Season and Crop Report of the Bombay State

For the Year 1955-56

Obtainable from the MANAGER, GOVERNMENT CENTRAL PRESS, BOMBAY,
BY THE DIRECTOR, GOVERNMENT PRINTING, PUBLICATIONS AND
STATIONERY, BOMBAY STATE, BOMBAY.

Obtainable from the Government Publications Sales Depot, Institute of Science Building, Fort, Bombay (for purchasers in Bombay City); from the Government Book Depot, Charni Road Gardens, Bombay 4 (for orders from the mofussil) or through the High Commissioner for India, India House, Aldwych, London, W.C.2 or through any recognized Bookseller.

Price—Re. 0.96 or 1s. 7d.

1958

No. Res/S. & C. R./12644/5150-F/5042 of 1957.

Poona 1, 24th September, 1957.

From

SHRI S. P. MOHITE, I.A.S.,
Director of Agriculture,
Bombay State.

To

THE SECRETARY TO GOVERNMENT,
Agriculture and Forests Department,
Old Secretariat, Bombay.

Sir,

I am to submit herewith the Annual Season and Crop Report of the Bombay State for the year ending 31st July, 1956.

I give below very briefly my remarks on the general agricultural conditions.

1. The monsoon rains were adequate, but the distribution of rains was unfavourable. There was inadequate rain in the early part of the season and excessive and untimely in the latter part. The kharif crops fared badly, but because of late rains, the season was very favourable in many parts for rabi crops.

2. Crop pests and plant diseases were reported from all areas, but no heavy infestation requiring special measures was reported.

3. The mileage of Government canals increased from 2,229 miles in 1954-55 to 2,329 and that of private canals from 4,674 miles to 4,976, showing an increase of 4.5 per cent. in the first case and 6.5 per cent. in the latter.

The total irrigated area during the year under report was 2,739,200 acres showing an increase of 6.5 per cent. over the corresponding figure of 2,572,100 acres during 1954-55.

4. There was an increase in the area under non-food crops in all parts of the State, but a decrease in the area under food crops in Gujarat and Deccan. In the whole state the area under food crops was 30,938,800 acres as against 31,419,000 in 1954-55 showing a decrease of 1.5 per cent. under food crops. The area under non-food crops was 14,310,900 acres as against 13,804,100 in 1954-55 showing an increase of 3.7 per cent.

(G. C. P.) MO-A Q 4214-a

II

5. The average yield per acre of crops for which surveys were carried out showed that it was less than what it was in the previous year. In certain regions, however, some crops showed an increase as in the case of paddy in Deccan, Bajri, Wheat, Rabi Jowar, Rape and Mustard, Sugarcane and Cotton in Karnatak, gram in all regions except Gujarat and Tobacco in all regions except Karnatak.

6. Owing to low production of all crops, there was a general increase in the prices of all agricultural produce. There was a slight increase in the wages of skilled labour and a decrease in the wages of unskilled labour.

7. There is an increase in the number of cattle and buffaloes. The number of breeding bulls, however, went down by 65·7 per cent. The number of goats increased, while there was a decrease in the number of sheep. The number of horses and ponies, mules and donkeys also went down. The poultry showed an increase of 48·2 per cent.

8. The number of tractors and oil engines showed an increase of 47·1 and 36·0 per cent. respectively. The number of sugarcane crushers, electric pumps and ghanies declined by about 25·0 per cent. each (compared with 1951 census figures).

Yours faithfully,

S. P. MOHITE,
Director of Agriculture,
Bombay State.

SEASON AND CROP REPORT OF THE STATE OF BOMBAY FOR THE YEAR 1955-56.

CHAPTER I—SEASON.

The agricultural season of 1955-56 was characterised by uneven distribution of rains which proved inadequate in the early stage and excessive and untimely in the late stage over greater part of the State. As such, the kharif season was on the whole not favourable; while, on the other hand, the rabi season was fairly favourable due to copious late rains received, except for parts of Sholapur district where the rains proved harmful to rabi crops in the early stage. The pre-monsoon rains though found inadequate in quantity in some parts, facilitated kharif tillage operations and paddy sowings were undertaken in parts of the Konkan and the Karnatak. The rainfall received in the month of June was substantial in the Konkan division, it being light to fair elsewhere in the State. In July fairly good rainfall was received in the Konkan division, while it was light and scattered in other parts of the State, where more rains were urgently needed. Sowings of kharif crops were carried on in some parts and weeding and transplanting of paddy were in progress in many areas of the State. Substantial and wide-spread rainfall was received during the months of August and September. The rainfall, however, proved heavy and excessive in parts of the Gujarat, where standing crops were damaged to some extent and agricultural operations were hampered. On the other hand, more rainfall was required in parts of the Deccan and the Karnatak divisions. Weeding and interculturing of kharif crops and preparatory tillage for rabi cultivation were carried on in parts of the Deccan and the Karnatak. Rabi sowings were also in progress in some areas. Substantial rains were recorded in the State during the month of October and light to fair in November in parts of the State. These rains proved excessive and untimely in many parts of the State. Consequently standing crops were damaged to varying extent, while field operations such as sowing of rabi crops and harvesting of kharif crops were hampered. In December, there was practically no rain in the State. Harvesting of late paddy and other kharif crops was nearing completion, while threshing operations were generally in progress in the State. There were scattered showers in West Khandesh district in the Deccan in January, and in Kolhapur, Belgaum and Dharwar districts in the Karnatak in February and March. There were practically no rains elsewhere in the State during these months. Standing rabi crops were doing well. Harvesting of rabi crops was nearing completion and summer ploughing was in progress in many parts of the State. The climatic conditions experienced during the year were conducive to the development of insects pests and plant diseases, which caused damage to the crops to some extent.

2. *Distribution of rainfall.*—Table I (pages 41-46) compares the rainfall during the year under report, with the normal rainfall at each district head-quarter station in the State. The figures of normal rainfall for each station

(G. C. P.) MO-A Q 4214-1

were obtained from the India Meteorological Department. The following observations are made from a study of this table :—

Pre-monsoon rains.—The pre-monsoon rains were slightly above the normal at Ratnagiri and Karwar (Kanara) in the Konkan, at Ahwa (Dangs), Poona, Sholapur, Satara and in the hilly tracts in the Deccan, at Kolhapur, Belgaum, Dharwar and in the hilly tracts in the Karnatak. They were below the normal at Jalgaon (East Khandesh), Nasik and Ahmednagar in the Deccan and at Sangli (South Satara) and Bijapur in the Karnatak. At other district headquarter stations in the State, these rains were absent.

Monsoon rains.—The monsoon rains were above normal at Mehsana, Himatnagar (Sabarkantha), Ahmedabad and Baroda in the Gujarat, at all the district headquarter stations in the Konkan, similarly at all the district headquarter stations except Nasik, Satara and in the hilly tracts in the Deccan and at all the district headquarter stations except Dharwar in the Karnatak. These rains were below the normal at all other district headquarter stations in the State.

Post-monsoon rains.—The post-monsoon rains exceeded the normal at Ahmedabad, Amreli, Baroda and Surat, the same being below the normal elsewhere in the Gujarat. They also exceeded the normal at all the district headquarter stations in the Konkan, the Deccan and the Karnatak divisions with the exception of Sholapur in the Deccan and Dharwar in the Karnatak, where they were below the normal.

Winter rains.—The winter rains exceeded the normal at Belgaum in the Karnatak. They were below the normal at Ahmedabad in the Gujarat, at Jalgaon (East Khandesh) and Ahwa (Dangs) in the Deccan and at Kolhapur, Bijapur, Dharwar and in the hilly tracts in the Karnatak. These rains were absent at all other district headquarter stations in the State.

Total rainfall for the season 1955-56.—The total rainfall for the season 1955-56 exceeded the normal at Mehsana, Himatnagar (Sabarkantha) and Ahmedabad in the Gujarat and at all the district headquarter stations in the Konkan, the Deccan and the Karnatak, with the exception of Nasik in the Deccan, Dharwar in the Karnatak and at other district headquarter stations in the Gujarat division, where it was below the normal.

