## CHAPTER 1

### Introduction

Aurangabad region comprises five districts of Aurangabad, Parbhani, Nanded, Bhir and Osmanabad commonly called Marathwada.

This land of saints, nursery of culture and seat of empires in a way goes to epitomise the course of Indian history. The achievements of this region in the fields of art, culture, learning and spiritual life are very great. The world renowned caves of Ajanta and Ellora are still with us to speak of ancient glory that India was and what human genius could envision and execute. Shalivahan began his historic career in this region and the "Bhakti" cult was nurtured by Marathwada which produced great mystics.

### 1.1 - Location

Marathwada forms the central portion of Maharashtra with Aurangabad town being located almost in the centre of the State. In Aurangabad town there is a confluence of North and South.

### 1.2 - Boundaries

The region is bounded on the north by the districts of Jalgaon (Bombay division), Buldhana and Akola (Nagpur division), on the south by Sholapur (Poona division) and Mysore State, on the east by Andhra Pradesh and on the west by Nasik (Bombay division) and Ahmednager (Poona division).

### 1.3 - Administrative set up

The region has in all five districts with 39 talukas and 7 mahals in it. There are 2 talukas and 3 mahals in Aurangabad district, 8 talukas in Parbhani district, 6 talukas and 1 mahal in Bhir district, 6 talukas and 2 mahals in Nanded district and 10 talukas and 1 mahal in Osmanabad district.

For administrative purposes, the region is divided into five districts with its divisional headquarters at Aurangabad town with a divisional Commissioner in charge of the region. Each district in turn is under a Collector at the district level and each taluka or mahal in a district is in charge of Tehsildar or Mahalkari, as the case may be. The Zilla Parishad has jurisdiction over all the rural areas of talukas or for development purposes. With a view to promote development of democratic institutions and for securing greater

measure of participation by people in development Plans and local government affairs by decentralisation of powers and functions, the zilla parishad and the panchayat samities have been established in each district under Maharashtra Zilla Parishad and Panchayat Samities Act, 1962. The zilla parishad has jurisdiction over the entire district excluding Municipal towns which are covered by the municipalities or Town committees as the case may be. The panchayat samities likewise at taluka level have jurisdiction over the entire rural areas of the taluka except the towns under the municipalities or town committees.

The divisional and state level officers of government exercise technical supervision and give guidance to zilla parishads and panchayat samities.

#### 1.4 - Area

Aurangabad region has a total area of 64,797.9 sq. kilo meters (63,309.3 kilo metres of rural and 1,488.6 kilo metres of urban) and its population according to 1961 Census is 6.297 millions comprising 3.208 millions of males and 3.089 millions of females. Different territorial changes have taken place in this region, the districtwise details of which are as follows:-

##### Aurangabad

There were no major changes in the boundaries of the district or its talukas between 1901 and 1941. During this period eight villages of Ambad taluka were exchanged with six villages of Pothri taluka of Parbhani district. Twenty five enclave villages of Nasik, East Kandesh and Akhadnoger districts were transferred to Aurangabad district in 1950. Consequent upon the abolition of jagirs and sarf-e-khas (crown estate) all the taluka boundaries were reconstituted in April 1960 and two new mahals were also created one with headquarters at Khultabad and the other at Jafferabad. The mahal of Soegron was created in 1953 by transferring 37 villages from Silled taluka and 30 more villages from Kenned taluka.

##### Parbhani

In 1906 Kalasnuri taluka got the northern villages of Nanded taluka together with 8 villages from Ambad taluka of Aurangabad district in exchange of 6 villages of Pothri taluka of Parbhani

district transferred to Ambad taluka of Aurangabad district. No major changes occurred between 1906 to 1948. More than a third of the district area comprised jagirs which were abolished in 1949 and the villages therein were taken over under direct government administration. Gangakhed taluka was formed after the abolition of jagirs in 1949.

