agricultural practices and availability of irrigation facilities. All these are varying factors. The yield rates and out-turn are therefore seen changed irregularly over period of twenty years for all the crops.

TABLE NO.3.3.

Yield rates and out-turn of important crops during the years  
1960-61, 1970-71, 1978-79, 1979-80 and 1980-81.

| Sr. No. | Crop                           | Yield rate per Hect.inKg. |       |       |       |       | Out-turn in '00' Tonnes. |       |       |       |       |

| 9.      | Sugar-cane (Gur)               | 4182                      | 5941  | 7835  | 5886  | 7007  | 99                       | 120   | 309   | 208   | 304   |
| 10.     | Cotton (in term of lint bales) | 178                       | 23    | 115   | 139   | 119   | 1306                     | 214   | 872   | 1020  | 879   |
| 11.     | Groundnut                      | 445                       | 423   | 457   | 445   | 355   | 145                      | 41    | 51    | 44    | 30    |

Note:- (i) Cotton production is in term of bales of 170 Kg.each.

(ii) Production figures have been calculated.

(iii) Yield rates have been taken of old Aurangabad district.

It is evident from the table that yield rates of almost all the crops in the district are pretty low during the year 1970-71 compared to yield rates of crops in other years. The main reason for this was that the year 1970-71 was scarcity year. The yield rates of Rice and Cotton were found lower in this year than the year 1960-61. For assured yields of crops the irrigation should be available. This was not adequately available. Initially in the last two decades. The only source of irrigation was through wells. Increased efforts were made in last five year plans and all resources of surface and groundwater were tapped through construction major medium and minor irrigation works increasing the area under irrigation. The yield rates during the years from 1978-79 to 1980-81 have therefore comparatively seen increased over 1960-61 to 1977-78. The production of crops has also correspondingly increased.

The next important indicator is the percentage of net irrigated to net sown area.

As reported in the earlier indicator irrigation was done through wells before last two decades. The area under irrigation was increased during subsequent years due to construction of projects etc. The percentage of net area under irrigation to net sown area is on increasing trend. The following table depicts the extent of increase of this area and percentage of net irrigation to net sown area.

TABLE NO.3.4.

The percentage of net irrigated area to net ~~sown~~ sown area during 1960-61, 1970-71, 1978-79, 1979-80 and 1980-81.

(Area in Hectares).

| Sr.No. | Year    | Net area irrigated | Net area sown | Percentage of net area irrigated to net sown area. |
|--------|---------|--------------------|---------------|--|
| 1.     | 2.      | 3.                 | 4.            | 5.   |
| 1.     | 1960-61 | 16,284             | 6,05,683      | 2.69   |
| 2.     | 1970-71 | 36,528             | 6,56,525      | 5.56   |
| 3.     | 1978-79 | 61,157             | 6,27,438      | 9.75   |
| 4.     | 1979-80 | 52,323             | 6,28,090      | 8.33   |
| 5.     | 1980-81 | 48,879             | 6,06,401      | 8.06   |

It is seen from the above table that area irrigated in 1970-71 is increased by 20,244 hectares over irrigated area in 1960-61. The corresponding percentage of irrigated area to sown area is increased from 2.69 to 5.56. The increase in irrigated area is recorded in 1978-79 over 1970-71. There is however decrease in the irrigated area in subsequent years 1979-80 and 1980-81 over 1970-71. This decrease may be due to inadequate water in irrigation projects and irrigation wells in view of unsatisfactory rainfall.

1. The another important indicator, is area under different irrigated crops to gross irrigated area.

2. It is evident from the earlier indicator that nearly twenty percent of the area under irrigation in 1980-81 is decreased over the area under irrigation in 1978-79. The cropping pattern of irrigated crpps has not changed during last two decades.

The following table gives the percentage of area under different irrigation crops to gross irrigated area in the years 1960-61, 1970-71, 1978-79, 1979-80 & 1980-81.

TABLE NO. 3.5.

