B U L D A N A D I S T R I C TA Socio-Economics ReviewCHAPTER-IINTRODUCTION1.1. Location

Buldana district has been named after Buldana Town, which was selected as the district headquarters in the year 1367. In 1905, subsequent to the amalgamation of Berar with the Central provinces, the size of the district was increased by the addition, from Akola district, of talukas, Khangaon & Jalgaon.

The district stretches out into the Deccan Plateau and lies between 19.51, 21.17' North and 76.49, 75.57' East. Situated at the West end of Vidarbha Region of the Maharashtra State, the district is bounded on North by the Nimar district of Madhya Pradesh, on the West by Jalgaon district of East Khandesh, on the South and South-West by Parbhani and Aurangabad districts of Marathwada and on the East by Akola district. It covers an area of 3366 square miles (i.e. 9754 square kilometres).

History

The history of Buldana district is obscure and devoid of interest until the arrival of the Mohamedans in the Deccan 1294. The greater part of Southern India was included in the empire of the Mauryas and on its disreption, the north-western tracts of the Deccan, including this district fell into the possess of conquerors the Sakas, the Pahlivas, Yavanas, Andhras & Yadavas and local dynasty the Vakatakas.

The fifth king of this dynasty Mahadeva Ugrasarva-bhanma who reigned from 1260 to 1271, had a Brahmin minister named Hemadry, whose name is of local importance from the reason that the Hindu temples in the Chalukyan style of which Berar can show examples, the finest of which is at Lonar in this district, are attributed to him, and are known as the Hemadpanthi temples.

With the arrival of Alauddin Khiliji in 1294, the Mohamedans first appeared in the Deccan. In 1312, Malik Kafur marched through the district to Devgiri and having defeated and slain Shankar, Devgiri prince, annexed his dominions. Rohankhed has been the site of two battles. One fought in 1437 between Kaalaf Hasan Basri, commanding the army of Alauddin Shah Bahamani II and Nisirkhan Faruki Sultan of Khandesh, and the other in 1590 between Burhan Nizam Shah and Jamalkhan Madevi who supported the claims of Ismail to the throne of Ahmednager against those of his father Burhan. Burhan was victorious and Jamalkhan was slain.

In 1724, Sakharkherda was the scene of the battle to which it owes its present name of Fatekherda, Mubariz Khan appointed Governor of Deccan and instigated by a party in the Moghal Court at Delhi attacked Asaf Jah- the first Nizam. Asaf Jah gained complete victory and Mubariz Khan and Asad Khan and Masud Khan, two sons of Mubariz Khan were slain. This battle established the virtual independence of the Nizam in the Deccan.

In 1758, Balaji Rao attacked Sindkhed (Birth-place of Jijabai-Mother of Shri Chhatrapati Shivaji) to the rescue of which Nizam Ali hastened. He was compelled to fight his way from Augrangabad to Sindkhed, but succeeded in relieving the place. Daulat Rao Sindia and Raghuji Bhonshe were encamped at Malkapur, when in August 1803, they allowed the British envoy to depart and received General Wellesley's declaration of war.

A month or two later General Wellesley traversed the district while pursuing them from Assaye to Argaon.

1.2. Boundaries

In 1853, Berar (Vidarbha) and other districts of the Nizam Dominions were assigned to the East India Company in liquidation of the large debt due on account of arrears of pay of the Hyderabad Contingent and as security for the future payment of that force. At the assignment Berar (Balaghat) with headquarters at Hingoli and North Berar with head quarters at Buldana.

After the war of Independence in 1957, the province was reconstituted into East Berar with head quarters at Amravati and West Berar with headquarters at Akola, the present Buldana district being included in the latter.

Till 1st November, 1956 Buldana was one of the Districts of the then Madhya Pradesh State, Consequent on the reorganisation of States, it formed part of the Bilingual Bombay State till 1st May 1960, when it became a part of the unilingual Maharashtra State. But these changes involved no changes in the geographical boundaries of district

1.3 Administrative Set up

The district is comprised of 5 sub-divisions or talukas viz,, Chikhali, Mehkar, Malkapur, Jalgaon (Jamod) and Khangaon. The Collector as the head, is incharge of General Administration, law and order, treasury, land revenue and civil supplies. He is also entrusted with the responsibility as District Magistrate and District Registrar. He is assisted by a Resident Deputy Collector in his office and by other Deputy Collectors who look after different branches. One of the senior most Deputy Collectors is appointed as a Resident Deputy Collector. A sub divisional officer has been put incharge of the administrative work. The taluka has further been divided in the revenue circles. each being put under the charge of the Revenue-Inspector, assisted by a number of Patwaris, whose number for each circle is determined by the size and the volume of work.

As is customary, there are many other offices of the Government at the district headquarters for facilitating the smooth and coordinated working of the Government machinery.

Zilla Parishad & Panchayat Samitis-

Under the Maharashtra Zilla Parishads and Panchayat Samitis Act. 1961, a three-tier structure was established embodying the Zilla Parishad at the apex, the village panchayat at the base and the panchayat Samiti at the intermediate level.

The Zilla Parishad and Village Panchayat are both local bodies directly elected by universal suffrage at the district and village levels. The Panchayat Samiti, however, is a body at the Block level constituted by indirect elections. Each of these bodies has been given a clearly defined sphere of activities and has been transferred the major part of the funds and executive staff required for implementing its responsibilities.

Formation of the Zilla Parishad and Panchayat Samitis has been a landmark in the history of the local self Government in India and revolutionised the existing administrative set up at the district and block level.

The imperative need for development of local leadership so as to strengthen democracy at the grassroots as also the important role of local leadership in mobilising resources for and public interest in planned development necessitated the creation of Zilla Parishads. The anticipated catalytic role of community development funds in mobilising rural savings for the provision of civic amenities in rural areas has fallen short of expectations to emerge to the extent necessary. To develop this local leadership, it was necessary to give it a positive and effective part to play in local self-Government. By defining the limits of powers of local democratic bodies and giving them the requisite staff to execute their decisions, it was hoped that local leadership would play a positive role in development without giving rise to any mis-use of power.

The result of these considerations has been the establishment of the Zilla Parishad Organisation with vast powers of administrative sanction in relation to development schemes of local interest. The existing Government administration which would have been responsible for executing the schemes, ^{which} has been placed under the Zilla Parishad.

(Continued on next page)

(5)

However, while the Zilla Parishad and its subordinate bodies have power to determine the form and direction in which development schemes are implemented this power is circumscribed within the existing frame work of Five Year Plan. The administration headed by the Chief Executive Officer, is statutorily responsible for executing the decisions of non-official bodies at various levels. This administration being independent of and yet responsible to Government, ensures that decisions are executed within the frame work. The local leadership can determine priorities within the overall frame-work of Government rules and development policies.