3. In the Gujarat, there were practically no pre-monsoon showers. The rainfall during June and more particularly in July was much below the average in many parts of the division and more rains were urgently needed. Preparatory tillage for kharif cultivation and sowings of bajri and maize were in progress. Condition of sown crops in general was far from being satisfactory, while transplanting of paddy was held up at places, due to inadequate rains. During the months of August and September there were substantial and widespread rains. The precipitation was, however, extremely heavy during the first fortnight of September in many areas of the division. Consequently pulses and jowar crops were washed away in the low lying areas of Banaskantha district, bajri and jowar crops were water-logged in parts of Ahmedabad and Kaira districts and the growth of all the standing crops was arrested and cultural operations were also hampered. The condition, however, improved to some extent as a result of favourable break in rains during the second

fortnight of September. There was light to fairly good rainfall in October. It, however, proved excessive in parts of Barod^a and Broach districts where bajri, and paddy crops were affected. Harvesting of kharif crops, preparatory tillage for and sowings of rabi crops were in progress. In November, there was practically no rain. Standing rabi crops thrived well. During the months of December to March, the rains practically ceased. Harvesting of rabi crops was in progress by the end of March, while picking of cotton was prolonged right up to the end of April, in parts, due to peculiar seasonal conditions.

As regards crop pests and plant diseases, locust-swarms were reported from parts of Banaskantha and Sabarkantha districts. *Katra* trouble was noticed in parts of Sabarkantha, Ahmedabad, Panch Mahals, Baroda and Surat districts. Leaf-roller, blister-blight, thrips, wooly mites, jassids and boll worms on cotton were reported from different parts of the division.

In the Konkan, there were good pre-monsoon rains in parts of the division. The monsoon set in, on time, in June and sowings of Kharif crops were in progress and germination of crops was good. In July the rainfall though widespread, was in deficit of the normal and as such *hodata* operations in parts of Kanara district were hampered, while paddy seedlings were reported to be withering in parts of Thana district, where transplanting operations were also held up. Transplanting of paddy was in progress and standing crops fared well elsewhere in the division. In August and September, substantial and heavy rains were received and as a result standing crops thrived well, while harvesting of early paddy and of betel-nut was in progress. In the first week of October, the precipitation was, however, heavy and proved excessive. Consequently standing crops were adversely affected in parts of the division. The rainfall during November, though light, was above the normal in parts of Kolaba and Kanara districts, where standing crops were further slightly damaged due to this untimely rainfall. Harvesting of paddy and sowing of rabi crops were in progress. There were no rains in the months of December and January. Sowing of *waingan* paddy was nearing completion in parts of Kanara district, while threshing of paddy was continued in parts of the division.

As regards crop pests and plant diseases, Caterpillars on paddy crop as also rice-hispa, blast, *Kane* disease, blue-beetles and army-worms were reported from parts of the division. *Koleroga* on arecanut and army-worms on *waingan* paddy were reported from parts of Ratnagiri and Kolaba districts, respectively.

In the Deccan, there were light to fair pre-monsoon rains, which facilitated preparatory tillage for kharif cultivation. In June and July there was scattered and inadequate rainfall. Kharif sowings were nearly completed, while they were held up in parts of Poona, Nasik and North Satara districts. Standing crops were reported to be withering in parts of West Khandesh and Poona districts due to lack of soil moisture. In August, fairly good rainfall was received except in parts of Ahmednagar and North Satara districts, where it was below the normal and as such more rains were urgently needed. In September, substantial rainfall was received except in parts of Nasik, Ahmednagar and Eastern part of Poona districts where it was in deficit of the normal and more was needed. On the other hand, it proved excessive during the first week of the month in parts of East Khandesh and Sholapur districts and

standing crops were adversely affected to some extent. Harvesting of bajri, *udid*, *mug* and early paddy, transplanting of chillies and tobacco and preparatory tillage for and sowing of rabi crops were in progress in parts of the division. In October the rainfall exceeded the normal and proved excessive in parts of East Khandesh, Ahmednagar, Poona and North Satara districts where standing crops were adversely affected and agricultural operations were also suspended. In November there was excessive rainfall in the first week in parts of North Satara and Sholapur districts where standing and harvested kharif crops and young rabi jowar crop respectively, were damaged. The situation, however, improved due to break in rains and fair seasonal condition that prevailed subsequently. There was practically no rainfall during December and subsequent months except scattered showers which were received in parts of West Khandesh District in January. Standing rabi crops thrived well. Due to peculiar season, cotton picking was prolonged upto the end of February in parts of Khandesh Division. Harvesting of rabi crops was nearing completion by the end of March.

As regards crop pests and plant diseases, Grass-hoppers were reported from West Khandesh district. Cotton crop was affected by anthracnose, jassids, thrips and rust and was attacked by boll-worms in parts of the division. Leaf-curl and mites on chillies and pyrilla and top shoot-borer on sugarcane were noticed in parts of the division. *Mava* affected *udid* and *mug* crops in parts. Aphids on groundnut were reported from parts of the division. Blast and army-worms on paddy were reported from places. Rust on potatoes, caterpillars on bajri and mildew on grapes were reported from parts of the division. Rat trouble was noticed in parts of East Khandesh district. *Chikta*, *Khairyra* and *tambura* diseases on jowar were reported from places. Rinderpest disease on cattle was observed at places in Poona district.

In the Karnatak, light to fair rains were recorded during the pre-monsoon period, which facilitated tillage operations for kharif cultivation. In June and July there were scattered and unevenly distributed rains which fell short of the requirements in parts of the division. More rains were, therefore, urgently required for facilitating kharif sowings and transplanting operations. Standing crops were reported to be withering in parts of Belgaum and Kolhapur districts. Weeding and interculturing operations were in progress. In August though there was wide spread rainfall, it fell short of the requirements in South Satara, Kolhapur, Belgaum and Dharwar districts in the division. Water scarcity was felt in parts of South Satara district. In September, substantial rainfall was recorded in the division except in parts of South Satara district where more rain was needed for the growth of crops. Transplanting of tobacco was nearing completion in Belgaum district and cotton sowings were generally in progress in the division. In October, the rainfall proved somewhat excessive. Consequently standing crops were affected to some extent and rabi sowings were hampered. In November, light to fair rainfall was recorded in the division. The precipitation in the first week was rather heavy and proved excessive in parts of Belgaum and Bijapur districts, where harvesting of kharif crops was hampered. In December and January there was no rainfall in the division, except for light showers in parts of Kolhapur, Belgaum and Dharwar districts. In February and March there was practically no rainfall.

Harvesting of rabi crops and picking of cotton were in progress. Water shortage was observed in parts of Bijapur district. Untimely rains in April damaged Jayadhar variety of cotton to some extent in most parts of the division.

As regards incidence of crop pests and plant diseases, red leaf blight and black arm on cotton and stem borer and grass-hoppers on jowar were reported from parts of the division. Sugarcane was affected by mealy bugs. Blight and rust on potatoes and aphids on groundnut and peas were noticed in parts of the division. Blue-beetles on paddy were reported from places. Leaf-curl on chillies, aphids on cabbage and sugary-secretion and stem-borer on jowar were noticed at places. Cattle diseases were observed in parts of the division.

CHAPTER II—AREA CULTIVATED AND UNCULTIVATED.

(Table II—Pages 47-51).

(Summary Table A—Page 28).

4. *Number of Villages.*—During the year 1955-56, the number of villages in the State was 35,764 as against 35,815 during the previous year, thus showing a decrease of 51 villages. This decrease was mainly accounted for by Sabarkantha and West Khandesh districts where 47 small villages or hamlets or deserted villages were merged or amalgamated into the neighbouring bigger villages. In the other districts negligible changes were noticed in the number of villages due to the splitting up of certain villages or to the amalgamation of small villages with the neighbouring bigger ones.

5. *Total area—Reporting and non-reporting areas.*—The total area i.e., the geographical area of the Bombay State was almost stationary, being 70,908,600 acres during the year under report, as against 71,024,900 acres during the previous year, thus showing a slight decrease of 0·2 per cent. This decrease in the geographical area was attributed to the more accurate information obtained due to recent survey in Ahmedabad and Baroda districts. Of the total area of the State, the reporting area was 65,653,500 acres and the non-reporting area i.e., the area for which no returns exist, was 5,255,100 acres, as against the corresponding figures of 65,174,000 acres and 5,850,900 acres respectively during the previous year. In Dangs district although the details for the total area of 423,000 acres are available, details for the reported area of 149,500 acres are not separately available.

