P R E F A C E

THIS is the second issue of the Statistical Abstract of the Maharashtra State. The issue is a combined one for the two years 1961-62 and 1962-63. The Abstract is prepared on the lines similar to those of the Statistical Abstract of India prepared by the Central Statistical Organisation, Government of India. It contains detailed districtwise statistics relating to socio-economic aspects of the Maharashtra State. For a proper understanding, an explanatory note on the sources and limitations of the statistics included herein is given in the appendix.

I wish to thank the various departments and offices of the State Government, of Government of India and Local Organisations which have supplied the necessary material and permitted us to publish the same. It is hoped that this publication will serve as an adequately detailed reference for those interested on the socio-economic problems of Maharashtra State.

S. M. VIDWANS,
Director,
Bureau of Economics and Statistics,
Bombay.

Note.—(1) These index numbers of productivity have been worked out by dividing the index number of production of each commodity by the index number of area.

(2) Index numbers of productivity for kharif jowar, rabi jowar, kodra, mesta and potatoes have not been worked out for the years 1951-52 to 1955-56 as the estimates of both production and area of these commodities are not available.

(3) Estimates of production of 8 crops, viz., Rice, Wheat, Kharif Jowar, Rabi Jowar, Bajri, Gram, Groundnut and Cotton are based on the results of Statewide crop estimation surveys and those of Ragi, Tur and Tobacco are based partly on crop estimation surveys and partly on anna valuation figures. The estimates of production of the remaining crops are entirely based on the anna valuation figures reported by the Revenue Authorities.

(4) Index numbers of productivity of groups, viz. miscellaneous crops and all commodities; for the years 1951-52 to 1955-56 and 1962-63 have been worked out by dividing the Index Numbers of production of these groups excluding production of potato by the respective index numbers of area.

APPENDIX

EXPLANATORY NOTE ON SOURCES AND LIMITATIONS OF STATISTICS PRESENTED IN THE STATISTICAL ABSTRACT

Purpose

1. This is the second issue of the Statistical Abstract of Maharashtra State to be published since its formation in 1960. As stated in the first issue, the purpose of publishing this Abstract is to present background statistical material on as many topics as is possible so that the Abstract may be useful not only as a reference book but also for research, planning or further socio-economic studies about the State. The information is as far as possible, further sub-divided districtwise. The trends over a series of years have also been shown. Thus, the districtwise figures will enable the reader to compare the indicators of development between the constituent units of the State. The trends will provide background data for study of such problems as impact of planned efforts on the economy.

2. The statistical data presented here is initially compiled by various departments of State Government, Government of India, local bodies etc. Although attempt has been made to present, as far as possible, the finalised figures, for some items, these finalised figures could not be included in this Abstract. In Bureau's two other publications namely 'Handbook of Basic Statistics of Maharashtra State' and 'Economic Review of Maharashtra State' similar statistical data are published. These data are however provisional and hence are revised herein. The variation between the figures published in this Abstract and those published in the above publications is however of a small order and will not present any difficulty in studying the districtwise figures further.

Maharashtra at a Glance

3. This statement is divided in two parts. In the first part some general particulars about the State are given. In the second part, the State indicators under various heads such as population, agriculture etc. are presented with the corresponding figures relating to the country. Against each item, the period to which the figures concerning Maharashtra and India respectively relate is mentioned. In many cases this period is not identical. In such cases, the data for latest available year for India is given and comparison of Maharashtra with India is made with reference to this year. The statement also gives percentage share of Maharashtra in the figure relating to the country. For instance, the rural population of Maharashtra is shown to be 7.9 p. c. of the total rural population of the country. In addition, important comparable indicators are also shown both in respect of Maharashtra as well as India. For instance, the percentage of urban population to total population in the State is shown as 28.2 along with corresponding percentage of 18.0 for all India.

Summary Statements

4. Summary statements on following topics have been presented here—(1) Agriculture—[(i) Land utilisation, (ii) Area irrigated by sources, (iii) Area irrigated by crops, (iv) Area and outturn under principal crops], (2) Livestock, (3) C. D. Programme, (4) Co-operation, (5) Industries (No. of factories), (6) Electricity (7) Joint Stock companies, (8) Education, (9) State income. Under Industries, the statement showing statistics regarding Annual Survey of Industries is deleted and is presented elsewhere.

