SEASON AND CROP REPORT  
OF  
GUJARAT STATE

FOR THE YEAR 1974-75

DIRECTORATE OF AGRICULTURE  
GUJARAT STATE, KRISHI BHAVAN  
PALDI : AHMEDABAD-380006

SEASON AND CROP REPORT OF GUJARAT STATE FOR THE  
YEAR 1974-75

**Introduction.**

The season and Crop Report is an annual publication of the Directorate of Agriculture Gujarat State, Ahmedabad. This is the fifteenth report brought out in the series after Formation of Gujarat State. This report deals with agricultural statistics of the Gujarat State. It gives in detail information regarding seasonal conditions, rainfall, land utilization, area irrigated crop wise and source wise and total area under each crop alongwith the out turn of different crops. Information on agricultural wages (daily) and farm (harvest) prices alongwith livestock situation of the state during the year under report is also incorporated in this report.

Two years data at a glance for the state as a whole have been shown in summary tables while districtwise data for the year 1974-75 are shown in statistical tables. This report is prepared on the basis of standard forms prescribed by the Directorate of Economics and Statistics, Government of India, New Delhi.

(R L. PATHAK)  
Director of Agriculture,  
Gujarat State, Ahmedabad.

**Season and crop report for the year 1974-75**

**Contents.**

Sr. No. (1)	Items (2)	Page No. 3
1.	Season for the year 1974-75	1
2.	Rainfall	2
3.	Land utilisation	2

30	Classification of reporting area for land utilisation purpose for the year 1974-75.	
31	Percentage not area irrigated by different sources during the year 1974-75.	
32	Bar chart showing crops wise irrigated and unirrigated area during the year 1974-75.	
33	Area under principal crops in Gujarat State for the year 1973-74 and 1974-75.	
34	Graphs showing fluctuation in area under Jower. Bajri, Cotton and Groundnut	

## SEASON FOR THE YAEAR 1974-75.

The onset of the monsoon during the agricultural year 1974-75 can be said to be rather weak and late than usual. The premonsoon showers however, were received in the second fortnight of May at many places in Gujarat State. Where ever there was adequate rainfall for sowing, sowing was carried out. First rainfall of the season was received during the week ending 3rd July all over the State except entire Kutch district and in some parts of Bhavnagar, Jamnagar, Rajkot, Mehsana, Panchmahals, Sabarkantha, Banaskantha, Kaira and Broach dists., and Jafarabad taluka of Amreli district and Dhandhuka taluka of Ahmedabad district. Thus, sowing was done in areas where ever adequate rainfall was received. Even during the fortnight ending 10th July in whole of Kutch district, Malia, Morvi, Wankaner and Paddhari talukas of Rajkot district, dwarka, Jodiya and Jamnagar talukas of Jamnagar district and santhalpur taluka of Banaskantha district did not receive adequate rainfall for sowing. While in Dhanera, Wao and Tharad talukas of Banaskantha district, only 10.0% of the area could be sown. Thereafter there was a dry spell in almost allover the State except some pockets of south Gujarat here and there for three for three weeks. In the first week of August, there was rainfall at some places but it was notadequate in parts of Jamnagar Surendranagar, Junagadh Rajkot, Mehsana and Banaskantha districts. The dryspell continued making the situation very grave. In the third week of August, there was again rainfall in most of the places but it was notadequate in quantity and the crops continued to suffer from draught condition all over the State. The work of transplanation of paddy was held up all over the State except in South Gujarat.

During the fortnight ending 9th October, 1974 there was rainfall more than 25.00 m.m. in about 100 talukas of the State. This rainfall has not helped in improving the condition of bajra crop as the crop was practically ready for harvest during this period. This rainfall in September and October helped in improving the condition of standing crops like paddy, and cotton and to some extent to groundnut crop. It also helped kharif jowar, and sowing of dry wheat and gram crops in rabi season. Thus, on the whole, the situation in the State was very grave in view of the total failure of monsoon in some districts and partial failure of monsoon in the remaining parts of the State. The prospects for kharif foodgrain production and groundnut production in the State are disappointing and were even no where near that of the drought year 1972-73.