6. *Cropped areas.*—The gross cropped area in the State increased from 45,223,100 acres in 1954-55 to 45,249,700 acres during the year under report, thus recording a slight increase of 0·1 per cent. The 'Net cropped area' also showed a slight increase of 0·2 per cent., it being 43,230,200 acres in 1955-56 as against 43,159,600 acres during the previous year. The acreage under 'Area cropped more than once', however, showed a decrease of 2·1 per cent., having gone down from 2,063,500 acres in 1954-55 to 2,019,500 acres during the year under report. The area under 'Forests' remained almost stationary, it being 10,776,000 acres during the year under report as against 10,754,800 acres during

1954-55, thus recording a slight increase of 0.2 per cent., only. During the year under report, the acreage under 'Barren and Unculturable land' went up by 6.5 per cent. This was due to wrong classification of the figures in some district during 1954-55. On the contrary, the acreage under 'Land put to non-agricultural uses', 'Culturable waste', 'Permanent pastures and other grazing land', 'Land under miscellaneous trees, crops and groves not included in the area sown', 'Current fallows', and 'Other fallow land' recorded a decrease of 11.6, 10.0, 2.8, 27.8, 0.5 and 1.4 per cent., respectively, as compared with the corresponding figures of the previous year.

CHAPTER III—IRRIGATED AREAS.

(Tables III-A and III-B—Pages 52-81).

(Summary Tables B and C—Pages 28-31).

7. *Sources of water supply.*—During the year 1955-56, the number of Government canals reported was 1,091 as against 1,090 reported during the year 1954-55, thus recording a slight increase of 0.1 per cent. There was also an increase in the mileage of these canals from 2,229 to 2,329 or by 4.5 per cent. The number of private canals and their mileage showed an increase of 7.3 and 6.5 per cent., or from 7,326 and 4,674 in 1954-55 to 7,862 and 4,976 in 1955-56 respectively. The number of Government tube-wells went up from 183 to 282 or by 50.0 per cent. This increase was reported from Mehsana and Ahmedabad districts while the number of private tube wells remained stationary. The number of Government 'masonry' wells used for irrigation purposes only recorded a decrease of 23.6 per cent., having gone down from 6,792 in 1954-55 to 5,187 during the year under report. This decrease was mainly reported by Amreli, Baroda, Broach and Surat districts. The number of Government 'non-masonry' wells used for irrigation purposes only, also recorded a decrease from 2,244 in 1954-55 to 2,195 during the year under report or by 2.2 per cent. On the other hand the number of private 'masonry' and 'non-masonry' wells used for irrigation purposes only went up from 350,272 and 205,678 in 1954-55 to 369,647 and 209,001 in 1955-56, respectively, or by 5.5 and 1.6 per cent. The number of wells used for domestic purposes only went down from 244,493 in 1954-55 to 240,569 during the year under report, or by 1.6 per cent. The number of wells not in use showed a decrease of 0.6 per cent., having gone down from 71,094 in 1954-55 to 70,668 during the year under report. The number of wells having independent ayacuts showed an increase of 12.5 per cent., it being 198,941 in 1955-56 as against 176,876 during the previous year. The number of wells supplementing recognised sources of irrigation showed a fall of 19.2 per cent., having gone down from 36,206 in 1954-55 to 29,337 during the year under report. The number of reservoirs showed a small increase of 3.5 per cent., going up from 1,439 in 1954-55 to 1,490 in 1955-56. The number of tanks with ayacut 100 acres or more showed a large increase of 31.5 per cent., going up from 1,051 in 1954-55 to 1,382 in 1955-56, while the number of tanks with ayacut less than 100 acres showed a slight decrease of 1.8 per cent., or from 28,160 in 1954-55 to 27,641 in 1955-56. The number of oil engines showed an increase from 34,905 in 1954-55 to 38,613 during the year under report or by 10.6 per cent.

8. *Irrigated areas.*—The total area irrigated in the State was 2,739,200 acres during the year under report as against 2,572,100 acres during 1954-55, thus recording an increase of 6·5 per cent. The increase in area was noticed mainly in the case of wheat, rabi jowar and cotton.

During the year under report, the percentage of net area irrigated to the net area sown was 5·6 as against 5·2 during 1954-55. The percentage of the gross irrigated area to the gross area sown was 6·1 during 1955-56 as against 5·7 during the year 1954-55.

9. *Area irrigated under different sources of irrigation.*—The area irrigated by Government canals, tanks, wells and other sources went up by 482,700, 225,800, 1,555,600 and 99,400 acres or by 5·9, 4·4, 9·1 and 7·3 per cent., respectively. On the other hand, the area irrigated by private canals went down by 68,200 acres or by 1·3 per cent. when compared to that of last year.

10. *Irrigated areas under food and non-food crops.*—The total area irrigated by all sources was 2,739,200 acres as against 2,572,100 acres during the previous year, thus recording an increase of 6·5 per cent. The area irrigated under food crops during 1955-56 was 2,306,800 acres as against 2,183,800 acres during the previous year, thus recording an increase of 5·6 per cent. Significant increase was noticed in the case of wheat and rabi jowar, the irrigated acreages under these, having gone up by 11·2 and 15·9 per cent., respectively. The irrigated area under non-food crops also showed an increase of 11·4 per cent. it being 432,400 acres during 1955-56 as against 388,300 acres during the previous year. This significant increase was mainly because of rise in area under cotton from 75,800 to 111,700 acres or by 47·4 per cent.

CHAPTER IV—CROPPED AREA.

(Tables IV-A, IV-B and IV-C—Pages 82-148).

(Summary Table D—Pages 31-34).

11. *Total area under crops.*—During the year 1955-56, the total gross cropped area of 45,249,700 acres was slightly higher by 26,600 acres than the corresponding figure of the previous year, viz. 45,223,100 acres or by 0·1 per cent. The increase in the gross cropped area to an extent of 2·2 per cent. and 0·8 per cent. was noticed in the divisions of Konkan and Karnatak, the area figures being 2,466,300 and 11,555,800 acres respectively. In the Gujarat and the Deccan, the gross cropped area was below the corresponding figures of the previous year by 0·3 and 0·4 per cent., respectively, it being 14,126,300 acres in the Gujarat and 17,101,300 acres in the Deccan during the year under report. For the State as a whole food crops occupied an area of 30,938,800 acres or 68·4 per cent., while non-food crops occupied 14,310,900, acres or 31·6 per cent. of the total area sown. During the year under review the acreage under food crops showed a slight decrease of 1·5 per cent. or 480,200 acres as compared with the previous year, while the area under non-food crops recorded an increase of 3·7 per cent. or 506,800 acres.

The table below gives the acreage under food and non-food crops in the four divisions of the State during the years 1954-55 and 1955-56 :—

(figures in hundreds.)

Division	Food crops			Non-food crops		
	1954-55	1955-56	Percentage increase or decrease	1954-55	1955-56	Percentage increase or decrease
	Acres	Acres		Acres	Acres	
Gujarat	.. 86,025	82,556	—4·0	55,692	58,707	+5·4
Konkan	.. 18,494	18,586	+0·5	5,637	6,077	+7·8
Deccan	.. 130,753	128,813	—1·5	41,019	42,200	+2·9
Karnatak	.. 78,918	79,433	+0·7	35,693	36,125	+1·2
State	.. 314,190	309,388	—1·5	138,041	143,109	+3·7

It will be seen from the above table that under food crops there was a decrease of 346,900 acres or 4·0 per cent. in the Gujarat and 194,000 acres or 1·5 per cent. in the Deccan. In the Konkan and the Karnatak, however, there was a very slight increase of 0·5 and 0·7 per cent. or 9,200 acres and 51,500 acres respectively. On the contrary, the area of non-food crops recorded an increase of 301,500 acres or 5·4 per cent. in the Gujarat, 44,000 acres or 7·8 per cent. in the Konkan, 118,100 acres or 2·9 per cent. in the Deccan and 43,200 acres or 1·2 per cent. in the Karnatak.