Divisional Indicators

5. Most of the statements presented in the Abstract give districtwise and also divisionwise figures. However with a view to facilitating divisionwise comparison statistical data under some important items such as Population Agriculture etc. are also presented here.

I. AREA AND POPULATION

6. The figures of 1961 Population Census have now been finalised and these finalised figures are shown in this section. The Statement No. 1.1 gives districtwise figures of area, number of talukas, number of towns and villages and rural and urban population. The Statement No. 1.2 gives percentage increase in 1961 population over 1951 population in each district. The Statement No. 1.3 gives figures of rural and urban population of each district and also the population of each individual town in each district. The Statement No. 1.4 gives literacy percentage for each district in 1951 and in 1961. The Statement No. 1.5 gives information regarding population of scheduled castes and scheduled tribes in each district at the time of 1961 Census. The general population (1961) tables concerning Maharashtra have been published by Government of India in 'Census of India 1961, Vol. X, Part II-A'. The various concepts adopted at the time of the Census concerning, 'village', 'town', 'household' have been clarified in detail so as to facilitate comparison with earlier Censuses. The population census is a mass-scale operation to be completed in shortest possible time. This naturally puts limitations on the accuracy and coverage of final results. A post enumeration check was carried out in the State immediately after 1961, and it was observed that the estimated true population was 1007 persons per 1000 enumerated persons.

II. CLIMATE

7. The Statement No. 2.1 gives 'mean maximum', 'mean minimum' and 'mean' temperatures in respect of 38 centres in 26 districts of the State. The mean maximum and mean minimum are the averages of maximum and minimum temperatures observed daily during the year. The mean temperature is the average of the mean maximum and mean minimum temperatures thus arrived at. The Statement No. 2.2 gives monthly normal rainfall and No. of rainy days in each month and in each district. The district figures are the simple averages of the rainfall recorded at different rain gauge stations in each district. The Statement No. 2.3 gives similar statistics about rainfall in 1963 and during earlier two years. The figures are given separately for each rain gauge station which are generally taluka headquarters.

III. AGRICULTURE

8. The important statistics under this section is further sub-divided into (i) Land utilisation, (ii) Irrigation and (iii) Area and outturn of individual crops. The statistics regarding area, its mode of utilisation and irrigation is first collected at village level by talathis and it is subsequently consolidated at taluka and district levels respectively. The talathis are collecting these data regarding area according to a uniform system of concepts. The procedure about collection of data and its compilation at various stages has been rigidly laid down. Even then, since these statistics are required to be compiled from the record of each village and town in the State there is just a possibility of some area either being totally omitted or misclassified. In certain cases the variation from one year to another in any category of land can be explained by means of known facts (for instance, the variation in the total geographical area of a district from one year to another may be due to the fact that actually the boundary of the district is altered). But it is seen that all the observed variations cannot be explained by such known facts, and certain variations from year to year have to be attributed to errors in compilation at various stages.

9. The aggregate geographical area of the State as given by Registrar General of Government of India is 1,18,717 sq. miles or 3,07,48 thousand hectares. The figure compiled by the State's Land Record Department is 1,18,280 sq. miles or 3,06,35 thousand hectares. The geographical area as supplied by Director of Agriculture (Statement No. 3.1) is 3,07,60 thousand hectares during 1961-62. The difference between any two of these figures may be due to many reasons. In some cases the area had to be estimated for want of accurate survey measurements. These limitations are required to be borne in mind while studying the agricultural statistics presented here.

10. The Statement No. 3.1 gives land utilisation under the standard heads of utilisation. Figures for four years—from 1959-60 to 1962-63 are given in respect of each district. Also the State totals are furnished for all years from 1957-58 to 1962-63. The Statement indicates as to how the total land of each district was being utilised in each year. The Statement No. 3.2 gives the area and production of principal crops. Seventeen different crops are considered here. In addition, area and outturn figures of 'other cereals' and 'other pulses' are also shown. The area figures are extracted from village records as stated above. The production figures are estimated on the basis of crop cutting experiments in the case of manu majur crops and on the basis of annewari and standard normal yields in the case of remaining crops. The Statement

