BOMBAY DIVISION

SOCIO-ECONOMIC REVIEW

1965-66

CHAPTER-I

I N T R O D U C T I O N

1.1 LOCATION AND BOUNDARIES:-

1.1.2 The Bombay Division of Maharashtra State comprising seven districts viz. (i) Greater Bombay, (ii) Thana, (iii) Kolaba, (iv) Ratnagiri, (v) Nasik, (vi) Dhulia and (vii) Jalgaon is somewhat crescent-shaped. Unlike other Divisions, it is particularly marked with length rather than breadth. Peculiarly this division spread through-out the whole length of nearly 700 Km. of Maharashtra State, touching the far north and south ends of the State. Whole of the western portion of Maharashtra is thus belted by this Division.

1.1.2 The Bombay Division is situated between 22°-2" and 15°-30" north latitude and 72°-45' and 76°-28' east longitude. Its northern portion is formed by Districts of Nasik, Dhulia and Jalgaon, which seem to have clustered to some extent, whereas the southern half of the Division is nothing but a strip of about 65Km. breadth, formed by the districts of Greater Bombay, Thana Kolaba and Ratnagiri talling one another.

1.1.3 At its north, the Bombay Division is bounded by Madhya Pradesh and at its south there are States of Mysore and the Union Territory of Goa separated by Terkhol Creek. The east portion of the Division is adjacent to the districts of Buldhana, and Aurangabad, from Nagpur and Aurangabad Divisions and Ahmednagar, Poona, Satara, Sangli and Kolhapur Districts of Poona Division. Whole of the length of about 720 Km. of the Arabian Sea-Coast of Maharashtra State at its west-side is shared by this Division. At the north-west corner of this division, there lies Surat District of Gujrat State and Union Territory of Daman. The natural boundaries of this Division are provided by Arabian sea towards the west, Sahyadri Range towards the north-west and east of the southern half, Satpuras towards the north and Terkhhol Creek at the south.

1.1.4 Geographically this Division can be sub-divided in two zones, Konkan, comprising mainly Greater Bombay, Thana, Kolaba and Ratnagiri districts and Ghat or Desh, constituted by the districts of Nasik, Dhulia and Jalgaon.

1.2 TOPOGRAPHY:-

1.2.1 While considering topography of the Bombay Division, the two zones of Konkan and Desh are necessary to be kept in view. The three characteristics of the topography of Konkan at once come to the forefront and on the coastalline lies, almost parallel to it the plain strip of about 25-30 Km. breadth, which is locally known as "KHALATI". Most of this portion is a sight of flat low lying rice tracts. Apart from rice cultivation, noticeable feature, in the economy of this "Bunder Patti" or "Khalati" is the fodder cultivation, which is accounted for by flourishing trade in grass and hay. Another noticeable feature of the coastal strip is the fishing industry carried on, on a large scale, in the villages around the coast. The noticeable feature of this tract is that whatever industrilisation in the backward region of Konkan has taken place, pertains to this area. Particularly in Thana district (excluding Greater Bombay) organised industries of different types such as manufactures of Rayon, Silk, Bricks, Medicines, Chemicals, etc., have been located. In the districts of Kolaba and Ratnagiri also, industrial belts are now formed. On the east of Khalati stand the mountainous ranges of the Sahyadri. This hilly strip of Sahyadri has about 8 Km. breadth and these ranges at some points rise more than 900 m. above the mean sea level. The land is well watered in rainy season and well-wooded. The slopes of Sahyadries are well-clothed with teak, Ain, Khair, Sesuk and other species ~~and the ranges rise from plain bald in outline~~ ^{have fine evergreen grove. On all side} and during the rainy season, hills, the country near the foot of Sahyadri is ~~specially beautiful~~. The forest industry gives seasonal employment to labour in this area. Most of the area in this tract has been classified as a "Scheduled Area", as it is inhabited by Adiwasis comprising of Warli, Katkari, Shakir, Dhondia, Dhobla, Dhor-Koli and Mahadeo-Koli, etc., This tract is mostly a depressed economy pocket, as the local population subsists on the meagre returns. As in the case of Konkan the topographical study of the Desh brings fourth three main features.

Towards the western border on the Nasik and to west and south Dhulia district lie the ranges of Sahyadries. The Northern borders of Dhulia and Jalgaon are bounded by steep southern face of the "Satpuras". There are high peaks in these ranges rising from 550 to 900 metres. The mountainous ranges are full of forest inhabited by wild life and adiwasis. Considering the backward character of the tract and its people, this area has been declared as the "Scheduled Area". From the slopes of Sahyadris and Satpuras spreads long plain tract scarcely unevened by hillated spots. In Dhulia and Jalgaon Districts most of the portion of these plains come under an upland basin, drained into Tapi river and her tributaries. In these plains cultivation is wide-spread and the region is quite rich with production of food crops as well as Cash crops.

1.2.2. H I L L S

The hills of the lofty Sahyadri ranges are quite picturesque. All alongwith eastern border of Konkan a mighty wall of Sahyadris 600 to 1200 M. high stretches, its sheer back clifts broken by narrow horizontal belts of grass and forest and its crest rising in places in isolated peaks and rocks butt from 300 to 450 M. above its general level. There are flat-topped as well as peak topped mountains in Desh Region. The height of Selebari range in Nasik varies from 950 to 1300 M. The peak of Kalsubai near Igatpuri is the heighest one in this district, being 1660 M high. The mountains of Salher Mulher, Rameshej, Chancherej etc., have added to the beauty of the landscape. The hills in Dhulia district belong to the ranges of Sahyadri as well as Satpura, and possess height of 900 to 1000 M. The highest peak in these ranges in Dhulia district -there are three chief hill ranges, the Satpura in the north, the Hattis in the south-east and the Ajantha also known as Chander or Satmala in the south.

2 is none having height 1900 M Jalgaon Dist

1.2.3 R I V E R S:-

Rising in the Western slope of Sahyadris, none of the Konkan rivers drain large enough area to gain any size or importance. Their waters gather at the base of the clifts and along rocky deep-cut-channels, force a passage from among hills.

During the rains they bring to the sea large volume of water but in fair seasons the channels of most of them ^{are} mere chains of pools, divided by walls of rocks. The size and importance of these rivers increase only in proportion to the distance upto which they are tidal and navigable. Vaitarna and Ulhas are the important rivers in the district of Thana. These west flowing rivers, offer suitable dam and storage sites and enormous possibilities of power generation. The Vaitarna and Tansa lakes are important sources of water supply to the cities of Thana and Greater Bombay. The important rivers of Kolaba district are Ulhas, Patalganga and Amba, Kundalika, Savitri, Goda and Kal. Some of the rivers, especially Pej, Ulhas, Kundalika and Patalganga ^{are} considered as boons to the cultivators, as they facilitate the growing of summer paddy & vegetables by means of minor irrigation. Most of the rivers in Kolaba district are seasonal and dry for six months in the year. High altitudes of Sahyadri in the basins of some of the rivers in the district have provided good sites for the hydro-electric power generating stations. There are in all about 21 small and big rivers flowing through Ratnagiri district. Seven of them are Major and Navigable during fair season. They are Savitri, Vashisthi, Jadbudi, Muchakundi, Rajapur, Kharapathan and Karli,. The rivers on Desh region bear far more importance in making the soil fertile by depositing silt on either sides of their banks. Most of these rivers remain flowing throughout all the seasons and provide major, medium and minor irrigation facilities to the region. The important rivers of the Desh region are Godavari, Girna, ^{Darna} ~~Donna~~, Mosam, Tapi and Purna. The course of Tapi in Dhulia district is 86 Km. Its banks are too high to enable the use of its water for irrigation. The great river Narmada passes through the northern boundary of Dhulia district for 56 Km. Almost all the rivers in the district Jalgaon are the feeder rivers of river Tapi.