The Buldana Zilla Parishad comprises 71 members, out of which 47 members are elected from constituencies with an average electorate of 35,000. The remaining 24 members are coopted representatives of various institutions such as cooperative societies, Banks, Ladies representatives Panchayat Samities etc. From among these members, the Zilla Parishad has elected a President, a Vice-President and two Chairmen of subject committees, all of whom have certain executive functions and are chairmen of subject committees with supervisory powers in relation to certain subjects.

A major area of development of district importance relating to agriculture, animal husbandry, minor irrigation, community development, public health, public works, cooperation and industries has been transferred to the Zilla Parishad.

Thirteen panchayat samitis have been established each with a Chariman with certain statutory functions. With a budget normally varying between Rs.2 lakhs and 10 lakhs, these bodies have unlimited powers of administrative sanction in relation to the existing schemes implemented within their jurisdiction. The panchayat samiti is essentially responsible for granting financial aid to the village panchayats, which in turn provide basic amenities at the village level.

(Continued on next page)

(6)

The panchayat samiti is also responsible for providing technical guidance to the village level staff in educating the village in modern methods of agriculture, animal husbandry etc. Finally it is responsible for supervising the administration of the 750 village panchayats in the district.

Coordination within this elaborate threestier structure is essential in two ways. The panchayat samiti consists of persons elected by members of the village panchayat as also of Zilla Parishad members elected from within its jurisdiction. The Chairmen of the panchayat samitis are co-opted members of the Zilla Parishad. Similarly, the executive staff of over 3000 persons, of which 6 and 45 are class I and class II gazetted officers respectively, belonging to the state Government but working on deputation. The remaining are the class III and Class IV employees. The whole staff is under the control of the Chief Executive Officer, who is responsible to Government, which means the staff at all levels work on the basis of certain principles laid down by Government. There is consequently a close link between the officials and non-officials at all the three levels. The close interest of the non-officials acts as a spur on the administration. The close association of local interests facilitates the over-coming of local obstacles, which are otherwise apt to come in the way of speedy execution.

The area, number of villages, population etc. covered by each taluka are given below :-

| Taluka | Area in Sq. miles | No. of villages (including deserted) | No. of Towns | Population |
|----------------|-------------------|--------------------------------------|--------------|------------|
| 1. Chikhali | 924 | 291 | 3 | 259,036 |
| 2. Mehkar | 1007 | 354 | 1 | 234,230 |
| 3. Malkapur | 651 | 277 | 2 | 293,304 |
| 4. Khamgaon | 710 | 237 | 2 | 211,577 |
| 5. Jalgaon | 474 | 212 | 1 | 115,551 |
| District Total | 3766 | 1371 | 9 | 1059,698 |

(Continued on next page)

1.4 Area

When the size and population of Buldana district are compared with those of other districts in Vidarbha, this district stands 6th and 7th regards the size and population respectively. Total population of the district is 10,53,698, out of which 3,94,260 persons i.e. 33.45% and 1,75,439 persons i.e. 16.55% reside in the rural and urban areas respectively. The area of district is 3766 square miles (i.e. 9754 square kilometres) which accounts for 9.93% and 3.2% of the total area of Vidarbha Region and Maharashtra State respectively. The percentage of population of Buldana district is 11.47% of that of Vidarbha region and 2.42% of Maharashtra State.

1.5 Topography

The entire region is one single administrative unit with two natural sub-divisions. Out of the five talukas now forming the district, the talukas of Chikhali and Mehkar lie on the Balaghat Plateau, while the rest of the talukas viz. Malkapur, Khangaon and Jalgaon are in the Great Plain below known as the paganghat. There are thus two natural sub-divisions which correspond closely with the administrative sub-divisions of the district. The edge of the Plateau where it falls abruptly into the valley is intersected by numerous deep ravines.

The landscape is of varied character, fertile village alternating with barren hillsides and deep ravines. Below the ghats country is flat except where it is broken by spurs of hills putting out into a plain.

1.6 Hills, river-system, soil

Hills - Buldana district has no mountains worth the name except that the portion of the district lies on the plateau which has a considerable altitude. There are some hills and elevations of which Gawilgrah Hills are worth mentioning. The elevation of the three plain talukas of Malkapur, Khangaon & Jalgaon varies from 865 to 910 feet above the sea level, while the elevation of Chikhali & Mehkar table land varies from 1736 to 2415 feet above the sea level.

(Contd. on next page)

Buldana town itself is pleasantly situated at an elevation of 2190 feet. The altitude of the Plateau region is of considerable utility and is useful to mitigate the rigours of climate. Extremes of heat and cold are compared favourably with any moderate hill station of some importance in the region.

River-System

The type of mountains in the district and their broad features would enable us to get an idea of the nature of rivers in the district. The Painganga, which may be called the principal river in the district rises in the hills near Deulghats in Buldana district only. It flows in south-easterly direction past Mehkar and then enters Akola district so as to form the same southern boundary of that district. It collects the drainage of Mehkar and partly of Chikhali talukas and eventually falls into Wardha river about Chanda. It may be pointed out here that the plateau and the hills in this region are only mairfed and devoid of adequate vegetation as such the rivers which rise from them are not generally perennial, so is the case with the rivers in Buldana district. Painganga river is almost dry in the summer. The other river which runs parallel to and in a southeasterly direction is Kate or Lower Purna. It rises in the Ajanta hills to the west of the district and flows past Deulgaon Raja, a little to the north and across Mehkar taluq and falls into Godavari. It is also dry in the hot season. Both these rivers are important tributaries of Godavery. The only perennial stream is in the Great ^{Painganga} Plain and that is the river Purna, which rises in the lower portion of the Gawilgrah hills in Amravati district. It flows across the northern part of the district to Join Taoti in East Khandesh district. It's principal tributaries within the district are the Nalganga, the Vishwaganga, the Gyanganga from the South and Ban from the north.

Soil

The geological formation of the district is Deccan trap with intratrappean beds of shale, sandstone and limestone. From the disintegration of the trap and these less prominent layers of non-crystalline rock can be traced, the various classes of soils of this tract, varying from the very fertile deep loam to the shallow muram soils of the higher lands.

The soil of the plain is largely a deep black loam, which cakes into a solid mass in the beginning on the dry weather, and cracks freely in all directions latter. These features run to a depth of several feet and give the soil a reticulated appearance.

The fertility of black cotton soil is proverbial.

The soil varies in texture and colour from the deep fine-grained and almost jet black soil of low laying fields to the shallow grey soils of the higher lands containing more sand and limestone.

The soil of the higher land is lighter and less subject to cracking. The depth of the black cotton soil varies from 3 to 20 feet. The richest soil of the district is to be found in the valley of the purna lying north of the railway line.

This soil, locally known as 'Bharkali' is of very fine texture, very retentive of moisture, becomes sticky when wet, cracks freely in the dry weather and is comparatively heavy to work. The largest stretches of it are found in strips about eight miles breadth on each side of the Purna.

Flora

The flora of this district may conveniently be divided into two types following the natural sub-divisions viz. The plains are the Babul, Nim, Murmati, Hiwari etc., while the 'Anjan' dominate the hills type. The other species frequently occur in the hills are the Teak, Sadra, Damora, Londia, Tiwas and Ber.