Harvesting of kharif crops was started from 1st fortnight of Sept: and was continued till the end of November. Sowing of rabi crops was started during the second fortnight of October and continued till the first fortnight of December.

No serious pests and diseases have been reported during the year under report except heliothis, jassids, and Boll worms On cotton in Broach, Kaira, Baroda, Gadnhinagar, Surat, Amreli Junagadh and Panchmahals districts. Downy mildew on Bajri crop is reported in Ahmedabad, Banaskantha, mehsana, Sabarkantha Panchmahals, Gadnhinagar, Kaira, Amreli and Bhavnagar dists. and incidence of aphids and jassids on groundnut crop is reported in Rajkot, Bhavanagar, Junagadh, Panchmahals and Broach districts. Similarly incidence of aphids in rape and mustard crop is reported in Ahmedabad Banaskantha, Sabarkantha, and Mehsana district.

**Rainfall**

District-wise rainfall (in m.m.) received during the year 1974-75 is shown in table No.1 The districtwise annual average rainfall and district normal rainfall are depicted in barchart (Fig. 1).

**Land utilisation :**

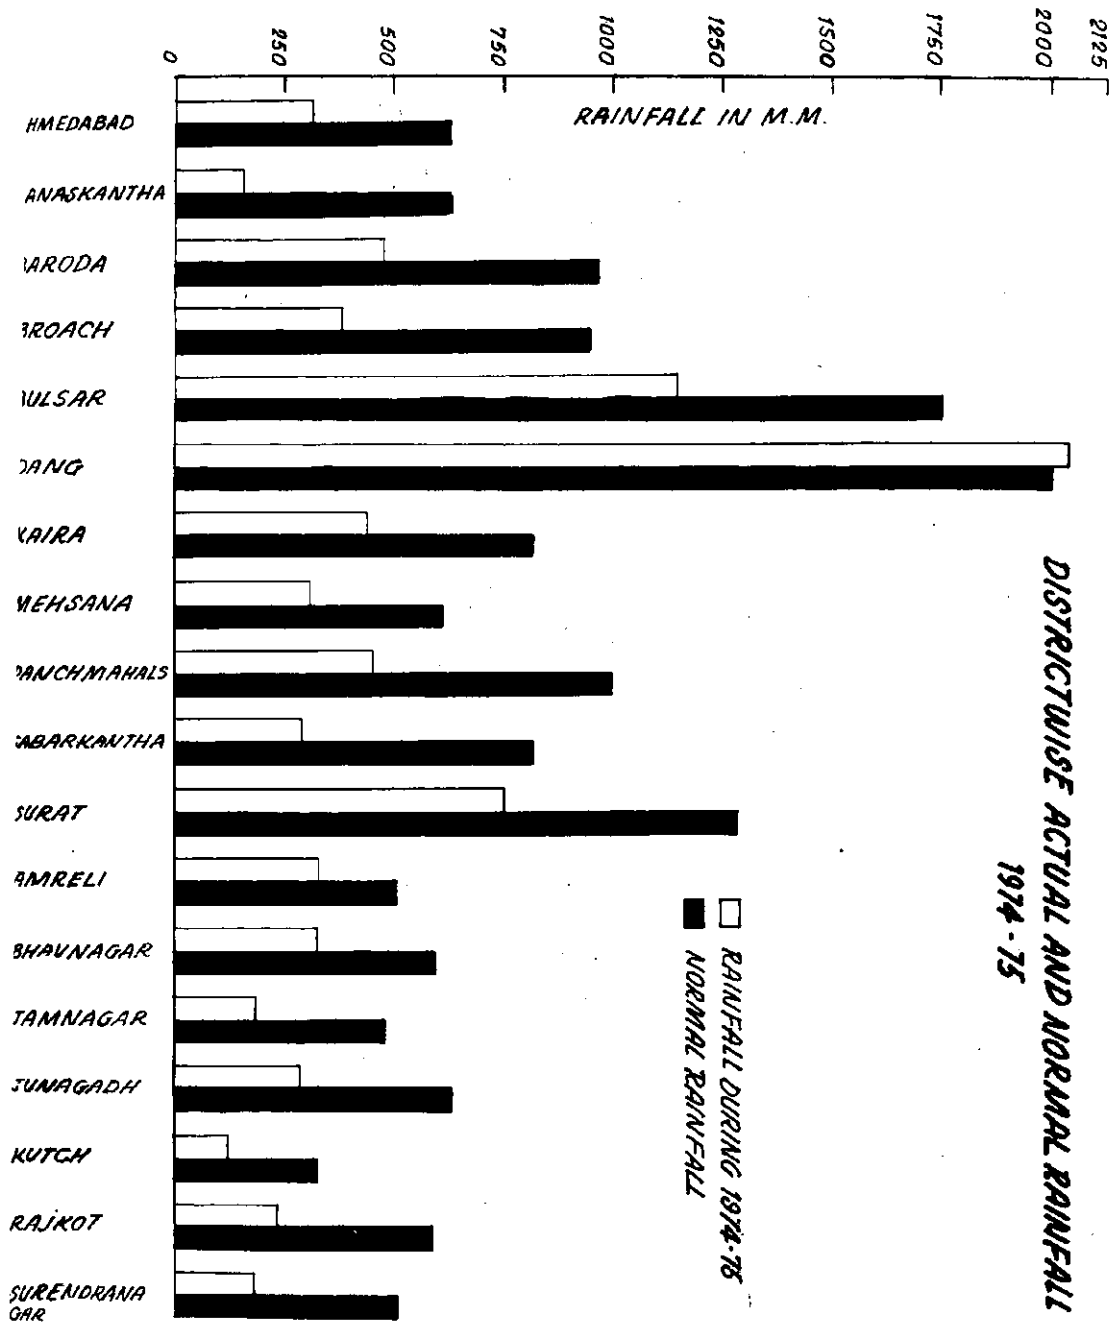

The total geographical area of Gujarat State according to surveyer General of India during the year under report is 19598400 hect. while the total reporting area for land utilization purpose is 18817000 hect. The area under nine standard heads of land use classification alongwith percentage of total reporting area for land utilisation have been shown herebelow :

