12. " " " Vol. IV.—Administrative, Judicial, etc. R1-4. (4a.)
13. " " " Vol. V.—Education. R2. (5a.)
14. Agricultural Statistics of India—
 Vol. I.—British India. R2-8. (12a.)
 Vol. II.—Native States. R1. (4a.)
15. Summary Tables of the Agricultural Statistics of British India. As. 4.
16. Estimates of Area and Yield of principal Crops in India. As. 8. (2a.)
17. Preliminary Statement showing the Area and Yield of principal Crops in India. Half anna.
18. Report on the production of Tea in India. As. 8. (2a.)
19. Report on the production and consumption of Coal in India. As. 12. (2a. 6p.)
20. Statistics relating to Joint Stock Companies in British India and Mysore. R3-4. (2a.)
21. Variations in Indian Price Levels from 1861 expressed in Index numbers. As. 12. (3a.)
22. Statistical Tables relating to Banks in India with a Map, Introductory Memorandum and Banking Directory. R1-12.
23. Cotton Pressing Factories and Cotton Spinning Mills in India, 1916-17. R1-10.

[Note.—Those marked with an asterisk (*) to be obtained from the Officer in charge, Bengal Secretariat Book Depôt.]

HALF-YEARLY.

24. Increase or decrease in the Capital of Companies incorporated in India and registered under the Indian Companies Act. Half anna.

MONTHLY.

25. Accounts of the Foreign Sea-borne Trade and Navigation of British India. As. 8. (2a.)
26. Review of the Sea-borne Trade and Navigation of British India. As. 4.
27. Accounts relating to the Trade by land of British India with foreign countries. As. 8. (2a.)
28. Statistics of Cotton Spinning and Weaving in Indian Mills. As. 2. (1a.)
29. Trade Fluctuations in selected articles. Anna 1 and pies 6.
30. Calcutta Trade Fluctuations. As. 2.
31. Customs Revenue Statement. Half anna.
32. Joint Stock Companies registered in British India and Mysore. Half anna.

FORTNIGHTLY.

33. Wholesale and Retail Prices of Cereals, Pulses, Oilseeds, Sugar, Salt, etc., in India. As. 6.
34. Wholesale and Retail Prices of Wheat in India. Anna 1 and pies 6.
35. Cotton Press Returns. Half anna.

WEEKLY.