No. 3.3 gives the break-up of total gross cropped area according to major groups of crops such as 'cereals and pulses', fibre crops etc. The food crops are further divided into five groups. The non-food crops are also divided into five different groups. The irrigation statistics of the State is presented in Statements Nos. 3.4 to 3.6. The Statement No. 3.4 gives districtwise area irrigated according to different sources such as Government canals etc. The next statement gives area irrigated under different crops. In this State wells are the most important source of irrigation. The Statement No. 3.6 gives the number of irrigation wells 'in use' and 'not in use' for each district. The area actually irrigated by these wells is shown in Statement No. 3.4. The next three Statements viz. 3.7, 3.8 and 3.9 give index numbers of area production and productivity in the State for the years 1951-52 to 1962-63. These indices are based on the year 1956-57 as base. These figures are very useful for knowing the trend in area and production. The productivity index is worked out by dividing the index of production by the index of area. In a limited sense this index indicates the trend in yields of the land in the State. The Statement No. 3.10 gives districtwise figures of area banded during the first two plan periods and during the first two years of the Third Five-Year Plan. Statement No. 3.11 gives number of different types of agricultural implements as enumerated at the time of 1956 and 1961 Livestock Censuses, respectively.

IV. COMMUNITY DEVELOPMENT PROGRAMME

11. Two statements are included in this section. The Statement No. 4.1 gives districtwise figures of achievements under selected items under C. D. Programme during the years 1961-62 and 1962-63. Blocks of specified size are organised in districts under this programme and specified programmes concerning particularly agricultural development are to be implemented through people's participation. The Statement No. 4.1 gives figures of achievements during two years 1961-62 and 1962-63. The Statement No. 4.2 gives progressive achievements in the entire State since the inauguration of the programme up to end of 1962-63.

V. ANIMAL HUSBANDRY

12. The Statement No. 5.1 gives the number of various types of livestock and poultry as enumerated in the State at the time of 1956 and 1961 Livestock Censuses, respectively. These are quinquennial censuses conducted throughout the country on an uniform basis of concepts and methods of enumeration. At these censuses, all the livestock is enumerated by house-to-house enquiry. Particular care is taken to enumerate livestock in slaughter houses, stray animals or animals in transit. The Statement No. 5.2 gives statistics regarding number of animals treated for different diseases and animals castrated in Government dispensaries and in dispensaries owned by local bodies. At the end of the statement the number of animals treated and castrated by veterinary officers and stockmen while on tour is shown separately. The Statement No. 5.3 gives the number of different veterinary dispensaries functioning in each district. In districts of Bombay and Aurangabad divisions all the dispensaries were State owned upto 1951-62. In Kolhapur district all the veterinary dispensaries were owned by local bodies. The Statement No. 5.4 gives statistics regarding other activities of the State's Animal Husbandry Department. This statement includes different types of institutions such as cattle breeding farms, artificial insemination centres, etc. in the State as at the end of the year 1962-63.

VI. FORESTS

13. Two statements are included in this section. The Statement No. 6.1 gives details of area under different types of forests. Information regarding forests under the control of the State's Forest Department and those under the control of the State's Revenue Department is shown separately. It will be seen from this statement that the aggregate area under forests at the end of 1962-63 was 56,842 Sq. kilometre under Forest Department and 6,519 Sq. kilometre under Revenue Department. Thus, the total area was 63,361 Sq. kilometre or 63,26,100 hectares. Whereas, according to statistics released by Director of Agriculture, under land utilisation the area under forests was 54,27,500 hectares. The entire area under the control of Forest Department is reported to have been classed as forest, whereas, actually some of the area under control of Forest Department may have been put to cultivation of crops. Such area might have been classified in appropriate columns by Director of Agriculture with the result that the area under forests shown under land utilisation statistics is lower than the figure shown in the forest statistics. These two sets of figures are under scrutiny by the two departments. The Statement No. 6.2 gives estimates of production of major and minor forests produce in the State for the years 1960-61, 1961-62 and 1962-63.

VII. FISHERIES

14. The Statement No. 7.1 gives details regarding the quantity of fish brought for curing, quantity of salt issued and the quantity of fish removed. Information is supplied according to each curing yard most of which are located in Ratnagiri district. The Statement No. 7.2 gives statistical information regarding activities of the State Fishery Department. Salient features of activities carried out by the fishing co-operative societies are also included here.