Sr. No.	Category	Area in '00 hac.	Percentage of the total reporting area for land utilization purpose.
1.	Forest	18283	9.72
2.	Barren and unculturable land	26296	13.98
3.	Land put to non agricultural use	10588	5.63
4.	Culturable wate	20104	00.68
5.	Permanent pasture and other grazing land	8568	4.55
6.	Miscellaneous tree crops and grooves not included in net area sown.	49	0.03
7.	Current fallow.	18483	9.82
8.	Other fallow	3748	1.99
9.	Net area sown (excluding the net area sown of Dangs district)	82051	43.60

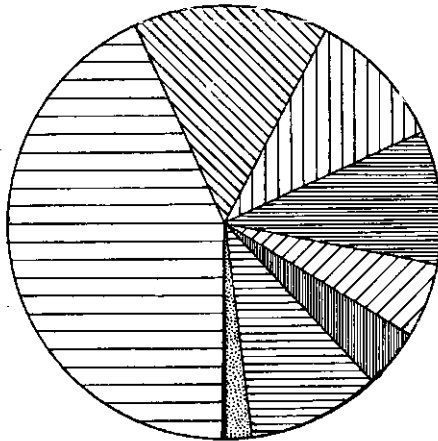

The Pai-diagram showing classification of reporting area for land utilisation purpose during the year 1974-75 is shown in fig.2.

**Forest**

Area under forests include all lands classed as forest under any legal enactment dealing with forests or administrated as forests, whether state owned or private, and whether wooded or maintained as potential forest

**CLASSIFICATION OF REPORTING AREA  
FOR LAND UTILIZATION PURPOSE: 1974-75.**

- ▬ NET AREA SOWN.
- ▨ BARREN AND UNCULTURABLE LAND.
- ▩ CULTURABLE WASTE.
- ▧ FOREST.
- ▦ LAND PUT TO NON AGRICULTURAL USES.
- ▥ PERMANENT PASTURE AND OTHER GRAZING LAND.
- ▤ CURRENT FALLOW.
- ▣ OTHER FALLOW.
- ▢ MISCELLANEOUS TREE GROVE AND GROOVES NOT INCLUDED IN NET AREA SOWN.

