	Zone 1	153-190
	Zone 2	191-230
	Zone 3	231-268
	Zone 4	269-288

Explanatory Note to Part II-B Tables

1. In Part II-A tables, data relating to the land utilization, cropping pattern, family size, asset holding etc. were presented for the sample farms. The present volume of Part II-B tables covers input-output data of these farms. Crop-wise input-output information for each farm is presented from page 1 to 152 and pages 153 to 288 are devoted to data regarding the farm business. A basic outline of the study though discussed earlier in this report, is presented briefly in the section 2 below for ready reference.

2.1 The data relates to the Farm Management Study in Ahmednagar District, Maharashtra State, for the year 1967-68. The district was divided into four zones from which a sample of 150 farms was taken from 15 villages in the district, each village contributing 10 farms. These farms were selected from five size groups of holdings, common to all villages. The analysis, however, is made for 136 farms from 14 villages as data were inadequate for the remaining 14 farms. The distribution of these 136 farms over zones, villages and size groups is presented in Table 2.1(b) while Table 2.1(a) shows the distribution of villages over zones.

Table 2.1(a)

Distribution of Villages Over Zones

Zone	No. of Talukas included	No. of villages selected
1	3	4
2	4	4
3	4	4
4	2	2
Total	13	14

Table 2.1(b)Distribution of Sample Farms Over Villages, Zones and Size Groups

Zone	Village	No. of farmers in size group (ranges in hectares)					Total

District Total	14	34	29	25	27	21	136

2.2 The holding size-group ranges from which the farms were selected from each village are as follows:

<u>Size Group</u>	<u>Range (in hect.)</u>
I	4.24 and below
II	4.25 - 7.07
III	7.08 - 10.71
IV	10.72 - 16.38
V	16.39 and above

3. The abbreviations used in these tables for the first 152 pages are explained below starting from the first line of print.

1. The data are presented farmwise. The first line of print indicates the zone number, the village number and the farmer (or the farm) code number. A five digit code number is allotted to each farm. The first digit from the left is the zone number. The second digit denotes the village number in that zone, the third digit denotes the size-group number, the fourth digit is for the number of farms in that size group (in that village) and the fifth digit indicates the serial number of the farm in that size group. For example, Code No. 32521 indicates that the farm is from the third zone and second village, belongs to the fifth size group which has two farms in all (in that village) of which this farm is the first one.

2. The second line of print indicates the holding size (HOLD-SIZE), the gross cropped area (G.C.A.), the gross irrigated area (G.IRCTD.A) which are in hectares and the irrigated area (~~G.IRCTD.A~~) which are in hectares and the number of crop-heads (NO.OF CROPS) which go to form the ~~gross~~ gross cropped area.

3. The third line is for the name of the crop. Seven crops are presented separately: jowar, bajra, wheat, gram, cotton, sugarcane and groundnut. This ordering, which is according to their area in the sample farms, is nearly the same for the district population of farms. The rest of the crops are grouped into two

other categories 'others' and 'standing crops' (STDG-CRS). In the last category are crops that are included in the gross cropped area but remain to be harvested. This category mostly consists of the sugarcane crop. The seven distinct crops mentioned above cover more than 93 per cent of the sample gross cropped area.

The crops are further distinguished as irrigated or unirrigated and this distinction is carried to the category 'others' also. Further, if a crop is of improved or hybrid variety it is shown separately as 'improved'. For example, an irrigated hybrid jowar is distinguished from an irrigated jowar crop. It should be noted that the 'NO. OF CROPS' refers to the separate crop-heads under which information is presented. For example, for farm 11121 on page 1, the six crops include 'others-irrigated', 'others-(unirrigated)' and 'standing crops-irrigated' as three separate crop-heads.

The rest of the information presented on each page is divided into five major heads - crop area, labour inputs, other inputs, overheads and output. In all, 39 items are recorded for each crop. A single page covers at the most 8 crops. A farm with more than 8 separate crop-heads is carried to the next page with a continuation remark. Two farms, however, do not appear on the same page.

The item-wise explanation of the abbreviations used is as follows:

Item 1 : CROP-AREA : The area under a crop is in hectares. The total area under these crops is equal to the gross cropped area (G.C.A.) but in some cases differs by 0.02 hectares due to rounding up errors.

Item 2 : MAN-DAYS : Number of man-days put in by the family and exchange labour. An eight hour day is assumed to convert man-hours into man-days. A female labour day is considered an equivalent of 2/3 of a man-day and a child labour day an equivalent of 1/2 of a man-day.