VIII. CO-OPERATION

15. The statistical position regarding the activities under the co-operative movement in the State are presented in this section. The Statement No. 8.1 gives, in a summary form, important information pertaining to different types of co-operative institutions. In subsequent statements further details about the operations of different types of co-operative institutions are presented. For this purpose, all the institutions are grouped into following main groups:—(1) State and Central banks, (2) land mortgage banks, (3) agricultural credit societies, (4) non-agricultural credit societies, (5) agricultural non-credit societies, (6) non-agricultural non-credit societies, (7) supervising unions and federations. The main function of the co-operative societies is to supply credit and to give similar financial assistance to the people particularly in the agricultural sector. Hence, important particulars concerning this function such as fresh advances, outstandings, overdues etc. are presented in these statements. Unfortunately, similar details concerning the non-credit activities of the co-operative societies could not be included in this publication.

IX. RURAL CREDIT

16. The private money-lenders in the State are covered under Bombay Money Lenders' Act, 1946. The Statements Nos. 9.1 to 9.3 gives necessary details regarding the transactions of licensed money-lenders. Figures regarding transactions of money-lenders exempted under section 22, and not exempted under section 22 of the Act are shown separately. The information is initially compiled by the Registrar-General of Money Lenders.

X. BANKS

17. Banking concerns have become important commercial institutions in rural and urban areas. Information regarding banks in co-operative sector is already shown under Co-operation Section. The Statement No. 10.1 in this section gives a list of towns and villages in the State wherein the banking service had been available in 1955 and 1963. The next statement gives distribution of places and banking offices according to population ranges of the places. A similar distribution of all towns and villages according to population ranges is published in the 1961 Census publications which may enable the readers to know the coverage achieved by banking institutions in expanding their activities. The Statement No. 10.3 gives the number of banking offices of different types of banks in each district. As regards financial transactions of these banks, information pertaining to district central co-operative banks has appeared in the section of co-operation. Similarly, the relevant information pertaining to urban co-operative banks is included in non-agricultural credit societies, the particulars of which are also shown in that sector. Information about scheduled and non-scheduled banks, however, is not published districtwise by Reserve Bank of India which is the only source of information for banking statistics.

XI. LOCAL BODIES

18. The available statistics about village panchayats, municipalities and municipal corporations, zilla parishads and Bombay Port Trust are given in this section. The Statement No. 11.1 gives coverage, aggregate income and expenditure of all village panchayats in each district for the year 1963-63. Figures for earlier years are also given for each division and for the State as a whole. The Statement No. 11.2 gives the number of municipal councillors of each municipality in the State. The Statement No. 11.3 gives the figures of income of municipalities in the State for the year 1962-62. Information pertaining to three municipalities was not available at the time of compilation of these data. The available information relating to income has been classified under such broad heads, as 'income from taxes', 'income from other sources',

'extraordinary receipts', 'income from commercial establishments under control of the municipality' and 'opening balance'. A few of the municipalities did not submit information with proper classification. Nevertheless, the figures shown under broad heads are fairly correct. The Statement No. 11.4 gives similar information regarding income of the three Municipal Corporations. In the case of Corporations, the information pertaining to subsidiary organisations such as B. E. S. T. (under Bombay Municipal Corporation) or Poona Motor Transport (under Poona Municipal Corporation) is not included in these figures. The Statements Nos. 11.5 and 11.6 give similar information about expenditure of Municipalities and Municipal Corporations. Expenditure is shown separately under major items such as 'public lighting', 'water supply' etc. The capital expenditure is shown separately. Here also there is a possibility of figures being misclassified by a few municipalities. The Statement No. 11.7 gives figures of income and expenditure of Zilla Parishads. Those for 1962-63 are actuals for the period May 1962 to March 1963. Those for 1963-64 are revised budget estimates for 1963-64. Under receipts, figures are separately shown under 'self-raised' resources and Government grants, which are further sub-divided in three main heads. Under 'expenditure', figures are separately shown under, General Administration, Education, Community Development and Buildings and Communications. The Statement No. 11.8 and 11.9 give similar statistics regarding income and expenditure of Bombay Port Trust.

