II Third Five Year Plan 11-15  
Progress.

CHAPTER - I  
INTRODUCTION

1.1 Physical features:-

The district of Satara is situated in the central part of Deccan Maharashtra. It is partly situated in the Bhima river basin and partly in the basin of Krishna river, and the rest of the district lies in the upper Krishna basin. In more concrete terms, it lies between 17° 5' and 18° 11' N. latitude and 73° 33' and 74° 54' E. longitude. It is surrounded by Poona District in the north, Sholapur District in the East, Sangli District to the South and ranges of Sahyadri and beyond Sahyadri by Kolaba and Ratnagiri district towards the west. The district has an area of 10436.9 square Kilometres with a total population of 14,30,105 persons according to 1961 population Census.

There are three geographical zones which can clearly be distinguished in the district. It contains two main systems of hills, the Sahyadri Range and its off-shoots and the Mahadeo Range and its off-shoots. To the west, bordering the Sahyadri Ranges, lies a hilly tract receiving between 1200 Mm. to 5000 Mm. of rain fall and comprising of the talukas of Patan, Jaoli, Mahabaleshwar and parts of Satara and Wai. The Soil in this area is thin and poor on the hilly slopes but gets richer where natural or artificial terracing has accumulated Soil and vegetable matter washed down by the rains. The agriculture and occupation of this zone would be similar to that of the people living in Konkan tract.

As against this, the central zone or the transitional belt comprising of the talukas of Koregaon, Karad, eastern parts of Satara and Wai, is flat and contains the richer agricultural tracts of the district. The rainfall is certain here. It varies from 700 to 1200 Mm. per annum. The major part of this area consists of medium or deep alluvial soil and is extremely fertile.

The eastern zone, however, where the soil is light and the terrain undulating, is the famous scarcity zone consisting of the taluka of Phaltan, Khatav, Man and the remaining parts of Khandala mahal, which do not fall in the western zone.

The soil in the western talukas of Mahabaleshwar, Wai, Jaoli and Patan is formed from the red laterite of the Ghats and is thin and poor on the hill slopes. Rich black soils, however, are found in Wai, Jaoli, and Patan Talukas in low lands in the valleys of Krishna, Venna, Kudali, and Koyana rivers. The central portion of the district consists of medium to deep black alluvial soils. Krishna valley soils are set to be one of the richest in the deccan and the portion which lies in Satara and Karad talukas is reported as the richest in the Krishna valley. In Khandala and Phaltan Talukas, however, the soil is poor and stoney in the vicinity of the hills but there are good black soils along the Nira and its tributary streams. In the eastern portion of Khandala, soils are poor, shallow and whitish but capable of producing wheat if enough water is available.

Towards the east, the soils get poorer and though there are wide stretches of good black soil along the numerous streams and rivers in Koregaon taluka, the lands near the hills are very poor. In Man taluka, the soils are extremely poor and shallow. Good soil is found only in narrow strips along the streams.

The soil condition on the whole, excepting certain parts of the central portion, is not much fertile for agriculture, in Satara district.

The river Krishna is the principal river of the region. The other important rivers are Koyana, Nira, Man, Venna, Kudali, Urmodi, Vasna, Yorala and Tarali. Krishna rises in the eastern brow of Mahabaleshwar plateau, with its source at about 4500' above sea level. Of its total flow of 800 miles, nearly 100 miles lie within the limits of the district. The drainage system of the Krishna includes, besides the drainage of the central system,

the drainage of five feeders from the right side, namely, Kudali Venna, Urmodi, Tarali and Koyana and two feeders on the left, namely, the Vasna and Yerla.

Koyana is the largest of Satara feeders of Krishna. It rises on the west side of the Mahabaleshwar plateau near Elphinstone point. In first 40 miles of its course, it runs nearly south up to Helwak in Patan taluka where the famous Dam has been built. After that point it suddenly turns east and after a further course of 40 miles falls into Krishna at Karad.

Of the Bhima system of rivers the two chief Satara representatives are the Nira in the north and the Man in the north-east. The river Nira rises on the Sahyadri Range within Bhore Talukas of Poona District. From its source in Bhor, the river runs east to north of the Wai and Phaltan talukas. After leaving Phaltan it runs north of Malsiras in Sholapur and falls in to Bhima. The Man river or the Man-ganga runs a length of about 40 miles in Satara district. Beyond Satara limits, it runs through Atpadi, Sangola, Pandharpur, and falls in to Bhima at Sarkoli about 10 miles south east of Pandharpur. Only during the rainy season these rivers are full. But in the hot months they go dry.

As far as the Hill Ranges of the district are concerned the Sahyadri system includes the main range of Sahyadri which with a length of 60 miles from north to south forms the western boundary of the district. The Mahadeo Range starts about 10 miles north of Mahabaleshwar and stretches east and south east across the breadth of the district. From this range three spurs also stretch to the south in the district. The tops of both the hills especially in the north west of Wai, Jaoli and Patan look like a succession of fortresses raised on a series of plateaus piled one over the other, the whole surmounted by a wall of rock. The top of Mahabaleshwar is about 4710' above mean sea level. This is the highest point in the district. But, except near Mahabaleshwar and the Koyana valley, the hills are very low, barren and rugged.

These hills form valleys through which flow several streams which make up the head waters of the river Krishna.

As regards the minerals in this district, iron deposits are found in twenty villages of Jaoli taluka and thirty villages of Patan, in the murum or crumbled trap below the laterite. Due to the rocky nature of soil the district is well supplied with stones for building and road metal.

Sand of good quality is also found in the beds of all large streams on the plains. Lime stone is found all over the district in the plains, especially near Wai. Good clay for bricks and tiles is found in nearly all river banks.

1-2:- As far as the climate etc. of the district is concerned, and no hard fast division of the same is suited to Satara District.

Monthly ~~stationary~~ ~~Mahabaleshwar~~ temperature records are available only for one station at Mahabaleshwar which is over 4,000 feet above sea level. The data do not naturally represent the climate of the district as a whole. The year may be better divided into five seasons - the rainy season from about 10th of June to the end of September; sultry climate from about the end of September to the middle of November; a cold climate from the middle of November to the end of January; a dry hot climate in which easterly winds prevail from the beginning of February to the end of March and the hot weather from the beginning of April to about 10th of June.

Within the district, the seasons show local variations also. The climate is cool and healthy in the hot weather in the western zone but becomes chilly during the rainy season. The plains of Wai taluka, however, have temperate climate throughout the year. The warmth increases as one proceeds from west to east. In the central part there is considerable heat during hot months. During the cold weather the days are warm and nights cool. The eastern zone has better climate than the central and western zones. It has a wider range of temperature variation from season to season.

and the climate there is in that respect more like the climate of Sholapur than that of Satara.

Rain fall is also not uniform in all parts of the district. It is heaviest in the regions of Sahyadri, with Mahabaleshwar getting on an average 6000 mm. in the year. The western zone has sharp transitions in the rainfall pattern. The extreme west gets over 5,000 mm. rain while the eastern belt of the Sahyadri zone gets between 1,200 and 2000 mm. The central or the transitional zone ~~and shows~~ a further break from the western zone and gets a rain fall from 600 to 1200 mm. The eastern zone has the lowest rain fall averaging to less than 600 mm. in the year.

The rains start about the middle of June and last till the end of Sept. The intensity of rain fall is greatest in July. Though the monsoon rains cease by the end of September, light drizzling intervals are not unusual till December.

The seasonal distribution of rain fall also varies from zone to zone. In the western zone, a major portion of the ~~xxx~~ rain fall is in the south - west monsoonal period. This heavy rainfall in the Sahyadri area loses much of ~~xx~~ its economic value due to its concentration in a short period.