Percentage of area under different irrigated crops to gross irrigated area in 1960-61, 1970-71, 1978-79, 1979-80 & 1980-81.

|                          | 1960-61 | 1970-71 | 1978-79 | 1979-80 | 1980-81 |
|--------------------------|---------|---------|---------|---------|---------|
| 1. Wheat                 | 26.3    | 24.6    | 43.6    | 38.8    | 42.5    |
| 2. Jowar                 | 38.5    | 28.9    | 30.6    | 20.3    | 18.5    |
| 3. Total Cereals         | 67.4    | 64.3    | 77.4    | 62.3    | 67.4    |
| 4. Gram                  | N.A.    | N.A.    | N.A.    | N.A.    | N.A.    |
| 5. Total Pulses          | 5.8     | 5.9     | 4.9     | 5.4     | 7.4     |
| 6. Total food grains     | 73.2    | 70.2    | 82.3    | 67.7    | 74.8    |
| 7. Sugarcane             | 11.1    | 4.9     | 5.4     | 4.2     | 6.9     |
| 8. Total food crops      | 96.9    | 82.9    | 92.8    | 76.7    | 88.7    |
| 9. Cotton                | N.A.    | 8.5     | 6.0     | N.A.    | N.A.    |
| 10. Total Fibres         | 1.7     | N.A.    | N.A.    | 22.8    | 10.4    |
| 11. Groundnut            | N.A.    | N.A.    | 0.1     | N.A.    | N.A.    |
| 12. Total Oil seeds      | 0.05    | N.A.    | N.A.    | 0.2     | 0.4     |
| 13. Total Non-food crops | 3.1     | 17.1    | 7.2     | 23.9    | 11.2    |

The area under irrigation crops almost remained the same during last two decades. It was increased by ten percent in 1978-79. The area under wheat has increased by about 40 percent during 1973-79, 1979-80 and 1980-81 over the area in 1960-61 and 1970-71. The area under irrigated jowar has, however, decreased. It is decreased by about 30 percent in 1970-71 and 1978-79 over 1960-61. The decrease in area under jowar is about 45 percent in the year 1979-80 and 1980-81 over 1960-61.

The area under pulses is found increased in 1980-81 over other years. There appears little increase in the area under pulses in 1980-81 over 1970-71, 1978-79 and 1979-80. However it has decreased compared to area in 1960-61. There appears increase in the area under fibres in 1979-80 compared to area in 1960-61 and 1970-71 and 1978-79. It has however decreased in 1980-81. The same position holds good in respect of total area under non-food crops.

One more important indicator is sourcewise net irrigated area in the district.

TABLE NO.3.6.

Table showing sourcewise net irrigated area in 1960-61, 1970-71, 1978-79, 1979-80 and 1980-81 in the district.

(Area in Hectares).

| Sr. No. | Source.             | Net area irrigated. |          |          |         |         |
|---------|---------------------|---------------------|----------|----------|---------|---------|
|         |                     | 1960-61.            | 1970-71. | 1978-79. | 1979-80 | 1980-81 |
| 1       | 2                   | 3.                  | 4.       | 5.       | 6.      | 7.      |
| 1.      | Surface irrigation. | --                  | 5,612    | 16,505   | 14,079  | 14,352  |
| 2.      | Well irrigation.    | 16,284              | 30,916   | 44,652   | 38,244  | 34,527  |
| Total:- |                     | 16,284              | 36,528   | 61,157   | 52,323  | 48,879  |

There was only one source of irrigation through wells in 1960-61. Later on major, medium and minor irrigation projects were constructed. 61,157 hectares area was irrigated in 1978-79 out of which 16,505 was through surface irrigation. The area under irrigation in 1979-80 and 1980-81 has decreased due to inadequate rains and less storage of water in projects and wells.

2. CO-OPERATION:

The cooperatives in the district play a significant role in meeting the requirement of agricultural credits inputs and services.

The activities of the cooperative structure are vital part of the total agricultural production, processing and marketing programme. The schemes of the Cooperative Department involve credit and Finance through the various cooperative Societies of Multipurpose, credit, processing and marketing societies.

The primary agricultural credit societies are the basic units of the cooperative structure which provide credits and finances to the agriculturists at village level for agricultural operations.

The following table gives the growth of the cooperatives in the district.