12. *Food crops.*—Among the main food crops, as compared with the corresponding figures of the previous year, the area under rice went down by 3·4 per cent. or 116,800 acres. This decrease was shared by the Gujarat and the Deccan where the acreages went down by 122,300 acres or 10·3 per cent. and 4,300 acres or 1·1 per cent. respectively. At the State level, the area under wheat recorded an increase of 15·4 per cent. or 302,800 acres. This significant increase was shared by all the wheat-growing divisions viz., the Gujarat, the Deccan and the Karnatak by 140,800 acres or 19·0 per cent. 93,400 acres or 13·9 per cent. and 68,600 acres or 12·4 per cent., respectively. During the year 1955-56, the acreage under kharif jowar at the State level recorded an increase of 234,000 acres or 6·3 per cent. This increase was shared mainly by the Gujarat and the Karnatak and was of the order of 11·8 per cent. or 148,100 acres and 6·4 per cent. or 112,500 acres, respectively. The Deccan division, however, recorded a slight decline of 26,800 acres or 3·8 per cent. under this crop. The acreage under rabi jowar at the State level also went up by 506,500 acres or 7·3 per cent. This increase was shared only by the Deccan by 590,200 acres or 12·8 per cent. while the Gujarat and the Karnatak recorded a fall of 26,000 acres or 7·4 per cent. and 57,800 acres or 3·0 per cent., respectively. The area under bajri recorded a decrease of 906,300 acres or 12·3 per cent. at the State level. This decrease was shared by all bajri-growing divisions, it being 300,500 acres or 12·3 per cent. in the Gujarat, 454,300 acres or 12·7 per cent. in the Deccan and 51,500 acres or 4·3 per cent. in the Karnatak. The area under ragi showed also a small decrease of 4·4

or 35,500 acres at the State level. This decrease was mainly due to fall of acreage in the Gujarat, the Deccan and the Karnatak divisions by 19·5, 2·5 and 1·9 per cent., or by 29,900 acres, 6,100 acres and 2,800 acres, respectively. The Konkan recorded a small increase of 1·3 per cent. or 3,300 acres. The area under maize remained almost stationary, going down by 0·5 per cent. or 3,000 acres. The area under gram at the State level recorded an increase of 6·7 per cent. or 55,100 acres and was due to increase in the area in the Gujarat and the Deccan by 14·9 per cent. and 6·0 per cent. or 37,900 acres and 21,900 acres, respectively. The area under tur showed a decrease of 9·2 per cent. or 68,300 acres. This decrease was shared by the Gujarat, the Deccan and the Karnatak where the area decreased by 34,600 acres or 15·6 per cent., 31,900 acres or 11·9 per cent. and 1,900 acres or 0·8 per cent. respectively. The area under sugarcane showed an increase of 7·4 per cent., or 16,800 acres. This increase was shared by all the divisions, it being 2,700 acres or 27·0 per cent. in the Gujarat, 1,000 acres or 2·8 per cent. in the Konkan, 6,600 acres or 5·3 per cent. in the Deccan and 7,400 acres or 8·3 per cent. in the Karnatak. The total area under kharif food crops for the State as a whole went down by 6·3 per cent., while the area under rabi food crops went up by 8·2 per cent.

13. *Non-food crops.*—In the case of cotton, there was an increase in the acreage in the three cotton-growing divisions, viz. the Gujarat, the Deccan and the Karnatak and it was of the order of 12·2 per cent. or 310,900 acres, 11·3 per cent. or 124,700 acres and 6·1 per cent. or 84,700 acres, respectively, in these divisions and consequently the acreage at the State level went up by 10·3 per cent. or 520,300 acres. The area under groundnut, however, recorded a decrease of 8·1 per cent. or 253,200 acres at the State level. This decrease was shared by all the three divisions of the State viz. the Gujarat, the Deccan and the Karnatak, where it was of the order of 21·3, 3·5 and 3·3 per cent. or 174,400 acres, 38,800 acres and 39,900 acres, respectively. This decrease was reported to be mainly due to the diversion of the area mostly to cotton. The total area under sesamum also recorded a decline of 16·2 per cent. or 59,400 acres. This decrease was shared by the Gujarat and the Deccan, where the area went down by 50,200 acres or 25·1 per cent. and 7,200 acres or 8·6 per cent., respectively, while the Konkan and the Karnatak showed an increase of 1,000 acres or 5·7 per cent. and 7,000 acres or 25·9 per cent., respectively. The area under tobacco went up by 9·0 per cent. or 25,800 acres. This increase was shared only by the Gujarat where it was 28·9 per cent. or 41,600 acres. The Deccan and the Karnatak recorded a fall of 2,500 acres or 28·1 per cent. and 13,300 acres or 9·9 per cent. The large increase in the Gujarat was attributed to the good demand for the commodity in the market and also due to favourable rains. The total area under kharif non-food crops and rabi non-food crops both went up by 1·3 and 11·0 per cent., respectively.

14. On the whole, during the year under review, the gross cropped area remained almost the same as compared with the corresponding figure of the previous year. The accompanying table gives the gross cropped area, double cropped area, net cropped area and the area under principal crops in the four divisions of the State during the years 1954-55 and 1955-56 :—

CHAPTER V—OUTTURN OF CROPS AND THEIR
AVERAGE YIELDS.

(Tables V-A and V-B—Pages 149-190).

(Summary Table E—Pages 35-36).

15. *Outturn of crops.*—The table below gives the outturn in tons of principal kharif and rabi crops :—

(Figures in thousand tons)

Division	Kharif crops			Rabi crops			Total cereals	Total pulses	Total cereal and pulses
	Cereals.	Pulses	Total cereals and pulses	Cereals	Pulses	Total cereals and pulses

State ..	3,287	359	3,646	1,529	206	1,735	4,816	565	5,381

The 1955-56 season has been unfavourable over a large part of the State from the point of view of reduced yields of crops than those in the preceding year. It was due to unfavourable character of the season and other adverse factors such as pests and diseases ; affecting the quality as well as the quantity of the yields. The remarks in respect of major crops are given below :—

Rice.—In the Gujarat, the crop suffered to a varying extent on account of early inadequate rains and untimely late rains during the season. In the Konkan, due to inadequate rains in July, *Hodata* operations in parts of Kanara district and transplanting operations in parts of Thana district were held up. Elsewhere in the division there was substantial rainfall and the crop throve well. The crop was, however, adversely affected in parts of the division due to untimely late rains. In the Deccan, the crop was in a fair condition except in some parts where it was adversely affected due to untimely rains in October. In the Karnatak, the crop suffered in the early stage due to inadequate rains, while it also suffered on account of the untimely rains received at the grain formation stage in parts of the division. Slight attack of blight was reported from Banaskantha district and of blast from parts of Ahmedabad and Kaira districts. Attack of stem-borers and rat trouble was reported from Panch Mahals district. Blue beetle attack was reported from parts of Thana district. Blue beetles, bacterial blight and

army-worms were reported from parts of Kolaba district and blue beetles and army-worms were noticed in parts of Ratnagiri district. Caterpillars on paddy as also rice-hispa were reported from parts of the division. Blast was reported from parts of Dangs and Nasik districts. Blast and smut affected the crop in parts of south Satara district and blast, case-worms, blue beetles, stem and top-shoot borers were noticed in parts of Kolhapur and Dharwar districts. The area under the crop in the State declined from 3,394,500 acres during the preceding year to 3,277,700 acres during the year under report or by 3.4 per cent., while the outturn went down from 1,336,800 tons in the preceding year to 1,203,000 tons in the year under report or by 10.0 per cent due to unfavourable season and incidence of pests and diseases described above.

Wheat.—In the Gujarat, the Deccan and the Karnatak the crop fared well except in parts of Bijapur district in the Karnatak where sowings were delayed for want of adequate soil moisture. Field rat trouble was noticed in parts of Mehsana district. Rust attack was observed in parts of Kaira and Amreli districts. Rust attack was reported also from parts of the Deccan and the Karnatak divisions. Slight attack of *gerava* was noticed in West Khandesh district and alternaria in parts of Poona district. The area increased from 1,962,300 acres during the previous year to 2,265,100 acres during the year under report or by 15.4 per cent. The outturn also rose from 376,600 tons during the preceding year to 417,700 tons during the current year or by 10.9 per cent.

Kharif jowar.—The sowing of jowar was delayed due to inadequate rains. Further, the crop was damaged to some extent due to untimely late rains and consequently the crop condition was not satisfactory in the Gujarat, the Deccan and the Karnatak divisions. The crop was also attacked by pests and diseases i.e. by aphids in Amreli district and by grass-hoppers in parts of South Satara and Dharwar districts, while rust was noticed in parts of South Satara and Kolhapur districts. Stem-borers were also observed in parts of South Satara district and aphids and army-worms in parts of Kolhapur district. Attacks of insects on the ear-heads were reported from Belgaum district. The crop suffered heavily from sugary disease in Dharwar district. The area under the crop rose from 3,729,000 acres in the last year to 3,963,000 acres during the year under report or by 6.3 per cent., while the outturn went down from 993,000 tons in the previous year to 837,700 tons during the year under report or by 15.6 per cent. The reduction in the yield per acre coupled with the unhealthy speculations in the market, resulted in a considerable rise in the prices.

