

HANDBOOK OF EDUCATIONAL AND ALLIED STATISTICS

MINISTRY OF HUMAN RESOURCE DEVELOPMENT ○ GOVERNMENT OF INDIA ○ NEW DELHI

PREFACE

This is the third issue of the publication "A Hand Book of Educational and Allied Statistics, the first one was brought by the Ministry of Human Resource Development in 1980. The main objective of bringing out this publication is to make available the latest data on Education and related sectors like Population, Labour and Employment, Literacy, National Income etc. for the benefit of various users of educational data viz. Planners, Administrators and Research workers.

The publication provides time series data on Education for All India covering the period 1950-51 to 1981-82 and State-wise data for the years 1970-71 and 1980-81.

The Ministry of Human Resource Development, Department of Education thanks the Registrar General of India, Directorate General Employment and Training and Central Statistical Organisation for making available to this Ministry the data in their respective fields. The Ministry also expresses its thanks to all the Ministries and other organisations from whose publication Secondary data have been reported in the publication.

I am grateful to Shri S.C. Seddey, Deputy Director Statistics in this Ministry for his dedicated efforts in overall supervision of the data collection, its compilation and for editing the final manuscript, I also share my gratitude to the other staff of the Statistical Unit of the Ministry for their sincere efforts in bringing out this publication.

Based on the suggestions made by some of the User Organisations, we have slightly revised the third issue so as to make it more useful to all the users of this publication. However, further suggestions to improve the publication are most welcome and may be sent to the Joint Secretary (Planning), Ministry of Human Resource Development, Department of Education, New Delhi.

P. K. Patnaik,,
Joint Secretary,
Department of Education,
Ministry of Human Resource Development,
Government of India.

New Delhi,
the April 1987

INTRODUCTION

Educational Planners, Administrators and various Research Workers in the field of education have been finding it difficult to get different types of Educational Statistics in a single publication giving overall picture in the field of education. Besides, to evaluate the performance of educational system and to formulate programme, time series data may prove very useful. The present publication covers important statistics in the field of Education and related sectors. Various types of data available in this publication are explained below for the benefit of the users of this publication.

1. Demographic Data

Tables 1.1 to 1.12 give data on area, population, density and important vital statistics viz. birth rate, death rate and natural growth rate. Distribution of population by religion and data on language groups have also been given. All India population estimates for the total population and for the age groups 6—11 years, 11—14 years, 14—17, 14—15 & 16—17 years for the period 1971-2000 have been included in these tables. These estimates have been supplied by the Registrar General's Office. Statewise estimated population in the age groups 6—10, 11-13, 14-15 & 16-17 for the years 1985, 1990, 1995 & 2000 have been added in this addition. Data relating to area, population, density, religion and languages have been taken either from the published data by the Registrar General's Office or have been made available by them for use by the Ministry.

2. Literacy

Tables 2.1 to 2.7 give data which has been compiled on the basis of published "Census of India 1971 & 1981—Social and Cultural Tables". Literacy rates for total population, sexwise and for different age groups have been given. Literacy rates separately and for rural urban areas have also been given in these tables.

3. Institutions and Enrolment

Tables 3.1 to 3.8 (b) give the number of institutions by type and enrolment by stages. All India time series data for the period 1950-51 to 1984-85 as well as Statewise data for the period 1970-71 and 1980-81 have been given. Institutions and enrol-

ment for professional education have been given only for selected types viz. Agricultural and Forestry, Engineering, Technology and Architecture, Medicine, Veterinary Science and Teachers Training.

4. School Teachers.

Tables 4.1 to 4.5 give number of teachers by type of school i.e. Primary, Middle and High/Higher Secondary Schools, trained teachers and percentage of trained teachers to total number of teachers. Time series data for All-India for different type of schools has also been given.

5. Expenditure on Education

Tables 5.1 to 5.8 give expenditure on education for different types of institutions. Break-up of the total expenditure by sources has also been given. Direct expenditure on education has been given for All India and Statewise. Budgeted expenditure on education, Statewise and Sectorwise, have been given for the year 1983-84 to 1985-86. This has been done with a view to present the growth during the Fifth Plan Period. Percentage of budgeted expenditure on education to total budget have been given for all the States/UTs during the period 1981-82 to 1985-86.

6. Higher Education

Tables 6.1 to 6.10 give detailed statistics relating to higher education viz. institutions, enrolment, teachers, subject-wise enrolment and the distribution of teaching staff according to designation for the years 1980-81 to 1984-85. Table No. 6.10 indicates universities offering correspondence courses, names of courses and their enrolment. It may be mentioned here that the statistics relating to higher education as collected by UGC, may not tally with the corresponding statistics collected and published by the Ministry of Human Resource Development and reported in this publication under the heading "Institutions and Enrolment" i.e. tables 3.1 to 3.8 because of difference in concepts and definitions and the methods of collection by the two organisations.

7. Technical Education

Tables 7.1 to 7.3 give information on number of institutions, intake capacity, actual admissions made and out-turn in respect of (i) Degree Holders and (ii) Under Graduates in Technical Education.

8. School Buildings and Libraries

Tables 8.1 to 8.5 give information regarding the availability of school buildings in the country for Primary, Middle, Secondary and Higher Secondary Schools. Distribution of schools according to type of accommodation as classified into Pacca, Semi Kaccha, Kachha, Thatched huts, tents, open space and the shortage of rooms at various stages are given. Number of schools having library facilities has also been given.