In the eastern zone the rain fall is low and precarious but it is distributed over a long period. The talukawise figures of monthly rainfall for the district show that the rain fall is not uniform in all parts of the district. The below table can vividly explain the position in this regard.

Parts of the district have been affected by scarcity from early times. The areas which have suffered in the past were in Khandala, Man, Khatav, Koregaon and Phaltan talukas.

The fact-Finding committee appointed by the then Government of Bombay in 1960 had reported that the rainfall is not dependable in the following areas and they are likely to be affected by ~~the~~ scarcity conditions as shown below:-

Area	Grade	Estimated frequency
1) Lonand circle of Khandala mahal	B	Once in six years.
2) Man Taluka	B	Once in six years.
3) Southern part of Phaltan Taluka	C	Once in ten years.
4) Pusasavali and Vaduj circles of Khatav Taluka.	C	Once in ten years.

1.3 As far as the territorial changes in the district are concerned, it will be seen that one village from Khanapur taluka of Sangli district was transferred to Karad taluka in 1958. The name of the village is "Shamgaon"

1.4 Having discussed the general features of the district, let us see the Administrative set up <sup>of</sup> the district. The Collector is in charge of General Administration, Law and order, Treasury, Land Revenue and civil supplies. He is assisted by a Resident Deputy Collector in his office and three Deputy Collectors who hold charge of the three Revenue Divisions and have their head quarters at Satara, Phaltan and Mahabaleshwar, respectively. Nine Mamalats are in charge of nine taluka offices and two ~~Mamalats~~ Mahalkaris in charge of the two Mahal offices. The details of the same can be seen from the following table. Satara City is the Head Quarter of the District,

(Table supplied overleaf)

Sub-Divisions of the Dist.	Tal/Mahal	Area of the Taluka in sq. miles.	No. of towns and villages	Population
(1)	(2)	(3)	(4)	(5)
Mahabaleshwar	1) Khandala	203.3	46	63,164
	2) M'war	87.3	56 (2)	24,370
	3) Wai	229.1	91 (1)	104,746

	3) Man	556.0	71 (1)	99,410
	4) Phaltan	455.8	80 (1)	140,102
Satara	1) Jaoli	344.7	198	80,091
	2) Karad	412.9	116 (1)	251,640
	3) Patan	513.5	203	180,501
	4) Satara	353.4	153 (2)	191,313
District Total:		4029.7	1160 (10)	14,30,105

Figures in the bracket indicate the towns in the taluka.

As far as the developmental and administrative subject transferred to Zilla Parishad are concerned the Executive Authority for the purpose of carrying out the provisions of the Maharashtra Zilla Parishad and Panchayat Samitis Act 1961 vests in the Chief Executive Officer at the Zilla Parishad level and in the Block Development Officers at taluka panchayat level.

The Chief Executive Officer is assisted by the Deputy Chief Executive Officer and all other Heads of Depts. under the Zilla Parishad. The entire rural area and the non-municipal urban area of Satara Road is under the control of Zilla Parishad, Satara.

As regards the Administrative convenience of the Police Force, the district has been split up in two parts viz. Satara and Karad. The District Superintendent of Police looks after the administration of Police Force in the district. His Head Quarter is at Satara.

For efficacy and efficiency of the Police Force has been divided in number of branches such as Local Crime Branch, Local Intelligence Branch, Anti-Corruption Branch and so on.

For further details, please refer to the report of the District Superintendent of Police, Satara.

Enc

The District Judge, the man of jurisprudence, looks after judicial proceedings of the district. The judiciary is separated from the Executive.

The District and sessions Judge is assisted by two Assistant Judges and Additional Sessions Judges. They have jurisdiction over the entire district. They attend to Civil and Criminal work both original and appellate.

There are ten Civil Judges. (Junior Division) and First Class Judicial Magistrates with head quarters at different Taluka places.

The Divisional Forest Officer who is in charge of the Forest of Satara Division (comprising the District of Satara and few talukas of Sangli and Sholapur Districts) has his Head Quarters at Satara; and he works under the Poona Circle. Forest Division of Satara is split up in five ranges. These five ranges are located at Karad, Dhebewadi, Malshiras, Satara and Mahabaleshwar. Moreover, there is an independent sub-Division of Koyananager under an independent sub-Divisional Forest Officer.

Office of the Directorate of Industries attached to the Collector and Deputy Industries Commissioner Satara is located at District Head Quarter.

The work of assistance and guidance to the units established in the Industrial Estates at Karad etc. is imparted by the Industries Office, along with their normal functions.

In the co-operative field, The District Deputy Registrar of Co-operative Societies is of paramount importance. He is assisted by two Assistant Registrars who have territorial jurisdiction and deal with all the aspects of the Co-operative movement. The Zilla Parishad Satara also looks to the promotion and extension of the Co-operative movement in the district as a whole.

## C H A P T E R - II

### III FIVE YEAR PLAN PROGRESS.

#### ANNUAL REVIEW OF THE PROGRESS OF DISTRICT LEVEL PLAN SCHEMES IN SATARA DISTRICT FOR THE YEAR ENDING 31ST MARCH 1965.

An attempt to review the progress of the District level Plan Schemes implemented in Satara District during the third five year plan period is made in the following paras.

While analysing the plan outlay over various Heads of District Level Schemes it will be seen that out of Rs.720.13 lakhs of total plan outlay, an amount of Rs.285.28 lakhs is earmarked for the Major Head of Development viz. Agricultural programmes. That means near about 40% of the total outlay has been allotted for Agricultural Development of the District, through the various plan schemes under State and Local Sectors. Nearly 16% of the total outlay (i.e. 118.40 lakhs) has been assigned for the Major Head, Co-operation and Community Development. Under Industry and Mining an amount of Rs.4 lakhs (0.60% of the total District plan outlay) is reserved, while for the Major Head Transport and Communications, an amount of Rs.117.00 lakhs (i.e. 16%) is earmarked in this District. The fifth and the last Major Head of Development is the Social Services, for which the total outlay is Rs.195.45 lakhs. The per capita outlay and expenditure over various plan schemes come to Rs.50 and 32 respectively, in the District of Satara.

Out of 73 District Level Plan schemes which are being implemented in this District 30 schemes are being implemented by Zilla Parishad Satara and 39 schemes are being implemented by the concerned State Government Officials. 4 schemes are being implemented by the officials of both the sectors.

The total expenditure on Local Sector Schemes during 1964-65 was Rs.74.61 lakhs, as against the plan provision of Rs. 346.98 lakhs (i.e. 22%), while under State Sector Schemes it was Rs.98.18 lakhs as against the plan provision of Rs.373.15 lakhs (i.e. 26%). The overall picture for State Sector is slightly better as compared with local Sector.