(Continued on next page)

Bamboo ^f ~~found~~ in the Ambarwara Reserves and in the inaccessible ravines in the Ajanta Hills. The species found in the plains provide mostly fuel and a certain number of species mentioned are common to both.

Wild Animals and Birds

Buldana District is devoid of dense forest, hence is not famous for wild animals. Certain reserves and forest blocks such as the Ambarwara Reserves in Satoura Hills and Ghatbori forest etc., are the abodes of the panthers, tigers and leopards. The other common species found in the district are wild boars, hyenas, wild dogs, wolves, bears, jungle cats and wild birds.

The commonest kinds of birds are the sandgrouse grey partridge, peafowl, bushquail etc. The painted Sandgrouse painted partridge and the grey penguin and the blue rock penguin are common. The district is poor in shore birds or waders, these being few tanks or streams with suitable cover to attract those birds.

1.7 Climate, Temperature & Rainfall

The climate of the district in general is dry and hot but considered to be generally healthy. Maximum temperature is about 42 centigrades in peak months in the summer and minimum is about 10.50 centigrades in winter. After May, the temperature rapidly comes down. Then from June, with the arrivals of monsoons starts the rainy season and lasts upto the end of September. It is followed by cold weather season and lasts up-to-the end of September. It is followed by cold weather season, which is quite pleasant.

The above temperature figures are typical of the Balaghat Plateau or the Chikhali and Mehkar taluqs only. There, the hot weather sets in late and the heat is never intense. The rainy season is pleasant and the cold weather is cool and invigorating. Buldana town itself is the coolest and the most pleasant district headquarter in Vidarbha Region. The climate of the parganah or the talukas of Malkapur, Khamgaon & Jalgaon affords a great contrast.

(11)

The heat is intense in those talukas and specially in the months of March, April and May, it is perhaps as intense as in the hottest part of India. The strong westerly winds which then prevail become, intensely heated and exercise their parching influence.

The annual rainfall average about 34 inches. If rains come in time and are spread over the monsoon period properly, the rainfall of 34 inches proves adequate for good crops.

CHAPTER IIPopulation

Buldana district is necessarily a land of small villages and in absence of large towns and important industries, the nature of population is essentially an agricultural one. As per 1961 - census, the district has 10,59,698 population, comprising of 83.45 percent rural population and only 16.55 percent urban population. Since 1901, the population of the district has increased by 71.47 percent against nearly 104 percent for Maharashtra State. The growth of the population during the last decade ie 1951-61 was by 21.78 percent.

The density of population per sq. mile for Buldana district is 281, which is much lower as compared to Maharashtra, which is 334. Density of population varies from 233 persons per sq. mile in Mehkar Tahsil to 368 per sq. mile in Malkapur Tahsil. These differences generally correspond to those of topography and land utilisation. The concentration of population is more in Malkapur and Khangaon tahsils, while rural density is higher in Malkapur and Chikhali tahsils.

The distribution of population by the size of villages shows that about 47.84 percent of the total number of villages are having less than 500 population, but these villages account for only 16.54% of the total rural population. More than 60 percent of the rural population of the district is concentrated in villages with population between 500 and 1999. The average population per village is 722 in the district as against 792 in Maharashtra. The number of inhabited villages per 100 sq. miles is 33 in the district as against 31 in Maharashtra.

No. scheduled tribes have been enumerated in Buldana district at the time of 1961 census, while the total scheduled castes population in the district is about 5.30 percent. The proportion

The proportion of the scheduled castes has decreased from 17.43 percent in 1951 to 5.30 percent in 1961, it is because a large number of persons from the erstwhile Hindu scheduled caste returning their religion in the 1961 census as Buddhist or Neo-Buddha.

The proportion of total workers, which is 522 per thousand persons in the district is much more as compared to proportion of 479 workers in Maharashtra State. However, the percentage of cultivators is more or less equal between the district and the state, whereas there is a high percentage of agricultural labourers i.e. 21.5 % as compared to the corresponding percentage of 11.4 of the state. Slightly less than half of the total population of the district has been classified as non-workers in 1961 census.

On studying the distribution of non workers in the district it is observed that there is a marked difference in the distribution pattern for non-workers among males and females. Of the male non-workers 34.06 per cent are full-time students while the corresponding proportion for females is 9.66 per cent. This is because of inclusion of 29.43 per cent females who are engaged in household duties as non-workers. The rural urban differences are similar both for males and females. In urban areas the percentage of full time students is higher and that for dependants lower. The percentage of females engaged in household duties is higher in urban areas than in rural areas. The percentage of unemployed is 2.22 and 0.43 for males in urban and rural areas and is negligible in both cases for females. Proportions of full-time students among females are lower both in urban and rural areas. The difference is not, however, entirely due to social customs of attending more to the education of boys than that of girls. The proportions for females are lower because the group of non-workers contains a large number of adult women engaged in household duties.

AGRICULTURE

Buldana district, likewise our country as a whole is necessarily an agricultural one, being the main occupation of the population in majority as agriculture. Out of the total workers, in the district, 34.54% constitute the agricultural workers by way of which, this district ranks 2nd after Yeotmal in this respect in 1961 in Maharashtra State.

The total geographical area of the district is 977,135 hectares, out of which 12.53% area was under forests, 5.56% area was not available for cultivations 7.7% area was an uncultivated land, 4.5% area under fallow land, whereas 69.7% area was the sown area during the year 1963-64.

The season (1964-65) as compared to the previous year the condition of crops as a whole in the entire district was not satisfactory. Though the rainfall was slightly more than the district normal rainfall, it was however, not spread out uniformly throughout the year and over the district. During the months of July & August 1964, the rainfall was heavy and continuous. But due to negligible rainfall from October 1964, the crop conditions were badly deteriorated, so much so that in many a villages, the yield under kharif crops was practically nil. The absence of rainfall has adversely affected the conditions of Rabi crops also.

Jowar, cotton, Wheat, Chillies and sugarcane are the important crops of the district. During the year 1963-64, 54% of the gross-cropped area was brought under food-crops. Jowar-being the major crop of the district occupied 34% area whereas cotton constituted among. The major non-food crops and occupied 37% of the gross-cropped area. Oil seeds occupied only 6% of the area. The area under cotton has been slightly increased as compared to the previous years.

The yield rates of Bajra, Tur, Sugarcane, Cotton and Seserum have been increased, whereas the same of Rice, Wheat, Jowar, Maize, Gram, Groundnut, Mustard and linseed are fallen during the year 1963-64 as compared to 1962-63. This has shown the corresponding effects in out-turns also.

During the year 1963-64, about 54.6% the gross cropped area was brought under food-crops, while 45.4% of the gross cropped area was under non-food crops. Among the food-crops, Jowar occupied a major portion of the area sown. Its percentage of the sown area to the gross-cropped area being 34% in the year 1963-64. 38% area was covered by cotton of the gross-cropped area in the same year.