TABLE NO.3.7.  
Agricultural Credit Societies.

| 3.     | Working Capital (Rs. in Lakhs.)                     | 71         | 409     | 936      | 1,102    |
| 4.     | Loans advanced (Rs. in lakh).                       | 52         | 225     | 470      | 698      |
| 5.     | Loans everdue (Rs. in Lakh)                         | N.A.       | 125     | 317      | 390      |
| 6.     | Loans outstanding (Rs. in Lakhs).                   | N.A.       | 354     | 769      | 1,044    |

It is seen from the figures presented in the <sup>above</sup> table that the number of primary agricultural credit societies has remained same in the first decade of 1961-62 to 1970-71 while there is decrease of 10 Societies in the next decade of 1970-71 to 1980-81. The number of 572 Societies has however remained constant in the year 1981-82. There is increasing trend of enrollment of members over both the decades of 1961-62 to 1970-71 to 1980-81.

The members have however decreased in the year 1981-82. The working capital and loans advanced have also increased over the period. The increase appears considerable in the year 1981-82. There is corresponding increase in outstanding loans and overdue loans also. In fact overdue loans need not be a cause in-respect of viable and sound societies.

#### WAGE-RATE

Consequent on formation new Jalna district from 1st May, 1981, the rural price centre Mantha in Partur Tahsil of Parbhani district is transferred to Jalna district. The wage rates for agricultural labours skilled, labours and field labours are being collected from Mantha centre. The average wages paid to the skilled labour viz. Carpenter, Black smith and Cobbler for the 1st eight months from January to August of the year 1981 were Rs. 7/- p.m., Rs. 5/- p.m. and Rs. 4/- p.m. respectively. The increase in wages was noticed during the next three months from September 1981 to November 1981. The average wages paid during these months to these labours were Rs. 12/- p.m., Rs. 10/- p.m. and Rs. 8/- p.m. respectively to Carpenter, Blacksmith and Cobbler respectively. The wages paid in December were Carpenter Rs. 15/- p.m., Blacksmith Rs. 12/- p.m. and cobbler Rs. 9/- p.m.

The wage rate of unskilled field labour was Rs. 4/- for first eight month of 1981. It was found increased to Rs. 5/- p.m. for next two months. The wage rate of this unskilled field labour was Rs. 5.50 p.m. in November, 1981 and Rs. 6/- p.m. in December, 1981.

So also the wage rate of herdsman for 1st ten months from January, 1981 to October, 1981 was Rs. 5/- p.m. while it was Rs. 5.50 in November, 1981 and Rs. 6/- p.m. in December, 1981.

4.

#### 4. LIVESTOCK:

The mechanisation in cultivation is observed in the district to the extent of lifting water through pumps from irrigation wells. Ploughing through tractors is also undertaken.

Grainmills are also utilised at many places. Dairing activity has also received importance as subsidiary activity. The livestock has however not lost its importance and playing vital role in agricultural field. The bullocks are used for all field agricultural operation and the other cattle and buffaloes are maintained by cultivators for dairy. The following table gives the bovine and ovine population of the district as per livestock census 1978 and cultivable land for 1980-81 and the ratio of livestock to cultivable area.

TABLE NO.3.8.

Bovine and Ovine population per 100 hectares of cultivated land

| Sr. No. | Tahsil.    | Bovine and Ovine Population as per 1978 Census. | Cultivable land in 1980-81. | Livestock per 100 hectares of cultivated land. | Rank |
|---------|------------|---|-----------------------------|--|------|
| 1       | 2          | 3   | 4                           | 5  | 6    |
| 1.      | Bhokardan  | 1,04,716  | 1,15,200                    | 91   | 3    |
| 2.      | Jafferabad | 69,277  | 66,600                      | 104  | 2    |
| 3.      | Jalna      | 1,89,737  | 1,68,900                    | 112  | 1    |
| 4.      | Ambad      | 1,68,734  | 2,06,100                    | 82   | 5    |
| 5.      | Partur     | 1,22,816  | 1,40,500                    | 87   | 4    |
| TOTAL   |            | 6,55,280  | 6,97,200                    | 94   |      |

It is seen from the above table that bovine and ovine population per 100 hectares of cultivated land is 94 for Jalna district. The bovine and ovine population per 100 hectares of cultivated land is more than district in tahsils of Jalna and Jafferabad where as it is less in Bhokardan, Ambad and Partur tahsils.