#### Nanded

In 1905 Mudhol taluka of Nizamabad district was transferred to Nanded district and the taluka of Bhainsa then existing was merged in Mudhol taluka. The taluka called Dowla Narsapur of Nizamabad district (Andhra Pradesh) was abolished and a new taluka was formed with its headquarters at Kinwat. The taluka of Osmanager (Lathi) was abolished and all its villages were divided between Biloli and Kondhar talukas. The northern villages of Nanded taluka were transferred to Kalamuri taluka of Prabhani district and a few other areas were merged in Madgaon taluka and Mudhol taluka which is now in Nizamabad district of Andhra Pradesh. There were no major changes in the district or taluka boundaries upto 1948. In the year 1949 the sarf-e-khas (crown estate) with its headquarters at Khadka (Mukkerabad) was taken over under merger of sarf-e-khas Regulations promulgated in 1949. Consequently all other jagir areas were also abolished. The taluka boundaries were reconstituted in 1950 when two more tahals were created one with its headquarters at Mukhed and the other at Bhokar. Due to State's Reorganisation in 1956 two revenue circles of Deglur taluka and three revenue circles of Mudhol taluka were transferred to Andhra Pradesh. Kinwat and Rajura talukas together with Islapur circle of Borth taluka were transferred from Adilabad district (now in Andhra Pradesh) to Nanded district. The revenue circle of Dharmabad or erstwhile Mudhol taluka (now in Nizamabad district) was included in Biloli taluka. Islapur revenue circle was included in Kinwat taluka and Rajura which is isolated and lies 300 miles away from Nanded town was transferred to Chanda district of Vidarbha in 1959.

#### Osmanabad

The district of Osmanabad was temporarily ceded by the Govt. of Nizam to the British Govt. in 1853. It formed part of Hyderabad State once again in 1860. The headquarters of the district was at

Naldurg and in fact the district itself was called Naldurg district till 1904. In the year 1905 two taluka headquarters of Wosi and Naldurg were abolished. The former was merged in Kelam taluka and the latter in Tuljapur taluka. The headquarters of Ausa taluka was shifted to Latur and the taluka was named as Latur taluka. The Nizam's own estate called sarf-e-khas (crown's estate) was the biggest in this district which was consequently merged with Govt. areas in 1949. After abolition of Jagirs, the district boundaries and the taluka boundaries also were reconstituted in 1950. Two new talukas called Ausa and Umerga and one mahal with its headquarters at Bhun were then created. In the year 1950, 11 enclave villages from Sholapur district were transferred to this district and 52 villages of this district were sliced out and shunted to Sholapur district.

All the above five districts formed part and parcel of the erstwhile Hyderabad state till 31st October, 1956. On 1st Nov. 1956, they formed part of bilingual Bombay State. From 1st May 1960 they were included in Maharashtra State.

Marathwada covers 21.15% of the total area of Maharashtra and its population forms 15.92% of the total population of Maharashtra.

#### 1.5. - Topography

For almost the whole region of Marathwada the underlying formation is trap rocks which give rise to heavy black soil highly retentive of moisture and particularly suitable for growing cotton. The region is mostly flat plateau with hilly areas in the districts of Aurangabad, Bhir and Osmanabad and cultivation of cotton is concentrated in flat ranges.

Marathwada has extensive hilly ranges and spurts which neither pour water or cultivation nor attracts rainfall. In all the five districts the plateau table land (generally flat country) has elevation between 300 to 900 metres whereas in Aurangabad, Bhir and Osmanabad there is broken country in parts with elevation between 300 to 900 metres.

#### 1.6. - Hills, river system, soil.

The country to the north of the Godavari and its main tributary, the Manjra is characterised by the formation of

trappean rocks and the soil being derived from the decomposition of those rocks in black and, therefore, fertile yielding cotton and wheat. Particularly the track which lies between the Penganga and the Godavari is noted for its high cultivation and general richness. South of Godavari the country is rugged and not very rich, but the Manjra valley is fruitful. The main river of this region is the Godavari which rises at Trimbekeshwar at Nasik and enters the region at cross section at Gangapur, the western corner of the region. It traverses through Paithan, Shrigadh and Gangakhed while flowing towards east and pass out of the region at Basar which is the last point on the eastern side of Nanded district and winds its course in Andhra Pradesh further down east. It cuts the region into almost two halves with Aurangabad, Parbhani and northern portion of Nanded district lying on its north. The districts of Bhir, Osmanabad and southern portion of Nanded lie on its south. The river Penganga which rises near Buldhana passes through Chikli and Vehkar to touch the northern border of Hingoli taluka of Parbhani district and marks the border of Nanded district from Yeotmal district of Vidarbha. River Manjra is a tributary of the Godavari and rises in the hills of Patoda dividing Bhir district from Osmanabad district and winds its course towards east of the region to enter Mysore state near Karnalager. The Purna rises from Kenned hills in Aurangabad district and steps into Parbhani district from south west corner. Besides these three rivers there are a number of <sup>small</sup> minor rivers and streams in each district.