Ar

1.2.4 CREEKS:-

Creeks form an important aspect of the Konkan Region. Creeks are formed mainly by reaching the sea water deep inland. All along the Konkan coast there are many creeks, some of them are broad at their mouth and deep. Others becoming narrow within 15 Km of coast. These creeks provide for Inland waterways and navigation so also fishing industry. Some of these creeks are Thana, Bassein, Satpati, Batiware Manor, Kalyan in Thana District. In Kolaba district there are some creeks like Revas, Dharamtar, Nagothana, Revdanda, Rajapuri etc., which play an important role in inland water transport and fishing. In Ratnagiri district there are number of major and minor creeks such as Bankot, Purangad, Jaitpur, Vijay Durga, Deogad and so on.

1.2.5: SOIL:-

The natural and geographical conditions in Konkan cause four-fold classification of its area according to its soil. The land along the coastal lines consisting of fertile mixtures of sand, clay and humus coming from the sea. The alluvial deposits are also found along the banks of large rivers. At some places there are nearly bleak-rocks rendering cultivation difficult. The Kharland popularly known as "Kajans" caused by tides in the creeks. In most of the field of Khanjan cultivation is impracticable while in some of them only some inferior variety of paddy can be grown. So the major problem before the Konkan districts has been to reclaim the cultivable land from these Kajans. The upland generally consists of an open trap soils which is reddish brown in colour and specially adopted for forest growth and fodder grass. In Kolaba district there is no retention of water in the soil so the district is suffering from an acute shortage of water although it receives rain-fall ranging between 2000 to 35000 m.ms. The tract of shell sands near the sea shore is suited for growth of coconut and bettlenut trees. The red type of soil with mixture of shell sands is suited for growing rice. The brown and brownish black soils in Kolaba district are excellent for rice production and capable of producing second crop. The soil in Thana district is blackish and contains sand which is suitable for garden crops. In some parts of Thana district there are some patches of black-soil where rice is grown. The Desh regions is proud in having superior and fertile land.

----Broadly the soil of the district Jalgaon can be classified into three major tracts. The northern tract mostly consists of rich black soil. In the coastal tract there are deep black red and brown types of soil. The deep black soil is most fertile and yields rich crops. The lighter red soils sufficiently good for raising cash-crops. The general quality of the soil in the southern tract of Jalgaon district is inferior to that of central and northern tracts. On either side of the Tapi runs an unbroken plain of the deep black cotton soil forming a strip of all year covered lands. The black soil in Nasik district is found mostly in the plain country near the beds of rivers. It yields excellent Rabi crops of wheat and gram. Red-soil is found chiefly on hills top and yields good rainy seasons crops. Eastern parts of Nasik district have poor soils.

1.2.6: CLIMATE:-

Climate of Konkan is sultry and even though it is moist and damp, on the whole it can be said to be healthy one; excepting some areas, which are some what malarious, especially from the close of rains to the end of December. The range of temperature between maximum and minimum is comparatively small. In the hot season the heat is very aggressive during the day, but many times the nights are not pleasant. The hill tops are having pleasant climate during the summer due to the west winds. Humidity is greater on the coast ~~hill~~ than is in the interior. It reaches its maximum during the south-west monsoon. The climate of Desh is dry except in Monsoon. The year can be divided into dry hot period during February and March, Summer during April, May and June, Rainy from July to September, Asultry period in September, and October and winter in November December, and January, April is normally the hottest months, while January the coolest month.

1.2.7 : Rain-Fall:-

The south-west monsoon brings rains to this division. The western-sea-coast stands first in experiencing on set of monsoon. The monsoon setting in June spreads all over the division gradually. The rainfall is not uniform in all parts of Kolaba and Thana Dists. It increases as we go from west to east.

---The rain in Thana District is less towards the north than towards the south. The intensity of rainfall is highest generally in July. Along the coastal line the rainfall is about 1800 m.ms., whereas in the interior parts of Konkan it is near about 2500 M.ms. On the slope of Sahyadries it is more and at the peaks it reaches even the magnitude of 5000 M.ms. The rain-fall is usually uniformly distributed throughout the Desh region ranging from 640 M.ms. to 800 M.ms. The western, south-western, northern parts of Desh receive more rainfall than the plains. In the Desh the rains are intermittent. At no time the rainfall is very heavy in Desh region. The rain-fall is heaviest in the western part of Nasik District comprising of Surgana, Peint and Igatpuri. In the eastern part the rainfall is very moderate with an uneven and scanty distribution part of West and south-west part of Dhulia district having ranges of Sahyadries experience good rains. The rains are recorded in the months of June and October, in Dhulia District.

CHAPTER-II

EXPLANATORY NOTE ON SCOPE & LIMITATIONS OF STATISTICS
PRESENTED IN STATISTICAL ABSTRACT

P u r p o s e :-

2.1 This is the third issue of the Divisional Statistical Abstract to be published since the year 1962-63. In this abstract exhaustive statistics about important socio-economic indicators of the economy have been presented. Statistical material on as many topics as possible has been furnished in this publication so as to make it useful as a reference book. The scope of 1965-66 Statistical Abstract has also been enlarged with the addition of few more tables which are included for the first time. As far as possible districtwise information is furnished. The districtwise figures will enable reader to compare the indicators of development between constituent districts of Bombay Division. In most of the tables the data for the year 1965-66 have been given. In case of few tables, the data for this year is not available, so the data for latest available year have been furnished. For the sake of comparison similar data for one of the earlier years have also been given.

The Statistical material presented here is mainly collected and compiled by the D.S.O.s who have collected the data initially from various offices of State Government, Government of India, Local Bodies & other agencies. Whenever finalised figures are not forthcoming, provisional figures are incorporated with appropriate remarks. The foot notes showing the sources from which the material has been obtained have been indicated at the end of each table.

2.2 Division at a Glance:

In this table some general particulars as well as divisional indicators under various heads like population, agriculture, etc., are presented to bring forth the salient features of this division. Alongwith the figures for this division, corresponding figures relating to Maharashtra State have also been given. The reference period to which the figures concerning this division and Maharashtra State respectively relate is mentioned against each item, as in many cases this period is not identical.

The scope and limitations of the information furnished in this abstract is discussed in the following paragraphs.

2.3 Climate and Rainfall:

The table 1.1 presents monthwise information regarding rainy days and actual rainfall relating to various stations in this division. Most of these rainfall recording stations are at taluka Head quarters. "Normal Rainfall" recorded for each centre, is the average rainfall over long period, usually 80 years. Table 1.2 gives monthly Maximum, Minimum and Mean temperatures at selected 12 centres in Bombay Division. ~~The maximum but average of maximum temperatures during various months.~~

2.4 Area and Population:

The data of 1951 population census and 1961 population census are presented in tables 2.1 to 2.7. The statistical material published by Government of India in "Census of India 1961, Maharashtra, Vol. X, Part-II-A," and "District Census Hand Books, 1961" of each district have been used for preparing these tables. The various concepts and definitions adopted at the time census, concerning "Village", "Town", "Worker", "household" etc. have been clarified in details in these publications.

The table 2.1 gives districtwise figures of area, Rural and Urban population, population density and variations with 1951 census. The population figures for 1951 census shown in this table have been adjusted for the boundaries and areas of districts as they existed at the time of 1961 census. Table 2.2 shows districtwise classification of villages according to population ranges in 1961 census, while classification of towns according to population ranges have been shown in table 2.3.

The table no. 2.4 presents districtwise figures of No. of workers according to livelihood classes. Distribution of non-workers according to different categories have been incorporated in table 2.5. For both these table figures for Rural and Urban areas have been given separately. The table 2.6 gives information regarding population of Scheduled Castes and Scheduled Tribes in each district at the time of 1961 census.

In table 2.7 the population of each individual town in each district of Bombay Division is shown.

2.5 Agriculture:

The tables 3.1 to 3.9, on agriculture included in this section give information on Land Utilization, area and production under principal crops, area irrigated by crops and by sources, minor irrigation works, major and medium projects and percentage distribution of sample households engaged in cultivation, classified by interest on land and size of land. The data regarding famine, scarcity and agricultural implements have also been given. The major part of data on agriculture has been collected from the Statistician, Department of Agriculture, Poona.