5. ELECTRICITY:-2

Maharashtra State Electricity Board a net work of transmission lines in the district. The electric supply in the district is fed from 66 Kv. line from Yeldari Hydro electric project. Ambad, Jafferabad and Bhokardan talukas are fed from 33 Kv line. There are nine stations of 33 Kv. in the district. Five more 33 Kv. stations are being installed. The work of 132 Kv. line and supply station is in progress.

In the Fourth and Fifth Five Year Plan much emphasis was laid on rural electrification. The main intension was to energise pumps for lifting water from irrigation wells to bring additional acreage under irrigation. The position of villages electrified and pumps energised in the district is given in the table below.

TABLE NO.3.9

No.of villages electrified and pumps energised in Jalna district by 1960-61, 1979-80, 1980-81 and 1981-82.

| Sr. Taluka No. | Villages Electrified by the end of |            |            |            | Pumps energised by the end of |               |               |               |
|----------------|------------------------------------|------------|------------|------------|-------------------------------|---------------|---------------|---------------|
|                | 1960-                              | 1979-      | 1980-      | 1981-      | 1960-                         | 1979-         | 1980-         | 1981-         |
|                | 61                                 | 80         | 81         | 82         | 61                            | 80            | 81            | 82            |
|                | 3                                  | 4          | 5          | 6          | 7                             | 8             | 9             | 10            |
| 1. Bhokardan   | -                                  | 120        | 145        | 151        | -                             | 2790          | 3686          | 4072          |
| 2. Jafferabad  | -                                  | 75         | 99         | 99         | -                             | 993           | 1426          | 1629          |
| 3. Jalna       | 2                                  | 158        | 184        | 190        | -                             | 4813          | 5733          | 6130          |
| 4. Ambad       | -                                  | 165        | 183        | 184        | -                             | 2120          | 2717          | 2926          |
| 5. Partur      | -                                  | 151        | 159        | 161        | -                             | 2250          | 2480          | 2741          |
| <b>Total</b>   | <b>2</b>                           | <b>669</b> | <b>770</b> | <b>785</b> | <b>-</b>                      | <b>12,966</b> | <b>16,042</b> | <b>17,498</b> |

It can be seen from the above table that 669 villages were electrified out of 874 villages in the district by the end of 1979-80 as per 1971 Census. The number of electrified villages increased to 770 and 785 by the end of 1980-81 and 1981-82 respectively. The percentage of electrified villages to total number of villages in the district by the end of 1981-82 works out to 89.81%. All the 151 villages of Bhokardan and 99 villages of

Contd...

Jafferabad were electrified in the district by the end of March 1982. The percentage of electrification of villages in Jalna, Ambad and Partur works out to 89.6 %, 84.8 and 82.5 respectively.

The number of electric pumps energised till end of 1981-82 in the district are 17498. The pumps energised till end of 1980-81 were 16042 while pumps energised till end of 1979-80 were 12,966. The number of pumps energised in Jalna tahsil by the end of 1981-82 were 6139 and highest in the district while pumps energised in Jafferabad were 1629 and lowest in the district. Bhokardan tahsil ranks second while tahsils of Ambad and Partur<sup>Yak</sup> third and fourth respectively.

6. EMPLOYMENT:-

The district is observed facing the problem of unemployment now a days. Especially this problem is acutely felt by the educated youths. The demand for employment from the employment seekers is high while the corresponding vacancies created to absorb of these employment seekers are almost negligible. The backlog of employment seekers is increasing every year. The employment exchanges established in the districts register the names of employment seekers and direct them to the employers whenever the vacancies are referred to them. No employment exchange was however established in Jalna district during 1981-82 consequent on formation of district. The employment exchange of Aurangabad was catering the need employment seekers from their live register. The following table gives the employment potential opportunities of employment provided and utility of exchanges in old Aurangabad district.