The table given below will indicate the position of total expenditure incurred under the various Major Heads during the year 1964-65 in this District, as against the Budget provision for the year 1964-65. (Rs.in '000)

Sr. No.	Major Head.	Plan : pron. :	Budget : for :	Expdt. : during :	% of expenditure w.r.to p.p.
1	2	3	4	5	6
1.	Agril.progra- -mme.	285,28	3900.6	7390	25
2.	Cooperation and Community Devp.	118,40	1745.3	3226	27
3.	Industry and Mining.	4,00	94.5	32	8
4.	Transport and Communications	117,00	1458.0	1912	16
5.	Social Services.	195,45	6378.6	4719	24
Total:-		720.13	13577.0	17279	24

The pace of expenditure as displayed in the above table shows satisfactory position of expenditure in regard to schemes, included under the Head Co-operation and Community Development (with 27%), Agricultural programme (with 25%) and social services (with 24%). The progress achieved in respect of schemes included in Transport and Communications was fairly good while schemes under the Head Industry and Mining need more concentrated efforts. As against this expenditure, the position in regard to the physical achievements was as follows:-

#### I AGRICULTURAL PROGRAMME

(a) Agricultural production:- Under the scheme of Intensive cultivation of food crops, in selected areas, an area of 281842 acres has been brought under the Intensive cultivation as against the plan target of 280000 acres during the period of 4 years which was quite satisfactory. Out of this achievement, an area of

22476 acres was brought under the Intensive cultivation during the year 1964-65. The target of establishment of two Taluka seed farms has already been achieved under the scheme No.AGR-36 implemented under State Sector. The progress in respect of the scheme No.AGR-31 i.e. Development of Horticulture and scheme No.AGR-32 i.e. Green manure was also satisfactory, as revealed by comparing the achievements upto the year 1964-65 as against the prescribed plan targets as under:-

Sr No.	Scheme No.	Item	Unit	Target	Achievements upto 1964.65
1	2	3	4	5	6
1.	AGR-31	Development of Horticulture.	Acres	2000	1546
2.	AGR-32	Green manure	"	3000	2923

(b) Land Development:- The consolidation of holding is the only scheme falling under this sub head under State Sector, which was implemented quite satisfactorily in Satara District. The plan target is 15 villages and 34000 acres of area. As against this, the achievements up to 1964.65 were 21 villages and 61733 acres of area. During the year 1964-65 also, the achievement under this scheme has exceeded the annual targets.

(c) Soil Conservation:- Out of two schemes under this sub head, falling under State Sector, the achievements under scheme No. CONS-3 were quite satisfactory. An area of 5566 acres has been terraced as against the plan targets of 3000 acres.

(d) Minor Irrigation:- The programme under this sub head requires more efforts by the implementing officers to fulfil the targets during the plan period. During 1964.65, 8 irrigation wells were constructed under scheme No. MIN-I.

(c) Animal Husbandry:- There is only one scheme namely District Premium Bulls Scheme showing the satisfactory progress in this District. 190 premium bulls were located as against the target

----- of 188 during the last four years of the plan period. During 1964.65, 39 bulls were located as against the annual target of ~~40~~ 40 bulls.

(f) Forests:- Under this head, an acreage of 150 has already been brought under the scheme of Afforestation of Soil Conservation as against the plan target of 140 acres.

(g) Fisheries:- Under scheme No.FSH.23, assistance to fisheries cooperatives has been given for 4 societies against the plan target of 6 societies.

## II. Cooperation and Community Development:-

Under this major head the outstanding achievements up to the year 1964.65 were observed in respect of scheme No.COP-11 and COP-12. Under scheme No.COP-11, 21 societies have been assisted as against the target of 12. Under scheme No.COP-12, 25 new societies have been organised as against the plan target of 22 societies.

In respect of scheme No.CD-1 the achievements were also quite satisfactory. The target for conversion of blocks into Stage I was 6.50 for the whole plan period, and the same has already been achieved during the period of first three years of the Third Five Year Plan, in this District.

## III. INDUSTRY AND MINING:-

Under scheme Nos.SSI-11 and SSI-12, 16 and 24 societies respectively, have been assisted though there were no fixed plan targets under these schemes.

## IV. TRANSPORT AND COMMUNICATIONS:-

The progress of achievements has not been reported by the Zilla Parishad, Satara for the schemes coming under Transport and Communications; and as such, no specific comments can be made.

## V. SOCIAL SERVICES PROGRAMME:-

Under this Major head, the satisfactory progress was seen only in the implementation of the schemes No.PH-7 and No.LAB-1.

Under the scheme No.PH-7,21 vaccinators were appointed up to the year 1964-65 as against the plan target of 16 vaccinators. So also, under the scheme No.LAB-1 the target of addl. intake capacity was exceeded.

From the details of expenditure and the corresponding physical achievements under the different Heads of Development, it will be seen that the implementation of the Schemes under Co-operation and Community Development as well as under Agril. programme (both expenditure and achievement side) is satisfactory

DISTRICT STATISTICAL ABSTRACT

1964 - 65.

PART -II

C O N T E N T S

A-STATISTICAL ABSTRACT FOR THE YEAR 1964-65

S A T A R A - D I S T R I C T.

Sr. No.	Table No.	Subject	Page No.
1.	1.	<u>Climate:</u>	
1.	1.1	No. of Rainy days and Total Rainfall at selected Centres.	1-9
2.	1.2	Mean, Mean Maximum, Mean minimum Temperature at selected Centres.	10
3.	3.	<u>Area and Population:</u>	
3.	2.1	Talukawise Rural and Urban Population according to 1961 Census and variations with 1951 Census.	11-14
4.	2.2	Talukawise classification of Villages according to Population ranges in 1961 Census,	15-16
5.	2.3	Talukawise classification of Towns to population ranges in 1961.	17.
6.	2.4	Number of workers in each Taluka according to 1961 Census.	18-19
7.	2.5	Number of Non-Workers in each Taluka according to 1961 Census.	20-21
8.	2.6	Scheduled Caste and Scheduled Tribes.	22-23
9.	2.7	Population in Urban Areas according to 1961 Census.	24
10.	3	<u>Agriculture:</u>	
10.	3.1	Land Utilisation	25-26
11.	3.2	Area under different Crops in each Taluka.	27-32
12.	3.3	Yield per Hectare and Output of principal Crops.	33
13.	3.4	Area Irrigated by different Crops in each Taluka.	34
14.	3.5	Area Irrigated under different Crops in each Taluka.	35-38
15.	3.6	(a) No. of Irrigation wells in each Taluka.	39
		(b) Minor Irrigation works.	40
		(c) Major and Medium irrigation projects.	41
16.	3.7	Percentage distribution of Households engaged in Cultivation classified by Interest in Land Size of Land cultivated (Based on 20 percent sample Households).	42-43

Sr. No.	Table No.	Subject	Page No.
17.	3.8	Agricultural Wage rates	44-45
18.	3.9	Agricultural Implements in each Taluka in 1961.	46
19.	3.10	Famine, Scarcity and akin to Scarcity data,	47-50
20.	3.11	Progress under soil Conservation and Land Reclamation.	51.
	4.	<u>Animal Husbandary, Forest and Fisheries.</u>	
21.	4.1	Summery of Live Stock Census	52
22.	4.2	Live Stock in each Taluka.	53-54
23.	4.3	Veterinary Statistacs in each Taluka.	55-56
24.	4.4	Disease wise Live Stock Mortality	57-58
25.	4.5	No. of Recognised Slaught Houses and Animal Slaughtered in each Slaughter House.	59-60
26.	4.6	Rangewise Forest Area.	61
27.	4.7	Major and Minor Forest Products	62
28.	4.8	Miscellaneous Statistics Relating to Fisheries.	63-64
	5.	<u>Employment, Industry, Mining and Electricity.</u>	
30.	5.1	Employment in Factorics-H.O.	65-68
31.	5.2	Distribution of working Factories according to Product and their working strength -H.O.	69-70
32.	5.3	Distribution of Factories according to Nos. of days worked.H.o.	71-72
33.	5.4	Important industrial Land Mineral production.	73
34.	5.5	Statistics relating/to Hand looms & Power looms for the year 1963-64 and 1964-65.	74-75
35.	5.6	Employment Exchange Statistics,	76-77
36.	5.7	Occupational distribution of total Registration of Employment, Vacancies notified and placements etc.	78
37.	5.8	Changes in the volume of Employment in different Industries.	79