Table 3.1 gives utilization of land according to standard heads of utilization for the years 1961-62 and 1964-65. Table 3.2 shows figures of areas under different crops while table 3.3 presents figures of the outturn and average yield per hectare of principal crops for each district & Division. The production of cotton is in terms of bales where as that of sugarcane is in terms of gur. Table 3.4 shows the distribution of net irrigated area by sources of irrigation. The figures of area irrigated under different crops of each Dist. have been furnished in table 3.5 Next table 3.6 (A) gives the Number of Irrigation Wells in use and not in use for each Dist. Table No. 3.6(B)&(C) give data relating to minor irrigation works and major & medium irrigation projects in each district. Table 3.7 presents the distribution of sample households engaged in cultivation classified by size of land and interest in land cultivated. The interests in land are classified in to 3 types and classification of size of land is done in to 10 size groups. The figures are shown separately for Total, Rural and Urban areas of each district. This data has been collected at the time of 1961 census. Table 3.8 indicates agricultural implements in each district as enumerated at the time of 1966 Livestock Census. The information on famine and scarcity conditions in each district is furnished in table 3.9.

2.6 Animal Husbandary:

Table 4.1 presents districtwise data relating to different categories of livestock, poultry etc., enumerated at the time of Quinquennial Livestock, Census, 1966. ^{Table} table 4.2 gives information regarding developmental activities of Dept. of Animal Husbandary in this division, and details about veterinary aid supplied. Diseasewise livestock mortality in Bombay region has been shown in table 4.3, while table 4.4 gives information relating to recognised slaughter houses and number of Animals Slaughtered in them.

2.7 Forests:

The two tables included in this section give details of area under different types of forests and estimates of forest produce. The details of area under forests, both in-charge of Forest Department and Revenue Department are shown separately.

2.8 Fisheries

The table 4.7 shows quantity of fish brought for curing, salt issued and quantity of fish removed at various centres in Thana, Kolaba, and Ratnagiri Districts for the year, 1961-62 and 1965-66.

2.9 Industries and Employment:

The factory statistics shown in tables 5.1, 5.2 and 5.3 covers following types of factories registered under Factory Act of 1948:-

- 1) Those using power and employing 10 or more workers.
- 2) Those not using power but employing 20 or more workers, and
- 3) Those factories not covered by (1) & (2) above but notified by the Government as covered by the Factory Act.

Table 5.1 presents, for each industry, the total number of working factories, the number of mandays for which they worked during the year and the average daily employment classified by adults, adolescents and children. The data presented in cols. 6 to 13 of this tables relate only to the factories submitting the returns. The industries are classified as per Standard Industrial Classification.

The table 5.2 gives distribution of factories for each type of industry according to size of factory in terms of average daily employment of worker, while table 5.3 presents the distribution of factories for each industry by number of days worked during the year. It may be noted that the number of workers shown in these 3 tables are the average number of *^(Y) workers on the register of factories. The statistics pertaining to Handloom and powerloom industry have been given in table 5.4. The tables 5.5 & 5.6 give usual employment exchange statistics. Table 5.7 indicates changes in volume of employment in different industries as on 31st March, 1965. Table 5.8 shows for each industry, figures relating to number of factories, their productive capital, employment, gross output and value added by manufacture. This information regarding manufacturing industries has been obtained through Annual Survey of manufacturing Industries conducted by Government of India.

2.10

Electricity:

In all two tables are included in this section. Table No. 5.9 gives statistics relating to electricity generated, purchased and electricity consumed for various purposes. Table No. 5.10 gives Towns and Villages electrified & population covered there in according to 1961 census.

2.11

Co-operation:

In all 7 tables are included in this section, under which statistics relating to various activities of co-operative movement are shown. Table 6.1 gives figures of different types of co-operative societies working in Bombay Division. In next 5 tables important information pertaining to different types of Co-operative institutions & details about their operations are presented. Table No. 6.7 gives data relating to No. of registered money lenders and loans advanced by them.

2.12.

Medical and Public Health

Table 7.1 presents information about No. of persons engaged in medical & public health profession as enumerated in the 1961 population census. Table No. 7.2 gives particulars of medical facilities available through public & aided bodies. throughout

The districtwise classification of patients is furnished in table 7.3. Table 7.4 and 7.5 give details about vital statistics. The information about vaccination statistics, cholera inoculations & B.C.G. vaccinations have been given in the next two tables. Table 7.8 presents information on hygienic drinking water supply sources available in rural areas of each district in Bombay Division.

2.13 EDUCATION:

In this section 8 tables are included. Table 8.1 indicates literacy in each district according to 1961 census. Percentages of literacy have been shown separately for both the sexes as well as for rural & urban areas. As the literate is defined as a person who can read and write simple letter, persons having higher education are also included in this category. The distribution of literates according to educational levels separately for rural and urban areas have been furnished in tables 8.2 & 8.3. Table 8.4 gives No. of institutions typewise and enrolment and teachers therein. The information is given districtwise. The data pertaining to beneficiaries and educational concessions to Backward Classes have been shown in table 8.5 while similar data relating to concessions of free education to economically backward class have been furnished in table 8.6. The figures of expenditure incurred by Government of Maharashtra State by way of grant in aids of local bodies have been presented in table 8.7. The table 8.8 indicates the growth of education in towns and villages in each district of Bombay Division.

2.14 Transport and Communications:

The statistics relating to different modes of transport are given in this section. The table 9.1 gives length of railway route according to different types of rail gauges in Bombay Division. The road length of extra municipal roads in each district as at the end of March, 1961 and 1966 has been shown in table 9.2(A). The road length according to different categories and surface, classification. Surfacewise road length of municipal roads is furnished in table 9.2(B). Table 9.3 gives relevant statistics regarding number of motor vehicles in operation in Bombay Division. The next table gives operational statistics of Nationalised road transport in Bombay Division.

The details of traffic census conducted in May, 1965 in respect of roads in Maharashtra State have been furnished in table 9.5 usual postal statistics have been presented in table 9.6. Table 9.7 indicates the growth of postal facilities in rural areas of each district. The table 9.8 presents statistics pertaining to rural broadcasting.

2.15 Local Bodies:

Table No.10 gives the districtwise information regarding number and income and expenditure of Village Panchayats, Zilla Parishad and Cantonment areas, for the year 1961-62 and 1965-66

2.16 Third Five Year Plan and Community Development Programme:

5 tables are included in this section. The first two tables give details of expenditure and physical achievements under various schemes, included in Third Five Year Plan for all 5 years i.e. 1961-62 to 1965-66. Table 11.3 gives particulars of C.D. Programme implemented in each Dist. of Bombay Division. In the next table 11.4 expenditure incurred in different stages of blocks is shown (while the physical achievements under selected items by all C.D./St.-I/St.-II blocks operating in each district during 1965-66 are included in table 11.4).

2.17 Prices:

Table 12.1 presents average retail prices of important commodities at each district Head Quarter, in Bombay Division during the year 1964-65, while details of annual arrivals of various commodities in all regulated markets in each district are presented in table 12.2 Consumer price index numbers in respect of selected centres in Bombay Division viz Bombay and Jalgaon centres have been shown in table 12.3. The base year for this series of index number is the year 1943-44.

2.18 Miscellaneous

10 tables are included in this section. In table No.13.1 statistical data relating to Police Department viz strength of Police force and Crime statistics of Bombay division is given while in another table 13.2 details of work disposed in Civil and Criminal Courts have been furnished. In the remaining 8 tables statistical material on various topics like Cinema, Banking Offices, Joint Stock Companies, Insurance, Small savings, land Revenue collection & General election held in 1962 is incorporated.

Chapter III

Analytical review on important indicators of development:-

This chapter deals with selected indicators pertaining to some important sectors of the economy with the purpose of providing a periodical assessment of progress achieved in these economic fields as a result of implementation of plan programme.