The irrigation facilities in the district are - inadequate, so much so that only one percent of the gross cropped area was brought under irrigation during 1963-64. However, there is a slight increase in the area irrigated during the year 1963-64 over the previous year, the major source of which was through the wells in both the years. The various medium and minor irrigation projects in the district are yet to work in full swing. However, on 31st January 1965, all the 21 minor irrigation works were in use by which 1237 hectares cultivable area will be commanded, of which 1091 hectares was an irrigable area by the completed projects by the end of 1964-65. Out of these, only 628 hectares area was irrigated at present. Chikhali tahsil tops under irrigation facilities, which is subsequently followed by Mehkar and Malkapur tahsils, whereas Jalgaon and Khamgaon tahsils lack in irrigation facilities.

(Continued on next page)

Among the food-crops, wheat, Chillies and sugar-cane and cotton (non-food crops) occupy greater percentages of the total area under irrigation. The number of irrigation wells in use are only 63% of the number of wells in existence in 1963-64. In other words, for every 51 hectares, there is only one well. This ratio is too small. 79.5 percent of the total cultivating households have upto 10 acres land holdings under cultivation, followed by 13.6% upto 50 acres and only 1.9% above 50 to 500 acres.

Soil Conservation measures are being carried out extensively in the district and by the end of March 1965, an area about 20.9 thousand hectares was bunded, which comes to 3% of the gross-cropped area for the year 1963-64.

Information about agricultural wages collected from the selected cultivators from three rural centres of the district is presented in Table 3.8. The monthly wage rates shown are the average of two fortnights for which the data are collected. The selected cultivators are being approached every fortnight from whom the wages paid by them to the labourers employed by them during the preceding fortnight are collected.

The data on agricultural implements given in Table 3.9 is obtained from the live-stock census held in 1961. There are only 25390 iron-ploughs, depicting for every 29 hectares having one iron-plough.

There was no famine, chronic scarcity & akin to scarcity reported during 1964-65. However, by Hoods same 5 villages having 178 population were affected causing an estimated loss of Rs.5150/-

ANIMAL HUSBANDRY FOREST AND FISHERIES

Due to the lack of mechanisation of cultivation and inadequate transport facilities in the district with a special reference to the rural areas, the live-stock has got enormous importance. The cattle are maintained not only for milk and for the use in agricultural works, but they also supply a large part of manures used by the cultivators. Meat, eggs, wool, hides & skins, horns & bones etc. are the other valuable live-stock products.

The male cattle (excluding young stock) and breeding bullocks in the district have been slightly increased by 0.2% & 35% respectively in 1961 over the year 1956. However, the population of milch cattle has been decreased by 10% that of milch buffaloes by 33% of sheep by 55%, that of and of goats by 1% in 1961 over 1956. The poultry has been increased by 50% in the reference period.

Buldana district possesses a distinct type of cattle known as 'Khamgavi' breed of cows and 'Nagpuri' she-buffaloes.

The density of live-stock population of the district as per 1961 census comes to 209 cattle per sq. mile. Mahkar tahsil stands first so far as the density is concerned i.e. 222 and is followed by Malkapur (217), Chikhali (215), Jalgaon (207) and Khamgaon (191) per sq. mile.

The milch cows and buffaloes in 1961 come to 78 per thousand population. The ratio of a pair of working bullocks to plough comes to 3.1.

During 1964-65, out of the 82 attacked cattle and bovine population and 2 attacked goats, all of them have reported to be died and majority of them by 'Ghatsarp'. Adequate veterinary hospitals, Aid-centres, taluka dispensaries, key-village centres, supplementary cattle-breeding centres, artificial insemination centres etc. are available to meet out the requirements of veterinary facilities in the district.

FOREST

(18)

Though Buldana district does not fall in a dense forest belt, she shares of the large forest wealth of 158273 hectares, in which timber, fuel, bamboos and grass are grown of the forests in charge of the forest department, about. 63.8

Percent area has been classified as reserved forests, 5.8% percent as protected forests, and ^{25.4} percent as unclassified forests.

FISHERIES

The fishery activities in the district are limited to the inland water only viz. rivers, tanks and ponds. However, the Nalganga Reservoir offers a large field for the development of fishery industry. There are 3 fishery Cooperative Societies in the district, dealing in the stocking of the carp fry and manufacture of netting and their sale.

The total length of perennial rivers in the district is about 220 km. There are also 7 perennial tanks and 40 seasonal tanks and ponds which provide 1,629 acres of water spread area. The total water spread area is rather inadequate for development of fishing industry. According to the 1961 census 209 persons are engaged in fishing as principal work. 193 of them are males and 16 females. Fishermen in the district belong to the communities known as Dheemer, Dhol and Kahar. Since fishing industry has a limited scope, some fishermen take jobs in workshops and few other in seasonal agriculture. Fishing is generally done with the help of Gill nets. The nets are mostly made of cotton twine but these days nylon is also effectively used. Under the fishery requisites scheme financial assistance in the form of subsidy is given for purchase of nylon and cotton twine. The co-operative societies are given financial assistance in the form of loans and subsidy, They are also helped to secure tanks and ponds for purposes of pisciculture.

EMPLOYMENT INDUSTRY MINING AND ELECTRICITYFactory Establishment

The district is not an industrialised one, and the proportion of industry labour forms a small part of the total employment in the district. The cotton ginning and baling formed a major group of organised industries in the district, which occupied about 78% of the total working factories and 98% of the total factory workers. The other important groups of the industries were the manufacturing of edible oils (other than Hydrogenerated oils) and tobacco manufacture, which occupied about 10% and 1% of the total industries and about 0.4% and 3% of the total factory workers in the districts respectively.

There are no authorised estimates available relating to the industrial production in the district. However the data collected in the Annual survey of Industries in 1961 indicate that the value of productive capital of the factories is roughly of the order of Rs.1.88 crores and the value added by manufacture is of Rs.39 lakhs in the district.

Mineral Products

Buldana district is not known to have any minerals of outstanding importance, except some saline deposits and lead in the lake of Lonar. It appears from the District Gazetteer that those saline deposits were worked for some time past, but since they were found to be not profitable, their further exploitation was dropped. Though there is no major mineral production in the district, some minor minerals such as building stone, boulders, murrum, brick earth, sand, road metal, Kankar etc. are found in abundance.

Electricity

Power development and the extension of electricity to more rural and urban areas pave the way for more industrialisation. The electricity in the district is supplied by the Maharashtra State Electricity Board, which received the power supply from Khanarkheda and Paras Power stations.

There is no electricity generation station in the district. More and more villages are being benefitted under the scheme of 'Rural Electrification Programme'. The number of towns and villages electrified has been increased from 90 to 123, covering the population of 37 percent. Taking into consideration the entire population of the district, per capita energy consumption works out to 6 and 7 kilowatt hours during the year 1963-64 & 1964-65 respectively. Out of the total consumption of electricity during 1964-65, about 37 percent was for industrial purposes.

