C H A P T E R I

1.1 INTRODUCTION AND LOCATION:-

The district of Aurangabad, now a part of the Maharashtra State, is situated in upper Godawari basin and in the extreme north west of Marathwada. It lies in between the parallels of $19^{\circ}17'30''$ and $20^{\circ}40'10''$ north latitude and between the meridians of $74^{\circ}39'30''$ and $76^{\circ}40'$ east Longitude.

The district forms 5.3% of the total area of the State and 3.91% of the population of Maharashtra. A small area in the north and north west lying beyond the Satmala hills is actually situated in the Tapi basin. The northern portion lying between the Satmala hills and the central hill range known as Jalna hills is an upland plateau. The southern portion is comparatively low terminating at the banks of the Godawari. In general, the district slopes down towards the south and south-east.

1.2 BOUNDARIES:-

It is bounded on the north by the districts of Jalgaon and Dhulia, on the south by Bhir district and a portion of Ahmednagar district, on the east by Parbhani and Buldhana districts and on the west by Nasik district and again by a portion of Ahmednagar district. The maximum length of the district from north to south is about 161 kms. from east to west about 201 Kms.

1.3 AREA:-

The area of Aurangabad district as per 1971 population Census publications is 16,200 kilometres, the rural area covering 16,059 sq.kilometres and the urban area 140.8 Sq. kms. The rural area forms 99.1% and the urban area 0.9%.

The district or any of its talukas underwent no major changes in boundaries during 1901 to 1941. In 1950 twenty five enclave villages of Nasik East Khandesh and Ahmednagar were transferred to Aurangabad district and thus a change in boundary was effected. Consequent upon the integration of Jagirs, the taluka boundaries were reconstituted in April, 1950 and the new mahals of Khuldabad and Jafferabad were created.

Soegaon mahal was carved out in 1953 by transferring 37 villages from Sillod taluka and 30 villages from Kannad Taluka.

With the re-organisation of States on 1-11-1956 the district was transferred from the erstwhile Hyderabad State alongwith the rest of Marathwada to Maharashtra State.

1.4 TOPOGRAPHY:-

In general the district slopes down towards south and south east. The general elevation above the sea level varies from 2,000 to 2,200 feet on the north and 1,700 to 1,900 feet towards the south.

1.5 HILLS, RIVERS AND SOILS:-

Aurangabad district is divided into the Balaghat or uplands to the north and Ravanghat or lowlands to the south the latter terminating in the valley of the Godavari. The hills of Balaghat are a continuation of the hill range of the same name in Vidarbha. There are important and noted hills in Aurangabad, namely, Daulatbad, Ajantha, Chowka and Jyotsna hills. All these have a terrace like appearance with flattened summits. Other hills of the district are Satara, Mahadeo, Maholi, Kankura, Surpanth, Satmala, Ajantha ghats and the Aurangabad hills. Their average height is about 2,000 feet above the sea level but in some places they reach a height of about 3,000 feet also. These hills consist mostly of trap rock with nodular limestone at some places.

The most important river of the district is Godavari which runs along the southern boundary for about 203 kilometres separating Aurangabad district from Ahmednagar and Bhir districts. Its tributaries are Purna, Shivana, Dhenda, Dhudhna, Dhamna, Kham (Ganda) (which passes through the heart of the Aurangabad town), Dheku, Khelna, Kundalika, Sauki, Sukhna, Koriwad, Katkali, Galathi and Jui.

The other small streams and nallas are Yela, Sabhanga Virbhadra, Kasner, Nalni, Dhori, Wagora, Sonuj, Bala, Hewra, Arnavati and Gulduth.

The soil of Aurangabad district is black cotton soil of "Regur" formed by the weltering of the trap rock. The geological formation of the district is (i) Middle traps of the Deccan tertiary (ii) older alluvial deposits of Godavari and (iii) modern alluvial deposits of Godavari and other rivers forming the upper layer. The black cotton soil is rich in plant nutrients such as lime magnesia, iron and alkalis on which cotton and some of the dry crops flourish well. It swells and becomes sticky on weltering by water while on drying contracts and develops numerous cracks. The soil varies greatly both in its texture and depth. In the hilly tracts in the north it is shallow and relatively poor, but in the south it is deep and fairly rich. In the Godavari valley specially along the river banks it is very deep and fertile.

1.6 (i) CLIMATE:-

The climate of Aurangabad is pleasant and agreeable during the greater part of the year. The climatic year may be divided into three short seasons (i) a moderately warm wet season from June to September (ii) a cool dry season from October to February and (iii) hot dry season from March to May.

The rainy season which lasts from June to September is warm and pleasant during rains as the temperature does not fall below 17°C . and normally ranges between 21°C . to 36°C . The winter season is comparatively dry and starts from November and ends in February, January being the coldest month of the year. The maximum temperature in the month of May rises even as high as 41°C . Hot dry winds prevail occasionally in April and May. During summer, the days are hot but nights are fairly cool. The climate of Aurangabad can thus be called pleasant and healthy.

During the hot season in 1974 the maximum temperature $39.1^{\circ}\text{centigrade}$ and $38.1^{\circ}\text{centigrade}$ were recorded in April, 1974, at Aurangabad and Chikalhana centres respectively whereas the maximum temperatures recorded in May, 1973 at Aurangabad and Chikalhana centres were 43.6° and $43.0^{\circ}\text{centigrade}$ respectively.

The minimum temperatures during the cool-dry season of 1974 were recorded as 12.8° centigrade at Aurangabad centre, in the month of December, 1974 and 9.5° centigrade at Chikalhana centre in the month of January, 1974, whereas in 1973 the minimum temperatures were recorded as 10.6° centigrade at Aurangabad centre in the month of November, 1973 and 3.8° centigrade at Chikalhana centre in the month of January, 1973.

The table below indicates the maximum and minimum temperature recorded during the year 1973 and 1974 at Aurangabad and Chikalhana centres in Aurangabad district.

TABLE NO.1.

Statement showing the average temperature in three seasons at Aurangabad & Chikalhana centres in Aurangabad District during 1973 and 1974.

Sr. No.	Season/ Month	Aurangabad		Variation (+), (-) over 1973.	Chikalhana		Variation (+), (-) over 1973
		Average temperature in centigrade 1973	Average temperature in centigrade 1974		Average temperature in centigrade 1973	Average temperature in centigrade 1974	
1	2	3	4	5	6	7	8
<u>I. Moderately warm and wet season:</u>							
1.	June	31.6	28.7	-2.9	30.7	28.2	-2.5
2.	July	26.3	N.A.	-	25.9	26.6	+0.7
3.	August	26.4	25.4	-1.0	26.1	25.0	-1.1
4.	September	25.6	27.1	+1.5	24.9	26.0	+1.1
<u>II- Cool and Dry Season.</u>							
1.	October	23.7	25.5	+1.8	23.1	24.5	+1.4
2.	November	21.5	22.0	+0.5	18.2	20.3	+2.1
3.	December	N.A.	19.3	-	19.2	18.8	-0.4
4.	January	24.9	22.2	-2.7	19.0	19.8	+0.8
5.	February	25.7	25.4	-0.3	22.8	23.3	+0.5
<u>III-Hot Dry Season:</u>							
1.	March	28.4	29.4	+1.0	25.4	28.2	+2.8
2.	April	33.0	31.8	-1.2	30.1	30.5	+0.4
3.	May	33.4	31.4	-2.0	32.2	30.4	-1.8

1.7 RAINFALL:-

In this district the rainfall is unevenly distributed in different parts of the district. According to variation in rainfall, the district can be classified into three tracts, namely (i) where the rainfall exceeds 750, millimetres (ii) Rather in-sufficient rainfall, with rainfall ranging between 650 to 750 millimetres and (iii) Poor rainfall with rainfall below 650 millimetres.

TABLE No.1.2

Statement showing the Talukawise normal rainfall and rainfall during 1973 and 1974 in Aurangabad District.

Sr. No.	Taluka	Normal rainfall in millimetres	Rainfall in millimetres during	
			1973	1974
1	2	3	4	5
1.	Aurangabad	725.8	660.3	814.0
2.	Khuldabad	750.2	895.5	722.9
3.	Kannad	792.2	709.2	649.7
4.	Soegaon	859.3	949.6	659.4
5.	Sillod	686.0	903.5	619.0
6.	Bhokardan	735.3	666.9	581.1
7.	Jafferabad	769.8	569.6	448.8
8.	Jalna	754.6	506.0	483.9
9.	Ambad	818.3	734.7	482.9
10.	Pai than	744.3	587.0	683.7
11.	Gangapur	607.6	742.2	762.9
12.	Vaijapur	570.9	481.3	537.7

The normal rainfall is shown taking average of 34 years from 1922-23 to 1955-56 for Aurangabad, Khuldabad, Kannad, Sillod, Bhokardan, Jalna, Gangapur and Vaijapur and average of ten years from 1961 to 1970 for Soegaon, Jafferabad, Ambad and Pai than. During 1973, the highest rainfall of the year has been recorded at Soegaon centre and the lowest has been recorded

at Vaijapur Centre whereas during the year 1974 the highest rainfall has been recorded at Aurangabad and the lowest at Jafferabad. Considering the crop conditions, the rainfall during both the years was below the requirement.

The Fact Finding Committee appointed by the Government of Bombay in 1960 reported that the rainfall is not dependable in the following areas which are likely to be affected by scarcity conditions.

<u>Area</u>	<u>Estimated Frequency</u>
1. Vaijapur Taluka	Once in Ten years.
2. Gangapur Taluka	Once in Ten years.

Thus the south western region of the district generally recording poor rainfall is more susceptible to failure of crops due to inadequate, irregular and untimely rains. The rainfall is unevenly distributed in the district leading sometimes to scarcity conditions.

1.8 ADMINISTRATIVE SET UP:-

Aurangabad district is divided into three revenue sub-divisions which are further sub-divided into Talukas as given in the following table No.1.3.

TABLE NO.1.3.

Statement showing the revenue sub-divisions divided into Talukas in Aurangabad district as per 1971 Census.