9. Selected Indicators in Education

Tables 9.1 to 9.11 throw light on the developments in the field of Education and measure the impact of Educational System in India with the help of some useful Indices. The Indices used have been explained below :

(i) *Index of Enrolment Growth (base Year 1960-61 = 100)*

$$\text{Index of Enrolment Growth at Stage } i = \frac{\text{Enrolment at stage } i \text{ for a year}}{\text{Enrolment at stage } i \text{ for 1960-61}} \times 100$$

(ii) *Gross Enrolment Ratio*

This is a very important index for measuring the efficiency of the Educational System. It measures about what percentage of the total population in the relevant age-group is being covered by the various educational programmes being run in the country.

$$\text{Gross Enrolment Ratio at stage } i = \frac{\text{Enrolment at stage } i}{\text{Population in the age group corresponding to the } i\text{th stage}} \times 100$$

Various stages are Primary (Classes I—V), Middle (Classes VI—VIII) and High/Higher Secondary (Classes IX—XI/XII). The corresponding age-groups for the stages are 6—11 years, 11—14 years and 14—17 years respectively. Therefore we may define Gross Enrolment Ratio for primary stage (I—V) as follows :

$$\text{Gross Enrolment Ratio at Primary stage (Classes I—V)} = \frac{\text{Total Enrolment in classes I—V}}{\text{Total Population in the age-group 6-11 years.}} \times 100$$

(iii) Students Flow Statistics

Table 9.5 gives information about the movement of students enrolled in class I to higher classes (Up to class VIII) and give the retention ratios in different classes as measured from the cohort year. By cohort year we mean the number of student studying in class I during a particular year. These statistics are useful for Educational Planning as these measure the extent of drop-outs and stagnation for different classes (I—VIII) during the period.

(iv) teacher Pupil Ratios

It is defined as the average number of students per teacher for a particular type of school e.g.

$$\text{Teacher Pupil Ratio for Primary} = \frac{\text{Total Enrolment in Primary Schools}}{\text{Total number of Teachers in Primary Schools}}$$

(v) Average Annual Cost per Student

This index gives an idea about the average expenditure incurred for one student for a particular type of institution. While calculating this index only direct expenditure on institutions has been taken into account. Indirect expenditure which consists of expenditure incurred on direction, inspection, buildings, furniture, scholarships, hotels and other miscellaneous items has not been taken into account as these items can not be apportioned to each type of institution. For example average annual cost for Primary Schools will be defined as :—

$$\text{Average Annual cost per Student for Primary Schools} = \frac{\text{Total Direct (Recurring) Expenditure on Primary Schools}}{\text{Total Enrolment in Primary Schools.}}$$

(vi) Extent of Coverage or Co-efficient of Elitya for SC/ST

This index quantifies the share of Scheduled Caste/Scheduled Tribes population enrolled at different stages. For example for Primary stage, Extent of coverage for Scheduled Caste poulation is defined as follows :—

$$\text{Extent of Coverage for SC/ST at Primary Stage} = \frac{\text{Percentage enrolment of SC/ST to total enrolment}}{\text{Percentage of SC/ST population to total population}} \times 100$$

(vii) *Average number of Primary, Middle and High/Higher Secondary Schools per laks of Population*

This index measures the availability of schooling facilities in States as compared to its population which is defined as follows :—

$$\text{Average number of Primary Schools per lakh of Population} = \frac{\text{Number of Primary Schools}}{\text{Total population}} \times 1,00,000$$

10. Plan Statistics on Education.

Tables 10.1 to 10.4 given plan statistics i.e. Outlay and expenditure data on education for I, II, III, IV, V and the VIth Plans Sectorwise outlay and expenditure and the percentage of plan expenditure to total expenditure have been given in these tables.

11. Labour Employment and Unemployment Statistics

Tables 11.1 to 11.5 statistics on employment in Public Sector, unemployment data as measured with the number of applicants on live register, educational composition of work seekers. Statistics of unemployed teachers by qualifications have been collected from the office of the DGE and T. Time series data on employment by qualifications have also been given.

12. Miscellaneous Statistics

Tables 12.1 to 12.11 give useful statistics in the filed of education and allied fields like number of foreign students studying in India and Indian students going abroad, participation of students in NSS. International comparison of enrolment ratio, expenditure on education as measured in terms of percentage of GNP and literacy rates, National Income and State Domestic Products and Comprison of Plan outlay in different sectors of National Economy have been given.

Enrolment at the i-th level

*Gross enrolment ratio = $\frac{\text{Enrolment at the } i\text{-th level}}{\text{Population of the corresponding age-group for the } i\text{-th level.}} \times 100$

Population of the corresponding age-group for the i-th level.

i=Primary, Middle, High/Higher Secondary.

(The Corresponding age-group for the Primary stage (I-V), Middle stage (VI-VIII) and High/Higher Secondary stage (IX-XI/XII) are 6-11 years, 11-14 years & 14-17 years respectively).

**Gross Enrolment ratio is defined as the percentage total enrolment at level i to the corresponding age group population i.e.

$$\text{Gross Enrolment ratio at level } i = \frac{\text{Total Enrolment at the level } i \times 100}{\text{Total population in the corresponding age-group for the level; =}}$$

e.g. In case of India the corresponding group for i. 1st level is 6—10 years and for 2nd level it is 11—13.