The soil is black in all the five districts of the region and in Nanded district it is a mixture of "lateritic" and black soils. The underlying rock formation is termed as "Deccan traps" in all the districts and in addition in Aurangabad district it is "Archean Dharwar" and in Osmanabad district it is "Pleistocene Recent."

CHAPTER-II

Part-II of the Publication relates to statistical abstract giving districtwise statistical data on important socio-economic activities in the region for the two succeeding years 1963-64 and 1964-65. Wherever the data for the year under review was not available the same is reported for the earlier years. An attempt is made below to give a brief account of the salient features of the data presented in the Publication:-

2.1 - Climate

Climatic conditions do not generally vary from place to place, in this division. Summers are usually hot with a maximum temperature during May and high as 43.3° centigrades in Nanded district whereas the minimum of 8.1° centigrades was found to prevail in Aurangabad district during the years 1963 and 1964. The winters are generally severe for a short period in November and December and the summers are severe mostly in Nanded district during the month of April and May. The rainy season generally starts from June and continues upto first fortnight of October whereas the winter season commences from mid-October to end of February terminating into summer from March to May. The climate generally is healthy particularly in Aurangabad district and has uniformity in all the districts except in Nanded district in general. During summers the days are hot though nights are fairly cool particularly in Aurangabad district. Occasionally hot dry winds blow in April and May. The rainfall in the region varied between 30" to 40" (762 to 1016 mm.) in rainy season.

2.2 - Population

According to 1961 Census, the population of Aurangabad Division was 62.97 lakhs, spread over an area of 64,907 sq.kms. The population thus has been nearly doubled over the last sixty years in the region. The percentage growth in the population over the decade in the region was 23.24 which compared favourably with the percentage growth (23.60) in the population of Maharashtra State as a whole during the same period.

The population density of the region in 1961 worked out to 97 per sq.kms. as against the same being 129 for the State as a whole. The low density of the region is mainly attributed to its

relatively low percentage of urban population and lack of industrial development. Within the region population density of the districts found to have varied from 154 in Mandla district to 32 in Bilaspur district.

The region is mainly rural in character as nearly 57.03 lakh persons or 87.4% of the total population reside in rural areas, comprising 7,140 inhabited villages. There are in all 53 towns in the region having 7.94 lakhs population or 12.6% of the total population of the region. This region having remained an underdeveloped area has relatively low percentage of urban population (12.6%) compared to that of the State as a whole (28.2%). The classification of towns according to population size showed that there were no towns having population over one lakh, 3 towns having population over 50 thousand, in the region. Out of the total villages in the region, majority i.e. nearly 77% of the total villages were having population below 1,000. Quite a substantial percentage of total villages (42%) were having population even below 500. The above pattern of village size is again an indication of the economic backwardness of the region.

/\*but below one lakh the rest 50 towns having population below 50 thousand.

Sexwise distribution of population shows that as in the State, there is preponderance of male population in the region. According to 1961 census there were 963 males per 1000 females in the region. There has been no major variation observed in regard to sex ratio amongst districts in the region. The percentage of Scheduled Caste and Scheduled Tribe population according to 1961 census was 11.6 in Aurangabad region as against 11.7 in the Madhya Pradesh State.

According to 1961 Census, 43.05% of the total population was engaged in agricultural operations and 9.51% in non-agricultural occupation and 47.44% were non-working population. Among every 1000 persons, there were 526 workers and 474 non-workers in this division as against 479 workers and 521 non-workers in Madhya Pradesh according to 1961 census. The general pattern of non-agricultural employment leans very heavily on local crafts and craftsmen work on traditional lines with locally available raw-material and cater to a local or nearby market. The following tables shows percentage distribution of working population of 1961 census according to nine categories of economic activity for the region

as well as for the State.

Table No. II-1

Percentage distribution of working class population (1961 census)  
according to different economic activities in Maharashtra and  
Aurangabad region.

Category.	Aurangabad region.	Maharashtra State.
1. As cultivators.	47.7	46.1
2. As agricultural labourers.	34.2	23.8
3. In mining, quarrying, livestock, forestry, fishing, hunting and plantations, orchards and allied activities.	3.2	2.2
4. As household industry.	3.8	4.4
5. In manufacturing other than household industry.	1.2	6.9
6. Construction.	1.0	1.2
7. In trade & commerce.	2.5	4.5
8. In transport, storage & communication.	0.6	2.4
9. In other services.	5.8	8.5
Total.	100.00	100.00

It is observed that the region had slightly more percentage of cultivators and agricultural labourers than that of the Maharashtra State. The table clearly reveals that as in the State agriculture constituted the major source of livelihood for the population in the region.