1. Percentage of gross sown area to net sown area:-

This indicator shows the extent of double cropping in relation to net sown area. The extent of double cropping largely depends upon the availability of water, the irrigated crop and land with deep soil capable of retaining sufficient moisture after kharif rains for the growth of secondary crop. The table below shows percentage of gross cropped area to the net cropped area in the respective districts of Bombay Division for the years 1961-62 and 1964-65.

Table No.1

Percentage of gross sown area to net sown area for the years 1961-62 and 1964-65.

District	% age of gross cropped area to net cropped area	
	1961-62	1964-65
1. Thana	102.70	102.29
2. Kolaba	105.68	106.19
3. Ratnagiri	103.18	102.63
4. Nasik	107.39	103.29
5. Dhulia	113.48	111.42
6. Jalgaon	106.66	106.66
Bombay Division	107.48	105.82

On the whole it is seen that 5.8% of the net cropped area in Bombay Division has been brought under double cropping in the year 1964-65 while it was 7.5% in the year 1961-62. The extent of double cropping decreased slightly in the year 1964-65. Within the region it is observed that Dhulia having a large area under double crop

accounted for relatively higher proportion of doublecropping in relation to net cropped area (13.48%) in the year 1961-62 and (11.42%) in 1964-65. In Ratnagiri and Thana districts it was quite low 2.63% and 2.29% respectively in the year 1964-65. In Nasik it was 7.39% in the year 1961-62 and only 3.29% in 1964-65.

2. Productivity of Important Crops.

As far as food production in the state is concerned, the state is deficit one. The total output of foodgrains in the Division forms only 20% of total production of the state. The most important crop among the foodgrains is paddy which is mainly grown in Konkan Region and the Production of paddy in this division forms more than 40% of the total production of the state. The other important crops viz. Cotton, Sugarcane, Groundnut are grown in large scale in the Districts of Dhulia, Jalgaon & Nasik and hence the production of these crops as compared to other Divisions in the state is low. The area under fruits in Bombay Division forms about 40% of the area under fruits in the state, the important fruits being Grapes, Bananas, Mangoes and cashewnuts.

Following table shows the yield rate and production of important crops in Bombay Division.

Table.No.2.

Productivity of important crops in Bombay Division.

Crops	Yield per hectare in Kgs.		Out turn in metric tons (000)	
	1961-62	64-65	61-62	64-65
Rice	1318	1737	645.00	652.40
Wheat	545	506	83.70	79.60
Jawar	617	793	278.90	314.90
Bajra	356	375	196.90	216.30
Kagi	826	826	127.10	142.00
Gram	347	149	13.50	12.30
Tur	604	585	19.50	12.70
Sugarcane (gur)	5834	4460	91.60	77.50
Cotton	107	95	41.10	39.10
Groundnut	653	784	209.80	

Percentage of Irrigated area.

Bombay Division comprises of 3 important river basins viz. Tapi basin, about 12% of Godavari basin and basin of westflowing rivers in Konkan. The ^{Tapi and Godavari} ~~four~~ two basins extend over Desh Dists. viz. Nasik, Dhulia & Jalgaon whereas the remaining basins are covered by Konkan districts, viz. Thana, Kolaba & Ratnagiri. Eventhough there is a huge water potential in the basin of west flowing rivers, Irrigation possibilities are very ^{limited} ~~similar~~ on account of difficult terrain. Of all the basins in the state the ~~percentage~~ ^{percentage} of irrigable command with reference to ^{area} ~~culturable~~ ^{area} in Godavari and Tapi basins is 16%. In view of this, irrigable command in Desh districts is less as compared to other regions. It can be said that Konkan region gets sufficient rainfall ^{as} against the Desh districts ~~do not come under scarcity tract.~~

In the year 1961-62 the net area irrigated was about 1.35 lakh hectares which constituted 4.18% of the net cropped area in the region and in the year 1964-65 the net area irrigated was about 1.62 lakh hectares which accounted for 4.88% of the net cropped area. Within the region it is seen that Jalgaon district (6.37%) has the highest proportion of the cropped area under irrigation among the districts in the year 1964-65. The districts of Nasik (5.36%) and Dhulia (5.71%) are the other districts having the proportion of irrigated area above the average for the region. Proportion of area under irrigation in Thana and Kolaba districts in relation to net cropped area was found to be quite low. In all districts except Thana, the proportion of irrigated area to net cropped area has shown increase in the year 1964-65 in comparison with that in 1961-62.

Table No. 3

Percentage of net irrigated area to ^{net} cropped area in the districts of Bombay ^{Division}

District	Percentage of net irrigated area to net cropped area	
	61-62	64-65
Thana	1.25	0.91
Kolaba	1.66	1.98
Ratnagiri	3.74	3.79
Nasik	4.88	5.36
Dhulia	4.44	5.71
Jalgaon	5.10	6.37

4. Changes in the cropping pattern.

Lanna m... 20

The cropping pattern reveals that the food crops area is predominant in this region. Out of the total gross cropped area the food crops alone accounted for 70.31% in 1961-62 and 68.64% in 1964-65. The principal crops of the region are rice, Bajra, Jawar, Cotton and groundnut. ^{Bajra} in the year 1964-65 accounted for 16.33% of the gross cropped area and cotton 11.82%. The following table shows the percentage of area under food and non-food crops in Bombay Division during 1961-62 and 1964-65.

Table No.4.

Cropping pattern in Bombay Division.

Percentage to the total cropped area

	<u>61-62</u>	<u>64-65</u>
Total food crops	70.31	68.64
Total non-food crops	29.69	31.36
Total gross cropped area	100.00	100.00

Studying the cropping pattern for both the years, it is seen that the proportionate area under food and non-food crops showed a variation of about 2%. Area under pulses ~~was~~ among the food crops and area under Oil seeds among non-food crops declined in the year 1964-65 compared to the year 1961-62.

5. Livestock per hectare of land.

The importance of livestock as a source of subsidiary industry and a traction power in agriculture economy can need hardly be emphasised. According to 1966 census the number of livestock in the region was 55.02 lakhs. The table below show the availability of livestock in relation to cultivable area during the years 1961-62 and 1964-65.

The ratio of livestock per hectare of cultivable land in

for 1961-62
at 15.64-65
1965-56
the year 1961-62 (1.74) decreased to 1.70 in 1964-65 while the cultivable area per pair of bullocks ^{increased} ~~decreased~~ from 9.7 hectares in 1961-62 to 9.98 hectares in 1964-65 for the entire region. Within the region it is seen that the ratio of cultivable area per pair of bullocks

*Dhulia -19-
6.30*

is quite high in ~~Nasik~~ *Nasik* (~~195.94~~ *1564-65* hectares) where ^{as} it is comparatively very low in Thana and Kolaba districts *(2042 Hect)*

Table -No.5

Availability of livestock in relation to cultivable area in the districts of Bombay Division.

District	Livestock per hectre of cultivable land		Cultivable area per pair of bullocks.	
	1961-62	1964-65	1961-62	1964-65
Thana	2.60	2.47	2.84	2.99 <i>2.4</i>
Kolaba	2.66	2.59	2.75 <i>5.12</i>	2.82 <i>5.0</i>
Katnagiri	2.67	2.64	30.76 <i>4.64</i>	31.13 <i>4.92</i>
Nasik	1.55	1.49	187.93 <i>5.8</i>	195.94 <i>6.06</i>
Dhulia	1.41	1.37	85.12 <i>6.34</i>	87.58 <i>6.30</i>
Jalgaon	1.27	1.27	6.22 <i>5.64</i>	6.21 <i>5.64</i>
Bombay Division.	1.74	1.70	9.74 <i>5.65</i>	9.98 <i>5.56</i>

6. Poultry as compared to population.

In a countrylike India, the importance of poultry and poultry products in raising the low nutritional standard of the people can scarcely be overemphasised. The state Government have introduced special schemes for development of poultry under plan programme particularly during the Third Five Year Plan period. Poultry population, according to 1966 census was 32.52 lakhs and it was 32.87 lakhs according to 1961 census. The ratio of poultry per thousand population in the region has declined from 346, in 1961 to 345 in 1966. Major decline was observed in Jalgaon district. In the year 1966, the ratio of poultry per thousand population was highest in Kolaba district (643) followed by Katnagiri (613). It was lowest in Jalgaon (90). The following table shows the ratio of poultry per thousand population in the districts of Bombay division for the years 1961 and 1966.