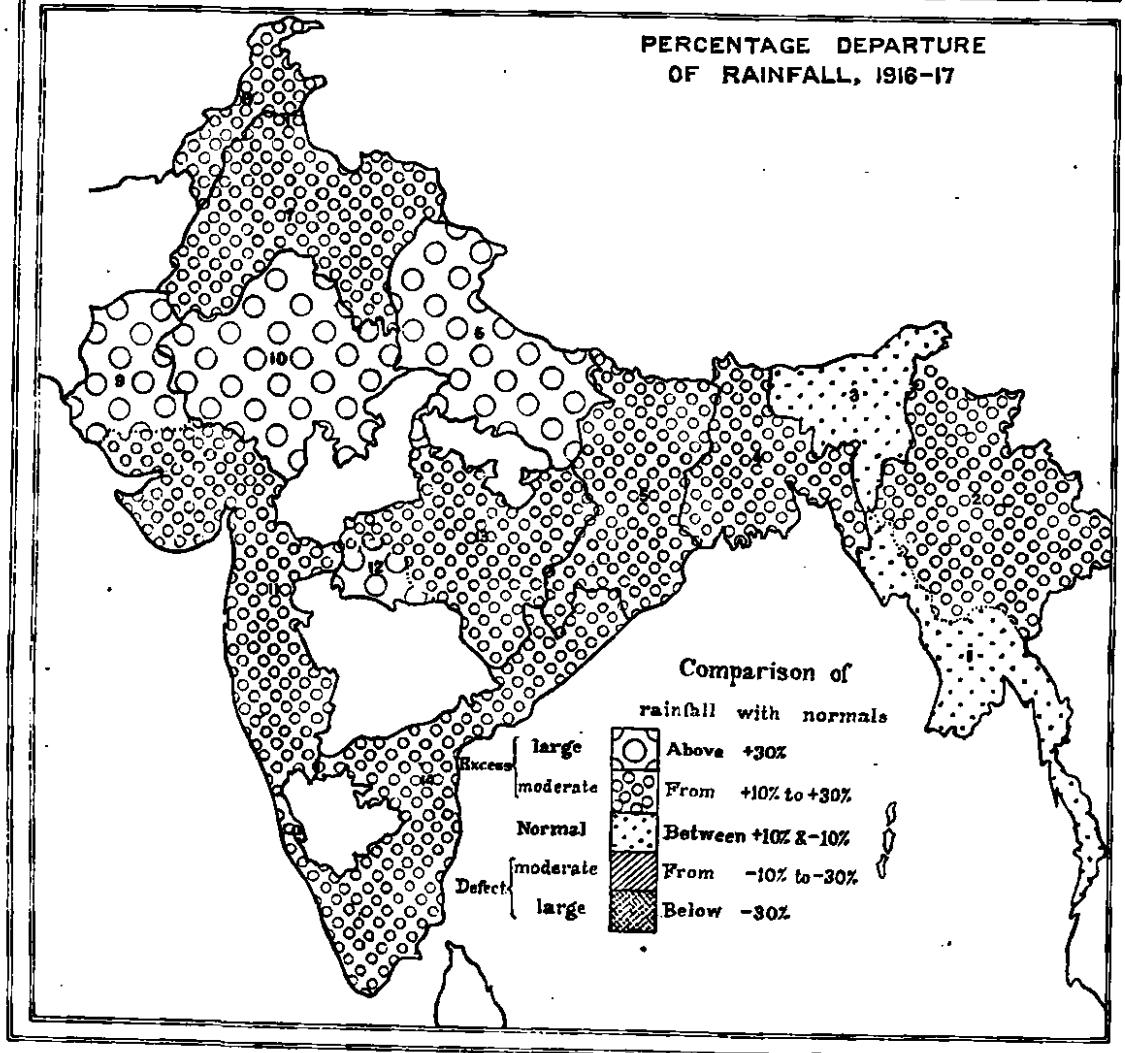

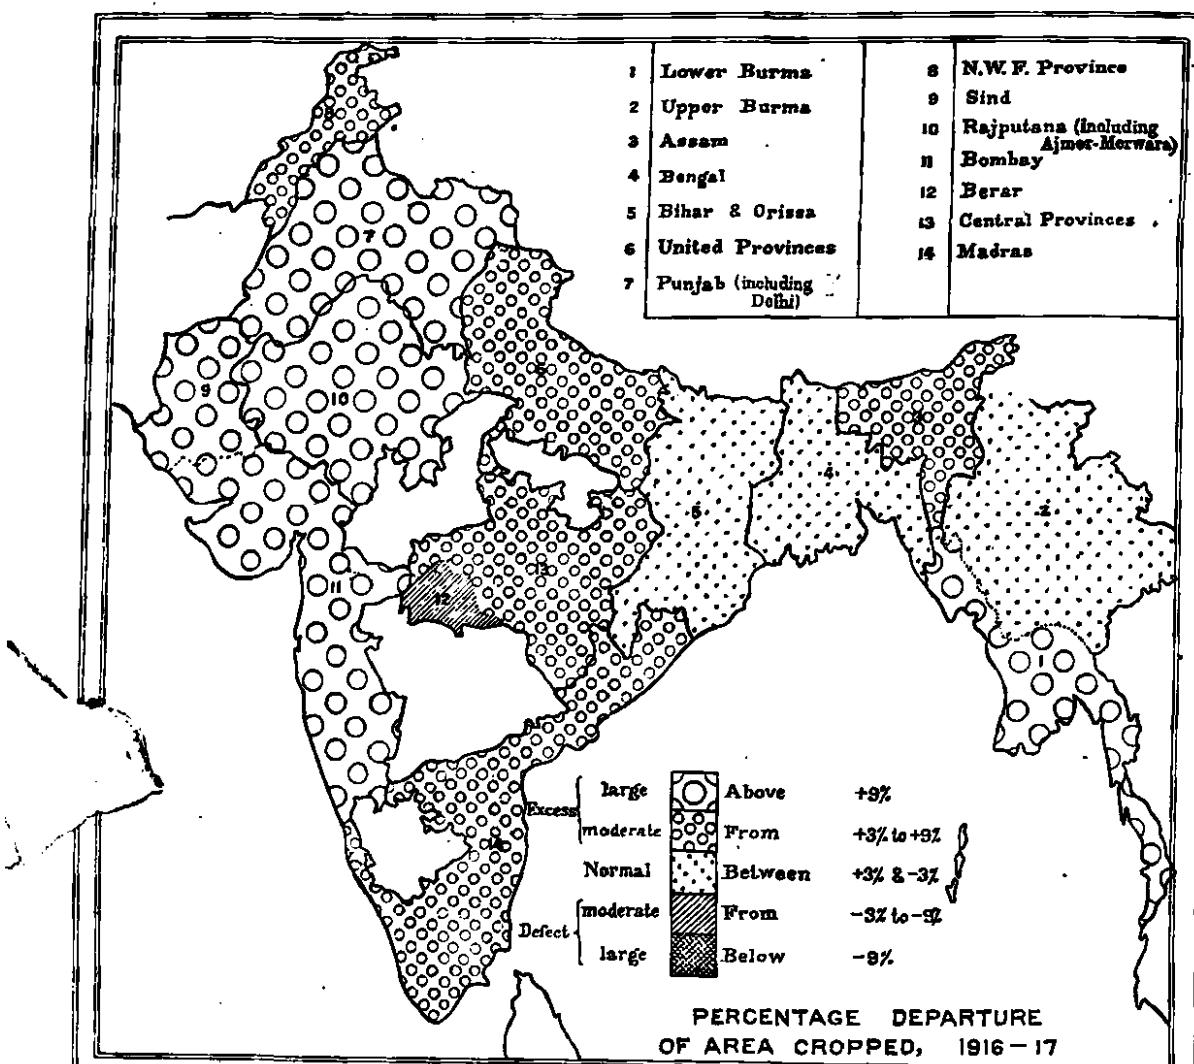

36. Weekly Imports and Exports from Chief Ports of Wheat, Jute and Cotton. Half anna.

MISCELLANEOUS.

37. Crop Forecasts. Half anna each.
 - Rice—1st (October), 2nd (December), Final (February).
 - Wheat—1st (January), 2nd (March), 3rd (May), Final (August).
 - Cotton—1st (August), 2nd (October), 3rd (December), Final (February).
 - Linseed, Rape and Mustard (Winter oilseeds)—1st (January), 2nd (March), Final (June).
 - Sesamum (*til* or *jnjili*)—1st (September), 2nd (October), Final (January), Supplementary (April).
 - Groundnut—1st (October), Final (February).
 - Indigo—1st (October), Final (December).
 - Sugarcane—1st (August), 2nd (October), Final (February).
38. Memoranda and Statistical Tables relating to the Trade of India with Germany and Austria Hungary. As. 8. (2a.)
39. Large industrial establishments in India. R2-12.

CONTENTS

	PAGES
REPORT	i—x
CHARTS—	
The map, charts, and diagrams appended to the volume illustrate—	
(1) the departure of cropped area and that of rainfall in 1916-17 from the average of the preceding ten years	Frontispiece.
(2) variations in rainfall as compared with normal, total area cropped, foodcrops area and current fallows (reversed);	
(3) rainfall in wheat growing tracts (June to February), total wheat area, and unirrigated wheat area;	
(4) total cultivable area, total uncultivable area, net area cropped, culturable waste other than fallow, and current fallows,	
(5) total area cropped, total area under food crops, total irrigated area cropped, and total area under non-food crops,	xi
(6) areas under rice, millets, wheat, oilseeds, cotton, jute and other crops,	
(7) total area cropped and areas under different crops,	
(8) total live-stock divided between bovine, ovine, and others, and	
(9) shares of provinces in the total area under principal crops.

APPENDIX A

THE AVERAGE YIELD PER ACRE OF PRINCIPAL CROPS IN INDIA

A provisional return of the yield of principal crops cultivated in India was first compiled in 1892, from various statistical publications available at the time, such as agricultural and settlement reports, crop forecasts, gazetteers, replies to the enquiries of the Famine Commission, etc. To provide for the periodical revision of the estimates a system of experimental crop cuttings was prescribed by the Government of India, the results of which are reported by Local Governments and Administrations at the close of each quinquennium. The returns for the quinquennium ended 31st March 1917 have been received and scrutinised. These outturns per acre are of extreme importance since these will generally be used during the present quinquennium (*i.e.*, until 31st March 1922) in estimating the production of crops, for which forecasts are prepared.

2. The estimates are prepared in the following way. The estimate given is the average outturn on average soil in a year of average character, as deduced from the information obtained from experiments made during the period under review. When, therefore, this average is multiplied by the average area sown, it is believed to give as near an approximation as possible to the outturn of the crop in an average year. The Department of Agriculture or Land Records of each province has at its disposal provisional standard estimates of the average yield of land of average quality (usually under the two major heads of irrigated and unirrigated land) for the several crops in each district. The object of the experiments or investigations annually made is to test the accuracy of these estimates, and to enable the head of the Department in each province to revise his provincial estimates when necessary. Should it happen that the period has been one of unfavourable conditions or of exceptionally favourable conditions, which have affected the experiments reported, this would not necessarily involve the reduction or increase of the standard estimates for the district or for the province, unless there were other reasons for believing that, as estimates of average yield in an average year, they had been pitched too high or too low.

3. In 1913, on an examination of the returns of the quinquennium ending 1911-12, it was recognised that the results of experiments as conducted by the district revenue staff were generally unreliable. A change was accordingly made in the system. In 1915 the Government of India, in order to improve the returns, issued instructions to employ, as far as possible, the expert officers of the provincial Agricultural Department, for carrying out experiments on a well-ordered plan in each agricultural tract, and for the investigation of average crop outturns in the various provinces. It appears from the provincial reports that during the quinquennium under review experiments were regularly conducted by officers of the Agricultural Department in Madras, Bombay, and the United Provinces. In Bihar and Orissa crop tests by officers of the Agricultural Department were carried out on a small scale (as an experimental measure only) in a few districts. In Bengal the work was transferred from the district staff to the Agricultural Department, but owing to a reduction in the staff of the Department in consequence of financial stringency, the old system had to be reverted to. In the Punjab officers of the Agricultural Department were consulted in revising the standards, and it is stated that an improved system of conducting experiments has come into force from 1917. In Burma also new rules have been issued entrusting supervision of the experiments very largely to the Agricultural Department with effect from 1917-18. In Assam experiments were conducted according to revised rules framed in 1912 and slightly modified in 1915. In Mysore a system of checking the estimates by the results of experiments conducted by the Agricultural Department is, it is understood, to be introduced during the next quinquennium. No change in the system appears to have been made or contemplated in the remaining provinces.

4. It will thus be seen that in the majority of provinces, the orders of 1915 could not be fully carried out in the quinquennium under review. As a result of the experiments that were made, whether under the old or the new system, considerable changes have been made in the averages previously adopted, except in Bombay, Bihar and Orissa, and the Central Provinces and Berar. The changes

are generally in an upward direction. In Bengal the yield of winter rice has been raised from 983 to 1,036 lbs. and that of jute from 1,271 to 1,300 lbs. Barley in the United Provinces has been raised from 1,100 to 1,150 lbs., arhar from 750 to 800 lbs., and cotton from 160 to 170 lbs. In the Punjab wheat has been raised from 726 to 791 lbs., sugarcane from 1,686 to 1,933 lbs., and cotton from 118 to 135 lbs. Cotton in Sind has been raised from 125 to 170 lbs., and sugarcane from 4,233 to 8,142 lbs. In Assam the yield of autumn rice has been raised from 672 to 706 lbs. and that of sugarcane from 1,904 to 2,016 lbs. In the North-West Frontier Province wheat has been raised from 633 to 676 lbs., and sugarcane from 2,430 to 2,660 lbs. In a few instances the standards have been decreased. In Sind the yield of rapeseed has been put at 393 lbs.; in Assam the yield of winter rice at 952 lbs., while the yield of jawar in the North-West Frontier Province is now estimated at 399 lbs.

5. The importance of accurate standards of average outturn cannot be exaggerated, since, as already noted, under the present system the estimates of yield in crop reports are based on these standards, and a small error of even one lb. per acre may make a difference of thousands of tons in the estimated yield of a province. It has also to be remembered that the result of a single experiment, if not conducted with proper care, may vitiate the average for the district as well as for the province, since the district figure is calculated by averaging the outturns obtained from all the selected experiments in the district, and the provincial average is estimated by multiplying each district outturn by the area under the crop in each district and dividing the sum of the total outturns thus arrived at by the total area under the crop in the province. It is, therefore, extremely necessary that the instructions issued by the Government of India in 1915, referred to above, should be carried out to the fullest extent, as early as possible, where this has not already been done.

6. The statement below compares the average outturns of the major crops in the different provinces. The relative importance of each province in respect of each crop has also been shown by percentages representing the proportion of the total area under each crop in British India cultivated in each province. Tea has been included in this statement, although this crop is not dealt with in the quinquennial returns, the average outturns having been calculated from the special returns of tea production for the five years ending 1916.

(a) Irrigated.

(b) Unirrigated.

The outturns of maize in Assam, of sugarcane in Sind, and of cotton in Ajmer-Merwara appear to be too high, as compared with other provinces, although the areas cultivated are insignificant. On the other hand, the outturns of linseed in the Central Provinces and of sesamum in the Central Provinces and Burma appear to be too low in spite of extensive areas being cultivated with the crops in these provinces.