XII. INDUSTRIES AND MINING

19. In this section statistics regarding employment in industries, industrial and mineral production, and statistics on such related items as absenteeism, industrial disputes is presented. The factory statistics shown in Statements Nos. 12.1 and 12.2 covers following types of factories registered under Factories Act of 1948 :—(1) Those employing ten or more workers and working with the aid of power [(section 2 m(i)], (ii) those employing twenty or more workers and working without the aid of power [(section 2m (ii)], and (iii) those registered under section 85 of the Act, under which the State Government makes applicable the provisions of the Act, even though the above condition are not fulfilled. The Statement No. 12.1 gives the distribution of working factories according to size of the factory in terms of average daily employment of workers. The Statement No. 12.2 gives numbers of working factories and average daily employment therein according to major groups of industries. It must be mentioned that the number of workers shown in these two statements are the average number of workers working daily throughout the year and not the total number on the register of the factories. The Statement No. 12.3 gives figures of industrial productions for 1960 to 1963 under some important items. These statistics are initially collected by various departments under Government of India, such as office of Textile Commissioner etc. The Statement No. 12.4 gives districtwise figures of mineral production and its value. The Statement No. 12.5 gives figures of absenteeism in cotton textile industry at a few selected centres in the State. This information is collected by the office of Commissioner of Labour, Bombay. The Statement No. 12.6 gives statistics regarding industrial disputes in the State for the years since 1959 to 1963 and for each month since January 1962 to December 1963. The statistics regarding number of disputes, number of persons involved and number of mandays lost is collected under three major groups viz. Textiles, Engineering and Miscellaneous groups. In addition to factories, the strikes in other organised and unorganised industries, and organisations are considered for inclusion in these statistics. It must also be mentioned that the monthly figures of number of strikes and number of persons involved are not additive to form annual figures because of the fact that the period of strike may have spread over more than one month. The mandays lost are so calculated as to form annual totals if figures for twelve months are added together. The Statement No. 12.7 gives information regarding handlooms registered in the State. The data is initially collected by Registrar of Co-operative Societies but covers both co-operative and non-co-operative sectors. The Statements 12.8 and 12.9 give some important statistics concerning cases decided under Workmen's Compensation Act and compensation paid to the workers involved in accidents. The Statement No. 12.10 gives statistics regarding licences granted to industrial concerns in the State for starting new units or for substantial expansion. These licences are granted by Government of India under I.D.R. Act of 1951. It is observed that licences once granted were subsequently revoked or cancelled. The licensing policy including its scope and coverage has changed during last five years. Thus it is rather difficult to study the trend in growth of industrialisation in the State from these figures. The Statement No. 12.11 gives results of Annual Survey of Industries (Census Part) conducted by Government of India. Figures for 1959 to 1961 are shown here. The statement gives results of Census Part in which factories employing 50 or more workers with the aid of power, or those employing 100 or more workers without the aid of power are completely enumerated.

XIII. ELECTRICITY

20. The Statement No. 13.1 gives the progress of electrification in rural and urban areas in the State since April 1956. Figures are shown separately for electrification under the management of Maharashtra State Electricity Board, and of other private companies. The next statement gives a complete list of towns and villages which were electrified in the State upto 31st March 1963. The remaining important statistics regarding generation and consumption of electricity is presented in the Summary Statements.