Rabi Jowar.—In the Gujarat, the crop fared well except that it suffered to some extent due to long break in rains followed by continuous rains in the early stage. In the Deccan the crop fared well except in North Satara district, where the germination was defective. In Sholapur district the crop suffered heavily on account of precipitate rains in the first week of November. In the Karnatak the crop thrived well except in parts of Bijapur district where it suffered to some extent due to heavy rains received at the early stage. *Chikta*, *Khairya*, *tambera*, smut and borer attacks were reported from parts of the Deccan and particularly in Sholapur district, where the attacks were severe,

resulting in low yields. Stem-borer attack and Chikta disease were noticed in parts of the Karnatak. The area under the crop increased from 6,908,300 acres in the last year to 7,414,800 acres during the year under report or by 7·3 per cent. The cutturn, however, went down from 1,091,300 tons in the last year to 981,700 tons during the year under report or by 10·0 per cent. The cutturn in Sholapur, the major rabi jowar growing district, went down by as much as 162,300 tons or by 44·8 per cent. when compared with that in the preceding year. Similarly in the North Satara district it went down by 27·7 per cent. when compared with that in the preceding year. This considerable reduction in cutturn in Sholapur district has thus contributed towards the reduction of cutturn at the State level; though the cutturn has generally increased in most of the other districts in the State.

Bajri.—In the Gujarat the crop suffered in the early stage on account of dry spell and also in the late stage due to continuous rains in September and October 1955. In the Deccan, sowing operations were delayed due to inadequate rains. During October 1955 the rainfall proved excessive and affected the crop in parts of East Khandesh, Ahmednagar, Poona and North Satara districts. In the Karnatak the crop suffered in the late stage due to excessive rains. Katra trouble was observed in Breach district. Army worms were observed in parts of Poona district and caterpillars in parts of the Deccan. Stray attacks of grass-hoppers were noticed in the Eastern parts of the division. The area declined from 7,340,000 acres in the preceding year to 6,433,700 acres during the year under report or by 12·3 per cent. The cutturn went down from 898,900 tons in the previous year to 703,100 tons during the year under report or by 21·8 per cent.

Maize.—In the Gujarat, the crop fared well on the whole except that it was affected in growth at places due to lack of soil moisture. The late and untimely rains further spoiled the harvested produce in parts of Baroda district. In the Deccan and the Karnatak the crop suffered to some extent due to inadequate rains in parts of Poona and South Satara districts. The crop also suffered due to heavy rains in the late stage in parts of the Karnatak division. Damage was caused to some extent by monkeys and birds in parts of Kolhapur district. The area under the crop remained almost constant being 564,600 acres during the year under review as against 567,600 acres during 1954-55. The outturn went down by 12·3 per cent. or from 218,700 tons in the previous year to 191,900 tons during the year under report.

Ragi.—In the Gujarat, the growth of the crop was arrested due to inadequate rains in the early stage. The crop was further adversely affected to some extent on account of continuous late rains in parts of Baroda district. In the Konkan, the crop suffered to some extent due to continuous late rains. In the Deccan and the Karnatak, the crop was adversely affected to some extent due to inadequate early rains and excessive late rains. Stray attacks of grass-hoppers were noticed in parts of Dharwar district. The area under the crop decreased from 806,400 acres during the previous year to 770,900 acres in the current year or by 4·4 per cent. and the cutturn went down from 250,300 tons during the preceding year to 224,600 tons during the year under report or by as much as 10·3 per cent.

Gram.—The germination and further growth of the crop were fairly satisfactory all over the State. The crop was slightly affected by frost in parts of Mehsana district. Stray attacks of caterpillars were observed in parts of Dharwar district. The area and outturn of the crop were 883,500 acres and 131,500 tons during the current year as against 828,400 acres and 116,200 tons during the preceding year, recording an increase of 6·7 per cent. and 13·2 per cent., respectively.

Cotton.—In the Gujarat, on account of uneven distribution of early rains, the sowing could not be carried out successfully and the cultivators had to resort to repeated re-sowings. The germination was not satisfactory and further growth of the crop was arrested due to inadequate rains in the division. On the other hand the crop particularly in the low-lying areas further suffered in growth and turned pale on account of subsequent heavy rains. In the Deccan, the rainfall was generally inadequate and as such the crop suffered in growth and had to be re-sown at places on account of unsatisfactory germination in parts of Khandesh where the crop suffered due to subsequent heavy rains causing shedding of flowers and buds. Interculturing operations and picking of cotton were hampered due to continuous precipitate rains in some areas. Rains in October spoiled the quality of cotton in parts of Khandesh district. In the Karnatak, the rainfall was inadequate and hence the sowing operations were delayed. The crop in its early stage was adversely affected by unfavourable stormy weather in parts of Dharwar district and further growth was stunted in the heavy black soil tract due to excessive rains. The crop was further damaged to some extent due to rains in early April in parts of the division. The condition of Jayadhar variety of cotton was not satisfactory due to unfavourable weather condition. In the Gujarat, the crop was affected to some extent in parts by cloudy weather and frost causing shedding of flowers and buds in December. Hairy caterpillars were observed in parts of Sabarkantha, Kaira, Baroda, Broach and Surat districts. Aphids were reported from parts of Mehsana, Ahmedabad, Kaira and Panch Mahals districts. Jassids were reported from Kaira district. Root-rot and wooly mites were reported from Surat district. Thrips, leaf-rollers and rat trouble were reported from Panch Mahals district. Boll-worms and anthracnose were observed in parts of Khandesh district. Thrips was reported from North Satara district and leaf-roller from Nasik district as also from parts of Ahmednagar district. Top-shoot borers were reported from North Deccan. Jassids were noticed in West Khandesh and Poona districts. Caterpillars, boll-worms, black arm and leaf-blast were reported from Sholapur district. Leaf-blast, leaf-curl, aphids and rust were observed in South Satara district. Red-bug blight and semi-loopers were reported from parts of Belgaum district. Slight attack of red-leaf-blight and black arm on irrigated cotton was reported from Bijapur district. Red-leaf blight, black arm, caterpillars, aphids and wilt were reported from Dharwar district. The area under the crop in the State which was 5,038,900 acres during the preceding year, increased to 5,559,200 acres during the year under report, recording an increase of 10·3 per cent. This increase was shared by all the cotton growing divisions in the State. On the other hand due to unfavourable seasonal conditions and other adverse factors the produce of the crop was affected in quality as well as in quantity, causing the reduction in the yield at the State level from

1,366,400 bales of 392 lbs. each during the preceding year to 1,259,100 bales during the year under report or by 7·9 per cent. This decrease in the outturn was shared to some extent by the Gujarat and mainly by the Deccan division where it went down by as much as 35·0 per cent., when compared to that during the preceding year. The outturn of the crop showed an increase of 10·4 per cent. in the Karnatak division and the yield per acre increased by 3·4 per cent. when compared with that in the preceding year in the division. The increase in the yield in the Karnatak division is, however, mainly shared by the large increased yields in South Satara and Kolhapur districts and slight increase in Belgaum district and small increase in Bijapur district, while the yield in Dharwar district remained almost the same as in the preceding year.

16. *Yield per acre.*—During the year under review, Statewise crop estimation surveys were continued on the ten principal crops, viz., paddy, kharif jowar, bajri, wheat, rabi jowar, gram, cotton, tobacco, maize and groundnut, while the survey on ragi was continued in Ratnagiri and Dangs districts.