Sr. No.	Table No.	Subject	Page No.
38.	5.9	Statistics relating to Annual Survey of Industries. H.O	80
39.	5.10	Generation and Consumption of Electricity.	81
40.	5.11	No.of Towns and Villages Electrified and Population covered.	82
41.	5.12	Installed Capacity and Electricity generated.	83
	6.	<u>Co-operation:</u>	
42.	6.1	Statistics relating to District Central Co-operative Bank, District Industrial Co-operative Bank, District Development Bank.	84
43.	6.2	Co-operative Societies of each type.	85-87
44.	6.3	Agricultural Co-operative Societies in each taluka.	88-89
45.	6.4	Agricultural Marketing Society (Marketing and Distribution) in each taluka.	90-95
46.	6.5	Number of Registered Money Lenders and Loans advanced by them.	96
47.	7.	<u>Medical and Public Health.</u>	
47	7.1	Number of persons engaged in Medical and Public Health professions according to 1961 Census.	97
48.	7.2	Medical Facilities available through public and Public aided bodies in in each taluka.	98-99
49.	7.3	No.of patient (In-door, Out-door) treated.	100-101
50.	7.4	No.of Births and Deaths registered	102
51.	7.5	No.of Deaths due to important causes.	103
52.	7.6	Vaccination Statistics and Cholera Inoculation.	104
53.	7.7	Statistics of B.C.G.Vaccination	105
54.	7.8	Hygenic Drinking Water Supply Sources in the Rural Areas.	106
	8.	<u>Education:</u>	
55.	8.1	Literacy in each Taluka according to 1961 Census.	107-109
56.	8.2	Education in Rural Areas in each Taluka, According to 1961 Census.	110-111

Sr. No.	Table No.	Subject	Page No.
57	8.3	Education in Urban Areas of the Dist. according to 1961 Census.	112-113
58.	8.4	No. of Institutions, public and Teachers.	114-119
59.	8.5	Enrolment Beneficiaries and concessions to Economically Backward classes.	120
60	8.6	Economically Backward class Concessions of Free Education.	121
61.	8.7	Expenditure on Primary Education by way of grants-in-aids to Local Bodies.	122
62.	8.8	Classification of Towns and Villages with and without Primary Schools by Population Ranges.	123-126
63.	8.9	<u>Transport and Communication:</u>	
63.	9.1	Length of Railway Route.	127
64.	9.2 (a)	Road Length (Extra Municipal) according to Category and Surface	128
	(b)	Length of Municipal Roads Surfacewise.	129
65.	9.3	Motor Vehicles in Operation	130
66.	9.4	Operational Statistics of Nationalised Road Transport.	131
67.	9.5	Traffic Census of Non-Urban Roads.	132-133
68.	9.6	Information of postal, Telegraph and Telephone Statistics.	134
69.	9.7	Availability of postal Facilities.	135
70.	9.8	Rural Broad-Casting Statistics.	136
	10.	<u>Local Bodies.</u>	
71.	10.1	Income and Expenditure of Local Bodies.	137
72.	10.2	Panchyat Samitiwise Income and Expenditure for Village Panchayats.	138-145
73.	10.3 (a)	Head-wise Receipts of the Zilla Parishad.	146
	(b)	Head-wise Expenditure of the Zilla Parishad	147
74.	10.4	Constitution of Municipalities.	148-150.
75.	10.5	Income and Expenditure of Municipalities.	151-152
	11.	<u>Plan and Community Development.</u>	
76.	11.1	Expenditure in Third Five Year Plan in different Schemes.	153-157

Sr. No.	Table No.	Subject	Page No.
77.	11.2	Physical Achievements of different Scheme in Third Five Year Plan.	158.162
78.	11.3	Statement showing C.D.programme. H.O.	163
79.	11.4	Expenditure incurred in different H.O. Stages of Blocks.	164
80.	11.5	Physical Achievements on Selected items in all Blocks.	165
81.	11.6	Blockwise Index Number of physical Achievements & Expenditure.H.O.	166
82.	12	<u>Prices.</u>	
82.	12.1	Average Retail Prices of Important Commodities at District Head Quarter.	167-170
83.	12.2	Operations of Regulated Market in each Taluka.	171-173
	13.	<u>Miscellaneous.</u>	
84.	13.1	Strength of Police-Force and Crime Statistics.	174
85.	13.2	Work disposed in Civil and Criminal Courts.	175
86.	13.3	Cinema Statistics.	176
87.	13.4	Census of Government Employees H.O.	177
88.	13.5.	No,of Banking Offices. H.O.	178
89.	13.6	Joint Stock Companies. H.O.	179
90.	13.7	No,of Insurance policies issued & Amount insured.	180
91.	13.8	Collection of Small Savings.	181
92.	13.9	Land Revenue Collection in each Entertainment tax.	182
93.	13.10	Receipts of Excise Revenue/Sales Tax/ Entertainment tax.	183
94.	13.11.	No.of Documents registered, Income and Expenditure there from and Value of property transferred in each Taluka.	184
95.	13.12	Statistics relating to General Election held in 1962.	185
96.	13.13	Talukawise percentage distribution of House holds according to Numbers of Rooms occupied and the percentage distribution of the Households to the Population, according to 1961, Census.	186-191.

## EXPLANATORY NOTE:

### CLIMATE:

Table No.1.1 :- This table gives the picture of normal rainfall, no. of rainy days and actual rainfall of the 15 centres of Satara district. The rainfall is highest at Mahabaleshwar centre, while it is the lowest in Khandala Mahal. It is not uniform in all the parts of the district. It is heaviest in the regions of Sahyadri and very scanty in the eastern zone of the district.

Table No. 1.2 :- The table shows the mean, maximum and the minimum temperature of Mahabaleshwar station. The temperature is maximum in the month of April at 32.1 centigrade and minimum in the month of January at 13.9 centigrade. Monthly temperature records are available only for one station at Mahabaleshwar which is 4000 above mean sea level. As such, the data supplied in this table do not naturally represent the temperature of the district as a whole.

### AREA AND POPULATION:-

Table No.2.1- This table indicates the figures on population density, population variation and population of rural urban break up of each taluka of Satara district. The figures of 1951 are adjusted so as to depict comparative information for all the talukas at one place.

Table No.2.2 : This table gives the classification of different inhabited villages according to population ranges. It is seen that all villages fall under population ranges 1000-1999, 2000 to 4999 and 500-999. There is no village having <sup>population</sup> more than 10,000.

Table No.2.3 : The table is on the same lines that of 2.2. The classification of towns according to population ranges is given in this table. There is no town having <sup>population</sup> more than 50,000 in this district .

Table No.2.4 : This table shows the total no. of workers in each livelihood class of working population for each taluka of the district separately. For purpose of easy comparison, the classification is given for rural and urban areas separately.

The population under classification I, II and III is classified as Agricultural population while that under category IV to IX as non-agricultural population. Obviously the proportion of agricultural population is more in rural areas than that in urban areas. As regards non-agricultural population the situation is exactly reverse.

Table No. 2.5 : The classification of non working population is given in this table for 11 talukas of the district. The talukawise break up of urban non working population is not available and hence not given. It is seen that most of nonworking persons are Dependents and disabled person. Below them rank persons engaged in household industry and students.

Table No. 2.6 :- The information on the talukawise population of schedule castes and schedule <sup>tribe</sup> is given in this table. The majority of schedule caste population is in Karad taluka while that of schedule tribes is in Jaoli taluka. The list of Schedule caste and Schedule tribes is available from list no. 13.

Table No. 2.7 : This table details out urban population and its break up according to sex.

### 3. AGRICULTURE:

Data on land utilisation and crop statistics are primarily collected by village officials of the Revenue Department. They are subsequently consolidated by the Agricultural Department.

The series of tables on Agriculture under Sr. No. 3 present talukawise statistical data for two years, 1962-63 and 1963-64 on the following topics:

- 1) Land Utilisation
- 2) Area under different crops
- 3) Out turn of principal crops
- 4) Irrigation by sources
- 5) Area irrigated under different crops
- 6) Irrigation wells
- 7) Irrigation works.
- 8) Distribution of households engaged in cultivation classified by interest in land and size of land cultivated.
- 9) Agricultural wage rates

- 10) Agricultural implements in each taluka
- 11) Famines, scarcity data
- 12) Soil Conservation and land reclamation.