Sr. No.	Sub-Division	Taluka	Area in Sq.Kms.
1	2	3	4
1.	Aurangabad	Aurangabad	1,499.1
		Soegaon	575.5
		Sillod	1,430.2
		Paithan	1,371.4
2.	Jalna	Jalna	1,855.5
		Bhokardan	1,235.7
		Jafferabad	690.7
		Ambad	2,099.5
3.	Vaijapur	Vaijapur	1,162.9
		Kannad	1,364.7
		Khuldabad	436.4
		Gangapur	1,230.5
TOT/L:			16,200.00

ZILLA PARISHAD:-

With a view to promote the development of democratic institutions and to secure greater participation of the people in development activities in local and Government affairs, Zilla Parishad and 12 Panchayat Samitis have been established in 1962. The Panchayat Samities jurisdiction correspond to the taluka boundaries excluding municipalities and cantonment. The Zilla Parishad covers 99.13 percent of the area and 84.15 percent of the total population of the district as per 1971 Census.

The number of villages and population included under the Zilla Parishad and each Panchayat Samiti alongwith the number of councillors and co-opted members are shown below in table No.1.4.

TABLE NO.1.4

Statement showing the number of villages and Population (as per 1971 Census) alongwith the number of councillors and co-opted members in Zilla Parishad and Panchayat Samitis in Aurangabad District.

Sr. No.	Name of Institutions	No. of Councillors including Co-opted members	Area in Sq. Kms.	No. of inhabited villages	Population
1	2	3	4	5	6
1.	Zilla Parishad	67	16,059.2	1,866	16,41,745
	<u>Panchayat Samitis</u>

C H A P T E R - I I .

PURPOSE :-

Exhaustive statistics about important Socio-Economic indicators have been presented in this Abstract with a view to make the Abstract useful as a reference book. The talukawise figures which have been given in the Abstract will enable the reader to compare the indicators of development between the talukas of the district.

DISTRICT AT A GLANCE :-

This table indicates the data on all important items in order to have a birds-eye-view of the Socio-Economic indicators of the district as compared to that of Maharashtra State. Items covered in the table are Area and Population, Agriculture, Animal Husbandry, Industries, Electricity, Co-operation, Medical and Health, Education, Transport and Communication, Plan and Community Development Programme, Local Bodies and other miscellaneous Statistics. Reference period of the data is also indicated in this table.

1. AREA AND POPULATION :-

The data of 1971 population census are presented in table Nos. 1. to 7. The table No.1 gives rural and urban area, population per Sq.km., No. of villages inhabited and un-inhabited, No. of towns, No. of occupied residential houses, No. of Households and male and female population in Aurangabad district, according to 1971 Census. The table No.2 shows decadal percentage variations in total, rural and urban ^{population} of Aurangabad district for 1951, 1961 and 1971 censuses.

The table No.3 showing talukawise classification of villages according to population ranges in 1971 Census gives No. of villages, in population ranges of less than 200, 200-499, 500-999, 1,000-1,999, 2,000-4,999, 5,000-9,999 & 10,000 and above population in Aurangabad district. The table No.4 shows talukawise classification of towns according to population ranges in 1971 census in Aurangabad district. The table No.5 indicates the number of workers and non-workers according to livelihood classes in each taluka of Aurangabad district according to 1971 Census.

The table No.6 presents the data of distribution of total rural and urban population according to (a) age group and (b) religion in the district as per 1971 Census. The table No.7 gives information pertaining to talukawise total, rural and urban population of scheduled castes, scheduled tribes and Neo Bhuddists in the district at the time of 1971 Census.

II. RAINFALL AND CLIMATE:-

Table Nos. 8 and 9 deal with number of rainy days and rainfall and monthly temperature at the selected centres in the district. The monthwise information regarding rainy days and total rainfall at selected centres in the district during 1974 is given in table number 8, as recorded at the 13 centres in the district which are also taluka headquarters except one i.e. Chikalthana. The normal rainfall recorded in the table is the average rainfall between 1922-23 to 1955-56 for Kannad, Sillod, Bhokardan, Khuldabad, Vaijapur, Gangapur, Aurangabad and Jalna centres, the same recorded in the table for Soegaon, Jafferabad, Paithan and Ambad centres is the average rainfall of ten years i.e. 1961 to 1970 and for Chikalthana the average for ten years i.e. from 1963 to 1972 as the average rainfall between 1922-23 to 1955-56 is not available with the Statistician, Department of Agriculture, Pune. A day is treated as rainy day if during the 24 hours, the rain gauge recorded a minimum of 2.5 mm. of rainfall. The table No.9 gives monthly maximum and minimum temperature at two selected centres in the district during 1974.

III. AGRICULTURE:-

Table No.10 to 21 deal with land utilisation, talukawise area under different crops, yield per hectare and out-turn of principal crops, talukawise area irrigated by different sources, talukawise area irrigated under different crops, number of irrigation wells in each taluka, number of minor irrigation works, major and medium irrigation projects in the district, agricultural wage rates, agricultural implements in each taluka famine scarcity and akin to scarcity data and determination of precarious and other scarcity areas.

The table No.10 gives information about talukwise land utilisation in the district during 1972-73 and 1973-74, Under the following standard heads of the land use Under "Forests" are included all actually forested areas or lands classed or administered as forests under any legal enactment dealing with forests whether state owned or private. Land put to non-agricultural uses stands under water e.g. rivers and canals and other lands put to uses other than agricultural. Barren and unculturable land covers all barren and unculturable land like mountains deserts etc. Land which cannot be brought under cultivation, unless at a high cost, is classed as unculturable. Permanent pastures and other grazing lands cover all grazing lands, whether they are permanent pastures and meadows or not. Village common and grazing lands within forest areas are included under this head. Under miscellaneous tree crops and groves not included in the net area sown, is included all cultivable land which is not included under net area sown but put to some agricultural use. Lands under Casurina trees, thatching grass, bamboo bushes and other groves for fuel etc. which are not included under orchards are classed under this category. Culturable waste includes all lands available for cultivation or taken up for cultivation once, but not cultivated during the current year and last five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Current fallow comprises cropped areas which are kept fallow during the current year. If any seedling area is not cropped again in the same year it is also treated as current fallow. Other fallow land includes all lands which are taken up for cultivation but are temporary out of cultivation for a period of not less than one year and not more than five years. The reason for keeping such land fallow may be one of the following (i) Poverty of cultivator (2) Inadequate supply of water (iii) Silting of canals and rivers (4) Malarial climate (5) Soil erosion and (6) Unremunerative nature of farming.

The net area sown consists of net area sown with crops and orchards, area sown more than once being counted only once. ^{The} gross cropped area represents the sum total of area under all crops. The difference between the total cropped area and net area sown is accounted for by the area sown more than once, in the same land during the same year with the same or different crops. The area under different crops in each taluka of the district for the years 1972-73 and 1973-74 is given in table No.11. The yield per hectare and out-turn of principal crops in the district during 1972-73 and 1973-74 is furnished in table No.12. The data regarding the area irrigated by different sources in each taluka of the district during 1972-73 and 1973-74 is displayed in table No.13. The area irrigated under different crops in each taluka of the district during 1972-73 and 1973-74 is given in table No.14. The information regarding talukawise number of irrigation wells during 1972-73 and 1973-74 and number of minor irrigation works during 1973-74 and major and medium projects as on 30-6-1974 is furnished in table Nos.15,16 and 17 respectively. The table No.18 deals with agricultural wage rates during 1974 and table No.19 gives information about agricultural implements as per 1972 Livestock Census. The information about famine and scarcity conditions in each taluka for the year 1974-75 is furnished in table No.20. The talukawise information about determination of precarious and other scarcity areas according to the history of scarcity in the district during the years 1970-71 to 1974-75 is supplied in table No.21.

IV. ANIMAL HUSBANDRY:-

The information about Animal Husbandry is supplied in table No.22 to 25. The table No.22 presents talukawise data relating to different categories of livestock, poultry, etc. enumerated at the time of quinquennial livestock Census, 1972.

At these censuses all the livestock is enumerated by house to house enquiry. Particular care is taken to enumerate livestock in slaughter houses, stray animals and animals in transit. The table No.23 gives information about developmental activities of the department of Animal Husbandry in the district for the year 1974-75. Diseasewise livestock mortality in the district is given in table No.24. The number of recognised slaughter houses and number of animals slaughtered in those slaughter houses in the district during 1974-75 is shown in table No.25.

V. FORESTS:-

The two tables (table Nos. 26(a) and 26(b) included in this section give details of area under different types of forests and value of different forest produce in the district during 1974-75. The areas under forests are classified according to legal status into Reserved Forests, Protected forests and Unclassed Forests. The legal status refers to the classification of forests under the Indian Forest Act XVI of 1927. Reserved forests are those that are intended mainly for timber production and in which rights of grazing and cultivation are seldom allowed. In protected forests the restrictions are not so rigid, right of grazing and cultivation is allowed but certain limitations and restrictions are imposed. The unclassed forest refers to the in-accessible forest or un-occupied waste.

VI. INDUSTRIES, EMPLOYMENT AND ELECTRICITY: 2

The data regarding industries, employment and electricity is furnished in table Nos. 27 to 35. The average daily employment of workers in factories in the district is given in table No.27.

A worker is defined as a person whose main activity is participation in any economically productive work through his physical or mental activity. Work involves not only actual work but effective supervision and direction of work. The industrywise distribution of working factories according to working strength and number of days worked is supplied in table Nos. 28 and 29.

The statistics relating to annual survey of industries in Aurangabad district for the year 1966 is furnished in table No.30. The employment exchange activities are displayed in table Nos. 31 and 32. The volume of employment in different industries as on 31st March, 1975 is given in table No.33.

The generation and consumption of electricity during 1974-75 and the number of towns and villages electrified and population covered in the district as on 31-3-1961, 1966, 1970, 1974 and 1975 are given in table Nos. 34 and 35.

VII. CO-OPERATION:-

The data regarding the co-operative movement in the district is furnished in table numbers 36 to 43. The number of different types of co-operative societies working in the district in 1974-75 is given in table No.36, while the statistics relating to co-operative banks in the district in 1974-75 is supplied in table No.37. The talukawise Primary Agricultural Credit Societies and other Co-operative societies of different types in Aurangabad district during 1974-75 is furnished in table Nos. 38 and 39. The operation of Central and primary co-operative marketing societies in each taluka of the district during 1974-75 and other co-operative societies of different types in the district during 1974-75 is supplied in table Nos. 40 and 41. The operation of regulated markets in the district during 1974-75 is given in table No.42. The number of registered money lenders and loans advanced by them in the district during 1974-75 is given in table No.43.