Employment

An Employment Exchange is functioning at Buldana as a recruiting agency to the employees in Govt. and non-government offices and undertakings. During 1964, the Employment Exchange registered 4423 candidates as against 3690 in 1963 as per its live-register. In all 734 and 734 vacancies were notified during the years 1963 and 1964 respectively. The number of candidates placed in employment stood at 411 and 392 during 1963-64 & 64-65 respectively. The volume of employment as can be seen from Table 5.3. is at increase in all the industries. This may perhaps be because of the more employment avenues opened under different plan schemes and development activities in the district.

Census of Government Employees

According to the census of Government employees 1961 the total No. of Government servants in the district are 3840. In the pay range of Rs.75 to Rs.100 the maximum Government servant i.e. 1636, 44% of the total Government servants are absentees. Among the total 3840 Government there are 8 class I, 90 class-II 2946 class III and 796 class IV persons.

CO-OPERATION

The co-operative movement has taken great strides during last three plan periods. By the end of 1964-65, almost all the villages in Buldana district have been covered by the agricultural credit societies. The co-operative movement which was in the beginning mainly the agricultural credit movement, has entered other fields of economic activities such as marketing, processing, farming, industrial, housing etc. However, the movement still continues to be a predominantly agricultural credit movement, as the agricultural credit societies account for ^{64.4} percent of the total number of societies, claim ^{81.7} percent of the membership of all societies and possess ^{45.5} percent of the share capital of all types of societies.

The number of societies of all types has increased by ^{1.7} percent during the year under report, while their membership, share capital and working capital have increased by ^{10.3} percent, ^{26.9} percent and ^{23.6} percent respectively. The increase in the amount of loans advanced during the year has been about ^{31.4} percent.

Important types of co-operative societies, other than the agricultural credit societies in Buldana district are the cooperative farming societies, cooperative housing societies, cooperative marketing societies, cooperative processing societies, consumers cooperative stores and industrial cooperatives.

There were ¹¹ primary agricultural marketing societies in the district at the end of 1964-65. The total value of purchases made by these marketing societies in the year 1964-65, comprised of ^{14.7} percent of the purchases of agricultural produce, ^{15.0} percent of agricultural requisites and the remaining ^{70.3} percent of consumer foods.

(continued on next page)

Total value of sales effected by the marketing societies consisted of ^{60.0} percent of sales as agents. The major agricultural produce handled by the marketing societies was Jowar in food-crops and cotton in non-food crops. Seeds constituted the major proportion (9.4 percent) of agricultural requisites distributed by the marketing societies.

The number of registered money lenders has recorded an increase during the year under report. Out of the total loans advanced by the registered money lenders, 63 percent were advanced to non-traders, while the remaining were advanced to the traders.

MEDICAL AND PUBLIC HEALTH

The work of the Health Department in this district is now in the purview of the Zilla Parishad. A subject committee looks after its working and the District Health Officer works as secretary to that committee as well as the officer in-charge of health activities in the district. The T.B. Sanatorium at Buldana is functioning independently and is a boon to the T.B. patients.

Medical Facilities

The medical facilities provided through the hospitals and dispensaries run by the Government including those administered by the Zilla Parishad were available in all the five tahsils of the district. No independent Maternity Hospital was existing, but the necessary facilities were available in the hospitals and in a few dispensaries as well. The number of beds for both the years has been 499. However, the number of indoor patients increased from 5662 in 1963 to 5956 in 1964, but that of out-door patients decreased from 6,63,143 in 1963 to 5,49,483 in 1964.

Primary Health Centres

There were eleven centres in the district during both the years 1963 & 1964. According to the population census, the total number of persons working as physicians, surgeons, Dentists Nurses pharmacists and other medical & health technicians in the district was 1026. The number of medical personnel per lakh of population works out to 47 in Buldana district as compared to 54 for the Maharashtra State.

Vital Statistics

The birth-rate of this district during year 1963 & 1964 was 45 and 42 per thousand of population respectively, whereas the death-rate works out to 19 and 17 respectively for the said years.

Drinking Water Supply

Drin

Only 4 towns viz. Buldana, Khamgaon, Shergaon and Deulgaon Raja in the district have had the protected water supply through tap system. Besides, there were three hand pumps and 8506 wells of hygienic sources of drinking water.

As regards the drinking water supply position in the district, 9 percent villages were having no water supply, 23 percent villages with inadequate supply, while the remaining 68 percent villages were with adequate supply. The major source of water supply in these villages is wells.

EDUCATION

The district has made remarkable progress in the field of education. The Zilla Parishad and Panchayat Samities are rendering valuable services in promoting literacy.

As per 1961 census, the percentage of literacy in the district comes to 26.96, in which the ratio of literacy among males is three times more than the females. Unlike, the literacy in urban area is about the double than the rural one. As per natural phenomenon, the number of primary school-going children is more than the secondary school-going or college students. The percentage of girl students to total pupils in various standards comes to 47% in the pre-primary 33% in primary, 20% in secondary schools, 7 % in higher institutions and only 6% in special schools. The percentage of girl pupils show a declining trend in the higher standards than the lower ones, presumably because the females get married at an early ages and do not continue education afterwards.

There are 12 pre-primary schools having 579 pupils and 19 teachers of which 17 teachers are trained. 1161 primary schools have had 121411 pupils and 3334 teachers of which 2993 are trained, whereas the 78 secondary schools having 31512 - pupils and 1206 teachers were in existence.

Two higher institutions with 1155 pupils and 50 teachers and three special schools having 772 pupils and 93 teachers were, in addition.

The ratio of trained teachers to total teachers is higher in the lower standards than the higher ones. Students offering technical education are proportionately very few, if compared to the general education. There are only 518 graduate (other than technical) holders and 337 technical (Degree/Diploma/Post-Graduate) pupils in the district.

(continued on next page)

In the higher and technical institutions, the roll of female pupils is seen in graduate degree (other than technical), technology & teaching. There was not a single girl pupil enrolled for the engineering, medicine, agriculture & veterinary courses.

With the impetus of education rural areas, the number of villages without schools is decreased by 5 in the population range of 200-399 in the year 1965 over the previous year. Even then there are still 223 villages without schools of which 188 villages fall in the population range of 0-199 and 35 in 200-399 population range.

For the uplift of Backwards class, an educational concession of Rs.14.37 lakhs has been given to 41298 students belonging to the scheduled castes / scheduled tribes and other Backward classes. Economically Backward class concessions have also been granted to the tune of Rs. 1.93 lakhs to 1421 students in the secondary schools & colleges, of which the share of secondary school students was far more than the University students.

The total expenditure on primary education by way of Grants-in-aids to local bodies in the district during the year 1964-65 is incurred Rs.51,64,155 as against Rs.46,57,116 for the year 1963-64. Out of the total expenditure during the year 1964-65, the expenditure of Rs. 46,30,495 i.e. 89.66 percent is non recovering where as Rs. 433,660 i.e. 10.34 percent is recovering. Out of the total non recovering expenditure during the year 1964-65 Rs. 46,12,618 i.e. 99.61 percent are incurred on all other expenditure including building grants.