### 2.3 - Agriculture

Agriculture constitute the main-stay of the economy of this region, where industrial development is yet to make its mark. The region is potentially rich agricultural tract, suitable for growth of cash crops. However due to uneven and scanty rains, lack of <sup>adequate</sup> irrigation facilities and absence of modern methods of farming, the productivity of the soil has found to be low compared to other areas of the State.

Land utilisation statistics for the year 1962-63 of the region showed that out of total geographical area of 64.31 lakhs Hectares, 46.10 lakh Hectares or 71.69% of <sup>Total</sup> geographical area

was under cultivation. Forest accounted for 2.07 $\frac{1}{2}$  lakh hectares and formed 3.27% of the total geographical area. The uncultivated land excluding fallows during 1962-63 measured 6.3 lakh hectares forming 9.92% of the geographical area of the region. Quite a substantial proportion of the geographical area was reported as fallow land which formed 15.10% of the geographical area. The gross cropped area during 1962-63 was 48.27 lakh hectares showing relatively small area under double crop.

The cropping pattern of the region reveals that the food crops are predominant in this region. Out of total gross cropped area (48.27 lakh hectares) the food crops alone accounted for nearly 71%. The principal crops of the region are jowar, cotton, ground nut, wheat and bajra. In the year 63-64, jowar accounted for nearly 37.6% of the area under gross cropped area while area under cotton was nearly 15%. Ground nut, wheat and bajra accounted for 6.8%, 5.4% and 5.2% respectively of the gross cropped area. Pulses together also covered a substantial area which constituted 17% of the gross cropped area. Studying the cropping pattern over the two succeeding years 62-63 and 63-64 it is observed that the proportion of area under non-food crops has slightly declined in 63-64 indicating a shift slightly in favour of food crops. It is also further observed that percentage of gross cropped area to net cropped area was slightly more in the year 63-64 (105.1%) compared to the corresponding percentage in the year 62-63 (104.1%). In general, it is seen that the extent of area under double cropping was relatively small (only about 5% to the net cropped area) mainly because of the inadequate irrigation facilities.

The proportion of the area under irrigation was quite low in this region as only 2.1% of the gross cropped area was under irrigation in 63-64. Well constitute the major source of irrigation in the region accounting for 92% of the area irrigated. The main crop benefitted by irrigation were jowar (13.2%), pulses (5.8%) and sugar cane (9.5%).

## 2.4.- Animal husbandry & forest.

### 1. Livestock

According to 1961 census, the number of livestock in this region was 58.07 lakhs, thus recording an increase of 16.2%

over livestock population enumerated in 1956. The percentage increase during the five years period 1956-61 in livestock population was highest in Osmanabad District (25.3%) and was lowest in Nanded district (8.2%). The increase was observed in all types of livestock population except in case of horses and ponies and sheep. The maximum increase was observed in case of number of goats, which was 36.8% and minimum increase was found in case of cattle which was 13%. Amongst total livestock population enumerated in 1961, bovine population constituted the majority, it being 43.1 lakhs forming 74.72% of total livestock population. Of these the total number of bovine population over three years of age were 15.92 lakhs i.e. about 36.9% of the total bovine population. During 1961 the cultivated area per pair of male bovine over three years in the region worked out to 6.04 hectares as against the same being 5.22 hectares in the State as a whole. Milch cattle with a population of 4.09 lakhs constituted 11.21% of total cattle population. During 1961 census sheep and goat population enumerated was 13.91 lakh, while horses and ponies were approximately 42 thousand. Other livestock comprising of donkeys, camels and mules and pig were approximately 58 thousand, the population being increased by 19% over the last census. The poultry population which was about 11 lakhs according to 1961 census, recorded a significant increase of 54% over the period 1956-61.

During 1961 average cultivable area per plough was 21.95 hectares in the division. It was highest in Bhir district with 46.31-46.21 hectares per plough and was lowest in as 9.12 hectares in Nanded district. It was significant to note that there was decrease in the proportion of iron ploughs (1.76%) in 1961 as compared to that in 1956. The number of electric pumps however rose considerably from 73 in 1956 to 305 in 1961, in the region.