TABLE NO.3.10

Number of candidates enrolled and vacancies notified in Aurangabad district in 1965, 1970, 1975, 1981 & 1982.

| Sr.No. | I T E M                                  | Y E A R S |       |       |       |       |
|--------|--|-----------|-------|-------|-------|-------|
|        |  | 1965      | 1970  | 1975  | 1981  | 1982  |
| 1      | 2  | 3         | 4     | 5     | 6     | 7     |
| 1.     | Candidates enrolled                      | 18504     | 13319 | 13533 | 17502 | 20392 |
| 2.     | Vacancies notified                       | 2415      | 2595  | 1548  | 1137  | 3530  |
| 3.     | Placement in vacancies.                  | 1876      | 1753  | 752   | 837   | 1843  |
| 4.     | Percentage of placement to registration. | 15        | 12    | 5     | 5     | 9     |
| 5.     | Candidates on live                       | 102972    | 14595 | 26948 | 33421 | 35711 |

It can be seen from the above table that the number of candidates enrolled has considerably increased from 12504 to 20392 over a period of 17 years. The enrolment is increasing from year to year. The enrolment has increased one half times over the period from 1975 to 1982. The vacancies notified are not correspondingly increased. The vacancies notified during 1975 and 1981 are far less than the vacancies notified in 1965 and 1970. The percentage of placement to enrolment was 15 percent in 1965. It has declined to 12 percent in 1970 and further declined to 6 and 5 percent in 1975 and 1981 respectively. The percentage of placement to enrolment has gone up to 9 percent in 1982. This percentage of placement is however less than the percentages in 1965 and 1970.

7. MEDICAL FACILITIES:-

For a welfare state all the basic civil amenities should be available. To provide medical facility is one of the basic amenity. In Jalna district there is one Hospital situated in the city which caters the medical needs of the urban and rural population as well. There are further 26 dispensaries and nine primary health centres which also cater the medical needs of the rural population of the district. The following table gives the number of institutions and the number of patients treated in these institution.

TABLE NO.3.11

| 5.     | No.of out-do- or patients treated. | 1,41,976  | 2,50,689 | 4,83,000 | 4,51,000 | 5,02,000 |
| 6.     | No.of beds                         | 56        | 142      | 166      | 166      | 185      |

Note: \*4 Primary Health Centres covered into dispensaries.

8. EDUCATION:-

With the introduction of free and compulsory primary education to the children of the age group upto 14 by the Government, the educational facilities are increasing day by day. There is remarkable increase in the educational Institutions and in the strength of students. The following table gives the strength of students in different categories of Institutions.

TABLE NO.3.12

| Sr. No.                       | Educational Institutions. | Position in 1981-82. |
|-------------------------------|---------------------------|----------------------|
| 1                             | 2                         | 3                    |

| 2.                            | Boys                      | 83609(32797)         |
| 3.                            | Girls                     | 38267(12797)         |
| 4.                            | Teachers                  | 2818                 |
| <u>III. SECONDARY SCHOOLS</u> |                           |                      |
| 1.                            | Institutions              | 74                   |
| 2.                            | Boys                      | 10929(3481)          |
| 3.                            | Girls                     | 2859(461)            |
| 4.                            | Teachers                  | 1069                 |
| <u>IV. HIGHER EDUCATION</u>   |                           |                      |
| 1.                            | Institutions              | 2                    |
| 2.                            | Boys                      | 591(160)             |
| 3.                            | Girls                     | 174 (2)              |
| 4.                            | Teachers                  | 106                  |

Note:- The figures shown in brackets are backward class students.

It is evident from the above table that the strength of girls in primary secondary as well in higher education is comparatively very less than boys. The percentage of girls

students to total students is 31% in primary while it is 21 percent in secondary. The girl students in higher education are 22 percent. The backward class students have in no way lagged behind. They are equally participating in all level educational standards.

The following are some of the ratios.

TABLE No.3.13

| Sr. No. | I T E M                                   | Ratio in 1981-82 |
|---------|---|------------------|
| 1       | 2   | 3                |
| I.      | a) Institutions<br>(Secondary to Primary) | 1:14             |
|         | b) Institutions<br>( Higher to Secondary) | 1:37             |
| II.     | Teachers/Pupils                           |                  |
|         | 1. Primary                                | 1:43             |
|         | 2. Secondary                              | 1:13             |
|         | 3. Higher                                 | 1:7              |

It is seen from the above that there is one secondary school for 14 primary schools while there is one higher institution for 37 secondary schools. The strength of pupil per primary school teacher is 43 while strength of pupil per secondary school teacher is 13. In higher institution every teacher has strength of 7 students only.