Table No. 3.1: The table shows the utilization of land areas under various crops for two years 1962.63 and 1963.64. The terms used in the table are explained below.

1) Geographical area -

This area represents the total land area and is worked out from the records of survey and settlement.

2) Forests: This category includes all area actually under forests whether state owned or private and classed or administered as forests.

3) Barren and unculturable land:

This includes barren and unculturable lands like mountains, riverbeds etc.

4) Culturable waste:-

This includes lands which can be brought under cultivation but which have not been; or having been cultivated for some time, have not been cultivated successively for five years.

5) Permanent pastures and grazing grounds:

This includes all grazing lands whether they are permanent pastures and meadows or not.

6) Miscellaneous tree crops and graves not included in the area sown

This category includes lands under thatching grass, bamboo bushes or other trees used for fuel.

7) Current fallows:

This includes lands which are left fallow during the current year only.

8) Other fallow land:

All lands which have been cultivated but which are temporarily out of cultivation for a period of not less than one year and not more than 5 years.

9) Net area sown: The net area sown is the actual area under crop, counting areas sown more than once in the same year only once.

10) Gross cropped area:-

This is the sum of area under all crops and represents the sum of net area sown and area sown more than once.

In the year 1963.64 both net area sown and gross cropped area show an insignificant decrease over the corresponding areas in the previous year 1962-63. The decrease in net area sown is denoted in Phaltan, Karad and Man Talukas. Area under fallow land, Culturable waste, appears to have reduced in 1963.64 when compared with corresponding figures in the year 1962.63.

Table No. 3.2 :

This table presents the details of areas under different crops. The crops are classified in two main groups viz. Foodcrops and nonfoodcrops. Foodcrops are further grouped into cereals, pulses and others. Nonfood crops are similarly shown under Fibres, oilseeds, drugs and narcotics etc. The information for two years, 1962-63 and 1963.64 for 11 talukas is presented here. Data of the year 1963.64 when compared with that of 1962.63 the following observations can be noticed.

- 1) Area under total food crops in 1963.64 has increased slightly in comparison with that in the previous year but area under non food crops has decreased proportionately.
- 2) Among food crops area under cereals show increase in 1963.64 over that in 1962.63 where as in case of pulses area has been found to be reduced in 1963.64.
- 3) Area under sugarcane and condiment and spices have <sup>considerably</sup> ~~considerably~~ increased in 1963.64 where there is considerable fall under fruits and vegetables in 1963.64 over that in 1962.63.
- 4) Under nonfood crops there is sharp decrease in area under tobacco in 1963.64.

Table No. 3.3:

This table presents the outturn and average yield per hectare of principal crops in the district. The data are exhibited for food crops like rice, wheat, Jowar, bajara, maize etc. & non-food crops like ground nut, tobacco, cotton etc.

... to ... tobacco, etc. The outturn figures are in '00' tonnes and average yield is shown in kg. per hectare. With the increase in area under cereal crops in 1963.64 it is observed that out turn of cereals has increased correspondingly, particularly in respect of Rice, Jowar and other cereals.

Production of pulses shows a slight increase even though the acreage in 1963.64 is decreased.

Outturn of Gur has increased in 1963.64 in comparison with that of 1962.63. The increase in acreage under sugarcane accounts for this increase. Cotton, Groundnut outturn figures also denote increase in 1963.64.

Table No.3.4 :

This table presents gross and net irrigated areas and the distribution of net irrigated areas by sources of irrigation viz. canals, wells, tanks and other. The data is presented for two year 1962.63 and 1963.64 and separately for each taluka. Net area under irrigation by all sources indicate rise in 1963.64 over those in 1962.63 the bulk however arising out of well irrigation.

Table No.3.5.:

This table shows the acreage of various crops under irrigation for two years 1962.63 and 1963.64. The material is presented for the district as a whole and for each taluka separately. When acreage of crops under irrigation for 1963.64 is compared to that of 1962.63 the following points are noticed.

- 1) Area under total food crops under irrigation has declined considerably in 1963.64 whereas area under total nonfood crops under irrigation has gone up.
- 2) Among food crops area under total <sup>cereals</sup> pulses and under irrigation has increased in 1963.64.
- 3) Area under sugarcane increased in 1963.64.
- 4) Under nonfood crops group, area under cotton, tobacco and other miscellaneous crops, under irrigation show a rise in 1963.64 over that in 1962.63.

Table No.3.6(a) :

This table presents data on wells. It gives total no. of wells, and further breakup as wells in use and wells not in use. The talukawise figures relate to years 1962.63 and 1963.64.

Table No.3.6(b)

The information on no. of minor irrigation works completed upto 31.3.1965 and allied information regarding irrigation is presented in this table. The information for Zilla Parishad, Co-operation and State Sector is given separately.

Table No.3.6(c)

The information on area commanded, irrigation potential, irrigated area and other items in connection with major and medium irrigation works is presented in this table. The same is collected from Executive Engineer, Nira Right Bank Canal Division, Phaltan.

Table No.3.7 :

This table shows the distribution of sample households engaged in cultivation classified by size of land and interest in land cultivated. Ten size groups are shown horizontally while the interests in land are classified in three groups viz.

- 1) Entirely owned or held from Government
- 2) Entirely held from private persons or institutions for payment in money, kind or share.
- 3) partly held from Government and partly from private persons or institutions for payment in money, kind or share.

The material is presented for total, rural and urban areas of the district separately and only for rural areas of each taluka.

Table No.3.8 :

The District Statistical Officer is collecting the data on wage rates of different categories of agricultural labour for each fortnight. The monthly averages for two years 1964 and 1965 for each of the three centres is shown in this table separately. The skilled workers include, carpenter, Blacksmith and cobbler while unskilled category includes field labour and herdsman,

Table No. 3.9:

This table presents the figures of Agricultural implements enumerated in the 9th Livestock Census in 1961. The figures for carts shown in the table are in respect of carts used for agriculture purposes only. The number of tractors is inclusive of those owned by private persons and by Government.

Table No. 3.10:

This table depicts data on famines, scarcity and akin to scarcity in Satara District. The information is reported to be NIL for the year 1964.65 except the position of akin to scarcity noted in Phaltan and Wai talukas.

Table No. 3.11:

The information about progress of soil conservation is presented in this table. The work of area bunding and counter bunding is constant in the years 1963.64 and 1964.65, while that of terracing is considerably increased.

3. ANIMAL HUSBANDRY FOREST AND FISHERIES :

Table No. 4.1 : The summary of the district population figures of Livestock Census conducted in 1961 for each category of Animals and poultry is given in this table. For comparison, figures of Livestock Census are also shown. It will be seen from the table that there has been a good increase in both the Livestock number and poultry in 1961, over a period of 5 years. The rise in number is found in almost all categories of livestock viz. cattle, buffaloes, sheep, goat, donkeys and pigs etc.

Table No. 4.2 : The talukawise breakup of the livestock figures given in Table No. 4.1 is shown in this table.

Table No. 4.3 : The medical facilities available to the livestock population in this district during the financial year 1963-64 and 1964.65 and the no. of animals treated in dispensaries and different aid centres is exhibited in this table. The name of the centres for insemination and no. of animals inseminated is also given. There are four hospitals, ten dispensaries, twenty six aid centres

and 9 centres of insemination in this district. The information is collected from animal husbandry officer Satara Zilla Parishad, Satara. There has been an overall progress in the veterianry facilities extended in the district in the year 1964.65 as compared to that in the previous year. The increase in the number of animals treated by the various centres is an indicator of this progress. There is also increase in the no. of animals inseminated during the year 1964.65.