## 2. Forest

This region is practically devoid of any dense forest. Forest area in the region is classified as "dry deciduous". Area under forest according to forest department report was 2.70 lakhs of hectares approximately during 1964-65. Out of this reserved forest area was to the tune of 1.84 lakhs hectares while protected forest area accounted for 0.28 lakh hectares. The area under unclassified forest was 0.59 lakh hectares. During 61-62 the total value of forest produce was 11.54 lakhs of rupees while during the year 64-65 it was 12.29 lakhs of rupees.

### 2.5—Industries, Mining & Electricity

#### 1) Industries

Marathwada region, which lacks in National resources, offers little scope for the growth of resource-based industries. Basically this region is predominantly agricultural in nature, and this accounts for scope for starting agriculture based industries. Due to continued neglect in the past, very little progress has been achieved in the field of industrialisation in the region and this region constitute industrially as the most backward part of the State. The proportion of working factories and employment works out about 2.6% and 6.9% of the total number of working factories and employment in the State in the year 1963. Low proportion of employment in industries in the region is again reflected by the fact, that this region accounted for 228 factory workers per lakh of population only as against the State ratio of 2171 workers per lakh of population in the State.

During the year 1964, there were 233 working factories in the region. Aurangabad district accounted for the highest number of working factories (101) comprising of ginning and pressing, oil mills, silk factories, tanning industry, wool, etc. Parbhani district followed next in having 43 factories comprising mostly ginning and pressing factories, oil mills, etc. Nanded district had 36 working factories in the year and those comprised of mostly flour mills, ginning and pressing factories, dal mills, etc. Bhilsa and Cambay respectively accounted for 25 and 24 number of working factories mostly consisting of oil mills. Of the total employment potential by working factories in the region, the maximum proportion of 40.60% workers were employed in Aurangabad district during 1964. Nanded district having 33.29% of the total employment in factories in the region was next to follow. Cotton, ginning and bailing factories formed the major group of organised industries in this division and accounted for 41.20% of total number of factories and 26.11% of total number of workers. The other important type of industries are oil mills, gur factories and dal mills which respectively accounted for 18, 4 & 2% of the total employment.

#### 2) Electricity

Power is one of the essential prerequisites of industrial expansion. Prior to the formation of bilingual Bombay State, the

benefits of electricity were restricted to a few towns and fewer villages. The supply was made by private companies by installation of small power stations which were quite uneconomic. Among the power projects, a scheme for supply of electricity from Yeldari Dam as a Hydro Electric Project on River Purna near village Yeldari in Parbhani district was taken up as a spill over scheme in Third Five Year Plan. The work of earthen dam at Yeldari was started on <sup>28</sup>28/1/1958 and the masonry dam work was started on 12/12/59. The project as revised consists of construction of a power generating unit at the toe of the irrigation dam at Yeldari across Purna river in Godavari basin in Jintur taluka of Parbhani district. The project is estimated to cost Rs.172 lakhs with an installed capacity of 25000 kw. This project is expected to cater to the power demand of Aurangabad division. At present electricity is supplied from Paras in Akola district to Aurangabad, Parbhani, Nanded and Bhir districts and to Ahmadnagar and Kalan taluka of Osmanabad district. There is yet another proposal to set up a thermal station at Purli in Bhir district the completion of which is expected to change the face of the division as an industrial tract. The figures of consumption of electricity according to different purposes, during the year 1961-62, 1962-63 and 1963-64 are given in the following table:-

Table No-II-2

Electricity generated and consumed in Aurangabad region.

Year.	KWH generated (in 000 KWH)	Total consumption KWH (in 000 KWH)
1961-62	38,82	37,00
1962-63	1,03,60	83,93
1963-64	1,60,72	1,33,61

The total number of villages electrified in this division in each district as on 31/3/65 was as follows:-

Table No.II-3

No. of villages electrified in the districts of Aurangabad region as on 31-3-65.

District.	No. of villages electrified.
1. Aurangabad.	74
2. Parbhani	25
3. Bhir	20
4. Nanded	59
5. Osmanabad	32
<b>Aurangabad region.</b>	<b>210</b>

## 2.6 - Co-operation

As in the State, the cooperative movement in the region was started initially to benefit the agricultural sector. Even though agriculture continues to be the dominant sector, under the cooperation fold, the movement is now extended to benefit other fields of economic activities such as marketing, processing, housing, etc.

