## PREFACE

This volume on District Educational Statistics for the State of Assam is the 14th in the series of such volumes which will be brought out for all the States and Union Territories. The main aim is to highlight the inter-district variations in a State by giving educational data at district levels with the help of some important indices such as Enrolment Ratio, Percentage of Trained Teachers, Per-Capita Expenditure and Teacher-Pupil-Ratio etc.

In order to ascertain whether the educational imbalances have widened or narrowed down with time the data for the year 1976-77 has been analysed and compared with that for the year 1970-71.

I take this opportunity to express my appreciation of the co-operation received from the Director of Education, Assam and the project staff of the Planning, Monitoring & Statistics Division who have prepared this report.

## INTRODUCTION

Regional imbalances do exist in the field of Educational Development just as in Unbasisation, Industrialisation, Distribution of Income and Wealth etc. with a view to highlight the Regional imbalances in the educational sector, the Ministry of Education & Culture brings out the publication "Educational Statistics - District-wise" quinquennially.

2. A Volume of this nature was first published by National Council of Education Research & Training in 1960-61. Thereafter it was decided that such reviews will be brought out in respect of each State every five year by the Ministry of Education & Culture. Accordingly, the reviews for the year 1965-66 were brought out by this Ministry in respect of some of the States.

3. For making inter-district comparisons possible, some important indices such as Enrolment Ratios, Percentage of Trained Teachers and Per-Capita Expenditure on Education have been worked out. These indices show wide range of variations between the Districts and hence the need for formulating educational plans at the District level.

II - AREA AND POPULATION

4. The Total Area of Assam State before re-organisation was 99,623 Sq. Kms. The Areas of Mizo Hills and Shillong City having been taken out of it, the re-organised Assam State's Area was 78,523 Sq. Kms. In 1970-71, Assam had 11 District as against 10 in 1976-77. Further an additional District of Dibrugarh comprising of 7,023 Sq. Kms. was carved out of the erstwhile Lakhimpur District. The Areas of the remaining 8 Districts remained the same as these were in 1970-71. In 1977 the District-wise Area varied from 4,890 Sq. Kms. in North Cachar Hills to 10,359 Sq. Kms. in Goalpara.

5. The Population of Assam was 150.49 Lakhs in 1971. For 1977, the estimated population for re-organised Assam was 176.80 Lakhs (93.14 Lakhs Males and 83.66 Lakhs Females) and the lowest in North Cachar District (7.6 Lakhs) in 1971. In 1977 also the estimated population varied widely among the re-organised Districts from 26.90 Lakhs in Goalpara District to 9.25 Lakhs in North Cachar Hills.

6. The overall density of population per Sq. Km. was 151 which is estimated to have increased to 226 in 1977. The density of population per Sq. Km. in 1977 varied widely among Districts viz. from 365 the highest in Nowgong to only 19 the lowest in North Cachar Hills. The Area, Total Population and density of population for different Districts for the years 1970-71 and 1976-77 are given in Statement No.(2). Table No.(1) below gives a general view of the extent of variation in Area, Population and the Density of Population 1977:-

7. The Total Population of the State as well as Population of different Age-Groups for the year 1971 and 1977 given in this report are based on the revised population projections (as on 1st March of the year) available from the office of Registrar General of India. District-wise Population in the Age-Groups 6-11, 11-14 and 14-17 are based on the following formula:-

We assume that

$$\frac{P_{6-11}}{P} = \frac{P_{6-11}^i}{P^i} = K$$

$$P_{6-11} = K P^i$$

Where K is estimated from the equation  $K = \frac{P_{6-11}}{P}$

$P_{6-11}$  - Denote 6-11 Age-Group Population of the State

P	=	Total Population of State
$P_{6-11}^i$	=	Age-Group Population of the ith District
P <sub>i</sub>	=	Total Population of the ith District

To get the Sex-wise break-up of Total Population in the various Age-Groups of the District, first of all the Girls Population is estimated using the above equation with the only difference that in the above formula Total Population is replaced by the Girls Population. The Boys Population is obtained by the residual method i.e.

Boys Population in the Age-Group 6-11	(=)
Total Population in the Age-Group 6-11	(-)
Girls Population the Age-Group 6-11	

Similar formulas are used for estimating the District-wise Population in the Age-Groups 11-14 and 14-17 years.

8. The Total estimated Population of Children in the Age-Group 6-11 years was 24.79 Lakhs in 1977 (12.56 Lakhs Boys and 12.23 Lakhs Girls) which formed 14.0% of the Total Population of the State.

9. Similarly the estimated Population in the Age-Group 11-14 years was 13.73 Lakhs in 1977 (16.96 Lakhs Boys and 6.77 Lakhs Girls) which constituted 7.8% of the Total Population.

10. The Population in the Age-Group 14-17 in 1977 was 12.53 Lakhs, consisting of 6.40 Lakhs Boys and 6.13 Lakhs Girls. This formed 7.1% of the Total Population.

11. Thus out of the Total Population of 176.80 Lakhs of the State, School-Going Population in the Age-Group 6-17 years was 51.05 Lakhs consisting of 25.92 Lakhs Boys and 25.13 Lakhs Girls. The Population in the Age-Group 6-17 years constituted 28.9% of the Total Population. The Percentage for Boys was 14.7%, while for Girls it formed 14.2%.

### III - LITERACY

12. According to the 1971 Census the effective Literacy Rate that is the number of Literates per hundred of Population (excluding the Age-Group 0-4) in the State was 34.6.