Table No. 4.4:- The information regarding attacks of diseases and livestock mortality due to some important diseases of cattle and Bovine, sheep and goats, dogs, camels and poultry is presented in this table for the years 1963.64 and 1964.65. The No. of livestock and poultry mortality in 1964.65 has been found to be significantly low when compared to the no. of livestock and poultry mortality in 1963.64. The no. of livestock and poultry attacked by numerous diseases has also been on the decline in 1964.65.

Table No. 4.5: The title itself suggests the information presented here related to slaughter houses and animals slaughtered in the district. The no. of slaughter houses for Bovine and sheep and goat is given separately. Though the table displays data on animals slaughtered for the dist as a whole, the limitation of the data in full coverage is not engaged data on <sup>animals</sup> slaughtered in nonrecognised animal slaughter houses and those slaughtered by butchers in rural areas is not available.

Table No. 4.6 : This table gives rangewise figures of area under forest in this district. The classification is indicated in two-way  
1) Forest area according to protected, Reserved and Unclassed and  
2) Administrative control by Revenue and Forest Department.

Table No. 4.7 : The information regarding production and value of major and minor forest products is displayed in this table. The information pertains to Satara, Sangli and Sholapur districts as the districtwise break-up is not available.

Table No. 4.8 : Information on fish production, its marketing working capital involved and allied fishery items is given in this table.

4. EMPLOYMENT, INDUSTRY, MINING AND ELECTRICITY:

Table No. 5.1:- Factory statistics of the district is given in tables No. 5.1, 5.2 and 5.3. The Factories are classified into 29 Industry groups and the tables depict information for calendar years 1963 and 1964. Table No. 5.1 gives average daily employment of Adults, Adolescents and Children sexwise and mandays worked in the factories which have submitted prescribed returns under the Act. The average daily employment for factories not submitting returns is also estimated and given in the table. It is observed that the no. of factories has decreased in the year 1964, with corresponding decrease in mandays etc.

Table No. 5.2: This table throws light on another important aspect of factory employment. The classification of factories according to working strength is denoted in this table. <sup>There</sup> is not much variation in the classification of factories for both the years.

Table No. 5.3: The classification of factories according to number of days-worked in the years 1963 and 1964 is shown in this table.

The number of factories working for more than 300 days has decreased to 8 in the year 1964.

Table No. 5.4: This table presents data of production of cotton yarn, cotton cloth, sugar scap, packaged tea, copper and copper alloys, iron and steel products, electric wires and <sup>cables</sup> electric Motors, Glass and Glasswares etc. in the year 1963.64 and 1964.65. The source of the information is Superintendent of Central Excise.

Table No. 5.5: The no. of handlooms and powerlooms, their production and average daily employment in each centre of this district is given in this table. The information on production and average daily employment on powerlooms under the control of central excise is not available and hence not incorporated. There is little decrease in no. of handlooms while the no. of powerlooms has increased considerably during 1964.65. The increase in the production in the year 1964 is also notable.

Table No. 5.6 :- Table No. 5.6, 5.7 and 5.8 exhibit information relating to employment exchange and volume of employment.

The information is collected from district employment officer. Table No. 5.6 gives monthwise figures of registration, vacancies notified, placements done in public and private sector and live register at the end of each month. The information on placement of scheduled caste, and scheduled tribes candidate is also supplied monthwise.

Table No. 5.7 : The further break up of total no. of registration during 1963.64 and 1964.65 under subheads, Industrial, skilled, clerical, educational and unskilled is given in this table along with total no. of vacancies notified, placements made and live register. The no. of persons registering their names decreased in 1964-65. The no. of vacancies notified decreased with a reduction in placement made.

Table No. 5.8 :- This table gives an idea about changes in the volume of employment in three months from December 1964 to March 1965. The data is given for 8 different industries group. The absolute change can be viewed from col. 8. The relative changes can be seen from the percentages of total employment in a specific group of industry to total employment as on 31st December 1964 and 31st March 1965. There is an increase in percentage of person employed in electricity, Gas etc. . . . group.

Table No. 5.9 :- The information regarding employment, capital production and value of production, collected through Annual Survey of Industries in the year 1959, 1960 and 1961 is compiled in this table. The data pertains to those industries which are covered in the survey. The total no. of workers is greatly decreased in 1961. As a consequence the value of production also decreased in the year 1961.

Table No. 5.10 :- Table no. 5.10, 5.11 and 5.12 deal with electricity. The information in these table is collected from Maharashtra State Electricity Board and all electric companies in the district.

Table No. 5.10 gives information about generation and consumption of electricity in Satara District. Since the private

companies are purchasing bulk supplies of electricity the generation of electricity in the district is reduced year by year. The consumption is given purposewise in this table which will help to know the share of industries in purchase of electricity as a motive power. There is a considerable increase in the consumption of electricity in the year 1963-65. However the increase is not evenly distributed in three purposes namely domestic consumption, commercial consumption and industrial consumption. Industrial and other purposes rank top in the consumption of electricity in Satara dist. Table No.5.11. :- This table gives the total no.of towns and villages electrified in the district as on 31.3.1964 and 31.3.1965. The break up of no.of villages and towns as electrified by private companies and by Maharashtra State Electricity Board is also given. There are 133 villages and 8 towns electrified in this district.

Table No.5.12. : The table gives us the information about the installed capacity and generation of electricity in the district for 2 years 1963.64 and 1964.65.

#### 5. CO-OPERATION :

Table No.6.1 : The information regarding the Co-operative banks is presented in this table. There is no industrial co-operative bank. The data pertaining to number of branches, number of members individual as well as societies, capital structure and loan advanced of all types is compiled both for District Central Co-operative Bank and District Land Development Bank of this district. Both the Banks, it is seen from the table, are making progress and there is a good deal of increase in share capital and loan operations alongwith working capital.

Table No. 6.2 :- This table gives information about all types of co-operative societies, regarding their number, membership, capital structure, loans advanced and recovered and loans overdue and outstanding for two years 1963.64 and 1964.65.

Table No.6.3 : The data pertaining to agricultural credit societies only is given in this table for all the items covered in table No. 6.2.

However the information is for each taluka separately. The term agricultural credit societies includes agricultural credit societies, agricultural thrift societies, urban credit societies, Grain Banks, sewa societies and Multipurpose societies.

Table No.6.4 : This table displays the information of agricultural marketing societies for the same two years. District total for primary societies is given separately. The talukawise information presented here covers information on value of purchase, value of sales of Agricultural produce and agricultural requisites. The sale proceeds as owners and agents as well as cash sales and credit sales is given separately. One more salient feature of this table is that the information on different items under head agricultural produce viz. Paddy, wheat etc. and under head agricultural requisites viz. Fertilisers, seeds, implements etc. is given separately.

Table No.6.3 : The information regarding money lenders, and their loan activities is given in this table. As regards the talukawise break up of the information, the same is not given as it is not available.

The information in all the tables under co-operative fold is collected from District Deputy Registrar of Co-operative Societies, Satara.

## 7. MEDICAL AND PUBLIC HEALTH :

Table No. 7.1 : This table is adopted from the Census Hand Book of Satara District (1961). This two way table gives us the information on number of Physicians, Surgeons and dentists; nurses Pharmacists and other medical health technicians. The sexwise classification and classification according to rural and urban areas is also given.

Table No. 7.2 : This table shows the medical facilities available in the district. The material is presented for two year 1963 and 1964 and shows the number of hospitals, maternity homes, dispensaries,

primary health centres, doctors, nurses, beds, and indoor and out-door patients treated.

The information is presented for each taluka separately. The material includes only public and public aided institutions. There is slight decrease in no. of outdoor patients of both sex. The no. of Hospitals etc. is constant.

