Chapter I  
Introduction 1  
1.1- Introduction 1  
1.2- Literature Review 10  
1.2.1- Traditional Finance 12  
1.2.2- Adjustment – Cost Approach 14  
1.2.3- Irreversibility Approach 16  
1.2.4- Covariance Approach 22  
1.2.5- Adjustment-Cost or Irreversibility? 24  
1.2.6- Empirical Studies 26  

Chapter II  
A Review of Economy of Iran 28  
2.1- Economy Of Iran 28  
2.2- Uncertainties and Economy of Iran 35  

Chapter III  
Theory 38
Chapter IV
Methodology, Estimation and Analysis 56
4.1- Data And Data Preparation Process 56
4.2- Methodology 63
4.3- Uncertainty About Macroeconomic Variables 65
4.3.1- Unit Root Test 65
4.3.2- Poolability 65
4.3.3- Outliers 67
4.3.4- Fixed Effects 68
4.3.5- Estimator Selection Strategy 69
4.3.6- Multicollinearity 75
4.3.7- Estimation 76
4.4- Uncertainty about Socio-Political Institutions and conflicts 77
4.5- Uncertainty about The Quality of Public Governance 81
4.6- Outcomes Analysis 83

Chapter V
Conclusion 98
5.1- Summary 98
5.2- Empirical Findings 103
5.3- Policy implications 105

Appendices
Appendix A 108
Appendix B 113
List of Tables

Table 1.1- Comparison of GDP per capita and private investment rates among selected countries. 3
Table 1.2- Real and nominal interest rates for India and China. 6
Table 2.1- Comparison of socio-economical indices in Iran. 28
Table C1- List of MA processes. 124
Table C2- List of variables. 125
Table C3- Summary statistics of data. 126
Table C4- Pairwise correlation of independent variables in macroeconomic panel. 127
Table C5- Pairwise correlation among socio-political institutions and conflicts panel. 127
Table C6- Pairwise correlation of governance quality variables. 127
Table C7- List of the countries. 128
Table C8- Results for Maddala and Wu unit root test. 129
Table C9- Results for cross validation. 130
Table C10- Results for macroeconomic uncertainty panel estimation. 131
Table C11- Results for socio-political institutions and conflicts. 132
Table C12- Outcome for quality of governance uncertainty. 133
Table C13- Outcomes of VIF test for macroeconomics uncertainty panel (without uncertainty of real interest rate). 134
Table C14- Outcomes of VIF test for macroeconomics uncertainty panel (without uncertainty of inflation). 135
Table C15- Outcomes of VIF test for panel a, socio-political uncertainty and conflicts.  

Table C16- Outcomes of VIF test for panel b, socio-political uncertainty and conflicts.  

Table C17- Outcomes of VIF test for panel c, socio-political uncertainty and conflicts.  

Table C18- Outcomes of VIF test for quality of governance.

Acknowledgements

This thesis is the end of my long journey in obtaining my degree in Economics. However, adventurous expeditions for discovery of new fields will never be finished. I have not traveled in a vacuum in this journey. There are some people who made this journey easier and more intellectually satisfying with words of encouragement and by offering different places to look to expand my ideas and analyses.

First, very special thanks to my supervisor Dr. Siddhartha Mitra. He gave me the confidence and support in the beginning of my Ph.D program in Economics when I was groping to find my way. His insight, knowledge and enormous grasp of Economics and Econometrics inspired me. He patiently spared his time and went through several drafts of this work, challenged analytical and logical weakness in it and provided constructive suggestions, which definitely improved my knowledge of the subject and analyses.

I would like to thank my family, on whose constant encouragement and love I have relied throughout my time at the Institute. I am grateful to my parents for their continuous support and my wife for her endurance. Their unflinching courage and conviction is constantly inspiring me, and I hope to continue, in my own way, toward the future. I have no words to express what and how much I owe them.

I would also like to gratefully acknowledge the support of some very special individuals. They helped me immensely by giving me encouragement, friendship and by
their valuable comments. They mirrored back my ideas so I heard them aloud, an important process in shaping this thesis: Prof. Rajas K. Parchure, Dr. Smriti Mukherjee, Kambiz Ahmadi and Saeed Sepehrvand.

I express my gratitude to the research staff, library staff and computer section staff for all the assistance provided to me during my work.

Finally I have to sincerely thank Keyvan Aghayani and Vahid Meithami. Without their help I could not have joined the Institute.