VIII. MEDICAL AND PUBLIC HEALTH:-

The statistics relating to medical and public health is supplied in from table Nos. 44 to 48. The information about medical facilities available through public and public aided bodies in each taluka of the district in 1974 is given in table No.44. The talukawise number of births and deaths registered during 1974 and the number of deaths due to important causes in the district during the year 1971 to 1974 are given in table Nos. 45 and 46.

The talukawise vaccination statistics and Cholera inoculation in the district in 1974 is supplied in table No.47. The talukawise number of Family Planning Centres operating in the district during 1974-75 is furnished in table No.48.

IX. EDUCATION.

The data regarding education is supplied in table Nos. 49 to 55. The literacy according to 1971 Census is given in table No.49. Information about education in rural areas and urban areas in the district according to 1961 Census is given in table Nos. 50 and 51 as the data of 1971 Census is not available. The talukawise number of institutions, pupils and teachers in the district during 1973-74 is supplied in table No.52. The number of beneficiaries among backward classes in the district during 1973-74 and the beneficiaries due to economically backward class concessions of free education given to them during 1973-74 is furnished in table No.53 and 54, respectively. The expenditure on primary education in the district during 1974-75 is supplied in table No.55.

X. TRANSPORT AND COMMUNICATIONS:-

The data regarding transport and communications is furnished in table Nos. 56 to 62. The length of Railway route in the district as on 31st March, 1975 is given in table No.56. The road length according to category and surface in the district as on 31st March, 1975 is supplied in table No.57. The motor vehicles in operation in Aurangabad Region and the operation statistics of Nationalised Road Transport according to S.T. division as on 31st March, 1975 is shown in tables No.58 and 59. The Traffic Census on important roads in the district as on May, 1973 is given in table No.60. The information of posts, telegraphs and telephone Statistics in Aurangabad district during 1961-62, 1965-66, 1970-71, 1971-72, 1972-73, 1973-74 and 1974-75 is given in table No.61. The talukawise statistics about rural broadcasting in the district as on 31st March, 1975 is supplied in table No.62.

XI. LOCAL BODIES:-

The information about income and expenditure of local bodies is supplied in table Nos. 63 to 66.

The table No.63 gives information about income & expenditure of local bodies in the district during 1965-66 and 1968-69 to 1974-75. The income and expenditure of village panchayats in all panchayat samitis of the district during the year 1974-75 is given in table No.64. The data regarding headwise receipts, Government grants and expenditure of the Zilla Parishad during 1973-74 (Actuals), 1974-75 (Revised) and 1975-76 (Estimates) is supplied in table No.65-A, 65-B and 65-C, respectively. The information regarding income and expenditure of each Municipal Council separately and cantonment board in the district during 1974-75 is furnished in table No.66.

XII. PLAN AND COMMUNITY DEVELOPMENT:-

The information about Plan and Community Development is given in table Nos. 67 to 71.

The Plan expenditure under different development sub-heads and important physical achievements under Plan in the district during Fourth Five Year Plan and during 1974-75 is supplied in table Nos.67 and 68. The particulars of community Development programme in the district as on 31-3-1975 are given in table No.69. The expenditure incurred in different stages of blocks in the district upto the end of 1974-75 is shown in table No.70. The physical achievements on selected items in all the C.D.Blocks of the district during 1974-75 are furnished in table No.71.

XIII. PRICES:-

The price statistics are given in three tables. The wholesale prices of certain agricultural commodities at all regulated markets in the district during 1974 are shown in table No.72. The average retail prices of important commodities at district headquarters during 1974 are supplied in table No.73. The prices reported in these tables do not show the actual price level, as the quotations are taken from fixed shops at fixed centres for fixed varieties of the articles.

These prices only indicate the trends in prices. The same case is with the Agricultural wage rates. The consumer price Index numbers for working class during 1974-75 is furnished in table No.74, for Aurangabad and Nanded centres.

XIV. JUDICIAL AND ADMINISTRATIVE:-

The statistical data relating to police department and judicial courts are included in this section. The strength of Police force and crime statistics in the district during 1974 are given in table Nos. 75 and 76. The work disposed off in Civil and Criminal courts of the district during 1974 is shown in table No.77.

XV. MISCELLANEOUS:-

The miscellaneous statistics such as Cinema Statistics, No.of banking offices, No.of Joint Stock companies, No.of Insurance Policies issued and amount insured, collection of small savings, land revenue collection and No.of presses, News papers and periodicals printed are given in table Nos. 78 to 84. The trends in selected indicators are furnished in table No.85.

C H A P T E R - III.

Indicators of Economic Development :-

To get an idea of the economic development achieved and to measure the success of economic planning, a comparison of position over a definite period is always helpful. In this chapter an attempt has been made to review the progress of economic development in the district after the year 1961-62 onwards with the help of certain selected trends based on certain important indicators of development,

INDICATOR NO.1.

Percentage of gross area sown to net area sown.

The percentage of gross cropped area to the net cropped area is an indicator to show the extent of double cropped area. To increase the food production, efforts are being made to increase the number of crops raised during a year. The double cropped area of the district depends upon the quality of soil and availability of the perennial irrigation. The table ^{below} shows the percentage of gross cropped area to net cropped area in each tahsil during the year 1972-73 and 1973-74.

TABLE NO.3.1.

Sr. No.	Tahsil	1960-61		1972-73		1973-74	
		Percentage	Rank	Percentage	Rank	Percentage	Rank
1	2	3	4	5	6	7	8
1.	Aurangabad	107.40	2	107.43	4	103.10	7
2.	Khuldabad	105.31	4	102.89	8	104.33	4
3.	Kannad	104.20	6	111.45	2	103.89	5
4.	Soegaon	107.31	3	101.45	10	103.43	6
5.	Sillod	103.35	9	108.24	3	102.13	9
6.	Bhokardan	103.29	10	104.44	6	106.11	3
7.	Jafferabad	104.02	7	102.02	9	102.94	8
8.	Jalna	104.80	5	112.99	1	101.58	11
9.	Ambad	103.42	11	103.22	7	106.20	2
10.	Paithan	103.50	8	101.13	11	102.00	10
11.	Gangapur	114.83	1	100.83	12	101.39	12
12.	Vaijapur	102.60	12	105.79	5	108.07	1
	District	105.04	--	105.57	--	103.93	--

It will be seen from the above table that the percentage of gross cropped area to net cropped area during the year 1973-74 has increased in Khuldabad, Soegaon, Bhokardan, Jafferabad, Ambad, Paithan, Gangapur and Vaijapur tahsils and has decreased in Aurangabad, Kannad, Sillod and Jalna tahsils as compared to that during the year 1972-73. The decrease in percentage can be attributed to the increase in the net cropped area. The percentage of gross cropped area to net area sown is the highest in Vaijapur tahsil and the lowest in Gangapur tahsil during the year 1973-74. Considering the whole district, it is observed that the percentage of gross cropped area to net cropped area has fallen during the year 1973-74 as compared to that during the year 1972-73.

INDICATOR NO.2:-

Productivity of important crops.

The success in efforts to increase the food production can be measured in terms of the productivity of some important crops. The following table shows productivity of some important crops in the district during the year 1961-62, 1972-73 & 1973-74.

TABLE NO.3.2.

Sr. No.	Crops	Yield per hectare in Kg. during the year		
		1961-62	1972-73	1973-74
1	2	3	4	5
1.	Rice	596	54	418
2.	Wheat	440	145	477
3.	Jowar Kharif	628	207	293
4.	Jowar Rabi	558	92	472
5.	Bajra	242	76	249
6.	Total Cereals	462	106	367
7.	Gram	272	126	422
8.	Tur	262	161	294
9.	Total Pulses	272	120	343
10.	Chillies	378	169	380
11.	Cotton (in bales)	115	40	89
12.	Groundnut	514	92	555

From the table above it will be seen that the yield per hectare had fallen considerably during the year 1972-73 as compared to that during the year 1961-62. This was due to the drought and scarcity conditions in the district. Again there is a considerable increase in the yield per hectare in respect of all the crops during the year 1973-74. This was due to good monsoon. The percentage increase was more in case of Groundnut, Chillies and Jowar (Rabi). However the increase in the yield of sugarcane has shown a continuous increasing trend.

INDICATOR NO.3 :-

Gross value of Agricultural production:

As the population of the district depends mainly on the agriculture, the gross value of total agricultural production is the best indicator of the economic development. The gross value of a particular commodity is calculated on the basis of total produce of the particular commodity, multiplied by harvest season price prevailing during the year.

In the table below, gross value of important agricultural commodities for the years 1961-62, 1972-73 and 1973-74 is given in crores of rupees.

TABLE NO.3.3.

Sr. No.	Name of produce	Gross value in crores rupees during the year		
		1961-62	1972-73	1973-74
1.	2.	3.	4.	5.
1.	Rice	0.25	0.04	N.M.
2.	Wheat	1.89	1.22	6.53
3.	Jowar	14.90	4.07	26.02
4.	Bajra	1.77	1.86	8.37
5.	Other cereals	1.18	0.07	0.51
6.	Total cereals	19.99	7.26	41.43
7.	Gram	0.46	1.67	3.27
8.	Tur	0.53	0.96	1.76
9.	Sugarcane (in terms of Gur)	2.55	6.27	6.82
10.	Groundnut	2.84	0.48	3.00

It will be seen from the above table that the gross value of the cereals has fallen during the period of 1961-62 to 1972-73.

This is due to failure of the monsoons and the existence of the scarcity conditions. The second reason is that the cultivators are changing over to cash crops. As a result there is increase in the gross value of the cash crops, like sugarcane, cotton etc. over the same period. Again during the year 1973-74 the monsoons were more favourable and as a result there is again increase in the gross value of the cereals. There is one more reason for the increase and that is due to the monopoly procurement of cotton by the state Government, due to which the area under cotton was reduced and was put under food crops.

INDICATOR NO.4 :-

Percentage of irrigated area:

Till the recent years the cultivation in the district depended on the vagaries of the monsoons as there were no irrigation facilities developed. What-ever irrigation was found, that was all well irrigation. Naturally the Government realised the strategy that without the development of irrigation facility, the development of agriculture was impossible and then the efforts in this direction were made.

In the following table the percentage of net irrigated area to net sown area is given for the year 1961-62, 1972-73 and 1973-74.