9. BANKING:-

It is necessary to increase credit facilities in the rural areas for the growth of agriculture and industries. The expansion of commercial banks is inevitable in the rural areas for planned progress. The programme of opening new branches of scheduled especially the nationalised banks has been launched as per directions of the Government. The following table gives the number of banking offices and the estimated number of households served by these banks in the district.

TABLE NO. 3.14

No. of scheduled banks and no. of households served by these banks during 1960, 1970, 1979 & 1980.

| Sr. No.   | Tahsil     | No. of Banking Offices during the year |      |      |      | No. of Households served per banking Office |        |      |      |
|-----------|------------|--|------|------|------|---|--------|------|------|
|           |            | 1960                                   | 1970 | 1979 | 1980 | 1960  | 1970   | 1979 | 1980 |
| 1         | 2          | 3                                      | 4    | 5    | 6    | 7   | 8      | 9    | 10   |
| 1.        | Jalna      | 3                                      | 7    | 12   | 13   | 8400  | 7143   | 4167 | 3846 |
| 2.        | Bhokardan  | --                                     | 2    | 3    | 4    | ---   | 12500  | 8333 | 6250 |
| 3.        | Ambad      | --                                     | 1    | 9    | 11   | ---   | 42000  | 4667 | 3818 |
| 4.        | Jafferabad | --                                     | 2    | 2    | 2    | ---   | 6500   | 6500 | 6500 |
| 5.        | Partur     | 1                                      | 1    | 5    | 5    | 27900                                       | 331000 | 6200 | 6200 |
| T O T A L |            | 4                                      | 13   | 31   | 35   | 13275                                       | 12384  | 5193 | 4600 |

NOTE:- Figures of Partur for 1980 are provisional.

It is evident from the table shown above that the number of scheduled bank has increased from 4 to 13 during the period from 1960 to 1970 while the number further increased to 31 in 1979 and 35 in 1980. Consequently the figures of No. of households served per banking office decreased from 13275 in 1960 to 4,600 in 1980.

ROADS :- Railways and Road are the nerve and veins of the district. The development of the district in all the fields depends upon the transport facilities available in the district. For industrial development infrastructure of railways and roads is pre-requisite. Jalna district has not been well developed in respect of transport facilities. Only one railway route of Manmad-Secunderabad measuring 83 Kms. in length passes through Jalna district covering few villages of Jalna, Amabd and Partur tahsils. It however passes through heart of the district. The district is not connected through any broad gauge route. The facility for roads is little better. There are however no National Highways in the district. There are five State Highways, the length of which is 493 Kms. in the district. The length of major district roads is 1289 Kms. The length of lower type roads is 1000 Kms. The road length of 283 Kms. is only black-topped. The road length per 100 Sq. Kms. in 1982 is 38 Kms.

11. PRICES:-

It has become very essential now a days to find the price trend of essential commodities over period of time. As the level of economy and the standard of living it is necessary to watch the price trend. While standardising the series of years of the nation, state or of particular region the factor of price trend is required to be necessarily considered. Inflation has direct or indirect effect on price increase. The prices therefore play an important role in the development of country as it is an indicator to know the economic stability.

Consequent on formation of new Jalna district from 1st May 1981, the city Jalna has become the district headquarter. The Directorate of Economics & Statistics has started collection of weekly prices of important commodities at the district headquarter Jalna on each Friday from 1st of August 1982. Prior to functioning of this centre, this newly formed district was part and parcel of Aurangabad district and as such Aurangabad centre was considered to be the price centre of the newly formed district. The average prices of Aurangabad centre are shown in the table given below.

TABLE NO.3.15

| Sr. No. | Commodity               | Unit | Average Prices for the year (Rs.) |      |      |      |      | Percentage increase in 1981 over 1960. |

\*= The percentage increase in 1981 is over 1980.