7. In the following paragraphs the leading features of the provincial reports are summarised :—

Bengal.—In 1915 the work of conducting crop cutting experiments in Bengal was partially transferred from the district offices to the Agricultural Department, but owing, as already noted, to a reduction made in the staff of demonstrators attached to the Agricultural Department in consequence of financial stringency, the old system had to be reverted to. This transfer and retransfer of the work from the district staff to the Agricultural Department and back led to some confusion and resulted in fewer experiments being made in some districts than would otherwise have been undertaken. Nevertheless the total number of experiments made during the quinquennium under review with staple crops (rice, wheat, gram, linseed, rape and mustard, sesamum, sugarcane, and jute) was a record of 3,671, as against 2,814 in the previous quinquennium ; and these experiments afforded sufficient data for a general revision of the standards previously adopted for the province. The average yield has been raised in the case of rice, sugarcane, and jute ; while it has been reduced in the case of wheat, gram, rape and mustard and also linseed. The important changes are the increase of the yield of winter rice from 983 to 1,036 lbs. of autumn rice from 807 to 871 lbs., and of jute from 1,271 lbs. to 1,300 lbs., and the reduction of the yield of wheat from 861 to 698 lbs. The returns do not distinguish between irrigated and unirrigated crops, the irrigated area being relatively very small in the province. A few experiments were also made with certain less important crops such as barley, maize, peas, *khesary*, *mung*, sunn hemp, and tobacco ; but the data obtained were not sufficient to warrant the deduction of average yields per acre for the whole province.

Madras.—During the quinquennium under review experiments in Madras were conducted by the Agricultural Department, and it is stated that they may be taken as being on the whole more accurate than those conducted in former years by the officers of the Revenue Department. On the other hand, these are much fewer in number and in many cases are too few to admit of the results being accepted as a representative figure for any tract. It is further stated that the figures reported in the previous quinquennial returns, which were solely based on crop cutting experiments, have never been adopted in Madras for the purpose of calculating outturns in crop forecasts, season and crop reports, etc. For this purpose there exists a separate set of standards, which have been fixed and modified from time to time by the Board of Revenue, in consultation with the Director of Agriculture, on a consideration of the tabulated results of crop cutting experiments, the results obtained on Government farms, and, in the case of cotton, of the figures of total crop exported from certain areas. These standard figures have been reported (rightly) in the present return. The Director of Agriculture, however, remarks that these figures are in need of revision in many cases and that he has now under consideration, this important question. For the above reason, no useful comparison can be made between the present and the previous figures, especially as a distinction was made between irrigated and unirrigated crops in the previous figures, whereas the present figures are averages for irrigated and unirrigated crops taken together, except in the case of sugarcane which is always an irrigated crop.

Bombay.—In Bombay the estimates of 1897 were prepared with great care, and the results of the experiments made in the two quinquennia ending 1901-02 and 1906-07 were not considered sufficiently reliable to justify any revision. In the quinquennium ending 1911-12, the system of crop cutting experiments conducted by the district staff was abolished, and a system of more scientifically conducted experiments on Government farms by officers of the Agricultural Department was substituted ; but the results obtained on Government farms were too meagre to justify any revision of the provincial averages, although a few changes were made with great caution in the district figures. In the quinquennium under review a few changes have been made in the district figures, as a result of the experience gained by the Agricultural Department ; and it is believed that the changes are in the right direction, although the matter is largely one of guess work. The only change made in the provincial averages is a very slight increase of the yield of cotton, namely, from 100 to 102 lbs., all other figures remaining unchanged. It is stated

that endeavours will be made during the next quinquennium to test other figures upon which it has not yet been possible to offer any definite opinion.

Sind.—The figures reported from Sind in the previous quinquennia were not the average outturns worked out from the yield of crops raised on different classes of lands and under various modes of irrigation, but were mostly the actual results of individual experiments (or mean figures where more experiments than one were made) by the settlement or divisional officers. The present return has also been prepared from similar data, but a distinction has been made between irrigated and unirrigated crops. The Commissioner remarks that in order to work out correct averages, a large number of experiments would be necessary for each crop under different modes of irrigation, and the aggregate cultivation under each mode of irrigation on different classes of lands would also have to be taken into account; but as these statistics are not yet available on a sufficiently large scale, there is no alternative but to accept the figures now communicated by the collectors. As compared with the previous figures the present estimates show an increase in the case of wheat, barley, gram, sugarcane, and cotton, and a decrease in the case of jawar, bajra, sesamum, and rapeseed. The most important changes are the increase of the average yield of barley from 1,076 to 1,279 lbs., that of gram from 476 to 604 lbs. of sugarcane from 4,233 to 8,142 lbs., and of cotton from 125 to 170 lbs.; and the decrease of the yield of jawar from 1,396 to 866 lbs., of bajra from 971 to 624 lbs., and that of rapeseed from 602 to 393 lbs. The Commissioner states that it is not possible to explain these wide variations except that the increase in the case of sugarcane and cotton can be ascribed to a more regular supply of water following the many improvements in the canals. The figure for sugarcane (8,142 lbs.) seems, however, to be extremely high. It is further stated that instructions have been issued to district officers to collect in future the data of outturn of normal (12-anna) crops raised on different classes of irrigation and to work out on a uniform system the average for the district by taking into account the area under each mode of irrigation.

United Provinces.—In the quinquennium under review experiments in the United Provinces were made regularly by officers of the Agricultural Department and some by settlement officers, in addition to those conducted by district officers. The results of these experiments have not necessitated a change in the previous standards except for barley, jawar, arhar, and cotton. The yield of barley has been raised from 1,100 to 1,150 lbs., that of arhar from 750 to 800 lbs., and that of cotton from 160 to 170 lbs. The yield of jawar on the other hand, has been reduced from 650 to 600 lbs.

Bihar and Orissa.—In accordance with the Government of India Circular of 1915, referred to above, the execution of crop tests by officers of the Agricultural Department of Bihar and Orissa was started in that year as an experimental measure, and experiments were carried out on a small scale in seven districts as supplementary to those conducted by district officers. The crop tests conducted by the Departmental officers are stated to have shown better results than those conducted by district officers; but the information obtained by the small staff of the Department is not yet of sufficient volume to serve as an effective check on the figures returned by district officers. The experiments conducted by district officers, on the other hand, were, as usual, unreliable owing mainly to carelessness in the selection of typical plots, and the results of these experiments do not, therefore, justify any modification of the provisional standards previously adopted for the province on the basis of the estimates of 1892. In the consolidated tables for British India these unrevised standards have therefore been retained in the statement of provincial averages (Table No. 1), but in the detailed statement of district figures, the average outturns based upon the experiments conducted during the quinquennium under review have been shown for each district, irrigated and unirrigated crops being classified separately. The provincial Director remarks that the district officers' figures should be supplemented by the results of a larger number of experiments made by the trained staff of the Agricultural Department under the new system, before the present provincial standards can be safely revised.

Punjab.—The revision of 1912 in the Punjab was made on the basis of the overcautious estimates of settlement officers, and it was remarked

that the yields then fixed were in consequence too low. The results of the experiments made in the quinquennium under review have confirmed that opinion, and in the present revision these yields, as also the cautious estimates of settlement officers, have been regarded as minima. In consultation with district and settlement officers and the Principal of the Agricultural College and other officers of the Department of Agriculture, increases have been made where the results of crop experiments indicate that enhancement is required, provided that the number of experiments has been sufficient. The system of conducting crop experiments has been revised and greatly improved, but unfortunately the new system came into force only with the spring harvest of 1917, at least so far as experiments conducted by district officers were concerned. The present revision shows that a general increase in the provincial averages has taken place. The notable increases are in the yield of rice from 688 to 782 lbs., of wheat from 726 to 791 lbs., of barley from 716 to 809 lbs., of maize from 908 to 1,040 lbs., of sugarcane from 1,686 to 1,933 lbs., and of cotton from 118 to 135 lbs. The Punjab Government remarks "that the present normal yields, though possibly slightly on the low side, are fairly reasonable, and that though it is no doubt difficult to determine how far the results of particular crops in particular harvests vary from the normal, the estimates at least for the main crops are steadily becoming accurate."

