Gain et emploiement:
No E-3

Earnings of Wage-earners
by
Industry Group and Occupation

This bulletin gives final figures on earnings of wage-earners at the 1941 Census by industry groups and sex, for Canada and the provinces, and for cities of 30,000 population and over. In addition, data on earnings of wage-earners by detailed occupations and sex are given in Table 3 for cities of 30,000 population and over. Detailed statistics by occupation for Canada and the provinces are contained in Bulletin E-2 of this series. In the tables of the present bulletin average earnings and average weeks employed over the 12 months ended June 2, 1941 are shown by industry group and by occupation. Hence comparisons in average earnings per week employed by industry groups and by occupations can be made by dividing average weeks employed into the average earnings shown for the census year period.

Census Inquiry on Earnings and Employment. - At the 1941 Census each wage-earner was asked to report the number of weeks employed in a wage-earning or salaried capacity, including paid holidays, during the 12 months prior to June 2, 1941, together with his total earnings over this period.

Definition of Earnings. - By earnings in the census is meant the amount of money received as salary, wages, commission or piece-rate payment. Deductions from pay for pension schemes, National Defence Tax, War Savings Certificates and insurance were to be included in the amount of earnings received during the census year, but income from pensions, investments, workmen's compensation, relief and other sources of this kind were not to be included in the total earnings reported. It should be added that the money value of board and room is not counted in the earnings recorded in the census.

Weeks employed. - As stated, wage-earners were asked to report the number of weeks employed during the 12 month period ended June 2, 1941. Wage and salaried workers accustomed to receive holidays and sick leave with pay were asked to include such periods in the total number

Gain des employés à gages
selon
le groupe industriel et l'occupation

Ce bulletin contient les chiffres définitifs sur le gain des employés à gages, lors du recensement de 1941, selon le groupe industriel et le sexe, pour le Canada, les provinces et les villes de 30,000 âmes et plus. En plus, le tableau 3 fournit des données sur le gain des employés à gages selon l'occupation détaillée et le sexe, pour les villes de 30,000 âmes et plus. Le Bulletin E-2 de la présente série donne la statistique détaillée selon l'occupation pour le Canada et les provinces. Aux tableaux du présent bulletin, la moyenne des gains et des semaines d'activité pendant les douze mois terminés le 2 juin 1941 est indiquée selon le groupe industriel et l'occupation. Ainsi, en divisant la moyenne des gains indiquée pour la période de l'année de recensement par la moyenne des semaines d'activité, des comparaisons peuvent être faites entre la moyenne des gains hebdomadaires dans les groupes industriels et dans les occupations.

Question de recensement sur l'emploiement et le gain. - Lors du recensement de 1941, tout employé à gages eut à déclarer le nombre de semaines qu'il avait travaillé à titre de salarié ou d'employé à gages, y compris les vacances payées, ainsi que son gain total au cours des 12 mois antérieurs au 2 juin 1941.

Définition de gain. - Aux fins du recensement, le gain est la somme d'argent reçue en salaire, gages, commission ou en paiement pour travail à la pièce. Les déductions pour pensions, taxe de la Défense Nationale, certificats d'épargne de guerre et assurances sont incluses dans le montant du gain touché durant l'année de recensement, mais le revenu provenant de pensions, de placements, d'indemnisation ouvrière, de secours ou d'autres sources de même nature ne figure pas au gain total déclaré. Il faut ajouter qu'il n'est pas tenu compte de la valeur en argent de la pension et de la chambre dans le gain déclaré au recensement.

Semaines de travail. - Tel que spécifié, les employés à gages durent déclarer leur nombre de semaines de travail au cours de la période de 12 mois terminée le 2 juin 1941. Les employés à gages et à salaire habitués à des vacances et à des congés de maladie avec paie furent invités à inclure ces périodes.

of weeks employed during the census year. Weeks worked on own account in farming, fishing, etc.; were not counted in total weeks employed during the census year. It should be mentioned that average earnings and average weeks employed during the census year ended June 2, 1941, in some industries and occupations were somewhat reduced by the entry into employment for short periods prior to the census date of new additions to the labour force.