Table No.6

Poultry as compared to population in the districts of
Bombay Division.

District	Poultry per 1000 population	
	1961	1966
Thana	357	372
Kolaba	555	643
Ratnagiri	649	613
Nasik	201	198
Dhulia	232	229
Jalgaon	134	90
Bombay Division	346	315

7. Per Capita consumption of electricity.

Western Maharashtra is situated far away from coal fields and hence power generation by Thermal plants becomes costly. However Bombay Division's high potential for hydro power generation in Western Ghats. As per estimates of National Council of Applied Economic Research the Hydro power potential in and around western ghats is about 1040 m.w.

The position of Bombay Division (even excluding Greater Bombay) as far as power generation is concerned was satisfactory even prior to Third Five Year Plan period. As on 31-3-58 the capacity of generating sets in Bombay was 132.21 m.w. i.e. about 22% of total generating capacity in the state. The electrical energy consumed in the Division was 7563.82 lakh k.w.h. which form one fifth of total consumption in the state. Most of the installed capacity is in the Tata Central Railway system. This system is made up of three hydel plants at Khopoli, Bhiyपुरi & Bhira. Another important generating plant of Central Railway is Chola Thermal Station. The Construction of Koyna Project Stage I & II (with estimated potential of 580 m.w) started ^{giving} second plan further marked ~~as~~ major step towards creating a Power grid in western Maharashtra.

The per capita consumption of electricity in Bombay Division which was 13.08 k.w.h in 1961-62 increased to 21.70 k.w.h

for the year 1965-66. Within the region, Thana district relatively accounted for the highest per capita consumption of electricity i.e. 68.80 kwh in 1965-66. Kolaba was the next with per capita consumption of 34.41 kwh. The lowest per capita consumption was in Dhulia (1.45 kwh). The distribution of electricity consumption in the region for the year 1964-65 shows that industrial consumption accounted for 60.49% of the total consumption while domestic consumption accounted for 16.30%. The table below shows the per capita consumption of electricity during the years 1961-62 and 1965-66 in the districts of Bombay Division and the region as a whole.

Table No.7.

Per Capita Consumption of electricity in the districts of Bombay Division.

District	Per Capita consumption of electricity (in Kwh)	
	1961-62	1965-66
1. Thana	41.30	68.80
2. Kolaba	9.38	34.41
3. Ratnagiri	1.00	3.88
4. Nasik	8.96	9.33
5. Dhulia	3.56	1.45
6. Jalgaon	4.26	16.93
Bombay Division	13.08	21.70

8. Increase in the number of candidates enrolled in employment exchanges and vacancies notified.

The number of candidates registered in the employment exchanges of Bombay Division in the year 1961-62 was 50.54 thousand and which further increased to 60.00 thousand in the year 65-66, the number of candidates registered during the period shows an increase of 18.7%. The number of vacancies notified were only 10.05 thousand in the year 61-62 and 15.13 thousand in the year 1965-66. Within the region it is seen that the number of candidates enrolled in employment exchanges showed significant increase in Kolaba (62.8%) followed by Jalgaon (49.04%) in the year 1965-66 over the year 1961-62. The vacancies notified also showed an increase in 1964-65 in all the districts ~~conducted in the year~~

1961-62. However the proportion of vacancies in relation to enrolment was very small.

9. Increase in Indoor and outdoor patients. It is seen that the increasing number of patients in Government hospitals indicate the need for provision of more health amenities in the division. The number of indoor patients treated in Government hospitals in the region in the year 1965 were 68.13 thousand which was 1.62 lakhs in 1961. The number of outdoor patients treated during the year 1965 was 18.32 lakh as against 11.57 lakh in the year 1961. Thus during the period 61-65 the percentage decrease registered in the indoor patients was of the order of 57.9% and the percentage increase in the outdoor patients was of the order of 58.3%. The number of patients treated indoor showed decrease in Thana and Dhulia districts in the year 1965 compared to that in the year 1961, and the number of outdoor patients increased in all districts. In particular it is seen that the number of outdoor patients increased more than 3 times in the year 1965 in Kolaba district over that in the year 1961. The following table shows the number of patients treated in Government hospitals and dispensaries in the districts of Bombay Division.

T a b l e No.8

The number of patients treated in Government hospitals
in the districts of Bombay Division.

District	Patient treated			
	1961		1965	
	Indoor	Outdoor	Indoor	Outdoor
1. Thana	104773	103508	7750	140607
2. Kolaba	2705	76002	5566	288324
3. Ratnagiri	9768	200167	18282	304848
4. Nasik	20552	275860	21215	413776
5. Dhulia	17676	267676	5722	315202
6. Jalgaon	6430	234527	9598	369700
Total Bombay Division.	161904	1157740	68133	1832457

10. Increase in the number of students in different categories.

The number of primary institutions which were 10124 in the year 1961-62 rose to 11253 in 1965-66, as the number of students in primary schools increased from 11.16 lakh to 14.72 lakh which showed an increase of 31.9% in the number of students over the year 1961-62. In the year 1965-66 the number of secondary institutions was 670 while it was 536 in 1961-62. The number of students, taking secondary education was 16.6 lakhs in 1961-62 and it was 25.79 lakhs in the year 1964-65. The increase in the secondary education was 55.3% over the year 1961-62. The number of higher institutions also rose from 15 in the year 1961-62 to 28 in the year 1965-66. The students in the higher institutions in the year 1965-66 ~~are~~ ^{were} 12.47 thousands showing an increase of 164.4% over the year 1961-62. The number of special schools ~~are~~ ^{were} also ~~registered~~ increase from 76 in the year 1961-62 to 110 in the year 1965-66. The table below shows the number of students under different categories in the year 1961 and 1965 in the region.

Table No. 9.

No. of educational institutions and students in Bombay Division.
* (students in '000)

Sr. No.	Educational Institutions.	Position in the division during		% increase over 1961-62
		1961-62	1965-66	
1.	Primary schools.	*	*	
	i) Institutions	10124	11253	11.15
	ii) Boys	495.98	602.55	81.97
	iii) Girls	306.81	N.A	—
2.	Secondary Schools.			
	1) Institutions.	536	760	41.79
	ii) Boys	111.26	189.00	69.87
	iii) Girls	36.56	68.8	88.38
3.	Higher institutions.			
	i) Institutions	15	28	86.67
	ii) Boys	4.17	10.46	150.84
	iii) Girls	0.55	2.02	267.27
4.	Special schools			
	i) Institutions	76	110	44.74
	ii) Boys	7.31	10.29	40.72
	iii) Girls	1.61	1.87	16.15

11. Increase in road mileage per 100 sq.kilo metres.

Transport facilities constitute one of the major determinants of economic progress. As on March 1961, the road length per 100 Sq.kms was 21.4 km in Bombay Division. The total road length increased from 14539.81 kms at the end of March 1961 to 19051.71 kms at the end of March 1966, which showed an increase of 31.03%. At the end of third plan period the ratio of road length per 100 Sq.km. improved to 27.76 Kms. The following table shows the road mileage in the districts of Bombay Division as on March 1961 and March 1966 respectively and percentage of increase from 1961 to 1966.