Burma.—In the quinquennium under review crop cuttings in Burma were as usual carried out for the most part under the supervision of sub-divisional and township officers, with occasional assistance from the Superintendent of Land Records and the subordinate Land Records staff. On a consideration of the results of these experiments and of those made in the previous quinquennia, no change has been made in the previous provincial estimate for rice in Lower Burma; but in the case of Upper Burma the estimates for all crops now reported exhibit considerable variations. The Director of Agriculture remarks that whatever be the value of the Lower Burma figures, in Upper Burma the number of experiments remains too small to justify confidence in the estimates. In order to show the main products only, the following deductions have, as usual, been made from the gross outturn of the crops, namely, for rice and jawar 33 per cent., and for cotton 70 per cent. The Local Government issued orders in 1916, in accordance with which new rules have been prescribed changing the whole system with effect from 1917-18, and entrusting supervision of the experiments very largely to the Agricultural Department. The results of the new system will be reported in the next return. It may be noted that the average outturns hitherto ascertained by the Director of Agriculture on the basis of crop cutting experiments have never been utilized for the purposes of estimating yields in crop forecasts, season and crop reports, etc., for which there exists a distinct set of normal outturns framed and revised from time to time by the Commissioner of Settlements and Land Records, Burma, mainly on the basis of settlement records. These normal outturns, which are published in the provincial Season and Crop Report, have been shown in the appended Table (No. 8) of district averages underneath the figures of crop cutting experiments reported by the Director of Agriculture, and have also been taken into account in calculating the averages for British India in Table No. 1. It is very desirable that one set of standard outturns should be framed, and revised or verified from time to time, on a consideration of data available from all sources and in consultation with the expert officers of the provincial Agricultural Department.

Central Provinces and Berar.—In the revision of 1912 experiments in the Central Provinces and Berar were selected with great care and due attention was paid to seasonal peculiarities and to classes of soil. In the quinquennium under review, as a result of a large number of experiments made with the rice crop in the Nagpur division slight changes have been made in the figures for that crop for the districts of that division. It has not, however, been considered necessary or advisable to make any change in the provincial averages for any crop.

Assam.—In consequence of the reformation of the province of Assam revised rules for the conduct of crop cuttings were framed in 1912, which were slightly modified in 1915. In accordance with the revised rules experiments were

conducted on all the crops of the province, for which forecasts are made and also on certain other crops, such as, *malikalai* (*phaseolus radiatus*), maize, and potato. The number of experiments made was much larger than in the preceding quinquennium, and their results are stated to have been on the whole satisfactory. The only district in which no experiments were made is the Naga Hills where the staff is stated to be inadequate for the purpose. As a result of the experiments made, the averages have been revised in most cases, the most important changes being the reduction of the yield of winter rice from 1,008 to 952 lbs., and the increase of the yield of autumn rice from 672 to 706 lbs., and that of sugarcane from 1,904 to 2,016 lbs. In the case of cotton a deduction varying between 40 and 50 per cent has been made in order to obtain the yield of lint.

North-West Frontier Province.—In the quinquennium under review experiments in the North-West Frontier Province were made by the district staff (Sub-divisional Officers, Tahsildars, and Naib-Tahsildars) in the two selected districts of Peshawar and Dera Ismail Khan. The results obtained from these experiments have been carefully scrutinized by the Revenue Commissioner, and, in cases where the figures were excessive, especially in Dera Ismail Khan, they have been modified after comparison with the settlement results when the experiments were conducted and worked out under the Settlement Officer's own supervision. For the other districts the averages previously adopted on the basis of experiments framed by Settlement Officers have been repeated. The provincial averages have been raised for all the crops except rice, jawar, and maize. The important changes are the increase of the yield of wheat from 633 to 676 lbs., of barley from 876 to 907 lbs., and of sugarcane from 2,430 to 2,660 lbs., and the reduction of jawar from 436 to 399 lbs.

Ajmer-Merwara.—The figures reported by Ajmer-Merwara are based mainly on the results obtained in 1916-17. The yield of jawar, maize, and cotton has been raised, and that of barley lowered; the most important changes being the increase of the yield of jawar from 137 to 322 lbs. and that of cotton from 170 to 291 lbs. The reported yield of unginned cotton has been reduced by two-thirds to obtain the yield of cleaned cotton (lint), but the figure still appears to be high. It is remarked by the Commissioner that the results of crop experiments, as they are at present conducted in Ajmer-Merwara, are of little, if any, value as a basis for estimating the average yield of any crop on average soil in a year of average character.

Delhi.—The return received from Delhi relates to the new province as constituted in 1912. The reported figures do not call for any special remark.

Coorg.—The only experiments made in Coorg have, as usual, been on rice. The average yield has been slightly lowered from 1,483 to 1,425 lbs. which is still very high in comparison with the reported yield of other provinces. The comparatively high yield of rice in Coorg was ascribed, in the previous return, partly to special attention being paid to rice cultivation since the decline of the coffee industry, and partly to the rice lands of Coorg being watered by hill streams which contain much manurial matter. The slight decrease in the present return is stated to be probably due to the selection of the crop and not to a decline in the productive capacity of the soil or bad years.

Mysore.—As a result of the experiments made in the Mysore State during the quinquennium under review, the averages for all the crops, except sugarcane, have been raised, the most important increases being in the outturns of rice (from 841 to 1,185 lbs.), ragi (from 581 to 728 lbs.), and cotton (from 79 to 122 lbs.). The yield of sugarcane has been reduced from 3,138 to 2,559 lbs. The present figures are based only on experiments conducted by the Revenue Department. It is stated that arrangements have been made for checking the figures by the results of experiments conducted by the Agricultural Department, and the Darbar hope in future to be able to furnish more accurate statistics.

AVERAGE YIELD OF CROPS

Average for British India	1916-17	1,185

Note.—(1) Average yield of both irrigated and unirrigated land is ascertained by multiplying the yield of irrigated land by the irrigated area cropped, adding the yield of unirrigated land multiplied by the unirrigated area cropped, and dividing the sum of these products by the total area cropped.

(2) The superseded figures of the previous quinquennia have been inserted merely to show the trend of the revision made in each period.

The estimates for Bihar and Orissa are the standards adopted provisionally by the Agricultural Department of the province, which are partly based on the information collected in 1892. The results of the experiments for the period ending 1916-17, as recorded in table No. 6, are not considered sufficiently reliable to justify a revision of the provincial estimates.

* The averages for Burma for 1916-17 are based on the normal outturns per acre given in the Season and Crop Report of Burma for 1916-17.

Central Provinces	Balaghat	1,068	7,203	1,030	Seoni	No. 1239, dated 22nd July 1916	

(a) There is no proper cultivation in the area, hence there is no land revenue.

(b) The area represent reserved forests, hence no revenue.

(c) The land transferred is chiefly occupied by P. W. D. Inspection bungalow, etc., and does not bring any revenue.

APPENDIX C

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL STATISTICS OF INDIA

- Agasi, agati, or avati* (*Sesbania grandiflora*)—A vegetable crop.
- Ajmud* (*Carum Roxburghianum*)—A kind of spice.
- Ajwan* (*Carum copticum*)—A kind of spice, “Bishop's weed.”
- Akurkura or jevandi* (*Chrysanthemum coronarium*)—A non-food crop.
- Amada or mamidi allam* (*Curcuma amada*)—A condiment.
- Ampasham* (*spondias magnifera*)—The hog plum.
- Arhar* (*Cajanus indicus*)—The pigeon pea.
- Arunelli* (*Phyllanthus distichus*)—Country star gooseberry.
- Bajra* (*Pennisetum typhoideum*)—The spiked millet.
- Bant* (Coorg)—Forest land granted for the service of the holding of rice-fields to which it is allotted, to be held free of revenue for grazing, leaf manure, firewood, and for timber required for the farm.
- Barbati* (*Vigna catjang*)—Asparagus, a food grain.
- Barti* (see *Wudalu*).
- Bel* (*Eglo Marmelos*)—A fruit.
- Bhagdari* (see *Narvadari*).
- Bilimbi* (*Averrhoa Bilimbi*)—A fruit.
- Bimb* (*Cephalandra indica*)—A fruit.
- Chaplash* (*Artocarpus Chaplasha*)—A tree grown mainly for timber.
- Chayroot* (*Oldenlandia umbellata*)—A dye.
- Cheena* (*Panicum miliaceum*)—The common millet.
- Cheik* (*Coix lachryma-jobi*)—A food grain, “Job's Tear.”
- Chikkudukayalu* (*Dolichos lablab*)—The Indian or popat bean.
- Cholam* (see *javar*).
- Cholanathu* (*Andropogon sorghum*)—Fodder jawar.
- Chowli* (see *Barbati*).
- Cumbu* (see *Bajra*).
- Dani* (*Nipa fruticans*)—A sedgeiferous palm, the leaves of which are used for thatching purposes, also for matting.
- Dhainucha* (*Sesbania aculeata*)—A plant cultivated mainly for green manure.
- Datura* (*Datura alba*)—A drug.
- Dividivi* (*Cesalpinia coriaria*)—A dye.
- Gajar*—Carrot.
- Garmal* (*Coleus barbatus*)—A fruit.
- Gondli* (see *Kutki*).
- Gorait* (United Provinces)—Village watchman.
- Henna* (*Lawsonia alba*)—A dye.
- Inám* (Madras)—Alienated villages or lands granted rent-free. *Whole inám* villages are entire villages held on such tenure; *minor ináms* are portions of villages, generally a number of fields, held on *inám* tenure.
- Iefagul* (*Plantago orata*)—A drug.
- Istamrási* (Punjab, Ajmer-Merwara)—A tenure which, though the revenue is assigned, is charged with a permanently fixed quit-rent.
- Izáfat* (Bombay)—A form of service tenure.
- Isára* (Berar)—Land leased under the waste-land rules on stipulated terms.
- Jagtr* (Berar)—Alienated villages or lands granted as rewards for service either rent-free or on payment of a quit-rent; such lands are hereditary.
- (Ajmer-Merwara)—Land granted revenue-free on condition of military service or as a charitable endowment.
- (Bombay)—Estates held hereditarily or for one or more generations on political considerations, no condition of service being attached to them.
- (Coorg)—Lands granted rent-free (1) to individuals on account of services rendered to the State by themselves or their ancestors, and (2) to some religious institutions.
- Jambo or naval*—Black plum.
- Jamma* (Coorg)—A tenure under which lands are held on half the ordinary assessment on condition that the holders should perform certain services to Government, if required, such as escorting Government treasure and rendering assistance to revenue officers on tour. These lands are inalienable without special sanction.