TRANSPORT AND COMMUNICATIONS

Transport and communication facilities constitute one of the major determinants of economic progress and development of the district. Road and the rail are the only means of transport in this district.

Roads

A substantial part of the passengers and goods traffic is handled by the road transport in the district. The total mileage of the district has recorded an increase from about 1040 kilometres in 1963-64 to about 1148 kms. in 1964-65. The percentage of Block Topped Road to the total road mileage in the district has been 30% during the year 1964-65, while water bound macadam roads accounted for 59% of the total mileage, whereas the remaining 11% roads were of granular materials roads of lower type of the total road-mileage in the district, 11% roads were the National Highways, 23% were state Highways and the remaining 66% were the roads maintained by local authorities.

Railways

The Central Railway connects only 4 important towns in the district viz. Shegaon, Khangaon, Nandura and Malkapur and passes through other 5 villages, but leaves Buldana proper aside of the tract and many other important places on the Deccan Plateau.

The total length of the Central Railway line falling in this district is of 82 kilometres only. Khangaon town is connected with Salamb railway station and the length of the special broad gauge line measures about 13 Kms. The entire railway line comprises of the broad gauge only.

Post and Telegraphs

Unlike transport, communication is equally important in an economic growth. In the postal communications, there is a steady increase in almost all the facilities provided by the post & Telegraph Department, especially the number of offices, letter-boxes, postmen etc. The number of post-offices increased from 287 in 1963-64 to 289 in 1964-65. The number of telephones also increased from 597 in 1963-64 to 657 in 1964-65. At the end of 31.3.1965, there have been 239 post offices, 57 postmen (excluding runners) and 657 telephones in the district, which works out on an average 27 post offices, 5 postmen and 62 telephones per lakh of population.

LOCAL SELF GOVERNMENT

The Municipal Committees, Zilla Parishad, Panchayat Samittees and village panchayats constitute the important units of the local self Govt. in the district with a view to promoting development of democratic institutions and securing greater measures of participation by the people in development plans and in local & Governmental affairs by decentralisation of powers, the Zilla Parishad and 13 panchayat samitis have been established in the district on 1st May 1962, under the Maharashtra Zilla Parishad and 13 panchayat samitis have been established. The areas under the jurisdiction of the zilla parishad & Panchayat samitis correspond to the district and tahsil boundaries separately except in the case of Municipal towns which are not covered by the them.

The Municipalities cover 1.33 percent of the area and 16.56 percent of total population of the district, while the zilla parishad covers 97.62 percent of the area and 83.44 percent of total population of the district. The population covered by the zilla parishad is entirely rural.

Village Panchayats

Village Panchayat is the smallest unit of the local self Govt. and has its jurisdiction over the rural areas. It is a body of elected persons from the village assembly of adult residents and covers one big village or a group of 2 or 3 small villages. At the end of 1964-65, there were 750 village panchayats functioning in the district, and the entire rural population of the district has been covered by them. The following table reveals the income and expenditure of the village panchayats in the district:-

| Year | Number of village Panchayats | Income of V.Ps. (Rs.) | Income Per V.P. (Rs.) | Income Per capita (Rs.) | Expenditure of village panchayats (Rs.) | Expenditure Per V.P. (Rs.) | Expenditure Per capita (Rs.) |
|---------|------------------------------|-----------------------|-----------------------|-------------------------|---|----------------------------|------------------------------|
| 1962-63 | 744 | 2812349 | 3755 | 3.19 | 1957585 | 2616 | 2.22 |
| 1963-64 | 750 | 5930070 | 7973 | 6.78 | 3333667 | 4511 | 3.83 |
| 1964-65 | 750 | 7583367 | 10111 | 8.57 | 50,38941 | 6718 | 5.69 |

Zilla Parishad

The income of Zilla Parishad was derived mainly from the Revenue section, Govt. grants and debt section of the total income during the year 1964-65, 76.19 percent income was derived from Govt. grants (inclusive of agency schemes), 10.66 percent from debt section (inclusive of loans, advances and deposits), while only 7.36 percent income was accrued from the self-raised resources.

The expenditure of Zilla Parishad, Buldana during the year 1964-65 was incurred mainly on the Revenue expenditure and Debt section, which works out to 33.56 % and 11.43 % respectively.

The per capita income and expenditure of the Zilla Parishad during 1964-65 worked out to Rs.25.63 and Rs.24.72 respectively.

Municipalities

The salient features about the taxation levied by each municipality during 1964-65 in the district are given below :-

| Sr. No. | Name of Municipality | 1961 population | Total Receipts | Receipts from Municipal Taxes | Per capita Municipal Tax |
|----------------|----------------------|-----------------|----------------|-------------------------------|--------------------------|
| 1. | Khamgaon | 44432 | 1501991 | 654565 | 14.73 |
| 2. | Malkapur | 29637 | 718647 | 356524 | 12.00 |
| 3. | Shegaon | 21674 | 436645 | 233910 | 10.79 |
| 4. | Nandura | 17405 | 314544 | 145731 | 0.37 |
| 5. | Buldana | 15285 | 434275 | 251648 | 15.74 |
| 6. | Chikhali | 13499 | 466563 | 176655 | 13.08 |
| 7. | Jalgaon-Jamod | 12117 | 121415 | 53799 | 4.93 |
| 8. | Mehkar | 11872 | 304895 | 163191 | 13.74 |
| 9. | Deulgaon Raja | 3762 | 274107 | 153964 | 17.56 |
| District Total | | 175438 | 4573082 | 2195987 | 12.51 |

The per capita average municipal tax in the district was Rs.12.51 during 1964-65. However, it appears to be highest at Deulgaon Raja (i.e. Rs.17.56) and the lowest at Jalgaon Municipality (i.e. Rs.4.93). Since, these organisations require funds to finance many schemes of local importance, they derive their revenue mainly from the sanitary and conservancy tax, octroi and terminal taxes, rent & licence fees on market places, slaughter houses, hotels, lodging & boarding houses, rent on land & public buildings, cycle registration fees etc. In addition to these taxes, they receive grant-in-aids and at times loans from the govt. in specific cases that require huge capital for implementation such as water supply, drainage schemes etc.

PLAN AND COMMUNITY DEVELOPMENTThird Five Year Plan (1962 to 1964-65)

The break up of the outlay reveals that 36.7% of the plan provision is made for various Agricultural Programmes of agricultural production, Soil-Conservation, Minor Irrigation, animal husbandry, Forest, Fisheries, Warehousing & marketing.

27.9% of the plan provision is made for various programmes under social services like Education, Health, Housing, Water-supply etc. The co-operation & Community Development Programme constituted 21.40% share of the plan provision. Transport & communication shares 13.1% of the plan outlay, while the remaining 0.30% provision was proposed for Industries.

The district plan was implemented through 77 schemes. Consequent upon the formation of the Zilla Parishad on 1st May 1962, 29 schemes mainly concerning with agricultural production, animal husbandry, Community Development & General Education were transferred to the Zilla Parishad for implementation. 4 schemes could not be implemented for one or the other reasons despite plan provision.