17. *Kharif crops.*—The State as well as all the divisionwise average yields per acre of kharif crops based on crop estimation surveys are given below :—

Yield per acre									
Division.	Rice			Kharif jowar			Bajri		
	1954-55	1955-56	Percent- age increase or decrease	1954-55	1955-56	Percent- age increase or decrease	1954-55	1955-56	Percent- age increase or decrease

Konkan ..	1,154	1,112	-3·6	640	584	-8·8
Deccan ..	645	749	+16·1	761	506	-33·5	245	236	-3·7
Karnatak ..	949	808	-14·9	756	645	-14·7	157	206	+31·2
State ..	882	822	-6·8	596	473	-20·6	274	245	-10·6

From the above table, it is seen that for rice, the average yield at the State level declined by 6·8 per cent., going down from 882 lbs. in 1954-55 to 822 lb. during the year under report. This decrease was shared by all the divisions except the Deccan, where there was an increase in the average yield per acre from 645 lb. in 1954-55 to 749 lb. in 1955-56 or by 16·1 per cent. The Gujarat, the Konkan and the Karnatak showed a decrease of 19·1, 3·6 and 14·9 per cent., the average yield per acre going down from 649 lb., 1,154 lb. and 949 lb.

in 1954-55 to 525 lb., 1,112 lb. and 808 lb., respectively, in 1955-56. The average yield per acre of kharif jowar showed a decrease from 596 lb. to 473 lb. or by 20·6 per cent. This decrease was shared by all the main crop growing divisions, the Gujarat, the Deccan and the Karnatak where the average yield per acre went down by 17·9, 33·5 and 14·7 per cent. or from 279 lb., 761 lb. and 756 lb. to 229 lb., 506 lb. and 645 lb., respectively. In the case of bajri, the State average declined by 10·6 per cent. it being 274 lb. in 1954-55 as against 245 lb. during the year under report. This decrease was mainly due to the decline in the average yield in the Gujarat from 376 lb. to 278 lb. or by 26·1 per cent. The average yield for the Deccan went down by 3·7 per cent. or from 245 lb. to 236 lb. and that in the Karnatak rose from 157 lb. to 206 lb. or by 31·2 per cent., during the year 1955-56.

The average yields per acre of tur and of sesamum (based on anna-valuation figures of the Revenue Department) for the four divisions of the State are as shown below :—

Division	Yield per acre					
	Tur			Sesamum		
	1954-55	1955-56	Percentage increase or decrease	1954-55	1955-56	Percentage increase or decrease
	Lb.	Lb.		Lb.	Lb.	
Gujarat ..	458	457	-0·2	259	243	-6·2
Konkan ..	286	315	+10·1	205	218	+6·3
Deccan ..	537	493	-8·2	258	233	-9·7
Karnatak ..	543	536	-1·3	191	204	+6·8
State ..	511	495	-3·1	251	235	-6·4

For tur, the average yield per acre went down from 511 lb. during the preceding year to 495 lb. or by 3·1 per cent. The decrease was mainly noticed in the Deccan division where it went down by 8·2 per cent. or from 537 lb. in 1954-55 to 493 lb. during the year under report. In the case of sesamum, the average yield at the State level went down from 251 lb. to 235 lb. during 1955-56 or by 6·4 per cent. This decrease in the average yield at the State level was on account of decline in the yield in the Gujarat and the Deccan by 6·2 and 9·7 per cent., respectively.

18. The State and divisionwise average yields per acre of rabi crops (based on crop estimation surveys) are as under :—

Division	Yield per acre					
	Wheat			Rabi jowar		
	1954-55	1955-56	Percentage increase or decrease	1954-55	1955-56	Percentage increase or decrease
	Lb.	Lb.		Lb.	Lb.	
Gujarat ..	547	521	-4.8	480	432	-10.0
Deccan ..	432	392	-9.3	380	278	-26.8
Karnatak ..	270	286	+5.9	269	326	+21.2
State ..	430	413	-4.0	354	297	-16.1

From the above table it is seen that the State average yield per acre of wheat went down by 4.0 per cent. or from 430 lb. to 413 lb. during 1955-56, while the average yield rose by 5.9 per cent. in the Karnatak and that in the Gujarat and the Deccan went down by 4.8 and 9.3 per cent., respectively. In the case of rabi jowar, the average yield at the State level was 297 lb. as against 354 lb. during the previous year, thus recording a decrease of 16.1 per cent. This was mainly due to the decrease in the average yield in the Deccan and the Gujarat by 26.8 and 10.0 per cent. or from 380 lb. and 480 lb. during 1954-55 to 278 lb. and 432 lb. in 1955-56 respectively. In the Karnatak, the average yield rose by 21.2 per cent. or from 269 lb. in the preceding year to 326 lb. during the year under report.

The average yields per acre of rabi crops, viz., gram (based on crop estimation surveys), linseed, rape and mustard (based on anna-valuation figures of Revenue Department) for the four divisions of the State are given below :—

Division	Yield per acre								
	Gram			Linseed			Rape and Mustard		
	1954-55	1955-56	Percentage increase or decrease	1954-55	1955-56	Percentage increase or decrease	1954-55	1955-56	Percentage increase or decrease
	Lb.	Lb.		Lb.	Lb.		Lb.	Lb.	
Gujarat ..	400	395	-1.3	747	439	208	-52.6
Konkan ..	292	299	+2.4
Deccan ..	290	321	+10.7	163	152	-6.7	246	212	-13.8
Karnatak ..	251	267	+6.4	188	180	-4.3	286	314	+9.8
State ..	314	333	+6.1	187	170	-9.1	412	212	-48.5

For gram, the average yield for the State went up from 314 lb. to 333 lb. or by 6·1 per cent. This increase was shared mainly by the Deccan and the Karnatak where the average yield went up by 10·7 and 6·4 per cent. or from 290 lb. and 251 lb. to 321 lb. and 267 lb., respectively, while the Gujarat showed a slight decrease of 1·3 per cent.

In the case of linseed, the average yield per acre went down by 9·1 per cent. or from 187 lb. to 170 lb. during the year under report. The average yield of rape and mustard also went down by as much as 48·5 per cent. or from 412 lb. to 212 lb. in 1955-56. This decrease was shared mainly by the Gujarat where the average yield went down by 52·6 per cent. or from 439 lb. to 208 lb. in 1955-56. While the Deccan showed a decrease of 13·8 per cent., the Karnatak showed an increase of 9·8 per cent.

19. *Cotton, sugarcane and tobacco.*—The table below gives the average yield per acre of cotton (lint) (based on crop estimation surveys), sugarcane (gul) (based on anna-valuation figures of the Revenue Department) and Tobacco (based partly on crop estimation surveys in the major crop growing districts and partly on anna-valuation figures of the Revenue Department).

Division	Yield per acre								
	Cotton			Sugarcane			Tobacco		
	1954-55	1955-56	Percent- age increase or decrease	1954-55	1955-56	Percent- age increase or decrease	1954-55	1955-56	Percent- age increase or decrease
	Lb. (lint)	Lb. (lint)		Lb. (Gul)	Lb. (Gul)		Lb. (Dry leaf)	Lb. (Dry leaf)	
Gujarat ..	144	121	-16·0	4,838	4,409	-8·9	572	599	+4·7
Konkan	3,982	3,390	-14·9
Deccan ..	82	48	-41·5	7,239	7,123	-1·6	529	805	+52·2
Karnatak ..	58	60	+3·4	6,406	6,627	+3·4	375	326	-13·1
State ..	106	89	-16·0	6,754	6,728	-0·4	478	498	+4·2

The average yield per acre of cotton (lint) for the State was 89 lb. as against 106 lb. during the previous year, thus showing a decrease of 16·0 per cent. The average yield went down in the Gujarat and the Deccan from 144 lb. and 82 lb. to 121 lb. and 48 lb. or by 16·0 and 41·5 per cent. The Karnatak, however, recorded a slight increase of 3·4 per cent. or from 58 lb. to 60 lb. The yield per acre in Dharwar, the major cotton growing district in the Karnatak, however, went down by 7·2 per cent., being of the order of

64 lb. during the current year as against 69 lb. in the preceding year. The slight rise in the yield per acre in the division has been shared mainly by the other districts among which the Bijapur district has contributed only a small share. The State average yield per acre of sugarcane (Gul) viz., 6,728 lb. remained practically the same as in the previous year viz., 6,754 lb. The average yield of tobacco (dry leaf) went up from 478 lb. to 498 lb. or by 4.2 per cent. at the State level. The highest yield was obtained in the Deccan which recorded an average yield of 805 lb. as against 529 lb. in the previous year.

20. *Cotton*.—During the year under report, the total area and cutturn of cotton were 5,559 thousand acres and 1,259 thousand bales as against 5,039 thousand acres and 1,366 thousand bales during the previous year. Thus there was an increase in area by 10.3 per cent. and a decrease in cutturn by 7.8 per cent.

The table below gives the total area and cutturn of cotton in the different divisions of the State during 1954-55 and 1955-56 :—

(Area and outturn figures in thousands).