APPENDIX C—continued

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL STATISTICS OF INDIA—continued

- Jawar* (*Sorghum vulgare*)—The great millet.
- Jenugulu*—Asparagus.
- Jingili* (*Sesamum indicum*)—An oilseed.
- Jira*—Caraway.
- Jodi* (Madras)—Portion of the assessment reserved or left unalienated when lands were originally granted on favourable assessment. It is distinguished from quit-rent, which represents an additional charge (generally a certain proportion—one-eighth, one-fourth, one-half, or five-eighths—of the full assessment, *minus* the *jodi*) imposed when the tenures were enfranchised or converted into free-holds.
- Kalpayaru*—Kidney bean.
- Kangni* (*Panicum Italicum*)—Italian millet.
- Kamranga* (*Averrhoa Carambola*)—A fruit.
- Kanda* (*Dracontium*)—A vegetable crop.
- Kankrol* (*Momordica cochinchinensis*)—A vegetable crop.
- Karola* (*Momordica Charantia*)—A vegetable crop.
- Karuvapilai* (*Murraya Konigii*)—A condiment.
- Kavali* (*Sterculia urens*)—The Indian katura, a fruit.
- Kavathu* (*Dioscorea alata*)—A tuber used as a food stuff.
- Kodo* or *Kutki* (*Paspalum Scrobiculatum*)—A kind of millet.
- Khalsa* (Bombay)—Government occupancy or raiyatwari tenure.
- (Central Provinces)—Areas settled on malguzari or thekadari tenure, in contradistinction to zamindari.
- (Berar, Ajmer-Merwara)—Land paying full revenue to Government.
- Khatedar* (Berar)—A registered occupant whose name is entered by authority in the Government records as holding unalienated land.
- Khiraj* (Assam)—Land assessed to full revenue.
- Khoti* (Bombay)—A form of tenure, found chiefly in the Konkan, the holder of which is, in return for certain semi-proprietary rights, held responsible for payment of assessment on the area held.
- Kirni* (*Mimusops hexandra*)—A large tree cultivated chiefly in north-western India. It produces an olive-shaped yellow berry which is eaten chiefly during times of scarcity, and in the hot weather.
- Korai*—The Indian matting sedge.
- Kolini* (*Tephrosia purpurea*)—A drug.
- Koorka* (*Strobilanthes*)—A vegetable crop.
- Kuhudi* (*Panicum trypheron*)—A food grain.
- Kulthi* (*Dolichos biflorus*)—Horse gram.
- Kutki* (see Kodo).
- Kwin* (Burma)—An area averaging about one square mile selected as a survey unit on account of some natural features or administrative boundaries.
- Lakhiraj* (Assam)—Revenue-free land.
- Lobia* (see Barbati).
- Madder* (*Rubia tinctorum* and *R. cordifolia*)—A dye.
- Mahalkari* (Bombay)—A revenue and police officer in charge of a sub-division of a taluk.
- Mukhan sim*—The sword bean.
- Malguzari* (Central Provinces)—A form of tenure, the holder of which is responsible for the payment of the revenue assessed on a village.
- Mamiatdar* (Bombay)—The chief revenue and police officer (native) in charge of a taluk.
- Mankachu* (*Alocasia indica*)—A root crop.
- Marua* (*Elaeis coracana*)—A kind of millet.
- Marukkolundu* (*Artemisia vulgaris*)—The Indian worm wood.
- Mehwasi* (Bombay)—A proprietary tenure assessable to revenue at a lump sum.
- Muaf* (Manpur)—Any kind of land held revenue-free either for a fixed period or in perpetuity, but the term does not ordinarily apply to jagirs.
- Mung* (*Phaseolus Mungo*)—Green gram.

APPENDIX C—continued

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL STATISTICS OF INDIA—continued.

- Munsarin* (Berar).—A head native revenue officer.
- Narvadari, Bhagdari* (Bombay).—Forms of proprietary tenure involving joint responsibility for the assessment : the revenue in the former case being fixed in the lump, and in the latter distributed by rates over fields.
- Neerali* (*Gynocordia odorata*).—An oilseed.
- Neem or Margosa* (*Melia azadirachta*).—A non-food crop.
- Nela mulaka* (*Solanum xanthocarpum*).—The bogoda brinjal, a drug.
- Nisfkhiraj* (Assam).—Land liable to pay half the revenue which is ordinarily payable for the term of settlement.
- Palampat* (Berar).—Land held on payment of a quit-rent, but not necessarily hereditary.
- Odamula* (*Ochalandra Rheedii*).—A reed.
- Ol or zaminkand*.—The elephant foot, a root crop.
- Panchayat* (Bengal).—A committee of five respectable persons nominated or appointed by local officers of Government in a village or group of villages for the settlement of petty disputes among the people and for dealing with other small local matters, such as caste, occupation, sanitation, etc.
- Papay* (*Carica papaya*).—A fruit.
- Parpattigar* (Coorg).—A revenue officer in charge of a sub-division of a taluk.
- Parvar* (see Patol).
- Patel* (Coorg).—Village headman appointed by Government.
- Patol* (*Trichosanthes dioica*).—A vegetable crop.
- Peshkash* (Madras).—The fixed land revenue payable to Government on all permanently-settled estates.
- Pinakottai or pouna*.—The mast wood.
- Ponnagantikura* (*Alternanthera sessilis*).—A vegetable crop.
- Poramboke* (Madras).—Lands reserved for public or village communal purposes.
- Pöt ináms* (Bombay).—Lands sub-alienated in alienated villages.
- Pöt kharáb* (Berar).—The unculturable area included in a survey number.
- Puliyavara* (*Oxalis corniculata*).—A vegetable crop.
- Ragi* (see Marua).
- Rayatwari*.—State lands leased to cultivators for a fixed term. A form of tenure in which the settlement of revenue is made by Government with each individual occupant or cultivator of the land for a given term, without the intervention of a third party.
- Randhuni* (see Ajmud).
- Sabai grass* (*Ischaemum Augustifolium*).—A fibre plant.
- Sank-alu* (*Pachyrhizus angulatus*).—A root crop.
- Sapodilla* (*Achras Sapota*).—A fruit.
- Sebestan* (*Cordia Myxa*).—A fruit.
- Shanbög* (Coorg).—A village accountant appointed by Government.
- Shrotriem* (Madras).—Village held on grant (originally to Brahmins), wholly or partially revenue-free.
- Siris tree or vagai* (*Albizia Lebbeck*).—A non-food crop.
- Sorrell* (*Rumex vesicarius*).—A vegetable crop.
- Sother*.—Radish.
- Swank* (*Panicum frumentaceum*).—A food grain.
- Talukdari* (Bombay).—A form of proprietary right in force in the northern districts of Bombay.
- Tejpat* (*Cinnamomum Tamala* and *C. obtusifolium*).—A spice.
- Thathameda* (Upper Burma).—Household tax.
- Thattan payara* (see Barbati).
- Thekadar* (Central Provinces).—A farmer, a leaseholder, a middleman ; one who receives the rents from the cultivators and pays a stipulated sum to the proprietor.
- Thugyi* (Burma).—A village headman.
- Thotke grass* (*Imperata arundinacea*).—A small perennial grass used chiefly for thatching purposes.

APPENDIX C—concluded**VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL STATISTICS OF INDIA—concluded**

Til (*Sesamum indicum*).—An oilseed.

Uchhe (*Momordica muricata*).—A vegetable crop.

Udai (*Acacia eburnea*).—A thorny tree used as fuel or for fencing purposes.

Uhad-jamabandi (Bombay).—A proprietary tenure subject to fixed assessment.

Umbli (Coorg).—Lands granted on reduced rates to individuals on account of services rendered to the State by themselves or their ancestors.