Table No.10

Road length in Bombay Division (Including Municipal roads)

District	As on (in Kms)		%age incre- ase over 1961	Ratio of road length per 100 Sq.Kms on 31-3- 66
	31-3-61	31-3-66		
1. Thana	1029.16	2169.73	110.83	23.58
2. Kolaba	1873.71	2685.94	43.35	38.23
3. Ratnagiri	4019.01	5080.10	26.40	39.36
4. Nasik	2473.09	3553.84	43.90	22.85
5. Dhulia	2221.95	2416.36	8.75	19.23
6. Jalgaon	2924.89	3140.74	7.36	27.61
Bombay Divi- sion	14539.81	19051.71	31.03	27.76

Within the region, it was observed that all the districts recorded increase in road length during the period 1961-66. Among the districts Ratnagiri and Kolaba have relatively better road communication facilities having 39.36 km and 38.23 kms respectively of road length per 100 sq.km. of area.

12. Increase in banking facilities in proportion to population.

The total number of banks in the division rose from ~~213~~²¹³ in 61 to 340 in 1966 on account of increased commercial activities. The population covered per bank at the end of 1966 ~~constituted~~^{was} ~~6.50~~^{6.5} thousand ~~in~~^{for} the division. Table below shows the number of banks and the population covered by the banks at the end of March 66 in the districts of Bombay Division.

T a b l e No.11

No. of banks and population covered by banks in districts of Bombay Division.

District	No. of Banks	Population covered where the banks are located as per 1961 population (000)
1. Thana	60	476.25
2. Kolaba	33	108.99
3. Ratnagiri	51	172.38
4. Nasik	69	551.03
5. Dhulia	51	320.23
6. Jalgaon	76	582.82
Bombay Division	340	2211.70

C H A P T E R - I V
THIRD FIVE YEAR PLAN

The Third Five Year Plan was aimed at building and Anglo-Industrial Society, simultaneously removing imbalances that exist in different parts of the State. In order to achieve these objectives in Plan programme, the financial outlays have been fixed for each Development Head according to priorities so as to achieve certain calculated physical targets. During the Third Plan certain unforeseen events viz. Panshet disaster in July, 1961 floods in several parts of the State, a severe cyclone in Ratnagiri, one of the worst famines in 1965-66 etc. etc. gave a blow to the smooth implementation and created a number of difficulties resulting in re-arrangement of priorities and consequently the revision of financial and physical outlays.

In the Third Plan all the schemes are classified into District level, Division level and State level, depending upon the area of benefit accrued due to particular scheme. If the benefit is limited to a district, they are classified as district level schemes, if it extends beyond a particular district but not beyond a Division then they are treated as Division level schemes. Likewise, if the benefit extends to more than one Division then they are classified as State level schemes. Subsequent to the establishment of Zilla Parishad a large number of District level schemes were transferred to these bodies for implementation on agency

contd...

basis or as transferred schemes and they were termed as "Local Sector Schemes" while the remaining schemes are treated as "State Sector Schemes".

During the Third Five Year Plan financial outlay of Rs.97.49 crores - Rs.39.14 crores for district level and Rs.58.35 crores for Division level was fixed for Bombay Division (excluding Greater Bombay) for the implementation of 100 District level and 93 Division level schemes as shown in Table I below:

TABLE - I:

(Rs. in lakhs)

Head of Development	Financial Outlays		Total	Per-centage
	Dist. level	Divn. level		
1	2	3	4	5
1. Agricultural Programme:	14,32.67	44.22	14,76.89	15
2. Co-operation and Community Development:	10,30.26	57.91	10,88.17	11
3. Irrigation & Power:	-	44,72.29	44,72.29	46
4. Industry and Mining:	50.99	1,01.68	1,52.67	2
5. Transport & Communications:	5,51.68	2,87.81	8,39.49	8
6. Social Services:	8,48.23	8,64.63	17,12.86	18
7. Miscellaneous:	-	7.04	7.04	Less than 0.05
TOTAL: 39,13.83 58,36.38 97,49.41 100				

Under the Division level schemes, Irrigation and Power has been provided with maximum amount i.e. 77% of the total. This is because, extension of Irrigation and

and Powerfacilities need to be given top priority since achivement in this respect during the first and second Plans has not been very satisfactory. The outlay on Social Services is about 15% of the total, whereas the percentage outlay on the remaining heads is less than 5% of total provision for Division level schemes.

In respect of District level schemes, maximum provision of 37% has been made on Agricultural Programme; Co-operation and Community Development and Social Services claimed 26% and 22% respectively. The percentage outlays on Transport and Communications is about 14% and on Industry and Mining is little more than 1% as shown in Table-II below:

TABLE-II:

(Rs. in lakhs)

DISTRICTS	Head of Development					Total
	Agr. pro-gramme	Indu-stry & Mi-ning	Coop. and C.D.	Trans. and Commn.	Social Ser-vices	
1	2	3	4	5	6	7
1. Thana	191.87	2.72	157.38	55.87	170.80	589.84
2. Kolaba	114.10	2.44	147.20	15.96	151.45	531.15
3. Kokk R'giri	231.51	7.78	184.73	28.45	157.66	830.13
4. Nasik	323.80	9.49	199.86	9.30	114.89	688.34
5. Dhulia	299.70	6.29	165.42	51.40	92.05	594.86
6. Jalgaon	271.68	22.27	184.17	40.70	161.38	680.21
TOTAL:	1432.67	50.99	1030.26	57.68	848.23	3913.83

The District and Headwise allocation shows that the maximum provision of Rs.8.30 crores has been made for

contd..

Ratnagiri district and minimum provision of Rs.5.31 crores for Kolaba district. These allocations are based on population, economical backwardness etc.

The progress of plan can be ~~gauged~~^{gauged} to some extent from the expenditure incurred on the various Heads of Development. The total expenditure in the division on the district and division level schemes is Rs.88.84 crores, i.e. 91% of the plan provision. This expenditure works out to Rs.94/- per capita for the plan period or about Rs.19/- per year, as shown in Table III below.

TABLE III:

(Rs. in lakhs)

Head of Development	Divn. level		Dist. level		Total	
	Expdr.	%age	Expdr.	%age	Expdr.	%age
1	2	3	4	5	6	7
1. Agricultural Programme:	43.23	908	1626.35	114	1669.58	113
2. Co-operative & C.D.:	64.07	111	1148.70	111	1212.77	111
3. Industry & Mining:	56.63	55	30.22	59	86.85	57
4. Transport and Communications:	287.45	105	632.44	115	919.89	110
5. Social Services:	624.19	72	888.10	105	1512.29	88
6. Irrigation & Power:	3476.86	78	-	-	3476.86	78
7. Miscellaneous:	5.84	83	-	-	5.83	83
TOTAL:	4558.27	73	4325.81	111	8884.08	91

Analysing the combined headwise expenditure on district and division level schemes is seen to be in excess of the respective plan provision in respect of 'Agricultural Programme', 'Co-operative and Community Development' and

contd...

'Transport and Communication'. It is only 57% of the plan provision for 'Industry and Mining' and for the remaining heads it is less than the plan provision.

The districtwise ^{split up} ~~step up~~ of headwise expenditure is given in Table No. IV below:

TABLE No. IV:

(Rs. in lakhs)

Head of Development							
DISTRICT	Agr. pro-gramme	Indu-stry and Mining	Co.op. and C.D.	Trans. and Commn.	Social Ser-vices	TOTAL	Per ce-nta ge
1	2	3	4	5	6	7	8
1. Thana	185.37	157.30	1.46	178.04	176.92	696.09	118
2. Kolaba	166.79	144.95	2.14	75.47	166.93	556.28	105
3. R'giri	170.35	176.99	2.87	237.69	115.51	704.41	85
4. Nasik	499.58	228.38	7.44	45.07	135.52	915.99	133
5. Dhulia	279.85	199.86	7.97	31.97	100.08	619.73	104
6. Jalgaon	323.41	241.22	8.34	54.20	198.14	833.31	123
TOTAL:	1426.35	1148.70	30.22	632.44	888.10	4325.81	111

It can be seen from the above table that all districts except Ratnagiri have exceeded the plan provision. The excess of expenditure in Dhulia and Kolaba districts is just four and five percent with ^{reference} ~~respect~~ to the plan provision of the respective districts. The maximum is seen in Nasik district, which shown 51.33% of the plan provision. In Jalgaon and Thana districts the percentages of expenditure are 123 and 118 respectively.