**6. Miscellaneous tree crops and grooves not included in the net area sown-**

This class of land includes all cultivable land which is not included in 'net area sown', but is put to some agricultural use. Land under casu-mina trees, thatching grass bamboo bushes and other grooves etc. which are not included under 'orchards' are classed under this category.

Area under this category of land is only 49 (hundred) ha. i.e. 0.03% of the total reporting area of the State.

**7. Current fallow.**

This class of land represents cropped area which is kept fallow during the current year. Land used for raising seedlings but is not cropped during the year under report is treated as current fallow.

Area under this category of land during the year under report is 18483 (hundred)ha. which worked out to 9.82 percent of the total reporting area of the State.

**8. Other fallow.**

(fallow land other than current fallow)

This class of land includes all lands which are taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years. The reasons for keeping such lands fallow may be one or more of the following :

- (1) Poverty of the cultivators.
- (2) Inadequate supply of water.
- (3) Malarial climate.
- (4) Unremunerative nature of farming.

Area under this category of land is 3748 (hundred) ha. which works out to 1.99 percent of the total reporting area of the State.

**Net area sown.**

This class of land represents, the area sown with crops and orchards, counting area sown more than once in the same year only once.

Such type of land during the year under report is 82051 (hundreds) ha. (excluding the net area sown of Dangs districts) which works out to 43.60 percent of the total reporting area. In Kaira, Amreli and Mehsana district net area sown constitutes more than 70% of the reporting area, while in Kutch and Dangs districts net sown area is only 2.4 and 28.6% respectively of the reporting area.

In Jamnagar district, the net area sown is 39.2% of the total reporting area while it is 49.7 percent in Broach and Junagadh districts. In remaining districts, the net area sown varies from 50 to 70% of the total reporting area. Area sown more than once in the State is only 7.82 % of the net area sown during the year under report.

**Area irrigated by different sources :**

Net area irrigated by different sources during the year under report is 13499(hundred) ha. which works out to 16.4% of the net area sown in the State. The percentage of net and gross cropped area irrigated in Gujarat State is as under :

	Area in '00 hac.
1. Net sown area (including Dangs District)	82543
2. Net irrigated area.	13499
3. Net irrigated area, as percentage of net area sown	16.4
4. Gross cropped area	88998
5. Gross irrigated area	15232
6. Gross irrigated area as percentage of gross cropped area.	17.1

The information on source wise net irrigated area and net irrigated area expressed as percentage of total net area irrigated in the State for the 1974-75 is presented in table given below :

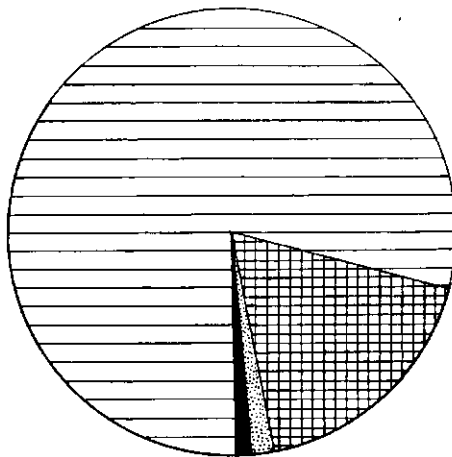

Sr. No.	Source of irrigation	Net area irrigated in '00 ha.	Percentage of total net irrigated area.
1.	Cannals	2266	16.79
2.	Tanks	198	1.47
3.	Tube wells	1668	12.35
4.	Wells	9241	68.46
5.	Other sources	126	0.93
Total:—		13499	100.00

Net area irrigated by different sources during the year under report is depicted in pie diagram in fig....  
District wise distribution of talukas according to percentage gross irrigated area is shown in the statement given below :—

**District wise distribution of talukas according to percentage gross irrigated area-Year 1974-75.**

Sr. No.	District	0.10	10.00	20.00	30.00	40.00	50.00	60.00	70.00	80.00	90.00	Total

17.	Kutch	1	—	1	2	1	—	2	—	1	1	9
18.	Rajkot	7	4	2	—	—	—	—	—	—	—	13
19.	S'nagar	8	1	—	—	—	—	—	—	—	—	9
Gujarat State		86	41	20	12	13	4	4	1	1	2	184
		46.7	22.3	10.9	6.5	7.1	2.2	2.2	0.5	0.5	1.1	

**NET AREA IRRIGATED BY DIFFERENT  
SOURCES DURING THE YEAR 1974-75.**

-  BY WELLS (INCLUDING TUBEWELLS)
-  BY CANALS.
-  BY TANKS.
-  BY OTHER SOURCES.