Till about State Reorganisation in 1956, the Cooperative movement was a plant of slow growth, it has got momentum during the period after 1956 till today. There were in all 6598 societies of all categories during 61-62 with a membership of 521568 in the region. The number of societies rose to 7424 covering a membership of 738809 in the year 64-65. Thus during the period of five years i.e. 1961-65, the societies increased by <sup>9.63</sup>43.51% and whereas the membership registered an increase by <sup>51.83</sup>41.65%. During the year 1961-62 the share capital of these societies was to the tune of Rs. 346.17 lakhs whereas during 64-65 it increased to Rs. 854.76 lakhs thus showing an increase of 146.92 % over the year 61-62. Similarly the working capital of the societies also reported increase from 1711.62 lakhs in 61-62 to Rs. 5131.20 lakhs in 64-65, showing a percentage rise of 199.79.

The Cooperative movement still continues to be predominantly credit movement. With increased participation of cooperative sector in providing finance for agricultural requisites and land development measures, as well as for marketing and processing the amount of loans advanced through Central Cooperative Banks and Land Development Banks, increased considerably in recent years. During the year 64-65, the total loan advanced <sup>in the region</sup> under cooperative sector was to the tune of Rs. 23.94 crores, as against Rs. 11.15 crores in 61-62.

The primary agricultural societies still constitute the largest single group of societies and accounted for 68.71% of the total number of societies of all the types in the division in the year 64-65. The other type of societies in the region mainly include, agricultural processing societies, credit resource societies, service resource societies and housing societies.

## 2.7 - Medical & Public Health

According to 1961 census, 4488 persons were engaged in medical and public health profession. Out of these 37.78% were physicians and doctors. The number of physicians and surgeons and dentists per lakh of population of the division was <sup>14</sup>12 persons in rural

area and <sup>115</sup>45 persons in urban areas, thus explaining the need for more doctors in rural areas.

At the end of 1964, there were 10 hospitals, 143 dispensaries, 19 maternity houses, 5 health centres besides 69 primary health centres. On an average there were 22 beds per lakh of population in the year 60-61 and this number increased to <sup>27</sup>24 per lakh of population in 1964 as a result of increased medical amenities provided.

### 2.8 - General Education

Compared to other region of the State, Marathwada is particularly backward in the sphere of education due to continued neglect and misrule in the past. During the second and particularly in the third Plan period, greater attention was paid for development and promotion of education in the region. As a result of these efforts the percentage of literacy in the region rose from 9.2 in 1951 to 16.3 in 1961. The percentage of literacy among male and female were found to be respectively 26.45 and 5.75 according to 1961 census. Amongst the literates 53.14% of the literates were without any educational level, 17.93% were having education upto primary level, while only 28.93% of the literates were Metric and above. In spite of progress achieved, the literacy percentage in the region is observed to be low compared to the rest of the State as a whole.

There has <sup>been</sup> remarkable progress made in regard to availability of educational facilities at all levels of education, in recent years. The number of primary schools in the region recorded increase from 57,04 in 61-62 to 72,68 in 64-65 with the result that the number of students attending primary education rose by 27.58% during the period of 61-65. By the end of <sup>March</sup> 1965, only 9% of the total villages in the region were without primary schools.

Similar progress was achieved in the field of secondary education. The number of secondary schools in 64-65 were 522 as against 286 in 61-62. On an average there was one secondary school, <sup>serving</sup> a population of 12063 thousand in the region. The enrolment of students in the secondary education in 65-66 recorded a sharp increase of 84.60% in 61-62.

The number of higher institutions and institutions for special education were 36 and 34 in 64-65 in the region. The number of students studying higher education rose by 96.75% in the period

from 1961 to 1965. It was significant to note that the proportion of female students to the total students registered phenomenal increase from 22.48% in 61-62 to 23.94% in 64-65.

## 2.9 - Transport & Communication

Lurgabad division is very poorly served by transport and communication facilities due to negligence of the past regime with the result that it has indirectly hampered the growth of industries. It is no where in the vicinity of the expectation of either the Kargur Road Plan or its successor Plan called the "New Road Development Plan", based on the report on road development prepared by a committee of Chief Engineers of five States with the Consultant Engineer (Road Development) to the Govt. of India convened in 1957. The Railway traffic also is greatly limited on account of the fact that three different gauges operate in this division. The total length of broad-gauge as on 31st March 1964 in this division was 197 kilometres, whereas the metre gauge line had a total length of 676 kilometres. The narrow gauge which operates only in Osmanabad district had a total length of 50 kilometres as on 31st March, 64. In so far as road mileage is concerned, there was on 31st March, 64 - total cement concrete road length of 83 kilometres, 1056 kilometres black topped, 2879 kilometres of water bound macadam road and 851 kilometres of lower types of road. Thus, total road length of this division is 4869 kilometres. The length of Central Highways as on 31st March, 64 in this division was 79 kilometres whereas the State Highways covered a total length of 2287 kilometres. Roads by local authorities measured 2419 kilometres. Communication facilities happen to be very meagre particularly in Parbhani district which had an extra municipal road length of 645 kilometres on 31st March, 64 although a net work of roads in all the districts is desirable as soon as possible, to usher in an industrial era. Under the nationalised road transport, considerable progress has been achieved since 61-62.