Definition of Gainful Occupation.— A gainful occupation is defined in the census as one "by which the person who pursues it earns money or in which he assists in the production of marketable goods". Persons unemployed at the census date were asked to report the occupation in which last employed. Those who indicated that they had been unemployed for some lengthy period were further asked whether they were still seeking employment before being considered as gainfully occupied. Persons who reported that they were no longer following their former occupation because of old age or physical disability, and did not expect to return to it, were enumerated as "retired". As for young persons, only those not attending school and employed regularly in some gainful occupation were included among the gainfully occupied. Children of working age, that is, 14 years of age and over, assisting parents in the work of the farm or in some family business in a "no pay" capacity were reported as having a gainful occupation, but daughters helping in the domestic work of the home without pay were not included in the population gainfully occupied.

It should be mentioned that where a person customarily followed more than one occupation the enumerator recorded the occupation at which the person was employed most of the time during the year or from which he received the greater part of his annual earnings.

Definition of Wage-earner.— A wage-earner in the census is defined as a gainfully occupied person who works for salary, wages, commission, or on piece-rate basis of payment, whether he be the general manager of a bank or a day labourer.

Occupational Classification.— Wage-earners are classified by industry and by occupation in the tables of this bulletin. Most group titles in both industry and occupation tables are similar but the composition of these groups is different. For example, the group, "Manufacturing", in industry tables includes all persons employed by manufacturing firms, whether engaged in the processes of production, or in the sale or transport of the product, or in clerical or other occupations associated with the industry. On the other hand, in the occupation Table 3 found in this bulletin only such persons as followed so-called "processing"

dans le total de leurs semaines de travail pendant l'année de recensement. Les semaines de travail à propre compte dans l'agriculture, la pêche, etc. ne figurent pas au total des semaines de travail durant l'année de recensement. Il convient de mentionner que le gain moyen et le nombre moyen de semaines de travail pendant l'année de recensement terminée le 2 juin 1941 dans quelques industries et occupations furent quelque peu réduits par l'emploi, pour de courtes périodes antérieures à la date du recensement, de main d'œuvre supplémentaire.

Définition d'un emploi rémunéré.— Pour les fins du recensement, un emploi rémunéré est un emploi "par lequel une personne gagne de l'argent ou participe à la production des denrées commerciales". Les personnes en chômage à la date du recensement durent déclarer leur dernier emploi. Celles qui ont déclaré avoir été en chômage depuis assez longtemps ont dû dire, avant d'être énumérées comme occupant un emploi rémunéré, si elles étaient encore en quête d'emploi. Les personnes qui, à cause de vieillesse ou d'invalidité physique, ont déclaré ne plus occuper leur ancien emploi et n'avaient pas l'espoir d'y retourner ont été énumérées comme "retraitées". Dans le cas des jeunes personnes, seules celles qui ne fréquentaient pas l'école et avaient un emploi rémunéré régulier ont été énumérées comme occupant un emploi rémunéré. Les enfants en âge de travailler, c'est-à-dire de 14 ans et plus, qui aident, sans rémunération, leurs parents aux travaux de la ferme ou à quelque besogne familiale sont considérés comme ayant un emploi rémunéré; les filles, par contre, aidant sans rémunération aux travaux ménagers, n'ont pas été comprises dans la population active.

Il importe de souligner que, pour les personnes qui ont ordinairement plus d'une occupation, l'énumérateur a inscrit l'occupation à laquelle elles ont consacré le plus de temps dans l'année, ou celle qui leur a rapporté la plus grande partie de leur gain annuel.

Définition de l'employé à gages.— Aux fins du recensement, un employé à gages est une personne rémunérée travaillant à salaire, à gages, à commission ou à la pièce, qu'elle soit gérant général d'une banque ou simple manœuvre.