TABLE NO.3.4

Sr. No.	Tahsil	Percentage of net irrigated area to net area sown					
		1961-62		1972-73		1973-74	
		Percentage	Rank	Percentage	Rank	Percentage	Rank
1	2	3	4	5	6	7	8
1.	Aurangabad	7.66	2	9.65	2	11.21	3
2.	Khuldabad	8.35	1	9.34	3	14.58	1
3.	Kannad	3.27	7	5.98	5	5.93	8
4.	Speegaon	1.11	12	5.38	6	8.53	4
5.	Sillod	3.17	8	3.06	11	6.75	6

Contd..

TABLE NO.3.4 Contd..

1	2	3	4	5	6	7	8
6.	Bhokardan	2.25	11	12.49	1	13.27	2
7.	Jafferabad	2.83	9	4.69	7	7.15	5
8.	Jalna	4.74	3	4.11	9	5.75	9
9.	Ambad	2.42	10	2.66	12	2.55	12
10.	Paithan	4.08	5	8.97	4	6.06	7
11.	Gangapur	4.12	4	3.11	10	2.95	11
12.	Vaijapur	3.37	6	4.21	8	5.43	10
	District	3.83	--	5.84	--	6.65	--

The table above shows that the percentage of irrigated area has considerably increased in, Bhokardan, Khuldabad, Kannad Aurangabad, Sillod, Jafferabad and Soegaon tahsils whereas it has remained almost same in Jalna, Ambad and Paithan. The same has shown a fall in Gangapur tahsil. For the district as a whole the increase in percentage of irrigated area to net sown area is 80.16 percent over a period from 1961-62 to 1973-74. Very soon i.e. in the year 1974-75 the picture of the irrigation in Aurangabad district will be completely changed as hundreds of acres of land will be irrigated from the water of Jaikwadi project which is one of the biggest irrigation projects in India.

INDICATOR NO.5 :

Changes in cropping pattern:-

Over few years in the past there is change in the cropping pattern in the district. As more and more irrigation facilities are available, the tendency to raise perennial cash crops is at increase in the cultivators. Before the monopoly purchase of cotton, more and more land was put under the cotton. But now a days the area under sugarcane is continuously increasing. More and more sugar factories in co-operative sector are coming up which are giving encouragement to the cultivators to grow more sugarcane. The table below shows the percentage of food crops and non-food crops in the district.

TABLE NO.3.5.

Sr. No.	Tahsil	Percentage of area under food crops to gross cropped area during the year		Percentage of area under non-food crops to gross cropped area during the year	
		1972-73	1973-74	1972-73.	1973-74
1	2	3	4	5	6
1.	Aurangabad	85.85	88.74	14.15	11.26
2.	Khuldabad	88.00	83.95	12.00	16.05
3.	Kannad	82.81	70.18	17.19	29.82
4.	Sbeegaon	64.72	68.30	35.28	31.70
5.	Sillod	80.15	81.15	19.85	18.85
6.	Bhokardan	74.37	74.66	25.63	25.34
7.	Jafferabad	70.09	71.44	29.91	28.56
8.	Jalna	64.23	64.01	35.77	35.99
9.	Ambad	67.13	70.97	32.87	29.03
10.	Paithan	80.61	82.65	19.39	17.35
11.	Gangapur	85.95	87.49	14.05	12.51
12.	Vaijapur	86.56	91.13	13.44	8.87
	District	76.43	77.53	23.57	22.47

From the table above it is seen that the percentage of the food crops has increased during the year 1973-74 as compared to that during the year 1972-73. Further it is seen that the percentage of the food crops is the highest in Vaijapur tahsil during the year 1973-74 whereas during the year 1972-73 it was the highest in Khuldabad tahsil. It can be said that in Aurangabad district the area under cash crops is comparatively less than the area under food crops.

INDICATOR NO.6 :

Increase in agricultural credit and outstanding dues.

The influence of farm credit on the Indian economy is tremendous and as such it needs to be given a proper place in the planning process. The vast number of small and marginal farmers constitute the bulk of our agricultural population and it is the most significant constituent of the "neglected sector" by the commercial banks.

To relieve the farmers from such circumstances the co-operative movement has come forward with open arms. The co-operative agricultural credit societies play an important role in financing of agriculture, through a large network of primary co-operative agricultural credit societies covering the whole of the rural population of the district.

Tahsilwise percentages of loans advanced and the loans outstanding during the year 1973-74 & 1974-75 are given below:-

TABLE NO.3.6.

Sr. No.	Name of Tahsil	Percentage of loans advanced during the year		Percentage of loans outstanding during the year	
		1973-74	1974-75	1973-74	1974-75
1.	2.	3.	4.	5.	6.
1.	Aurangabad	8.84	10.99	7.59	7.95
2.	Khuldabad	3.24	3.20	2.27	2.99
3.	Kannad	13.00	10.92	12.72	12.34
4.	Soegaon	6.59	6.79	5.18	5.04
5.	Sillod	14.88	13.28	12.31	12.41
6.	Bhokardan	9.60	9.84	8.96	8.57
7.	Jafferabad	3.97	4.52	3.25	2.55
8.	Jalna	5.46	9.49	7.19	7.68
9.	Ambad	12.39	14.33	11.07	11.56
10.	Paithan	4.48	5.68	5.78	5.42
11.	Gangapur	6.17	4.98	8.91	8.49
12.	Vaijapur	11.38	5.98	14.77	15.00
	Total	100.00	100.00	100.00	100.00

During the year 1973-74 the total amount of the loans advanced in the whole of the district through the Primary co-operative agricultural credit societies, was Rs. 559.85 lakhs and the loans outstanding at the end of the same year were Rs. 1,214.48 lakhs. The same figures for the year 1974-75 were Rs. 435.55 lakhs and Rs. 1,209.31 lakhs, respectively.

In the table above it is seen that the percentage of loans advanced was the highest in Sillod tahsil in 1973-74 and Ambad tahsil in 1974-75. Again the loans outstanding were the highest in Vaijapur tahsil during both the above years.

INDICATOR NO.7:

Rural Agricultural Wage Rates:

The Directorate of Economics and Statistics, Maharashtra state, collects rural agricultural wage rates at three selected centres in the district from the year 1963. These three centres are, Bidkin in Paithan taluka, Ajantha in Sillod taluka and Mahalgaon in Vaijapur taluka. As such tahsilwise data are not available for comparison for this indicator. The wage rates collected do not represent the actual wage level in the district because only annual averages have been taken for comparison and they too at particular selected centres. Still they are helpful to know the general trend of the agricultural wage rates in the district for a large length of period.

In the table below the annual average daily agricultural wage rates at the three centres for the category of skilled and unskilled labours are given.

TABLE NO.3.7.

Sr. No.	Centre	Year	Skilled labour		Field labour		Other agricultural labour	
			Carpenter	Blacksmith	Male	Female	Male	Female
1.	2.	3.	4.	5.	6.	7.	8.	9.
1.	Bidkin	1973	4.83	4.60	3.00	1.53	--	--
		1974	4.67	4.35	3.00	2.04	3.00	2.50
2.	Ajantha	1973	6.00	6.00	2.71	1.71	--	--
		1974	6.00	6.00	3.27	2.00	--	--
3.	Mahalgaon	1973	5.00	5.00	2.92	1.27	--	--
		1974	5.00	5.00	3.44	1.29	--	--

It is seen in the above table that the wage rates of the skilled labour have been the same for 1973 and 1974 for Ajantha and Mahalgaon centre. In case of Bidkin centre the wage rates for skilled category have shown slight fall during the year 1974.

Regarding the unskilled labour i.e. field labour and other agricultural labour there is increase at all the centres except the males at Bidkin centre. The increase in the wages of female field workers at Bidkin centre is more significant.

INDICATOR NO.3:-

Livestock per hectare of land.

This indicator is based on the population of total bovine and ovines. Bovines include cattle and buffaloes and ovines include sheep and goats. The livestock is the major source of power to the agriculturist. The comparison of the livestock population of 1966 and 1972 livestock census population with the cultivable area in the district is given below .

TABLE NO.3.8.

Sr. No.	Name of the Tahsil	Livestock population per hectare of cultivable area			
		1965-66	Rank	1972-73	Rank
1	2	3	4	5	6
1.	Aurangabad	1.26	1	1.40	1
2.	Khuldabad	1.05	3	1.10	2
3.	Kannad	1.00	4	0.97	3
4.	Soegaon	0.76	11	0.77	8
5.	Sillod	1.08	2	0.92	4
6.	Bhokardan	0.91	8	0.81	7
7.	Jafferabad	0.80	10	0.84	6
8.	Jalna	0.96	5	0.97	3
9.	Ambad	0.70	12	0.69	9
10.	Paithan	0.95	6	0.81	7
11.	Gangapur	0.93	7	0.77	8
12.	Vaijapur	0.87	9	0.91	5
District Total		0.93	--	0.90	--

It is seen that the number of livestock per hectare of cultivable land is the highest in Aurangabad tahsil for 1966 and 1972 census. As per 1966 livestock census the total population of Bovines and Ovines was 13,02,445 and the total cultivable area during the year 1965-66 was 13,95,454 hectares.

The same figures for 1972 census and 1972-73 agricultural year were 12,50,224 and 13,89,144 hectares, respectively. It is further seen in the above table that there is a general fall in all the tahsils in the number of livestock per hectare of cultivable land. This was due to continuous drought conditions through out the district since 1970-71.

INDICATOR NO.9:-

Poultry as compared to population:

Poultry is a quick returning livestock which can both supplement the food resources and increase income in rural as well as urban areas. For this reason only poultry farming has been given very much importance in Integrated area development Scheme (Page scheme) for providing subsidiary occupation, to small land holders as well as landless labours. Under the development plans special efforts are continued for the encouragement of poultry farming in the district.

TABLE NO.3.9.

In the table below the number of poultry birds per 1000 persons as per livestock census 1961, 1966 and 1972 is given.

