## Political Sketches

by JEAN & JEROME THARAUD

*translated by* A. S. MOSS-BLUNDELL

This book consists of a series of articles, by two famous Parisian journalists, on the Riff war in Morocco and the present régime in Spain, which throws light on the Military Directorate of General Primo de Rivera, Marquess de Estella. The brothers Tharaud had interviews with His Majesty the King of Spain, the General himself, and other notabilities of the rival factions, and afterwards wrote down their impressions. These interviews are at once shrewd criticisms of character and of the situation in general, as well as gems of literary expression remarkable for a buoyant freshness of style.