It is evident from the table shown above that there is upward trend of prices over period of time. The increase is atleast three times in 1981 over 1980. Maximum increase is observed in respect of pulses Sweet Oil etc. The increase is rather minimum in respect of eggs, foodgrains etc. The rate of increase of prices in 1981 over 1980 is quite fast than observed during last two decades.

thoroughly associated with the various stages of planning to settle priorities and to decide sectorial allocations. While formulating this, it was aimed that the plan should be in conformity with the state policies in the same way as the state plans are guided by the frame work of National policy. In order to achieve these objectives as stated above the district planning Boards and District Development consultative councils were constituted in 1972 for the district. These bodies were subsequently amalgamated to form a new body known as District Planning and Development Council in 1974. The functions entrusted to these are as under:-

1. To ensure coordinated action by various implementing agencies at the district level including the Zilla Parishad.
2. To give guidelines to various implementing agencies at the district level in regard to preparation and implementation of the perspective and five year and annual plans.
3. Subject to orders of the state Government to approve the perspective Five Year and Annual plans of the district.
4. To review from time to time the implementation of the Five Year and Annual Plans and make recommendation to the state Government.
5. To consider the re-appropriation of savings/excess within the approved district Annual Plan.

The District Planning and Development Council consists of the following official and non-official members in 1974.

1. The Designated Minister of the District: Chairman.
2. The Commissioner of the Division: Vice-Chairman.
3. All members of Lok Sabha and Vidhan Sabha: Members.
4. All members of Rajyasabha and Vidhan Parishad in the district: Members.
5. President of Zilla Parishad: Member.
6. President one each of A/B/C class Municipal Councils: Members.
7. Chairman of District Central-Co-operative Bank: Member.
8. The Director of Mah. State Co-operative Land Development Bank of the district: Member.

|     |   |                   |
|-----|---|-------------------|
| 9   | The Regional Manager of Lead Bank   | Member.           |
| 10. | Representative of Regional Development Corporation.                               | Member.           |
| 11. | 13 Non-official members.  | Members.          |
| 12. | Chairman of District Committee of Mah. State Khadi and Village Industries Board.. | Member            |
| 13. | The Superintendent of Post offices of the District.                               | Member.           |
| 14. | Chief Executive Officer, Zilla Parishad.  | Member.           |
| 15. | Collector.  | Member-Secretary. |

To assist the District Planning and Development Council in day to day planning and development activities, the executive Committee has also been constituted.

The District Planning and Development Councils is supposed to meet twice or at the most three times in a year. However Executive Council is required to meet as often as required but at least once in a month.

Initially it was decided to implement the Sixth Five Year Plan prepared for the period 1978-83. However the newly constituted National Development Council spelled out the objectives and prepared frame work of Sixth Plan for the period 1980-85. Accordingly the year 1981-82 was the second year of Sixth Plan.

The main objectives of the Sixth plan are :-

1. a significant step up in the rate of growth of economy the promotion of efficiency in the use of resources and improved productivity.
2. Strengthening the impulses of modernisation for achievement of economic and technological self reliance.
3. a progressive reduction in the incidence of poverty and un employment.
4. a speedy development of indigenous source of energy.
5. Improving the quality of life of people in general.
6. Reduction of inequalities of income and wealth.
7. Controlling growth of population.

Taking into consideration these objectives the Maharashtra Government implemented the programmes for rapid reduction of poverty and unemployment reduction of regional & district

imbalances and paid special attention to the problems of weaker sections of the society. The programme of improvement of life in rural areas and the 20 point programmes were also implemented.

3. Jalna district is formed by carving out the areas from Aurangabad and Parbhani districts from 1st May, 1981. The plan allocations made to the districts of Aurangabad and Parbhani for the year 1981-82 were to the tune of Rs. 1378.29 and Rs. 1018.76 lakhs. These allocations were inclusive of allocations for areas transferred to Jalna District. The allocation of funds made to newly formed Jalna District for 1981-82 was Rs. 523.812 lakhs. Out of this allocation Rs. 420,210 lakhs were derived from the allocation of Aurangabad while Rs. 103.602 lakhs allotted from Parbhani.

4. The annual plan 1981-82 was the second year of the Sixth Five Year Plan. The major head-wise budget provision and expenditure incurred during 1981-82 is as shown below.