Item 3 : BLK-P-DAYS : Number of bullock pair days of owned (and exchange) bullocks.

Item 4 : AFS-DAYS : Hour-days put in by the annual farm servants.

Item 5 : HIRED-MD : Number of man-days hired.

- Item 6 : WAGES (RS.) : Wages paid for hired man-days.
- Item 7 : HIRED-BD : Hired bullock pair-days.
- Item 8 : WAGES (RS.) : Wages paid for the hired bullock pair-days.
- Item 9 : SEED-(O) : Quantity in kilograms of owned seed for the main crop. For sugarcane crop it is in hundreds of sets. The quantities for 'others' and 'standing-crops' are often equated to zero to indicate that there is no valid addition over crops. The value for these two categories is, however, recorded in item No. 10.
- Item 10 : VALUE (RS.) : Value of item 9.
- Item 11 : SEED (P) : Quantity in kilograms of purchased seed of the main crop.
- Item 12 : VALUE (RS.) : Value of item 11.
- Item 13 : SEED-2 : Quantity in kilograms, owned as well as purchased, for the secondary crop.
- Item 14 : VALUE (RS.) : Value of item 13.
- Item 15 : IRRGN-EXP : Irrigation expenditure in rupees. This includes the expenditure on oil and lubricants for oil engine, electricity charges for electric motor and the hiring charges for engine or motor. If a crop is wholly irrigated by the bullock-lift, no expenditure would be recorded under this head.
- Item 16 : FYM (O) : Quantity in cartloads of owned farmyard manure.
- Item 17 : VALUE (RS.) : Value of item 16.
- Item 18 : FYM (P) : Quantity in cartloads of purchased farmyard manure.
- Item 19 : VALUE (RS.) : Value of item 18.
- Item 20 : OILCAKE : Quantity in kilograms of oilcake.
- Item 21 : VALUE (RS.) : Value of item 20.
- Item 22 : CHEM-FERT. : Quantity in kilograms of chemical fertilisers.
- Item 23 : VALUE (RS.) : Value of item 22.
- Item 24 : MISC-EXP : Miscellaneous expenditure in rupees (mainly pesticides, insecticides etc.)

- Item 25 : LAND-REV : Land revenue in rupees.
- Item 26 : OTHER-TAX : Other taxes paid (in Rs.)
- Item 27 : IRG-E.P(D) : Depreciation charge (in Rs.) on account of irrigation equipment.
- Item 28 : IMPLMTS(D) : Depreciation charge on account of implements.
- Item 29 : SHED (D) : Depreciation charge on account of storage shed.
- Item 30 : INT.W.CAP : Interest on working capital.
- Item 31 : RENT : Rent actually paid for leased-in land (value in Rs.)
- Item 32 : RENT-IMPTD. : Imputed value of rent (in Rs.) of owned land.
- Item 33 : INT.F.CAP : Interest on fixed capital.
- Item 34 : MAIN-CROP : Quantity of output in quintals, of main crop. For the sugarcane crop, output is expressed in metric tons. For the crop-category 'others' whenever more than one crop is included the quantity is equated to zero to show there is no valid addition. The value of this combined output is shown by item No. 35.
- Item 35 : VALUE (RS.) : Value of item 34.
- Item 36: BY-PRODUCT : By-product quantity is in hundreds of bundles for jowar and bajra and in cartloads for wheat.
- Item 37 : VALUE (RS.) : Value of item 36.
- Item 38 : S-CRCP : Quantity in quintals of secondary crop.
- Item 39 : VALUE (RS.) : Value of item 38.

4. From page 153 onwards, input-output information for the farm business as a whole is presented with some minor changes in the item-wise presentation. Irrigated and unirrigated farm business is shown separately along with the combined farm business. The number of items is reduced to 33 (from the previous list of 39 items) as data for some items are not additive. As explained in section 3 in Item 1 above, for a given farm, total of area under the crops is the same as the gross cropped area mentioned against G.C.A., with a margin on either side, of 0.02 hectares which is due to rounding up errors. Explanations for the changed abbreviations are as follows:

- Item 9 : SEED(O)-RS : Value of owned seed for the main crop (in Rs.)
- Item 10 : SEED(P)-RS : Value of purchased seed for the main crop.
- Item 11 : SEED-2-RS. : Value of seed, owned as well as purchased, for the secondary crop.
- Item 31 : MAIN-CR-RS. : Value of the main crop.
- Item 32 : BY-PR-RS. : Value of the by-product.
- Item 33 : S-CR-RS. : Value of the secondary crop.