Sr. No.	Tahsil	Poultry per 1000 persons (1961 population census) as per		Poultry per 1000 persons (1971 population census) as per	
		1961 Livestock Census	1966 Livestock Census	1972 Livestock Census	1972 Livestock Census
1	2	3	4	5	
1.	Aurangabad	153	139	123	
2.	Khuldabad	205	157	130	
3.	Kannad	127	105	101	
4.	Soegaon	199	218	205	
5.	Sillod	145	136	133	
6.	Bhokardan	126	100	110	
7.	Jafferabad	234	165	216	
8.	Jalna	147	143	100	
9.	Ambad	116	95	95	
10.	Paithan	128	119	111	
11.	Gangapur	155	161	97	
12.	Vaijapur	140	138	70	
	District	145	131	113	

The figures in the above table show that the ratio of the poultry birds per 1000 population was the highest in Jafferbhad tahsil as per 1961 and 1972 livestock census and in Seegoon tahsil as per 1966 livestock census. The range of variation was considerably wide as the maximum ratio was 216 while the minimum was 70 during the year 1972. As per the 1972 livestock census; total poultry population of Aurangabad district was 2,22,309. Comparing this with the human population of 1971 census, it is seen that there was one poultry bird for about every nine persons in the district. Thus there ^{is} a scope for the development of poultry in the district.

INDICATOR NO.10:-

Per capita consumption of Electricity:

Now the district Aurangabad gets the electric supply from the grid system, fed by Koyana Hydro electric power station and Khaperkheda thermal power station. The economic progress goes always hand in hand with the spread of electricity. For the propagation of electricity special funds have been made available through R.F.C. and A.R.F.C.. The table below shows the consumption of electricity for different purposes during the year 1973-74 and 1974-75.

TABLE NO.3.10.

(Consumption figures in '000'Kwh.)

Sr. No.	Electricity sold	During the year		Percentage increase (+) decrease (-)
		1973-74	1974-75	
1	2	3	4	5
1.	Domestic consumption	8,083	9,597	(*) 18.72
2.	Commercial lighting and small power	5,041	3,297	(-) 34.60
3.	Public lighting	30,696	35,044	(+) 14.16
4.	Industrial purposes	1,378	1,313	(-) 4.72
5.	Agriculture	23,452	35,535	(+) 51.52
6.	Other Purposes	3,904	4,174	(+) 26.92
	Total	72,554	88,959	(+) 22.61

It is evident from the above table that the consumption of electricity has increased during the year 1974-75 under the items 1, 3, 5 and 6 for the rest there is fall in the consumption as compared to that during the year 1973-74. The fall in the consumption was due to power cut and disconnections due to non-payment of energy bills. The increase in the consumption of electricity for agriculture is more significant. The per capita consumption of electricity during the year 1973-74 and 1974-75 was 25.2 Kwh. and 45.13 Kwh. respectively.

INDICATOR NO.11:-

Increase in the number of candidates enrolled in Employment Exchange and vacancies notified.

The Sub-Regional Employment Exchange office is located at Aurangabad which helps both the employees as well as the employment seekers. The number of candidates registered for employment in the exchange and the number of vacancies notified gives a picture of unemployment problem in the district. The number of registrations indicates the number of unemployed where as the vacancies notified shows the employment opportunities-created.

The following table gives comparative data on different items for the years 1973-74 and 1974-75.

TABLE NO.3.11.

Sr. No.	Particulars	Position during the year		Percentage increase (+) or decrease (-)
		1973-74	1974-75	
1	2	3	4	5
1.	Registrations	14,748	17,502	(+) 18.67
2.	Vacancies notified	2,158	1,198	(-) 44.49
3.	Placements	1,720	647	(-) 62.38
4.	Number of live-register at the end of year	19,900	27,673	(+) 39.06

The above table shows that the number of candidates seeking employment increased during the year 1974-75 but the employment opportunities decreased during the same year. This was because of the policy of the state government to ban the fresh recruitment to the government offices, to increase the efficiency of, and minimise the expenditure on state employees, the fresh recruitment was completely stopped during the year 1974-75. The number of the employers who used the exchange for their requirement was 306 during the year 1974-75.

INDICATOR NO.12.

Increase in the number of indoor and out-door patients treated.

The human life being the most valuable in the world, much importance has been given for providing medical facilities to the masses. Special campaigns had to be arranged to eradicate many of the diseases prevalent in our country and a great success has been achieved in controlling them. As a result the general health standard has improved. The death rate has fallen from 16.1 in 1965 to 12.4 in 1974 i.e. by 23 percent. The average expectancy of life which was 32 years in 1941=50 is about 52 years now.

The following table shows the percentage increase or decrease in the number of patients treated during the year 1973 and 1974.

TABLE NO.3.12.

Sr. No.	Name of Tahsil	In-door patients treated during		Percentage increase (+) decrease (-)	Out-door patients treated during		Percentage increase (+) decrease (-)
		1973	1974		1973	1974	
1	2	3	4	5	6	7	8
1.	Aurangabad.	22,617	24,741	+9.39	4,99,860	5,65,199	+13.07
2.	Khuldabad	56	51	-8.93	10,984	12,293	+11.92
3.	Kannad	253	539	+113.04	66,771	97,018	+45.90
4.	Soegaon	5	92	+1740.00	8,481	12,502	+47.41

Contd..

TABLE NO.3.12 contd..

1	2	3	4	5	6	7	8
5. Sillod		517	316	-38.88	51,176	50,403	-1.51
6. Bhokardan		311	336	+18.04	46,203	73,544	+59.18
7. Jafferabad		66	429	+550.00	17,213	16,154	- 6.15
8. Jalna		17,007	16,819	-1.11	2,06,715	2,52,316	+22.06
9. Ambad		90	179	+98.89	24,035	30,989	+28.93
10. Paithan		110	429	+290.00	15,959	33,319	+108.78
11. Gangapur		149	343	+129.53	23,289	47,842	+105.43
12. Vaijapur		133	497	+260.14	40,369	52,598	+30.29
District		41,319	44,770	+8.35	10,11,055	12,44,177	+23.06

It will be seen from the above table that the number of indoor patients treated has increased in all tahsils except, Khuldabad, Sillod and Jalna tahsils whereas the number of out-door patients treated has increased in all the tahsils except Sillod. The maximum increase in the number of out-door patients treated is in Paithan tahsil.

INDICATOR NO.13:-

Increase in the Number of students:-

Aurangabad town, the district headquarter is an important centre of Educational activities in Marathwada region. Specially with the establishment of Marathwada University in 1958, there is more increase in the number of colleges. The percentage of literacy for the district is 28.49 which is the highest in Marathwada region. The percentage of literacy for the whole of Maharashtra is 39.2 and for India the same is 29.5.

It is also seen that there is increase in the number of students at secondary and higher stages of education but most noteworthy fact is that the increase in the number of girl students is more than that in case of the male students, which clearly shows that the spread of education in girls is more rapid.

a) Pre-Primary Education :-

The most significant thing about the pre-parimary education is that the increase in number of institutions is the highest than that of other stages of education which is seen in the table below :-

TABLE NO.3.13.

Sr. No.	Particulars	During the year		Percentage increase (+) or decrease (-)
		1972-73	1973-74	
1	2	3	4	5
1.	Institutions	23	32	+ 39.13
2.	Pupils a) Boys	893	742	- 16.91
	b) Girls	726	670	- 7.71
3.	Teachers	46	34	- 26.09

It is seen in the above table that the number of institutions has increased by 39.13 percent but the number of students and the teachers had decreased during the year 1973-74 as compared to that during the year 1972-73.

b) Primary Education:

The following table shows the position of students and teachers of primary education.

TABLE NO.3.14.

Sr. No.	Particulars	Position during the		Percentage increase (+) or decrease (-)
		1972-73	1973-74	
1	2	3	4	5
1.	Institutions	2,025	2,038	(+) 0.64
2.	Pupils a) Boys	1,29,040	1,28,806	(-) 0.18
	b) Girls	55,876	50,063	(-) 10.40
3.	Teachers			
	a) Trained	4,441	4,603	(+) 3.65
	un-Trained	1,630	1,967	(+) 20.67

It is seen from the table above that there was fall in the number of students at this stage also. This fall is due to scarcity conditions prevailing in the district. However the number of institutions has increased by 0.64 percent whereas the increase in the number of untrained teachers was 20.67 percent.

c) Secondary Education:

In Aurangabad district the number of secondary institutions increased by only one number but the number of trained teachers has increased by 10.98 percent.

The following table shows the position of secondary education in Aurangabad district.

TABLE NO.3.15.

Sr. No.	Particulars	Position during		Percentage Increase (+) decrease (-)
		1972-73	1973-74	
1	2	3	4	5
1.	Institutions	219	220	(+) 0.46
2.	Pupils a) Boys	61,034	62,047	(+) 1.66
	b) Girls	18,024	19,273	(+) 6.93
3.	Teachers			
	a) Trained	2,176	2,415	(+)10.98
	b) Un-trained	1,177	1,166	(-) 0.85

The figures in the above table show that the ^{increase in} number of students specially the girl students was significant in secondary schools. The number of untrained teachers has decreased by 0.85 percent. This decrease is due to the fact that more teachers have been trained who are already in service.

d) Higher Education:

Due to the policy of not giving the permission to open new colleges, adopted by the Marathwada University, the number of institutions during the year 1972-73 and 1973-74 has remained the same, however the increase in the number of students is significant, which is seen in the table below.

TABLE NO.3.16.

Sr. No.	Particulars	During the year		Percentage increase (+) or decrease (-)
		1972-73	1973-74	
1	2	3	4	5
1.	Institutions	29	29	0.00
2.	Pupils a) Boys	19,026	20,700	(+) 8.80
	b) Girls	1,841	2,117	(+)14.99
3.	Teachers	899	924	(+) 2.78

In the higher education also the increase in the number of girl students is more than that in male students which is the highest of all the stages. The number of teachers has increased by 2.78 percent.

INDICATOR NO.14. :-

Increase in road length:

Both socially and economically, the transport facilities make a valuable contribution for the development of particular area. In recent times the road-transport is getting more & more importance due to its quickness and safety. National highways are of national importance as main truck roads. They connect major cities capitals of states, major ports and other highways. But no National Highway passes through Aurangabad district. In this district State Highways serve as main routes of traffic to and from major towns.

The following table shows the length of the roads according to types of surface as on 31st March, 1974 and 31st March, 1975.

TABLE No.3.17

Sr. No.	Type of Road	Length in Kilometres as on		Percentage increase (+) or decrease (-)
		31st March 1974	31st March 1975	
1	2	3	4	5
1.	Cement Concrete	15.67	15.67	0.00

Contd..

