My dear Pantji,

In continuation of my letter No. COPP/MIT/93/58 dated the 10th April 1959, I have great pleasure in forwarding herewith the Main Report of the Minor Irrigation Team on Mysore.

I understand that the experiments on the Desilting-*cum*-Reclamation scheme as proposed in the Interim Report are still in progress and it is hoped they will prove a success, in which event desilting measures can be adopted on a large scale in the Third Five Year Plan.

With regards,

Yours sincerely,