Taking into account the actual expenditure on various schemes till the end of 64-65 an amount of Rs.256 lakhs was spent, which accounts for 62.35% of the total plan provision of Rs.410.52 lakhs. Percentages of the yearwise expenditure to total expenditure is accounted below :-

| | |
|---------|--------|
| 1961-62 | 10.62% |
| 1962-63 | 19.22% |
| 1963-64 | 25.34% |
| 1964-65 | 44.82% |

It is seen that the pace of expenditure is increased from year to year. Taking into consideration the total plan provision of Rs.410.52 lakhs, per person outlay works out to Rs.41.09 in the district as a whole. Total geographical area of Buldana district stands at 2414591 acres and thus, per acre plan outlay works out to Rs.18.03 as a whole for the district.

Head of Development expenditure

The percentage of head of development wise expenditure to the total expenditure is accounted as 30.46% under co-operation & community Development followed by 29.60% under agricultural programmes, 28.12% under social services, 11.46 under Transport & communication & and only 0.36% under Industry & Maining.

The percentage of Headwise expenditure to the corresponding head-wise plan provision is accounted for 57.64% under Agricultural Programmes 93.95% under co-operation & community Development 24.30% under Industry & Mining, 50.10% under Transport & Communication & 54.21% under the social services.

Plan Achievements

During the Third Five Plan period the salient physical achievements are enumerated below :-

1) Under the Agricultural Programmes, 10924 & 63300 acres area has been additional brought under sugarcane & oil seed development respectively. Plantation of 985 acres & re-juvenation of 532 acres have been done under Horticultural Development. 24510 tons of town-compost was produced & 39626 acres area has been covered under Green Manuring. 2.57 lakhs & 10.64 acres area was brought under intensive cultivation & improved agronomic practices. Under the consolidation of holdings 36 villages with 43810 acres were covered. 1.15 lakh acres area was punded during the plan period. 1491 new wells were constructed & 1014 pumping sets were installed. Irrigation potentiality for 2353 acres was created. 2 buildings of veterinary dispensaries were constructed. 100 acres of plantation of valuable trees was done and road of 3 miles was constructed under Forest Department. Under Fishery Development stocking of 7.69 lakhs carafry & netting of 1.50 lakhs Kg. fish were achieved.

Under 'co-operation & community Development Programme' long terms credit of Rs.42 lakhs, short-term 558 lakhs have been given 2 & 5 branches of the land Development Bank & Central Financial Agencies were opened. The membership of Primary credit societies is increased by 0.67 lakhs. 1 primary marketing society 13 rural godowns were opened. Under cooperative Farming outside pilot areas, 57 societies have organised respectively.

Under 'Industries programme' an amount of Rs.14327 for industrial cooperatives (including cooperatives of handicrafts workers) and Rs.76773 for Development of hand-loom weavers cooperatives were spent.

Under 'Transport & Communication' the rural roads of 17 miles were constructed. expenditure of Rs.25 lakhs has incurred for maintenance of district roads, bridges etc.

Under 'Social Services' 590 primary teachers were appointed, 84 class-rooms of primary schools were constructed, 7 teachers & 7 additional classes were created in Govt. Secondary schools. At Khamgaon, one technical high school and a Polytechnic have been started. A Blood-Bank is opened in the Civil Hospital at Khamgaon. 41 vaccinators for small pox vaccination were appointed and a Mobile vasectomy unit has been established under Family Planning. 14 villages were covered under the 'village housing Project scheme', while 243 villages with 691 acres were covered under Extension of village Goathans & provision of House-sites.

Community Development Programme

The Community Development Programme is the dynamo providing a motive force behind the Five Year Plan. It is the most significant & vital part of the plan in the annals of Indian History, exclusively meant for rural reconstruction. It is a device by which rural people help themselves to improve their own economic & social conditions. Self help & mutual service, civilisation & development of local community resources, organised and cooperative action and minimum state assistance are the guiding principles set out by this programme. The main purpose of this programme is to develop the channels, between the centres of information & research on one hand villagers on the others and to provide a trained agency to carry to the villages an agricultural, health, educational and all types of scientific & technical knowledge.

Coverage

In Buldana District, the C.D. Programme was initiated on 2nd October 1953 in 5 Blocks viz. Nandura, Jalamb (Shegaon), Chikhali, Jalgaon-Jamod & Mehkar. However, as on 31st March 1965, the entire rural area of the district has been covered by this programme. All the 1371 villages in the district and the rural population therein constituting 83.45 percent of the total population of the district are covered by the C.D. Programme as is seen from the following table :-

| Particulars | Stage-I | Stage-II | Stage-III | Total |
|---|---------|----------|-----------|--------|
| 1. No. of Blocks of C.P.A. Pattern | 5.00 | 5.50 | 3.00 | 13.50 |
| 2. Area in Square kilometres | 3705.1 | 3964.2 | 1949.4 | 9618.7 |
| 3. Number of villages covered | 500 | 568 | 303 | 1371 |
| 4. Population as per 1961 census covered. | 339132 | 332948 | 212180 | 884260 |

From the above table it is seen that maximum area and villages are under the coverage of stage I & Stage-II Blocks. Out of 1371 villages only 303 villages fall under the stage III phase, while the rests villages are under stage I & stage II, in which stages only the utmost possible development & economic uplift is being achieved.

Govt. Expenditure

The total expenditure incurred under the C.D. programme on all the 13 blocks in the district has been amounted to Rs.19.96 lakhs & Rs.20.07 lakhs for the year 1963-64 & 1964-65 respectively. Blockwise expenditure is presented below :-

| | | (Rs.in '000') | | |
|----------------|---------------|---------------|---------|------------------------------|
| Sr. No.: | Name of Block | 1963-64 | 1964-65 | (+) Increase (-) Decrease |
| 1. | Motala | 160 | 67 | (-) 93 |
| 2. | Nandura | 33 | 79 | (-) 4 |
| 3. | Jalgaon-Jamod | 79 | 84 | (+) 5 |
| 4. | Mehkar | 36 | 36 | - |
| 5. | Shegaon | 36 | 97 | (+) 11 |
| 6. | Buldana | 89 | 109 | (+) 20 |
| 7. | Sangrampur | 106 | 114 | (+) 8 |
| 8. | Chikhali | 155 | 129 | (-) 26 |
| 9. | Lonar | 319 | 196 | (-) 123 |
| 10. | Khamgaon | 273 | 227 | (-) 46 |
| 11. | Malkapur | 74 | 231 | (+) 157 |
| 12. | Sindkhed Raja | 335 | 280 | (-) 55 |
| 13. | Deulgaon Raja | 151 | 308 | (+) 157 |
| District Total | | 1996 | 2007 | (+) 11 |

Source:- Bureau of Economics & Statistics,
Bombay.