Unda (*Pongamia glabra*).—An oil seed.

Urad (*Phaseolus radiatus*).—Black gram.

Wudalu or barti (*Panicum flavidum*).—A food grain.

Zamindar (Central Provinces).—A chief of minor importance who, while usually holding a large and compact estate on privileged tenure, has been restricted to the rank of an ordinary subject.

Zamindari.—An estate held on a fixed assessment under a deed of permanent ownership granted by Government.

APPENDIX D

ALPHABETICAL LIST OF CROPS CULTIVATED IN INDIA AND THEIR CLASSIFICATION
IN TABLE III.

NAME OF CROP		Botanical	Heads of classification in Table III
English or Vernacular			
Agasi, agati or avati	.	<i>Sesbania grandiflora</i>	38. Fruits and Vegetables including root crops.
Agave	.	<i>Agave spp.</i>	23. Fibres—others.
Aj mud or Randhuni	.	<i>Carum Roxburghianum</i>	18. Condiments and spices.
Ajwan, or Bishop's weed	.	<i>Carum Copticum</i>	18. " " "
Akunkura (<i>see</i> Chrysanthemum)
Al (<i>see</i> Morinda)
Aloes	.	<i>Aloe vera</i>	35. Drugs and Narcotics—others.
Alya (<i>see</i> Cress)
Amada or Mamidi allam	.	<i>Cureuma Amada</i>	18. Condiments and spices.
Amaranths	.	<i>Amarantus</i>	39. Misc. food crops.
Ampazham (<i>see</i> Plum)
Anise seed	.	<i>Pimpinella Anisum</i>	18. Condiments and spices.
Apple, wood	.	<i>Feronia elephantum</i>	38. Fruits and Vegetables including root crops.
" Rose	.	<i>Eugenia Jambos</i>	38. " " "
" Custard	.	<i>Anona squamosa</i> and <i>A. reticulata</i>	38. " " "
Areca nut or Betel nut	.	<i>Areca Catechu</i>	35. Drugs and Narcotics—others.
Arhar or pigeon pea	.	<i>Cajanus indicus</i>	10. Other food grains, etc.
Arnatto or Arnotto	.	<i>Bixa Orellana</i>	28. Dyes—others.
Arrowroot, West Indian	.	<i>Maranta arundinacea</i>	39. Misc. food crops.
" Wild or East Indian	.	<i>Cureuma augustifolia</i>	39. " " "
Artichoke	.	<i>Cynara Scolymus</i> or <i>Centaury Cardunculus</i>	38. Fruits and Vegetables including root crops.
Arum (edible), Kachu or Kachalu	.	<i>Colocasia Antiquorum</i>	38. " " "
Arunelli (<i>see</i> Gooseberry, country star)
Bajra (<i>see</i> Millet)
Barbati, Lobia, Jumgulu, Thattan-payara or Chowli (Asparagus)	.	<i>Vigna Catjang</i>	10. Other food grains, etc.
Barley	.	<i>Hordeum vulgare</i>	4. Barley.
Barti (<i>see</i> Wudalu)
Basil, sweet	.	<i>Ocimum Basilicum</i>	35. Drugs and Narcotics—others.
Beans	.	<i>Phaseolus lunatus</i>	38. Fruits and Vegetables including root crops.
" Asparagus (<i>see</i> Barbati)	.	<i>Canavalia ensiformis</i> , <i>C. gladiata</i>	38. Fruits and Vegetables including root crops.
" Sword or Makhan Sim	.	<i>Phaseolus vulgaris</i>	38. " " "
" French	.	<i>Psophocarpus tetragonolobus</i>	38. " " "
" Goa	.	<i>Dolichos lablab</i>	38. " " "
" Indian, Chikkudikayalu, or Popat	.	<i>Phaseolus aconitifolius</i>	38. " " "
" Kidney, Moth, or Kalpayaru	.	<i>Glycine hispida</i>	38. " " "
" Soy	.	<i>Beta vulgaris</i>	38. " " "
Beetroot	.	<i>Egle Marmelos</i>	38. " " "
Bel	.	<i>Piper Betle</i>	35. Drugs and Narcotics—others.
Betel vine
" nut (<i>see</i> Areca nut)
Bhindi (<i>see</i> Hibiscus, edible)	.	<i>Averrhoa Bilimbi</i>	38. Fruits and Vegetables including root crops.
Bilimbi	.	<i>Cephaelandra indica</i>	38. " " "
Bimb
Bishop's weed (<i>see</i> Ajwan)	.	<i>Coleus aromaticus</i>	35. Drugs and Narcotics—others.
Borage, country	.	<i>Solanum Melongena</i> , <i>S. longum</i>	38. Fruits and Vegetables including root crops.
Brinjal	.	<i>Solanum xanthocarpum</i>	35. Drugs and Narcotics—others.
" bogoda or nela mulaka
Buck wheat (<i>see</i> Wheat)

APPENDIX D—continued

ALPHABETICAL LIST OF CROPS—contd.

NAME OF CROP		Heads of classification in Table III
English or Vernacular	Botanical	
Cabbage	<i>Brassica oleracea</i> .	38. Fruits and Vegetables including root crops.
Caraway or Jira	<i>Carum Carui</i> .	18. Condiments and spices.
Black or Shahjira	<i>Carum Bulbocastanum</i> .	18. " " "
Cardamom Aromatic	<i>Amomum aromaticum</i> .	18. " " "
" greater	<i>subulatum</i> .	18. " " "
" lesser	<i>Elettaria Cardamomum</i> .	18. " " "
Carob or Locust tree	<i>Ceratonia Siliqua</i> .	37. Fodder crops.
Carrot or Gajar	<i>Daucus Carota</i> .	38. Fruits and Vegetables including root crops.
Cashew nut	<i>Anacardium occidentale</i> .	38. " " "
Cassava	<i>Manihot utilissima</i> and <i>M. palmata</i> .	38. " " "
Castor	<i>Ricinus communis</i> .	16. Oilseeds—others.
Cauliflower	<i>Brassica oleracea</i> .	38. Fruits and Vegetables including root crops.
Celery	<i>Apium graveolens</i> .	38. " " "
Chaplash (see Sam tree)	<i>Oldenlandia umbellata</i> .	28. Dyes—others.
Chayroot
Cheena (see Millet)
Cheik (see Job's Tear)
Chicory	<i>Cichorium Intybus</i> .	38. Fruits and Vegetables including root crops.
Chickling Vetch (see Vetch)
Chillies	<i>Capsicum</i> sp. .	18. Condiments and spices.
Chikkudukayalu (see Beans, Indian)
Cholum (see Millet)
Cholanathu (fodder Cholum)	<i>Andropogon Sorghum</i> .	37. Fodder crops.
Chowli (see Barbati)
Chrysanthemum, Akurkura, or Jevandi	<i>Chrysanthemum coronarium</i> .	40. Miscellaneous non-food crops.
Cinchona	<i>Cinchona</i> sp. .	33. Cinchona.
Cinnamon	<i>Cinnamomum zeylanicum</i> .	18. Condiments and spices.
Citron or lime or lemon	<i>Citrus medica</i> .	38. Fruits and Vegetables including root crops.
Cloves	<i>Eugenia caryophyllata</i> or <i>Caryophyllus aromaticus</i> .	18. Condiments and spices.
Coconut	<i>Cocos nucifera</i> .	38. Fruits and Vegetables including root crops.
Coffee	<i>Coffea arabica</i> .	30. Coffee.
Coriander	<i>Coriandrum sativum</i> .	18. Condiments and spices.
Cotton	<i>Gossypium</i> sp. .	21. Cotton.
Cress	<i>Lepidium sativum</i> .	38. Fruits and Vegetables including root crops.
Cucumber	<i>Cucumis sativus</i> .	38. " " "
Cumbu (see Millet)
Cumin	<i>Cuminum Cyminum</i> .	18. Condiments and spices.
Custard Apple (see Apple)
Dani	<i>Nipa fruticans</i> .	40. Miscellaneous non-food crops.
Date palm (see Palm)
Dhaincha	<i>Sesbania aculeata</i> .	40. Miscellaneous non-food crops.
Dhatura	<i>Datura alba</i> .	35. Drugs and Narcotics—others.
Dill or Sowa	<i>Peucedauum graveolens</i> .	16. Oilseeds—others.
Dividivi	<i>Cæsalpinia coriara</i> .	28. Dyes—others.
Drumsticks or Horse-radish	<i>Moringa pterygosperma</i> .	38. Fruits and Vegetables including root crops.
Elephant foot, Zaminkand or Ol	<i>Amorphophallus campanulatus</i> .	38. " " "
Elephant yam	<i>Tryphonium trilobatum</i> .	38. " " "
Fennel	<i>Fœniculum vulgare</i> .	18. Condiments and spices.