TABLE NO.3.17 Contd.. -((34))-

1.	2	3	4	5
2.	Black topped	811.79	818.14	+ 0.78
3.	Water bound macadam	964.36	1,126.41	+16.80
4.	Granular material	2,669.81	3,414.66	+28.65
5.	Lower Types	265.55	51.77	-80.50
6.	Total	4,727.00	5,246.65	+14.80

In the above table, the total length of the roads in the district has increased by 14.80 percent. Considering the surface classification it is seen that there is increase in all the categories except the lower types of the roads. This decrease is due to the upgradation of that particular type of roads.

The length of roads as per the classification of the category is given in the table below for the years 1973-74 and 1974-75.

TABLE NO.3.18.

Sr. No.	Classification	Road length as on		Percentage increase (+) or decrease (-)
		31st March 1974	31st March 1975	
1.	2	3	4	5
1.	National Highways	--	--	--
2.	State Highways	991.76	1,013.50	+ 2.19
3.	Major District Roads	781.04	838.12	+ 7.31
4.	Other District Roads	1,215.36	1,380.84	+ 13.62
5.	Village Roads	1,739.02	2,194.19	+26.17
6.	Others	--	--	--

In the table above it will be seen that even as the category wise classification is considered, there is increase in road length of each category. The increase in the village roads is maximum. The road length per 100 square Kms. in the district rose from 6.13 Kms. in 1961-62 to 7.30 Kms. in 1965-66 to 29.18 in 1973-74 and to 33.49 in 1974-75.

INDICATOR NO.15 :-

Increase in Banking facilities:

The banking facilities play an important role in industrial and commercial development of the district. Since the nationalisation of banks, these institutions are helping enterpreneur class greatly, as well as they are providing capital-facilities to the small scale industries, petty traders and educated un-employeds to start their own establishments.

Over the period from 1960-61 to 1974-75, there was a considerable increase in the availability of banking facilities. This reflects the growth of trade and industry in the district. The following table gives the banking statistics for the year 1960-61 and 1974-75.

TABLE NO.3.19.

Sr. No.	Particulars	As on		Percentage increase (+) or decrease (-)
		31-3-1961	31-3-1975.	
1	2	3	4	5
1.	Number of towns and villages having bank offices.	N.A.	64	N.A.
2.	Population covered	N.A.	5,15,821	N.A.
3.	Scheduled Banks	8	56	+600.00
4.	Co-operative Banks	14	74	+428.57
5.	Total No. of Banking Offices	22	130	+490.91
6.	Banking Offices per lakhs of population of the district.	1.44	6.60	+358.33

From the above table it will be seen that there is an increase of 600 percent in the number of scheduled banks, whereas the number of co-operative bank offices has increased by 428.57 percent. As new industries are coming up in the vicinity of Aurangabad town, the growth in the banking facilities is manifold.

INDICATOR NO.16:-

Price:

The Directorate of Economics and Statistics, Maharashtra State collects weekly retail prices through the district offices at the district headquarters for selected commodities from selected shops from 1963. This helps to have a broad estimate of the trends in the price movement in the market over a long range of period. The table below shows the price indices for the year 1963 and 1974.

TABLE NO.3.20.

Sr. No.	Commodity	Unit	Prices for the year 1963	Prices for the year 1974	Price Index for the year 1974
1	2	3	4	5	6

TABLE NO.3.20 Contd.:

1	2	3	4	5	6
23.	Salt	Kg.	0.11	0.25	227
24.	Turmeric	Kg.	1.82	5.08	279
25.	Dry chillies	Kg.	3.08	7.86	255
26.	Potsto	Kg.	0.50	1.36	272
27.	Onion	Kg.	0.32	0.60	188
28.	Plantains	Dozen	0.49	1.53	312
29.	Tea leaf	Kg.	6.80	12.59	185
30.	Coffee	Kg.	6.73	16.01	238
31.	Kerosene Oil	Litre	0.40	0.99	248
32.	Charcoal	Kg.	0.25	0.56	224
33.	Match Box	Dozen	0.91	1.44	158
34.	Dhoti	Pair	10.00	13.64	136
35.	Sari	Single	16.00	27.65	173
36.	Shirting	Metre	2.10	6.26	298
37.	Coating	Metre	3.48	7.08	203
38.	Blouse piece	Metre	1.14	3.39	297
39.	Washing soap	Bar	1.50	1.52	101
40.	Pan	100 Nos.	0.38	1.01	266
41.	Supari	Kg.	7.75	9.05	117

It will be seen in the table above that the prices of all the commodities had increased over the period of 1963 to 1974. This increase is maximum in case of Vanaspati and Kerosene (146 percent) and is minimum in case of Washing Soap (66 percent).

CHAPTER-IV
P L A N N I N G :

This chapter gives broad outline of the different activities under various plan schemes carried out through the district implementing officers of the State Government and the Local sector viz. the Zilla Parishad for the economic development of the district.

The year 1974-75 is an important land mark in the efforts of the State for the economic development. The year 1973-74 marked the end of the fourth Five Year Plan and with the opening of the year 1974-75, the national approach to the Economic Development Plan was changed. Uptill now the authorities at the state level used to prepare the plan collectively for the state and the grants were allotted to each district in a stereo-type manner without consideration to the local resources, Geographical conditions and the aspirations of the people. At the same time there was no proper co-ordination between different organisations concerned with the development of the district.

Realising these defects of the planning, the planning commission emphasised the importance of the District Planning for ensuring the rational utilisation of resources, reduction of intra state imbalances as well as proper co-ordination and implementation of development programme.

In the theory of development planning there are two schools of thought. Some Economists believed in the centralised planning where as some economists pleaded for the planning from the bottom. According to them the smallest unit should be taken for the planning and the plan for the country should be the sum total of the plans of all these units. Our state adopted the second phenomenon of the planning from the year 1974-75, under the name District Planning.

Accordingly District Planning and Development Councils were constituted for each district, which comprised of some official members alongwith non-officials. This council works as an agency at the district level to bring about co-ordination between all such agencies in the task of formulation and implementation of the five year plans for the district.

As per the directions from the Government, first the 5th Five Year Plan of the district was formulated within the financial ceiling of Rs. 51.51 crores which was almost double of the 4th Five Year Plan, and then the annual plan for the year 1974-75 was finalised in consultation with all the departmental heads of the district. For these plans the pattern of the schemes adopted was that of the previous plans only.

The major objectives set out in the National approach to the Fifth Five Year Plan document are removal of poverty and self reliance. The main elements of the Fifth plan strategy for the realisation of these objectives are 1) 5.5 percent over all rate of growth of gross domestic product 2) Expansion of productive employment opportunities 3) A national programme for minimum needs covering elementary education, drinking water, medical care in rural areas, Nutrition, house sites for the land less labour, rural roads, rural electrification and slum improvement and clearance. 4) Extended programmes of Social Welfare 5) Emphasis on agriculture, Key and basic industries producing goods for mass consumption 6) an adequate public procurement and distribution system for assured supply of essential consumption goods at least to poorer sections at reasonably stable prices 7) Vigorous export promotions and import substitution 8) rigorous restraint on essential consumption goods 9) an equitable prices wages-incomes balance and 10) institutional, fiscal and other measures for reduction of Social Economic and regional inequalities.

The State Government on its part has decided upon its policies and programmes to be adopted in the Fifth Five Year Plan within the broad frame work of the national approach to the fifth five year plan.

The total outlay proposed for Aurangabad District under both state and local sector for the year 1973-74 and 1974-75 amounted to Rs. 496.98 lakhs and Rs. 561.93 lakhs. The actual expenditure during these two years was Rs. 483.30 lakhs and Rs. 778.23 lakhs. The percentage of the total expenditure to the total budget provision comes to 97.25 and 138.49.

The major headwise expenditure during the annual plan 1973-74 and 1974-75 in Aurangabad district is given to the table below :-

TABLE NO.4.1. (Rs.in lakhs)

Head of Development	Expenditure during		Percentage to total Expenditure during	
	1973-74	1974-75	1973-74	1974-75
1	2	3	4	5
1. Agricultural Programme	131.98	231.41	27.31	29.74
2. Co-operation and Community Development	25.52	102.38	5.28	13.16
3. Irrigation & Power	--	34.11	--	4.38
4. Industry & Mining	0.36	70.36	0.07	9.04
5. Transport and Communication	20.18	14.44	4.18	1.86
6. Social Services	304.91	325.40	63.09	41.81
7. Miscellaneous	0.35	0.13	0.07	0.01
Total	483.30	778.23	100.00	100.00

It will be seen in the table above that during both the years major share of the total expenditure was that of social Services. Rupees 304.91 and Rs.325.40 lakhs were spent during the year 1973-74 and 1974-75 on different activities under social services such as General Education, Technical Education, Welfare of backward classes etc.

Second major head of development, considering the expenditure, was the Agricultural programme for which Rs. 131.93 and 231.41 were expended during the year 1973-74 and 1974-75 respectively. The percentage share of social services and agricultural programme during the year 1973-74 was 63.09 and 27.31 and that during the year 1974-75 was 41.31 and 29.74 respectively. The major heads of development and the expenditure on them are discussed in the following paragraphs in detail.

1. Agricultural Programme:

Agriculture is a ^{mainstay} of Maharashtra's economy, as much as 72 percent of its population is dependant on agriculture for its livelihood. Apart from satisfying the basic need of food to the growing population, it also creates bulk of wage goods to the non-agricultural sector and industry in the state. Programmes of agricultural development aimed at improving the productivity of land by various measures such as 1) adoption and development of land reclamation and soil conservation measures 2) Development of irrigation works and medium projects where-ever feasible 3) Distribution of essential supplies like fertilisers, improved seeds, pesticides, cement, agricultural machinery and implements 4) Provision of remunerative prices for agricultural produce, adequate marketing facilities and subsidies and 6) Provision of credit for agricultural activity mainly through the co-operative structure.

The schemes included under this programme were agricultural production, Soil Conservation, Minor irrigation; propagation of improved implements, development of crop etc. The table below shows the total expenditure on various schemes under agricultural programme during the years 1973-74 and 1974.75.

TABLE NO.4.2.