It can be seen from the above statement that in 46.7% of the talukas, gross irrigated area is hardly 9.9% of the total cropped area while in 22.3% of the talukas, gross irrigated area ranges from 10.0 percentage to 19.99 percent of the total cropped area. It 10.9%, 6.5% and 7.1% of the taluka, gross irrigated area ranges from 20.0 to 29.99%, 30.0 to 39.9 and 40.0 to 49.9% of the total cropped area respectively. In 2.2, 2.2, 0.5, 0.5 and 1.1 percent of the talukas, gross irrigated area ranges from 50.0% to 59.9%, 60.0 to 69.9%, 70.0 to 79.9%, 80.0 to 89.9% and 90.0 to 100.00% of the total cropped area respectively. The high percentage of area irrigated in some of the talukas is attributed to the fact that the year 1974-75 was a scarcity year. In Anjar and Mandvi, talukas of Kutch district and Okhamandal taluka of Jamnagar district. Whatever sowing was done, it was under irrigated condition. Thus in these fallows, the percentage area of irrigated is high. Number of districts and talukas falling in different percentage area classes of gross irrigated area according to source of irrigation is shown in statement given below :

Percentage area under irrigation	All sources		Canal		Tank		Well		Other sources	
	Dist.	Tal.	Dist.	Tal.	Dist.	Tal.	Dist.	Tal.	Dist.	Tal.
0.10 to 9.99	6	86	10	23	10	35	—	3	10	27
10.00 to 19.99	7	41	1	14	2	6	1	5	—	8
20.00 to 29.99	3	20	3	9	—	1	—	5	—	1
30.00 to 39.99	2	12	1	12	—	2	1	6	—	1
40.00 to 49.99	—	13	1	6	—	1	—	4	—	1
50.00 to 74.99	1	8	—	11	—	—	5	28	—	1
75.00 to 100.00	—	4	1	7	—	—	12	133	—	—
<b>Total</b>	<b>19</b>	<b>184</b>	<b>17</b>	<b>82</b>	<b>12</b>	<b>45</b>	<b>19</b>	<b>184</b>	<b>10</b>	<b>39</b>

It can be seen from the above statement that well is the largest single source of irrigation in Gujarat State.

In as many as 12 districts out of 19 districts and as many as 133 talukas, out of 184 talukas, well irrigation accounts for 75.0% of the total irrigated area, while canal as a source of irrigation ranks second. There are 82 talukas, out of 184 talukas in 17 districts of the State in which facility of canal irrigation exists. Out of these 82 talukas, in as many as 64 talukas canal irrigation accounts for less than 50.0 % of the total irrigated area while in 11 talukas, irrigated area by canal ranges from 50.0% to 74.9%, and in the remaining 7 talukas, it ranges from 75.0 to 100.0 of the total irrigated area.