APPENDIX D—continued

ALPHABETICAL LIST OF CROPS—contd.

NAME OF CROP		Heads of classification in Table III
English or Vernacular	Botanical	
Fenugreek	<i>Trigonella foenum graecum</i>	18. Condiments and spices.
Field Vetch (<i>see</i> Vetch)
Fig	<i>Ficus Carica</i>	38. Fruits and Vegetables including root crops.
Flea-bane, purple	<i>Vernonia anthelminthica</i>	35. Drugs and Narcotics—others.
Flowers	40. Miscellaneous non-food crops.
Gajar (<i>see</i> Carrot)
Garlic	<i>Allium sativum</i>	18. Condiments and spices.
Garmal	<i>Coleus barbatus</i>	38. Fruits and Vegetables including root crops.
Gawar (<i>see</i> Vetch)
Ginger	<i>Zingiber officinale</i>	18. Condiments and spices
Goa bean (<i>see</i> Bean)
Gondli (<i>see</i> Millet)
Gooseberry, Cape—or tepari	<i>Physalis peruviana</i>	38. Fruits and Vegetables including root crops.
Country star or Arunelli	<i>Phyllanthus distichus</i>	38. " " "
Goose foot	<i>Chenopodium album</i>	38. Fruits and Vegetables including root crops.
Gourd, Snake	<i>Trichosanthes anguina</i>	38. " " "
Bottle	<i>Lagenaria vulgaris</i>	38. " " "
Towel	<i>Luffa acutangula</i>	38. " " "
Gourd, Red or melon pumpkin	<i>Cucurbita maxima</i>	38. " " "
Gourd Melon, white	<i>Benincasa hispida</i>	38. " " "
Gram	<i>Cicer arietinum</i>	9. Gram.
Field	<i>Phaseolus trilobus</i>	10. Other food grains, etc.
Green or Mung	<i>Phaseolus Mungo</i>	10. " " "
Horse or Kulthi	<i>Dolichos biflorus</i>	10. " " "
Black or Urad (Mati kalai)	<i>Phaseolus radiatus</i>	38. Fruits and Vegetables including root crops.
Grape	<i>Vitis vinifera</i>	15. Groundnut.
Groundnut	<i>Arachis hypogaea</i>	38. Fruits and Vegetables including root crops.
Guava	<i>Psidium Guajava</i>	37. Fodder crops.
Guinea grass	<i>Panicum maximum</i>	38. Fruits and Vegetables including root crops.
Gumberry	<i>Cordia Rothii</i>	34. Indian Hemp.
Hemp, Indian, or Ganja	<i>Cannabis sativa</i>	23. Fibres—others.
Sunn	<i>Crotalaria juncea</i>	23. " "
Deccan	<i>Hibiscus cannabinus</i>	23. " "
Sisal	<i>Agave sisalana</i>	28. Dyes—others.
Henna	<i>Lawsonia alba</i>	38. Fruits and Vegetables including root crops.
Hibiscus, edible or bhindi	<i>Hibiscus esculentus</i>
Horse-radish (<i>see</i> Drumsticks)
Indian Hemp (<i>see</i> Hemp)
Indian worm wood (<i>see</i> Marukkolundu)
Indigo	<i>Indigofera sumatrana</i> and <i>I. arrecta</i>	27. Indigo.
Isfagul	<i>Plantago ovata</i>	35. Drugs and Narcotics—others.
Jack fruit	<i>Artocarpus integrifolia</i>	38. Fruits and Vegetables including root crops.
Jambotree (<i>see</i> Plum, black)
Jawar (<i>see</i> Millet)
Jenugulu (<i>see</i> Barbatii)
Jevandi (<i>see</i> Chrysanthemum)
Jinjili (<i>see</i> Sesamum)
Jira (<i>see</i> Caraway)	10. Other food grains, etc.
Job's Tear or Cheik	<i>Coix lachryma-jobi</i>

APPENDIX D—continued

ALPHABETICAL LIST OF CROPS—contd.

NAME OF CROP		Heads of classification in Table III
English or Vernacular	Botanical	
Jujube	Zizyphus Jujuba	38. Fruits and Vegetables including root crops. 22. Jute.
Jute	Corchorus sp.
Kachu or Kachalu (see Arum)
Kakri (see Melon)
Kalipayaru (see Beans, Kidney)	Averrhoa Carambola	38. Fruits and Vegetables including root crops.
Kamrangga	Dracontium	38. Ditto. ditto.
Kanda	Momordica cochinchinensis	38. Fruits and Vegetables including root crops.
Kangni (see Millet)	Eriodendron anfractuosum	23. Fibres—others.
Kankrol	Momordica Charantia	38. Fruits and Vegetables including root crops.
Kaon (see Millet)	Murraya Koenigii	18. Condiments and spices.
Kapok	Stereulia urens	38. Fruits and Vegetable including root crops.
Karola	Dioscorea alata	38. Ditto. ditto.
Karuvalilai
Kavali or Indian Katura
Kavathu, pannikkavathu, pallakavathu, kolkavathu
Kharbuja (see Melon)
Khesari (see Vetch)
Khurfa (see Purslane)
Kidney bean (see Bean)
Kirni	Mimusops hexandra	39. Miscellaneous food crops.
Kodo (see Millet)
Korai (see Matting sedge, Indian)
Kokam (see Mangosteen)
Kolinji or vempali	Tephrosia purpurea	35. Drugs and Narcotics—others.
Koorka	Strobilanthes	38. Fruits and Vegetables including root crops.
Kuhudi	Panicum trypheron	10. Other food grains, etc.
Kulthi (see Gram)
Kutki (see Millet)
Lemon (see Citron)
Lentils	Lens esculenta or Ervam lens	10. Other food grains, etc.
Lettuce	Lactuca Scariola	38. Fruits and Vegetables including root crops.
Lime (see Citron)
Linseed	Linum usitatissimum	12. Linseed.
Lobia (see Barbati)
Locust tree (see Carob)
Lucerne	Medicago sativa	37. Fodder crops.
Madder	Rubia tinctorum and R. cordifolia.	28. Dyes—others
Mahua	Bassia latifolia and B. longifolia.	39. Miscellaneous food crops.
Maize	Zea Mays	8. Maize.
Makhan Sim (see Beans, Sword)	Mangifera indica	38. Fruits and Vegetables including root crops.
Mango	Garcinia indica	38. " " "
Mangosteen or Kokam	Alocasia indica	38. " " "
Mankachu	Melia azadirachta	40. Miscellaneous non-food crops.
Margosa or Neem tree	Bouea burmanica	38. Fruits and Vegetables including root crops.
Marians	Origanum vulgare	18. Condiments and spices.
Marjoram
Marua (see Millet)	Artemesia vulgaris	40. Miscellaneous non-food crops.
Marukkolundu or Indian wormwood

APPENDIX D—continued

ALPHABETICAL LIST OF CROPS—contd.