The State Transport buses were operating on 178 routes with distance of 15 thousand kilometres during 61-62. In 63-64, the nationalised transport covered 254 routes with a distance of 21.1 thousand kilometres. During 63-64 the number of vehicles on road per day were 303 as against 251 in 62-63. About 78.7 thousand

passengers travelled by State Transport buses per day during 63-64, whereas 52.3 thousand travelled per day in 62-63.

There is only one air port at Chikalthana in the vicinity of Aurangabad town in Aurangabad district at a distance of six miles by connecting Bombay and Nagpur ~~ABX~~ daily flights.

### 2.10 - Local Bodies

The new form of local self Govt. which came into existence after implementation of Zilla Parishad and Panchayat Samiti Act of 1962, is a three tier system, with gram panchayat at the village, panchayat samiti at taluka level and Zilla Parishad at district level. The municipalities continue to be in charge of urban areas.

The table No.10.1 presents income and expenditure of village panchayat, panchayat samities, and zilla parishads and municipalities.

#### Zilla Parishad

The total revenue receipts of the zilla parishads in the region for the year 64-65 were Rs.1296.81 lakhs. The major portion of the receipts is the receipts from the Govt. ~~which constitutes of total revenue receipts of all the Z.Ps. in the region.~~ The total revenue expenditure of Z.Ps. was Rs.1213.88 lakhs during the year 64-65.

#### Village Panchayats.

The number of village panchayats in the region are 4788. The income of V.Ps. increased from Rs.81.32 lakhs in 61-62 to Rs.175.55 lakhs in 64-65. The average income per V.P. in the region worked out to Rs.3666.50 in the year 64-65.

#### Municipalities.

There are in all 53 municipalities and cantonment boards in the region. The total income of these local bodies in the year were Rs.158.04 lakhs. Unlike the V.Ps. and Z.Ps. the main source of income of municipalities is from self raised resources i.e., taxes and fees.

### 2.11 - Planning & Community Development

The first two Plans in the Aurangabad region were implemented on a smaller out-lay and development programme under <sup>these</sup> the plans mainly aimed at improving agricultural production. On account of relatively low allocation of Plan outlay, in the first two Plans, there was little progress achieved in the fields other than agriculture.

In view of this higher plan allocations were made for overall development of the region during the Third plan period. Out of the total outlay of 418 crores for the State, during the third plan period, Rs.68.20 crores were earmarked for this region. The per capita plan outlay for the region worked out to Rs.108. Out of the total plan outlay Rs.41.77 <sup>crores</sup> were provided for divisional level while remaining Rs.26.47 crores were earmarked for district level schemes.

In this plan period greater emphasis was given on development of power and irrigation projects in the area, as this programme alone accounted for nearly 47% of total plan outlay for the region. Social services programme was next in importance having accounted for nearly 20% of total plan outlay. Due priority was also accorded for the development under Agricultural programme, Cooperation and Community Development and Transport & Communication which respectively accounted for 13.5, 10.5 and 9.3 per cent of the total plan outlay.

By the end of the year under review i.e. 64-65 which was the fourth year of Third Five Year Plan, about 67% of the Plan provision for the divisional level schemes was utilised on implementation of various schemes. The expenditure, booked on implementation of all district level schemes including those transferred to Zilla Parishads was 64% of respective Plan provision. Thus divisional and district level schemes together accounted for 66% of total plan provision by the end of fourth year of plan period.

By the end of 1964, entire rural area was covered under C.D. programme in the region. Out of total 77.50 C.P.A. blocks functioning during 1965, 45.50 were in stage-I, 28.00 in stage-II and 4.00 in stage-III. Percentage of rural population covered under stage-I and stage-II and post-stage-II blocks were respectively 56, 40 and <sup>4</sup>/<sub>4</sub> percent of total rural population. There were no tribal development block and multipurpose block, functioning in the region.