XIV. TRANSPORT AND COMMUNICATIONS

21. Under this section the statistics relating to various modes of transport are given. The Statement No. 14.1 gives districtwise railway length and is inclusive of the length of such lines newly laid down as Diva-Panvel line in Kolaba district. The districtwise figures presented here may appear slightly different from those published in the earlier Abstract or other publications of the Bureau. These statistics which are initially compiled by departments of Ministry of Railways of Government of India, are not given, districtwise. The figures therefore had to be specially compiled by noting the distances between railway stations and with the help of a railway map. The difficulty arises in measuring the distance between two stations one of which lies in one district and the other in the adjoining district. Also, the distance between a railway station on the border of the State and the boundary of the State itself has to be guessed from the railway map. The Statement No. 14.2 gives the road length in each district as at the end of March of 1961 and 1962 respectively. The road length of only extra municipal roads is considered. These roads are constructed by different agencies and pending proper classification or transfers to other agencies for maintenance etc, some road length is not enumerated in the total road length. For instance, a village road may have been constructed by a block office but it is not handed over to another agency such as a village panchayat for its further maintenance. The Statement No. 14.3, 14.4 and 14.5 give the relevant statistics regarding number of motor vehicles in operation as compiled by the State Directorate of Transport. The figures for each region are given separately. The Bombay region includes Greater Bombay. The Thana region includes rest of the Bombay division. The other regions are identical with the corresponding revenue divisions. The Statements Nos. 14.6 and 14.7 give some important statistics relating to Maharashtra State Road Transport Corporation which is the single nationalised organisation in charge of the passenger traffic in the State. The next three statements viz Nos. 14.8, 14.9 and 14.10 give some important statistics regarding movement of ships and vessels in Bombay Harbour. The Statement No. 14.10 gives the statistics pertaining to number of passengers arriving and departing from Bombay Port to different foreign countries and to ports on the coast of the Country. The traffic by sailing vessels and ferries is of course not included herein. The Statement No. 14.11 gives districtwise number of radio licences granted by the Postal Department in the State during 1962. These statistics are shown in two parts viz. (i) new licences for the first time and (ii) old licences renewed.

XV. EMPLOYMENT

22. The first seven statements included in this section give detailed results of the economic classification of the population of the State made at the time of 1961 Census. At the time of 1961 Population Census, the entire population was first divided into (i) workers and (ii) non-workers. A person is classified as worker if (a) in the case of seasonal work he had some regular work of more than one hour per day throughout the greater part of working season and (b) in the case of regular employment in any trade, profession, service etc. he was employed during any of the fifteen days preceding the day of enumerator's visit to his household. Those persons who were not conforming to the above concept (women doing household work, students, rent receivers, beggars and unemployed persons etc.) were classified as non-workers. The workers were further classified into main nine categories of economic activities. The number in each such category and the number of non-workers are shown in Statement No. 15.1. The Statement No. 15.2 gives classification of workers engaged in work other than cultivation (i.e. excluding those who are cultivators or agricultural labourers) according to main 'Occupational' divisions. This classification is done according to National Occupational Classification Scheme. The figures in Statement No. 15.2 are districtwise. Those in Statement No. 15.3 relate to the State as a whole. This statement gives a further breakup of the figures in each industry division into 'groups' of each division. Also breakup of a few important 'groups' into their 'families' is separately shown in this statement. The above classification is what is called 'occupationwise'. The Statements Nos. 15.4 and 15.5 give the classification of persons engaged in work other than cultivation into nine 'industrial' divisions. The Statement No. 15.6 give a further breakup of number in each division according to its 'major groups'. The Statement No. 15.7 gives the breakup of the number of persons who were returned as non-workers into various categories such as 'full time students' etc. The number of persons seeking employment

for the first time and those who were employed before but now out of employment are shown separately in this Statement. The Statement No. 15.8 gives usual employment exchange statistics for 1961-62 and 1962-63. The Statements No. 15.9 to 15.12 give relevant statistical information pertaining to the Census of State Government Employees (as on 1st July 1961) conducted by the Bureau. The information pertaining to other types of employment such as factory employment or number of teachers in primary and secondary schools has appeared elsewhere in the relevant sections.

XVI. EDUCATION

23. The Statement No. 16.1 indicates the growth of education in towns and villages in the State. The Statements Nos. 16.2 and 16.3 give number of institutions typewise and enrolment therein. In Statement No. 16.3 the information is presented districtwise. In this statement the 'attached classes or courses' are regarded as independent institutions and enrolment therein is shown separately again under the respective courses. This enrolment is already included in the enrolment of the main institutions to which these courses were attached. This is done so as to indicate the spread of various courses in different districts. In Statement No. 16.2 however, such attached courses are not regarded as independent institutions. The Statement No. 16.4 gives enrolment of students in pre-primary, primary and secondary institutions and number of teachers. The Statement No. 16.5 gives enrolment in pre-primary stage and in each standard of primary and secondary stages. In Western Maharashtra and Vidarbha the entire course of primary and secondary education is divided into eleven standards. In Marathwada districts it is divided into twelve standards. The Statement No. 16.6 gives distributions of pupils in primary and secondary institutions according to medium of instruction. The Statement No. 16.7 gives a break-up of students in pre-primary, primary and secondary institutions according to ages. The Statement No. 16.8 gives examination results for the years 1961-62 and 1962-63. The Statement No. 16.9 gives progress of compulsory education in different divisions of the State up to 1962-63. The towns and villages mentioned in this statement are according to 1951 Census.