NAME OF CROP		Botanical	Heads of classification in Table III
English or Vernacular			
Mast wood		<i>Calophyllum inophyllum</i>	16. Oilseeds—others.
Mati kalai (<i>see</i> Black gram)	
Matting sedge, Indian or Korai		<i>Cyperus corymbosus</i> , <i>C. tegetum</i>	23. Fibres—others.
Medlar, Indian		<i>Vangueria edulis</i>	38. Fruits and Vegetables including root crops.
Melon, Kharbuja		<i>Cucumis Melo</i>	38. " " "
" Kakri		<i>Cucumis Melo</i> var. <i>momordica</i>	38. " " "
" Musk		<i>Cucurbita moschata</i>	38. " " "
" Water		<i>Citrullus vulgaris</i>	38. " " "
" White Gourd (<i>see</i> Gourd)	
Metha (Fenugreek)		<i>Trigonella foenum-græcum</i>	18. Condiments and spices.
Millet, Common or Cheena		<i>Panicum miliaceum</i>	10. Other food grains, etc.
" Great or jawar or cholam		<i>Sorghum vulgare</i>	5. Cholam or Jawar.
" Italian, Kangni, or Kaon		<i>Panicum italicum</i> or <i>Setaria italica</i>	10. Other food grains, etc.
" Kodo or Varagu		<i>Paspalum scrobiculatum</i>	10. " "
" Little, Kutki, or Gondli		<i>Panicum miliare</i>	10. " "
" Marua or Ragi		<i>Elusine Coracana</i>	7. Ragi or marua.
" Spiked, Bajra or Cumbu		<i>Pennisetum typhoideum</i>	6. Cumbu or Bajra.
Mint or Pudina		<i>Mentha arvensis</i>	18. Condiments and spices.
Morinda or Ál		<i>Morinda tinctoria</i>	28. Dyes—others.
Moth (<i>see</i> Bean)	
Mulberry		<i>Morus indica</i>	40. Miscellaneous non-food crops.
Mung (<i>see</i> Gram)	
Mustard		<i>Brassica</i> sp.	14. Rape and Mustard.
Naval (<i>see</i> Plum, black)	
Neerali		<i>Gynocordia odorata</i>	16. Oilseeds—others.
Neem tree (<i>see</i> Margosa)	
Niger Seed or Sorguja		<i>Guizotia abyssinica</i>	16. Oilseeds—others.
Nutmeg		<i>Myristica fragrans</i>	18. Condiments and spices.
Oats		<i>Avena sativa</i>	37. Fodder crops.
Odamula (reeds)		<i>Ochlandra Rheedii</i>	40. Miscellaneous non-food crops.
Ól (<i>see</i> Elephant foot)	
Onion		<i>Allium Cepa</i>	18. Condiments and spices.
Opium		<i>Papaver somniferum</i>	29. Opium.
Orache, garden (<i>see</i> spinach)	
Oranges		<i>Citrus Aurantium</i>	38. Fruits and Vegetables including root crops.
Palm, Date		<i>Phoenix sylvestris</i>	20. Sugar—others.
" Palmyra		<i>Borassus flabellifer</i>	20. " "
Papay		<i>Carica papaya</i>	38. Fruits and Vegetables including root crops.
Parvar or Patol		<i>Trichosanthes dioica</i>	38. " " "
Peach		<i>Prunus persica</i>	38. " " "
Peas		<i>Pisum sativum</i> or <i>Pisum arvense</i> .	10. Other food grains, etc.
Peanut (<i>see</i> Groundnut)	
Pepper		<i>Piper</i> or <i>Capsicum</i>	18. Condiments and spices.
" Black		<i>Piper nigrum</i>	18. " " "
" Long		<i>Piper longum</i>	18. " " "
Pigeon or bottle grass		<i>Setaria glauca</i>	10. Other food grains, etc.
Pigeon pea (<i>see</i> Arhar)	
Pimakottai, Pouuna (<i>see</i> Mastwood)	
Pine apple		<i>Ananas sativa</i>	38. Fruits and Vegetables including root crops.
Plantain		<i>Musa sapientum</i>	38. " " "
Plum, black, Jambo tree or Naval		<i>Eugenia Jambolana</i>	38. " " "
" Hog, or Ampazham		<i>Spondias mangifera</i>	38. " " "
Poi (<i>see</i> Spinach)

Pomegranate	<i>Punica granatum</i>	38. Fruits and Vegetables including root crops.
Pomelo	<i>Citrus decumana</i>	38. " " "
Ponnagantikura	<i>Alternanthera sessilis</i>	38. " " "
Potato	<i>Solanum tuberosum</i>	38. " " "
" Sweet	<i>Ipomoea Batatas, Batatas edulis.</i>	38. " " "
Pudina (<i>see</i> Mint)	<i>Oxalis corniculata</i>	38. Fruits and Vegetables including root crops.
Puliayvara	<i>Cucurbita pepo</i>	38. " " "
Pumpkin	<i>Raphanus sativus</i>	38. Fruits and Vegetables including root crops.
Pumpkin Melon (<i>see</i> Gourd, red)
Radish or Sother	<i>Brassica sp.</i>	14. Rape and Mustard.
Ragi (<i>see</i> Millet)	<i>Rubus lasiocarpus</i>	38. Fruits and Vegetables including root crops.
Randhuni (<i>see</i> Ajmud)	<i>Boehmeria nivea</i>	23. Fibres—others.
Kapeseed	<i>Oryza sativa</i>	2. Rice.
Raspberry	<i>Hibiscus subdariffa</i>	38. Fruits and Vegetables including root crops.
Rhea	<i>Hevea brasiliensis, manihot Glaziovii.</i>	40. Miscellaneous non-food crops.
Rice	<i>Ischocnemum augustifolium</i>	23. Fibres—others.
Rose apple (<i>see</i> Apple)	<i>Carthamus tinctorius</i>	28. Dyes—others.
Roselle	<i>Crocus sativus</i>	28. " " "
Rubber (India)	<i>Salvia officinalis</i>	18. Condiments and spices.
Sabai grass	<i>Artocarpus Chaplasha</i>	40. Miscellaneous non-food crops.
Safflower	<i>Pachyrhizus angulatus</i>	38. Fruits and Vegetables including root crops.
Saffron	<i>Achras Sapota</i>	38. " " "
Sage	<i>Cordia myxa</i>	38. Fruits and Vegetables including root crops.
Sam tree or Chaplash	<i>Cassia angustifolia</i> and <i>C. ovata.</i>	35. Drugs and Narcotics—others.
Sank-alu	<i>Sesamum indicum</i>	13. Sesamum.
Sapodilla	<i>Trapa bispinosa</i>	38. Fruits and Vegetables including root crops.
Sawan (<i>see</i> Swank)	<i>Albizia Lebbek</i>	40. Miscellaneous non-food crops.
Sebestan	<i>Sapindus trifoliatus</i>	35. Drugs and Narcotics—others.
Senna	<i>Rumex vesicarius</i>	38. Fruits and Vegetables including root crops.
Sesamum, til or jinjili
Shahjira (<i>see</i> Caraway, black)
Shama (<i>see</i> Swank)
Singhara or water caltrop
Siris tree or vagai
Sisal hemp (<i>see</i> Hemp)
Soapnut or Kumkudu-Kaya
Sorguja (<i>see</i> Niger seed)
Sorrell
Sowa (<i>see</i> Dill)
Sother (<i>see</i> Radish)
Soy bean (<i>see</i> Bean)
Spelt wheat (<i>see</i> Wheat)
Spinach	<i>Spinacea oleracea</i>	38. Fruits and Vegetables including root crops.
" Indian or poi
" Mountain, or Garden Orache	<i>Basella alba</i>	38. " " "
Strawberry	<i>Atriplex hortensis</i>	38. " " "
Sugarcane	<i>Fragaria vesca</i>	38. " " "
	<i>Saccharum officinarum</i>	19. Sugarcane.

APPENDIX D—concluded

ALPHABETICAL LIST OF CROPS—concl'd.

NAME OF CROP		Heads of classification in Table III
English or Vernacular	Botanical	
Sunflower	<i>Helianthus Annuus</i> .	16. Oilseeds—others.
Swallow-wort	<i>Calotropis</i> sp. .	23. Fibres—others.
Swank, Sawan, or Shama	<i>Panicum frumentaceum</i> .	10. Other food grains, etc.
Sweet flag	<i>Acorus Calamus</i> .	35. Drugs and Narcotics—others.
Sweet potato (<i>see</i> Potato)
Tamarind	<i>Tamarindus indica</i> .	18. Condiments and spices.
" Manila	<i>Pithecellobium dulce</i> .	38. Fruits and Vegetables including root crops.
Taramira	<i>Eruca sativa</i> .	14. Rape and Mustard.
Tea	<i>Camellia Thea</i> .	31. Tea.
Tejpat	<i>Cinnamomum Tamala</i> and <i>C. obtusifolium</i>	18. Condiments and spices.
Tepari (<i>see</i> Gooseberry)
Thattan-payara (<i>see</i> Barbati)
Thetke (grass)	<i>Imperata arundinacea</i> .	40. Miscellaneous non-food crops.
Til (<i>see</i> Sesamum)
Tobacco	<i>Nicotiana Tabacum</i> and N. <i>Rustica</i>	32. Tobacco.
Tomato	<i>Lycopersicum esculentum</i> .	38. Fruits and Vegetables including root crops.
Tori, Toria	<i>Brassica Napus</i> .	14. Rape and Mustard.
Turmeric	<i>Curcuma longa</i> .	18. Condiments and spices.
Turnip	<i>Brassica Rapa</i> .	38. Fruits and Vegetables including root crops.
Uchhe	<i>Momordica muricata</i> .	38.
Udai	<i>Acacia eburnea</i> .	40. Miscellaneous non-food crops.
Unda	<i>Pongamia glabra</i> .	16. Oilseeds—others.
Urad (<i>see</i> Gram)
Varagu (<i>see</i> Millet)
Vagai (<i>see</i> Siris tree)
Vempali (<i>see</i> Kolinji)
Vetch, Field or gawar	<i>Cyamopsis psoraloides</i> .	37. Fodder crops.
Chickling or khesari	<i>Lathyrus sativus</i> .	10. Other food grains, etc.
Water caltrop (<i>see</i> Singhara)
" melon (<i>see</i> Melon)
Wheat	<i>Triticum sativum</i> .	3. Wheat.
" Buck	<i>Fagopyrum esculentum</i> .	10. Other food grains, etc.
" Spelt	<i>Triticum sativum</i> var Spelta. .	3. Wheat.
Wood apple (<i>see</i> Apple)
Wudalu or barti	<i>Panicum flavidum</i> .	10. Other food grains, etc.
Yams	<i>Dioscorea</i> sp. .	38. Fruits and Vegetables including root crops.
Zaminkand (<i>see</i> Elephant foot)