TABLE NO.4.1. (Figures in Lakh Rs.)

| Sr. No. | Head of Development.             | Final Budgetted grants. | Expenditure during 1981-82 | Percentage of Expenditure to Budget grants. |
|---------|----------------------------------|-------------------------|----------------------------|---|

| 1.      | Agriculture and allied Services. | 218.22                  | 213.62<br>+21.00*          | 107.5                                       |
| 2.      | Co-operation                     | 2.00                    | 1.39                       | 69.5  |
| 3.      | Water & power Development.       | 67.42                   | 64.79                      | 95.1  |
| 4.      | Industries and Mining.           | 10.04                   | 7.08                       | 70.5  |
| 5.      | Transport and Communication.     | 41.08                   | 36.62                      | 89.1  |
| 6.      | Social and Community Services.   | 185.05                  | 191.48                     | 103.5                                       |
| TOTAL:- |                                  | 523.81                  | 535.98                     | 102.3                                       |

\*The expenditure of Rs.21 lakhs under Agriculture and allied Services in Col.4 is towards Centrally Sponsored Scheme.

It is evident from the above table that an expenditure of Rs. 535.97 lakhs is incurred during the year 1981-82 as against the budget grants of Rs.523.81 lakhs. The percentage of expenditure to budget grants works out to 102 percent. The expenditure on Agriculture and Allied Services, and Social and Community Services is 107 and 103 percent, respectively, and maximum. The expenditure on water and power development is 96 percent while expenditure on Transport and communication is 89 percent. So also the expenditure on Industries and mining is 70 percent while expenditure on co-operation is 69 percent and lowest compared to other heads of development. The State sector and local sector agencies were enrolled for implementation of the schemes under Annual Plan 1981-82. The following table gives the headwise expenditure booked by these agencies.

TABLE NO.4.2 (Figures in Lakh Rs.)

| Sr. Head of Development,<br>No. |                                  | 1981-82                |                       |                   |
|---------------------------------|----------------------------------|------------------------|-----------------------|-------------------|
| 1.                              | 2.                               | State<br>sector.<br>3. | Local<br>sector<br>4. | Total.<br>5.      |
| 1.                              | Agriculture and allied Services. | 199.6<br>(85.1)        | 35.0<br>(14.9)        | 234.6<br>(100.00) |
| 2.                              | Co-operation                     | 1.4<br>(100.00)        | --                    | 1.4<br>(100.00)   |
| 3.                              | Water and power Development.     | 64.8<br>(100.00)       | --                    | 64.8<br>(100.00)  |
| 4.                              | Industries and Mining.           | 7.1<br>(100.00)        | --                    | 7.1<br>(100.00)   |
| 5.                              | Transport and Communication.     | 34.7<br>(94.8)         | 1.9<br>(5.2)          | 36.6<br>(100.00)  |
| 6.                              | Social and Community Services    | 167.4<br>(87.4)        | 24.1<br>(12.6)        | 191.5<br>(100.00) |
|                                 | TOTAL:-                          | 475.0<br>(88.6)        | 61.0<br>(11.4)        | 536.0<br>(100.00) |

It will be seen from the above table that the state sector agencies have incurred maximum of 88 percent expenditure while local sector agencies have booked only 11 percent expenditure out of Annual Plan 1981-82.

I. AGRICULTURE AND ALLIED SERVICES.

Under agriculture and allied services programme expenditure of Rs. 234.62 lakhs is incurred during 1981-82. The percentage of expenditure on this programme to total expenditure of annual plan 1981-82 works out to 43.8. There are 14 sub-programmes implemented under this programme.

- Note:- 1) The data for the years 1960-61 and 1979-80 are fully revised while for the year 1980-81 is provisional.  
 2) Data for Bhokardan tahsil is inclusive of 14 villages transferred to Soegaon tahsil in Aurangabad district.  
 3) Due to conversion of Acres into Hectare for the year 1960-61, totals may not tally. Figures for 1960-61 have been adjusted.

- Notes:-
- 1) Production of cotton is in bales of 170 Kg. each.
  - 2) @ Less than t 50.
  - 3) Yield rates of old Aurangabad district are exhibited.
  - 4) While working out the production, the yield rates of old Aurangabad district are considered, hence total productions are not talling.
  - 5) The information regarding area under different crops for the year 1960-61 and 1979-80 are fully revised whereas figures for the year 1980-81 is provisional.
  - 6) Production figures are estimated & are provisional.