From the above table it is seen that though the total expenditure for both the years is more or less equal, the maximum expenditure is incurred by Malkapur & Deulgaon Raja Blocks, whereas Motala & Lonar Blocks show an abnormal decreases in expenditure by (-) 93 & (-) 123 thousand rupees in 1964-65 over 1963-64. It is presumably because of the C.D. ~~grants~~ grants placed at the disposal of these 2 Blocks might have come to an end. However, the rest of the Blocks appeared to have maintained the semi equal ratio of expenditure as compared in both the years under review.

Physical Achievements

The physical achievement of each item of the C.D. activities denotes the progress of the development in the block. It is an yardstick of measuring the progress of the developmental activities. Some salient features of the achievements of selected items in the district are accounted below :-

| Sr. No.: | Particulars | Unit | 1963-64 | 1964-65 |
|----------|--|--------|---------|---------|
| 1. | Fertilisers distributed (excluding green Manuring) | B.Mds. | 122611 | 142704 |
| 2. | Improved seeds distributed (excluding sugarcane) | " | 36377 | 59749 |
| 3. | Improved agri. Implements supplied. | No. | 389 | 321 |
| 4. | No. of animals artificially inseminated. | " | 514 | 11159 |
| 5. | Pedigress animals supplied. | " | 61 | 52 |
| 6. | Pedigree Birds supplied. | " | 2036 | 1995 |
| 7. | Drinking water wells constructed. | " | 98 | 117 |
| 8. | Drinking water wells renovated. | " | 113 | 139 |
| 9. | No. of persons operated (Family Planning) | " | 1190 | 1566 |
| 10. | No. of school- building constructed. | Rooms | 178 | 157 |
| 11. | Peoples contribution | Rs. | 890400 | 590700 |
| 12. | No. of Houses built | No. | 97 | 53 |

Source:-Bureau of Economics & Statistics, Bombay.

From the above table it is observed that during the year under review an overall increase is found in almost all the selected items of physical achievements as compared with the previous year. Remarkable progress is seen on the items of agriculture & animal husbandry. During 1964-65, more fertilisers & improved seeds were distributed by 20093 & 23372 B.Mds. over the year 1963-64 respectively. 10645 more animals were artificially inseminated in 1964-65 over 1963-64. The impact of family planning is also noteworthy, with the result that more & more people are coming forward for vasectomy operations or sterilisations as the case may be. But the progress of peoples contribution appears to be slow by Rs.2.90 lakhs in 1964-65 over 1963-64. However, apart from these items, all other activities under different spheres of development are being undertaken with full satisfaction in almost all the blocks in Buldana District.

PRICESAll India Wholesale Price Index Number

The important indicator reflecting the fluctuations of prices is the all India wholesale price index number. A table showing the changes in the prices of certain important groups of commodities in the All India wholesale price index number is given below.

All India wholesale price Index Numbers

Base, 1952-53 = 100

| Year/Month | Food | Liquor and Tobacco | Fuel power lighting and lubri- cants | Industrial raw mate- rials | Manu- factures | All Commodities |
|------------------------|-------|--------------------------|---|----------------------------------|-------------------|--------------------|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1955-56 | 86.6 | 81.0 | 95.2 | 99.0 | 99.7 | 92.5 |
| 1960-61 | 120.0 | 109.9 | 120.0 | 145.4 | 123.9 | 124.9 |

1964-65.

(The index number of wheat and of all other groups, in which wheat is included is revised with effect from 23rd March 1964.)

During the year 1964-65 the general index number advanced continuously and the rise was sharp. The index number which stood at 139.9 in April 1964 reached its peak at 158.6 by September 1964.

The rise in the food group index number was more sharp. The rise in the food group index number during 1964-65 was more pronounced and the index number which stood at 142.6 in April 1964 shot up to 169.5 in September 1964 i.e. by about 19 percent. Following the usual seasonal trend it declined marginally to 168.6 in October 1964 and stood as 163.5 in November 1964.

The prices of manufactures increased by 4 percent during the period April 1964 and September 64. On the other hand index number for industrial raw materials which was 147.1 in April 1964 was spurred up wards to 170.3 in September 1964 i.e. by about 16 percent, widening further the gap between the relative prices of manufacturers and industrial raw material. For the month of November 1964, it stood at 164.8 and moved upwards to 169.2 for the week ending on 23rd January 1965.

Retail Prices

Since the declaration of emergency in the country in 1962 price quotations for some essential commodities from the district headquarters are obtained on weekly basis and an index number of prices is worked out with the week ending 9th November 1962 as the base. Retail prices of 51 important commodities constituting the cereals, pulses, sugar & oils, condiments & spices, fruits & vegetables, fuel & lighting, clothing and other items of consumption etc. prevailing at Buldana Town were also collected the year 1964. The salient fluctuations of some of the important commodities are as under.

Rice (medium) which was sold at Rs.0.78 per kilo in January 1964 shot up to Rs.1.06 in October 64. Wheat (Medium) & wheat (Coarse) gone up by 220% & 300% from January 64 to December 64 respectively. The prices of white jowar also increased by one & half times in July 64 over January 64 and disappeared from the market later on because of the subsequent effects of the monopoly purchase by the state Govt.

Gram (whole) & Gram (Dal) prices shot up by 210% & 235% respectively in December 64 over January 64, while Arhar Dal & Mung Dal rose by 169% & 265% respectively during the same period.

The prices of Groundnut oil were low (Rs.1.87 per kg.) in January 64 and high (Rs.3.28) in September 64.

The price of Dry corrande was practically doubled-up in the month of December 64 as compared to its prices in beginning of the year, whereas the prices of Potatoes and Onions were increased by 232% and 161% respectively in this period.

The prices of other commodities either remained constant or had no abnormal fluctuations during the year 64.

MISCELLANEOUS

The section covers the topics relating to police & crimes, civil & criminal cases decided in the courts, cinema statistics, census of Govt. employees, housing conditions, financial statistics relating to scheduled & co-operative banks, Joint-stock companies, Small savings, Land revenue collection & recoveries, collection of other taxes and General Elections 1962. The salient features of some of the important topics are as under.

Housing

At the time of 1961 census, out of the total houses in the district 54.52 percent houses were used as dwellings, 28.24 percent as cattle-sheds etc., 11.08 percent were vacant, while the remaining houses were used for shops, work-shops or factories, schools etc.

Unlike the increase in density of population, the density of residential houses per square mile in the district has also been increased from 48.4 in 1951 to 57.7 in 1961. The number of persons per residential house has also been increased from 4.77 in 1951 to 4.89 in 1961.

(39)

Classified by the number of rooms occupied 72.3 percent households were occupying one-room dwellings, whereas 18.3 percent were had 1 two-room dwellings. The households occupying larger number of rooms were more in urban areas than in the rural ones. Average number of person per room was 3.50 for total, with a break-up of 3.56 and 3.22 for the rural and urban areas respectively.

Banks

The total banking offices in the district were 33 during the year 1964-65, of which the scheduled and co-operative banks were 11 and 22 respectively. In all 21 towns and villages with 2,20,311 population have been covered. Thus one banking office serves the population of 6676.