This shows that over all progress of expenditure

contd

in this Division was satisfactory. The performances as seen in respect of 'Industry and Mining, Irrigation and Power and Social Services' were not quite satisfactory. Further, the performance in Ratnagiri district specially under 'Agricultural programme' and ^{that} under 'Transport and Communication' in Kolaba district seem to lag behind.

The review of any developmental programme should necessarily be two dimensional, one ^{being} financial aspect and the other physical aspect. While studying the physical achievements, it is customary to measure achievements in terms of selected indicators which give the comparative position at two different ^{periods} ~~points~~ of time. With this object, the position of important indicators for two periods viz. 1960-61 (at the beginning of the Third Plan) and 1965-66 (at the end of Third Plan) are discussed. Wherever 1965-66 figures are not available, 1964-65 figures are considered.

The culturable area of Bombay Division is 104.66 lakh acres which form 60% of the total geographical area. During 1960-61 net cultivated area was 80.18 lakh acres i.e. 77% of the total geographical area. This percentage has been increased by two percents during the period of four years.

The net irrigated area formed 3.2% of total cultivable area during 1960-61. This percentage went upto 3.6 ^{in 1964-65} ~~i.e. only 0.6%~~. This is not satisfactory

cotd...

achievement. The importance of irrigation to the districts of Deccan plateau is much more than to Konkan region. In these districts i.e. Nasik, Dhulia and Jalgaon net irrigated area to cultivable area formed 4.5% during 1960-61. This percentage has increased by one percentage during four years period. On the other hand, there has been no change in such percentage in Konkan region.

In order to step up the agricultural production, various attempts are made, besides increasing irrigation facilities. The annual average production of foodgrains, sugarcane and ground-nut based on first four years of the Third Five Year Plan are 15.06 lakh tons, 0.89 lakh tons and 2.00 lakh tons respectively. While the increase in sugarcane and cotton annual average production is 16% and 30% respectively, the increase in case of foodgrains and ground-nuts is only 3% in each case.

The growth of co-operative activities in agricultural credit sector as well as in processing co-operative sector appears to be quite significant. The increase in the agricultural credit societies during the plan period is 580 i.e. 15% of the figures in 1960-61. The corresponding increase in membership is 1.83 lakhs. The level of agricultural credit has increased from Rs.10.03 crores to Rs.18.47 crores. The number of rice mills have been increased from 11 to 49.

The increase in the number of factories is only

contd...

172, which forms 13% of the number in 1960-61. The percentage increase observed in the State is 22. The development of power is reflected in the increase in the number of ~~xxxxxxxxxxxx~~ electrified villages and towns to the tune of 863 and in the number of electrification of irrigation pumps to 7138 during the Plan period. The per capita consumption of electrical energy has been doubled during the Plan period, per capita consumption during 1964-65 being 132 Kwt.

The total road-milage per 100 sq. miles was 33.8 during 1960-61. This increased to 40.3 during 1965-66.

Under education sector about 1,100 primary schools and 340 secondary schools have been added during the Plan period. Further, 10 more colleges were also established during the four years' period.

An average primary school during 1960-61 in the Division ^{was} serving a population of 932 against 1143 for the State as a whole. The percentage increase in pupils (with 1960-61 as the base) during the Plan period are 24 and 82 in primary and secondary education respectively. The average number of pupils per primary school for 1965-66 is 126 which also seems to be more as compared to 1960-61 figure (116).

Under health services, only one hospital and 87 dispensaries have been newly opened during four years' period. The number of beds per lakh of population in the

contd....

division (except Kolaba) was increased from 22 (during 1960-61) to 32 (during 1964-65).

Headwise plan expenditure and physical targets achieved were as follow:

AGRICULTURAL PROGRAMME:

Out of the total provision of Rs.14.77 crores, expenditure of Rs.16.70 crores was incurred during the plan period, which is 13% more than the Plan provision.

The sector under which financial as well as physical targets have exceeded is soil conservation. Under this 10.65 lakh acres i.e. 76% ^{and} have been bunded in bundable area of 30.00 lakh acres, 0.20 lakh acres have been terraced in this division. Further, under Khar and Khajan lands 0.30 lakh acres have been reclaimed against the target of 0.38 lakh acres.

Under minor irrigation, new wells constructed and old wells repaired in the division were 27,000.

Under forest about 26,000 acres have been brought under afforestation, 21,339 acres under plantation of valuable trees and road of 143 miles is constructed under forest communications.

CO-OPERATION & COMMUNITY DEVELOPMENT:

Out of the total provision of Rs.10.88 crores, expenditure incurred during the Third Plan was Rs.12.13 crores i.e. 11% more than the plan outlays.

The major programme under co-operation comprises of

contd...

rural credit and supplies to cultivators at reasonable rates, providing marketing facilities, organisation of farming and service co-operatives for the manifold activities of agriculture, industry and the like. ~~xxxxxxxxxxxx~~

During the Third Plan period 580 agricultural credit with a membership 1.83 lakhs have been established. The total advances during the Third Plan period were amounted to Rs.84.65 crores, of which Konkan districts' share is only 10.17 crores. Average advances per member works out to Rs.1,302/-. The level of credit has increased from Rs.10.03 crores (during the Second Plan period) to Rs.18.47 crores.

The high priority was given to co-operative marketing in the Third Plan. About 52% of the total expenditure under this sub-head is incurred on this scheme. During the Third Plan, 136 co-operative marketing societies were established, which is 30% of the societies in the State. These societies have handled agricultural production costing Rs.11.95 crores (excluding cost of Jawar), which form one-third turnover in the State. Maximum turnover was in Jalgaon, which is prominently due to the Banana and Cotton, the important commodities of the district. By the end of June, 1966, 49 rice mills, 7 oil mills, 4 ginning and pressing mills and 3 sugar factories were functioning in this Division. These processing societies play an important role in the co-operative sector in the sense that it strengthens the rural economy while giving maximum share to the cultivator by eliminating the profit of the middlemen.

contd...

COMMUNITY DEVELOPMENT & VILLAGE PANCHAYATS:

Whereas the overall programme of planning aimed at development of all activities for the betterment of the people, the Community Development Programme ~~aim~~^{aim} in particular the betterment of socio-economic conditions of the rural population. The programme includes all activities concerning to rural population, such as agricultural production, health, rural sanitation, communications, education, housing, etc. etc.

Total plan provision on the district and division level schemes under this sub-head was Rs.8.82 crores and expenditure incurred was Rs.10.16 crores i.e. it has exceeded the Plan provision by 15%.

Out of this expenditure 8.85 crores have been spent on the C.D. Project, Rs.0.54 crores on local development work and remaining on rural works, labour contract societies and training of Panchas and Sarpanchas of Village Panchayats.

III: IRRIGATION AND POWER:

IRRIGATION PROJECTS: A provision of Rs.8.37 crores has been made under irrigation projects towards the completion of spilt over project viz. Gangapur, Stage I & II, Karwand and Girna and for taking new schemes. Out of this provision expenditure of Rs.7.96 crores is incurred during the Third Plan period i.e. 78% of the Plan provision and irrigation potential of 1.07 lakh acres was created due to the

contd.....

completion of two spill over project, viz. Mosam and Gangapur Stage I & II. Similarly 6 more new projects viz. Godawari (Karanjwan), Upper Tapi, Storage in Upper Girna, Panzara, Kal, Malangaon have been included in the Third Plan Programme. It is expected that the irrigation potential of 2.41 lakh acres will be created by these six projects.