XVII. JUDICIAL AND ADMINISTRATIVE

24. In this section the relevant statistical data relating to the Police Department of the State are given. Usually the statistics relating to judicial courts is incorporated in the Sector. In the earlier Abstract, these statistics for judicial courts are published for the years 1958 and 1959. The figures for subsequent years are not available. The figures pertaining to police only are therefore published in this section. Information for Greater Bombay Police and for those in the entire State excluding Greater Bombay is shown separately. The Statements Nos. 17.1 and 17.2 give details of posts sanctioned in Greater Bombay and the rest of the State respectively. The Statement No. 17.3 gives similar details regarding temporary additional police force in rest of the State. The Statement No. 17.4 gives number of cases under cognisable crimes dealt with by police in Greater Bombay. The next Statement gives information regarding number of persons involved in the cases dealt with by police in Greater Bombay. The Statement Nos. 17.6 and 17.7 give similar particulars relating to non-cognisable crimes in Greater Bombay. The Statement No. 17.8 gives particulars of property stolen and recovered by police in Greater Bombay. The Statements Nos. 17.9 to 17.12 give similar details regarding cognisable and non-cognisable crimes dealt with by the police in the rest of the State. The Statement No. 17.13 gives information regarding number of police stations, outposts etc. which gives an indication of police protection offered to the population at large in different parts of the State. The Statement No. 17.14 gives total number of cognisable offences reported in the entire State during each quarter of 1961-62.

XVIII. PRESS AND PUBLICATIONS

25. Statistics regarding printing presses and publications is presented in this section. The Statement No. 18.1 gives the number of printing presses as at the end of each year since 1959. The Statement No. 18.2 gives particulars of number of periodicals (dailies, weeklies etc.) published in different districts and in different languages. The Statement No. 18.3 gives statistics regarding books published in the State during different years. The Statement No. 18.4 gives languagewise distribution of both books and periodicals published in the State during different years. The Statement No. 18.5 gives distribution of books and periodicals according to subjects.

XIX. PRICES

26. The Statement No. 19.1 gives price quotations of agricultural commodities at selected market centres. The quotation relate to wholesale prices. The figures up to June 1962 are averages for the month mentioned and those for subsequent period are month-end quotations. The information is initially collected by the office of Marketing Research Officer, Bombay. The Statement No. 19.2 gives prices of Gold and Silver at Bombay Market.

XX. INDEX NUMBERS

27. In this section All India Index Number of Wholesale Prices (1952-53=100), and consumer price index numbers in respect of Bombay, Sholapur, Jalgaon, Nanded, Aurangabad and Nagpur are published. The consumer price index numbers are initially constructed by the office of Commissioner of Labour, Bombay. Each of the series is based on different period as base period. Recently new series have been developed with 1960 as a base period.

XXI. STATE INCOME

28. Only one statement is included in this section. Earlier, in 'Summary Statements' figures of State Income at both at current and constant (1955-56) prices and under broad sectors are published. The Statement No. 21.1 gives a still further break-up of income under each broad sector into sub-sectors. The available statistical material for building up such State income series had always been inadequate. In certain sectors the available statistics at State level is inadequate to admit of its utilisation towards building up such series. Statistical data released under Annual Survey of Industries, or through Surveys carried out under National sample survey are being fully utilised for the purpose.

XXII. STATE FINANCE

29. Three statements are included in this section. The first two statements give figures of revenue receipts and revenue expenditure respectively of the State under different heads. Further details will be found in the White Budget Book published by the State Government. The third statement gives figures pertaining to both revenue and capital accounts.

XXIII. THIRD FIVE-YEAR PLAN OF MAHARASHTRA STATE.

30. The Statement presented in this section gives details of expenditure under State Plan for each year.

XXIV. MISCELLANEOUS

31. Two statements are incorporated in this section. The first gives net collections under the State's Small Savings Scheme. The figures are finally audited figures and are inclusive of collections at postal offices in the State. The Statement No. 24.2 gives usual financial statistics relating to Reserve Bank of India.