(Rs. in Lakhs)

Sr. No.	Sub-Head	Expenditure during		Percentage to total expenditure during	
		1973-74	1974-75	1973-74	1974-75
1	2	3	4	5	6
1.	Agricultural production	8.46	3.22	6.41	1.39
2.	Minor Irrigation	54.32	73.35	41.16	31.70
3.	Soil Conservation	32.52	32.88	24.64	14.21
4.	Ayacut Development	33.38	117.95	25.29	50.97
5.	Animal Husbandry	0.30	--	0.23	--
6.	Dairy Development	0.42	0.22	0.32	0.09
7.	Forests	1.30	1.88	0.98	0.81
8.	Fisheries	1.16	1.47	0.88	0.64
9.	Warehousing and marketing	0.12	0.44	0.09	0.19
Total:		131.98	231.41	100.00	100.00

It is evident in the above table that during the year 1973-74 major part of the amount for the agricultural programme was spent on minor irrigation (Rs. 54.32 lakhs) followed by Ayacut Development (Rs.33.38 Lakhs), Soil Conservation (Rs.32.52 Lakhs) and Agricultural Production (Rs.8.46 L-akhs). During the year 1974-75 this order was changed and major share of Rs. 117.95 lakhs was spent on Ayacut Development followed by minor irrigation (Rs.73.35 lakhs) Soil Conservation (Rs.32.88 lakhs) and Agricultural production (Rs.3.22 Lakhs).

The different schemes included under sub-head of the agricultural programme are discussed in short below.

i) Agricultural Production:

Compared to the year 1972-73, the year 1973-74 was better so far as the agricultural production is concerned and the year 1974-75 was still better.

During the year 1974-75 a new method of seed treatment, known as carbofur-on treatment was introduced during the Rabi Season. During this year 80 quintals of carbofur-on treated seed was distributed to the cultivators on 100% subsidy basis, covering an area of about 960 hectares at the cost of Rs. 0.7 lakhs. The usual methods of seed treatment and the crop protection also were adopted alongwith the distribution of chemical fertilisers. A sum of Rs. 0.7 lakhs were spent for giving subsidy for development of local manurial resources.

The actual achievement made during the year 1974-75 is given in the table below :-

TABLE NO.4.3.

Sr. No.	I t e m	Unit	Achievement during the year 1974-75
1	2	3	4
1.	Distribution of improved Seeds.		
	a) Wheat	Quintals	1,114
	b) Jowar	Quintals	1,688
	c) Bajra	Quintals	299
2.	Distribution of chemical fertilisers	Tons	9,086
3.	New compost pits dug	No.	2,223
4.	Area under green mangre	Hectares	795

ii) Soil Conservation:

Soil and water conservation measures are of vital importance. In this district the soil conservation programme consists of nala bunding, nala ploughing and nala training in the areas which are already covered by contour bunding and afforestation for soil conservation. During the year 1974-75 Rs. 32.27^{lakhs} were spent on Nala bunding, Nala ploughing and nala training. Incomplete works of bunding were completed over the area of 61,735 hectares. Also Rs. 0.61^{lakhs} out of the provision Rs. 0.72 lakhs were spent on afforestation for soil conservation.

iii) Minor Irrigation:

Minor Irrigation schemes have been accorded high priority and play an important role in the development of irrigation, since the development of new technology in farming which depends on water input has preceeded the development of major irrigation. Under this programme construction of 10 irrigation and percolation tanks with irrigation potential of 799 hectares were completed in the local sector and 3 minor irrigation tanks with irrigation potential of 604 hectares, were completed by the state sector.

iv) Ayacut Developmmt:-

During the year 1973-74 and 1974-75 Rs. 33.38 and Rs. 117.95 lakhs were spent respectively on the scheme of Ayacut Development. During the year 1974-75 the actual expenditure exceeded the budget provision which was only 8.356 lakhs. The area covered was 5071 and 16,015 hectares respectively during the year 1973-74 and 1974-75.

v) Dairy Development:

Dairy Development is also one more income oriented programme for the marginal farmers and the landless labours. During the years under review efforts were made to collect more milk through the co-operative diary societies. During the year 1974-75, it was proposed to spend Rs. 0.13 lakhs on organisation of co-operative diary societies and their federation but the actual expenditure exceeded the budget provision and the same was Rs. 0.22 lakhs.

vi) Forests:-

Forestry occupies an important place in programmes for agricultural development and industry. Apart from its role in protecting the land against erosion and floods and stabilising agriculture by maintaining soil fertility, forests have valuable productive functions as well. The objectives of the plan for forest development are 1) to increase the forest resources by plantation of valuable trees, economic plantation, increase in land as postulated in National Forest policy.

2) to promote forest based industries in hinter lands and thus to provide employment to weaker sections of society.
3) To aid agriculture by soil and moisture conservation by afforesting denuded slopes and preserving soil fertility.
4) To open hitherto inaccessible forest areas for quicker exploitation and development of forest resources by road construction and improvement of existing roads and 5) to make improvements in the methods of forest exploitation and preservation. To achieve the above objectives the forest policy has been reoriented so as to emphasis the development of forest resources in preference to mere conservation and the programmes provide a high priority to economic plantation of quick growing species, farm forestry, mechanisation of forestry operations and forest research.

During the year 1974-75 Rs.2.68 lakhs were provided for different schemes out of which Rs. 1.88 lakhs were spent actually on development of Minor Forest produce (0.22 lakhs) extension forestry (Rs.0.8 lakhs) and development of fodder resources (Rs.0.20 Lakhs).

vii) Fisheries:-

The objectives of the development programme of the fisheries are i) to increase fish production for securing rich and nutritious subsidiary food and improving nutritional standards of masses and 2) to improve the socio economic conditions of fishermen. As this district is off the sea-shore the activities of the fishing development are limited to impounded water only. At present the fish seed is imported every year from Calcutta. The fishing development department has been successful in developing seed in local conditions and an ambitious programme has been chalked out for the self sufficiency in seed production. During the year 1974-75 Rs.0.12 lakhs, out of the total provision of 0.62 lakhs were spent on Fish seed production project. Rupees 1.09 lakhs were spent on fish farming in impounded waters. As a part of welfare of fisherman programme Rs.0.16/lakhs were spent on the development of fishermen co-operative societies.

Individual assistance also was given to fishermen for fisheries requisites and fish export. The total expenditure on this sub-head was Rs. 1.47 lakhs during the year 1974-75.

2. Co-operation and Community Development:

Agriculture constitutes the predominant sector of the country's economy and co-operation has been seeking to serve the needs of agriculture. The earlier Five Year Plans set a fast tempo of development for the transformation of a traditional society in a modern and dynamic one. Co-operation was accorded an important place for the achievement of social objectives of democratic planning with accent on assistance to the weaker sections of the community. The movement has since, branched out in diverse fields of activity such as agriculture and agricultural processing, minor irrigation, supply of agricultural inputs storage, marketing, manufacturing industry, housing, consumers stores etc. Maharashtra very proudly leads the country in the field of co-operation. The Maharashtra Government has always adopted a liberal policy with regard to co-operative movement by rendering assistance in various forms for fostering establishment of co-operative institutions.

During the year 1974-75 in all Rs. 99.38 lakhs were spent on different schemes under co-operation, Major part of this expenditure (Rs.99.09 lakhs) was spent on share capital contribution to three co-operative sugar factories in the district.

The Community Development Programme was introduced in 1952 with the object of fostering integrated development of the rural community by involving the people in the local sector schemes. The programme provided funds to be further augmented by public contribution in cash and for supplementing productive activities such as health centres, rural roads, school buildings etc. which benefit the community as a whole. Community development blocks now cover the entire rural area of the district.

During the year 1974-75 Rs.3.00 lakhs were spent out of the budget provision of Rs. 3.67 lakhs. Community development projects had a predominant place in the programme and Rs. 3.00 lakhs were spent on them. All the schemes under community development programme were implemented through 12 Panchayat Samities in the district.

3) Irrigation and Power :-

During the year 1974-75, Irrigation and Power schemes had a provision of Rs. 62.98 lakhs but actually only Rs. 34.11 lakhs were spent. Rupees 4.27 and 3.13 lakhs were spent on continuing medium irrigation projects of Lahuki and Ambadi and rupees 0.50 lakhs were spent on extension and improvement of existing projects. For rural electrification Rs. 46.00 lakhs were provided but only 11.04 lakhs were spent whereas the expenditure on normal development schemes was Rs. 15.16 though the budget provision was only Rs.8.50 lakhs.

4. Industry and Mining:

Though the state of Maharashtra occupies a prominent position in the industrial activity of the country as can be seen from its share of the productive capital (17%) Gross value of out-put (24%) and total value added (28%) by the manufacture in the factory sector of the country. Aurangabad district is one of the 13 districts in the state which have been identified as industrially backward. However with the setting up of an industrial area by the Maharashtra Industrial development corporation, an endeavour is made to attract the industrialists to open the industries in the district. For this Rs. 22.83 lakhs were spent on package scheme incentives to large industries coming to Aurangabad. Rupees 0.61 lakhs were spent on financial assistance to small scale industries. Industrial co-operatives were given an assistance worth rupees 0.51 lakhs whereas block level village artisans multipurpose co-operative societies were given the assistance of Rs. 0.47 lakhs. Thus the total expenditure on this sub-head was Rs. 24.86 lakhs out of the provision of Rs. 44.21 lakhs.

5. Transport and Communication:

As sustained economic growth and generation of growth potential in the under developed areas depends in the infrastructure of roads and communications, Government had decided to step up the over all outlay for roads in the fourth plan, out of which 33% was to be spent on rural roads. Out of the remaining, more than half was to be spent on opening up the hilly and inaccessible areas. The importance of development of transport system in developing country can hardly be over-emphasised. Transport system constitute arteries of a nation for growth of agriculture, industries and defence.

In Aurangabad district Rs. 14.26^{lakhs} were spent on road Development during the year 1974-75. Rupees 3.16^{lakhs} were spent on T.& C. 12 roads and Rs. 1.74 lakhs on ordinary roads in hilly areas. Rupees 7.07 lakhs were spent on district roads. Rupees 0.18 lakhs were spent on Tourism.

6) Social Services:-

Social Services include different heads of development and consume major part of budget provision. The table below shows the different schemes included under social services alongwith the actual expenditure booked and its percentage.

TABLE NO.4.4.