Table No. 7.3 : The break of the District totals of indoor and out-door patients treated during both the year 1963 and 1964 (shown in table No. 7.2) in 25 diseases is available in this table. The information of surgical operations is given against item 26. The total at item 27 is total of item 1 to 25. The no. of deaths due to cholera has increased considerably in the year 1964. However, total no. of deaths decreased in the same year in Satara District.

Table No. 7.4 : This table shows data about births, deaths and infant deaths for the years 1963 and 1964. The figure of infants & deaths relates to deaths of children below one year. The information is collected from Assistant Director of Public Health. Though there is decrease in no. of births and deaths, the decrease is more in no. of births. The decrease in deaths is effect of good facilities of public health.

Table No. 7.5 : This table shows the number of deaths due to principal causes in the district during 1963 and 1964. The causes of deaths shown are cholera, small pox, plague, fever, dysentery, Diarrhoeas, respiratory diseases, suicide and other causes. Other include diphtheria, chicken pox poliomyelitis, leprosy, cancer, deaths from child birth etc.

Table No. 7.6 : The talukawise data presented here give information on no. of primary vaccination, revaccination and cholera inoculation during the year 1963 and 1964.

Table No. 7.7 : This table shows information on B.C.G. vaccination. The same is given for two year 1963 and 1964.65. The information relates to total tested, total not tested, absents, vaccinated and non vaccinated.

Table No. 7.8 : The information on hygienic drinking water supply is available in this table. The items covered are no. of villages without any drinking water source and with inadequate supply. Presuming that all the remaining villages have the hygienic source of water, no. of pumps, tube wells, hand pumps well and conserved tanks is given.

## 7. EDUCATION :

Table No. 8.1 : This table gives data of literacy in each taluka of Satara district. The number of literates sex wise is given for rural and urban areas separately. Side by side with this, the percentage of literacy for each taluka for urban area and rural area and for males and females separately is given in this table.

Table No. 8.2 : This table gives information for rural population only. The total no. of illiterates, and literates with different level of education is given sexwise.

Table No. 8.3 : The table is on the same pattern that of 8.2. However, two educational levels, technical and non-technical are added. The information pertains to urban areas only. The talukawise position could not be shown on account of non availability of data.

Table No. 8.4 : This table shows the number of different types of educational institutions and the total number of pupils (boys and girls) and teachers (trained and untrained) for each type of institutions in the year 1963.64 and 1964.65. The information pertains to academic year. The no. of primary institutions and secondary institutions has increased. The no. of students also increased considerably. However the no. of teachers did not increase proportionately.

Table No. 8.5 : This table shows the number of backward class students and concession given to them at each level of education, preprimary to special. The other backward class students include economically backward class students also. The information pertains to academic year 1964.65.

Table No. 8.6 : Total no. of students taking benefits under the scheme of free studentship as economically backward class students and total value of such concessions for all educational levels for the district as a whole is shown in this table. The term economically backward class covers those persons whose annual income is below Rs. 1200/-. Those State Government employees whose annual income is below Rs. 1800/- are also included in this.

Table No. 8.7 : Every year the State Government is giving grants to Zilla Parishads and municipalities for recovering some percentage of expenditure incurred by them on primary education. This table gives information about actual amount of such grants to local bodies in this district during the academic years 1963.64 and 1964.65.

Table No. 8.8 : This table shows total no. of villages having schools and those without schools.

Further breakup of village without primary school is given in different population ranges. The information is collected from Director, of Education.

#### 8. TRANSPORT AND COMMUNICATION :

Table No. 9.1 : This table gives information of length of railway in this district. There is only one gauge namely meter gauge in the district of Satara.

Table No. 9.2A & 9.2b :- These two tables give us an idea about the length of roads of various types and category in the district as on 31st March 1964 and 31st March 1965. Table No. 9.2A gives information for roads under Zilla Parishad and Building and Communication department. The classification into different category as N.H. SH MDR, ODR, and classification according to type of surface such as cement concrete B.T. WBM is also given.

In table No. 9.2b the information on length of roads under municipal control only is given. The information is given for each municipality separately.

Table No. 9.3 : This table presents data about motor vehicles in the Poona Region. Poona Region consists of Anagar, Poona, Satara and Sholapur districts. The term motor vehicles includes motorcycles, cars, Taxis, Rikshws, stage carriages, lorries ambulances, school buses, tractors etc. This information is not available for each district separately and hence the data for Poona Region as a whole is presented. The reference date is 31.3.1964 and 31.3.1965. The no. of motorcycles and cars have increased thereby increasing the total by 3902 vehicles.

Table No. 9.4 : The data presented here relates to Nationalized Road Transport. The information on no. of routes, Route distance, vehicles on roads per day, no. of Fleets, average daily <sup>earnings</sup> etc. is given as on 31.3.1964, and 31.3.1965. Satara S.T. Division consist of whole Satara District and parts of Sangli and Sholapur districts. The no. of routes have increased from 225 to 246 while the no. of passenger travelled per day increased by nearly 9000 persons. As a result of this the daily earnings also have increased by nearly Rs. 8000/- within one year.

Table No. 9.5 : Every year in March and November B & C Deptt. (State and Z.P.) is conducting a traffic Census on different roads. The results of one of such traffic census (conducted in November 1964) are given in the table. The table gives information regarding no. of vehicles, light motor vehicles, medium heavy motor vehicles and slow moving vehicles and total traffic intensity in 24 hours.

Table No. 9.6 : This table gives the information on no. of post offices, telegraph offices, letter boxes, postmen, telephones and Radio licences issued. The information is as on the last day of the financial year. The increase in 1964-65 in no. of post offices, telephones and Radio licences is considerable. No. of Radio licences issued increased from 8417 to 10429. However, there is an decrease in the no. of postmen due to the abolition of posts of village postmen during the year 1964.65.

Table No. 9.7 : The classification of all villages in the district according to distance from the post office is presented here. The information is presented for each taluka separately. It will be seen that there are 275 villages having post offices. Persons in 357 villages have to walk a distance of more than 6 Kms. for a post office.

Table No. 9.8 : The material presented here pertains to rural broadcasting. It gives the no. of radio sets and villages where radio sets are installed. The population covered also is included. This talukawise information is the position as on 31.3.1964 and 31-3-65

9. LOCAL BODIES :

Table No. 10.1 : This table presents material on income and expenditure of local bodies. The local bodies covered under this table are village Panchayats, Zilla Parishad and Municipalities. The information is for years 1962.63, 1963.64 and 1964.65. The no. of villages panchayat increased from 743 to 761. There is a considerable increase in the expenditure of V.P.s Zilla Parishad and Municipalities in the year 1964.65 along with the increase in their incomes.

Table No. 10.2 : - The break-up of the information on income and expenditure of village Panchayats is given in this table. This break up is two-way. On the one hand the information for each Panchayat Samiti is given separately and on the other hand the total income and expenditure is further divided into major heads as income from taxes, fees, donations, contribution and expenditure on Administration, public works, sanitation etc. However, the information for only two years (and not three as in the case of 10.1) 1962.63 and 1963.64 is given. The income of V.P.s has increased by 21 lakhs of rupees in 1963.64 while expenditure increased by Rs. 23 lakhs.

Table No. 10.3A and 10.3B : This table is on the same lines that of 10.2. The break up of income and expenditure of Zilla Parishad in 1963.64 and 1964.65 in different sub heads is given in these two tables. Both the income and expenditure of Z.P. has increased in the 1964.65. Income has increased on account of more Government grants.

Expenditure increased due to added expenditure under Head General Administration, C.D.P. etc.

Table No. 10.4 : This table deals exclusively with the constitution of the municipalities in this district. It presents information on no. of councillors, names of and number of members of different committees, jurisdiction, and population covered under the respective municipalities.

Table No. 10.5 :- The information on income from and expenditure on different sub heads (of the municipality) is displayed here. The information for each municipality is given separately. The reference years are 1962-64 and 1964.65.

