AUGUST 1979**

ACKNOWLEDGEMENTS

The present study is a modest attempt at examining the contribution of various sources in financing the industrial sector of Nepal in the light of the state of capital market and financial institutions' development in the country. The subject has been approached from the side of both suppliers and receivers of finance.

The study was carried out at the Gokhale Institute of Politics and Economics, Pune under the supervision of Prof. V. S. Chitre. I owe a great deal of gratitude to him for making so much time available from his extremely busy schedule for the guidance of my thesis. But for his critical comments and suggestions at various stages of the work and ever helping attitude, the work would not have taken the present shape. I was also benefited from time to time consultations with Prof. B.S.R.Rao and Prof. V.S.Patvardhan of the Institute. I shall remain ever grateful to them.

Thanks are due to the Gokhale Institute authorities particularly Prof. V.M.Dandekar, Director and Shri D.P.Apte, Registrar for providing all the facilities and help for the work whenever needed.

I shall be failing in my duty if I do not express my thanks to a number of offices in Nepal which cooperated with

my work by providing available data. Special mention must be made of Nepal Rastra Bank, NIDC, Department of Industry, Department of Statistics, Department of Cottage and Village Industry, Corporation Coordination Council, Provident Fund, Agricultural Development Bank, Nepal Bank, National Insurance Corporation, Comptroller General's Office, Security Marketing Centre, Credit Guarantee Corporation, and a few industrial units. In this limited space, it is simply impossible to give the names of the large number of friends and well wishers who provided their invaluable cooperation in making necessary data available for the work. I wish to record my sincere thanks to them.

Thanks are due to the Government of India, Ministry of Education and Social Welfare for providing me a cultural scholarship to undertake the Ph.D. work.

Appreciation is due to Shri S. K. Athale for neatly typing the thesis within a short period of time.

Lastly, I wish to express my thanks to my wife Roshana who encouraged and helped in my work in a number of ways both before and after our marriage.