#### 2.12 - Price Trend

In order to assess the price trend of major commodities, the Bureau of Economics & Statistics is collecting the price data from the selected centres of rural and urban areas of the State since 1962. The price data of essential commodities, in this connection, is reported for the selected centres in the districts of this region in table No.12.1. After Chinese invasion in October 1962, there was

a temporary fall in the prices of all the commodities followed by rising trend. This upward trend in prices of major commodities was continued due to scarcity of agricultural production resulting from adverse agricultural conditions. No further decline of prices was observed in the prices for the subsequent period.

2.13 - Miscellaneous

The last group of statements (13.1 to 13.12) presents data on miscellaneous items relating to strength of police force and crime statistics, cases disposed off in civil and criminal courts, cinema statistics, strength of Govt. employees, statistics relating to banks, Jt. Stock companies, insurance policies, small savings, land revenue collection, excise, sales tax, entertainment tax, statistics regarding documents registered and value of property transferred. The following are some of the important statistics concerning above items:

Police

The strength of police force showed slight increase in number in the year 1964-65 compared to the previous year. The cost of police force consequently showed increased from Rs. 62.8 lakhs in 63-64 to 75.3 lakhs in 64-65.

Judiciary

The total number of cases disposed off by judicial courts were 0.44 lakhs in the year 1964, out of which 74.27% were pertaining to criminal offences.

Recreation

The number of cinema houses in the region were 66 in 64-65 with total seating capacity of 32898 per show.

Census of Govt. employees

According to census of Govt. employees 1961, there were 37646 Govt. employees in the region, out of which 97.02% were drawing pay below Rs.300 p.m.

Banking

March,

At the end of 1964 there were 119 banking offices in the region,

Insurance

According to statistics pertaining to insurance policies for Aurangabad region there were 10690 policies issued in the year 64-65 as against 19641 in the previous year. The total amount insured by the L.I.C. in 64-65 was 4.40 crores which shows a slight increase over the amount insured in the previous year.

Small savings

The gross collection of small savings for 64-65 amounted to ₹.2.53 crores against a target of 62 lakhs. It was also observed that there were some heavy withdrawals against the investment made in the year 64-65.

Land revenue

Land revenue collections in the year 64-65 shows that against a demand of 1.73 crores about 1.52 crores were collected.

Income from registration of documents & property transferred

In the year 64-65 property worth ₹.5.11 crores have been transferred. Income accrued from registration of documents and property transferred amounted to ₹.4.33 lakhs.

General Election

The maximum <sup>percentage</sup> number of votes polled in the total electorate was 70.0 in Nilanga constituency of Osmanabad district and minimum <sup>percentage</sup> of votes polled in the total electorate was 34.2 in Jalna constituency of Aurangabad district.

Part - II

DIVISIONAL STATISTICAL ABSTRACT.

1964-65

PART - II

C O N T E N T S

A - Statistical Abstract for the Year 1964-65

Sr.No.	Table No.	Subject	Page No.
		<u>1. Climate:</u>	
1.	1.1	No. of Rainy days and Total Rainfall at selected Centres.	10
2.	1.2	Mean, Mean Maximum, Mean minimum Temperature at selected Centres.	9
		<u>2. Area and Population:</u>	
3.	2.1	District-wise Rural and Urban Population according to 1961 Census & variations with 1951 Census.	11
4.	2.2	District-wise classification of villages according to Population ranges in 1961 census.	13
5.	2.3	District-wise classification of Towns to population ranges in 1961	14
6.	2.4	No. of workers in each District, according to 1961 Census.	15
7.	2.5	No. of Non-workers in each District according to 1961 census.	16
8.	2.6	Scheduled Caste & Scheduled Tribes.	17
9.	2.7	Population in Urban Areas according to 1961 Census	18
		<u>3. Agriculture:</u>	
10.	3.1	Land Utilisation	20
11.	3.2	Area under different Crops in each District.	22
12.	3.3	Yield per Hectare and outturn of Principal Crops	24
13.	3.4	Area Irrigated by different sources in each Dist.	28
14.	3.5	Area Irrigated under different crops in each District.	29
15.	3.6(a)	No. of Irrigation wells in each District.	31
	(b)	Minor Irrigation works	32
	(c)	Major & Medium Projects in Aurangabad Division.	34
16.	3.7	Percentage distribution of Households engaged in Cultivation classified by Interest in Land and Size of Land cultivated (Based on 20 percent sample households).	39
17.	3.9	Agricultural Implements in each District in 1961	42
18.	3.10	Famine, Scarcity and akin to Scarcity data,	43
19.	3.11	Progress under Soil Conservation & Land Reclamation	44