#### 10. COMMUNITY DEVELOPMENT AND PLANNING :

Table No. 11.1 & 11.2 :

Schemes in III Five Year Plan have been classified into district, divisional or State levels according to whether the benefits accruing due to implementation of the schemes, extend to district, division or state. According to this criterion, the plan allocation for the district level plan schemes in Satara district comes to Rs. 6.88 crores which comes to about 14.8% of district level plan schemes in Poona Division and 3.7% of Maharashtra State.

Table No. 11.3 :- Table 11.3 to 11.5 give information about the community development blocks in the district. This table gives the general information about the no. of blocks of C.P.A. Pattern in each stage, the population covered under these blocks and inhabited and deserted villages. The total no. of C.P.A. Pattern blocks is 17½ covering an area of 10137.9 Sq.Km. 1279476 persons in 1175 villages are covered by these blocks.

Table No. 11.4 : This table gives information about the expenditure by the blocks upto 31.3.1964; expenditure during 1964.65 and total expenditure since the beginning of the particular stages in which those blocks stood as on 31.3.1965. 6 blocks covering 9 C.P.A. Pattern blocks are in stage I (Phaltan, Mahabaleshwar,

Jacli, Koregaon, Khatav, and Man). Two blocks Khandala and Karad are in stage II and cover 3½ CPA pattern blocks and Wai, Satara, Patan in Stage III cover 5 CPA Pattern block. The information presented here is collected from Bureau of Economics and Statistics, Bombay.

Table No. 11.5 :- This table presents the information on actual achievements of the blocks during the two years 1963.64 and 1964.65 on selected items of physical achievements.

Table No. 11.6:-

The blocks are submitting their quarterly Progress reports to this office. Index on physical achievements under items covered in the last table is prepared after giving due weight. In this table the information on the class and the index during the two years is given for each block. So also, the expenditure class wherever possible is given.

#### 11. PRICES :

Table No. 12.1 :- Since the aggression on our Northern Frontier the price problem became of special importance. Bureau of Economics and Statistics through its district agency of the District Statistical Officer is collecting the wholesale as well as retail prices of more than 75 commodities every Friday. This table gives the monthly averages of prices of some important commodities from January 1964 to December 1964. The averages worked are Arithmetic average of prices prevailing at district Headquarters in the respective months.

Table No. 12.2 : Regulated markets has become the necessity of to-day. There are 4 regulated markets (with submarkets) at Satara Karad, Koregaon and Phaltan. The information regarding the area under each regulated market alongwith arrivals and value of sales for each regulated commodity is given in this table. The information for each regulated market is given separately.

#### 13. MISCELLANEOUS :

All the other tables that cannot be included in any earlier section of the chapter are included in this section.

Table No. 13.1 :

This table presents information on police strength and crimes in the year 1963 and 1964. There are two parts of the table. First of it relates to strength of police and gives information about no. of superintendents, inspectors and constables. They are further divided in permanent and temporary cadres. The second part relates to strength of police <sup>force</sup> and gives information <sup>about</sup> no. of out posts, police stations, cognizable and non-cognizable crimes etc. Though the reference year for this table is calendar year, the information of total cost of the police force is given for financial years 1963-64 and 1964.65.

Table No. 13.2 :- The material presented here relates to cases decided by courts in this district. The information is given for two year 1963 and 1964. The break up of cases, into civil and criminal in the 1st place, into original and appellate in the 2nd place and lastly into Regular and miscellaneous is given. The figures however do not include the cases decided by the District Magistrate and Executive magistrate of Satara district.

Table No. 13.3 : The information about cinema theatres is given in this table. The information pertains to permanent theatres as well as for semi movement and touring talkies of this district.

Table No. 13.4 : Bureau of Economics and Statistics has conducted a Census of employees in public sector, The results of the same are displayed here. The no. of persons according to pay ranges with their total emoluments is given. There were in all 6780 persons. The classwise figures are class I -(33) Class II -(220) Class-III 5114 and Class IV - 1413.

Table No. 13.5 :

The table is self explanatory. No. of banks and the population covered by them in the year 1964.65 is given in this table.

Table No. 13.6 : This table gives information about joint stock companies. They are classified as companies limited by shares and  
( X X )

companies limited by guarantees and associations not for profit. .  
Their further breakup into public and private is given. The infor-  
-mation is collected from Bureau of Economics and Statistics,  
Bombay.

Table No. 13.7:- With a view to judge the achievements of life insurance corporation, the comparative data for two successive years 1963-64 and 1964.65 is presented here. It gives total number of policies issued and the amount insured side by side.

Table 13.8 : Small saving are of paramount importance from the view point of conserving funds for development purposes. As such, the data as regards Gross and net collections under different schemes of small savings is presented in this table. The data for schemes ND certificate, 10 year Def. certificates, 15 year Annuity certificates, post office savings bank, C.T.D. and others is given separately.

Table No. 13.9 : Land revenue forms one of the sources of revenue of the State. The talukawise information about the arrears in the previous years, Demand for the year, collection during the year and arrears for <sup>next</sup> year is given. The data is presented for the years 1963-64 and 1964.65. Jalji, Khandala, Khatav, Koragaon, Mahabaleshwar Man, Patan, Satara, Wai has no arrears at the end of year 1964.65.

Table No. 13.10 :

The table is self explanatory. The collection of Excise revenue, Sales tax and entertainment tax during the two years 1963. 64 and 1964.65 is shown in this table. The figures of sales tax relate to State Sales Tax only.

Table No. 13.11 :

The information about registration of documents is given in this table. The information is given separately for each taluka. The material covers the items such as net income from registration, Documents registered and value of property transferred.

Table No. 13.12:- The results of the 1962 general elections are presented here in two parts.

The 1st part deals with the results of Assembly constituencies the other with parliamentary constituencies. It gives the no. of total votes polled, its percentage to total voters and no. of polling stations. For assembly seats the % varied from 61 to 79. The same was between 63 and 69 for parliamentary constituencies. There are 10 assembly constituencies and 2 parliamentary constituencies. Two talukas viz. Shirola and Walwa of Sangli district are merged in Karad Parliamentary constituency.

Table No. 13.13 :-

This table presents the distribution of sample households classified by the number of rooms occupied. For each class of households the total number of members is shown by males and females separately. This will help measure congestion, particularly in urban areas.

This table is prepared from the houselists on a 20 percent sample. The material is presented for each taluka and for rural and urban areas separately. Hotels, boardings, etc. are not included. Only family households are considered here.

6.	Copper and Copper Alloys	M. Tonnes	441	435
7.	Iron and Steel Products.	-do-	98	150
8.	Electric Wires and cables.	-do-	22	74
9.	Electric Motors	Nos.	1,421	1,778
10.	Internal Combustion Engines	Nos.	8,955	13,475
11.	Wireless Receiving sets.	Nos.	3	2
12.	Glass and Glassware	Gross	69,477	64,050

Source:- 1) Superintendent, Central Excise, Satara.  
2) Industries Officer, Satara.

NOTE :- 1) There is no Mineral Production in Satara District. 2) Figures in Col.4 will not tally with the figures in Dist. Statistical Abstract 1962-64. The figures reported in D.S.A. 1962-64 were for calendar year, whereas the figures reported here are for financial year. 3) The production of sugar in 1964-65 is reduced due to decrease in the supply of sugarcane to the factories.

Source:-1) Superintendent of Central Excise, Satara. 2. Dist. Deputy Registrar of Co-operative Societies, Satara.

Notes:- 1) The figures regarding production of handlooms and average daily employment is not available. Because either the production is stopped or the concerned handloom Socys. are stagnant during the reference period. 2. In respect of some of the powerlooms, information is not available with Supdt. of Central Excise, Satara. Because these powerlooms are exempted from excise duty and no such information is collected by that office.