During the Third Plan a provision of Rs.36.36 crores has been made under the Sub-head 'Power Project' and expenditure incurred was Rs.26.81 crores. i.e. about 75% of the plan provision. The programme of power development in the division consists of Generation, Transmission and Rural Electrification. Of Rs.26.81 crores, Rs.16.18 crores i.e. 60% of the total expenditure, was incurred on Generation programme consisting of Koyna Stages I,II and III, Vaitarna, Hydro-Electric Project, Khandesh Marathwada Electrification, Nasik, Thermal Station and Nuclear Power Station near Tarapur. All works pertaining to Stage I of Koyna project with generating capacity of 240 MV and 220 KV double circuit transmission^{line} to Bombay were completed and rest were in progress. Under transmission programme a total of 218 circuit miles was completed. The rural electrification programme had made quite good progress. 863 villages and towns were electrified, 7128 irrigation pumps were installed. The position as at the end of Third Plan shows that there is one village electrified in every ten villages in the division, as against the proportion

contd...

of one is to eight in the State. So also per capita consumption of electricity in the division has increased from 74 Kw. ^{To 132 Kw.} during the Third plan period.

INDUSTRY AND MINING:

On this head an expenditure of Rs.86.85 lakhs was incurred against the plan provision of Rs.152.67 lakhs i.e. 57%. During the Third Plan, financial assistance to 48 processing units - 34 rice mills, six oil mills, cotton ginning and processing mills and co-operative sugar factories. As regards Industrial Estates 10 such estates were assisted where in 64 factory sheds have been constructed. Under development of handloom industry, 572 handlooms were converted into powerlooms and eight handloom weaver co-operative societies with membership of 278 were added during the plan period.

TRANSPORT AND COMMUNICATION:

Against the total provision of Rs.8.39 crores expenditure incurred under this head was Rs. 9.20 crores which forms 110% of the plan provision. With this expenditure new roads running 1,086 miles were constructed of which 605 miles pertained to rural roads. Similarly, highways and district roads running 596 miles were modernised during the plan period. The actual road mileage as at the end of Third Plan was 10,700 miles - of which 4,775 miles pertained to rural roads, 3,984 miles to district roads and 1941 miles to highways. Thus road mileage per 100 sq. miles ^{Cores} ~~km~~ to 40.

contd....

SOCIAL SERVICES:

EDUCATION: Out of the total provision of Rs.17.13 crores, an amount of Rs.15.32 crores was spent during the plan period which forms 88% of the plan provision. As per 1961 Census, Bombay Division had 19% of villages without schools. The number of primary, secondary schools started during the plan period were 1,100 and 380 respectively with corresponding number of pupils were 2.87 lakhs and 1.16 lakhs. The number of primary schools per lakh of population has increased from 107 to 118. Similarly, the ratio of number of primary pupils ^{to that of secondary pupils} has shifted from 8.5 to 5.7 during the plan period which shows that the proportion of primary students taking education is increasing.

&
MEDICAL/HEALTH: Under Medical and Health 2 cottage hospitals, one at Mangaon (Kolaba district) and another at Shirpur (Dhulia district) were started.

The State Study group on Public Health has suggested a target of one primary health centre for 30,000 population by 1975. This gives a target of 258 centres for this Division. As against this target, 111 centres were functioning as at the end of Third Plan, of which 71 were started during plan period. The death rate for 1961 and 1965 for this division works out to 13 and 11 for 1,000 population respectively, which shows a decline in the death rate.

WATER SUPPLY: To provide adequate and safe drinking water in rural areas and protected water supply in urban

contd.....

areas a total provision of Rs.240.99 lakhs was made during the plan period and expenditure incurred was Rs.205.37 lakh i.e. 85% of the total provision. During the plan period 22,145 new wells were constructed and 5,090 wells were repaired.

HOUSING: Over crowding and conjection in urban areas has resulted in acute shortage of housing and swelling of slum areas. This calls for massive programme of house building in public sector in urban and industrial areas. Where as in rural areas problem of improvement in environmental conditions, sanitary and better ventilated houses and provision of house sites has to be tackled. To solve this housing problem, a provision of Rs.88.73 lakhs was made during the Plan. Against this provision of Rs.88.73 lakhs an amount spent was Rs.133.50 lakhs which exceeded the plan provision. As per 1961 Census it was observed that about 39,000 houses were required to provide one house for one household. During the Third plan 3,493 tenements were constructed.

AND SOCIAL WELFARE.

BACKWARD CLASS WELFARE: Special measures such as education, welfare, rehabilitation were taken up for the weaker section of the community, scheduled castes, scheduled tribes and other backward classes. The total population of scheduled castes and scheduled tribes as per 1961 Census was 20% of the total population in this Division and 40% of Scheduled castes and scheduled tribes population of the State. Under Welfare of Backward Class

programme assistance was given to non-Government hostels benefitting 10,369 inmates, 3,081 backward class agriculturists received the assistance in terms of subsidy for implements, wells and land developments and 2,445 artisans received the assistance for suitable industries, crafts and professions. 13 Sanskar Kendras, 22 Balwadis were started and 230 drinking water wells were constructed. Under Welfare of Handicapped, 62 Leprosy affected persons were rehabilitated, one child welfare centre was opened and 30 persons were benefitted under welfare of aged and infirm.

LABOUR AND LABOUR WELFARE:

The programme under Labour and Labour Welfare relates to (i) Technical and vocational training, (ii) Employees State Insurance Scheme, (iii) Organised employment service and (iv) Labour Welfare.

Total expenditure incurred on all these activities was Rs.61.29 lakhs i.e. 96% of the total provision.

In order that economic status should not adversely affect the pupils of this community in attaining desired level of education, Government has granted freeships to pupils whose parents/guardians income was below Rs.1,200/- per annum. This concession was given at all stages viz. primary, secondary and college. Total expenditure of Rs.2.33 crores was incurred out of the provision of Rs.2.54 crores.

contd....

MISCELLANEOUS:

INFORMATION AND PUBLICITY:

Under this Sub-head a provision of Rs.7.04 lakhs was made and expenditure of Rs.5.84 lakhs was incurred during the plan period. With this expenditure total of 1,874 villages were provided (one each) with community listening set which covered 1/5 of the villages in this Division.

DEVELOPMENT

PHYSICAL ACHIEVEMENTS OF DIFFERENT SCHEMES IN THIRD FIVE YEAR PLAN
IN BOMBAY DIVISION

Sr. No.	Items	Units	Achievements during the year		
			1961-65	1965-66	
1	2	3	4	5	6
I AGRICULTURES					
1. Improved seeds distributed:-					
a) Food grains by type:-					
	i) Jawar	Qtls	2723	642	3365
	ii) Wheat	Qtls	1551	15229	16780
	iii) Bajari	Qtls	698	343	1041
	iv) Paddy	Qtls	18904	11333	30237
	b) Cotton	Qtls	43331	22217	65548
	c) Oilseeds	Qtls	3245	1996	5241
	d) Others (Sugarcane)	Qtls	19490	12529	32019
2. Distribution of Improved Agri. Implements:-					
	i) Iron Ploughs	No.	2700	439	7291
	ii) Dry Farming Sets	No.	356	1	371
	iii) Other Implements	No.	1153	58	1739
3.	Additional area covered by fruits	Acres	55213	1861	73824
4.	Land Reclaimed	Acres	21351	823	29634
5. Soil Conservation					
	i) Area bunded	Acres	605330	19436	799416
	ii) Area Terraced	Acres	11589	838	19677
6. Chemical Fertilisers distributed					
	i) Amonium Sulphate.	Tons	69956	2594	95250
	ii) Super Phosphate	Tons	9935	501	15236
	iii) Fertilizer Mixture	Tons	1146	271	4057
	iv) Urea	Tons	4781	228	7009
	v) Others	Tons	6538	951	16099
7. COMPOST PRODUCTION & OTHER MANUAL RESOURCES					
	i) Compost pits Dug	No.	329164	10563	434807
	ii) Compost prepared	Tons	819657	20411	1023758
	iii) Area Covered by green Manures	Acres	56470	123	68855
	iv) Hand-Flushed Latrines distributed	No	784	167	2461
8II. IRRIGATION					
8.	New Wells Constructed	Nos	15716	580	21599
9.	Old Wells repaired	No.	3791	217	5962
10.	Installation of pumping Sets	No.	16694	287	19565