Classification occupationnelle.— Les employés à gages sont classés selon l'industrie et l'occupation dans les tableaux du présent bulletin. La plupart des titres de groupes dans les tableaux de l'industrie et de l'occupation sont semblables, mais la composition de ces groupes est différente. Par exemple, le groupe "Manufactures", dans les tableaux des industries, comprend toutes les personnes employées dans des établissements manufacturiers, soit dans la production même, la vente ou le transport du produit, soit dans des occupations de bureau ou autres connexes à l'industrie. D'autre part, dans le tableau 3 des occupations contenu dans ce bulletin, les seules personnes qui avaient des

occupations, that is, occupations in which they were directly engaged in the process of manufacture or repair, are included in the group "Manufacturing", and all persons following such occupations are classified in this group, irrespective of whether they were employed by manufacturing firms or by mining, construction, transportation, etc., companies at the time of the census. Similarly the groups, "Construction", "Transportation", for example, in industry tables include all persons employed in these industries, irrespective of the nature of their occupations, while the occupational groups, "Construction", "Transportation", appearing in Table 3 of this bulletin, comprise only those persons who were following construction trades and transport occupations, respectively, at the census date, regardless of the industries in which they were employed.

It might be mentioned that persons in clerical occupations have been assigned a separate group in Table 3, while labourers in other than primary pursuits appear in a residuary group in this table. Since the term "labourer", so reported, gives no indication of the type of work performed, it cannot be classified under any of the occupation groups shown in the table. Even a knowledge of the industry in which employed does not supply the necessary information on the type of work performed by a person reported as a labourer, for a labourer in a steel mill, for example, might be working in a construction, transport, etc., type of occupation rather than in an occupation directly concerned with the process of manufacture.

Wage-earners on Active Service.- Persons on Active Service who were employed as wage or salaried workers prior to enlistment are not included in the tables of this bulletin.

occupations dites de "transformation", c'est-à-dire celles qui étaient directement engagées dans les opérations mêmes de la fabrication ou de la réparation, sont comprises dans le groupe "Manufactures", et toutes les personnes se livrant à de telles occupations ont été classées dans ce groupe, indépendamment du fait qu'elles étaient employées dans des établissements manufacturiers, ou dans les mines, la construction, les transports, etc., lors du recensement. De même les groupes de la "Construction" et des "Transports", par exemple, dans les tableaux des industries, comprennent toutes les personnes travaillant dans ces industries, sans égard à la nature de leurs occupations, tandis que les groupes occupationnels de la "Construction" et des "Transports", au tableau 3 du présent bulletin ne comprennent que les personnes qui avaient des emplois dans les métiers de la construction ou dans les transports respectivement à la date du recensement, indépendamment des industries dans lesquelles elles étaient engagées.

Il convient peut-être de mentionner ici que les personnes ayant des occupations de bureau occupent un groupe séparé au tableau 3, tandis que les manœuvres dans des entreprises autres que primaires paraissent dans un groupe résiduel de ce tableau. Comme le terme "manœuvre" tel que déclaré, ne donne aucune indication du genre de travail accompli, il ne peut être classé sous aucun des groupes d'occupations tableau. La connaissance de l'industrie qui l'embauche ne fournit pas non plus les renseignements nécessaires sur le genre de travail accompli par une personne qui se déclare "manœuvre", parce qu'un manœuvre dans l'aciérie, par exemple, peut être employé dans la construction, les transports, etc. plutôt qu'à une occupation liée directement aux opérations propres de la fabrication.

Employés à gages en service actif.- Les personnes en service actif qui étaient des employés à gages ou à salaire avant de s'enrôler ne figurent pas aux tableaux de ce bulletin.

Table 1.- Wage-earners, 14 years of age and over, by industry group and sex, showing average earnings and average weeks employed during the 12 months' period ended June 2, 1941, for Canada(1) and the provinces, 1941 Census