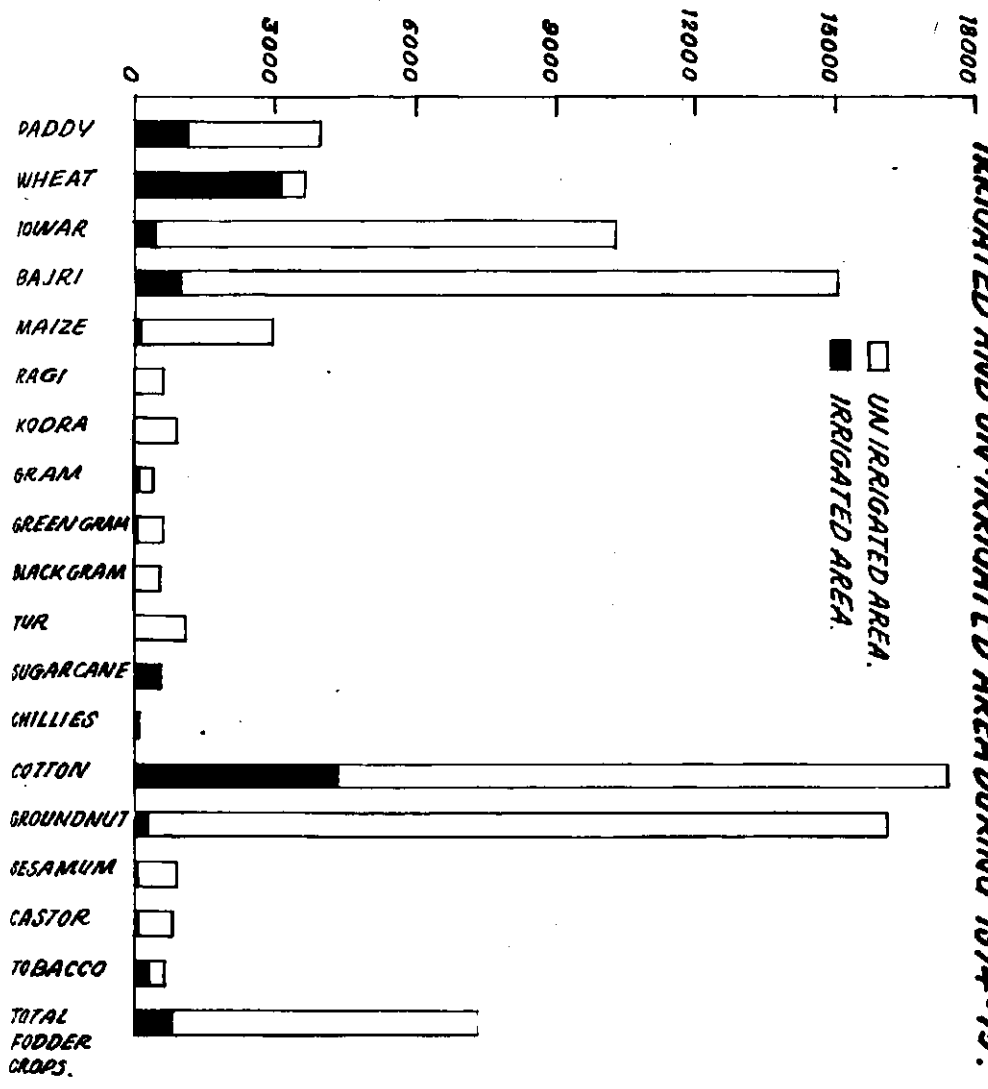

#### 4. Crop wise area irrigated.

During the year under report an area of 15232(00) ha. (17.11% of the total cropped area) received irrigation in the State, while in the previous year, an area of 15913(00)ha. (14.76% of the total cropped area) received irrigation. Thus the irrigated area declined by 4.28% crop wise total area and irrigated area is shown in the statement given below. A bar chart depicting this information is also presented in Fig. ....

Cropwise total area, area irrigated and irrigated area as percentage of total area under the crop for important crops during the year 1974-75.

**FLUCTUATIONS IN AREA UNDER JOWAR, BAJRI, COTTON AND  
GROUNDNUT CROPS IN GUJARAT STATE DURING THE PERIOD  
FROM 1964-65 TO 1974-75.**

5. Jowar, Bajri, cotton and groundnut crops jointly account for 66.2% of the total cropped area during the year under report as against 66.9 of the total cropped area in the State during the previous year. These four principal crops are found to have been grown in almost all the districts of the State. The graph showing fluctuation in area under these crops is shown in fig....

6. Crop wise state average yield per hectare and total outturn during the year under report and previous year have been shown in summary table 'E'. While farm harvest prices of principal crops and month wise daily agricultural wages for the year 1973-74 and 1974-75 are shown in summary tables F & G. Information on number of livestock population and agricultural machinery as per 1972. live stock census have been shown in statement No. H.

Summery Table-A.