Division	Area in acres			Outturn in bales of 392 lb each		
	1954-55	1955-56	Percentage increase or decrease	1954-55	1955-56	Percentage increase or decrease
Gujarat ..	2,544	2,855	+12.2	933	884	-5.3
Deccan ..	1,100	1,224	+11.3	228	149	-34.6
Karnatak ..	1,395	1,480	+6.1	205	226	+10.2
State ..	5,039	5,559	+10.3	1,366	1,259	-7.8

CHAPTER VI—PRICES.

(Table VI—Pages 191-198).

(Summary Table F—Page 37).

21. Table VI of the report gives the average prices, during the harvest period, of the principal crops in different districts. The unfavourable character of the season resulting in low crop production caused to soar up the prices of agricultural produce in general.

22. The major variations, in the average harvest prices of principal commodities at the State level and in the different divisions as compared with the prices during the corresponding period of the previous year, are summarised below :—

At the State level, the price of rice (paddy) viz., Rs. 11-15 per maund of 82 2/7 lb. was higher by 6.7 per cent. than that of the previous year. The price went up by 2.5, 3.6, 1.4 and 23.9 per cent. in the Gujarat, the Konkan,

the Deccan and the Karnatak respectively. The price of wheat viz., Rs. 15-11 per maund was higher by 3·3 per cent. than that of the preceding year at the State level. In the Gujarat, the Deccan and the Karnatak, the prices rose by 4·2, 0·4 and 7·1 per cent., respectively. The price of Rs. 10-8 per maund of jowar, at the State level, was higher by 48·7 per cent. when compared with that of the previous year. The upward trend was noticed in all the divisions and was of the order of 48·4, 57·0 and 34·8 per cent. in the Gujarat, the Deccan and the Karnatak respectively. At the State level, the average price of Rs. 10-14 per maund of bajri was higher by 29·8 per cent. when compared with that of the previous year. The increase was shared by all the divisions and was of the order of 48·2, 22·0 and 8·4 per cent. in the Gujarat, the Deccan and the Karnatak respectively. The average price of Rs. 10-9 per maund of barley for the State, ruled higher by 34·1 per cent. as compared with that of the previous year. The price was higher by 32·0 per cent. in the Gujarat. The average price of Rs. 10-8 per maund at the State level for ragi (nachani) was higher than that of the previous year by 37·7 per cent. The increase was of the order of 46·8, 38·8, 21·8 and 49·2 per cent. in the Gujarat, the Konkan, the Deccan and the Karnatak respectively. The average price of maize viz., Rs. 10-7 per maund was higher by 77·7 per cent. at the State level and the increase was of the order of 88·8, 24·5 and 34·6 per cent. in the Gujarat, the Deccan and the Karnatak respectively. The price of kodra at Rs. 7-0 per maund was higher by 31·8 per cent. at the State level. The increase was of 35·5, 48·8 and 27·4 per cent. in the Gujarat, the Konkan and the Karnatak respectively; while it decreased by 18·0 per cent. in the Deccan. Among pulses, the average price of Rs. 15-0 per maund for tur-dal at the State level was higher by 28·3 per cent. The increase was of the order of 53·9, 42·3, 4·2 and 28·1 per cent. in the Gujarat, the Konkan, the Deccan and the Karnatak respectively. The price of Gram viz., Rs. 12-3 per maund was lower by 1·5 per cent. at the State level, it being 16·6 and 18·4 per cent. below that of the preceding year in the Konkan and the Deccan respectively. The price, however, increased by 18·3 and 13·6 per cent. in the Gujarat and the Karnatak respectively. The average price of gul viz., Rs. 12-11 per maund was higher by 5·8 per cent. than that of the preceding year. The increase was of the order of 4·8 and 17·5 per cent. in the Gujarat and the Deccan respectively. The price, however, went down by 10·3 and 8·4 per cent. in the Konkan and the Karnatak respectively. The average price of groundnut at the State level viz., Rs. 12-13 per maund was higher by 12·6 per cent. than that of the previous year. It was higher by 39·3 and 16·0 per cent. in the Gujarat and the Karnatak respectively. The price, however, went down by 2·1 per cent. in the Deccan. The price of Rs. 44-4 per maund of tobacco was slightly higher by 1·7 per cent. at the State level when compared with that in the preceding year. In the Karnatak, however, the increase in the price was as high as 85·1 per cent.; while in the Gujarat and the Deccan it went down by 32·3 and 46·7 per cent., respectively. The average price of cotton viz., Rs. 35-15 per maund was higher by 15·5 per cent. at the State level. The rise was noted in all the divisions and was of the order of 11·1, 15·0 and 37·6 per cent. in the Gujarat, the Deccan and the Karnatak respectively.

23. The table below compares the prices of Broach (Vijay) and Jarila (Virnar) cotton ruling at Bombay during the year under review with those of the previous year and the average of the preceding five years :—

Variety of cotton	Prices per khandi of 784 lbs.			Variation	
	Average of the five years ending 1954	1955	1956	Compared with the average price	Compared with the price of 1955
	Rs.	Rs.	Rs.	Per cent.	Per cent.
Broach (Vijay) ..	879	925	945	+7.5	+2.2
Jarila (Virnar) ..	781	820	825	+5.6	+0.6

The prices of cotton ruled steady and were at the lowest in the month of August 1955 with a slight rise in the months of September and October 1955. There was, however, a sudden rise in prices in November and December 1955 due to untimely and precipitate rains received in October 1955, which affected the crop and there was marked deterioration in the quality of the produce of the crop. Reports of record sales of piece goods during Diwali festival and cheerful reports from the cloth market coupled with deterioration in crop, keen demand for good quality cotton of old and new crops from the spinners and of other varieties from exporters, firmed up the prices. All outstanding hedge contracts for February 1956 and May 1956 deliveries and on call contracts in so far as the cotton was uncalled thereunder or in so far as the price had not been fixed thereunder relating to the said deliveries, were to be closed out and further trading in the hedge contracts in the circumstances was not permitted. However, prices in the spot markets ruled steady in view of limited stocks of desirable grades. Forward market moved within the narrow limits mainly on the seasonal reports affecting the crop, as will be evinced from the trend of the prices recorded in the sub-joined table.

(Prices per khandi of 784 lb.)

Year and month	Jarila (Virnar) (fine) (Average price)		Broach (Vijay) (Average price)
	Rs.	Rs.	Rs.
August 1955	628
September 1955	650
October 1955	650
November 1955	776
December 1955	783
January 1956	766
February 1956	767
March 1956	765
April 1956	774
May 1956	801
June 1956	820
July 1956	825

CHAPTER VII—AGRICULTURAL WAGES.

(Table VII—Pages 119-211).

(Summary Table G—Page 28).

24. In this State, according to the Manual of Revenue Accounts, agricultural labour is classified under three categories viz. (a) skilled, (b) ordinary and (c) field labour. Skilled labour comprises of carpenters, black-smiths and cobblers, ordinary labour consists of load carrying coolies, well-diggers, masons' or carpenters' assistants, earth workers etc., while field labour comprises of plough-men, sowers, reapers, harvesters, weeders and transplanters etc. In the report (in table VII—Agricultural wages) in addition to the above three categories, one more category is added viz., herds-men, whose main work is to collect livestock from different owners and to feed them in the jungle during the day and to bring them back in the evening to the owners' places.

25. Table VII of the report gives districtwise figures of wages of different classes of agricultural labour. Perusal of summary table "G" shows that during the year 1955-56, the wages of carpenters, field labourers and herds-men remained the same as those in the previous year viz. 1954-55. The wages of black-smith showed a slight rise from Rs. 3-3 during the previous year to Rs. 3-4 during the year under report. The wages of cobblers and other agricultural labourers, however, showed a slight downward trend, the same being Rs. 2-11 and Rs. 1-3 respectively during the year under report as against the corresponding figures of Rs. 2-12 and Rs. 1-4 during the preceding year.

CHAPTER VIII—AGRICULTURAL STOCK.

(Table VIII—Pages 212-216).

(Summary Table H—Pages 39-40).

26. Table VIII of this report gives the details of livestock, poultry and agricultural machinery and implements as per quinquennial census of livestock conducted in April 1956 by the Director, Bureau of Economics and Statistics. The comments on the variation in the livestock numbers during the two quinquennia are based on the note sent by the Director, Bureau of Economics and Statistics. Summary Table H gives the total number of livestock, poultry, agricultural machinery and implements, under each main head.