Sr. No.	Sub-head of development	Expenditure during		Percentage to total expenditure	
		1973-74	1974-75	1973-74	1974-75
1	2	3	4	5	6
1.	General Education	114.02	28.95	37.40	8.89
2.	Technical Education	0.37	0.09	0.12	0.03
3.	Public Health	1.33	4.56	0.44	1.40
4.	Water supply and drainage.	178.32	242.06	58.48	74.39
5.	Nutrition Programme	--	0.67	--	0.21
6.	Housing	0.06	25.84	0.01	7.94
7.	Urban Development	6.17	1.25	2.02	0.38
8.	Welfare of backward classes	2.59	19.11	0.85	5.87
9.	Social Welfare	1.34	0.20	0.45	0.07
10.	Labour & labour welfare	0.71	2.67	0.23	0.82
	Total	304.91	325.40	100.00	100.00

General Education:

Adequate schooling facilities is an essential requirement for free and universal education. During the year 1974-75 Rs. 29.95 lakhs were spent on General Education in Aurangabad district. For construction of primary school buildings Rs. 1.04 lakhs were spent and rupees 0.14 lakhs were spent for supplying equipments to pre-primary schools. Under secondary education Rs. 2.43^{lakhs} were spent for opening of additional standards in ex-Govt. secondary schools.

Having regard to the importance to improvement of quality and status of education, training programmes for teachers have been accorded high priority in the development plans. Rupees 0.59 lakhs were spent for inservice training of primary teachers and Rs. 0.40 lakhs were spent for correspondence course for primary teachers. Government college of Education at Aurangabad was given Rs. 1.78 lakhs for its improvement in respect of the building. For the educational concessions to E.B.C. pupils Rs. 13.63 lakhs were spent and about 28,000 students were benefitted.

Technical Education:

Under the sub-head of Technical education Rs. 0.70 lakhs were spent for reorientation of diploma courses with sandwich pattern. The expenditure on this sub-head during 1973-74 was 0.37 lakhs.

Health:-

To increase the life expectancy as well as to control the growth of population, is the prime objective of the health and family planning programme. The health programme leads to better health and comfort, a greater life span, better medical care and gain to economy through decrease in lost working time. During the year 1974-75 Rs. 2.60 lakhs was spent on the scheme of primary health centres/sub-centres and rural hospitals etc. for the construction. Under the scheme construction of operation theatres, rural hospital Sillod & Paithan was undertaken. The construction of primary health centres at Adul and Dhawda was completed. Also construction of 40 sub-centre was undertaken.

Rupees 1.31 lakhs were spent on increasing medical grants for public health centres and sub-centres. Thus the total expenditure on health during the year 1974-75 was 4.56% ^{lakhs.} The same during the year 1973-74 was 1.33 lakhs.

Water Supply:-

To supply pure and hygienic drinking water, water supply schemes have been undertaken in the district and were in progress during the year under review. The most important scheme was that of Augmentation to Aurangabad water supply scheme from Jayakwadi project source. Considering the increased population and growing industries in vicinity of Aurangabad town, the present water supply was too inadequate. For this an ambitious programme of bringing water from Paithan (Jayakwadi project) at a distance of 50 Kms. from Aurangabad, was undertaken. For this Rs. 204.11 lakhs were spent during the year 1974-75. The total expenditure on water supply schemes during the year 1973-74 and 1974-75 was rupees 178.32 and 292.06 lakhs, respectively.

Housing:

A number of plan schemes were implemented during the year to provide housing to weaker section of the society. Under the programme Rs. 1.65 lakhs were spent on economically weaker section housing, during the year 1974-75 and construction of 234 tenements was in progress. During the same year Rs. 22.54 lakhs were spent on slum improvement by providing bare amenities to Zopad-Patties. For the extension of gaothans Rs. 0.15 lakhs were spent whereas for providing house sites to landless labours Rs. 1.50 lakhs were spent. The total expenditure on housing during the year 1973-74 and 1974-75 was Rs. 0.06 and 25.84 lakhs, respectively.

Urban Development:-

The total expenditure under urban development during the year 1974-75 was Rs. 1.25 lakhs. The same during the year 1973-74 was 6.17 lakhs. Only one Municipal council i.e. Aurangabad was given financial assistance for its development plan.

Welfare of backward classes:-

The development programme for the welfare of backward classes constitutes educational and economical uplift alongwith health, housing and other schemes for backward classes. During the year 1974-75 Rs. 15.60 lakhs were spent on awarding post S.S.C. scholarships to N.Ts./V.Js./S.Ts. students numbering about 2,550. Under the economic uplift Rs. 0.89 lakhs were spent on the construction of 84 irrigation wells and Rs.0.61 lakhs were spent on giving loans cum subsidy to B.C. for cottage industries and professions. For the housing programme of the backward classes Rs. 0.51 lakhs were spent on giving financial assistance to individual and group housing Backward classes. Total expenditure on welfare of backward classes was rupees 2.59 and 19.11 lakhs during the year 1973-74 and 1974-75.

Social Welfare:

The objective of the social welfare programme is to provide care, protection and relief to persons who suffer from social and physical handicaps. The problem of social welfare is felt more acutely in big cities like Bombay, Poona etc. as many social ill effects are seen there due to industrial and urban development of those cities. The expenditure on this sub-head during the year 1974-75 was only Rs. 0.20 lakhs and the same was on multi-purpose community centres.

Labour and labour welfare:-

The development programme under this head aims at the improvement of the quality of labour by providing training facilities. During the year 1974-75 the expenditure on the schemes was Rs. 2.67 lakhs, the same for the year 1973-74 was Rs. 0.71 lakhs.

PART II

DISTRICT STATISTICAL

ABSTRACT.

1974-75.

C o n t e n t s .

Statistical Abstract for the year 1974-75.

Sr.No. of Table	S u b j e c t (2)	Page No. (3)
<u>I- Area and Population :</u>		
1.	Talukewise area and Population in 1971 Census.	1-2
2.	Decadal Variation in Population since 1951.	3-6
3.	Talukewise classification of villages according to population ranges in 1971 census.	7
4.	Talukewise classification of Towns according to population ranges in 1971 Census	8
5.	Number of workers and non-workers in each taluka, according to 1971 census.	9-10
6.	Distribution of Population according to (A) Age group (B) Religion.	11
7.	Scheduled castes and Scheduled tribes, according to 1971 census.	12-13
<u>II- Climate :</u>		
8.	No. of Rainy days and total rainfall at selected centres.	14-18
9.	Maximum and minimum temperature at selected centres.	19
<u>III. Agriculture.</u>		
10.	Land Utilisation	20-23

35.	No. of towns and villages electrified and population covered.	75
	<u>VI - Co-operation:</u>	
36.	Number of different types of co-operative societies.	76
37.	Statistics relating to Co-operative Banks	77
38.	Primary Agricultural Credit Societies	78-79
39.	Other Co-operative Societies of different types.	80-81

1	2	3
40.	Operation of Central and Primary Co-operative Marketing Societies.	82-83
41.	Operation of other cooperative societies of different types.	84
42.	Operation of regulated marketing	85-93
43.	Number of Registered Money Lenders and loans advanced by them.	94
	<u>VII. Medical and Public Health:</u>	
44.	Medical facilities available through public and public aided bodies in each Taluka.	95-96
45.	No. of births and deaths registered	97
46.	No. of deaths due to important causes	98
47.	Vaccination Statistics and Cholera Inoculation.	99
48.	Number of Family Planning Centres operating in District.	100
	<u>VIII - Education :</u>	
49.	Literacy in each Taluka according to 1971 Census.	101-102
50.	Education in Rural areas in each Taluka according to 1961 Census.	103
51.	Education in Urban areas of the District according to 1961 Census.	104-105
52.	No. of Institutions, Pupils & Teachers	106
53.	No. of backward class Beneficiaries	107
54.	Economically Backward Class Concessions of free education.	108
55.	Expenditure on Primary Education by way of grants-in-aids to local bodies.	109-110
	<u>IX. Transport and Communication :</u>	
56-A	Length of Railway Route	111
57.	Road length according to category and surface classification.	112
58.	Motor vehicles in Operation.	113
59.	Operational Statistics of Nationalised Roads, Transport.	114

1	2	3
60.	Traffic Census on important roads	115-117
61.	Information of Postal, Telegraph and Telephone Statistics.	118
62.	Rural Broadcasting Statistics	119
	<u>X - Local Bodies.</u>	
63.	Income and Expenditure of local Bodies	120
64.	Income and Expenditure on Village Panchayats	121-122
65-A	Headwise Receipts of the Zilla Parishad	123
65-B	Government Grants to Zilla Parishad	124
65-C	Headwise Receipts of the Z	
65-C	Headwise expenditure of Zilla Parishad	125
66.	Income and Expenditure of Municipal Councils, Corporations etc.	126-127
	<u>XI-Plan and Community Development:</u>	
67.	Plan expenditure under different development head/sub-heads.	128-130
68.	Physical Achievements under Plan	131-135
69.	Statement showing C.D. Programme	136
70.	Expenditure incurred in different stages of Blocks.	137
71.	Physical Achievements on selected items in all Blocks.	138-141
	<u>XII- Prices:</u>	
72.	Wholesale prices of certain Agri.commodities at selected centres.	142-158
73.	Average retail prices of Important commodities at District Headquarters.	159-162
74.	Consumer Price Index Numbers (Revised Series) for working Class.	163
	<u>XIII-Miscellaneous.</u>	
75.	Strength of Police Force Statistics	164
76.	Crime Statistics	165-166
77.	Work disposed in Civil & Criminal Courts	167
78.	Cinema Statistics	168
79.	No. of Banking Offices	169
80.	Joint Stock Companies	170
81.	No. of Insurance Policies issued and amount insured	171.
82.	Collection of Small Savings	172.
83.	Land Revenue Collection in each Taluka	173
84.	No. of Presses, Newspapers & periodicals published	174
85.	Trends in Selected Indicators	175-181.

NOTE:-1) The designation of stockmen has been changed as Livestock Supervisors (2) The figures of animals treated of one Aid Centre of Mondha working under Polyclinic, Aurangabad are included in the figures of Polyclinic. (3) In general 11 posts of L.S.S. of Veterinary Aid Centres and attached posts of Dispensary under D.A.H.O. are vacant. One post of Doctor is also vacant. (4) The preventive vaccination against the various diseases has been under taken and 20,243 animals vaccinated through the Veterinary Poly-Clinic, Aurangabad hence the diseases are in control due to which the figure of animals treated through Veterinary Poly Clinic, Aurangabad during 1974-75 is considerably decreased as compared to that last year. The No. of animals treated through the all dispensaries in the district except Sillod has also decreased due to above said reason.