Cattle.—There is a slight increase in the number of cattle from 11,915,298 to 12,040,354 or by 1.0 per cent. over that of the preceding quinquennial census of livestock taken in May 1951. The number of breeding bulls over three years went down by 65.7 per cent. This decline was due to the general tendency to utilise the bulls kept for breeding purposes, for other

work also. It is, therefore, likely that a substantial number of the breeding bulls might have been enumerated as 'working bulls' and consequently included in that category. On the other hand the number of 'other males over three years' recorded a slight increase of 2.6 per cent. The number of breeding cows over three years recorded an increase by as much as 95.0 per cent., while the number of other cows over three years went down by 98.3 per cent. It will be seen from the foot-note given below Table VIII that the number of breeding cows in columns 5 and 11 relates to the cows in milk, dry cows and also cows not calved. In the month of April 1956 during which the census has been taken; generally the possibility of animals going 'dry' is reported to be very high. Inclusion of dry cows as also cows over three years 'not calved' in this category speak for the increase. This rise has not only compensated the decrease in the number of milch cattle but has surpassed the deficiency and recorded an increase. The increase in the breeding cows was reflected in the corresponding depletion in the number of other cows over three years. The number of young stock showed an increase of 5.4 per cent. over that of 1950-51.

Buffaloes.—The total number of buffaloes increased from 4,161,950 to 4,433,382 or by 6.5 per cent. over the year 1950-51. The number of breeding bulls over three years as also the number of other males over three years declined by 23.0 per cent. and 9.7 per cent., respectively. The number of breeding cows over three years recorded an increase of 57.7 per cent., while the number of other cows over three years depleted by as much as 97.4 per cent. The causes for increase and decrease in these cases were practically the same as those given in the case of breeding cows over three years in the preceding paragraph. The number of young stock, however, recorded an increase of 21.2 per cent. There had been reports that the people engaged in milk trade resorted to killing the young stock, as the rearing of the calves proved uneconomic. The Government have, therefore, taken steps by instituting calf rearing units. As a result, the survival rate of the young stock has considerably increased as evinced at the time of the 1956 census, which speaks for the increase noticed.

Sheep and Goats.—While the number of sheep declined by 1.5 per cent., that of goats rose by 1.3 per cent., as compared with the corresponding numbers of the year 1950-51.

Horses and Ponies.—The total number of horses and ponies went down by 9.1 per cent., when compared with the corresponding number of the year 1950-51. This decline might be due to the steady decline of horse-drawn vehicles in urban areas. The number of males over three years and the number of young stock declined by 8.5 per cent., and 20.6 per cent., respectively, while the number of females over three years showed a slight rise of 2.9 per cent. when compared with the corresponding number of the year 1950-51.

The number of mules and donkeys went down by 82.7 per cent. and 9.6 per cent., respectively, while that of camels and pigs showed a rise of 23.2 per cent. and 34.6 per cent., respectively, when compared with the corresponding figures of the 1951 census.

The total number of livestock recorded an increase of 4·0 per cent. over that of the year 1950-51.

Poultry.—The total poultry showed an increase of 48·2 per cent. The number of fowls increased by 48·2 per cent., while the number of ducks declined by 2·2 per cent., when compared to those in the year 1950-51. The increase in the number of poultry is principally due to the mass vaccination programme launched by the Government Veterinary Department.

Agricultural machinery and implements.—The number of tractors, oil engines, ploughs and carts showed an increase of 47·1, 36·0, 3·3 and 1·9 per cent., respectively, while that of sugarcane crushers, Electric pumps and Ghanies declined by 26·1, 24·4 and 26·2 per cent., respectively, when compared with the corresponding figures of the 1951 census.

CHAPTER IX—AGRICULTURAL OUTLOOK.

27. As described in Chapter I of the report, the season under review, on the whole, was unfavourable, although the rabi season was comparatively better than the kharif season. The unfavourable character of the season was reflected in the low yields of the principal crops over large part of the State when compared with those during the preceding year, although the total area under cultivation remained almost the same as can be seen from Summary Table "A".

28. The table below compares for the years 1954-55 and 1955-56 the actual acreage sown and the outturn of food-grain crops in the State and its different divisions :

(Figures in thousands)

Division	Area in acres		Outturn in tons	
	1954-55	1955-56	1954-55	1955-56
Gujarat	8,411	8,031	1,839	1,470
Konkan	1,771	1,777	741	721
Deccan	12,705	12,483	2,083	1,740
Karnatak	7,599	7,638	1,479	1,450
State	30,486	29,929	6,142	5,381

29. It will be seen from the above table, that due to uneven distribution of early rains and untimely incessant late rains, although the area under food-grain crops in the State showed only a slight reduction when compared with that during the preceding year, the outturn of these crops went down

by a considerable extent during the year under report. Supply of improved seeds and manures, grant of *tagai* loans to the cultivators, through Government schemes and adoption of improved cultivation and plant protection practices etc. by the cultivators in general, contributed towards relieving the situation caused by the natural calamities. Owing to the unfavourable seasonal conditions and other adverse factors resulting in low crop yields, there was a deficiency of food and fodder in parts of the State. As a result prices of food grains in particular those of millets soared up and continued to rule high. The Development Projects continued to function in several National Extension Blocks during the year under report and proved of benefit and afforded relief to the masses in the rural areas.

30. The condition of cattle was generally satisfactory. There were, however, outbreaks of cattle diseases such as haemorrhagic septicaemia, rinderpest, foot and mouth, black quarters and other animal diseases, in parts of the State, but these were brought under control by prompt and effective measures. There were also outbreaks of attack of malaria, cholera, small-pox, etc. in parts of the State, but these too were brought under control by resorting to prompt remedial and preventive measures. Prevalence of these epizootics and epidemics, however, did not hamper the progress of the agricultural operation to any considerable extent.

31. The table below gives the average prices of agricultural commodities prevailing at harvest time for the years 1951-52 to 1955-56 :—

Prices are in rupees per maund of 3,200 tolas except for cotton, the prices of which are recorded in rupees per Khandi of 784 lb.

Commodity	Centre	1951-52		1952-53		1953-54		1954-55		1955-56

The centres mentioned in the above table are representative markets and accordingly the prices of agricultural produce in these markets indicate the general tendency in the variations of prices of the commodities in the State.

CHAPTER X—CONDITION OF AGRICULTURAL POPULATION.

32. The economic condition of the agriculturists during the year under report was on the whole not satisfactory. The prices of agricultural commodities went up and continued to rule at high level due to unhealthy speculative tendencies prevailing in the markets. For the poor yields of crops the agriculturists were to some extent, compensated by high prices of both food and money crops. The benefits that should have accrued as a result of these high prices were, however, off-set to some extent by the increased cost of cultivation, resulting from the scarcity condition and the high cost of other necessities of life. Scarcity condition prevailed in parts of Sholapur and Ahmednagar districts due to failure of crops. In order to mitigate the situation and to afford relief, Government started relief works such as construction of dams, large scale contour bunding etc., as also cash doles to the discrepits. Efforts were continued for the successful implementation of the five-year plan and the results so far achieved have been encouraging. The Bombay Money Lenders Act and the Bombay Agricultural Debtors Relief Act in operation, gave protection to the cultivators from the usurious practices of private money lenders. The Bombay Tenancy and Agricultural Land Act continued to help and improve the lot of the tenant-class.

S. P. MOHITE,
Director of Agriculture,
Bombay State, Poona.

SUMMARY TABLE A.

CLASSIFICATION OF AREA.

(Figures in hundreds)

Heads of classification	1954-55		1955-56		Percentage increase or decrease
	Area	Percentage of total	Area	Percentage of total	
	Acres.		Acres.		
Total area (by village papers).	710,249	...	709,086	...	-0.2
Forests ...	107,548	15.1	107,760	15.2	+0.2
Barren and unculturable land...	64,483	9.1	68,679	9.7	+6.5
Land put to non-agricultural uses.	9,760	1.4	8,630	1.2	-11.6
Culturable waste ...	26,265	3.7	23,630	3.3	-10.0
Permanent pastures and other grazinglands.	25,647	3.6	24,931	3.5	-2.8
Land under miscellaneous tree crops and groves not included in area sown.	4,937	0.7	3,586	0.5	-27.8
Current fallows ...	13,904	2.0	13,835	2.0	-0.5
Other fallow land ...	26,109	3.7	25,753	3.6	-1.4
Net area sown ...	431,596	60.7	432,302	61.0	+0.2
Area sown more than once ...	20,635	2.9	20,195	2.8	-2.1
Total sown area ...	452,231	63.6	452,497	63.8	+0.1
